**CURTAIN WALL**—Reinforced concrete. Cost not stated. San Jose, Santa Clara Co., Cal. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Plans and specifications having been approved by the County Supervisors, bids have been ordered received for the following work. For the construction of a reinforced concrete curtain wall on Campbell Creek in the County of Santa Clara, and for the improvement of New avenue. Bids on the above work close November 1st, 11 a. m. Further information may be had from the County Surveyor at San Jose.

**LIGHT TOWER**—Steel construction. Cost not stated. San Jose, Santa Clara Co., Cal. Engineer, City Engineer, San Jose. Owners, City of San Jose. Bids are now being taken by the City Council for the construction of the tower at the corner of Santa Clara and Market streets. The bids close October 25th. Further information, together with plans and specifications may be

had from the City Engineer at San Jose.

**MAUSOLEUM**—1 story, granite and concrete, \$10,000. Home of Peace, San Mateo Co., Cal. Architects, Cunningham & Politeo, First National Bank Bldg., S. P. Owners, I. Cohn Estate. Will contain several receptacles. Interior finish Caen stone and plaster. Ornamental iron and bronze, art glass and modern plumbing. Exterior faced with granite. Plans being prepared.

**RESIDENCE**—2 story and base, brick and stone, \$150,000. Hillsborough, San Mateo Co., Cal. Architect, Willis Polk, Hobart Bldg., S. P. Owner, W. B. Bourne. Location, near Hillsborough. Will contain 26 rooms, a number of baths, conservatory. Interior finish hardwood. Hardwood floors. Steam heat, oil burning system and refrigerating plant. Bath rooms finished in tile. Exterior faced with pressed brick and cut stone. Plans complete and figures being taken on general contract. Foundation work and excavating awarded.

**RESIDENCE**—1 story and base, frame, \$2,000. San Jose, Santa Clara Co., Cal. Architect, none. Owner, J. A. Wagner, 320 South 16th street, San Jose. Location, South Hollywood between 2nd and 3rd streets. Will contain six rooms and bath. Interior finish pine and redwood. Some hardwood floors. Open fire place and tile mantel. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**FIRE ALARM SYSTEM**—Cost not stated. Gilroy, Santa Clara Co., Cal. Engineer, none. Owners, Town of Gilroy. Plans and specifications for the installation of a fire alarm system for this city have been accepted by the City Council and the Clerk has been instructed to advertise for bids on the proposed work.

### Contracts Awarded.

**RESIDENCE**—1½ story and base, frame. Cost not stated. Pacific Grove, Monterey Co., Cal. Architect's name not given. Owner, H. G. Jorgenson. Pacific Grove. Contractor, L. D. Brishin, Pacific Grove. Contract price not stated.

**ROAD IMPROVEMENT**—Cost not stated. Salinas, Monterey Co., Cal. Engineer, County Surveyor, Salinas. Owners, Monterey County. Contractors, Haggard & Parkhurst, Ruthven & Serrano and F. F. Moore, Monterey. Contract price not stated.

## MARIN, CONTRA COSTA AND SONOMA COUNTIES

**ROAD IMPROVEMENT**—\$9,000. San Rafael, Marin Co., Cal. Engineer, City Engineer, San Rafael. Owners, City of San Rafael. The City Trustees have announced that the San Joaquin toll road from Mary street to the city limits near the flood gate will be raised to three feet above high tide, graded and macadamized.

**STREET IMPROVEMENTS**—Cost not stated. Sausalito, Marin Co., Cal. Engineer, Town Engineer, Sausalito. Owners, Town of Sausalito. Bids will be opened on October 25th for grading of West street from Main to Valley and on Valley street from Fourth street to West street. The construction of a retaining wall at the inter-

section of West street and Valley street. The construction of timber highway bridge on West street from the southerly line of Main street to a point 100 feet southerly from said southerly line of Main street produced. The laying and construction of 40 feet of 30-inch vitrified, saltglazed, ironstone pipe in and across West street between Valley street and Main street.

**RESIDENCE**—2 story and base, frame, \$3,500. Santa Rosa, Sonoma Co., Cal. Architects, Turton & Herbert, Santa Rosa Bank Bldg., Santa Rosa. Owner, F. L. Hardefeld. Will contain eight rooms, bath and sleeping porch. Interior pine with some elm panels and white enamel. Hardwood floors, open fire places and tile or brick mantels. Tile floors and wainscot in bath room. Automatic water heater. Exterior covered with cement plaster. Plans being prepared.

**RESIDENCES**—10, 2 story and base, reinforced concrete, \$50,000. Santa Venetia, Marin Co., Cal. Architect's name not given. Owners, Santa Venetia Co., President Mabry McMahan, 204 Mutual Bank Bldg., S. F. Contractors, San Francisco Construction Co., S. F. Contract price, \$50,000. Note: Mr. McMahan states that early in 1916 his company will expend in the neighborhood of \$250,000 more in construction work at Santa Venetia.

**BATH HOUSE FILTER**—Cost not stated. San Rafael, Marin Co., Cal. Engineer, City Engineer, San Rafael. Owners, City of San Rafael. Bids will be opened on Nov. 1st at 8 p. m. for furnishing and installing a Continental Pressure Filter or equal in the Municipal Baths.

**HOTEL RESORT**—1 and 2 story and base, frame, \$35,000. Agua Caliente, Sonoma Co., Cal. Architects, O'Brien Bros., 240 Montgomery street, S. F. Owners, Agua Caliente Springs Resort. Main portion 125 by 34 feet with wings 88 by 34 feet. Will contain office, lobby, ladies' parlor and 80 rooms with baths. Interior finish pine with some hardwood floors. Central heating system, special buildings for laundry and boiler equipment. Exterior covered with cement plaster. Clay tile roof. Plans being prepared.

**ELECTROLIER SYSTEM**—\$48,000. Napa, Napa Co., Cal. Engineer, City Engineer, Napa. Owners, City of Napa. At a recent meeting the Advisory Board of the City of Napa, the City Council, City Engineer and the City Attorney, discussed the feasibility and advisability of establishing an electrolier lighting system in Napa. Although no definite action was taken it is thought the work will soon go under way.

**STREET IMPROVEMENT**—Cost not stated. Vallejo, Solano Co., Cal. Engineer, City Engineer Kilkenny, Vallejo. Owners, City of Vallejo. Plans prepared by City Engineer Kilkenny for the improvement of the intersection of Capitol and Branciforte streets have been adopted by the City Council and bids for the work will soon be called for.

**STORES**—1 story and base, brick. Cost not stated. Martinez, Contra Costa Co., Cal. Architects, Osier Bros., 165 Post street, S. F. Owner, A. E. Blum. Location, Main and Castro streets, covering an area of 70 by 30 feet. Will

contain nine stores. Interior finish pine. Patent store fronts. Exterior faced with pressed brick. Plans complete and figures being taken.

### FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA

**IRRIGATION PROJECT**—Cost not stated. Madera, Madera Co., Cal. Engineer's name not given. Owners, Madera Canal and Irrigation Co., Madera. The Madera Canal and Irrigation Co. has under consideration a project to build an irrigation dam across the San Joaquin River at Polasky or a short distance above Friant, near the mouth of Hildreth creek. The dam would store part of the flood waters of the river and would supply water to irrigate, it is estimated, 120,000 acres of land, chiefly in Madera County. The dam would be 230 feet high from bed rock and would back the water for 11 miles, covering about 4,000 acres. The level of the canal would be 400 feet above the sea, making it possible to irrigate much of the high plain land of Madera County. It is said that this site was chosen by Government engineers some time ago as the most feasible for a dam across the San Joaquin. The water would be diverted into Cottonwood creek, and the land near Borden, Berenda and Madera would be served.

**HOTEL**—2 story and base, artificial stone. Cost not stated. Exeter, Tulare Co., Cal. Architect, none. Owner, D. A. Waechter, Exeter. Location, 5th street. Will contain a number of single rooms and several public baths. Interior finish pine. Steam heat and hot water system. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**EARTH WORK**—Cost not stated. Colusa, Colusa Co., Cal. Engineer's name not given. Owners, Brown-Arnold Co., Colusa. The earth work for the canal and laterals on the Brown-Arnold rice project, one mile southwest of the town of Colusa, is now ready for bids. Intending bidders may call at Chas. de St. Maurice's office and examine the plans and specifications.

**HIGHWAY CONSTRUCTION**—Cost as follows. Bakersfield, Kern Co., Cal. Engineer, County Surveyor, Bakersfield. Owners, Kern County. Mesmer & Rice, Marsh-Strong Bldg., L. A., presented the lowest figure at \$3,900 for asphaltic top for a three-mile section on the Bellevue road, and at \$1,300 for paving Brundage Lane. Contracts have not been awarded.

**SEWER CONSTRUCTION**—Cost as follows. Bakersfield, Kern Co., Cal. Engineer, City Engineer, Bakersfield. Owners, City of Bakersfield. At the last meeting of the City Council Lloyd Stroud put in the lowest bid on work to be done in constructing sewer districts 27, 28, and 29 in East Bakersfield, but action in letting the contract was deferred for one week to investigate the reason for a higher bid per foot being placed for district 29 than for the other districts. Stroud's bids were \$720.49, \$483.02 and \$2,513.20 on the three contracts.

**RAM AND CURTAIN WALL PROTECTION**—Reinforced concrete. Cost not stated. Daffes Reservoir Site, Stanislaus Co., Cal. Engineer, Chief Engineer, Modesto Irrigation District. Owners, Modesto Irrigation District. Bids will be opened on November 2nd for constructing reinforced concrete protecting race and curtain wall on the up-stream face of dam No. 1.

**SEWER SYSTEM**—\$40,500. Visalia, Tulare Co., Cal. Engineer, City Engineer, Visalia. Owners, City of Visalia. Contractor, Michael Murphy, 1321 Mission street, Berkeley. Contract price, \$40,500.

**RESIDENCES**—2, 2 story and 1, 1 story, frame, \$2,750 and \$1,800. Fresno, Fresno Co., Cal. Architect, none. The following Day Labor jobs are reported as about to be started in Fresno: W. H. Ackerman, Fresno, 2, 2 story frame dwellings. G. W. Lightowler, 940 M street, 1 story frame dwelling.

**BRIDGES AND CULVERTS**—Reinforced concrete. Cost not stated. Bakersfield, Kern Co., Cal. Engineer, County Surveyor, Bakersfield. Owners, Kern County. Bids will be opened on November 8th at 10 a. m. for grading, construction of bridges and culverts on Division 10, Section 7, Bakersfield-Mojave road.

**BRIDGE**—Concrete, \$1,750. Visalia, Tulare Co., Cal. Engineer, County Surveyor, Visalia. Owners, Tulare County. Bids of Thompson Bros. and Noble & Noble were taken under advisement for the construction of the Mill Creek bridge. The former bid \$1,735 and the latter \$1,941.

**OIL STORAGE TANKS**—Cost not stated. Hanford, Kings Co., Cal. Engineer, Eng. Dept. Union Oil Co., S. F. Owners, Union Oil Co. The City Trustees at their last meeting granted a permit to W. L. Matlock, a special agent of the Union Oil Company, for the erection of tanks to hold petroleum products in the city limits on lots 1 to 8 in block 80 or lots 14, 15 and 16 in block 81. Three steel tanks with a capacity of 20,000 gallons will be built, and will be equipped with all modern safety devices to guard against fire.

**RESIDENCE**—1 story and base, frame, \$5,500. Visalia, Tulare Co., Cal. Architect, Fred L. Swartz, Rowell Bldg., Fresno. Owner, Miss Mary Frances Chatten. Will contain seven rooms, two baths and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors. Open fire place and furnace heat. Bath rooms finished in tile. Automatic water heater. Mantels tile or brick. Exterior covered with cement plaster. Plans being prepared.

**SCHOOL**—1 story and base, brick. Cost not stated. Goshen, Tulare Co., Cal. Architect, Ernest J. Kump, Rowell Bldg., Fresno. Owners, Goshen School District. Bids will be received on October 26th at 1 p. m. for constructing a four class room building. Exterior faced with pressed brick. Bids are to include heating and water system. Plans can be secured from the architect.

**ROAD IMPROVEMENT**—Cost not stated. Bakersfield, Kern Co., Cal. Engineer, County Engineer, Bakersfield. Owners, Kern County. Bids will be received on November 1st for three miles of paving on Bellevue road near Bakersfield. Bids formerly received

for this work have been rejected. Bids will also be received at the same time for concrete paving on Brundage Lane, H street to Union avenue. Former bids for this work were also rejected.

**SEWER CONSTRUCTION**—Cost as follows. Fresno, Fresno Co., Cal. Engineer, City Engineer, Fresno. Owners, City of Fresno. Contractors, Thompson Bros., 1514 H street, Fresno. Contract price, \$2,035 for 11-inch sewer in Ventura street and \$537 for 6-inch sewer in an alley in block 28.

**RETAINING WALLS**—Reinforced concrete. Cost not stated. Fresno, Fresno Co., Cal. Engineer, County Surveyor, Fresno. Owners, Fresno County. Bids will be received by the Board of Supervisors up to 2 p. m. of November 1st, 1915, for the construction of four concrete retaining walls for the bridge across Kings River near Sanger, in accordance with plans and specifications on file in the office of the Board.

### Contracts Awarded.

**WAREHOUSE ADDITION**—1 story, brick, \$10,500. Calwa, Fresno Co., Cal. Architect, John H. Powers, 460 Montgomery street, S. F. Owners, Fresno Bonded Warehouse Co., Contractor, John Biller, 460 Montgomery street, S. F. Contract price, \$10,500.

**BRIDGES**—Reinforced concrete. \$4,538. Modesto, Stanislaus Co., Cal. Engineer, County Surveyor, Modesto. Owners, Modesto County. Contractors, F. F. Reames and R. N. Simpson, Modesto. Contract price, \$4,538.

**CANAL LINING**—Concrete, \$62,962.25. Modesto, Stanislaus Co., Cal. Engineer, Chief Engineer F. C. Herrmann, Modesto. Owners, Modesto Irrigation District. Contractor, James Willison, Half Moon Bay. Contract price, \$62,962.25.

## SACRAMENTO, STOCKTON AND NORTHERN CALIFORNIA.

**RESIDENCE**—1 story and base, frame, \$2,500. Sacramento, Cal. Architect, none. Owner, N. L. Bishop, 2616 U street, Sacramento. Location, Y street. Will contain six rooms and bath. Interior finish pine and redwood. Some hardwood floors. Open fire place and tile mantel. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**RESIDENCES**—2, 1 story and base, frame, \$2,000 each. Stockton, San Joaquin Co., Cal. Architect, Ralph P. Morrell, Odd Fellows Bldg., Stockton. Owners, Cye Moring & Bros., Commercial Bank Bldg., Stockton. Location, Park View Tract. Will contain five rooms and bath each. Interior finish pine and redwood. Open fire places and tile mantels. Exteriors covered with rustic. Plans being prepared. Work will be done by Day Labor.

**BRIDGE**—Reinforced concrete. \$2,206. Sacramento, Cal. Engineer, City Engineer Frank C. Miller, Sacramento. Owners, City of Sacramento. Bids are now being taken by the City Park Board for the construction of a bridge in Del Paso Park, to cost approximately \$2,300. Two sets of plans will be offered hidders, one by City Engineer Frank C. Miller and the other by Jenkins & Wells. Further information

may be had from the City Engineer at Sacramento.

**BRIDGE**—Reinforced concrete. Cost not stated. Ukiah, Mendocino Co., Cal. Engineer, County Surveyor, Ukiah. Owners, Mendocino County. At the last meeting of the City Trustees only one bid was received by the board for the construction of a wooden bridge across Orr Creek at Oak street. Walter B. Dickie offered to do the work for \$1,150 this amount including grading and filling, with driven piles for \$1,075 with piles on mud sills. Action on awarding a contract was laid over until October 11th. Trustee Charlton recommended that bids be called for the construction of a concrete bridge at the same location, in accordance with the plans prepared by the City Engineer. It is said that the cost of a concrete bridge will run about \$3,000. Plans and specifications may be had from the City Engineer at Ukiah.

**LEVEE CONSTRUCTION**—\$30,000. Galt, Sacramento Co., Cal. Engineer's name not given. Owners, Allen Estate. The Allen Estate for the past few weeks have working on a new levee on their place known as the old Hicks ranch. Approximately two miles of levee work has been completed of the three miles to be done. The levee is from five to seven feet high.

**SEWER CONSTRUCTION**—Cost not stated. Sonora, Tuolumne Co., Cal. Engineer, Town Engineer, Sonora. Owners, Town of Sonora. Trustee Doyle reported at the last meeting of the Trustees that he had gone over the town with the engineer and obtained complete data and approximate cost of completing the sewer system. The engineer was instructed to prepare plans for the work. Further information will be given on this work when bids are called.

**IRRIGATION PROJECT**—\$285,000. Stockton, San Joaquin Co., Cal. Engineer not selected. Owners, Tracy-Bethany Irrigation District. The people of the Tracy-Bethany district by a vote of 79 to 11 favored the formation of the west side irrigation district, comprising approximately 11,500 acres, and, at the same time, elected their officers. The directors and officers elected are: S. A. Shearer, district one; Fred von Sostén, district two; Louis Parker, district three; Henry Frerichs, district four; Peter D. Schmidt, district five; Mrs. Dollie McGee, treasurer; George Parker, assessor; Cornelius Looney, tax collector. Rough estimates for pumping water on the lands of the district are placed at about \$255,000. One of the first important matters to be attended to will be the naming of an engineer to prepare plans and estimates for the district, preparatory to submitting a bond issue to the voters of the district.

**STEWARD'S COTTAGE**—1 story and base, frame, \$15,000. Ukiah, Mendocino Co., Cal. Architect, State Architect George R. McDougall, Sacramento. Owners, State of California. Plans are being prepared for a steward's cottage and additions to the buildings at the Mendocino State Hospital. Further mention will be made of this work.

### Contracts Awarded.

**BRIDGES**—Cost as follows. Eureka, Humboldt Co., Cal. Engineer, County Surveyor, Eureka. Owners, Humboldt

County. Contractor, Metzer-Fraser Co., Eureka, trestle bridge, \$22,200. D. C. Cornell, Eureka, culvert, \$372.

**BRIDGES**—Reinforced concrete, \$1,045.76. Ukiah, Mendocino Co., Cal. Engineer, County Surveyor, Ukiah. Owners, Mendocino County. Contractor, T. J. Hyman, Ukiah. Contract price, \$1,045.76.

**LUMBER TRAMWAY**—\$35,536. Gray's Flat, Plumas Co., Cal. Engineer's name not given. Owners, Spanish Peak Lumber Co. Contractors, United States Steel Products Co., New Jersey. Contract price, \$35,536.

**STORM WATER SEWER**—\$26,007.55. Stockton, San Joaquin Co., Cal. Engineer, City Engineer, Stockton. Owners, City of Stockton. Contractors, A. B. Munson & Son, Stockton. Contract price, \$26,007.55.

## LOS ANGELES AND SOUTHERN CALIFORNIA.

**SEWERS**—Cost not stated. Orange, Orange Co., Cal. Engineer, City Engineer, Orange. Owners, City of Orange. Plans and specifications for the construction of sewers on East Almond avenue, East Washington avenue, North Cypress street and West Palm avenue have been approved by the City Council and bids will be called for immediately. Further information may be had from the City Engineer at Orange.

**ROAD CONSTRUCTION**—Cost not stated. San Luis Obispo, San Luis Obispo Co., Cal. Engineer, County Surveyor, San Luis Obispo. Owners, San Luis Obispo County. Plans and specifications for the excavation and construction along the line of certain portions of the right-of-way on the extension of the Morro Creek road, work covers excavation and filling, etc., between Station O and Station 262-0, were approved by the County Supervisors at their last meeting, and bids have been ordered received until November 2 at 10 a. m. Further information may be had from the County Surveyor at San Luis Obispo.

**ROAD FENCE**—\$3,120. Santa Barbara, Santa Barbara Co., Cal. Engineer, County Surveyor, Santa Barbara. Owner, Santa Barbara County. The lowest bid received for the construction of 2½ miles of fence along the State Highway was presented by the Boardman Construction Co., Santa Barbara, at \$3,120. A contract will probably be awarded.

**BANK AND OFFICES**—4 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architect, John Parkinson, Security Bldg., L. A. Owners, Security National Bank. Location, Spring street adjoining present Security Bldg. First floor occupied by bank, upper floors arranged for offices. Steel frame, hollow tile partitions, concrete floors, metal window sash and frames, ornamental iron and bronze. Interior finish hardwoods, ornamental plaster and metal trim. Marble and tile wainscot. Special bank fixtures and vaults. Exterior faced with granite. Plans complete and figures being taken.

**BRIDGES**—1 reinforced concrete. Cost not stated. Santa Barbara, Santa Barbara Co., Cal. Engineer, W. M. Thomas, Hilberian Bldg., L. A. Own-

ers, Santa Barbara County. Engineer W. M. Thomas has been commissioned to prepare plans and specifications for four bridges to be erected on the State Highway under the recent bond issue. The bridges will be located as follows: One overhead bridge crossing near Bell canyon; a reinforced concrete span over El Capitan creek; and two reinforced concrete bridges over Gaviota creek between Gaviota gorge and the ocean.

**BRIDGE**—Reinforced concrete. Cost not stated. Ventura. Ventura Co., Cal. Engineer, County Surveyor, Ventura. Owners, Ventura County. The Board of Supervisors has authorized the County Clerk to advertise for bids for the construction of a bridge across Ellsworth Barranca in Road District No. 5, in accordance with plans and specification prepared by the County Surveyor.

**MOTION PICTURE PLANT**—1 story, frame, \$35,000. Los Angeles, Cal. Architects, W. M. Shumway & Co., 5057 Hollywood Boulevard. L. A. Owner, Thomas Dixon. Location, Sunset Boulevard. The building will include indoor and outdoor staging, office buildings, dressing rooms, factory buildings, etc. Plans are being prepared.

**CLINIC BUILDING**—2 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architect, A. B. Benton, 114 North Spring street, L. A. Owners, Parent Teachers' Association. Location, Castelar street, covering an area of 25 by 120 feet. Will contain offices for dentists and physicians, operating room for minor cases and dispensary. Interior finish pine. Steam heat and modern plumbing. Exterior faced with cement plaster. Plans being prepared.

**RESIDENCE**—2 story and base, frame, \$15,000. Los Angeles, Cal. Architect, John McCready. Hermosa Beach. Owner, Benj. H. Hiss, 1756 West 22nd street, L. A. Location, Manhattan Beach. Will contain 14 rooms, three baths and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors. Central heating system, hot water supply and open fire places. Mantels tile or brick. Bath rooms finished in tile. Exterior covered with cement plaster on metal lath. Plans being completed.

**NORMAL SCHOOL WORK**—Cottage, frame, \$6,500. Santa Barbara, Santa Barbara Co., Cal. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Plans are being prepared for a frame steward's cottage at the Santa Barbara State Normal School. Further mention will be made of the work when bids are called.

**SCHOOL**—1 story and base, brick, \$17,000. Los Angeles, Cal. Architects, Tuttle & Angel, Delta Bldg., L. A. Owners, Burbank Grammar School District. Will contain five class rooms, kindergarten and play rooms. Interior finish pine with maple floors. Central heating system, vacuum cleaning and modern school plumbing. Exterior faced with cement plaster. Plans complete and figures being taken. Bids close on October 30th.

**HOSPITAL SEPTIC TANK**—\$7,250. Norwalk, Los Angeles Co., Cal. Engi-

neer, State Engineer, Sacramento. Owners, State of California. Plans are being prepared for a septic tank at the Norwalk State Hospital. Further mention will be made of the work when bids are called.

#### Contracts Awarded.

**JETTY WORK**—Cost as follows. San Luis Obispo, San Luis Obispo Co., Cal. Engineer, County Surveyor, San Luis Obispo. Owners, San Luis Obispo County. Contractors, Grace & Bernieri. Spreckels Bldg., S. F. Contract price, 26-foot piles, \$10.80; 28-foot piles, \$11.05; 30-foot piles, \$12.40; barbed wire per 100 lbs. \$5.50.

**ROAD PAVEMENT**—\$7,274. Santa Ana, Orange Co., Cal. Engineer, County Surveyor, Santa Ana. Owners, Orange County. Contractors, O. & C. Co., Fullerton. Contract price, \$7,274. County to furnish material.

**RESIDENCE**—2 story and base, frame, \$25,894. San Marino, Los Angeles Co., Cal. Architect's name not given. Owners, E. H. and H. E. Moulton. Contractors, The Foss Designing and building Co., 100 East Colorado street, L. A. Contract price, \$25,894.

**SCHOOL**—1 story and base, frame, \$15,238. Cucamonga, San Bernardino Co., Cal. Architects, Tuttle & Angel, Delta Bldg., L. A. Owners, Cucamonga School District. Contractor, A. L. Gribbling, 3320 North Griffin avenue, L. A. Contract price, \$15,238. Cass-Smurr-Damerel Co., L. A., heating and ventilating, \$2,545.

#### PORTLAND AND OREGON.

**WAREHOUSE**—2 story and base, reinforced concrete, \$25,000. Eugene, Ore. Architect, J. R. Ford, Eugene. Owners, Allen & Lewis, Eugene. Will cover an area of 80 by 122 feet. Construction will be either reinforced concrete or hollow tile. Tin roof. Furnace heat and electric elevator will be installed. Interior finish rough and pine. Exterior cement plaster. Plans complete and figures being taken.

**RAILROAD CONSTRUCTION**—\$6,000,000. Portland, Ore. Engineer's name not given. Owners represented by Robert E. Strahorn, Portland. According to an announcement made by Robert E. Strahorn, a railroad, the cost of which will be about \$15,000 per mile, will be constructed into Eastern, Central and Southern Oregon, to extend for a distance of 400 miles. He proposes to construct a line from Bend to Klamath Falls; one branching from this line about Silver Lake and extending southeasterly into the rich

Warner Valley, and one branch from the north and south line about Millican to connect with the line of Oregon Short Line and O.-W. R. & are building through Crane Creek G.

**ELIMINATION OF GRADE CROSSING**—\$750,000. Portland, Ore. Engineer, City Engineer, Portland. Owners, City of Portland. Final proceedings leading up to the commencement of actual proceedings for the elimination of the O.-W. R. & N. grade crossings from the heel of Sullivan Gulch to the city limits will be completed this week, when the city will formally take over the Barr road west of 82nd street from the county. This will be followed by the filing of plans and specifications for the project.

**STORES**—1 or 2 story and base, reinforced concrete. Cost not stated. Portland, Ore. Architects, Whitehouse & Foulhoux, Wilcox Bldg., Portland. Owners, Brooklyn-Fields Co. Location, East 11th and 12th streets, covering an area of 220 by 212 feet. Bids are now being taken for both a one and two story structure. Complete information can be secured from the architects.

#### Contracts Awarded.

**GARAGE**—2 story and base, brick, \$30,000. Portland, Ore. Architect, Jacobberger & Smith, Board of Trade Bldg., Portland. Owner, Gay Lombard. Lessee Oregon Motor Car Co. Contractor, James P. Taylor, Macleay Bldg., Portland. Contract price, \$30,000.

**SEWER SYSTEM**—\$58,448. Forest Grove, Ore. Engineers, J. B. and R. Koon, Board of Trade Bldg., Portland. Owners, City of Forest Grove. Contractors, Elliott & Scoggins, McKibbin Bldg., Portland. Contract price, \$58,448.

#### SEATTLE AND WASHINGTON

#### Contracts Awarded.

**HOTEL**—1 and 2 story and base, reinforced concrete, \$75,000. Rainier National Park, Wash. Architects, Heath & Gove, National Realty Bldg., Tacoma. Owners, Savage-Scotfield Co., et al. Contractors, Cornell Bros., Savage Bldg., Tacoma. Contract price, \$75,000.

**STATE HOSPITAL GROUP**—1 and 2 story, reinforced concrete, \$133,452.25. Sedro - Woolley, Wash. Architect, Heath & Gove, National Realty Bldg., Tacoma. Owners, State of Washington. Contractors, Warrack Construction Co., Downs Block, Seattle. Contract price, \$133,452.25. Note: Contract was based on revised figures.

## BUILDING CONTRACTS.

## CONTRA COSTA COUNTY.

## BUNGALOW

TURNKEY & MERRITHUE ADDITION to Town of Martinez. All work for erection and finishing of building upon their property (bungalow).

Owner.....Mr. and Mrs. Frank Murray, Estudillo near Robinson, Martinez.

Architect...None.

Contractor...Lake Bulger & Son, Castro, and Green, Martinez.

Filed Oct. 4, '15. Dated Sept. 1, '15.  
Concrete finished, chimney built, frame of building up and rafters on.....\$589.25

Mill work on outside, all rustic on, windows in and shingles on.....589.25

Lather and plastered with two coats and 1 coat paint on outside.....589.25

Usual 35 days.....589.25  
TOTAL COST, \$2357.00

Bond, limit, forfeit, none. Plans and specifications filed.

Frame up and roof sheathed...\$194  
Brown plastered ..... 494  
When completed ..... 491  
Usual 35 days..... 493

TOTAL COST, \$1975  
Bond, none. Limit, 90 days. Forfeited, \$5. Plans and specifications filed.

Frame up and roof sheathed...\$194  
Brown plastered ..... 494  
When completed ..... 491  
Usual 35 days..... 493

TOTAL COST, \$1975  
Bond, none. Limit, 90 days. Forfeited, \$5. Plans and specifications filed.

Frame up and roof sheathed...\$194  
Brown plastered ..... 494  
When completed ..... 491  
Usual 35 days..... 493

TOTAL COST, \$1975  
Bond, none. Limit, 90 days. Forfeited, \$5. Plans and specifications filed.

Frame up and roof sheathed...\$194  
Brown plastered ..... 494  
When completed ..... 491  
Usual 35 days..... 493

TOTAL COST, \$1975  
Bond, none. Limit, 90 days. Forfeited, \$5. Plans and specifications filed.

Frame up and roof sheathed...\$194  
Brown plastered ..... 494  
When completed ..... 491  
Usual 35 days..... 493

TOTAL COST, \$1975  
Bond, none. Limit, 90 days. Forfeited, \$5. Plans and specifications filed.

Frame up and roof sheathed...\$194  
Brown plastered ..... 494  
When completed ..... 491  
Usual 35 days..... 493

TOTAL COST, \$1975  
Bond, none. Limit, 90 days. Forfeited, \$5. Plans and specifications filed.

Frame up and roof sheathed...\$194  
Brown plastered ..... 494  
When completed ..... 491  
Usual 35 days..... 493

TOTAL COST, \$1975  
Bond, none. Limit, 90 days. Forfeited, \$5. Plans and specifications filed.

Frame up and roof sheathed...\$194  
Brown plastered ..... 494  
When completed ..... 491  
Usual 35 days..... 493

TOTAL COST, \$1975  
Bond, none. Limit, 90 days. Forfeited, \$5. Plans and specifications filed.

Frame up and roof sheathed...\$194  
Brown plastered ..... 494  
When completed ..... 491  
Usual 35 days..... 493

TOTAL COST, \$1975  
Bond, none. Limit, 90 days. Forfeited, \$5. Plans and specifications filed.

Frame up and roof sheathed...\$194  
Brown plastered ..... 494  
When completed ..... 491  
Usual 35 days..... 493

TOTAL COST, \$1975  
Bond, none. Limit, 90 days. Forfeited, \$5. Plans and specifications filed.

Frame up and roof sheathed...\$194  
Brown plastered ..... 494  
When completed ..... 491  
Usual 35 days..... 493

TOTAL COST, \$1975  
Bond, none. Limit, 90 days. Forfeited, \$5. Plans and specifications filed.

Frame up and roof sheathed...\$194

When completed ..... 491  
Usual 35 days..... 493

TOTAL COST, \$1975  
Bond, none. Limit, 90 days. Forfeited, \$5. Plans and specifications filed.

Frame up and roof sheathed...\$194  
Brown plastered ..... 494  
When completed ..... 491  
Usual 35 days..... 493

TOTAL COST, \$1975  
Bond, none. Limit, 90 days. Forfeited, \$5. Plans and specifications filed.

Frame up and roof sheathed...\$194  
Brown plastered ..... 494  
When completed ..... 491  
Usual 35 days..... 493

TOTAL COST, \$1975  
Bond, none. Limit, 90 days. Forfeited, \$5. Plans and specifications filed.

Owner... Louise F. and H. M. Bush,  
Alhambra Precinct, Mar-  
tinez.  
Architect...None.  
Contractor...Hall & Smith, Martinez.  
Filed Sept. 29, '15. Dated Sept. 28, '15.  
Frame up and roof on.....\$532.33 1/2  
Interior plaster on.....532.33 1/2  
Usual 35 days.....532.33 1/2  
TOTAL COST, \$1600.00  
Bond, none. Limit, 40 working days.  
Forfeit, none. Plans and specifications  
filed.

#### FRAME BUNGALOW

E 175 FEET from line of Blk 19, as in  
Official Map of City of Pittsburg. All  
work for six-room frame bungalow.  
Owner.....B. P. Lanteri, Pittsburg.  
Architect...None.  
Contractor...Nickell & Old, Pittsburg.  
Filed Sept. 29, '15. Dated Sept. 21, '15.  
Frame up .....\$871.25  
Plaster on .....871.25  
Completed and accepted.....871.25  
Usual 35 days.....871.25  
TOTAL COST, \$3485.00  
Bond, \$1550. Sureties, C. Cautiello and  
A. V. McFaul. Limit, within 48 days.  
Forfeit, none. Plans and specifications  
filed.

### ABOUT OURSELVES.

Building and Engineering News offers the best medium in the entire west for the Engineering Profession to get in touch with and keep in touch with all the activities of this great and undeveloped western country that requires engineering service, skill and brains.

Our "Technical Section" contains illustrated descriptions of construction work now going on all over the western hemisphere in all the countries bordering on the Pacific Ocean by the men who are actually doing the work, the engineers designing the work, the contractors executing the work and the inspecting engineers supervising the details of the work.

We bring descriptive articles of the workings and activities of the various Government Engineering Bureaus in the different countries and will in course of time have brought our readers a complete birdseye view of all the important engineering undertakings inaugurated as a direct result of the determination of the American People to build the Panama Canal.

We bring the up-to-date reports of all the important decisions of the State Commissions on all matters of interest to Engineers.

We bring short descriptions of contemplated work with the preliminary estimates of the engineers in charge.

We also bring important discussions by the most prominent engineers the world over on the vital engineering questions of the day.

We bring articles on important development enterprises, both private and governmental.

Our "News Section" brings **each week a complete** advance summary of new work contemplated, arranged both as to character of work and location of work with a ready reference index of both, making it possible for the engineer and contractor at a glance to find out what is going on in his special line and in his locality. Our "Sealed Proposals" contains the official notices of all the most important work going on in the west.

We desire to be of real practical service to the entire profession and invite the engineers and professional men to send to this office news items of professional interest such as new construction work, completion of construction work, surveys, changes in engineering personnel, change of location of engineering offices, engagement of engineers on new projects, appointment of engineers to new positions.

It often happens that engineers who have worked together on a large piece of construction work, but through the vicissitudes of this kind of work become separated, would like to be together again when opportunities offer themselves, and here the best way to keep track of each other is by making this journal a clearing house of information regarding your whereabouts.

By constantly keeping us advised of your professional doings and location, your friends will always know where they can find you when a big job comes up where your efficient services are desired.

Therefore send in your subscription and all the professional information about yourself and your work. It will do all of us some good some day and you will be helping to build up a paper whose object is to serve you better and better.

Yours for efficient service,  
BUILDING & ENGINEERING NEWS.

## Probable and Presumptive Life of Concrete Structure Made From Modern Cement.

By BERTRAM BLOUNT, London, England.

Some concrete casually made by empirical means has in some cases stood the test of 2000 years or more. It is useless to enquire as to the proportion which went to pieces.

Today we know with some approach of precision how to make concrete, and according to the exercise of our knowledge, our structures will last as long as there is any need for their existence, or it is the fate of all modern structures to be torn down and replaced within periods reckoned not by hundreds of years but by units of ten.

Since the time when Portland cement became accepted as one of the principal materials of construction, doubts were felt as to its permanence. These doubts in the beginning were thoroughly justified. A material prepared in the crudest way, with wholly inadequate knowledge and that picturesque method of control, known as rule of thumb, and from its nature and constitution, resembling a slow but highly effective explosive, would be liable to its genesis and properties if it failed to provide a plentiful crop of disasters—and this it did.

Nowadays the situation is very different, not because modern cement is able any more than is any other structural material, but because the properties, uses and limitations of cement are fairly well understood, and a reasonable amount of care is exercised in its employment. It would be wrong to assume that our present knowledge and skill are sufficient to relieve us of anxiety and occasional calamity in erecting structures intended to be permanent, but we are no longer in the position of speculators in a rather unbalanced stock, expectant of a fall.

In order to discuss the question of the probable life of concrete structures made with modern cement, it is necessary to consider the chief causes which terminate that life.

I have drawn up a list of such causes, which, though not necessarily exhaustive, may serve as a guide to an orderly sequence in the present paper. For convenience in this list, ordinary concrete is catalogued separately from reinforced concrete, although, of course, in the majority of cases what affects one affects the other; the probable life of reinforced concrete is that of the con-

crete and the reinforcement severally and jointly, its characteristics as a material sui generis influencing in one direction or another its capability of continuing existence.

There is, of course, no such thing as a permanent structure of whatever material it may be made, and the present enquiry is limited to the consideration of how far concrete may be regarded as subpermanent. I do not think that anybody here will deny its right to rank with the most resistant structural materials known, and there are many—and I include myself—who believe that it stands very high in that rank if applied with knowledge to its proper purposes. The list of possible causes of destruction, mentioned above, is as follows:

### A. Ordinary concrete as distinguished from reinforced concrete.

- (1) bad cement,
- (2) bad aggregate,
- (3) bad proportions,
- (4) bad mixing,
- (5) bad workmanship,
- (6) bad design,
- (7) external violence,
- (8) fair wear and tear,
- (9) action of saline solutions,
- (10) action of acids,
- (11) electrolysis.

### B. Reinforced concrete.

All the foregoing causes of destruction are operative towards reinforced concrete as well as plain concrete. In addition there are:

- (1) corrosion of reinforcement direct or by electrolysis,
- (2) cracking due to monolithic character or possibly to stresses between the concrete and the reinforcement.

The term "modern cement," which forms part of the title of this paper, should rule out bad cement, but unfortunately it does not. The best modern cement made of suitable raw materials, intimately mixed, thoroughly burnt and finely ground, is as dependable a material as can be prepared until the time comes when all cement is made by fusing the constituents in a sort of super-blast-furnace, a method tried some years ago in the United States, and one which I have long regarded as the rational advance on the present rotary process. But these conditions of excellence are not always fulfilled.

Chiefly because of the endeavor to obtain large outputs of cements per unit of plant, the control of proportions is sometimes inaccurate, the burning not uniform and the grinding not only coarser than is desirable but "gritty." Such cement fails in respect of the first quality absolutely essential to the stability of any structure of which it forms part—it is not sound. Quite useless is it to say that such unsound cement has been used and the structures made with it are standing; the point of interest is how many have fallen down. Further there is the pregnant question whether a buyer will not insist on a material which is certain to be free from vice, or whether for the convenience of the seller he will trust to luck. Generally, the man who pays can and will get what he wants. It may be confidently said that given careful manufacture, rigid inspection and thorough testing to a searching specification, modern cement can be obtained free from all inherent vice, and that structures of which it forms part will not be brought to a premature end by internal treachery.

Bad aggregate is a fruitful source of trouble, and, simple as it is in a specification to say that the aggregate shall be "suitable clean, sharp, well washed," and so on, it is not always easy to get such an aggregate at a reasonable price. Local material must almost always be used, and it may be of the most diverse description. The one property, which is indispensable, is that it must be chemically stable under the conditions in which it is to be used. It does not follow absolutely that the aggregate shall be stable per se, though it is much better that it should be, there are materials which oxidise, or which weather, that may on occasion act as a serviceable aggregate, but only urgent necessity will sanction their use. Thus, in general, rocks containing pyrites should be avoided, but it would be pedantic to reject a granite or a hard limestone on the sole ground that specks of pyrites are present. Not merely the amount and size of the enclosed pyrites should be considered, naturally a rock containing malacite is ipso facto suspect. In such cases, petrological methods of examination should be used. Similarly,

slags, such as copper slag containing much ferrous silicate, may well be used if their silica content is high enough; generally, such slags lie in dumps, and have so lain for years, and their behaviours during exposure to weather is a great guide. The same remark applies to blast furnace slag. Analysis is very helpful if the results are carefully interpreted, but the behaviour of the material on the dump is even better. I have seen a considerable quantity of concrete destroyed by the use of a slag aggregate containing calcium sulphate derived from calcium sulphide in a fairly basic slag, and in this instance analysis would have detected the destructive agent, and saved much trouble and expense. Speaking generally, substances containing sulphates or sulphides, capable of oxidation under working conditions, are so dangerous that their use should not be tolerated, and the need of this restriction can be better realized when it is remembered that 1% of  $SO_3$ , calculated on the aggregate, may mean 5% or more on the cement. Perhaps, of all the materials used as aggregate, the most dangerous is coke breeze. Mind, I do not say injurious, I say dangerous. The danger lies in the fact that some samples contain an abundance of sulphates, and, on account of the porous nature of the breeze, these are readily extracted, and do their deadly work on the cement. No sample of breeze should be used as an aggregate unless it has been analyzed and tested. Unless the strictest supervision of this kind is exercised, disaster is courted. Aggregate may be mechanically as well as chemically bad, but exactly how to define that badness is not easy. Such obvious defects as softness, cracks or excessive smoothness need no more than mention, but how far a "dirty" aggregate carries its own condemnation, is a more difficult matter to decide. It may safely be said that clayey matter round the coarser lumps will prevent a proper bond, but the effect of a moderate amount of clayey matter in the sand is not necessarily harmful. Like most practical things, it is eminently a matter to be settled by trial, and test cubes of the proposed aggregate compared with similar cubes of some aggregate recognized as a standard, such as granite chips and clean sand, will decide the point. Four other causes of short life for a concrete structure, viz., bad proportions, bad mixing, bad workmanship and bad design, call for little comment except this, that evil as are all these for ordinary concrete, they are ten times worse for reinforced concrete, because, while ordinary concrete is generally used in considerable masses, a structure of reinforced concrete is a more delicate affair in which all four sources of mischief have a greater say. Particularly is this the case in respect of bad proportions and bad workmanship. All reinforced concrete should be as nearly impervious as can be contrived, as it is of the utmost importance to protect the reinforcement; and although it is true that iron is protected in an alkaline medium, yet reliance should not be placed on that alone; it is far sounder practice to make concrete of all kinds, and especially reinforced concrete, as nearly watertight as is practically possible.

The life of concrete structures may be shortened by causes which are external to itself. The violence of wind, wave and earthquake, the effect of the subsidence of the soil, in fact, all those things which in legal phraseology are called "the acts of God," because they are incomprehensible, will destroy any structure however well made. But, in practical affairs, one does not legislate for the infinite, and is content to make structures so good that ordinary violence will have little effect. The simplest and most important case is that of making harbors which must resist all these natural forces. Thanks to our harbor engineers, a fair degree of success has been attained, largely empirically. Putting aside for the moment the question of the quality of the cement, over which they had little control, they understood in some degree that the concrete must be strong and dense, and, by proportioning the aggregate, obtained a material which complied fairly with these requirements. But accurate measurements of voids and the knowledge that ordinary good concrete of about 1:6 may, and often does, contain 30% of voids, have not been so generally utilized as to prevent failures which are traceable to erosion and corrosion by the sea. It is not enough that a block of concrete should be strong; it must be as nearly as possible impervious and impenetrable. As I have said above, the need for these qualities in reinforced concrete is vastly more urgent; reinforced concrete has a vulnerable skeleton, and its exoskeleton must be perfect. Fair wear and tear is only a mild case of external mechanical violence, and need not be further considered.

A particular form of external violence is the action of fire in any serious conflagration. It has been frequently stated that concrete structures are substantially fireproof, and, as far as inflammability is concerned, this is true, but it must be remembered that set cement is a substance containing combined water and carbonic acid, and that these are expelled at a comparatively moderate temperature. It might be naturally supposed that a structure exposed to fire would be seriously weakened by the decomposition of the essential cementitious constituents, and this surmise is of course correct. But for all that, the amount of deterioration is less than one would think likely, and the appended table shows the results of a few experiments made on a cement mortar in the usual proportions of 3 to 1 by weight.

Test pieces were heated for 1 hour at the following temperatures:

	% Loss	
Tem- per- ature. on Ce- ment.	calcu- lated	
100..	5.32..	No appreciable effect.
200..	14.12..	" "
300..	16.68..	" "
400..	16.56..	" "
500..	17.96..	" "
600..	21.92..	Sound—weak at edges.
700..	22.24..	Sound—friable.
800..	25.68..	Sound—distinctly friable.
900..	25.08..	Sound—distinctly friable.
1000..	24.36..	Sound—very weak
1100..	25.40..	Sound—very weak.

In no case, even at the highest temperature, were there any signs of disintegration or flying, and no mechanical loss occurred during the test.

Composition of test pieces, 3 standard sand to 1 Portland cement by weight. Age 3 months.

It will be seen that up to a temperature of 500 degrees C. there is no appreciable alteration, and even beyond that the test pieces show considerable stability, a circumstance which is reassuring from the point of view of that most important question of fireproof construction. Before accepting such a conclusion unreservedly, however, it must be remembered that the tenderest members of reinforced concrete are the steel reinforcements, and that if the heat penetrates the envelope of concrete sufficiently to soften the steel, the destruction of the building will occur exactly as in the case of an ordinary steel frame building.

Shortening of the life of concrete by chemical action of external origin, which for the purpose of a list I have put under three headings, may be conveniently considered under one. A great number of investigators, including many honored names, from the time of the pioneers Vicat and Michaelis to the time of those living, to whom it would be an impertinence to refer, have applied themselves to determine what is the probable or presumptive life of concrete, and, on account of the practical importance of the problem, have chiefly concerned themselves with the action of one saline solution. The destruction of concrete by seawater has always been, since the days when Portland cement first began to be used, a matter of much concern to engineers engaged in maritime works, and, even as lately as 30 years ago, much confusion of mind existed. Thus, because magnesia was found to be a predominant constituent of various incrustations and exudations on sea work, the erroneous conclusion was drawn that it was derived from the cement, and anxiety was felt concerning what could be considered the permissible limit for magnesia in cement. Of course, it is now common knowledge that the magnesia found has been formed from the seawater by the action on it of the lime of the cement, and that the small quantities of magnesia normally present in Portland cement of good quality are without influence in these cases of injury. I do not propose to deal in detail with the destructive action on cement of magnesium salts and calcium sulphate in seawater, as the mechanism of the reactions in which they take part has been thoroughly studied by many able chemists, and their work is part of our general knowledge, but I propose to state shortly what my own analyses and experiments have led me to regard as the chief causes of the premature injury and shortened life of sea works made of concrete, and, in the first instance, I will deal with ordinary concrete.

It may be accepted that the heaviest and most important work is block work, and in this case the cement has ample time to harden before it is exposed to the sea. From consideration of expense, it is sometimes desired to use a comparatively poor mixture, but

cannot help thinking that the saving is dearly bought. In fact, the one indispensable condition for a long life or work exposed to the sea is the denseness and imperviousness of the concrete, and this is difficult to secure unless the cement is used liberally. It

is impossible to fix a proportion, as that will depend on the aggregate. Every one must be judged by itself, for voids determined experimentally and enough cement used to fill them. Whenever a good form of puzzolanic material, such as trass and the like, is available, it should certainly replace a part of the sand, for its use in forming a calcium silicate with the lime, normally free during the setting of Portland cement, is undoubtedly of value, much tending to the obtaining of that imperviousness which is a necessary condition for sound and lasting work. It could not be overlooked that any puzzolanic material can fulfill two functions. If coarsely ground, it acts partly as an aggregate like sand, and it is only when ground as finely as cement itself that its full activity as a cementitious material comes into play. There is no objection to the use of coarse puzzolana if the supply is abundant locally, but, if it has to be brought from a distant place, it is evidently uneconomical to use part of it for a purpose equally well fulfilled by an inert material like sand. In some cases, it might be desirable to grind the puzzolana and cement together to equal fineness. This plan has been suggested by many engineers as being equivalent to an adulteration of cement, but this view I hold to be taken if the mixture is sold under its own name, and the proportions of the two materials are stated. Many valuable attempts have been made to obtain imperviousness by the addition of the most various materials, such as alum salts, soap and fatty mineral oil, but, though some of these are of use under special circumstances, they have not as yet shown themselves suitable for the heavy sea work being dealt with; at present there is nothing better than ordinary concrete made with the most carefully chosen and graded aggregate, with the addition of trass if local conditions allow, and an ample proportion of cement. Concrete made thus can only be attacked on the surface, and its deterioration by percolation is well-nigh impossible. To state its probable life would be a rash attempt; in my view it should last indefinitely, at least until the harbor or other maritime work had become obsolete.

When concrete has to be cast *in situ* opportunity for setting undisturbed is sometimes poor, as compared with that of the blockwork, but the same principles hold good, with the one addition that the setting time should be minimum which will allow the material being got into position without disturbing or working it after setting begun. Seawater is by far the most potent saline solution, and contains the salts, magnesium salts and sulphates, which are most harmful to concrete. What has been said of its application to most other saline solutions is likely to be harmful, and the precautions already mentioned

apply to such cases. Of course, there are special instances of injury by such salts as sulphate of iron or the mixed metallic sulphates found in mine waters, but the nature of their attack is similar, and they are of too special a character to warrant more than mention in a paper dealing with the life of concrete structures in general. There is a common belief that salts in the act of crystallizing may expand and thus injure a structure of which they occupy the interstices. I have determined the amount of expansion of three typical, easily soluble salts and find the following results:

(1) Supersaturated solution of sodium sulphate. Expansion on crystallizing, 1.45% by volume.

(2) Saturated solution of magnesium sulphate. Contraction on crystallizing, 0.14% by volume.

(3) Supersaturated solution of sodium thiosulphate. Contraction on crystallizing, 0.57% by volume.

I do not think that much importance need be attached to the view that concrete is injured materially by the crystallization of salts in its crevices, for the crystals—even when they do connote an increase of volume—are mechanically weak, and can exercise but little disruptive effect. It is the chemical action of saline solutions which is to be feared and guarded against.

Destruction of concrete by acids, and by this term acid salts are included, stands on a different footing. Obviously, strong acids turned to waste from a chemical works will destroy so calcareous a material as cement, and if the acid is sulphuric acid, destruction will proceed after the acid has been neutralized. But there are less obvious, though very real, causes of destruction. Many putrescent matters, such as sewage, will give off gases containing sulphur, and these, under suitable conditions, will oxidize and produce sulphurous acid, and, ultimately, sulphuric acid; or, alternately, will form sulphides, such as calcium sulphide or ferrous sulphide, which in due course, oxidize to the corresponding sulphates and injure or destroy any cement with which they may come in contact. It has been observed that with sewage of this kind flowing through concrete pipes the invert may be unaffected, while the arch is seriously attacked. The explanation generally accepted is that hydrogen sulphide, or some gaseous organic sulphide, is generated from the liquid, and coming in contact with the upper part of the pipe forms sulphides, which are oxidized to sulphates by the air above the level of the liquid. As the source of the sulphides, and therefore of the sulphates, is continuous, attack by the latter proceeds, with the result that the part of the pipe which is not immersed may suffer severe corrosion. To predict the life of such a pipe is evidently impossible. It is impracticable to prevent access of air and to turn the whole sewer into a septic tank, and the only reasonable course is to use some other kind of pipe where the conditions mentioned are known or suspected, or to face the expense and trouble of occasional repairs.

Closely connected with corrosion of concrete by acids, actual or potential,

is attack by electrolysis. All cement contains a small quantity of alkali, and this is an excellent electrolyte and will serve to convey such a current as may be straying from a lighting or power circuit. Instances have been recorded of destruction of concrete by such stray currents, and in this case, again, prediction of a probable life of the structure is clearly impossible. But stray currents are not in the same category as wind and wave and earthquake and their ravagings should be prevented by proper insulation. To regard them as inevitable, like the rain, is not the attitude of mind of the electrical engineer, and it is to him that we must look for prevention. Suggestions to make the concrete waterproof, where there is a possibility of electrical leakage, are, however, well worth consideration, and in such cases, which should be rare, a sheath of some asphaltic material, such as is used for damp-proof courses, would be serviceable. But it cannot be too clearly said that this is a wrong principle to go on; it should not be necessary to protect concrete from stray currents, because those errant currents should be kept in their narrow channel.

The quality of cement for reinforced concrete must be at least as good as that for ordinary concrete, and, if possible, should be better. This is not because the latter should not be as near perfection as the maker can achieve, but because Portland cement for reinforced concrete is, as it were, a pioneer of progress, and what is a special brand for such purposes today will be the ordinary commercial article tomorrow. Turning to steel, as the other partner of the association, one may say that no better example of the advantage of that scientific direction which is now applied to Portland cement could be found than in the case of the steel, and it is significant that the metal, the more difficult of the two to manufacture, was being made of good and uniform quality before chemical principles were recognized and acted on in the manufacture of Portland cement. Thanks to the fact that for some forty years the regulation of the composition has been in the hands of the chemist, little is left to be desired in the modern commercial product, or, of course, cases have occurred, and will occur, of careless manufacture and inspection where brittle and inferior material has found its way into the work, but they are not numerous and only rank with such failures as arise in all structures. Good as modern mild steel is, it may be properly asked whether, in some cases at least, steel of a higher grade and greater tensile strength may be advantageously used, and I think that most of us will assent to this. This applies to ordinary structures and is, of course, obligatory for such buildings as site deposits where the metal must not only have a good tensile strength, but be so hard as to be practically undrillable.

Turning now to reinforced concrete one may say that all the causes of attack, and consequently shortened life, which have been discussed under the heading of ordinary concrete, are valid equally with reinforced concrete, and, in addition, there are some other

causes peculiar to reinforced concrete. In practice the reinforcement consists of steel in some form, and is subject to the same corrosion as steel in other structures. By a very fortunate circumstance, cement is an alkaline substance and the metal, iron, in an alkaline medium does not rust. These comforting facts do not warrant the deduction that the steel reinforcement is immune from corrosion. That is true only if it is completely enclosed with concrete which is fully in contact with it and is free from fissures, a cogent reason for the use of concrete, for reinforced work, of a higher grade than that generally necessary. It is highly desirable that the concrete should not only be without fissures, but should be impervious. The advantages in preventing the percolation of any saline or corrosive substance are so great that the extra trouble and cost are well repaid.

The question of the probable life of reinforced concrete has formed one of the topics of a Committee of the Institution of Civil Engineers, of which the writer has the honor to be a member. At the request of the committee I contributed a memorandum in February, 1910, which runs as follows:

"There are two matters affecting the stability and permanence of reinforced concrete which appear to me to be of special importance

"The first is the risk of destruction of the cement in the concrete, and of corrosion of the steel constituting the reinforcement; the second, the stresses due to expansion of the concrete and the steel, and to the difference in the value of the co-efficient for the two materials.

"The likelihood of the attack of the cement itself depends on the same conditions as determine whether ordinary concrete—unreinforced—is attacked, but as the thickness of the concrete over the reinforcement is usually small, it is evident that even more care must be bestowed on the avoidance of those conditions than in the case of concrete in large masses, where the surface of attack is relatively smaller. With regard to the steel, the risk of corrosion is primarily dependent on the continued access of water to the steel. Mere moisture left in the concrete after its preparation, or any stationary water, is of small consequence, because that water soon becomes saturated with lime and forms an alkaline medium excellently adapted for the preservation of steel. But continued access of water, involving anything approaching a flow of water, will remove this preservative lime, and cause the customary rusting of steel exposed to water. It follows that the concrete of armored concrete must be practically impervious. This need for imperviousness has been recognized in practice by making the concrete rich in cement, but, as far as I know, no measurements of the permeability of the mixtures ordinarily employed have been published. Such experiments as I have carried out have been directed to a different end, and have been made with mixtures of cement and standard sand, and go to show that, though at first pervious, such mixtures soon be-

come moderately watertight. Similar experiments with concrete composed of cement, sand, and small stones, such as ordinarily used for reinforced concrete, would be useful. Impermeability of reinforced concrete, whilst desirable in all cases, becomes of great importance in structures immersed in fresh water, and imperative for those in sea water.

"The co-efficient of expansion by mild steel is well known the figures generally accepted being 0.0000069 per degree Fahrenheit. That of concrete varies somewhat with the composition, but for a 1:2:4 mixture is usually taken at 0.0000055 per degree F. For a mixture of 1 of Portland cement to 1 of sand, have found 0.0000053 per degree F. wet and 0.0000073 per degree F. dry. These values are so similar that stresses resulting from their difference are small. But the stresses due to the two materials regarded as a whole in a structure hindered from expansion may be considerable, and should certainly be computed in cases where the structure is exposed to a large range of temperature. Further, there are no data (so far as I have been able to ascertain) concerning the alteration of length of concrete which takes place by alteration of wetness and dryness. If this, as seems probable, is considerable, serious stresses may arise, both in a structure not free to expand and between the concrete and its reinforcement. Experimental investigation of this question appears to me to be desirable."

After five years, I think that this brief summary states not unfairly the conditions which influence the stability of reinforced concrete, and indicates the directions in which precautions should be taken. Since that time many experiments have been made, but they are not so conclusive as might be wished. At the instance of the Committee of the Institution of Civil Engineers, referred to above, experiments were made at the National Physical Laboratory with a view to determine the rate of percolation and the alteration of strength, but the results are irregular and will not serve as a useful guide. It is highly desirable that a full set of tests should be made to obtain reliable data on these two points, viz., rate of percolation and alteration of strength of reinforced concrete; and, in both cases, the test pieces must be prepared by an operative accustomed to such work, and carrying it out as it would be carried out in practice under proper supervision. As far as I know, no reliable data obtained by experiment, as distinct from observation, are extant, showing whether reinforcing steel will corrode; and here again, a full set of tests should be made. Casual observations of the condition of the metal in reinforced concrete which has been exposed to severe natural conditions are of the utmost value, but we want something more than that. We want definite facts which will tell us what is the prospect of life of reinforced concrete properly and carefully, but not meticulously, made, when it is exposed to the most drastic conditions which it will be called upon to endure in practice; and one of the governing factors is the non-rusting of the steel. *A priori*,

there should be no rusting, but argument *a priori* is the most dangerous form of nonsense I know of. In matters of this material importance, it is not sufficient to come to a conclusion on general principles alone, but they must be used in conjunction with experimental data as accurately obtained over as long a period as practical requirements allow. And he let me plead for long time tests. I am true that they may be useless and obsolete before their term is out, 20 years, 50 years it may be, not much in the life of a structure, but the trouble and cost of making them is trifling, and sometimes their results are priceless. Let us build for posterity in this matter; it is easy for them to discard our juvenile ideas, but now and then they find something good like the "Principia" in an older Book. With the knowledge of this date, it seems fairly certain that little fear need be felt of steel reinforcement rusting when well embedded in good non-pervious concrete of adequate thickness, even when the structure is exposed to seawater or other saline solutions, but the case altered when the concrete is exposed to electrolysis. As has been mentioned above, cases have been observed of the destruction of ordinary concrete by electrolysis, and the risk of injury that is small compared with the likelihood of destruction of reinforced concrete by the same cause. The advantage of an alkaline medium may disappear, and the steel reinforcement serving as a positive electrode may be attacked by all the negative ions of the electrolyte. Corrosion will be rapid, and the stresses exerted by iron rusting are known to be large, though they have never been computed. It must be remembered that it is not necessary for there to be a direct electrical leak from the inside to the outside of the concrete. Wherever the current flows there must be a drop of potential, and as the joints between the metallic members are electrically poor, it is certain that at all those points corrosion must occur. In a modern structure honeycombed by electric leakage most serious results may occur from such unsuspected cause, and the mischief may be wrought secretly and effectively, quite nullifying any reasonable life of the structure.

There is another fact which tends to limit the life of a structure made of reinforced concrete. One of the great advantages of this material is its homogeneity. A properly designed and made structure is as much of a piece as if it were a casting, and, like casting, experiences internal stresses. These can be minimized or provided for by careful design, but there is no process equivalent to annealing, which they can be removed, instances are on record where cracking has happened in long continuous lengths or in large thin walls or panels, whilst assuming material and work to be free from fault, must have been caused by internal stresses. There is always some stress, and the amount may be increased by part of the structure being wet and another part dry, and it is just on this point that very little exact information is available. Because, in a happy accident, the co-efficients

expansion of steel and concrete are nearly identical, it has been too hastily assumed that stresses between the two are negligible, the fact being overlooked that wetting steel has no effect on its size, and wetting concrete as a well marked effect. It must not be thought for one minute that I am an alarmist, but it is right to point out cause of trouble which may escape consideration, if a generalization, in the main good and sound, is accepted without reservation. Thorough investigation, using large test pieces over long period and under perfectly determined conditions, would be of the most value, and would afford us data dispelling the somewhat casual observations on which too much reliance has hitherto been placed.

That this knowledge is of much more an academic importance will be admitted when the construction of dams reinforced concrete is considered. In a dam, every element of destruction of the kind which has been discussed must be studied and prevented. Concrete must be watertight, for percolation through pores or cracks will be much more injurious than a similar leakage through an ordinary concrete or masonry dam. The very core of the structure will be attacked, and its ruin is only a question of time. The fact that a dam is a monolith, and may be a huge one, with great weight and delicate construction, is a fact which is not to be overlooked. It is reasonable to suppose that failures induced or exaggerated by electrolytic action will become fairly common, particularly, when there is a steel core to attack and an electrolyte additional to those alkali salts which naturally occur in any normal cement.

It has been necessary to indicate all those causes of injury for destruction which are to be reckoned with as affecting the life of concrete structures made with modern cement, and the impression conveyed may be that all such structures are also liable to decay as to be almost ephemeral. But this paper is not a jeremiad. I have sought to state the very worst against the prospect of life of concrete and its younger brother; I have purposely taken the role of the devil's advocate, and I have striven to seek out and blazon all the faults and vices proper to cement as we know it. And what does this assault amount to? In the first place, that there exists causes of destruction, internal and external, which, if uncontrolled, will certainly destroy any structure, even where its design is impeccable, and that its life is at the mercy of these causes, and though its death may be lingering, it is certain.

In the next, that all such causes, except extreme external violence, can be controlled, and their effect nullified by knowledge, care, and skill exercised in the directions mentioned and discussed above; and, as a necessary result, by the practical elimination of nearly all these attacking forces, security and something like permanence will be attained. I began this paper by saying that there is no such thing as a permanent structure, and I end by stating that in my opinion, a pyramid, a bridge, an aqueduct, a harbor, a coliseum or a cathedral made in concrete or ferro-concrete, will and honestly enough, will vie in life with the mighty structures of antiquity which are left to us, their limitation of life lying not in themselves, but in the changing needs of human life.\*

All other causes which tend towards destruction sink into insignificance beside this, but for all that they must not be ignored, and, without attempt-

ing to arrange them in order, I am inclined to think the next worse, closely approaching the severity of attack of saline solutions, is the injury caused by aggregates of the class of coke breeze, containing sulphates or potential sulphates. From the very nature of the material, and from the use to which it is put, namely, to make light floors, ceilings and partition walls, it is clear that it cannot be impervious, and it follows that whatever water reaches one of its surfaces will speedily make its way to the interior. Where water can go, air can follow, and the assumption that sulphides are fairly harmless falls to the ground, because they are in the most favorable condition to become sulphates, and the fate of the structure is then settled.

Next in order of sinister magnitude is the injury caused by electrolysis. It is true that the cases recorded are at present few, but it must be remembered that the transmission of large currents at high pressures is a comparatively modern thing, that large structures of reinforced concrete are comparatively modern things, and the progressive spirits cannot hope to see buildings only five years old fall like the walls of Jericho. It may soothe their natural impatience to reflect that although the structures and the electrical power are fairly new, yet human blundering is fairly ancient and to be relied upon, and on that ground alone, it is reasonable to suppose that failures induced or exaggerated by electrolytic action will become fairly common, particularly, when there is a steel core to attack and an electrolyte additional to those alkali salts which naturally occur in any normal cement.

It has been necessary to indicate all those causes of injury for destruction which are to be reckoned with as affecting the life of concrete structures made with modern cement, and the impression conveyed may be that all such structures are also liable to decay as to be almost ephemeral. But this paper is not a jeremiad. I have sought to state the very worst against the prospect of life of concrete and its younger brother; I have purposely taken the role of the devil's advocate, and I have striven to seek out and blazon all the faults and vices proper to cement as we know it. And what does this assault amount to? In the first place, that there exists causes of destruction, internal and external, which, if uncontrolled, will certainly destroy any structure, even where its design is impeccable, and that its life is at the mercy of these causes, and though its death may be lingering, it is certain.

In the next, that all such causes, except extreme external violence, can be controlled, and their effect nullified by knowledge, care, and skill exercised in the directions mentioned and discussed above; and, as a necessary result, by the practical elimination of nearly all these attacking forces, security and something like permanence will be attained. I began this paper by saying that there is no such thing as a permanent structure, and I end by stating that in my opinion, a pyramid, a bridge, an aqueduct, a harbor, a coliseum or a cathedral made in concrete or ferro-concrete, will and honestly enough, will vie in life with the mighty struc-

tures of antiquity which are left to us, their limitation of life lying not in themselves, but in the changing needs of human life.\*

\*Paper read before the International Engineering Congress September, 1915, San Francisco.

## "THE INFLUENCE OF TEMPERATURE UPON THE STRENGTH OF CONCRETE."

By A. B. McDaniel,

has been issued as Bulletin No. 81 of the Engineering Experiment Station of the University of Illinois. This bulletin presents a study of the data obtained from three series of tests of concrete cubes and cylinders. These specimens were stored under temperature conditions varying from 25 degrees to 90 degrees F., and were tested at various ages up to twenty-eight days. Curves are presented to show the relation between strength and age for different temperature conditions, and also the relation between strength and temperature at different ages. The results are summarized in a set of curves which show the percentage strength of concrete at different ages and under different temperature conditions to that at an age of twenty-eight days and under a normal temperature of 70 degrees F.

The results of the tests made under freezing temperature conditions are of especial interest; showing the gradual and slow gain in strength under a storage temperature slightly below freezing, and the disintegrating effect of alternate thawing and freezing temperatures.

The bulletin will be of value to the contractor, engineer and others engaged or interested in construction work for information regarding the strength which may be expected of ordinary concrete under different age and temperature conditions and the time for the removal of the forms.

Copies of Bulletin No. 81 may be obtained gratis upon application to W. F. M. Goss, Director of the Engineering Experiment Station, University of Illinois, Urbana, Illinois.

# MAGNESITE\*

By Fletcher Hamilton, State Mineralogist

Magnesite has for a number of years been known to exist in many localities in California. In quality it is very high grade, many deposits yielding material carrying about 95 per cent magnesium carbonate. The deposits are mostly in the metamorphic rocks of the Coast Range and Sierra Nevada Mountains, and are scattered over an area nearly four hundred miles long. One deposit of sedimentary origin is situated in the Mojave Desert region.

During the year 1914 there was considerable activity in the production of magnesite, giving a larger output than during any previous year except 1910. Doubtless the curtailing of some European supplies, due to the war, and added possibilities for transportation through the Panama Canal, to eastern markets, have led to the increased production. The permanent nature of improvements at some deposits gives promise that future production will be still greater.

The following concerns are among those producing in 1914:

Cedar Mountain Magnesite Mine, Alameda County, where the rock was mined by the glory-hole system, and calcined in a flat hearth furnace, using oil fuel and having a daily capacity of about ten tons of crude.

The Sherlock Mine, Santa Clara County, quarries the rock and ships it in the crude state. At the Red Mountain deposit, the material is stoped underground, calcined in a vertical shaft kiln, and transported 33 miles by auto truck to the railroad.

The Sonoma Magnesite Company, Sonoma County, is installing rotary kilns and a short railroad for delivery to the main line.

The Tulare Mining Company, Tulare County, stopes the magnesite exposed in underground workings, and calcines the product.

A number of owners have carried on development work, and it seems assured that a much greater demand can easily be met by the various California deposits.

The principal uses at the present time include: refractory linings for basic open-hearth steel furnaces, copper reverberatories and converters, hullion and other metallurgical furnaces; in the manufacture of paper from wood pulp; and in structural work, for flooring, wainscoting, tiling, sanitary kitchen and hospital finishing, etc. In connection with building work it has proven particularly efficient as a flooring for steel railroad coaches, on account of having greater elasticity and resilience than "Portland" cement. For refractory purposes, the magnesite is "dead-burned"—i. e., all or practically all of the  $\text{CO}_2$  is expelled from it. For cement purposes it is left "caustic"—i. e., from 5

per cent to 10 per cent of  $\text{CO}_2$  is retained. When dry caustic magnesite is mixed with a solution of magnesium chloride ( $\text{MgCl}_2$ ) in proper proportions, a very strong cement is produced, known as oxychloride or Sorel cement.\*\* "It is applied in a plastic form, \* \* \* which sets in a few hours as a tough, seamless surface. It has also a very strong bonding power, and will hold firmly to wood, metal, or concrete as a base. It may be finished with a very smooth even surface, which will take a good wax or oil polish. As ordinarily mixed there is added a certain preparation of wood flour, cork, asbestos, or other filler, thereby adding to the elastic properties of the finished product." Its surface is described as "warm" and "quiet" as a result of the elastic and nonconducting character of the composite material. The cement is usually colored by the addition of some mineral pigment to the materials before mixing as cement.

The desirable qualities of any flooring material (cost not considered) are listed for purposes of analysis or comparison under eighteen heads, as follows: Cleanliness, (sanitary qualities), quietness, immunity from abrasion (surface wear), resilience, immunity from slipperiness, appearance, waterproof character, plasticity, \*warmth (thermal insulation), life (immunity from deterioration with age), acid-proof character, alkali-proof character, fire resistance, elasticity, crushing strength, structural strength (rupture), immunity from expansion and contraction, and lightness. The importance of these several qualities varies with the varying requirements to be met; for instance, in some places, as in hospitals, cleanliness is one of the prime considerations; in other places immunity from abrasion might be one of the principal requisites. As to most of these qualities the conclusion is reached that the magnesite cement affords one of the most satisfactory flooring materials for many purposes such as in kitchen, laundry, toilet, and bath rooms, corridors, large rooms or halls in public or other buildings, including hospitals, factories, shops and restaurants.

There is no doubt that the material is steadily coming into more general recognition and favor for these uses. For a few special uses it is more or less disqualified; as an instance, it is not suited for construction of swimming tanks or for conditions of permanent wetness, since under constant immersion it gradually softens, although it is said to withstand intermittent wetting and drying and is recommended for

shower baths. Naturally it is not acid-proof and not wholly alkali-proof which might be a disadvantage in use for laboratory floors and tables; but these are rather special requirements. Its cost per square foot is given as 1 to 33 cents, depending on area, while it is estimated to be lower than marble, cork, rubber, clay or mosaic tile, slate or terrazzo, although more expensive than wood, asphalt, linoleum, or Portland cement.

In the discussion of the subject the causes of failure are ascribed to uncertain climatic changes, lack of uniformity in the mixtures used, lack of care on the part of those handling the materials, possible deterioration of materials used through exposure (either before or after mixing), lack of proper preparation of foundations on which the material is to be laid, and as a very important factor, experience or nonexperience in the manipulation or actual laying and troweling of the material. Data concerning the percentages of magnesium chloride and ground calcined magnesite and data concerning the character and quantity of filler and color added to the commercial preparations are naturally guarded as trade secrets by the firm already in the business. The examination and standardization of the materials used, and of acceptable filler materials, and the establishment of standard proportions for the mixture would seem to be about the only satisfactory way of attacking the problem.

The condition of the calcination of magnesite for cement uses is important, as the same material may undoubtedly be very greatly varied in its reacting properties by different treatment in the kiln. It is generally agreed that the magnesite for cement use must be comparatively free from lime, as lime has a greater tendency to reabsorb water and carbon dioxide than the magnesite, thereby causing swelling, and is therefore not so permanent in the completed cement as pure magnesite material. The filler used may constitute 10 to 40 per cent of the whole cement, and common consist of ground marble, sand, sawdust, cork, asbestos, or other material. As an example of the formulas used in mixing cements the following are quoted:\*\*\*

## Mixtures for the Underlying or Coarsening Layer

[Parts by weight.]

1. 15 parts magnesite.  
10 parts magnesium chloride solution, 20 deg. Baume.  
10 parts moist sawdust.  
(Sets in 24 hours.)
2. 10 parts magnesite.  
10 parts magnesium chloride solution, 28 deg. Baume.

\*\*In this summary of the uses and properties of magnesite cement we have drawn freely from the following references:

# Structural Materials in California.\*

By Fletcher Hamilton, State Mineralogist

## Magnesite Continued

- 5 parts sawdust.  
(Sets in 16 hours.)
- 20 parts magnesite.
- 15 parts magnesium chloride solution, 20 deg. Baume.
- 4 parts ground cork.  
(Sets in 24 hours.)
- 5 parts magnesite.
- 3 parts magnesium chloride solution, 20 deg. Baume.
- 5 parts ashes.  
(Sets in 24 hours.)

## Surfaces for Overlaying or Surface Layers.

- [Parts by weight.]
- 40 parts magnesite.
- 23 parts magnesium chloride solution, 19 deg. Baume.
- 10 parts asbestos powder.
- 5 parts wood flour.
- 1 part red ochre.  
(Sets in 24 hours.)
- 25 parts magnesite.
- 23 parts magnesium chloride solution, 20 deg. Baume.
- 4½ parts wood flour, impregnated with 4½ parts Terpentinhazlosung.
- 15 parts yellow ochre.  
(Sets in 30 hours.)

The magnesite used is, as explained, fine ground calcined (not deadened) of certain specific kinds or of derivation regularly sold for plastic purposes. This material mostly comes in paper-lined casks, keels or boxes, in which form it is permanent, but it deteriorates exposure, absorbing carbonic acid moisture from the air. If carefully dried it can probably be kept undamaged a year or more, but it should be used with a few weeks after being received, even under most favorable conditions.

In considering mineral production the value of the crude material is used far as practicable. Magnesite presents a peculiar example of a material which is seldom handled on the market the crude state. It is calcined and undressed before being considered marketable. The value of the calcined magnesite varies, the San Francisco price for 1914 averaging \$25 to \$30 per ton, which figure includes about \$4 ton freight. From two to two and a half tons of the crude material are used to make one of the calcined. From this derivation we have arbitrarily figured the value of the crude production, for 1914, on a basis of \$10 per ton at the mine.

Magnesite products have been found to be highly satisfactory and growing in popularity, and the future for this industry appears to be bright. A large supply is already known to exist in California, and only a sufficient demand and cheaper transportation are needed to make this an item of consequence in the mineral total of the State.

As indicated by this chapter heading, the mineral substances herein considered are those more or less directly used in building and structural work. California is independent, so far as these are concerned, and almost any reasonable construction can be made with materials produced in the State. This branch of the mineral industry for 1914 was valued at \$14,469,981, showing a decrease from 1913 like many other lines, owing to the financial depression. Only a few years ago its value was of no significance in considering the total mineral production of the State. With the growth, in population and otherwise, of California, this subdivision of the mineral industry in the State will increase indefinitely. Deposits of granite, marble and other building stones are distributed widely throughout the State, and slowly but surely transportation and other facilities are being extended so that the growing demand may be met. The largest single item, cement, has an unparalleled record of growth since the inception of the industry in California twenty-three years ago. Not

until 1904 did the annual value of cement produced reach the million-dollar mark. It increased 500 per cent in nine years. Crushed rock production is yearly becoming more worthy of consideration, due to the strides recently taken in concrete building, as well as to activity in the building of good roads. Brick, with an annual output worth over \$2,000,000, is slowly decreasing, due to the popularity of cement and concrete; nevertheless, this item will be an important one for many years to come, and of course, a market for fire and fancy brick of all kinds will never be lacking.

The following table gives the comparative figures for the value of structural materials produced in California during the years 1913 and 1914. Forty-four counties contributed to this total, and there is not a county in the State which is not capable of a considerable output of at least one of the following classes of material.

A comparison of the annual production of the various structural materials in 1913 and 1914 is shown in the following table:

Substance	Value 1913	Value 1914	Inc. value	Decrease value
Bituminous rock .....	\$ 78,479	\$ 166,618	\$58,139	
Brick .....	2,915,350	2,288,227		\$ 627,123
Cement .....	7,743,024	6,358,148		1,384,876
Chrome .....	12,700	9,434		3,266
Lime .....	528,547	378,663		149,884
Magnesite .....	77,056	114,380	37,324	
Marble .....	113,282	48,832		64,450
Sandstone .....	27,870	45,322	17,452	
Stone, miscellaneous .....	6,168,020	4,860,357		1,307,663
Totals .....	\$17,664,328	\$14,469,981		
Net decrease .....				\$3,194,347

## CEMENT.\*

By Fletcher Hamilton, State Mineralogist.

Cement is one of the most important structural materials in the output of the State. During 1914, there was produced a total of 5,109,218 barrels, valued at \$6,558,148. This production comes from six counties, as follows: Contra Costa, Napa, Riverside, San Bernardino, Santa Cruz and Solano. There were seven plants operating, employing 2,634 men. The enlargement of this industry, of course, depends upon the growth of the surrounding communities, and a summary of the lime and clay deposits of the State shows that considerable enlargement would not be impossible.

"Portland" cement was first commercially produced in the State in 1891; though in 1860 and for several years following, a natural hydraulic

cement from Benicia was utilized in building operations in San Francisco. While the total figures are not of the same magnitude as those for gold and petroleum, the growth of the industry has been more rapid, and a comparison of the annual figures representing the output since the inception of the industry is of interest.

## COAL DISPLACES COAL.

Owing to the great output of petroleum in California and its use as a manufacturing, railroad, and steamer fuel, the production of coal in Washington has been considerably reduced during recent years. It is estimated that the consumption of California oil for fuel on the Pacific Coast is equivalent to about 21,000,000 tons of coal, or between 6 and 7 times the output of coal in Washington, or for that matter in all the Pacific Coast States combined, in 1914.

\*From "Mineral Production for 1914" by Fletcher Hamilton, State Mineralogist, Bulletin No. 70 of California State Mining Bureau.

# News From the California State Commission.

## STATE CORPORATION DEPARTMENT

While Commissioner of Corporations H. L. Carnahan will permit shares to be issued by a corporation in exchange for an unpatented invention where the inventor has made application for patent, and desires to secure financial aid to develop his idea, permits authorizing such issues are drawn in such a manner as to safeguard the public as far as possible.

In every case of this character, the permit requires that the certificates evidencing shares so issued shall be void and must be cancelled if the inventor fails to secure Letters Patent covering his process or invention. Meanwhile, the certificates must be deposited as an escrow pending the proceedings before the Patent Commissioner.

In the case of Hendricks Copper Process Company, an Oakland corporation, the Commissioner authorizes the issue of 46,500 shares to Geo. P. Hendricks and Dr. R. L. Jump in exchange for the Hendricks process for hardening copper, with the provision that the shares be held as above indicated, and further that they be withheld from sale until the company shall have accumulated surplus profits sufficient for the payment of an annual dividend of not less than 10 per cent upon all shares outstanding. The company is further permitted to sell 1,670 shares to certain individuals who signed an application setting forth the fact that they were thoroughly familiar with the affairs of the company and experimental nature of its enterprise and desired to invest.

Similar conditions were imposed in permitting the Resilient Auto-Wheel Company, a Nevada corporation, capitalized at 1,000,000, to sell a limited number of shares at the price of 25c per share for the purpose of raising funds with which to conduct further experiments in the perfection of an invention on which application has been made for Letters Patent. The company is allowed to issue one share of stock to the inventors for each share sold for cash, thus giving them control of the company at all times. All of the shares issued to the inventors, and 17,500 shares permitted to be issued to investors prior to incorporation at a price less than 25c, must be deposited as an escrow until patents are allowed and until the company is in a position to pay 10% dividends.

Cinco Mining Company, owning a number of unpatented copper mining locations in Sierra County and lease and option to purchase quartz claims at Poker Flat, Sierra County, has been permitted to sell 250 shares at par, 100 per share, to net the company the full amount of the selling price. The permit requires 745 shares previously issued in payment for its properties to be held in escrow pending the financing of the company.

Porterville Magnesite Co. of California is permitted to issue 350 shares of preferred stock and 645 shares of common stock to C. S. Woody and H. S. Doyle in exchange for certain property and contracts for the construction of a plant upon the condition that the shares shall be deposited and held as an escrow pending the further order of the Commissioner, and that they shall not be sold or offered for sale without the consent of the Commissioner.

Dodge Rice Co., San Francisco, which proposes to operate in rice lands in Northern California, is permitted to sell 5,000 shares at par, \$100 per share, to net 100 per cent.

The Kings Hospital, Los Angeles, which proposes to erect a large one story hospital at 43rd and Normandy streets, Los Angeles, to cost approximately \$40,000, and to operate it and a nurses' home in connection with it, has made application for permission to sell 75,000 shares at par, \$1 per share, to net the company not less than 80 per cent of the selling price.

Standard Diving Company, San Francisco, formed to exploit a newly invented deep sea diving dress and air pump, is permitted to issue 680 shares to Lewis Larson, Cyrus Deckelman and Robert Caporgno, who financed the inventors, to issue a like number of shares to Jean F. Dera, Arthur P. Freeman and Charles Liebrecht, owners of the inventions and to sell 1,000 shares at par, \$10 per share, issuing an additional share to the inventors for each share sold for cash. It is required that all the share permitted to be issued except the 1,000 to be sold for cash, shall be withdrawn from sale during the financing period.

Concordia, a San Francisco club, has made application for permission to sell \$175,000 bonds to its members for the purpose of renewing and extending \$150,000 bonded indebtedness outstanding and to meet new building obligations. The bonds are subject to a first mortgage of \$85,000 upon the club property on Van Ness avenue. They bear 5 per cent interest and mature November 1, 1935.

California Profit Sharing Oil Company of Los Angeles makes application for permission to issue 5,000 shares to T. W. Phillips, 500 to J. A. Bangs, 10,000 to Geo. W. Thomas, 17,250 to C. W. Fox and 17,250 to D. C. Graham, in exchange for 20 acres of land in Ventura County, together with certain oil drilling equipment. The company proposes to split this property into 2,000 lots to be sold to the public, the purchasers to share in the product of an oil well to be drilled on the property if oil is found.

Briceland Oil Co. makes application for permission to issue certain shares to California and Oregon Oil Co. of New York. The company proposes to drill for oil on leased land in Humboldt County.

Porterville Alfalfa Farm, Inc., makes application to sell 550 shares at par, \$100 per share, to stock its property in Tulare County and erect additional buildings and install dairy equipment.

## APPELLATE COURT.

A decision of state-wide importance has been handed down by the Third District Appellate Court, being to the effect that proceedings in street improvement work are not subject to the initiative and referendum.

In writing the decision which was made on rehearing of the case of Edwin M. Chase vs. F. J. Kalher, town clerk of Rio Vista, Justice Hart changed his views. His first decision in the case was that the proceedings are subject to the initiative and referendum. In his last opinion, Justice Hart emphasizes that, were street improvement proceedings subject to the initiative and referendum, a bond issue for street work could be held, a resolution establishing grade or providing for improvement of a certain street could be knocked out and other proposed street work be demoralized.

It is pointed out that the persons directly concerned in street improvement are the owners of property along the street and if they desire to have the street improved, no power should be given by which the rest of the city could stop the work. If property owners do not desire a street to be improved there is a provision in the law by which they can hold up the proposed improvement for a period of six months.

## OIL POSSIBILITIES IN ROSEBURG COUNTY, MONT.

Requests for information concerning possible occurrences of oil and gas in Montana are frequently received by the Geological Survey. Partly to meet this demand for information and partly because much attention has been attracted to the possibilities of striking oil in the Porcupine Dome, the United States Geological Survey has published, a Bulletin 621-F, a report on the possibilities of obtaining oil in that locality.

An examination of the territory by C. E. Bowen has shown that the structural and stratigraphic conditions are favorable to the accumulation of oil and gas if these substances were originally contained in the strata, but it has not proved their existence in the area examined. In fact, there are no known surface indications of oil or gas in the area, and there is no well except a deep well drilled for water at Vananda that would test whether or not they occur below the surface.

A copy of this report may be obtained free on application to the Director of the Geological Survey, Washington, D. C.

# Technical Societies.

## SAN FRANCISCO ASSOCIATION OF MEMBERS OF THE AMERICAN SOCIETY OF CIVIL ENGINEERS.

### Officers for 1915.

President—A. M. Hunt.  
 Vice-Presidents—H. L. Hachl, M. C. Nichol.  
 Secretary—E. T. Thurston, Jr.  
 Treasurer—P. E. Harroun.  
 Board of Directors—M. C. Couchot, L. Hachl, A. M. Hunt, P. E. Harroun, T. Thurston, Jr., C. H. Snyder, C. B. King.  
 Weekly luncheons in College Room, McPhrau Cafe, Wednesdays at 12:30. Engineers welcome; Informal; no program.  
 Regular meetings are held bi-monthly at such time and place as may be appointed by the board of directors. The established custom is to meet on the third Fridays of February, April, June, August, October and December.  
 Address E. T. Thurston, Secretary, Mechanics' Institute Bldg., Post Street, San Francisco.

## SAN FRANCISCO CHAPTER AMERICAN INSTITUTE OF ARCHITECTS.

### 233 Post Street.

President—W. B. Faville.  
 Vice-President—Edgar A. Matthews.  
 Sec.-Treas.—Sylvain Schnaittacher.  
 Trustees—James W. Reid and Henry Kluwe.  
 Monthly meeting the third Thursday.

## STATE BOARD OF ARCHITECTS.

### Northern District.

Chairman—Bakewell, President.  
 Secretary—Schnaittacher, Sec.-Treas.  
 Members—C. Newsom, Edgar Matthews.  
 One vacancy.

## SAN ANGELES AND SOUTHERN CALIFORNIA.

## AMERICAN SOCIETY OF CIVIL ENGINEERS, So. Calif. Association of Members.

President.....Chas. T. Leeds  
 Vice-President.....Geo. S. Binckley  
 Secretary.....H. Hawgood  
 Treasurer.....Chas. H. Lee  
 Meetings bi-monthly. Address all communications to W. K. Barnard, Secretary, 701 Central Bldg., Los Angeles.

## AMERICAN INSTITUTE ELECTRIC ENGINEERS—Los Angeles Section.

Chairman.....E. R. Northmore  
 Secretary.....C. G. Pyle  
 Sec. Secretary.....Edward Woodbury  
 EXECUTIVE COMMITTEE—J. A. Hethcote, J. E. Barker, Geo. A. Damon, W. Nye.  
 Regular meetings third Tuesday in each month. Address all communications to C. G. Pyle, Secretary, Standard Underground Cable Co., 914 Hibernian Bldg., Los Angeles.

## ENGINEERS AND ARCHITECTS' ASSOCIATION OF SOUTHERN CALIFORNIA.

President.....Samuel Storow  
 Vice-President.....A. H. Koebig  
 Second Vice-President.....W. A. E. Noble  
 Sec.-Treas.....H. Z. Osborne, Jr.  
 DIRECTORS—Arthur S. Bent, J. J. Backus, A. C. Martin, Kenneth Shibley.  
 Regular monthly meetings as arranged by program committee. Address all communications to H. Z. Osborne, Jr., Secretary, care City Engineer's Office, Los Angeles.

## AMERICAN INSTITUTE OF ARCHITECTS—SOUTHERN CALIFORNIA CHAPTER.

President.....Albert C. Martin  
 Vice-President.....S. Tilden Norton  
 Secretary.....Fernand Parmentier  
 Treasurer.....August Wackerbarth  
 DIRECTORS—J. C. Allison, J. J. Blick, J. J. Backus.  
 Regular meetings second Tuesday evening each month. Address all communications to A. R. Walker, Acting Secretary, 1403 Hibernian Building.

## AMERICAN SOCIETY OF MECHANICAL ENGINEERS—Los Angeles Section.

Chairman.....Walter H. Adams  
 Secretary.....Ford W. Harris  
 EXECUTIVE COMMITTEE—W. H. Adams, Ford W. Harris, O. J. Root, W. W. Smith, Paul Weeks.  
 Address all communications to Ford W. Harris, 1029 Higgins Bldg., Los Angeles.

## PACIFIC COAST SOCIETY OF ENGINEERING CONTRACTORS.

President.....Geo. F. Pennebaker  
 Vice-President.....W. A. Russell  
 Secretary-Treasurer.....E. C. Ayars  
 DIRECTORS—Geo. F. Pennebaker, W. A. Russell, W. W. Brier, Geo. A. Rogers, L. S. Atkinson, Wm. Ledbetter, L. G. Garney, F. A. Hudson, F. H. Stout, C. L. Hyde, F. C. Ayars.  
 Address all communications to Frank C. Ayars, Secretary, 505-6 Douglas Bldg., Los Angeles.

## STATE BOARD OF ARCHITECTURE, SOUTHERN DISTRICT.

President.....J. P. Krempel, L. A. Secretary.....F. L. Roehrig, L. A. Member.....Octavius Morgan, L. A. Member.....S. P. Hunt, L. A. Member.....W. S. Hebbard, San Diego.  
 Address all communications to Fred K. L. Roehrig, Secretary, 721 American Bank Bldg., Los Angeles.

## BUILDERS EXCHANGE OF LOS ANGELES.

President.....John H. Bean  
 First Vice-President.....P. J. Bolin  
 Second Vice-President.....S. L. Weaver  
 Third Vice-President.....M. A. Berne  
 Treasurer.....John Griffin  
 SECRETARY.....J. T. Campbell  
 DIRECTORS—A. J. Crawford, Wm. McArthur, J. J. O'Connor, W. R. Simons, C. V. Fowler, J. Burnstein, J. H. Judy, W. E. Stradley, L. B. Webster, E. Waymon.

## BUILDERS ASSOCIATION OF SAN DIEGO—Second Floor K. or P. Bldg. Corner Third and E Streets, San Diego.

President.....Wm. R. Weckerly  
 Vice-President.....Chas. Kelly  
 Treasurer.....Max Winter  
 Secretary.....D. J. Miller  
 DIRECTORS—Wm. R. Weckerly, Chas. Kelly, Max Winter, D. J. Miller, Robt. Houghton, H. V. Wenger, R. M. Gilson.  
 Address all communication to D. J. Miller, Secretary, Builders' Association, Second Floor, K. of P. Bldg. San Diego.

## SAN DIEGO ARCHITECTURAL ASSOCIATION.

President.....J. B. Lyman  
 Vice-President.....Charles Cressy  
 Secretary.....Robt. Halley, Jr.  
 Treasurer.....G. A. Hanssen  
 Monthly luncheon at Rudder's first Monday each month. Address all communications to Robt. Halley, Jr., 314 Union Bldg., San Diego.

## PERSONAL.

### PERSONAL

S. J. Van Ornum, Civil Engineer, is supervising the street paving work being done for the city of Gridley by Clark & Henery Construction Co. of Stockton.

At the last meeting the Town Trustees of Morgan Hill, Santa Clara County, appointed Henry B. Fisher of San Francisco as engineer in charge of the improvement of Monterey street, between the improved parts of the state highway to the north and south.

## WORK, SAYS EDISON IS SUCCESS SECRET.

Thomas A. Edison and Henry Ford joined in giving the young men of this country advice on how to succeed.

"There is only one formula in my success cabinet," said Edison slowly, a twinkle in his eye. "That is make yourselves so doggoned valuable to your boss that he wouldn't fire you for the world."

Ford said:

"One word embraces my rule for success and that is 'work.' Any young man who works in this country and works in the right direction can make a success of his life."

### Mr. City Official:

A proposal ad in the "Building and Engineering News" will bring you inquiries and real competition on your public work; that's what you want!

# American Builders' Congress.

## Staff Article

The Builders' Congress which convened in the Palace Hotel Tuesday the 19th is one of the most important of the many noteworthy gatherings that have assembled in this City during the Exposition year. Every builder and every contractor that could be present at the various sessions was in attendance. We congratulate the building industry of San Francisco on having brought together at this time so representative a body of men as constituted this first National Congress of American Builders.

In immediate evidence of the splendid results obtained and the bright prospects for the future, Mr. Sturgis, who was on his way back to Boston from a meeting of the architects at San Francisco, came back from San Diego for the sole purpose of delivering an important message to the Builders, and Mr. Lewman came here direct from Louisville on purpose to do his part toward making the Builders' Congress in San Francisco a signal event in the history of the industry.

Another speaker of hardly less eminence in the building circles of America is Charles W. Gindele, President of the Building Construction Employers' Association of Chicago, an institution that has done more than any other by its thoroughly business like organization and its firm stand for justice and equity in the relationship of employer and employee, to bring about and perpetuate proper working conditions in Chicago.

### TUESDAY, OCTOBER 19.

The opening session of American Builders' Congress, held Tuesday morning at the Palace Hotel, was very well attended there being about 500 representative Architects and Building Firms in attendance.

W. B. Faville, President of San Francisco Chapter A. I. A., presided at the opening session.

Arthur Arlett presented Governor Johnson, compliments and greetings. Ed. Rainey spoke for Mayor Rolph and President of the Panama-Pacific International Exposition.

In introducing Mr. Sturgis to the audience, President W. B. Faville said:

"It is a pleasant privilege that has been assigned to me this morning of presenting to the great body of Master Builders and Artisans, the President of the Architectural Profession.

He comes from the Eastern horizon of our great Country to review the two pages of history which the Architects and Builders have created within the last few years.

These pages of history have been made by the combined efforts of the Architects, who have visualized the work, and the Builders and Artisans, who have brought these visions into reality.

The first page of history is that of the City itself, freshly arisen from its devastation, the story that it tells in its erection of building after building and stone upon stone is of the honesty and integrity of the Country which has

created it. It is not built as well as the best thoughts of the Country but it is built much better than the poorest expression of the Country and it is the result of our daily method of living.

The second page of history is that of the Exposition, a City of a thousand glitters of Architectural magnificence and the Poetry which is of the highest expression of ourselves.

It is because of these two pages of history written by the business of Architecture and the "Art" of Building, which go hand in hand and back to back that the message from the East will be of vital interest to you; it is a happy co-incidence which has brought the President of the American Institute of Architects—Mr. R. Clipston Sturgis to address you this morning."

The principal address of the morning session was delivered by R. Clipston Sturgis, President of the American Institute of Architects, Boston, Mass.

Mr. Sturgis took for his subject, "Co-operation" on the basis of success between the Architect, Contractor and Sub-Contractor. Mr. Sturgis pointed out the work done by the American Chapter of Architects in the matter of formulating a uniform contract and invited his hearers to study that document and to give the Chapter of Architects the benefit of any suggestions for the betterment of that instrument.

At the close of the morning session a luncheon was served to the invited guests. Among them being the following: R. Clipston Sturgis, President A. I. A.; W. B. Faville, President S. F. Chapter, A. I. A.; L. P. Rixford, Architect, Wm. Coxhead, Architect, George William Kelham, Architect, J. D. McGilvray, Chairman General Committee, H. L. Lewman, President National Association American Builders'; Chas. Wm. Bostrom, A. E. Coleman, Chas. G. Fanning, C. W. Gindele, E. C. Kimball, J. B. Noelle, Delegates from Chicago; A. H. Bergstrom, President General Contractors' Association, S. F.; E. M. Tate, Pittsburgh Builders' Exchange; H. Maundrell, President Builders' Exchange, S. F.; G. Alexander Wright, Architect and President of American Quantity Surveyors; Henry Jacks, C. M. Elliot of Local Committee, Willis Polk, W. H. Crim, Architect; E. T. Thurston, Secretary General Committee; Wm. Hague, Secretary General Contractors' Association; Ralph McLeran, General Contractors' Association.

The afternoon session, presided over by Chairman Ralph McLeran, was even better attended than the morning. United States Senator James D. Phelan addressed the meeting and paid a glowing tribute to the men who rebuilt the city.

H. L. Lewman of Louisville, Ky., President of the National Association of Builders' Exchanges delivered an address on National Organization in the Building Industry. Including all who are interested in any manner in the construction of buildings as The Builder. Mr. Lewman brought out in a forceful manner the great need of organized co-operation. Co-operation between the various local, state

and national associations was pointed out as of the greatest benefit. Mr. Lewman as one of the founders of the

**PRES. H. L. LEWMAN NATIONAL ASS'N OF BUILDERS' EXCHANGES**

National Association told of its organization its purpose and of the many ways in which such an organization benefited all those engaged in construction.

He was given careful attention and at the close of the address was greeted with a wealth of applause.

Using his native city of Chicago as an illustration, Charles W. Gindele, President of the Building Construction Employers' Association of Chicago, addressed the meeting on the subject of "The Building Business as a Factor in the Commercial Life of the Country." His remarks were witty and he soon secured and held the attention of his audience. Mr. Gindele has taken a leading part in building activities in Chicago and has witnessed that city in its growth, witnessed its struggle, and finally its complete recovery from the fire of 1871. Could a better or more competent man been assigned to the subject? Throughout his remarks, Mr. Gindele stuck to Chicago as his illustration and brought his audience through the days following the fire to his climax with Chicago as America's second greatest city.

Tuesday's program concluded with the Grand Ball at the Municipal Auditorium starting at 8:30 P. M. and continuing until long past midnight. Without a doubt it was an evening that will be long remembered by all who attended and will go down as the most successful social event of American Builders' Week.

### WEDNESDAY, OCTOBER 20.

Wednesday morning's program for Builders' Week provided by a Bay excursion, which a number of the out-

own guests and a large number of builders enjoyed despite the cold. The afternoon's program included one of the most interesting papers of the entire congress and was held in Festival Hall at the Exposition Grounds. Only a limited number were present, however, causing the omission of Mr. Lewis R. Ferguson's paper on "The Fireproof Value of Concrete," until Thursday afternoon. Walter E. Dennison, Second Vice-President National Terra Cotta Society, read a paper on "Clay Products in Their Modern Application," which was well received. Chairman Maundrell asked that a copy be filed and a paper be printed in its entirety.

John B. Lepnard, who was to have read on "Metal Products as Applied in Building," is ill and forced to remain at home.

Willard Doane, National Board of Fire Underwriters, read an excellent paper on "The Economic Side of Fire Prevention." He presented the matter in clear and concise words and his method of showing the vast amounts of loss each year by fire greatly interested the audience. Throughout he added much to the prevention of fire. Following his paper was a general discussion in which Mr. Lewis R. Ferguson and Mr. George Alexander Wright participated.

#### THURSDAY, OCTOBER 21.

Thursday was "Builders' Day" at the Exposition, the greater part of the day being consumed by the passing of the monster parade from the Exposition Building through the Exposition Grounds. After the parade had passed the reviewing stand commemorative medals were presented to H. L. Maundrell, President of the National Association of Builders' Exchanges; A. J. Armstrong, President of the General Contractors' Association, San Francisco; and H. Maundrell, President of the Builders' Exchange, San Francisco. The afternoon session, held in Festival Hall, was much better attended than Wednesday's session, and was presided over by Chairman P. J. McNear. A reception for the ladies was given during the afternoon in the California Building.

The first speaker in Festival Hall was Lewis R. Ferguson, Assistant Secretary National Association of Portland Cement Manufacturers, whose paper on "The Fireproof Value of Concrete" had been postponed from Wednesday's meeting. Mr. Ferguson is highly familiar with his subject and proved of much interest to the audience. His talk was fully illustrated with lantern slides showing the results of fire at the big Edison plant and the methods used in making resistance to the concrete columns, beams and slabs.

Mr. Fee, President of Building Employers' Association of San Francisco, and introduced by Chairman Maundrell, was also the ideal of both the nation and the Exchange," was the next speaker. His subject was "Efficient Conduct of Building Operations." All who know Mr. Fee as a business ability admit that a suitable man could not have been found to such a topic. He spoke of rides made each succeeding year

in mechanical equipment, design and methods of construction and illustrated this by reference to the Woolworth Building, New York, the Panama Canal, the rapid construction of our Exposition and of the Twin Peaks Tunnel.

"Such progress, however," said Mr. Fee, "has not been made in our system of estimating and indeed I doubt if a single step forward has been taken in this line of work in the last twenty years." He then proceeded to show the importance of efficiency in this department of the contractor's office and was loud in his praise of Architect G. Alex. Wright, one of the pioneers in advocating the establishment of a quantity surveyor system. Among other of Mr. Fee's suggestions bearing on this subject was that of securing state legislation looking to the creation of licensed quantity surveyors by the state. Mr. Fee was greeted with loud applause at the conclusion of his speech.

"Bonding the Pulverizer" was the subject of a paper read by Henry J. Jacobs, Attorney for the California Building Laws Association. He treated the legal side of the subject and was carefully followed by the audience.

Architect George William Kelham, Chief of Architecture of the Panama-Pacific International Exposition, was the last speaker, his subject being "Opening Bids in Public." Mr. Kelham was warmly received. His remarks were extemporaneous and included both sides of the subject so important to every contractor. He is heartily in favor of such a practice as opening bids in public and offered several excellent suggestions.

"Let the contractors appoint a delegation to attend any meetings at which bids are to be opened either by an architect or owner or by both. Don't let sixty or eighty contractors go. Send a committee." This was one suggestion and the second had to do with the much troubled question of sub-contractors' bids. "If," said Mr. Kelham, "each general contractor will accompany his bid with a list of his sub-contractors, I for one will be only too glad to adopt the idea of opening bids in public."

The evening session included a special display of lighting and fire works, receptions and entertainment in the California building.

#### THE PARADE.

The public had been promised a novel and unusual parade with many wonders and the Parade Committee, headed by Edward J. Brandon, and assisted by Parade Director Col. George L. Hutchin, made good, for not one of the promised features was missing.

Headed by a platoon of Mounted Police and consisting of eighteen divisions, the parade left the foot of Market street promptly at 10:30 o'clock. The line of march was out Market street to Golden Gate avenue, thence to Van Ness avenue, thence south on Van Ness to Market, counter marching on Van Ness to the Van Ness entrance to the Exposition and through the Zone to the Avenue of Palms, passing the reviewing stand by the Fountain of Energy and disbanding outside of the Scott street entrance.

Representatives from Sacramento,

San Jose and throughout Alameda County were present. Sacramento's delegation, consisting of over 150 was accompanied by a large float called "Sacramento's Skyline."

#### FIRST DIVISION.

Platoon of Mounted Police,  
Coast Artillery Band,  
Chief of Police and Staff,  
Grand Marshal—Edward J. Brandon,  
Governor Hiram Johnson,  
Mayor of San Francisco—Jas. Rolph Jr.,

## EIGHTEENTH DIVISION.

## Building Material Exhibits.

Marshal—A. J. Mitchell.  
Float—Cleopatra at the Bath.  
Float—Clawson Co.  
Float—W. D. Henderson.  
Float—Joost Bros.  
Float—John P. Cleese Co.  
Float—Otis Elevator Co.  
Float—Marshall-Stearns.  
Float—Albert J. Mitchell.  
Lighting Fixture Club in Autos.

## FRIDAY, OCTOBER 22.

Friday's program for American Builders' Week included a morning auto trip for visiting contractors, for machines being used. Among other the party included Ralph P. Taylor, M. Tate, Charles G. Fanning, W. Blaising and O. G. Hughson.

The afternoon session, held in the Palace Hotel, was exceptionally well attended and included the following excellent papers: "The Building and Maintenance of Good State Highways and Bridges," by A. E. Loder, Division Engineer, California Highway Commission.

"Men Who Build and Their Leg Responsibilities," by John L. McNamara, formerly United States District Attorney.

"Electricity as a Factor in Building Construction," by J. E. Van Hoesen, Electrical Engineer, Pacific Gas Electric Company.

"Modern Plumbing in Its Relation to Building Construction," by John E. Firmin, State Secretary, Association of Master Plumbers of California.

During the evening many of the visitors and large numbers of the local contractors visited the Zone. Special attractions were prepared and program of dancing at Old Faithful Inn.

## SATURDAY, OCTOBER 23.

Saturday night's banquet brought to a close American Builders' Congress Week, when all the principals who have been working for the past six months to make American Builders' Congress success, could relax and enjoy themselves.

About 200 prominent Eastern and local representatives of the Building Business and their ladies were present. Harry Maundrell, President of the Builders' Exchange, was Chairman of the evening while Fred Whitten acted as Toastmaster.

Songs by the Knickerbocker Ma Quartett, Miss Constance and L. Larsen were rendered during the evening.

Addresses were made by Messrs. Bergstrom, Ralph McLean, H. L. Levan of Louisville, Kentucky, H. Maundrell, Grant Fee, Chas. W. Gindele and A. C. Kimble of Chicago and E. M. Taft of Pittsburgh, Pa.

A very significant remark was made by President Maundrell, who said that he hoped all the Building Trades San Francisco and vicinity would be marshalled under one roof.

Dancing concluded the evening festivities.

### APARTMENT HOUSES.

**SAN FRANCISCO**—Apartment house, 7 story and base. Class C construction. Cost not stated. Architects, Smith & Stewart, 241 Kearny street, S. F. Owner's name withheld. Location, Fifty Vara district, covering an area of 50 by 70 feet. Will contain 26 suites of two and three rooms with private baths and wall beds. Interior finish pine, mahogany and white enamel. Hardwood floors. Complete steel frame. Exterior faced with pressed brick and terra cotta. Bath rooms finished in tile. Plans being prepared.

**SAN FRANCISCO**—Apartment houses 2, 2 story and base, frame, \$10,000. Architect, Edward E. Young, 251 Kearny street, S. F. Owner, Thomas Scobie, 363 14th avenue, S. F. Location, west Palm avenue north of Euclid, covering areas of 37 by 75 feet. Each will contain four small apartments with wall beds and private baths. Interior finish pine with some elm panels and hardwood floors. Central heating system. Bath rooms finished in tile. Exterior covered with cement plaster and rustic. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Apartment house, 4 story and base, reinforced concrete, \$30,000. Architect, D. C. Coleman, Merchants' National Bank Bldg., S. F. Owner, William A. McKee. Location, north Geary street west of Larkin. Will contain a number of two and three room suites with wall beds and private baths. Interior finish pine and elm with hardwood floors. Steam heat, elevator service and hot water system. Bath rooms finished in tile. Exterior faced with cement plaster. Plans complete and owner to let all contracts.

**OAKLAND, CAL.**—Apartment house, 2 story and base, frame, \$20,000. Architect, E. W. Cannon, Central Bank Bldg., Oakland. Owner, Mrs. Elizabeth Gilseman. Location, northeast corner Webster and Magnolia avenue. Will contain ten suites of three rooms and two two-room suites. Interior finish pine with elm panels and hardwood floors. Wall beds and private baths. Steam heat and a hot water system. Bath rooms finished in tile. Exterior covered with cement plaster on metal lath. Plans complete and figures being taken.

**OAKLAND, CAL.**—Apartment house alterations, 2 story, frame, \$5,000. Architect, none. Owner, A. L. Haley, 1225 San Pablo avenue, Oakland. Location, Cottage avenue. Work will consist of altering two flats into apartments and will include interior trim, painting, plastering, electric work and plumbing. Plans complete and work to be done by Day Labor.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Apartment house, 3 story and base, brick and frame, \$10,000. Architect, none. Owner, W. E. Schroeder, Fremont & Sutter streets, Stockton.

Location, southeast corner Fremont and Sutter streets. Will contain a number of two, three and four room suites. Interior finish pine and hardwood with some hardwood floors. Wall beds and private bath rooms. Steam heat, oil burning system, hot water supply. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**FRESNO, FRESNO CO., CAL.**—Apartment house, 3 story and base, frame, \$17,000. Architect, H. P. Starbuck, Howell Bldg., Fresno. Owner, Jacob Richter. Location, lots 1 to 5, in block R. Will contain two, three and four room suites. Interior finish pine with some elm panels and hardwood floors. Bath rooms finished in tile. Central heating system and open air sleeping porches. Hot water supply. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**OCEAN PARK, LOS ANGELES CO., CAL.**—Apartment house addition, 5 story and base. Class C construction, \$45,000. Architect, E. A. Wilson, Van Nuys Bldg., L. A. Owner, William Ellison. Location, Paloma avenue near Speedway. Will contain 78 rooms arranged in suites of two and three rooms. Interior finish pine. Central heating system, hot water supply and automatic elevator. Bath rooms finished in tile. Wall beds. Exterior faced with pressed brick. Plans being prepared.

### BATH HOUSES.

#### Contracts Awarded.

**SANTA MONICA, LOS ANGELES CO., CAL.**—Bath house, 3 story and base, frame, \$25,000. Architect, Charles Gordon, Los Angeles Investment Bldg., L. A. Owners, Santa Monica Bathing Co. Contractor, L. F. S. Syndicate, Los Angeles Investment Bldg., L. A. Contract price, \$25,000.

### BANKS

**BERKELEY, ALAMEDA CO., CAL.**—Bank and store alterations, brick and steel, \$15,000 for building and \$1,000 for bank fixtures. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, P. E. Bowles. Location, east Shattuck north Addison, covering an area of 84 by 78. Will contain bank and four stores. Interior finish pine and hardwood, special bank fixtures, ornamental iron and bronze. Exterior faced with pressed brick. Plans complete and figures being taken.

**WALNUT GROVE, SACRAMENTO CO., CAL.**—Bank, 2 story and base, reinforced concrete, \$10,000. Architect, W. H. Weeks, 55 Post street, S. F. Owner, Bank of Alexander Brown. Will contain banking rooms on first floor and a number of modern offices above. Interior finish pine, hardwood and or-

monumental lion. Special bank fixtures. Exterior faced with cement plaster. Plans being prepared.

### BONDS.

**RED BLUFF, TEHAMA CO., CAL.**—The election to vote \$300,000 for the erection of a high school in this city carried by a large majority. Plans for the building have already been chosen and which provide for the accommodation of 500 pupils and will be modern in every respect.

**MADERA, MADERA CO., CAL.**—At a recent meeting of the City Trustees the 11 street bridge bonds were awarded to the Lumberman's Trust Company of Portland, who bid \$12,426 for the issue. The contract for the bridge has already been awarded and work will be started immediately.

**MODESTO, STANISLAUS CO., CAL.**—By a majority of 179 to 76 the patrons of the Modesto schools living west of the S. P. tracks, at a recent straw election, favored the construction of one central school building instead of two small buildings.

**BAKERSFIELD, KERN CO., CAL.**—Petitions for the proposed Mt. Whitney highway from Bakersfield to the county line above Weldon on the South Fork of the Kern River have been filed with the County Supervisors. The Board will appoint a committee to investigate the proposition and to find out what amount of money will be required to build the proposed road before calling the election for bonds.

**HOLYVILLE, IMPERIAL CO., CAL.**—Secretary Berry, of the Imperial Irrigation District, has notified the Southern Pacific Company that their bid for the district bonds has been accepted. The railroad company offered to purchase about \$3,000,000 worth of bonds at par.

**MARTINEZZ, CONTRA COSTA CO., CAL.**—According to information given out by the Martinez Development Board, several large industries will locate in this city if the litigation over the title of the waterfront property can be settled within the next few weeks. The nature of the industries has not been definitely announced. C. H. Hayden is president of the Development Board.

**CALEXICO IMPERIAL CO., CAL.**—The City of Calexico is planning a bond issue in the sum of \$100,000, of which \$64,000 will be expended in the improvement of the water system, \$6,000 for a fire truck and \$5,000 for a fire department building. Further information may be had from the City Clerk at Calexico.

**LAMANDA PARK, LOS ANGELES CO., CAL.**—Bonds in the sum of \$25,000 have been voted for the purpose of installing an ornamental lighting system on the city streets.

**SANTA MONICA, LOS ANGELES CO., CAL.**—An election will be called shortly to vote bonds in the sum of \$250,000 for a system of storm drains. Preliminary plans have been prepared by City Engineer Morton of Santa Monica.

**HILLSBOROUGH, SAN MATEO CO., CAL.**—The City of Hillsborough is inviting sealed proposals for the sale of \$40,000 of municipal improvement bonds to be opened on November 16, at 5 o'clock p. m.

### BRIDGES AND DAMS

**SAN FRANCISCO**—Dry dock, \$5,000,000. Engineer's name not given. Owners, Union Iron Works. Secretary Daniels of the Navy has officially approved plans presented by the Union Iron Works for the construction of a \$5,000,000 dry dock, the largest on the Pacific Coast, which is to be erected at Hunters Point. Nothing now stands in the way of construction. It is stated that the Union Iron Works will at once call for bids.

**SANTA CRUZ, SANTA CRUZ CO., CAL.**—Bridge construction, steel and concrete. Cost not stated. Engineer, County Surveyor, Santa Cruz. Owners, Counties of Santa Cruz and San Benito. All bids for the construction of the Santa Cruz-San Benito bridge have been rejected by the Board of Supervisors and new figures are being taken. Bids will be opened on November 9th.

**MERCED, MERCED CO., CAL.**—Bridges, concrete and timber. Cost not stated. Engineer, County Surveyor A. E. Cowell. Merced. Owners, Merced County. County Surveyor A. E. Cowell has been instructed by the Board of Supervisors to prepare plans and specifications for bridges to be constructed over streams crossing roads No. 4 and No. 5.

**MERCED, MERCED CO., CAL.**—Bridges, reinforced concrete. Cost not stated. Engineer, City Engineer, Merced. Owners, City of Merced. At the last meeting of the City Trustees plans and specifications were presented by Superintendent of Streets John Czerny for the construction of a concrete bridge over south slough on 16th St. The Trustees will co-operate with the County Supervisors in building the structure. While no action was taken it is thought bids will be called at the next meeting.

**NAPA, NAPA CO., CAL.**—Bridges, 3, steel and concrete. Cost not stated. Engineer, County Surveyor, Napa. Owners, Napa County. All bids received by the County Supervisors for the construction of three steel and concrete bridges in Road District No. 12 have been rejected, as all were considered too high. New bids will probably be called for.

**RIO VISTA, SOLANO CO., CAL.**—Wharf. Cost not stated. Engineer's name not given. Owners, California Transportation Co. Word has been received by M. Christenson, agent at Rio Vista for the California Transportation Company, Jackson street wharf, that the company will erect a modern wharf there for the dockage of their ships. The wharf will be 300 feet along the river front, according to A. E. Anderson, an official of the company.

**MARTINEZ, CONTRA COSTA CO., CAL.**—Wharf construction, \$10,000. Engineer's name not given. Owners, Grangers Business Association, Martinez. The Grangers Business Association has asked the Railroad Commission for authority to build a wharf in Contra Costa County into the Straits of Carquinez, near Port Costa. The association has obtained a franchise from Contra Costa County to build the wharf.

**SACRAMENTO, CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor, Sacramento. Owners, Sacramento County. Bids will

be opened on November 2nd for the construction of a reinforced concrete bridge over the Pacific Gas and Electric Co.'s canal at Folsom. Plans can be secured from the County Surveyor.

**SACRAMENTO, CAL.**—By-pass. Cost not stated. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. City Engineer Frank Miller has conferred with Major Rand of San Francisco over the plans for the Bryte by-pass north of Washington. The plans are nearly complete. Nearly twenty sets of plans have been made by the City Engineer of Sacramento in an effort to arrive at a satisfactory decision for weir or gates at the river end of the canal. Further information will be given when the plans have been completed.

**VENTURA, VENTURA CO., CAL.**—River protection work. Cost not stated. Engineer, County Surveyor, Ventura. Owners, Ventura County. The Board of Supervisors is advertising for bids for the construction of protection work along Santa Paula Creek. J. B. McCloskey is the County Clerk.

**RIVERSIDE, RIVERSIDE CO., CAL.**—Bridge, reinforced concrete, \$10,000. Engineer, Charles B. Wright, Rialto. Owners, Crescent City Railroad Co., Riverside. The Crescent City Railway has plans under way for the construction of a reinforced concrete bridge under the Crescent City Railway at Fairmount Boulevard. The bridge is to have an arch of 66 feet. It is to be 22 feet high and 22 feet across the top. Further information may be had from the engineer.

**SALEM, MARION CO., ORE.**—Bridge, steel and concrete, \$235,000. Engineer, H. E. Holmes, Portland. Owners, Marion and Polk Counties. Assistant Engineer H. E. Holmes, of the State Highway Department, has submitted to the Marion County Court plans for the new bridge across the Willamette River at this point. The plans call for a steel bridge to cost approximately \$235,000. Polk and Marion Counties will share the cost of the proposed structure. Further information will be given when bids have been called.

### Contracts Awarded.

**SANTA ROSA, SONOMA CO., CAL.**—Bridge, reinforced concrete, \$1,448.50. Engineer, County Surveyor, Santa Rosa. Owners, Sonoma County. Contractors, Call Construction Co., Santa Rosa. Contract price, \$1,448.50.

**MADERA, MADERA CO., CAL.**—Bridge, reinforced concrete, \$9,470. Engineers, Leonard & Day, Rialto. Bids, S. F. Owners, Madera County. Contractors, Manning Bros., Fresno. Contract price, \$9,470.

**HANFORD, KINGS CO., CAL.**—Bridges and culvert, reinforced concrete. Cost not stated. Engineer, County Surveyor, Hanford. Owners, Kings County. Contractor, Frank Gallagher, S. F. Contract price not stated.

**MODESTO, STANISLAUS CO., CAL.**—Bridges, 4, concrete, \$4,538. Engineer, County Surveyor, Modesto. Owners, Stanislaus County. Contractors, F. F. Reames and R. M. Simpson, Modesto. Contract price, \$4,538.

### CHURCHES

**LOS ANGELES, CAL.**—Church. Class A construction, \$200,000. Architect,

John C. Austin, Baker-Betwiler Bldg., L. A. Owners, First Methodist Church. Location, southwest corner of 5th and Hope streets, covering an area of 195 by 157 feet. Fireproof construction, complete steel frame, brick exterior walls faced with pressed brick and terra cotta. Interior finish hardwood and ornamental plaster. Art glass windows. Concrete floors and hollow tile interior partitions. Steam heat and vacuum cleaning. Plans being completed and figures to be called for shortly.

## FACTORIES AND WAREHOUSES.

FRESNO, FRESNO CO., CAL.—Ware-house, 1 story, brick. Cost not stated. En gineer, City Engineer Cronkite, Fresno. Owners, City of Fresno. Will cover an area of 100 by 150 feet and will be constructed from old paving blocks removed from the streets. The work will be done by Day Labor.

GRASS VALLEY, NEVADA CO., CAL.—Oil supply station, 1 story, concrete. Cost not stated. Engineer, Engineering Dept. Standard Oil Co., S. F. Owners, Standard Oil Co. The Standard Oil Co. has purchased a large tract of land here and will erect a big supply station on the site. The site is midway between the two towns and on a line of both steam and electric railways

### Contracts Awarded.

CAMAS, WASH.—Warehouse, 3 story and base, reinforced concrete, \$30,000. Architect, none. Owners, Crown-Willamette Paper Co. Contractors, Van Sant-Houghton Co., 503 Market street, S. F. Contract price, \$30,000.

POMONA, LOS ANGELES CO., CAL.—Packing house, 1 story and base, reinforced concrete, \$25,000. Architect, none. Owners, Indian Citrus Union Plant. Contractors, Sommers-Lund Co., Baker-Betwiler Bldg., L. A. Contract price, \$25,000.

LOS ANGELES, CAL.—Warehouse reinforcing steel, \$26,000. Architect's name not given. Owners, City of Los Angeles. Contractors, Southern California Iron and Steel Co., 11th and Mateo streets, L. A. Contract covers reinforcing steel for municipal warehouse. Contract price, \$26,000.

## FIRE REPORT

SISSON, SISKIYOU CO., CAL.—Flames that started in the rear of the Del Coronado Hotel in this city last week swept an entire block on Walnut street, the center of the business district, causing a loss of \$20,000. Besides the hotel, two lodging houses and five residences were destroyed. Little insurance was carried on the hotel building.

CALEXICO, IMPERIAL CO., CAL.—Plans for rebuilding the Imperial Valley hardware store, recently destroyed by fire, are now complete and the work will be started shortly. The building will be two story brick or concrete and will cost about \$50,000.

CHICO, BUTTE CO., CAL.—The two-story residence of John Cusick, on Spruce street, was destroyed by fire last week causing a loss of \$1,500. The loss is partially covered by insurance.

FRESNO, FRESNO CO., CAL.—Fire in the Republican Building caused damage of \$2,000.

SACRAMENTO, CAL.—The recent fire in the southern Pacific snowsheds at Summit has proved to be one of the worst in years, according to Superintendent Dyer of that division. The damage, which was at first estimated at \$125,000, is now thought to total at least \$165,000.

## FLATS

SAN FRANCISCO—Flats, 2 story and base, frame, \$3,500. Architect, none. Owner, Thomas F. Mitchell, 1370 Utah street, S. F. Location, east Potrero north of 25th street. Will contain two flats of five rooms each. Interior finish pine with some hardwood floors. Open fire places and tile mantels. Automatic water heaters. Exterior covered with rustic. Plans complete and work to be done by Day Labor.

SAN FRANCISCO—Flats, 2 story and base, frame, \$4,000. Architects, Koenig & Christiansen, Humboldt Bank Bldg., S. F. Owner, L. C. Christiansen. Location, north Cabrillo west of 7th avenue. Will contain two flats of five and six rooms. Interior finish pine, hardwood and white enamel. Hardwood floors, open fire places and tile or brick mantels. Bath rooms tile. Automatic water heaters. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

SAN FRANCISCO—Flats, 2 story and base, frame, \$5,000. Architect, W. S. Rhodes, 3376 16th street. Owner, Henry Sipple. Location, 19th near Lexington. Will contain a number of three and four room flats. Interiors finished in pine and elm panels. Some hardwood floors. Open fire places and tile mantels. Wall beds. Exterior covered with rustic and cement plaster on metal lath. Plans being prepared.

SAN FRANCISCO—Flats and store, 2 story and base, frame, \$3,000. Architect, Paul P. De Martini, 2123 Powell street, S. F. Owner's name withheld. Location, west Hyde street near North Point. Will contain one store and two small flats. Interior finish pine. Open fire places and tile mantels. Exterior covered with rustic. Plans complete and work to be done by Day Labor.

## GARAGES

SAN FRANCISCO—Garage, 2 story and base, reinforced concrete. Cost not stated. Architect's name not given. Owner, Mrs. Ella Murray, Fairmont Hotel. Location, south California between Jones and Leavenworth. Designed for a commercial garage. Concrete floors and walls. Interior finish pine. Special machinery and tanks. Exterior faced with cement plaster. Plans being prepared.

## IRRIGATION PROJECTS

MODESTO, STANISLAUS CO., CAL.—Irrigation work. Cost not stated. Engineer, Herrmann, Modesto. Owners, Modesto Irrigation District. Plans were presented at the last meeting of the directors and approved for the following work: (1) The construction of the nine reinforced structures in lateral No. 3 (2) the construction of plain and reinforced concrete transition outlet structures to the permanent flume over Dry creek. The plans were approved

and bids were ordered advertised to close on November 6th. Further information may be had from the engineer at Modesto.

STOCKTON, SAN JOAQUIN CO., CAL.—Pumping station alteration and remodel, reinforced concrete, \$25,000. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owners, Pacific Gas and Electric Co. Location, East and Sonora streets. Work will consist of concrete work, steel, plumbing and electric work. Exterior faced with cement plaster. Plans complete.

AMITY, ORE.—Water system, \$21,623. Engineer's name not given. Owners, City of Amity, J. P. O'Neil of Portland submitted the lowest bid for the construction of the proposed water system to be constructed in this city. O'Neil bid \$11,854 for steel pipe and \$9,777.79 for wood pipe. He will probably be awarded the contract.

### Contracts Awarded.

SACRAMENTO, CAL.—Water pumps and header chambers, \$19,000. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Contractors, Tiebert & Ambrose, Oschner Bldg., Sacramento. Contract price, \$19,000.

MODESTO, STANISLAUS CO., CAL.—Irrigation work. Cost as follows. Engineer, Herrmann, Modesto. Owners, Modesto Irrigation District. Contractor, C. W. Richards, Oakland, enlarge canal between Rairden and Upper Dominelli. Contract price, \$33,539, and Barrett & Hilp, Sharon Bldg., S. F., five concrete drops, \$6,209.50.

## GOVERNMENT WORK & SUPPLIES

### Lighthouse Servier, Lath.

The following bids were received by the lighthouse inspector, 15th district, Portland, Ore., for one 25-in and 50-in sliding bed gap lathe and equipment for Tongue Point lighthouse depot, Ore.:

Zimmerman-Wells-Brown Co., Portland, Ore., f. o. b. Cincinnati, Ohio, \$1,291, accepted; f. o. b. Portland, Ore., \$2,175.

Fay & Scott, Dexter, Me., \$1,750; not as specified.

Portland Machinery Co., Portland, Ore., f. o. b. Dexter, Me., small, \$1,516; large, \$1,840; not as specified.

### Pearl Harbor, H. T., Elevators.

The following supplemental bids were received by the chief of the bureau of yards and docks, Navy Department, Washington, D. C., for 3 hydro-pneumatic freight elevators installed, complete, at the naval station, Pearl Harbor, H. T., bids for which were originally opened August 28:

The A. Kieckhefer Elevator Co., Milwaukee, Wis., \$4,896.

Otis Elevator Co., Washington, D. C., \$1,876.

### Pocatello, Idaho, Furniture.

The contract for installing furniture in the U. S. post office at Pocatello, Idaho, has been awarded to McGuire Cabinet Co., Los Angeles, Cal., at \$1,550.

### Important Contract Change.

The War Department, on the suggestion of the quartermaster general, has authorized the adoption of a plan for allowing bidders to submit annual guaranty bond in lieu of the separate

guaranty and the separate bond now required in each case, limited to cover the purchase of supplies and materials and the performance of service. The question was referred to other bureau chiefs regarding the extension of the plan to public works. The chief of ordinance, the surgeon general, and the chief signal officer reported that they see no reasons for any change in existing methods, so far as their departments are concerned. The chief of engineers gives the plan a qualified approval. This is regarded as a matter of administration, subject only to the qualification that the usual penal bond should be required to include the clause for the protection of labor and material mentioned. If the War Department retains the right to call for additional security within a year it is believed that the interests of labor and material mentioned would be safe guarded by the annual bond fully as well as by the separate bond now required.

#### Pearl Harbor, Marine Railway.

The bureau of yards and docks, Navy Department, has advertised for bids to be opened on November 27 for the construction of a marine railway at the naval station, Pearl Harbor, Hawaii. In this case, the bureau may award the contract for the work as a unit, but will also entertain bids for the various portions of the work separately and so award contract. This will enable the concerns in the various lines covered by the specifications to bid for that portion of the work they are able to perform only.

#### Canal Requisitions.

Bids will be called for at an early date by the general purchasing officer, Panama Canal, Washington, D. C., for furnishing hardware required in the construction of the Ancon Hospital. The advertisement will appear in these columns as soon as issued.

#### Berkeley, Cal., Vault Shelving.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for installing metal vault shelving in the U. S. public building at Berkeley, Cal.: Keyless Lock Co., Indianapolis, Ind., \$380.

Berger Mfg. Co., Canton, Ohio, \$356.  
Art Metal Construction Co., Jamestown, N. Y., \$403.

Steel Fixture Mfg. Co., Topeka, Kans., \$444.

Van Dorn Iron Works Co., Cleveland, Ohio, \$464.50.

General Fireproofing Co., Washington, D. C., \$371.

American Bank Protection Co., Minneapolis, Minn., \$482.

Crown Metal Construction Co., Jamestown, N. Y., \$560.

Durand Steel Locker Co., New York City, \$459.

Watson Mfg. Co., Jamestown, N. Y., \$625.

Canton Art Metal Co., Canton, Ohio, \$461.

#### Reclamation Allotments.

The funds appropriated by Congress for reclamation projects during the fiscal year 1916 have been apportioned to the various projects by the Reclamation Service to the amount of \$10,

948,831.69. To each project has been allotted the amount of money necessary to carry on this work economically during the period from July 1, 1915, to June 30, 1916, as follows:

Arizona, Salt River project, \$537,-  
\$54.58.

Arizona-California, Yuma, \$659,560,-  
31.

California, Orland project, \$70,195.92.

Colorado, Grand Valley project,  
\$661,284.06.

Colorado, Uncompahgre project,  
\$575,433.19.

Idaho, Boise project, \$1,039,943.56.

Idaho, Minidoka project, \$1,039,943.36.

Idaho-Wyoming, Jackson Lake enlargement, \$175,713.89.

Kansas, Garden City project, \$1,-  
592.77.

Montana, Huntley project, \$120,008.-  
45.

Montana, Milk River project, \$422,-  
323.36.

Montana, St. Mary's storage, \$473.-  
852.29.

Montana, Sun River project, \$719,-  
940.44.

Montana-North Dakota, L. Yellow-  
stone project, \$46,923.71.

Nebraska-Wyoming, North Platte  
project, \$272,653.09.

Nebraska-Wyoming, Fort Laramie  
unit, \$644,231.

Nevada, Truckee-Carson project,  
\$190,069.11.

New Mexico, Carlshad project, \$102,-  
279.66.

New Mexico, Hono project, \$1,038.77.

New Mexico, Rio Grande project,  
\$404,570.14.

New Mexico, Elephant Butte stor-  
age, \$607,387.84.

North Dakota, North Dakota pump  
project, \$20,034.99.

Oklahoma, Lawton project, \$40,022.28.

Oregon, Umatilla project, \$294,751.-  
94.

Oregon-California, Klamath project,  
\$164,863.11.

South Dakota, Belle Fourche project,  
\$143,949.27.

Utah, Strawberry Valley project,  
\$392,944.95.

Washington, Okanogan project, \$51,-  
608.45.

Washington, Yakima storage, \$559,-  
731.38.

Washington, Yakima-Sunnyside unit,  
\$278,076.62.

Washington, Tieton unit, \$51,959.08.

Wyoming, Shoshone project, \$419,-  
299.69.

Total for primary projects, \$10,473,-  
350.26.

In addition the following allotments  
were made for preliminary investiga-  
tions, secondary projects:

Arizona-California, Colorado River  
basin, \$25,000.

California, Iron Canyon co-operation,  
\$25.

California, Pitts River co-operative  
work, \$25.

California, Shasta Co. co-operative  
work, \$100.

California, Lassen Co. co-operative  
work, \$50.

California, general investigations,  
\$3,000.

Nevada, Walker River investiga-  
tions, \$50.

Oregon, Columbia River co-opera-  
tion, \$25.

Oregon, general co-operation, \$7,500.

Texas, Pecos River investigation,  
\$900.

Unallotted to specific investigations,  
\$11,325.

Total for secondary projects, \$50,000.

On July 1, 1915, there were available for immediate expenditure from the bond loan and Reclamation fund, \$10,198,769.44. The expected accretions to the fund from July 1, 1915, to June 30, 1916, will bring this amount up to \$17,198,769.44.

#### Storage Plants for Fuel Oil.

The following bids were received October 16 by the chief of the bureau of yards and docks, Navy Department, Washington, D. C., for constructing storage plants for fuel oil at the navy yards, Puget Sound, Wash.; Mare Island, Cal.; Norfolk, Va., and the naval station, San Diego, Cal.:

1. Charles C. Moore & Co., Sheldon Building, San Francisco, Cal.

2. F. P. Walsh, 244 Kearny street, San Francisco, Cal.

3. The Planner Water Tube Boiler Co., Akron, Ohio.

4. Wayne Construction Co., 131 Poplar avenue, Wayne, Pa.

5. Day & Zimmerman, 611 Chestnut street, Philadelphia, Pa.

6. John W. Danforth Co., 72 Ellicott street, Buffalo, N. Y.

7. The Turner Co., 272 Natoma street, San Francisco, Cal.

8. Foster-Vogt Co., 411 Sharon Building, San Francisco, Cal.

Item 1. Oil storage and handling plants with all appurtenances, complete—Bid 1, \$962,806; 4, \$1,155,073; 6, \$957,-  
500.

Item 2. Oil storage and handling plant at Puget Sound, Wash.—Bid 1, \$319,005; 4, \$413,624; 6, \$312,300.

Item 3. Oil storage and handling plant at Mare Island—Bid 1, \$295,200; 2, \$258,225; 4, \$407,732; 6, \$208,500; 7, \$313,000; 8, \$362,615.

Item 4. Do, at San Diego—Bid 1, \$165,780; 4, \$193,740; 6, \$156,600.

Item 5. Do, at Norfolk, Va.—Bid 1, \$199,800; 4, \$208,216; 6, \$199,696; 6, \$194,700.

Item 6. Oil storage and handling plant at Puget Sound, with appurtenances designed in accordance with the alternate method of multiple pumping plant, complete—Bid 1, \$287,685; 4, \$389,667; 6, \$286,500.

Item 7. Change under item 1 if conditions governed by item 6 are adopted for Puget Sound—Bid 1, \$27,900; 4, \$23,957; 6, \$21,950.

Item 8. Reduction in price under item 1 if the insulation is restricted to the steam and drip piping—Bid 1, \$101,000 from item 1, \$27,500 from item 2, \$13,500 from item 3, \$31,500 from item 4, \$18,500 from item 6, \$91,500 from items 1 and 7; bid 2, \$16,860; 4, \$30,100; 6, \$81,300; 7, \$17,000; 8, \$67,650.

Item 9. Reduction under item 1 if the combined heaters and coolers, the salt water pumps, traps, and all connections in the heater houses on the wharves, as well as the heater houses, are omitted—Bid 1, deduct \$39,500 from item 1, \$10,800 from item 2, \$10,700 from item 3, \$10,600 from item 4, \$5,000 from item 5, \$8,600 from item 6, and \$37,300 from items 1 and 7; 2, \$4,750; 4, \$31,926; 6, \$61,900; 7, \$5,000; 8, \$20,050.

Item 10. Reduction in price under item 1 if boilers of one-half the speci-

d heating surface, but with furnace capacity to give the specified, are substituted—Bid 4, \$12,200; 5, \$1,000.

Item 11. Reduction in price under item 1 if the omission of 1 boiler, 1 fuel pump, and 1 foam system pump at each station, providing outlets for their future installation—Bid 1, deduct \$74.00 from item 1, \$23,400 from item 2, \$3,000 from item 3, \$20,200 from item 4, \$12,500 from item 5, \$17,200 from item 6, \$68,700 from items 1 and 7; 2, \$7,100; 3, \$73,806; 6, deduct \$18,100 from item 2, \$16,200 from item 3, \$16,000 from item 4, and \$10,000 from item 7, \$21,000; 8, \$22,200.

Item 12. Reduction in price from item 1 if reinforced concrete chimneys are used at all stations—Bid 1, deduct \$1,000 from item 1, \$1,200 from item 2, and \$200 to item 5, deduct \$1,200 from item 6, deduct \$1,000 from items 1 and 2.

Item 13. Reduction in price if the buildings for the pumping plant, the valve chambers, etc., above ground are constructed of steel shapes and ribbed steel, with cement concrete plastered exterior, all according to the contractor's designs, subject to approval—Bid 1, \$3,160; 6, deduct from item 2 \$3,000, from item 3 \$2,400, from item 4 \$2,000, from item 5 \$1,000; 8, \$330.

Item 14. Reduction in price from item 1 for the omission of each new 1 tank, its embankments, heater, pump system, connections, etc., to the nearest adjacent valve chamber at each station—Bid 1, deduct \$25,400 from item 1, \$28,400 from item 2, \$28,400 from item 3, \$29,000 from items 4, 5, and 6, and \$23,000 from item 7; 2, \$24,950; 4, \$25,326; 6, deduct \$30,000 from item 2, \$31,700 from item 3, \$24,300 from item 4, 7, \$30,000; 8, \$26,820.

Item 15. Deduct from item 1 the complete project, but with such modifications or means or methods as are fully described and illustrated in detail in the proposal—Bid 1, deduct \$81,000 from item 1, \$22,500 from item 2, \$30,300 from item 3, \$27,300 from item 4, \$9,000 from item 5, \$28,500 from item 6, and \$88,600 from item 7.

Item 16. Reduction in price from item 1 for the omission of one of the three boilers proposed at Puget Sound—Bid 1, deduct \$7,900 from item 1, \$7,942 from item 2, \$2,927 from item 3, \$2,901 from item 4, and \$2,551 from item 5, 4 \$7,208; 6, \$7,000.

The following informal bid was received from bid 3; this bid was for boilers only: Item 2, \$12,950; 3, \$7,150; 4, \$7,419; 5, \$6,246.

#### Contracts Awarded.

MARE ISLAND, CAL.—Marine barracks, 3 story and base, reinforced concrete, \$141,700. Engineer, Bureau of Yards and Docks, Washington, D. C. Owners, United States Government. Contractors, Pringle-Dunn & Co., 238 Pine street, S. F. Contract price, \$141,700.

PEARL HARBOR, HAWAII—Wharf construction, \$155,900. Engineer's name not given. Owners, United States Government. Contractors, Hawaiian Dredging Co., Honolulu. Contract price, \$155,900.

HONOLULU, HAWAII—Torpedo boat piers, \$55,800. Engineer's name not given. Owners, United States Government. Contractors, Lord-Young Engi-

neering Co., Honolulu. Contract price, \$55,600.

#### HALLS AND SOCIETY BUILDINGS

HAYWARD, ALAMEDA CO., CAL.—Civic center hall, 1 story, frame, \$7,000. Architect, F. Holberg Reimers, 2125 Shattuck avenue, Berkeley. Owners, Modern Homestead Association. Will contain a large meeting room, office and social rooms. Interior finish pine with maple floors. Open fire place. Exterior covered with shingles. Plans complete and figures being taken.

#### HOSPITALS

VENTURA, VENTURA CO., CAL.—Hospital detention home and two cottages, \$42,333. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. The Kling Co. of Los Angeles presented the low figures for this work at \$43,333 and will probably be awarded the contract. A complete list of the bids appears under the heading of Los Angeles and Southern California in this issue.

#### HOTELS.

LOS ANGELES, CAL.—Hotel, 4 story and base. Class C construction, \$30,000. Architect, Charles H. Kysor, Wright and Callender Bldg., L. A. Owner, Al. Phillips. Location, 6th street near Ruth avenue, covering an area of 55 by 100 feet. Will contain two stores and a number of single rooms. Interior finish pine. Steam heat, elevator service and a hot water supply. Bath rooms finished in tile. Patent store fronts. Exterior faced with pressed brick trimmed with terra cotta. Plans being prepared.

#### LIBRARIES.

##### Contracts Awarded

LOS ANGELES, CAL.—Library, 1 story and base, brick, \$24,592.50. Architect, W. J. Dodd, Marsh-Strong Bldg., L. A. Owners, City of Los Angeles. Contractor, Robert Jordan, Security Bldg., L. A. Contract price, \$24,592.50.

OAKLAND, CAL.—Library, 2 story and base. Class C construction. Cost as follows. Architect, W. H. Weeks, 75 Post street, S. F. Owners, City of Oakland. Contractor, C. Christenson, Oakland, general construction. Contract price, \$29,145; Siebert & So., S. F., heating and ventilating, \$1,949, and Thomas Day Co., S. F., lighting fixtures, \$826.

#### PANAMA—PACIFIC EXPOSITION WORK.

SAN FRANCISCO—Wrecking exhibit building. Cost not stated. Architect, none. Owners, Swedish Building Committee, Swedish Bldg., Exposition Grounds. Bids will be received up to November 10th by A. Gibson, Secretary of the Swedish Building Committee, for the removal of their building. Mr. Gibson can be seen at the building from 10 a. m. to 5 p. m. An official proposal appears in another column of this issue.

#### RAILROAD CONSTRUCTION AND EQUIPMENT.

SAN FRANCISCO—Hetch-Hetchy Railroad construction, \$1,700,000. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. At yesterday's meeting of the Board of Public Works plans and specifications for the construction of the Hetch-Hetchy road were approved. The road will be approximately 16 miles in length and will cost in the neighborhood of \$1,700,000. Further information relative to this work may be had from the City Engineer.

PORTLAND, ORE.—Railroad construction. Cost not stated. Engineer's name not given. Owners, Oregon, California & Eastern Railroad Co., Portland. Permanent organization of the Oregon, California & Eastern Railroad Co., the plans for which contemplate the construction of a system of rail lines through Central Oregon to connect with existing railroads touching the borders of the vast undeveloped region and to open new through routes to San Francisco and Nevada, has been effected. This was the following preliminary organization of the company under the laws of Nevada. The directors elected Robert E. Strathorn president.

#### RESIDENCES.

SAN FRANCISCO—Residence, 2 story and base, frame, \$5,000. Architect, O. E. Evans, 2861 Mission street, S. F. Owners, Lindberg Bros. Location, west York between Army and 26th street. Will contain eight rooms, bath and sleeping porch. Interior finish pine and redwood. Some hardwood floors. Open fire place and tile mantel. Automatic water heater. Exterior covered with rustic and shiplap. Plans complete and work to be done by Day labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,500. Architect, L. Mastropasqua, 580 Washington street, S. F. Owner, W. Heffrin. Location, south Vallejo east of Taylor. Will contain six rooms and bath. Interior finish pine. Hardwood floors, open fire place and tile mantel. The bath room. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

SAN FRANCISCO—Residence, 1 story and base, frame, \$3,000. Architect, none. Owners, San Francisco Building Co., 45 Kearny street. Location, west 17th avenue south of California. Will contain seven rooms, bath and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors, open fire place, tile or brick mantel and automatic water heater. Bath finished in tile. Exterior covered with shingles. Plans complete and work to be done by Day Labor.

SAN FRANCISCO—Residence, 1 story and base, frame, \$2,500. Architect, Paul F. De Martini, 2127 Powell street, S. F. Owner, Frank Sulzko. Location, west 16th avenue south of Jennings. Will contain five rooms and bath. Interior finish pine with some enamel and hardwood floors. Open fire place and tile mantel. Automatic

water heater. Exterior covered with rustic and cement plaster on metal lath. Plans complete and figures being taken.

OAKLAND, CAL.—Residence, 1 story and base, frame, \$2,000. Architect, none. Owners, Jespersion & Dippo, 878 55th street, Oakland. Location, south Apgar west Market. Will contain five rooms and bath. Interior finish pine and white enamel. Hardwood floors, open fire place and tile mantel. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, E. B. Spittler, 815 Oxford street, Berkeley. Location, west Mendocino south of Indian Rock. Will contain eight rooms, bath and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors. Furnace heat, open fire places, tile and brick mantels and automatic water heater. Bath rooms tile. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$8,000. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, G. Ross. Location, Nova Piedmont. Will contain eight rooms, three baths and sleeping porch. Interior finish hardwood and white enamel. Hardwood floors. Furnace heat, open fire places, tile or brick mantels and automatic water heater. Bath rooms finished in tile. Exterior covered with cement plaster. Plans complete and figures being taken.

CLAREMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$12,000. Architect, Benj. G. McDougall, Sheldon Bldg., S. F. Owner, Sam B. McLenagan. Location, Claremont. Will contain ten rooms, baths and sleeping porch. Interior finish pine, hardwoods and white enamel. Hardwood floors. Central heating system, open fire place and tile or brick mantels. Bath rooms finished in tile. Automatic water heater. Exterior cement plaster. Plans being prepared.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,500. Architect, Hiram King Lovell, Dalziel Bldg., Oakland. Owner, P. L. Wayne. Location, Dana street. Will contain seven rooms, bath and sleeping porch. Interior finish pine and white enamel. Hardwood floors. Furnace heat and open fire place. Brick mantel. Tile bath room. Automatic water heater. Exterior covered with cement plaster. Plans being prepared.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$8,000. Architect, Sidney B. Newsum, Nevada Bank Bldg., S. F. Owner, R. B. Bain. Location, Piedmont. Will contain nine rooms, three baths and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors. Furnace heat and open fire places. Mantels tile and brick. Bath rooms finished in tile. Automatic water heater. Exterior covered with cement plaster. Plans complete and figures being taken.

OAKLAND, CAL.—Residence, 1 story and base, frame, \$2,500. Architect,

none. Owner, O. F. Brerling, 1748 Broadway Oakland. Location east Rawson north Santa Rita. Will contain five rooms and bath. Interior finish pine and redwood. Some hardwood floors. Open fire place and tile mantel. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residences, 2, 1 story and base, frame, \$2,500 each. Architect, none. Owner, G. Taylor, 438 Walsworth avenue, Oakland. Location, east Charlotte south Posen. Will contain five rooms and bath each. Interior finish pine and elm panels with some hardwood floors. Open fire places and tile or brick mantels. Automatic water heaters. Exteriors covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

OAKLAND, CAL.—Residence, 1 story and base, frame, \$2,000. Architect, none. Owner, Henry Barkmeyer, 173 35th avenue, Oakland. Location, west Peralta south Lynde. Will contain five rooms and bath. Interior finish pine with some hardwood floors. Open fire place and tile mantel. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

OAKLAND, CAL.—Residence, 1½ story and base, frame, \$3,200. Architect, Merrill Newsom, 1478 Broadway, Oakland. Owner, E. L. Higgins. Location, Thomas street. Will contain seven rooms, bath and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors. Furnace heat, open fire place and tile mantel. Automatic water heater. Tile bath. Exterior covered with cement plaster. Plans being prepared. Work to be done by Day Labor.

**ALTO, SANTA CLARA CO., CAL.**—School warehouse, 1 story, concrete, 32,500 sq. ft. Architect, none. Owners, Trustees Leland Stanford, Jr., University. Contractor, A. E. Hettinger, Alto. Contract price, \$25,000.

**SEWERS, STREET WORK & WATER SYSTEMS.**

**TURLOCK, STANISLAUS CO., CAL.**—Street paving. Cost not stated. Engineer, City Engineer, Turlock. Owner, City of Turlock. At the Trustees' meeting the Engineer was instructed to prepare estimates and the necessary plans and specifications for grading, oiling and curbing of the main alley to East avenue. Further information will be given on this work when the plans are complete.

**SALINAS, TULARE CO., CAL.**—Street improvement. Cost not stated. Engineer, City Engineer, Visalia. Owners, City of Visalia. Plans and specifications prepared by the City Engineer for the improvement of South Bridge street from the alley line south of the South Pacific's new freight depot on the Bridge street to Tulare avenue were adopted by the City Trustees. Bids on the work will be called shortly. The improvement will consist of a concrete pavement.

**SOUTH SAN FRANCISCO, SAN MATEO CO., CAL.**—Street improvement. Cost not stated. Engineer, Town Engineer, South San Francisco. Owners, City of South San Francisco. Bids will be opened on November 1st at 8 p. m. for improving Cypress avenue between the 11th line of Miller avenue and the 12th line of Lux avenue, and Lux avenue between the east line of Maple avenue and the west line of San Bruno avenue, grade, pave with asphaltic concrete, concrete gutters and four-inch lateral sewers. Bids will also be opened at the same time for the improvement of Magnolia avenue and Orange avenue, grade with asphaltic concrete and concrete gutters.

**SALINAS, MONTEREY CO., CAL.**—Road improvement. Cost not stated. Engineer, County Surveyor, Salinas. Owners, Monterey County. Bids are now being taken by the County Surveyors for the macadamizing and grading of a portion of the Arroyo road from the Pajaro Road District of Monterey County. The bids close November 1st, 2 p. m. Further information may

be had from the County Surveyor at Salinas.

**SALINAS, MONTEREY CO., CAL.**—Street improvement. Cost not stated. Engineer, City Engineer, Salinas. Owners, City of Salinas. The City Council has rejected all bids received for the improvement of North Main street and new bids have been called for. Further information may be had from the City Engineer at Salinas.

**NAPA, NAPA CO., CAL.**—Sewer construction. Cost not stated. Engineer, Town Engineer, Napa. Owners, Town of Napa. Bids will be opened on November 1st for the construction of a sewer in Nursery street. Complete information can be had from the Town Clerk.

**PETALUMA, SONOMA CO., CAL.**—Street improvement. Cost not stated. Engineer, City Engineer, Petaluma. Owners, City of Petaluma. At the last meeting of the City Council the following action was taken relative to street improvements. Superintendent of Streets Shaver was ordered to reconstruct the curb and gutter on the south side of Western avenue from Post to Baker. On recommendation of the Superintendent of Streets corrugated iron culverts were ordered for West street at Main, Stanley street at Upham and Basset street at Upham. Ordinances Nos. 140 and 141, establishing the grade of Hayes and Webster streets, were passed. A communication from Stone Bros. for a sewer on 2nd street between D and C was referred to the street committee. Specifications prepared by the City Engineer for the improvement of Laurel avenue from B to D streets were accepted and bids will be called for on the work.

**NAPA, NAPA CO., CAL.**—Street improvements. Cost not stated. Engineer, Town Engineer, Napa. Owners, Town of Napa. At the last meeting of the City Council the following action was taken on street improvements: Specifications for work on Ash street, to cost about \$1,243.07, were read and adopted and the work ordered done. Specifications under Resolution of Intention No. 458 for work on Clay street from Jefferson to Madison, to cost \$785.21, were also adopted and the work ordered done. Specifications for work on Jackson street from Yajome to Main were also read and adopted and the work ordered done. The cost will be \$1,719.79. Specifications for sewer work on Nursery and Vallejo streets, under Resolution of Intention No. 169 were read and adopted and the work ordered done. The cost will be \$26.20. Councilman Gardner said it had been suggested to him by the people living on Pine and Symons streets that catchbasins be placed on the corners of those streets. The matter was referred to the City Engineer.

**RICHMOND, CONTRA COSTA CO., CAL.**—Sewer construction. Cost not stated. Engineer, City Engineer, Richmond. Owners, City of Richmond. Plans and specifications having been approved the City Council has ordered bids received until 8 p. m. November 1st for the construction of a sewer in Cutting Boulevard. Further information may be had from the City Engineer at Richmond.

**CALIFORNIA**—State Highway construction. Cost as follows. Engineer,

State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. The following low bids were submitted at the last meeting of the State Highway Commission: Sonoma County, Sec. 8-A, Reclamation to Fairville, 4.2 miles, graded, Engineer's estimate, \$51,870.53. Low, Bates, Borden & Ayre, Oakland, \$22,182.90. Marinosa County, Sec. 18-A, Westward boundary to Cathay White Rock road, 10 miles, graded, Engineer's estimate, \$17,178.64. Low, George R. Bailey, San Diego, \$12,718.60. Placer County, Lincoln to northern boundary, 9 miles, paved with Portland cement concrete. Engineer's estimate, \$56,123.45. Low, C. H. & A. W. Gorrill, Call Bldg., S. F., \$47,339.80.

**SACRAMENTO, CAL.**—Transformer building. Cost not stated. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. The City Commission has accepted plans and specifications for a transformer building to be erected at the new sewer pumping station on Riverside road. Bids for the work will soon be asked for.

**SACRAMENTO, CAL.**—Sewers. Cost not stated. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Plans and specifications are now being prepared by Joseph E. Temple of the City Engineer's office for alley sewers and the City Commissioners will take the matter up with the Executive Board of the Oak Park Business Men's Association. It is estimated that six miles of sewers will be required to cover the territory bounded by Y street, Lower Stockton avenue, Park avenue and 37th street. Further information will be given on this work when the plans have been adopted.

**SAN LUIS OBISPO, SAN LUIS OBISPO CO., CAL.**—Road extension. Cost not stated. Engineer, County Surveyor, San Luis Obispo. Owners, San Luis Obispo County. Plans and specifications for the excavation and construction along the line of certain portions of the right-of-way on the extension of the Morro creek road, which work covers excavation and filling, etc., between Station O and Station 262-00, were approved by the County Supervisors at their last meeting and bids have been ordered received until November 2nd, 10 a. m. Further information may be had from the County Surveyor at San Luis Obispo.

**PASO ROBLES, SAN LUIS OBISPO CO., CAL.**—Sewer construction. Cost not stated. Engineer, City Engineer, Paso Robles. Owners, City of Paso Robles. A resolution of intention for the construction of sewers in Fifteenth and manholes at the intersection of a manhole at Olive and Twelfth streets and the construction of sewers and manholes at the intersection of 14th and Vine streets. Further information will be given on this work when the bids have been called.

**Contracts Awarded.**

Steam heat, elevator service, vacuum cleaning. Hollow tile interior partitions, metal window sash and frames. Interior finish pine, hardwood and large amount of ornamental plaster. Exterior faced with pressed brick trimmed with terra cotta. Plans being prepared.

#### MAV REVIVE LOST ART.

If any good can come at all from the destruction of Rheims cathedral, it might be said to be from the opportunity to study the fragments of stained glass from its famous windows, the secret of the coloring of this glass made in the thirteenth century having been lost in antiquity. M. Chesnau, assistant director of the French school of mines, has reported through the Academie des Sciences that he has been able to determine many of the chemical processes used to attain the results in the Rheims windows. Among other discoveries he says that the wonderful red glass which has been the despair of later artisans was acquired by covering a bottle green glass with a thin enamel of oxidulated copper.—Hartford Times.

S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. Army, general purchasing officer.

## NOTICE TO CONTRACTORS.

### FOR SALE.

The Swedish Government Building on the Exposition Grounds will be sold to highest bidder. Purchaser to remove said building from the premises, clear and grade the lot to level of curb, between January 15th and March 15th, 1916, and this work must be commenced on or before February 1st, 1916. Sealed bids, addressed to "Committee General for Sweden, Swedish Building, Exposition Grounds, San Francisco, Cal.," will be received up to **November 10th, 1915**.

For further particulars apply to A. Gibson, Secretary, Swedish Building, Exposition Grounds, between the hours of 10 A. M. and 5 P. M. (11)

## NOTICE TO CONTRACTORS.

**SEALED BIDS** will be received by W. F. McClure, State Engineer, Forum Building, Sacramento, California, up to and including **12 o'clock noon, Monday, November 8, 1915**, said bids then and there to be publicly opened and read for furnishing all plant, materials and labor, and doing the work required for the complete construction and erection of a building to be known as "Hay, Storage and Feed Barn," Stockton State Hospital Farm, near Stock-

ton, California, in accordance with the plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Such bids will be received for the Entire Work, and must be submitted on forms prepared and furnished by the State Department of Engineering.

Cash, a bidder's bond, or a certified check in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

A deposit of Fifteen (\$15.00) Dollars will be required on plans and specifications, the deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering, at Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope "Proposal for Hay, Storage and Feed Barn, Stockton State Hospital Farm, near Stockton, California."

(Signed) W. F. McCLURE,  
State Engineer.

## CALIFORNIA HIGHWAY COMMISSION

### NOTICE TO CONTRACTORS.

**SEALED PROPOSALS** will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until **2 o'clock P. M., on November 1, 1915**, at which time they will be publicly opened and read for construction in accordance with the specifications therefor, to which special reference is made, portions of state Highway as follows:

Imperial County across Myers Creek, (VII-Imp-12-A) a reinforced concrete bridge about 500 feet long, with one three-hinged arch span of 170 feet.

Plans may be seen, and forms of proposals, bonds, contract, and specifications may be obtained, at the said office, and they may be seen at the office of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' Offices are located at Wilts, Dunsuir, Sacramento, San Francisco, San Luis Obispo, Fresno, and Los Angeles.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the state.

CHARLES D. BLANEY,  
NEWELL D. DARLINGTON,  
CHARLES P. STERN,  
California Highway Commission.  
ALFRED E. FLEISCHER,  
Highway Engineer.  
CHARLES C. CARLETON,

out buildings. Interior finish pine with hardwood floors. Bath rooms finished in tile. Central heating system and hot water supply. Open fire places and tile or brick mantels. Exterior covered with cement plaster. Work being done by Day Labor.

**SEWER CONSTRUCTION**—Cost not stated. Napa, Napa Co., Cal. Engineer, Town Engineer, Napa. Owners, Town of Napa. Bids will be opened on November 1st for the construction of a sewer in Nursery street. Complete information can be had from the Town Clerk.

**STREET IMPROVEMENTS**—Cost not stated. Petaluma, Sonoma Co., Cal. Engineer, City Engineer, Petaluma. Owners, City of Petaluma. At the last meeting of the City Council the following action was taken relative to street improvements: Superintendent of Streets Shaver was ordered to reconstruct to curb and gutter on the south side of Western avenue from Post to Baker. On recommendation of the superintendent of streets, corrugated iron culverts were ordered for West street at Main, Stanley street at Upham and Lasset street at Upham. Ordinances Nos 140 and 141, establishing the grades of Hayes and Webster streets, were passed. A communication from Stone Bros. for a sewer on 3rd street between D and C was referred to the street committee. Specifications prepared by the City Engineer for the improvement of Laurel avenue from B to D street were accepted, and bids will be called for on the work.

**STREET IMPROVEMENTS**—Cost not stated. Napa, Napa Co., Cal. Engineer, Town Engineer, Napa. Owners, Town of Napa. At the last meeting of the City Council the following action was taken on street improvements: Specifications for work on Ash street, to cost \$1,243.97, were read and adopted and the work ordered done. Specifications under Resolution of Intention No. 455, for work on Clay street from Jefferson to Madison, to cost \$755.21, were also adopted and the work ordered done. Specifications for work on Jackson street from Yajome to Main were also read and adopted and the work was ordered done. The cost will be \$1,719.75. Specifications for sewer work on Nursery and Vallejo street, under Resolution of Intention No. 450, were read and adopted and the work ordered done. The cost will be \$520.20. Councilman Gardner said it has been suggested to him by the people living on Pine and Symons streets that catch-basins be placed on the corners of those streets. The matter was referred to the City Engineer.

**SEWER CONSTRUCTION**—Cost not stated. Richmond, Contra Costa Co., Cal. Engineer, City Engineer, Richmond. Owners, City of Richmond. Plans and specifications having been approved, the City Council has ordered bids received until 5 p. m., November 1st for the construction of a sewer in Cutting Boulevard. Further information may be had from the City Engineer at Richmond.

#### Contracts Awarded.

**BRIDGE**—Reinforced concrete, \$1,418.50. Santa Rosa, Sonoma Co., Cal. Engineer, County Surveyor, Santa Rosa. Owners, Sonoma County. Contractors, Call Construction Co., Santa

Rosa. Contract price, \$1,448.50.

**MARINE BARRACKS**—3 story and base, reinforced concrete, \$141,700. Mare Island, Cal. Engineer, Bureau of Yards and Docks, Washington, D. C. Owners, United States Government. Contractors, Pringle-Dunn & Co., 338 Pine street, S. F. Contract price, \$141,700.

**RESIDENCE**—1 story and base, frame, \$3,140. Martinez, Contra Costa Co., Cal. Architect, Carl Geiffuss, 16 Kearny street, S. F. Owner, M. W. Joost. Ludden & Lambley, Martinez, submitted the low figure for this work and will probably be awarded the contract.

#### FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA

**APARTMENT HOUSE**—3 story and base, frame, \$17,000. Fresno, Fresno Co., Cal. Architect, H. F. Starbuck, Rowell Bldg., Fresno. Owner, Jacob Richter. Location, lots 1 to 5 in block B. Will contain two, three and four room suites. Interior finish pine with some elm panels and hardwood floors. Bath rooms finished in tile. Central heating system and open air sleeping porches. Hot water supply. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**BRIDGES**—Concrete and timber. Cost not stated. Merced, Merced Co., Cal. Engineer, County Surveyor A. E. Cowell, Merced. Owners, Merced County. County Surveyor A. E. Cowell has been instructed by the Board of Supervisors to prepare plans and specifications for bridges to be constructed over streams crossing roads No. 4 and No. 5.

**BRIDGES**—Reinforced concrete. Cost not stated. Merced, Merced Co., Cal. Engineer, City Engineer, Merced. Owners, City of Merced. At the last meeting of the City Trustees plans and specifications were presented by Superintendent of Streets John Czerny for the construction of a concrete bridge over south slough on 16th street. The Trustees will co-operate with the County Supervisors in building the structure. While no action was taken, it is thought that bids will be called at the next meeting.

**WAREHOUSE**—1 story, brick. Cost not stated. Fresno, Fresno Co., Cal. Engineer, City Engineer Cronkite, Fresno. Owners, City of Fresno. Will cover an area of 100 by 150 feet, and will be constructed from old paving blocks removed from the streets. The work will be done by Day Labor.

**IRRIGATION WORK**—Cost not stated. Modesto, Stanislaus Co., Cal. Engineer, Herrmann, Modesto. Owners, Modesto Irrigation District. Plans were presented at the last meeting of the directors and approved for the following work: (1) the construction of the nine reinforced structures in lateral No. 2, (2) the construction of plain and reinforced concrete transition outlet structure to the permanent flume over Dry creek. The plans were approved and bids were ordered advertised to close on November 6th. Further information may be had from the engineer at Modesto.

**RESIDENCE**—2 story and base, frame, \$15,000. Fresno, Fresno Co., Cal. Architects, Condes & Tivolo, Fresno.

Owner, A. G. Wishon. Location Huntington Boulevard. Will contain twelve rooms, three baths and sleeping porches. Interior finish pine and hardwood with hardwood floors. Central heating system and open fire places. Mantels tile and brick. Bath rooms tile. All kinds of electric appliances. Exterior covered with cement plaster. Plans being prepared.

**RESIDENCE**—1 story and base, frame, \$1,200. Fresno, Fresno Co., Cal. Architect, None. Owner, Lydia Abbott. Location, 233 Mary street. Will contain four rooms and bath. Interior trim pine. Open fire place and tile mantel. Exterior rustic. Plans complete and work to be done by Day Labor.

**RESIDENCE**—2 story and base, frame, \$5,000. Visalia, Tulare Co., Cal. Architects, Swartz & Swartz, Rowell Bldg., Fresno. Owner, Mary Francis Chatten. Will contain eight rooms, bath and sleeping porch. Interior finish pine, hite enamel and hardwood. Hardwood floors. Open fire places, furnace heat and automatic water heater. Brick mantel, tile bath. Exterior covered with cement plaster. Plans being prepared.

**RESIDENCE**—2 story and base, frame, \$6,000. Visalia, Tulare Co., Cal. Architects, Swartz & Swartz, Rowell Bldg., Fresno. Owner, Mrs. T. A. Elliott. Will contain eight rooms, bath and sleeping porch. Interior finish pine, white enamel and hardwood. Hardwood floors, open fire places and tile mantels. Automatic water heater. Tile bath room. Exterior covered with cement plaster. Plans being prepared.

**SCHOOL ELECTRIC WORK**—Cost not stated. Bakersfield, Kern Co., Cal. Architect, Orville L. Clark, Brower Bldg., Bakersfield. Owners, City of Bakersfield. Bids will be opened on October 30th for all electric work in the new schools. Plans can be secured from the architect.

**SEWER CONSTRUCTION**—Cost not stated. Paso Robles, San Luis Obispo Co., Cal. Engineer, City Engineer, Paso Robles. Owners, City of Paso Robles. A resolution of intention for the construction of sewers in Fifteenth and Sixteenth streets, the construction of a manhole at olive and Twelfth streets and the construction of sewers and manholes at the intersection of 11th and Vine streets. Further information will be given on this work when the bids have been called.

**STREET PAVING**—Cost not stated. Turlock, Stanislaus Co., Cal. Engineer, City Engineer, Turlock. Owners, City of Turlock. At the Trustees' last meeting the Engineer was instructed to prepare an estimate and the necessary plans and specifications for the grading, oiling and curbing of Marshall avenue to East street. Further information will be given on this work when the plans are completed.

**STREET PAVEMENT**—Cost not stated. Visalia, Tulare Co., Cal. Engineer, City Engineer, Visalia. Owners, City of Visalia. Further information will be given when the plans have been completed.

**OIL SUPPLY STATION**—1 story, concrete. Cost not stated. Grass Valley, Nevada Co., Cal. Engineer, Engineering Dept. Standard Oil Co., S. F. Owners, Standard Oil Co. The Standard Oil Company has purchased a large tract of land here and will erect a big supply station on the site. The site is midway between the two towns and on a line of both steam and electric railways.

**PUMPING STATION**—Alter and remodel, reinforced concrete, \$25,000. Stockton, San Joaquin Co., Cal. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owners, Pacific Gas and Electric Co. Location, East and Sonora streets. Work will consist of concrete work, steel, plumbing and electric work. Exterior faced with cement plaster. Plans complete.

**RESIDENCE**—1 story and base, \$2,200. Sacramento. Architect, none. Owner, John L. Johnson, 2725 W. Sacramento. Will contain five rooms and bath. Interior finish pine. Hardwood floors, open fire place and tile mantel. Exterior covered with rustic. Plans complete and work to be done by Day Labor.

**STATE HIGHWAY CONSTRUCTION**—Cost as follows. California. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. The following low bids were submitted at the last meeting of the State Highway Commission: Sonoma County, Sec. 8-A, Reclamation to Fairville, 4.2 miles, graded. Engineer's estimate, \$31,870.33. Low, Bates, Borland & Ayre, Oakland, \$22,182.90. Mariposa County, Sec. 18-A, westerly boundary to Cathay White Rock road, 10 miles, graded. Engineer's estimate, \$17,178.64. Low, George R. Bailey, San Diego, \$22,748.60. Placer County, Lincoln to northern boundary, 9 miles, paved with Portland cement concrete. Engineer's estimate, \$56,123.45. Low, C. H. & A. W. Gorrell, Call Bldg., S. F., \$17,339.80.

**TRANSFORMER BUILDING**—Cost not stated. Sacramento, Cal. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. The City Commission has accepted plans and specifications for a transformer building to be erected at the new sewer pumping station on Riverside road. Bids for the work will soon be asked for.

**SEWERS**—Cost not stated. Sacramento, Cal. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Plans and specifications are

now being prepared by Joseph E. Temple of the City Engineer's office for alley sewers, and the City Commissioners will take the matter up with the Executive Board of the Oak Park Business Men's Association. It is estimated that six miles of sewers will be required to cover the territory bounded by Y street, Lower Stockton avenue, Park avenue and 37th street. Further information will be given on this work when the plans have been adopted.

#### Contracts Awarded.

George M. Easton.....	49,800
John Harnish Co.....	50,900
James T. Dawson.....	51,892
Merchants Bldg. & Invst. Co.....	51,975
Daubenspeck & Tryten.....	52,500
Robert Jordan.....	52,903
Jacob Constr. Co.....	53,360
C. McNeill.....	55,320
John Simpson & Co.....	56,950
Pioneer Constr. Co.....	59,361

#### PORTLAND AND OREGON

**BRIDGE**—Steel and concrete, \$235,000. Salem, Marion Co., Ore. Engineer, H. E. Holmes, Portland. Owners, Marion and Polk Counties. Assistant Engineer H. E. Holmes, of the State Highway Department, has submitted to the Marion County Court plans for the new bridge across the Willamette River at this point. The plans call for a steel bridge to cost approximately \$235,000. Polk and Marion Counties will share the cost of the proposed structure. Further information will be given when bids have been called.

**WATER SYSTEM**—\$21,623. Amity, Ore. Engineer's name not given. Owners, City of Amity. J. P. O'Neil of Portland submitted the lowest bid for the construction of the proposed water system to be constructed in this city. O'Neil bid \$11,854 for steel pipe and \$9,777.70 for wood pipe. He will probably be awarded the contract.

**RAILROAD CONSTRUCTION**—Cost not stated. Portland, Ore. Engineer's name not given. Owners, Oregon-California & Eastern Railroad Co., Portland. Permanent organization of the Oregon-California & Eastern Railroad Co., the plans of which contemplate the construction of a system of rail lines through Central Oregon to connect with existing railroads touching the borders of the vast undeveloped region and to open new through routes to San Francisco and Nevada have been effected. This was the following preliminary organization of the company under the laws of Nevada. The directors elected Robert E. Strathorn president.

**STORES AND LOFTS**—2 story and base, brick. Cost not stated. Portland, Ore. Architects, Whitehouse & Foulhoux, Wilcox Bldg., Portland. Owner O. B. Stubbs. Will cover an area of 70

by 100 feet, and has been designed to carry four stories. Upper floor lefts. Interior finish pine. Patent store fronts, steam heat and hot and cold running water. Exterior faced with pressed brick. Plans being prepared.

#### SEATTLE AND WASHINGTON

##### Contracts Awarded.

**WAREHOUSE**—3 story and base, reinforced concrete, \$30,000. Camas, Wash. Architect, none. Owners, Crown-Willamette Paper Co. Contractors Van Sant-Houghton Co., 503 Market street, S. F. Contract price, \$30,000.

##### Mr. City Official:

A proposal ad in the "Building and Engineering News" will bring you inquiries and real competition on your public work; that's what you want!

#### PHILIPPINE CEMENT PLANT IN OPERATION.

[From the Philippine Free Press.] Information has been received from Manila that the first shipment of cement from the plant of the Rizal Cement Company, at Binangonan, Province of Rizal, has been received by a local firm. The works have been under construction for some time, but were completed only a few weeks ago. They have a capacity of 500 barrels a day. Tests of the product, both here and abroad, have been very satisfactory, proving it equal to the best imported cement. Some account of the plant, before its actual erection, was published in the Daily Consular and Trade Reports for September 27, 1912.

Seattle is the only city in the United States boasting a tin smelter. This industry depends on the Alaskan mines for its raw material, but hopes to develop connections enabling it to draw upon Bolivian and Chinese sources. The Straits Settlements are the present world leaders in tin production with 70,000 tons annually. Bolivia yields 20,000 tons and all other sources 30,000 tons.

**Wybro**

Reg. U. S. Pat. Office  
The Panels that are  
as good as they are  
famous.

**Wybro Panels combine Service & Quality with Price.**

It is not alone the "price" that counts in buying panels. The quality is of more than passing importance. WYBRO PANELS combine quality with service and price. Quality is first in Wybro Panels—the service they give is unsurpassed, and the price is just right—not high, nor low—but just the right price for the right panel.  
200 varieties—price list free.

### ABOUT OURSELVES.

---

Building and Engineering News offers the best medium in the entire west for the Engineering Profession to get in touch with and keep in touch with all the activities of this great and undeveloped western country that requires engineering service, skill and brains.

Our "Technical Section" contains illustrated descriptions of construction work now going on all over the western hemisphere in all the countries bordering on the Pacific Ocean by the men who are actually doing the work, the engineers designing the work, the contractors executing the work and the inspecting engineers supervising the details of the work.

We bring descriptive articles of the workings and activities of the various Government Engineering Bureaus in the different countries and will in course of time have brought our readers a complete birdseye view of all the important engineering undertakings inaugurated as a direct result of the determination of the American People to build the Panama Canal.

We bring the up-to-date reports of all the important decisions of the State Commissions on all matters of interest to Engineers.

We bring short descriptions of contemplated work with the preliminary estimates of the engineers in charge.

We also bring important discussions by the most prominent engineers the world over on the vital engineering questions of the day.

We bring articles on important development enterprises, both private and governmental.

Our "News Section" brings **each week a complete** advance summary of new work contemplated, arranged both as to character of work and location of work with a ready reference index of both, making it possible for the engineer and contractor at a glance to find out what is going on in his special line and in his locality. Our "Sealed Proposals" contains the official notices of all the most important work going on in the west.

We desire to be of real practical service to the entire profession and invite the engineers and professional men to send to this office news items of professional interest such as new construction work, completion of construction work, surveys, changes in engineering personnel, change of location of engineering offices, engagement of engineers on new projects, appointment of engineers to new positions.

It often happens that engineers who have worked together on a large piece of construction work, but through the vicissitudes of this kind of work become separated, would like to be together again when opportunities offer themselves, and here the best way to keep track of each other is by making this journal a clearing house of information regarding your whereabouts.

By constantly keeping us advised of your professional doings and location, your friends will always know where they can find you when a big job comes up where your efficient services are desired.

Therefore send in your subscription and all the professional information about yourself and your work. It will do all of us some good some day and you will be helping to build up a paper whose object is to serve you better and better.

Yours for efficient service,

BUILDING & ENGINEERING NEWS.

## Concrete Chimneys

By

George Nelson, C. E.

Standard Oil Company Refinery Concrete Chimneys.

The use of reinforced concrete in the construction of factory chimneys is of rather recent date and a review of some of the most typical examples of this kind of construction in Southern California is hereby presented to our readers.

In the summer of 1911 the Standard Oil Company bought the 840 acres at El Segundo on the Santa Monica Bay in Los Angeles County and immediately began the construction of their refinery.

Bent Bros. were chosen as the contractors to build the outlet tunnel for the waste water, and when the question of the chimneys came up they were also authorized to build these, eight in number and of various sizes, according to plant requirements.

The forms used are made of yellow pine and consist of "straight" units and "reducer" units, the same number of "reducer" units is used in large chimneys as in small ones, and they are uniformly distributed in the form and the same number is kept in the form no matter how high the chimney is. A certain number of straight units are removed as the work goes on, to give the taper.

ving Boiler Chimney Exterior Wash at of Neat Cement. This Chimney 10 feet in Diameter at Top and 125 et High.

One of the Still Chimneys, Completed and Being Given a Brush Coat of Neat Cement on the Exterior. This Chimney is 80 Feet High.

Three Still Chimneys, two complete, third up 22 feet.

The outside forms are held in position by cables and the inside forms by flat steel bars bent to the proper curvature.

The forms are evenly and accurately spaced and great care is taken to have them plumb and level before the platforms and scaffold is carried up ready for the pouring of the concrete.

The foundation for the chimney is heavily reinforced with  $\frac{1}{2}$ -inch square twisted steel bars, laid at right angles with each other and parallel to the sides and also diagonally.

The concrete for this is made of 1 part of cement, 3 parts of sand and 5 parts of crushed stone or gravel, largest size  $\frac{1}{4}$  inch.

The reinforcement for the chimney consists of  $\frac{1}{2}$ -inch square twisted steel bars spaced according to the requirements of height of the chimney, evenly spaced overlapping about 20 inches and the horizontal rings are composed of  $\frac{1}{2}$ -inch square twisted steel bars, overlapping 16 inches and wired to the vertical bars and spaced 14 inches apart, making 3 bars for every  $3\frac{1}{2}$  feet of form.

The concrete for the chimney is made of 1 part of Portland cement,  $2\frac{1}{2}$  parts of sand and 4 parts of gravel. All sand and gravel is measured in boxes to secure uniform mixture.

The concrete is mixed on the ground and hoisted in buckets.

Still Chimney, Showing Scaffold and Hoist.

Concrete Chimney for Main Boiler Plant.

Still Chimney Under Construction.

At El Segundo there is one large chimney for the main boiler plant and seven small ones for the different stills and the acid plants.

The large chimney is 125 feet high and 10 feet inside diameter at the top and about 12.25 feet at the bottom with uniform taper.

The wall is  $9\frac{1}{2}$  inches thick at the bottom and 5 inches thick at the top. The large chimney took 230 barrels of cement, 94 cubic yards of sand, 15

# International Engineering Congress, 1915.

(Concrete Chimneys Continued.)

Reinforced Concrete Chimney 100 Feet High Built in Los Angeles for the Kaiser Packing Co.

bie yards of gravel and 5 tons of square twisted steel bars for reinforcement. It took about nine weeks to build it. The small chimneys took each 79 barrels of cement, 32 cubic yards of sand, 52 cubic yards of gravel and 2 tons of reinforcing steel. It took from four to five weeks to complete a small chimney.

The four small chimneys were 80 feet high and 6 feet in diameter at the top. The wall was 6 3/4 inches thick at bottom and 4 inches thick at top. They were lined with common brick laid in place and were built for the stills. Two small chimneys were 50 feet high and were built for the acid plant. Bent Bros. also built three reinforced concrete chimneys for the Standard Oil Company at their plant at Bakersfield. Each of these chimneys was 80 feet high and 7 feet in diameter at top. These chimneys each took 85 barrels of cement, 25 cubic yards of sand, 30 cubic yards of gravel, 33 cubic yards of crushed rock and 2,155 pounds of reinforcing steel. Each of these chimneys took about six weeks to complete.

# Pasadena Municipal Light Plant.

By C. W. KOINER, Chief Engineer.

## EIGHTH ANNUAL REPORT OF PASADENA'S MUNICIPAL LIGHTING WORKS DEPARTMENT; 1914-15.

### Commissioners, City of Pasadena.

A. L. Hamilton, Commissioner of Finance.

T. D. Allin, Commissioner of Public Works.

W. B. Loughery, Commissioner of Public Safety.

M. H. Salisbury, Commissioner of Municipal Utilities.

W. F. Creller, Commissioner of Parks and Buildings.

C. W. Koiner, General Manager and Electrical Engineer Municipal Lighting Works Department.

Office of the Municipal Lighting Works Department.

Pasadena, Cal., August 27th, 1915

Mr. M. H. Salisbury,

Commissioner of Municipal Utilities,  
Pasadena, California.

Dear Sir:

I have the pleasure to submit, herewith the eighth annual report of this department, for the year ending June 30th, 1915. There has been included in the report considerable detailed information on the operation of the Department. However, we have eliminated considerable of the minor details which might not prove of interest to the average citizen. All essentials are included and the Department is ready at all times to answer any ques-

plant equipment. The balance on these contracts will be paid after all details are completed in connection with the installation of this equipment. The \$18,677.76 cash balance on hand at the end of the year will be sufficient to complete all payments on these contracts.

Two thousand dollars was paid during the month of June on the loan from the General Fund, and other payments will follow until this obligation is disposed of. Our extensions have all been made with Interest Reserve, Depreciation, and Surplus funds, as has been the practice in previous years. Instead of having all of this money in the bank we have it in property, wire, pole lines, meters, services, transformers, power plant equipment, etc.

### Depreciation.

A great deal has been said on the part of our critics about depreciation, especially at the time we started the operation of this Department. It will be noted that we have written off \$161,216.35 to cover deferred maintenance, obsolescence, and all those things which pertain to depreciation. Considerable of the plant has been in operation for eight years, and during this period the plant has been maintained and kept in a high state of repair. The fact is, we are writing off more depreciation than is necessary. However, we think it best for the present to continue to depreciate our

### Surplus.

By deducting from the gross earnings all operating expenses, depreciation and interest on the total average investment, we have a surplus for the year of \$37,246.23. This sum added to our previous surplus makes a grand total of \$108,356.31. It will be understood that this is invested in the property. Instead of issuing bonds or Depreciation Reserve, Interest Reserve and Surplus funds have been used for construction purposes.

### Construction.

The cost of extensions during the year is segregated and shown in another column.

### Saving Effectuated.

In all previous reports we have placed emphasis on the saving resulting to the people of Pasadena since they started their light and power plant.

This is by reason of the difference in rates charged before the city entered the light and power business and the rates charged our neighboring cities since. The saving amounted \$731,083.96 at our last report, and adding the saving for the past year calculated in the same way, we have a total sum of \$905,083.96, which is more than the cost of the whole plant. However, the people still have the plant, which has been more than self-sustaining by earning all its operating charges, depreciation and a safe margin of surplus to cover emergencies.

The rate was 15 cents per K. W. when the city began talking about municipal light and power plant. At the time the plant was built the rate was 12½ cents per K. W. H. for the first 666 K. W. H., less 10% for prompt payment. While the rate was low to meet the 8-cent rate established by the city, for current supplied by municipal plant, the 12½-cent rate was continued in force in various of Southern California cities by our competitor. Subsequently the base rate of some of the various other cities was reduced to 10 cents, and so remained until January, 1913, when a base rate of 8 cents was established. On April 1st, 1914, a base rate of 7 cents was made by the city's competitor in various other Southern California cities. However, this is considerably higher when compared with the rate of 5 cents charged by Pasadena's municipal light plant for lighting service, show that the City of Pasadena is getting along with a steam plant, and distributing to its customers, in competition with a large hydro-electric company, electrical energy at a profit, for less than its competitor offers in other Southern California cities, except Los Angeles, where the rates are regular to 5½ cents.

## Increases.

	1914-15	1913-14
	over	over
	1913-14	1912-13
Commercial Light receipts increased.....	20.68%	21.25%
Commercial Power receipts decreased.....	14.75%	In. 87.73%
By deducting the sales to the Water Department the		
power receipts increased.....	1.02%	32.08%
Street Lighting receipts increased.....	6.49%	6.2%
Gross Receipts increased.....	9.6%	27.03%
By deducting the sales to the Water Department, the		
gross receipts increased.....	13.64%	19.19%
Net Receipts increased.....	15.83%	15.94%
Output in K. W. H. sold decreased.....	.77%	In. 50.15%
By deducting the sales to the Water Department the		
output in K. W. H. sold increased.....	9.8%	
Number of consumers increased.....	15.68%	40.34%
Total cost of all current sold per K. W. H. increased.....	7%	De. 9.05%
Surplus increased.....	26.86%	24.27%

tions from our inquiring citizens concerning any detailed information that may be desired.

I wish to call attention to the increased sales of electrical energy for lighting and domestic uses, which were more than sufficient to offset the decreased use of electrical energy by the Water Department. The net results for the year are best in the history of the plant.

The cost of extensions during the year was \$70,016.73. Of this sum \$31,484.48 was paid on contracts for power

property in the same manner as in the past. No credit has yet been extended to Depreciation Reserve on account of money used for extension purposes.

### Interest on Total Average Investment.

As has been practiced heretofore, we have charged interest on the total average investment in the plant. This interest the past year amounted to \$24,968.50. Of course we do not have to pay interest on the total average investment, only interest on outstanding bonds, which amounted to \$11,153.44 the past year.

### Balance Sheet.

ish to call attention to the Bal-  
Sheet. This is set up in such a  
as to show the exact financial  
tions. Our rate of return on the  
related value of the property for  
past year was 9.36% as compared  
8.75% for last year.  
r accounts are now kept according  
the California Railroad Commis-  
classification.

### Competition.

the information of all citizens I  
it the following table which gives  
number of meters set and removed  
g the year:

Month	Set	Removed	Net Gain
January	182	31	20
February	148	51	11
March	170	39	9
April	206	73	6
May	151	67	10
June	152	69	15
July	145	62	11
August	147	55	10
September	148	79	14
October	156	62	12
November	165	67	8
December	150	72	13
1920	730	139	1051

city's competitor is just as aggress-  
in attempting to take customers  
years gone by. Inasmuch as this  
people's plant, belonging to all  
people of Pasadena, it seems ab-  
that any loyal Pasadenaan should  
nize other than his own plant for  
real energy. It is the duty of  
loyal Pasadenaan to sustain and  
ote the interests of his own  
hold, and our electric plant is  
of the departments of our Pas-  
household. By patronizing it and  
adding others to do so we help to  
et this institution efficiently. If  
trionized their own plant we could  
further concessions in rates if  
people wished to do so.  
people should resent the insinua-  
ns that are constantly reported  
r citizens as being made from  
to time by our competitor, for the  
se of discrediting the work of  
ty and the city's ability to build  
perate an enterprise of this char-

of all are lamps to gas filled Mazda  
lamps of 600 candle power. Street  
lights are being installed in the re-  
cently annexed territory, and it is our  
plan to make Pasadena an efficiently  
lighted city. The high candle power  
lights referred to here are being in-  
stalled without extra charge. This  
will tend to greatly increase the candle  
power of our street lights.

The average rate received per  
K. W. H. for street lighting  
the past year was.....01279  
as compared with .....04932  
received per K. W. H. for residence  
and commercial lighting.

Great credit is due to the loyal and  
patriotic patrons who have stood by  
the plant in all these years, and have  
helped to make this utility the suc-  
cess it is, and with increased patron-  
age we can, not only keep it a success  
but make it a greater success and ben-  
efit to all of our people. Every Pas-  
adenan ought to be just as diligent in  
the service of his city in patronizing  
his or her plant when its assailants  
and circumstances are carefully con-  
sidered, as he should be in every other  
worthy cause.

Respectfully submitted,

C. W. KOINER,  
General Manager Municipal Lighting  
Works Department.

## COUNCIL ADOPTS HARBOR BILL ON NAVAL BASE.

The campaign for the establishment of a naval base at the Los Angeles harbor was advanced when the Council adopted the report of the harbor committee urging that the harbor commission be instructed to select a site which will be offered to the government for the naval base.

Both the west basin of the harbor at Wilmington and the 147 tract inside the breakwater at outer harbor are being discussed as possible sites for the naval base.

## ORDINANCE FOR PORT PAYIN ADOPTED.

The final ordinance for the port of a road to the Government fortifications at Fort MacArthur, Point Fermin was adopted by the City Council of Los Angeles.

This road was urgently requested by the United States authorities to facilitate the construction of the fortifications, and the hauling of the big guns for the defense of the harbor to port.

The Municipal Bond Market is looking up, and the Bond Buyers are the "Building and Engineering News" up. A proposal for bonds in our columns will competition.

# PUBLIC WORKS IN JAPAN.

By Bureau of Public Works Ministry of Home Affairs, Tokyo.

Continued from October 20.)  
to the mouth improvement, the  
on the west side of the  
hed of the Shiano will be  
ed with stones and concrete  
s to the height of 12 feet above  
vel and extending to a length of  
feet with an upper breadth of  
et; and the channel is to be  
ed to a depth of from 25 feet to  
et. The work was commenced in  
ear 1911 with the expectation of  
eiling it by 1919.

## The Takahashi.

of the main rivers in the west-  
art of the main island. The work  
elly the enlargement of the chan-  
or 15 miles above the mouth, by  
the supposed highest water  
ring 250,000 cubic feet may be  
arged; the shutting up of the  
course of the eastern distribu-  
one of the two lines into which  
ver splits on its middle course, so  
the total body of water may be  
d by the other channel, which is  
ingly enlarged to 800 feet of  
th in its upper part and 4,200  
t its mouth; and lastly the con-  
olon of a long jetty of 10,250 feet  
a right bank of the mouth. The  
was commenced in 1907 and is  
completed by the year 1920.

## The Yoshino.

of the greatest rivers in Shikoku  
Beside the main river which is  
improved for 33 miles upward  
the mouth, the Bekku, a distrib-  
will be greatly improved so that  
y discharge 400,000 cubic feet out  
the total high water measuring  
0 cubic feet, the remaining 100,  
cubic feet being left to flow  
th the main channel. The breadth  
e 2,400 feet at its junction, be-  
adually enlarged as it goes down  
at its mouth it will have a width  
00 feet, and embankments will  
nstructed on both banks. Above  
ntion, the present embankments  
be extended and improved. On  
uji Island, which lies between  
oshino and the Zennyuji, a di-  
ary, and embankment and other  
ies will be removed that it may  
as a large reservoir. The work  
commenced in 1907 and is to be  
eted in 1921.

## The Yodo.

greatest river in the neighbor-  
of the cities Kyoto and Osaka,  
a drainage basin of 3,275 square  
Early, from 1864 to 1878, low  
operations were executed for the  
of the main channel that extends  
bridge Kanetsu near Fushimi,  
wards to the town of Moriguchi.  
Kawachi, below which the work  
hecked owing to the improvement  
e of Osaka harbor. Later, in the  
from 1896 to 1910, the high  
works were carried out for the  
lne of the Yodo from its source  
Biwa near Kyoto to its mouth

at Osaka. For the third time, the work  
was commenced in the year 1907, when  
the improvement scheme of Osaka har-  
bor was decided on and commenced,  
on the channel below Moriguchi where  
low water works had not been touched  
until then.

For the high water works, the vol-  
ume of water was estimated at 200,000  
cubic feet at its highest, and the work  
consists chiefly of—the improvement  
of the whole channel from Lake Biwa  
down to its mouth; the construction of  
a cut-off, measuring from 1,500 to 2,700  
feet in width near Kema, a suburb of  
Osaka, by which the whole volume of  
flood is discharged, so that the main  
channel need not convey any more  
than the low water—for this purpose  
a lock, and a weir were made at the  
junction; construction of a lock at a  
place some two miles below Lake Biwa,  
by the operation of which the water of  
the lake is balanced; in winter the water  
is kept in by shutting up the opening  
and in summer when floods are fre-  
quent the water line has previously  
been lowered by opening the sluice, so  
that inundation may be prevented he-  
low, and in time of extraordinary  
floods the lock is totally closed in order  
to free the adjoining districts from  
fear of being inundated. For the low  
water works of the channel below  
Moriguchi, the low water of the main  
course was estimated at 5,000 cubic  
feet of which 4,000 cubic feet are to be  
carried by the old channel below the  
town, which is dredged so as to pre-  
serve a depth of above 5 feet. The  
channel below bridge Aikawa in the  
city of Osaka is dredged to the depth  
of 18-20 feet under the lowest tide  
level, in order to enable middle sized  
boats to navigate it at any time.

## The Arakawa.

This is a large river, flowing along  
the outskirts of the Imperial capital  
Tokyo. The whole area to be improved  
covers 59 miles of the main channel  
from the neighborhood of Kumagae,  
Saitama prefecture, to its mouth, of  
which 16 miles upwards from the  
mouth is the first line to be improved.  
Of the whole high water of 200,000  
cubic feet, 30,000 only shall be ad-  
mitted into the natural channel, while  
the remaining water will flow through  
an artificial channel which it is intend-  
ed to cut at the bank near Kawaguchi,  
slightly below the railway bridge and  
which will enter the sea, passing on  
its way Senju, a north suburb of Tokyo  
and then round the capital. In the vil-  
lage of Hirai it crosses the river Naka,  
necessitating one more parallel chan-  
nel for the passage of the latter's  
water. The breadth of the new beds  
is 1,500 feet for the upper part of the  
Arakawa, being gradually extended  
till it reaches 1,920 feet at the mouth  
and 600 feet for the whole line of the  
new river channel of the Naka. At the  
junction where the new bed of the Ar-

akawa rises, a lock and a weir are to  
be constructed. The work was put in  
hand in 1911 and is to be completed by  
1916.

## The Kitakami.

This is one of the greatest rivers in  
the North Japan and is navigable for  
upwards of 150 miles. Before the  
northeast railway line was opened,  
most of the products of this region  
were transported by this river, but  
they had to overcome many difficulties  
caused by the rapids, rocks and shal-  
lows which occurred in the current. In  
order to improve this condition, the  
low water work was set about in 1870  
for 125 miles of the main river, and was  
completed in 1902. In 1911, a new  
scheme of high water work was com-  
menced and is expected to be completed  
in 1921. A brief explanation of this  
scheme is given below: The are pro-  
jected to be improved is about 33 miles  
of the main channel from the village  
of Nishigori, Tome district, to its  
mouth. Highest water 200,000 cubic  
feet. The whole channel within this  
area will be dredged, while the em-  
bankments on both banks will be ex-  
tended, and a five miles long cut-off  
shall be made between two towns Ya-  
naizu and Iino, in order to discharge  
the floods into the Oppa, a distributary,  
with which the artificial channel joins  
at its mouth. At this junction, the  
Oppa is shut up against the upper  
water, and below the point as far as  
the mouth the channel is to be greatly  
enlarged. A lock and a weir will be  
made at the junction from which this  
cut-off derives its source and a lock  
in the dam which shuts up the natural  
channel of the Oppa in the neighbor-  
hood of Iino. At Ishinomaki where  
the Kitakami meets the sea, a long  
jetty will be constructed on each side  
of the mouth, the length being 3,000  
feet on the right and 1,200 feet on the  
left, so as to keep the depth at 15 feet  
under the low tide level.

## Improvement Works by Local Authorities.

As the readers will acknowledge,  
great improvement works are executed  
or projected by the state, so far as the  
important rivers are concerned. But  
the complete accomplishment of the  
object in view will not be attained,  
unless their tributaries, distributaries  
and other minor streams are well at-  
tended to at the same time. In con-  
sideration of this, all prefectures with  
other local corporations, are doing  
their utmost in the maintenance and  
repairs of the river works, and even  
themselves undertake improvement  
works so far as their finances allow.

(To be continued.)

The Municipal Bond Market is looking  
up, and the Bond Buyers are look-  
ing the "Building and Engineering  
News" up. A proposal ad for your  
bonds in our columns will bring  
competition.

# ITEMS OF INTEREST.

Collected by GEORGE NELSON, C. E.

## Oil Town in Imperial Valley.

With the commercial possibilities of the oil fields west of Brawley yet undetermined, promoters will at once launch the first oil town in the valley. In one of the few level stretches in the hummocky desert forty miles from Brawley, John Rice, formerly City Engineer of Imperial, will start surveys for the townsite, which will be called Gateway. It will be in section 3, T. 12, R. 10, about two miles south of the Curley Hole, in which oil was discovered.

Attorney Harry Dyke, one of the promoters, said that several persons had already declared themselves desirous of securing locations for stores, lodging house, a restaurant and similar establishments. Water will be secured by drilling. Negotiations are underway for a wireless outfit, which will bring the proposed town into communication with the valley. John B. Curley, Sam and Will Dick, William Wessel and A. Hudson are backers of the project.

The surveys will be made off the third standard parallel in order to obviate any danger of lawsuits through erroneous surveys. Much litigation is certain from this source if any of the three drilling rigs now on the way tap a paying supply of oil and the claims are shown of sufficient value to fight for. Other contests will develop through double filings.

According to the books of the County Recorder's office, filings are plastered too deep on some half sections. As the available land has become scarcer and the oil fever intenser, sentries with rifles and shotguns have become thicker, there are threats a-plenty for any adventurous "Jumper."

Filings on 6,400 acres were reocred at El Centro. One of the groups was made up of Richard Woelffel, secretary of the Brawley Chamber of Commerce; Kuy Pearson, C. W. Dietrich, C. E. Harrington, a local oil driller, and Jerry Sullivan of San Diego. They are in section 22, T. 11, R. 10. A San Diego group, made up partly of Bepecher Sterne, F. M. Ridler and W. H. Jarvis, also filed. They are in the Yuba country. An Imperial group, made up partly of Roy McPherrin, R. K. McGuffin, S. L. Loffer, M. V. Dutcher and W. A. Mackie also filed. The area filed upon this month is 35,000 acres.

C. C. Toney of El Centro took a party of San Diego men to a gas hole in the bed of New River, near the south end of the Superstition Mountains. There he showed them a hole three feet in diameter, which periodically emits gasses which, when lighted, give off a flame that flares up three or four feet. Heavy filings have been made in the surrounding country.

Claus Spreckels and a party of San Diego men interested with him in the exploitation of the Brawley field have again visited their claims.

## NEW PLASTERING BASE.

A plastering base—the E-Cod Fabric—that is comparatively new on the coast is being introduced here by the Standard Fence Company of Oakland, and has already been successfully used on several fine residences in Piedmont and Oakland.

E-Cod Fabric is a combination of waterproof felt and galvanized steel wires, so devised as to secure the maximum efficiency of the two materials and produce a fabric of unequalled value as a plastering base, at reasonable cost.

A building covered with E-Cod Fabric coated with cement mortar is not simply a building covered with plaster. It is a building encased in a monolithic, reinforced concrete slab.

The slab is reinforced continuously by the wires of the fabric, made weather proof by the cement mortar, waterproof by the felt portion of the fabric, fireproof by the close bond between the felt and the mortar so that the felt will not ignite; rust-proof by the embedding of the galvanized wires within the mortar.

The steel reinforcement is composed of No. 14 gauge, hard-drawn, galvanized steel wires crossing the felt sheet diagonally in a diamond pattern, one set being woven through the felt, while the second set passes between the first set and the felt. The pressure of the trowel forces the mortar against the felt sheet (which is held to the frame by the wires and their attachments) and completely embeds the wires, making a reinforced plate or slab of mortar of whatever thickness it may be. No deterioration of the wires can take place when so embedded.

The wire used in E-Cod Fabric is of the strongest and most durable form for that purpose, and is woven so as to serve its purpose best, both in shipment, application and in place.

The tarred felt backing of the fabric accomplishes three things: (a) the initial bond with the mortar, which adheres readily, at any consistency, to the fibrous surface, and after setting cannot be separated from the felt; (b) prevents the enormous waste of plaster which falls through an open lathing; (c) furnishes an additional layer of protection against the weather (on partitions reduces passage of sound waves) or takes the place of the inferior building paper usually employed.

The E-Cod Fabric has been used for about ten years in the east and has always given satisfaction and is very adaptable to all classes of buildings.

A petition for the recall of C. W. Brockman, Calexico director of the Imperial Irrigation District, has been filed. It contains 100 names. A petition against Director Hamilton has been on file several days.

## GRAND PRIZE FOR AHMCO IRON.

A recent development in open hearth furnace practice, resulting in the manufacture of a special product known commercially as AHMCO IRON, has the following special characteristics:

Chemical Purity, Rust-Resistant Property, Welding Quality, Enamel Property, Electrical Conductivity, Panama-Pacific International Exposition, San Francisco, 1915.

## Big September Business.

To celebrate a record breaking September business about thirty members of the Detroit Steel Products Company, Detroit, Mich., were the guests of General Manager J. G. Rumney at a banquet given Tuesday, October 19th, one of the private dining rooms of the Detroit Athletic Club.

The September output of the company including both Fenestra Steel Windows and Detroit Steel Lubricating Springs also made by company, was the biggest in the history of the company. And from present indications the remaining months of 1915 are going to be no exception to the rule. The September record was a combination of a series of record breaking months throughout the year.

At the banquet, speeches were made by Mr. Walter S. Russel, President of the Russel Wheel & Foundry Company of Detroit, and by Mr. R. S. Drummond, Vice-President of the Detroit Steel Products Company.

During the evening, stereopticon views, reproduced from photographs taken by Mr. Rumney on a recent business and pleasure trip throughout the West, were thrown on the screen.

## Magnesite in Demand.

Magnesite interests the world of late have turned covetous eyes on California.

Since the war exportation of magnesite from Austria, its greatest producer, has not been possible, months after the European conflict began Greece supplied the mines. Now that source has failed.

Outside of Florida, where there is very small deposit, California is only known place on the globe where there are magnesite fields.

As a result this State has become the Mecca of representatives of magnesite interests. A score of agents and engineers, prominent among whom is A. F. Williamson of the Foreign Mines Limited of London, representing the Rothschilds, has invaded California. They are offering almost any price for magnesite deposits.

# Humboldt County Grand Jury Report.

## Staff Article

The Grand Jury for 1915 of Humboldt County, Cal., has filed its report, and as it is full of pertinent suggestions and commentary on matters of interest to engineers and contractors a reprint here said portions of the report:

### Bridges and Roads.

A committee appointed on roads and bridges made recommendation that we have adopted in full as follows:

1. "That a temporary free pontoon bridge be constructed early next spring across Eel River above Scotia to connect the state highway at that point, pending the completion of the permanent bridge.
2. "That a new bridge be constructed across the North Fork of the Mattole River on the Petrolia-Ferndale road.
3. "That the bridge over the Eureka-Klamathville road, via Kneeland, known as the "Long Bridge" be reconstructed, the same being reported to be in dangerous condition, and said to have been condemned for some time.
4. "That roads to the ocean beaches at Centerville, Loleta and Mad River, be placed in good condition.
5. "That brush be cut away from the sides of the main highways, and dangerous turns eliminated throughout the county. We also desire to call attention to numerous dangerous railroad crossings that should receive attention.
6. "That the road known as the Mattole River road, constructed last year, be not placed in condition for travel after last winter's storms, be opened as soon as possible, and the Kendall Gulch bridge on said road strengthened.
7. "That the county bridge at Dyerville be placed in condition to stand the storms of the approaching winter.
8. "That the Bull Creek road be extended, so as to give the people of the Mattole Valley an outlet to the railroad at South Fork.
9. "That as we recognize the benefit of constant work on the roads during the winter season, in order to keep the roads properly drained and free from potholes, we recommend that this be demonstrated on the Arcata-Eureka road during the coming winter season by the constant employment of at least 10 men who should take care of certain sections of the road allotted to them.
10. "That the Supervisors be asked to consider the matter of limiting the storing of stock on public highways.
11. "That the road over Humboldtville be reopened for travel."

### A Bad Ditch.

Our attention has been called to a sewer maintained in an open ditch along the public highway leading west from the town of Loleta, to the crossing of the Duncan Ferry road, thence north to a small creek near the Sunset Creamery, a distance of about three-fourths of a mile, the fumes from which are obnoxious to the traveling

public, and we fear a menace to the public health. We have called the attention of the county health officer to the matter, and after he had interviewed the parties responsible for the same, received the assurance that it would be taken care of by them, working in conjunction with the proper county officials.

### Rights-of-Way Matters.

We have investigated the securing of rights-of-way for the state highway and find that in many instances the highway has been built through private property before the rights-of-way had been secured. Such rights-of-way were promised by the Supervisors to the state and the responsibility for securing them rests with those officers who are legally the agents of the county.

Several disputes and complications have arisen from such haphazard and unjust methods of business; notably the disagreement between the Supervisors and The Pacific Lumber Company over a right-of-way through Dyerville, and the charges of Mr. E. L. Linsler of East Branch and of Mr. W. G. Press that their property rights have been taken away without due process of law.

We therefore recommend that in future no public roads be built or authorized by the Supervisors until rights-of-way for the same have been secured and settlement made for the same.

### Report on Destroyed Bridges.

We have also investigated the building of bridges and roads during the past fiscal year and have come to the following conclusions:

The bridge built at Scotia in 1914 at a cost of \$30,651 lacked suitable piers to withstand the floods common to Eel River at this place, and in our judgment the loss of this bridge was due to the blind faith of the Supervisors in the former County Surveyor who drew the plans and specifications for this structure.

The Ballou Ford bridge erected in 1914 at a cost of \$10,475 was contracted for too late in the summer so that the contractor did not complete his job until midwinter; the width of the bridge was 13 feet, making this bridge inadequate for the vast amount of travel between Ferndale and Ferndale; and the length of the one span was 114 feet, making a long fill across the remainder of the Salt River bridge necessary. The fill was far too narrow for safe travel while the fill itself acted as a dam for the flood waters of Salt River, causing a rise in the waters at the place which floated the bridge approach away and destroyed part of the fill and rendered the bridge useless.

The Supervisors should not have accepted the plans for this type of a bridge and if uncertain as to their rights as to rejecting the Surveyor's plans they should have consulted the District Attorney.

The specifications for the road from Rosecox to Hunters on the south side of Mattole River were very loosely drawn and made possible the building of a very dangerous bridge across the Kendall Gulch. The mudsills called for in the specifications for that bridge seemed to be absent and the poles used are not hewed as called for. The specifications should not have been accepted by the Supervisors. And the work contracted for should not have been accepted until the contractor had met every requirement called for.

We most earnestly recommend that all specifications for bridges or public works of importance be submitted by the Supervisors to some engineer of established reputation after being drawn by the County Surveyor and not finally accepted by the Supervisors until declared satisfactory by such engineer. This is in line with modern business methods and this recommendation is no reflection on our present County Surveyor.

We feel that greater care should be taken in the acceptance of work done under contract. The Supervisors and not the County Surveyor are the legal agents of Humboldt County, and as such are responsible for the county's interest in all contracts between the county and contractors.

We recommend, therefore, that the Supervisors each and all visit and personally inspect all roads, bridges, etc., built for the county under contract and satisfy themselves by every means within their power that all specifications have been complied with.

We further recommend that as far as possible the specifications for all county improvements be made to include all work to be done in connection with that particular improvement to the end that payments for extras be eliminated and the public be informed of the actual cost of an improvement when the contract is let.

The Detention Home we found in good condition, clean and well cared for. We believe a few additional pieces of furniture in some of the rooms would make the quarters more cheerful. The heating system was found defective and should be improved upon.

### New Hall of Records.

We recommend that the Supervisors take steps to secure a site for the building of a Hall of Records, as we believe the erection of such a building will soon be an absolute necessity.

We recommend that an alteration be made in the present manner of supplying fuel oil to the oil burner in the jail, by removing and doing away with the oil tank which is placed above ground, and connecting up the power and feed pump with the main underground oil tank, and thus avoiding the necessity of pumping the oil by hand, by which latter method more or less oil is unavoidably spilled on the walks.

## EDITORIALS.

The buying public is a hard and unjust master. It clamors for cheapness in the articles it uses, but when the manufacturer yields to the pressure and turns out an article of the cheapness desired, the buying public, after a brief rush to purchase the object at the attractive price, soon discovers the cheapness in quality which made the low price possible, and then their clamor is louder than ever and entirely refutes that entire class of article, forgetting that they were the prime movers in dragging the material down from its previous satisfactory standard. The case of the Terne Plate Roofing is an interesting example of this unsatisfactory cheapening of a good article in order to cater to public demand.

During the last generation the old iron base Terne Plate Roofing was rightfully looked upon as a standard of good roofing. On thousands of American homes and factories, the old Charcoal Iron Welsh Process Terne Plate Roofing is still giving perfect service after practically a half century of use. The tinner in those days enjoyed a flourishing business in roofing buildings with Terne Plate. Now, however, the great majority of tinner will state that installing Terne Plate Roofs, is a very small source of business. The reason is simple, that the manufacturer gave into the popular demand for a cheaper Terne Plate and the short life of this cheaper product soon reflected on the entire industry and "killed the goose that laid the golden egg."

Old fashioned Terne Plates were made of the purest iron base obtainable, coated by what was known as the "seven-pot process," in which the clean iron sheet was first submerged in pure Lagos Palm Oil for a short time, then slowly and carefully passed through the remaining six pots by expert workmen, coming out at the end as a soft iron plate carrying a uniform coating in which only the best of materials were used. By this process it required the eight men at the pots forty-five minutes to coat a case of plate, but the plates, when finished, were good for a life-time of useful work.

The Terne Plate brought forth to meet the buyer's clamor for a cheaper article is a far different product. The manufacturer with true ingenuity has evolved a machine which requires only one operator and a boy assistant and which in the short space of ten minutes can coat a case of Terne Plate, and what is more, turn them out looking very much like those plates which spent forty-five minutes in taking on their coating in the old Welsh Process. In the new process, in which tonnage is the object, the iron base is done away with, steel sheets being used instead. The Lagos Palm Oil Flux is abolished and the steel sheet is first plunged into an acid flux before being rapidly passed through the Terne mixture, by machinery. A quick dip in Lagos Palm Oil at the end of the pro-

cess gives same the oily finish characteristic of the plates made by the old process.

The buying public is gradually awakening to the fact that true cheapness lies, not in low first-cost, but in first-cost in relation to the length of satisfactory service. In line with this policy and, feeling that the qualities which made the old Terne Plate so satisfactory would still be appreciated, if the buyer was sure he could obtain same, The American Rolling Mill Company installed an old fashioned seven-pot process equipment and secured enough of the Terne Plate makers to operate same. They are now manufacturing Armo Iron Terne Plate using exactly the procedure which was used so successfully in the manufacture of the old fashioned plates and the base plate they use being of Armo Iron is purer and more uniform than the Charcoal Iron of the old plates. When the public realizes that they can again purchase a Terne Plates which is superior to the plates of the last generation, the once flourishing business of Terne Plate Roofing will again be revived.

It is interesting to note the manner in which development in one branch of endeavor will benefit another industry with no direct connection. American Ingot Iron, which is now generally known as Armo Iron, was originally developed at the request of certain manufacturers who possessed patent-rights to the corrugated culvert. This type of culvert is a decided innovation and possesses great advantages in the way of lightness and strength. No satisfactory metal, however, was available for the manufacture of these culverts, as it was demonstrated that steel sheets corroded too fast. At the instigation of these manufacturers, The American Rolling Mill Company, then a small steel mill in southwestern Ohio, worked for four years in an effort to manufacture a more durable metal with an iron base. After years of expensive and nerve racking experimentation and research, the company's metallurgist, Mr. Carnahan and his colleagues, accomplished a striking metallurgical advance, which results in the manufacture of a very pure iron suitable for rolling into sheets and plates in large quantities.

Culvert manufacturers immediately took up this iron and applied same to the strenuous and widely varied conditions which their culverts meet in service, and the severe tests which these Armo Iron Culverts satisfactorily withstood, were of great assistance in bringing promptly and strikingly to the public eye, the value of this new iron as a material to be used where corrosion is an element. Naturally the roofing field at once suggested itself and in the last six years thousands of buildings have been covered with Armo Iron Roofing, particularly where the corrosive conditions

were very severe, as in thickly populated manufacturing districts close to the sea, and in certain industries where acid fumes, etc., are evolved. On the west coast many interesting applications have been made in this Armo Iron Roofing, such as the docks at Los Angeles, Seattle and San Diego, and the sheet metal work on such buildings as the Oakland Auditorium, San Francisco City Library and the San Francisco City Hall.

The process of mutual benefit still continues and the success of Armo Iron in the roofing and culvert fields has led it to be adopted in a consistent list of other products, such as boiler tubes, metal lath, wire fencing, Terne Plate, and, in fact, in all applications where resistance to corrosion is the prime factor.

"Great," said Thomas A. Edison as he and Henry Ford viewed the exhibit of the Diesel Engine in the center of the Palace of Machinery. Both Mr. Ford and Mr. Edison examined this engine with the utmost interest, expressing their admiration for the excellent workmanship and operation of this latest and most marvelous prime mover. Mr. Edison was especially interested in the engine and its adaptation to submarines, and stated that the engine and the space allowed for it in the boat must be given more consideration in the construction of submarines to have them an absolutely reliable means of defense.

Mr. Ford spoke of the power plant in his factory at Detroit being a combination of a producer gas engine and a steam engine, the exhaust gases from the gas engine being used to jacket the steam engine cylinder and the exhaust from the steam engine being used to assist in scavenging the gas engine cylinder. Due to Mr. Ford's intimate knowledge of the gasoline engine he could hardly believe it possible that an engine of such size as the 500 H. P. Busch-Sulzer Bros. Diesel Engine operating in the Palace of Machinery used no spark whatever for the burning of the oil and that the fuel used in the engine was of such a cheap character.

### PORTO RICO OUR GOOD ROADS RIVAL

Few California motorists are aware that the nearest approach to California's boulevard system in American territory is found, not in one of the rich eastern States, but in one of the smallest islands over which Uncle Sam holds domain. Porto Rico, with its acres of rich tobacco plantations, boasts a highway system, which, while not extensive, is second to none in quality.

The Municipal Bond Market is looking up, and the Bond Buyers are looking the "Building and Engineering News" up. A proposal ad for your bonds in our columns will bring competition.

# News From the California State Commission.

## STATE CORPORATION DEPARTMENT

A revival in the California mining industry of considerable magnitude is indicated in the business of the State Corporation Department. New companies are being formed to take over and develop old and new properties and a considerable number of older companies are renewing activity.

Butte Gold Mining Company, Los Angeles, which has issued 100,000 shares of its capital stock in exchange for mining property and equipment in Butte County, makes application for permission to sell 100,000 shares at 15 cents per share for the purpose of raising funds with which to install a mill, reduction plant and compressor.

San Pedro Mining and Milling Company makes application to issue \$250,000 par value of its shares to Peter Bagoye, Blass Pusich, Baldo Pupich and Luca Radonich in exchange for mining property in Orange County and to sell 5,000 shares at \$5 per share to develop the mines and install a stamp mill.

The Shell Oil Company of California has been authorized by Commissioner of Corporations H. L. Carnahan to sell an additional \$5,000,000 par value of its preferred shares to net the company not less than 90. As in the case of the recent authorization for a like amount of preferred the shares will be taken up by Holland capitalists and the proceeds will be used in the development of the Shell oil interests in this state.

Broadway Theatre Co. is permitted to sue \$75,000 par value of its shares to J. H. Collier and Andrew M. Strong, or to Superba Theatre Co. in exchange for a lease-hold interest to premises at 527 South Broadway, Los Angeles, on condition that the shares shall be deposited and held as an escrow, to be withheld from sale except by permission of the Commissioner.

Beardslee Electric Co., Los Angeles, is permitted to sell 476 shares of its capital stock at par, to net the company the full amount of the selling price.

Madera Farmobile Company is permitted to issue 60 shares to J. B. High, V. H. Gibbs, J. G. Roberts, C. J. Eastman and F. N. Wright at par for cash in accordance with their subscriptions and to sell an additional 60 shares at par, the funds to be used in developing leased farm lands.

Neptune Sea Food Company is permitted to sell 30,000 shares of preferred to F. W. Johnson at par to raise funds for engaging in the fish canning business on San Diego Bay and to issue 1/2 shares of common stock for each share of preferred sold in consideration of the assignment to the corporation of a lease to harbor front property. It is required that the common shares be deposited as an escrow and withheld from sale or transfer until the company pays dividends of at least 10 per cent on them.

American Portland Stone and Cement Company of Oakland is permitted to issue 48,333 1/2 shares of its capital stock in exchange for the plant and equipment of the Interlocking Stone Company located on the Oakland estuary and to sell 15,000 shares at par, to net the full amount of the selling price. All shares issued to Interlocking Stone Company and 25,000 shares previously issued to John C. Henderson will be held as an escrow pending the financing of the company which is engaged in the manufacture of building blocks.

## INCORPORATIONS.

Ellis Street Improvement Co., principal place of business San Francisco. Capital \$1,000,000. Incorporators: A. E. Kern, Allen Meyer, B. G. McDougal.

California Profit Sharing Oil Company. Principal place of business Los Angeles. Capital, \$50,000. Incorporators: Thos. Dugar, A. Fraffton, Natalie Girard, G. E. Scott and B. F. Woodman.

Ruby M. & M. Co. Principal place of business Los Angeles. Capital \$250,000. Incorporators: Glenn Brinkthoff, N. L. and Mary J. Breckenridge.

Table Rock Mining Co. Principal place of business Reno, Nevada. Capital \$500,000. Incorporators: J. H. and E. B. Hartley and A. R. Hathaway, all of Berkeley, Cal.

Texas Canyon Mining Co. Principal place of business Los Angeles. Capital \$250,000. Incorporators: Henry Denomie, Antoine Denomie, Geo. McKenzie, J. F. Mitchell and Everell C. Moore.

Fidelity Security Corporation. Principal place of business Los Angeles. Capital \$100,000. Incorporators: Fred De Augustine, Fred L. Boruff, Geo. A. Eastman, N. L. Marvin and E. J. Votaw.

Imperial Valley Oil and Cotton Co. Principal place of business Riverside. Capital \$150,000. Incorporators: John R. Loftus, E. R. Willis, L. F. Farnsworth, E. E. Bennet, A. F. Andrade, Geo. A. Carter, Ira Aten, L. L. Bond and L. E. Straet.

Star Realty and Improvement Co. Principal place of business Los Angeles. Capital \$10,000. Incorporators: Frank Stewart, Samuel D. Well and Wm. A. Brand.

Hill Mfg. Co. Principal place of business Los Angeles. Capital \$1,000. Incorporators: Luther Holl, Clark Hill, J. C. Hill, C. U. Bangs and A. K. Wagner.

Higgins Mining and Realty Co. Principal place of business Los Angeles. Capital \$20,000. Incorporators: Thomas Higgins, P. J. Higgins, James O. Sword, D. P. Kearney, Teresa Sword and Margaret Kearney.

Hamiltons, Inc. Principal place of business Los Angeles. Capital \$20,000. Incorporators: A. J. Hamilton, Agnes Hamilton, E. L. Hamilton, R. M. Adams and W. H. H. Adams.

Big Springs Olive Ranch. Principal place of business Long Beach. Capital \$10,000. Incorporators: John Hodges, S. B. Barker, S. F. Barker.

Mutual Water Association. Principal place of business Los Angeles. No capital. Incorporators: F. J. Whiffen, W. W. Humphreys and Hartley Shaw.

## RAILWAY COMMISSION.

The Los Angeles and San Diego Beach Railway Company has filed with the Railroad Commission an application for authority to sell bonds of the par value of \$370,000 before November, 1915. The company was given authority some time ago to issue bonds of the value of \$375,000, and says that it has not sold but \$5,000 of them.

Carl G. Bell and John L. Butler of Colfax, Placer County, have filed with the Railroad Commission an application for permission to sell the Colfax Exchange to Mrs. S. K. Morrison of Reno, Nev. The exchange is value at \$3,500, and Mrs. Morrison offers this amount in cash to the owners.

The Railroad Commission has issued an order authorizing the sale of the property of the Annex City Water Company to the city of Los Angeles for \$15,875. The company furnishes water to 9,000 consumers in the territory bounded by Slauson avenue, Hoover street, 30th street, Florence avenue, Figueroa street and South Park avenue.

The Modesto Gas, Light, Coal and Coke Company of Modesto, Stanislaus County, has applied to the Railroad Commission for authority to sell at not less than 90 per cent par, an issue of \$200,000 30-year 6 per cent bonds, said issue to be secured by a trust deed held by the Union Trust Co. of San Francisco. The company wishes to sell \$65,000 of this issue at once.

The Railroad Commission has extended the time to November 15, 1916, within which the Los Angeles and San Diego Beach Railway Co. may issue bonds authorized by the Commission November 25, 1914. The company operates a railway in San Diego city.

## San Bernardino Highway Bonds.

The highest figure said to have ever been offered for 5 per cent bonds in this country was given as a premium by the Anglo and London-Paris National Bank of San Francisco in purchasing the last block of \$625,000 in county highway bonds out of the total bond issue of \$1,750,000 of San Bernardino County. The premium is not announced but it is reported to be in excess of the \$20,312 paid for the former block of bonds by the same company, and indicates that the big war loan in the East has had no visible effect on financial conditions on the Pacific Coast.

The Municipal Bond Market is looking up, and the Bond Buyers are looking the "Building and Engineering News" up. A proposal ad for your bonds in our columns will bring competition.

# Technical Societies.

## SAN FRANCISCO ASSOCIATION OF MEMBERS OF THE AMERICAN SOCIETY OF CIVIL ENGINEERS.

### Officers for 1915.

President—A. M. Hunt.  
Vice-Presidents—H. L. Haehl, M. C. Couchot.

Secretary—E. T. Thurston, Jr.  
Treasurer—P. E. Harroun.  
Board of Directors—M. C. Couchot, H. L. Haehl, A. M. Hunt, P. E. Harroun, E. T. Thurston, Jr., C. H. Snyder, C. B. Wing.

Weekly luncheons in College Room, Hoffbrau Cafe, Wednesdays at 12:30. Engineers welcome; informal; no program.

Regular meetings are held bi-monthly at such time and place as may be appointed by the board of directors. The established custom is to meet on the third Fridays of February, April, June, August, October and December.

Address E. T. Thurston, Secretary, #13 Mechanics' Institute Bldg., Post street, San Francisco.

## SAN FRANCISCO CHAPTER AMERICAN INSTITUTE OF ARCHITECTS.

### 233 Post Street.

President—W. B. Faville.  
Vice-President—Edgar A. Matthews.  
Sec.-Treas.—Sylvain Schnaittacher.  
Trustees—James W. Reid and Henry Schulze.  
Monthly meeting the third Thursday.

## STATE BOARD OF ARCHITECTS.

### Northern District.

John Bakewell, President.  
Sylvain Schnaittacher, Sec.-Treas.  
Joseph C. Newsom, Edgar Matthews.  
One vacancy.

## LOS ANGELES AND SOUTHERN CALIFORNIA.

## AMER. SOC. OF CIVIL ENGINEERS. So. Calif. Association of Members.

President.....Chas. T. Leeds  
First Vice-President.....Geo. S. Binkley  
Second Vice-President.....H. Hawgood  
Treasurer.....Chas. H. Lee  
Meetings bi-monthly. Address all communications to W. K. Barnard, Secretary, 701 Central Bldg., Los Angeles.

## AMERICAN INSTITUTE ELEC. ENGINEERS—Los Angeles Section.

Chairman.....E. R. Northmore  
Secretary.....C. G. Pyle  
Asst. Secretary.....Edward Woodbury  
EXECUTIVE COMMITTEE — J. A. Lighthouse, J. E. Barker, Geo. A. Damon, A. W. Nye.

Regular meetings third Tuesday in each month. Address all communications to C. G. Pyle, Secretary, Standard Underground Cable Co., 914 Hibernian Bldg., Los Angeles.

## ENGINEERS AND ARCHITECTS' ASSOCIATION OF SOUTHERN CALIFORNIA.

President.....Samuel Storrow  
Vice-President.....A. H. Koebig  
Second Vice-President.....W. A. E. Noble  
Sec.-Treas.....H. Z. Osborne, Jr.  
DIRECTORS—Arthur S. Bent, J. J. Backus, A. C. Martin, Kenneth Shibley.  
Regular monthly meetings as arranged by program committee. Address all communications to H. Z. Osborne, Jr., Secretary, care City Engineer's Office, Los Angeles.

## AMERICAN INSTITUTE OF ARCHITECTS—SOUTHERN CALIFORNIA CHAPTER.

President.....Albert C. Martin  
Vice-President.....S. Tilden Norton  
Secretary.....Fernand Parmentier  
Treasurer.....August Wackerbarth  
DIRECTORS—J. C. Allison, J. J. Blick, J. J. Backus.

Regular meetings second Tuesday evening each month. Address all communications to A. R. Walker, Acting Secretary, 1403 Hibernian Building.

## AMER. SOC. OF MECHANICAL ENGINEERS—Los Angeles Section.

Chairman.....Walter H. Adams  
Secretary.....Ford W. Harris  
EXECUTIVE COMMITTEE—W. H. Adams, Ford W. Harris, O. J. Root, W. W. Smith, Paul Weeks.

Address all communications to Ford W. Harris, 1029 Higgins Bldg., Los Angeles.

## PACIFIC COAST SOCIETY OF ENGINEERING CONTRACTORS.

President.....Geo. F. Pennebaker  
Vice-President.....W. A. Russell  
Secretary-Treasurer.....F. C. Ayars  
DIRECTORS—Geo. F. Pennebaker, W. A. Russell, W. W. Brier, Geo. A. Rogers, L. S. Atkinson, Wm. Ledbetter, L. G. Garnsey, F. A. Hudson, F. H. Stout, C. L. Hyde, F. C. Ayars.

Address all communications to Frank C. Ayars, Secretary, 505-6 Douglas Bldg., Los Angeles.

## STATE BOARD OF ARCHITECTURE, SOUTHERN DISTRICT.

President.....J. P. Kreppl, L. A. Secretary.....F. L. Roehrig, L. A. Member.....Octavius Morgan, L. A. Member.....S. P. Hunt, L. A. Member.....W. S. Hebbard, San Diego.  
Address all communications to Fred K. L. Roehrig, Secretary, 721 American Bank Bldg., Los Angeles.

## BUILDERS EXCHANGE OF LOS ANGELES.

President.....John H. Bean  
First Vice-President.....P. J. Bolin  
Second Vice-President.....S. L. Weaver  
Third Vice-President.....M. A. Berne  
Treasurer.....John Griffin  
Secretary.....J. T. Campbell  
DIRECTORS—A. J. Crawford, Wm. McArthur, J. J. O'Connor, W. R. Simons, C. V. Fowler, J. Burnstein, J. H. Judy, W. E. Stradley, L. B. Webster, E. Waymon.

## BUILDERS ASSOCIATION OF SAN DIEGO—Second Floor K. or P. Bldg., Corner Third and E Streets, San Diego.

President.....Wm. R. Weckerly  
Vice-President.....Chas. Kelly  
Treasurer.....Max Winter  
Secretary.....D. J. Miller  
DIRECTORS — Wm. R. Weckerly, Chas. Kelly, Max Winter, D. J. Miller, Robt. Houghton, H. V. Wenger, R. M. Gilson.

Address all communication to D. J. Miller, Secretary, Builders' Association, Second Floor, K. of P. Bldg. San Diego.

## SAN DIEGO ARCHITECTURAL ASSOCIATION.

President.....J. B. Lyman  
Vice-President.....Charles Cressy  
Secretary.....Robt. Halley, Jr.  
Treasurer.....G. A. Hanssen  
Monthly luncheon at Rudder's first Monday each month. Address all communications to Robt. Halley, Jr., 314 Union Bldg., San Diego.

## PERSONAL.

The American Rolling Mill Co., of Middletown, Ohio, have recently, owing to the rapid increase in the demand for ARMCO IRON products on the West Coast, established a district office in the Monadnock Building in San Francisco and is now carrying a complete stock in that city.

This office is in charge of Mr. H. O. Stevens and Mr. E. A. Emerson.

Mr. Stevens was formerly connected with the Pacific Hardware and Steel Co. in San Francisco and also for several years in charge of the Iron Department in the Los Angeles branch of that company; while Mr. Emerson was in charge of the American Rolling Mill Co.'s Rio Janeiro office.

## JEFFERSON STREET STORM DRAIN SHELFED FOR A YEAR.

The Jefferson street storm drain project was filed for one year by the City Council of Los Angeles.

The project calling for an expenditure of \$1,100,000 was urged for immediate action by the public works committee, but the Council refused to advance it, when President Betkouski, Councilmen Roberts and Wright all made vigorous objection on the grounds of the excessive cost.

### APARTMENT HOUSES.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$20,000. Architect, P. Righetti, Phelan Bldg., S. F. Owner, F. Tomasini. Location, southeast Judah and 8th avenue. Will contain fourteen suites and one store. Interior finished in pine, elm panels and some hardwood floors. Central heating system and hot water supply. Wall beds. Bath rooms finished in tile. Exterior covered with cement plaster. Plans complete and contract to be awarded within a few days.

**SAN FRANCISCO**—Apartment house alteration, frame, \$5,000. Architect, Theo W. Lenzen, Humboldt Bank Bldg., S. F. Owner, A. Burkhart. Location, 38-40 Belvedere street. Work will consist of altering two large flats into six apartments and the addition of one story. Interior finish pine. Wall beds. Exterior covered with rustic and cement plaster. Plans being prepared.

**SAN FRANCISCO**—Apartment house and stores, 4 story and base. Class C construction, \$65,000 to \$70,000. Architects, Fabre & Bearwald, Merchants' National Bank Bldg., S. F. Owner's name withheld. Location, Mission District. Will cover a large ground area and will contain several stores and 40 suites of two and three rooms. Interior finish pine with some elm panels. Steam heat, oil burning system, hot water system and patent store fronts. Wall beds. Bath rooms finished in tile. Exterior faced with cement plaster and pressed brick. Plans being prepared and work to be done by Day Labor.

**SAN FRANCISCO**—Apartment house, 4 story and base. Class C construction, \$40,000. Architect, E. H. Denke, 1317 Hyde street, S. F. Owners, Max and Dora Kolander. Location, south Bush west of Jones, covering an area of 54 feet 10 inches by 100 feet. Will contain sixteen suites of four rooms and bath. Interior finish pine, mahogany and white enamel. Hardwood floors. Steam heat, oil burning furnace, hot water system and automatic elevator. Bath rooms tile. Exterior faced with pressed brick trimmed with terra cotta. Plans revised and new figures being taken.

**SAN FRANCISCO**—Apartment house, 6 story and base. Class C, reinforced concrete, \$90,000. Architect, J. C. Hladik, Monadnock Bldg., S. F. Owner, Goede Frøste. Location, northeast corner Van Ness and McAllister street. Will contain 200 rooms and a number of stores. Interior finish pine and hardwood with hardwood and tile floors. Steam heat, oil burning system, hot water supply and automatic elevator. Patent store fronts. Bath rooms tile. Exterior faced with cement plaster. Plans complete and work being done by Day Labor.

**SAN FRANCISCO**—Apartment house, 4 story and base, reinforced concrete, \$25,000. Architect, Albert Schroepfer,

Foxcroft Bldg., S. F. Owner, L. D. Stoff. Location, south Sutter east of Hyde, covering an area of 25 by 96 feet. Will contain eight large suites. Interior finish pine and hardwood with hardwood and tile floors. Steam heat, elevator service, hot water system and oil burning equipment. Wall beds. Exterior faced with cement plaster. Plans complete and segregated figures being taken.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame. Cost not stated. Architect, E. H. Denke, 1317 Hyde street, S. F. Owner's name withheld. Location, Lake near 25th avenue. Will contain six modern suites of three and four rooms. Interior finish pine and hardwood panels. Hardwood floors. Steam heat and hot water system. Bath rooms tile. Wall beds. Exterior covered with cement plaster on metal lath. Plans complete and figures being taken.

**SACRAMENTO, CAL.**—Apartment house, 3 story and base, brick and frame, \$10,000. Architect, none. Owner, Frank Mead, Sutterville road and Mead avenue, Sacramento. Location, 624 M street. Will contain 12 suites of two and three rooms. Interior finish pine. Wall beds. Hot water system. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**SEATTLE, WASH.**—Apartment house, 5 story and base, brick and steel, \$75,000. Architects, Blackwell & Baker, Northern Bank Bldg., Seattle. Owners, Gardner & Lessey. Location, 4th near Virginia street, covering an area of 60 by 108 feet. Will contain a total of 126 suites of two and three rooms. Interior finish pine and hardwood. Wall beds and tile baths. Steam heat, elevator service, hot water system and oil burning equipment. Exterior faced with pressed brick and terra cotta. Plans complete and figures to be called for at once.

**SAN FRANCISCO**—Apartment house, 7 story and base, brick and steel. Cost not stated. Architects, Rousseau & Rousseau, 119 Sutter street, S. F. Owners, Girard Investment Co. Location, southeast corner of Geary and Leavenworth streets. Will contain a large number of two and three room suites with wall beds and private baths. Interior finish pine, hardwood and white enamel. Hardwood floors. Steam heat, elevator service, hot water system and vacuum cleaning. Bath rooms tile. Marble and tile vestibule. Exterior faced with pressed brick trimmed with terra cotta. Plans complete and figures being taken.

**SAN FRANCISCO**—Apartment house and stores, 6 story and base, brick and steel, \$85,000. Architects, Rousseau & Rousseau, 119 Sutter street, S. F. Owner's name withheld. Location, close in to the store and retail districts. Will contain three stores besides lobby on first floor and six suites of two and three rooms on upper floors. Interior

finish pine and hardwood. Bath rooms tile. Wall beds. Steam heat, hot water system and automatic elevator. Exterior faced with pressed brick trimmed with terra cotta. Preliminary plans prepared.

**OAKLAND, CAL.**—Apartment house, 3 story and base, frame, \$11,000. Architects, Rousseau & Rousseau, 110 Sutter street, S. F. Owners, Clyde Investment Co. Location, southeast corner of 3rd avenue and East 15th street. Will contain 42 rooms arranged in two and three room suites with private baths and wall beds. Interior finish pine and white enamel. Some hardwood floors. Central heating system and hot water supply. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**OAKLAND, CAL.**—Apartment house, 2 story and base, frame, \$10,000. Architect, Alvin J. Stern, 306 14th street, Oakland. Owners, Coit Investment Co. Location, Grand avenue near Perkins. Will contain six suites of three rooms and bath. Wall beds. Interior finish pine with some hardwood floors. Exterior covered with cement plaster. Plans being prepared, work to be done by Day Labor.

**OAKLAND, CAL.**—Apartment house, 3 story and base, frame. Cost not stated. Architects, Rousseau & Rousseau, 110 Sutter street, S. F. Owner's name withheld. Location, Miles and College avenue. Will contain two, three and four room apartments with baths and sleeping porches. Interior finish pine and hardwood with some hardwood floors. Bath rooms finished in tile. Central heating system and hot water system. Exterior covered with cement plaster. Plans complete and figures to be taken next week.

**OAKLAND, CAL.**—Apartment house, 3 story and base, frame, \$20,000. Architects, Banning & Stewart, 5215 Broadway, Oakland. Owner's name withheld. Location, Bellevue facing Lake Merritt. Will contain twelve suites of two and three rooms. Interior finish pine with some hardwood veneer and hardwood floors. Central heating system and hot water supply. Bath rooms finished in tile. Exterior faced with cement plaster. Plans being prepared.

**OAKLAND, CAL.**—Apartment house, 3 story and base, frame and brick, \$18,000. Architect, Alvin J. Stern, 306 14th street, Oakland. Owners, Sommarstrom Bros. Location, Jackson street. Will contain twelve suites of three rooms and bath. Interior finish pine and elm panels with some hardwood floors. Wall beds. Bath rooms tile. Central heating system and hot water supply. Exterior covered with rustic and brick veneer. Plans are complete and work to be done by Day Labor.

#### Contracts Awarded.

**PASADENA, LOS ANGELES CO., CAL.**—Apartment house, 3 story and base, frame, \$28,000. Architect, Albert Reed, Long Beach. Owner, Mrs. F. C.

Pratt. Contractors, J. H. Woodworth & Son, Chamber of Commerce Bldg., Pasadena. Contract price, \$28,000.

#### BONDS

**SAN LEANDRO, ALAMEDA CO., CAL.**—A special election has been called for November 20th by the School Trustees to decide the question of issuing and selling bonds in the sum of \$125,000. If carried, the proceeds of the issue will be expended in purchasing sites, erecting new school and repairing the present structures. Further information may be had from the Clerk of the School Trustees at San Leandro.

**MILPITAS, SANTA CLARA CO., CAL.**—The Milpitas School District voted bonds of \$12,000 for the erection of a new school building last week. An architect will be selected to design plans for the proposed structure in the near future.

**NEWCASTLE, PLACER CO., CAL.**—The election to vote bonds of \$12,000 carried by a vote of 181 to 22. The proceeds of the sale will be used in the construction of a new school. It is proposed to raze the present school and erect a cement structure in its place.

**SAN BRUNO, SAN MATEO CO., CAL.**—An election will be held on November 8th in the San Bruno Park School District to vote bonds of \$20,000. The proceeds of the sale of the bonds will be expended in the purchase of a site and the erection of a school. Further information may be had from Henry Spalding, Clerk of the School Board.

**WEAVERVILLE, TRINITY CO., CAL.**—To provide for the construction of a system of highways throughout Trinity County, to cost about \$400,000, citizens are circulating petitions asking that Congress appropriate that amount. The citizens are determined to profit by Secretary of Agriculture Houston's recommendation that the Government mortgage the future output of the Trinity National forest by advancing large sums for the construction of the proposed highway system.

**SAN FRANCISCO, CAL.**—The sale of all of the remaining Hetch-Hetchy bonds, amounting to \$12,287,000, is proposed in a resolution drafted last week by the Supervisor's Finance Committee. The resolution states that bids will be received on December 6th for all or any portion of these bonds, delivery to be made within five years as follows: \$2,000,000 prior to January 1, 1916; \$3,000,000 in July, 1916; \$5,000,000 in January, 1917; and \$5,000,000 every six months thereafter until July, 1920.

**SACRAMENTO, CAL.**—Attorney General U. S. Webb has rendered an opinion to State Treasurer Richardson that the University of California bonds, amounting to \$1,800,000, voted by the people at the last election, are valid. Bids are now being received for the sale of the bonds.

**SEATTLE, WASH.**—The proposed bond issue of \$750,000 for the construction of schools and the purchase of sites will be held on December 4th and not on November 4th, as stated in these columns recently.

**SACRAMENTO, CAL.**—E. H. Rollins & Sons and Kountze Bros. of New

York have purchased the University of California building bonds. The amount of the bonds is \$1,800,000. Six firms from California and two from New York submitted bids.

**VISALIA, TULARE CO., CAL.**—Members of the Board of Supervisors have approved the engineering plans for the Lindsay-Strathmore Irrigation District and have passed an official order for an election to vote bonds of \$1,750,000 to finance the work, which will consist of the construction of storage reservoirs and a distributing system. The date of the election will be announced shortly.

This project, with changes in boundaries recently made, will include 17,500 acres of foothill citrus land stretching from Exeter to within a short distance of Porterville.

**MARICOPA, KERN CO., CAL.**—With a vote of 152 for and 2 against, the election to bond the city for a new high school building carried. The bonds amounted to \$15,000. After the sale of the bonds construction will be started.

**EAGLE ROCK, CAL.**—For the third time within a year the local school board has called an election to vote bonds of \$65,000 to finance the construction of a new school. The last election was lost by five votes. November 29th is the date set for the election.

**GLENDALE, LOS ANGELES CO., CAL.**—The City Engineer has submitted a report to the Board of Trustees stating that the cost of necessary improvement work in the Verdugo Wash will amount to \$70,880. The Trustees are contemplating the calling of a special election to vote bonds to carry out the work. The engineer is also preparing an estimate of the cost of necessary work in Sycamore Canyon Wash.

**SAN BERNARDINO, SAN BERNARDINO CO., CAL.**—The County Supervisors have sold the last block of county highway bonds, amounting to \$675,000.

**KINGSBURG, FRESNO CO., CAL.**—The Trustees of the Kingsburg Joint Union High School District have received the money from the sale of the \$40,000 bond issue and will advertise for bids at once for the erection of the proposed new high school building.

**DAVIS, YOLO CO., CAL.**—A committee of prominent men and women of Davis have been appointed to complete final arrangements for the extension and improvement of the water system.

**SAN RAFAEL, MARIN CO., CAL.**—The Central Marin Chamber of Commerce, through its secretary, Mr. Edmiston, is perfecting arrangements for the calling of a bond issue, which, if carried, will take the place of the \$40,000 canal bonds voted by the city several years ago. The original \$40,000 bond issue contained a reservation that unless the State or the National Government provided a like sum for dredging purposes, the canal bonds were not to be issued. The present bond issue is being called to eliminate this reservation so that the money may become available.

The last State Legislature appropriated \$12,500 to be applied to a fund for deepening the canal, providing the city of San Rafael appropriated a like sum.

**STOCKTON, SAN JOAQUIN CO., CAL.**—At the meeting of the board of directors of the South San Joaquin Irrigation District it was unanimously decided to call for bids for \$150,000 worth of reservoir bonds, which they have on hand, for the purpose of constructing at once the large Woodward reservoir. About \$150,000 worth of bonds will remain in the treasury.

**SEATTLE, WASH.**—At a recent meeting of the City Council the resolution for the submission to the voters of a proposition of issuing bonds in the sum of \$75,000 for the construction of the Beacon Hill standpipe, was introduced.

**MARTINEZ, CONTRA COSTA CO., CAL.**—The Mt. Diablo District boulevard, as proposed, will be thirty miles long extending from the county line near Livermore through Tassajara, Diablo Park, Green Valley, Stone Valley, Alamo, Moraga to Bryant and connect with the Tunnel road, the Redwood Canyon road will also be improved to connect with the Snake road.

It is proposed to build this boulevard by a bond issue, not to exceed 50 cents tax for every \$100 assessed valuation. A bond election will be called in the near future.

**EL CENTRO, IMPERIAL CO., CAL.**—Demonstrating the good credit of the two cities, \$150,000 in bonds issued by El Centro and Imperial to build a joint outfall sewer were sold to Torrance-Marshall Company of Los Angeles, the First National Bank here acting as agent.

**SANTA CRUZ, SANTA CRUZ CO., CAL.**—At the last meeting of the City Council it was decided to call off the election to vote bonds to purchase the Hihn water works.

**EVERETT, WASH.**—Revised plans for the permanent highway system proposed by the Snohomish County Good Roads Association have been completed. The work will cost in the neighborhood of \$1,812,000. A bond election will be held in the near future to finance the construction of the system.

**PETALUMA, SONOMA CO., CAL.**—The warehouse owned by G. P. McNear is now being razed to clear the site for a modern brick building.

**RED BLUFF, TEHAMA CO., CAL.**—At their last meeting the Woman's Improvement Club decided to arrange for plans for a new club house building. A site in Riverview Park has already been purchased and a fair sum remains to construct a new building.

## BRIDGES AND DAMS

**SAN FRANCISCO**—Pier construction and repairs. Cost not stated. Engineer, Assistant State Engineer, Ferry Bldg., S. F. Owners, State of California. Bids will shortly be called for by the State Board of Harbor Commissioners for repairs to Pier No. 9 and for a bulkhead between Piers Nos. 9 and 11. Plans for this work together with plans and specifications for an approach to the upper floor of the Ferry Building have been approved. Bids may not, however, be called for on the approach for some time.

**BRIDGEPORT, MONTECALA CO., CAL.**—Bridge, steel and concrete. Cost not stated. Engineer, County Surveyor,

Bridgeport. Owners, Mono County. Bids will be opened on January 3rd for the construction of a pony truss steel bridge with reinforced concrete abutments to be built across the East Walker River, about six miles north of Bridgeport. Span, 50 feet, 3 panel, 16-foot roadbed.

**PETALUMA, SONOMA CO., CAL.**—Culvert, reinforced concrete. Cost not stated. Engineer, Engineering Dept. Northwestern Pacific Railroad, S. F. Owners, C. C. Winn and Mr. Neff. According to information obtained here Superintendent Neff and C. C. Winn of the Northwestern Pacific Railroad, accompanied by members of the City Council of Petaluma, visited their land in East Petaluma where the water flow has caused considerable damage during the winter. After many suggestions, it was decided to construct a culvert on the site. Plans for the culvert will be prepared in the offices of the railroad company.

**REDWOOD CITY, SAN MATEO CO., CAL.**—Culvert, reinforced concrete. Cost not stated. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. The Supervisors have ordered the County Surveyor to prepare plans and specifications, secure separate bids and award the contract for building a culvert on the county road near Beresford. Further information may be had from the County Engineer at Redwood City.

**REDWOOD CITY, SAN MATEO CO., CAL.**—Culverts, reinforced concrete. Cost not stated. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. At the last meeting of the County Supervisors, the Clerk was authorized to advertise for bids for building certain culverts along the Middlefield road in the Third Township. Further information may be had from the County Engineer.

**SACRAMENTO, CAL.**—By-pass, steel and concrete. Cost not stated. Engineer, State Highway Commission, Sacramento. Owners, State of California. At the last meeting of the State Reclamation Board the State Highway Commission advised the Board that it had not yet been able to close a favorable contract for the construction of a bascule bridge over the borrow-pit on the east side of Yolo by-pass adjoining the levee of West Sacramento. This bridge was to serve as a part of the 11,000-foot concrete highway crossing the by-pass, and was to permit the passage of dredges necessary for protective work in connection with the flood control project. A temporary structure around this crossing has built, so that on completion of the balance of the highway traffic may be accommodated. It is hoped the bascule can be constructed within the next few months.

**VENTURA, VENTURA CO., CAL.**—Culverts and grading. Cost not stated. Engineer, County Surveyor, Ventura. Owners, Ventura County. Bids will be opened on November 6th for culverts and grading of the Santa Ana road. The road is located along the west side of the Ventura River, beginning at a point 3,700 feet north of Foster Park and extending northerly a distance of one and one-half miles. The grading consists of side hill work in earth and shale. Approximate quantities are as

follows: Item 1, \$2,350 cubic yards excavation unclassified; 2, 330 linear feet of 18-inch corrugated iron pipe; 3, 131 linear feet of 21-inch corrugated iron pipe; 4, 238 linear feet of 30-inch corrugated iron pipe; 5, 130 linear feet of 12-inch corrugated iron pipe; 6, 61 linear feet of 18-inch corrugated iron pipe; 7, 85 cubic yards Class B concrete; 8, 3,000 pounds reinforcing steel.

**RIVERSIDE, RIVERSIDE CO., CAL.**—Bridge, reinforced concrete and steel. Cost not stated. Engineer, County Surveyor, Riverside. Owners, Riverside County. Bids will be received on November 10th for the construction of a bridge across the Santa Ana River on Hammer avenue in the First Road District. Plans can be secured from the County Surveyor.

**SEATTLE, WASH.**—Bridge, steel and reinforced concrete, \$500,000. Engineer, City Engineer Rapp, Seattle. Owners, City of Seattle. City Bridge Engineer Rapp has the plans for a proposed city bridge over the Lake Washington Canal at 10th avenue N. E. practically complete. Specifications, etc., will probably be in shape to permit calling of bids the early part of this month. The bridge will have a central span of 216 feet, will be 80 feet wide of the double leaf bascule type, similar to the Fremont bridge. Temporary wooden approaches 3,000 feet long are called for. The sub-structure will cost \$135,000 and superstructure about \$365,000.

## Contracts Awarded

**SAN JOSE, SANTA CLARA CO., CAL.**—Bridge, reinforced concrete, \$2,295. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Contractor, P. F. Moore, Monterey. Contract price, \$2,295.

**SANTA BARBARA, SANTA BARBARA CO., CAL.**—Bridges, reinforced concrete. Cost as follows. Engineer, Flaherty, Santa Barbara. Owners, Santa Barbara County. Contractors, Security Construction Co., 38th and Alameda streets, L. A., Dos Pueblos bridge, \$9,720. Boardman Construction Co., Story Bldg., L. A., Eagle Canyon Creek bridge, \$10,961.

**SAN FRANCISCO**—Pier construction, \$283,000. Engineer, Assistant State Engineer, Ferry Bldg., S. F. Owners, State of California. Contractors, Clinton Fireproofing Co., Mutual Bank Bldg., S. F. Contract price, \$283,000.

## Factories and Warehouses.

**SAN PEDRO, LOS ANGELES CO., CAL.**—Warehouse, 7 story, reinforced concrete, \$117,138.75. Engineer, Los Angeles Harbor Commission, L. A. Owners, Port of Los Angeles. The Merchants' Realty and Investment Co., Van Nuys Bldg., L. A., was the lowest bidder at \$117,138.75 for the erection of the seven story and basement reinforced concrete warehouse to be erected at San Pedro by the Harbor Commission. The F. O. Engstrom Co., 5th and Seaton streets, L. A., was the next lowest bidder at \$118,165. The bids were referred to the harbor engineer with instruction to present a report containing an estimate of the cost of the work if done by force account.

## Contracts Awarded.

**SAN PEDRO, LOS ANGELES CO., CAL.**—Factory, 1 and 2 story, steel and concrete. Cost not stated. Engineer,

Charles P. Greenwood. Owners, American Tuna Co., Pacific Electric Bldg., L. A. Contractors, F. O. Engstrom Co., 5th and Seaton streets, L. A. Contract awarded on the percentage basis. First unit only included, complete plant to cost \$650,000.

**NORTH POMONA, LOS ANGELES CO., CAL.**—Packing plant, 1 story and base, reinforced concrete, \$25,000. Architect, none. Owners, Indian Citrus Association. Contractor, D. C. Crook-shank, Pomona. Contract price, \$25,000.

**WHITTIER, LOS ANGELES CO., CAL.**—Parking plant, 1 story and base. Class A construction, \$56,434. Architects, A. W. Rea and C. E. Garstang, Black Bldg., L. A. Owners, Murphy Oil Co. Contractor, E. M. Wheatland, Whittier. Contract price, \$56,434.

**EUGENE, ORE.**—Warehouse, 2 story and base, hollow tile, \$25,000. Architect, J. R. Ford, Eugene. Owners, Allen & Lewis, Portland. Contractors, Applewhite & Ford, Eugene. Contract price, \$25,000.

### FIRE HOUSES AND JAILS.

**PATTERSON, STANISLAUS CO., CAL.**—Jail, 1 story and base, reinforced concrete. Cost not stated. Architect, none. Owners, Town of Patterson. The proposed jail and court room building will be under construction shortly. The preliminary plans for the building have been completed by Supervisor A. E. Clary. The sketches provide for a building about 22x55 feet in size, the court room being 20 by 20 feet. Lavatories, steel cages, baths and heating system is included in the work.

### FIRE REPORT

**CHICO, BUTTE CO., CAL.**—At a loss of \$3,000 the warehouse of F. H. Hinton at First and Cedar streets was destroyed. The loss is partly covered by insurance.

**ELKO, NEV.**—The town of Deeth, about 37 miles east of Elko on the Southern and Western Pacific railroads, was partly destroyed by a disastrous fire last week. The loss is estimated between \$20,000 and \$25,000.

**SEATTLE, WASH.**—Pier 14, used by the Blue Funnel British steamers, was destroyed by fire last week, causing a loss of \$600,000.

### FLATS

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$6,000. Architect, none. Owner, Ralph McLean, Sharon Bldg., S. F. Location, north Fulton east Arguello, covering an area of 25 by 80 feet. Will contain two flats of five and six rooms. Interior finish pine, hardwood and white enamel. Hardwood floors, open fire places and tile or brick mantels. Bath rooms tile. Automatic water heaters. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$5,400. Architect, W. S. Rhodes, 3372 16th, S. F. Owner, Victor Sutherland. Location, west Church south of Cumberland. Will contain four flats of three rooms and bath.

Interior finish pine and elm panels. Some hardwood floors. Wall beds. Exterior covered with cement plaster on metal lath. Plans complete and figures being taken.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$4,000. Architect, Theo S. Eochim, 4119 19th street, S. F. Owner, Joseph P. Alexander. Location, west 20th avenue north of Anza. Will contain two flats of five and six rooms. Interior finish pine with some elm panels and hardwood floors. Open fire places and tile mantels. Automatic water heaters. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

### GARAGES

**SAN FRANCISCO**—Garage, 1 story and base, steel and reinforced concrete. Cost not stated. Architect, P. Righetti, Phelan Bldg., S. F. Owner's name not given. Location, north Pacific east of Powell, covering an area of 75 by 129 feet. Designed for a large commercial garage with additional storage space in basement; complete shop equipment and special gasoline storage tanks. Steel roof trusses and concrete floors. Exterior faced with cement plaster. Plans complete and figures taken.

**SAN FRANCISCO**—Garage, 1 story, galvanized iron, \$3,000. Architect, none. Owners, People's Bread Co. Location, southwest corner of Bryant and 15th streets. Will contain storage space for 75 machines. No interior finish. Concrete floors. Exterior covered with corrugated iron. Plans complete and work to be done by Day Labor.

**PORTLAND, ORE.**—Garage, 2 story and base, reinforced concrete, \$25,000. Architects, Sutton & Whitney, Lewis Bldg., Portland. Owners, Kissel Kar Automobile Salesroom Co. Location, Broadway and Davis streets, covering an area of 100 feet square. Construction fireproof. Interior finish pine, hardwood and ornamental plaster in salesrooms. Elevator service. Exterior faced with cement plaster. Plans complete and figures being taken.

### GOVERNMENT WORK & SUPPLIES

#### Berkeley, Cal., Vault Shelving.

The contract for installing metal vault shelving in the U. S. public building at Berkeley, Cal., has been awarded to the Berger Mfg. Co., Canton, Ohio, at \$356.

#### Raising Earthwork and Structures.

No bids were received by the project manager of the U. S. Reclamation Service, Carlsbad, N. Mex., for raising earthwork and structures on the Carlsbad, N. Mex., project.

#### Medford, Ore., Elevator.

As previously reported, the contract for installing an elevator in the U. S. post office and court house at Medford, Ore., was awarded to Kaestner & Hecht, Chicago, Ill., at \$3,394. In the prosecution of the work fixtures and material manufactured by the following firms will be used: Elevator motor, Westinghouse; elevator controller, Kaestner & Hecht; ammeter and voltmeter, Westinghouse.

### Canal Requisitions

Bids will shortly be invited by the general purchasing officer of the Panama Canal, Washington, D. C., for furnishing the following material, due notice of which will appear in our columns:

- Kalamine, millwork, and hardware for pier 7 at Cristobal.
- 29 inner and 20 outer seat gaskets.
- 1 drill press, 20-in.
- 1 lathe, 24-in, 2-cutting.
- 381 cast iron keel blocks for dry dock No. 1.
- 102 cast iron bilge block slides and accessories.

### Pearl Harbor, Elevator.

The contract for furnishing pneumatic freight elevators at Pearl Harbor, under bids originally opened on August 28 and supplemental opening of October 12, has been awarded to the Otis Elevator Co., of Washington, D. C., at \$4,876.

### Reclamation Service, Gate Machinery.

The following bids were received by the chief engineer, U. S. Reclamation Service, Washington, D. C., for furnishing the operating mechanism for two cylinder gates of 12-ft diameter for Sherburne reservoir, Milk River project, and a duplicate set for Keechelus reservoir:

- Stacy-Schmidt Mfg. Co., York, Pa., \$2,690; time January 15 to January 31.
- Rosedale Foundry and Machine Co., Pittsburgh, Pa., \$2,160; time December 20 to January 1.
- Minneapolis Steel and Machine Co., Minneapolis, Minn., \$1,650; time 40 to 50 days.
- Webster Mfg. Co., Tiffin, Ohio, \$1,950; time 75 to 90 days.
- Vulcan Iron Works, Denver, Colo., \$1,463; time December 20 to January 15.
- Ellicott Machine Corp., Baltimore, Md., \$2,460.30; time 120 to 150 days.
- J. & J. B. Millholland Co., Pittsburgh, Pa., \$1,448.52; time December 20 to December 30.

### Grass Valley, Cal., Vault Shelving.

The contract for installing metal vault shelving in the U. S. public building at Grass Valley, Cal., has been awarded to the Keyless Lock Co., Indianapolis, Ind., at \$175.

### Submarines and Destroyers.

The contract for constructing 16 submarines and 6 torpedo-boat destroyers, bids for which were recently opened by the Secretary of the Navy, has been awarded as follows:

- Wm. Cramp & Sons Ship & Engine Building Co., 2 torpedo-boat destroyers, \$845,000 each.
- Seattle Construction & Dry Dock Co., Seattle, Wash., 1 destroyer, \$885,000.
- Bath Iron Works, Bath, Me., 1 destroyer, \$879,500.
- One torpedo-boat destroyer will be constructed at the Mare Island navy yard at a cost of \$762,638 and one at the Norfolk navy yard at a cost of \$706,305.
- Electric Boat Co., Bridgeport, Conn., 8 submarines at \$455,000 each.
- Lake Torpedo Boat Co., Groton, Mass., 3 submarines at \$455,000 each.
- California Shipbuilding Co., Long Beach, Cal., 3 submarines of Lake Co.'s designs at \$458,500 each.

Two submarines will be built at government navy yards on designs furnished by the Electric Boat Co.

#### Peking, China, Cold-Storage Plant.

The following bids were received by the chief of the bureau of yards and docks, Navy Department, Washington, D. C., for furnishing t. o. b. cars, San Francisco, and the installation at Peking, China, of an ice-making and cold-storage plant at the U. S. marine barracks, Peking, China:

Item 1, plant, complete; 2, do, modified specifications; 3, deduct for omitting one ammonia compressor; 4, deduct for omitting all labor except the services of the expert mechanic to superintend the installation and conduct preliminary operation and tests; 5, price for all machines, mechanical equipment, insulating material and other accessories for a complete plant, f. o. b. cars, San Francisco, Cal., packed for export shipment; 6, price for labor and expert superintendence, as well as material ordinarily procurable in the local market for erecting and installing the complete plant in accordance with the specifications, machinery, etc., to be furnished under item 5; 7, price for all expert superintendence to install a complete plant.

The York Mfg. Co., York, Pa., item 1, \$7,795; 2, \$7,870; 3, \$675; 4, \$600; 5, \$5,295; 6, \$2,500; 7, \$1,600.

The Triumph Electric Co., Cincinnati, Ohio, item 2, \$450; 5, \$4,800.

The Cyclops Iron Works, San Francisco, Cal., item 1, \$9,500; 3, \$800; 4, \$1,200; 5, \$5,300; 6, \$4,200; 7, \$2,000.

The Vilter Mfg. Co., 872 Clinton street, Milwaukee, Wis., item 1, \$8,970; 2, \$8,950; 3, \$720; 4, \$1,650; 5, \$4,260; 6, \$3,500; 7, \$1,140; 8, \$350; 9, \$300.

**PRESIDIO OF SAN FRANCISCO**—Nurses' dormitory addition, 1 story, reinforced concrete. Cost not stated. Engineer, Constructing Quartermaster's office, Fort Mason. Owners, United States Government. Bids will be opened on November 24th for constructing addition No. 3 to the nurses' dormitory at the Letterman General Hospital. Work includes plumbing, tile, electric and radiators. Exterior will be faced with cement plaster. Plans can be secured from the office of the Constructing Quartermaster. An official proposal appears in another column of this issue.

#### BALLS AND SOCIETY BUILDINGS

**SANTA CLARA, SANTA CLARA CO., CAL.**—City hall completion, frame construction. Cost not stated. Architect, William Binder, Rea Bldg., San Jose. Owners, Town of Santa Clara. The Town Trustees at their last meeting considered the plans and specifications of Architect William Binder for the completion of the uncompleted section of the town hall. Action was laid over until next meeting. H. R. Roth is a member of the Board of Trustees.

**VISALIA, TULARE CO., CAL.**—Municipal auditorium, 2 story and base, brick, \$35,000. Architects, Coates & Traver, Howell Bldg., Fresno. Owners, City of Visalia. Will contain large auditorium, stage, offices and rifle range. Interior finish pine, maple floor. Central heating system. Exter-

rior faced with pressed brick. Bids being taken.

#### HOSPITALS.

**SAN FRANCISCO**—Hospital construction. Class A. Cost as follows. Architect, Lewis T. Hobart, Crocker Bldg., S. F. Owners, Regents of the University of California. Bids opened on October 25th for various parts of the work at the University Hospital at the Affiliated Colleges show the following firms low: Kiernan & O'Brien, plumbing, \$31,298; Vulcan Iron Works, refrigerating, \$12,600; Siebert Co., heating, \$28,987; Rex Electric Co., electric work, \$15,246; Otis Elevator Co., elevator work, \$10,985 and Siebert Co., power plant, \$50,955. A complete list of all bids received will be found under the heading of San Francisco in this issue.

#### IRRIGATION PROJECTS

**SUISUN, SOLANO CO., CAL.**—Irrigation project. Cost not stated. Engineer not selected. Owners, Glide Estate, William Denman, et al. According to word received a movement is under way to form an irrigation system, covering a large area of land situated between Suisun and Rio Vista, the project being fathered by some of the most extensive land owners within the bounds of the district, among whom are Dr. E. E. Brownell, William Denman and the Glide Estate, who own many hundreds of acres. Probably three-fourths of the land owners within the district have already signed a contract authorizing a survey to ascertain the probable cost of obtaining water from the Sacramento River at a point above Rio Vista, the course of a canal, as now figured on, being some distance north of the ditch made by the defunct Solano Irrigated Farms concern. The scheme as outlined for the new project is for the land owners to unite and form a co-operative organization, contributing toward the expense of building the system so much per acre. The preliminary proceedings of the proposed project have been worked up quietly and nothing has yet been done except to make provisions for a preliminary survey, but those interested in promoting this scheme express confidence that something definite will be accomplished if a sufficient number of landowners will co-operate in the enterprise.

**OROVILLE, BUTTE CO., CAL.**—Irrigation project. Cost not stated. Engineer not selected. Owners, Thermalito Irrigation District. The committee chosen by property owners of Thermalito to formulate plans for an irrigation district has practically abandoned the project of securing water from the Oro system. The committee favors the project of procuring a water supply from the west branch of the Feather River, the water to be diverted at Cape Horn. It is estimated a thousand inches of water will be available at this point. Oscar Warner, chairman of the committee, has asked the Chamber of Commerce of Oroville to aid in financing the preliminary campaign in behalf of the new plan. It is planned to irrigate 5,000 acres.

**OROVILLE, BUTTE CO., CAL.**—Irrigation canals. Cost not stated. Engineer's name not given. Owners, Dry and Butte Creek Irrigation Districts. The Great Western Canal Company has begun work on the second and third units of the Western Canal. Trains, scrapers and a steam shovel are at work west of Biggs, the second unit extending from Dry Creek to Butte Creek. Work is also under way on the third unit, which will bring water to the 7,000 acre tract of rice land west of Nelson. The contract specifies that work must be completed by April 1st.

**VISALIA, TULARE CO., CAL.**—Irrigation project, \$1,750,000. Engineer's name not given. Owners, Lindsay-Strathmore Irrigation District. Members of the County Supervisors have formally approved the engineering plans for the Lindsay-Strathmore Irrigation District and passed an official order for an election to vote bonds to finance the construction. Further information will be given of this work at a later date.

**MERIDIAN, SUTTER CO., CAL.**—Levee construction and repairs, \$20,000. Engineer, State Engineer McClure, Sacramento. Owners, State of California and Levee District No. 70. The State Engineering Department will soon establish a repair gang at Meridian for the purpose of strengthening the west levee of District 70. The levee is declared to be weak in places and liable to damage unless it is strengthened. The work will be started in the near future and by the time the floods come the levee will be in good condition.

**SAN LUIS OBISPO, SAN LUIS OBISPO CO., CAL.**—Reclamation work. Cost not stated. Engineer, County Surveyor, San Luis Obispo. Owners, San Luis Obispo County. The Board of Supervisors at a recent meeting in discussing the construction of the pile and barb wire jetty for reclamation work at Santa Maria River allowed John Grace, the contractor who was awarded the contract, to withdraw his bid, what action will be taken has not been mentioned.

**BYRON, CONTRA COSTA CO., CAL.**—Irrigation ditch. Cost not stated. Engineer's name not given. Owners, Byron-Bethany Irrigation Co. Excavating bids for digging a ditch or canal from Indian Slough to the Bruns Hill, a distance of 6,000 feet, were opened by the directors of the Byron-Bethany Irrigation Company last week. All of them were rejected as being too high. There were four bidders. The lowest bid was that of A. B. Munson & Son of Stockton for 17½¢ per cubic yard. The directors believe the work can be done for considerably less, as they have thoroughly examined the nature of the earth to be removed. The work will be done by Day Labor according to the directors.

**DOYLE, LASSEN CO., CAL.**—Irrigation project. Cost not stated. Engineer, William L. Wales, Woodland. Owners, Southern Lassen Irrigation District. The Southern Lassen Irrigation District has obtained the services of Attorney L. L. Bennett of Modesto. William L. Wales of Woodland is the engineer. A majority of land owners have signed the petition and

the Supervisors will meet on November 8th, at which time the Board will declare the district and call an election. The district comprises 21,500 acres in the southern end of Honey Valley. Bonds to finance the construction will be voted as soon as possible.

### LIBRARIES.

LOS ANGELES, CAL.—Library, 1 story and base, brick, \$30,000. Architect, Lester Hibbard, Marsh-Strong Bldg., L. A. Owners, City of Los Angeles. Location, corner of Workman street and Avenue 26. Will contain two reading rooms, office and stack rooms. Interior finish pine and hardwood with maple floors. Metal book stacks. Steam heat, oil burning furnace. Exterior faced with cement plaster and pressed brick. Plans being revised and bids to be called for shortly.

### PIPE LINES.

McKITTRICK, KERN CO., CAL.—Pipe line construction. Cost not stated. Engineer's name not given. Owners, Kern Trading and Oil Co., Bakersfield. An immense pipe line project will soon be started here by the Kern Trading and Oil Co., who will lay a 6½-inch pipe line from the Maricopa camp to the McKittrick field, for the purpose of conveying gas from the local properties to the McKittrick leases of the company, furnishing fuel for steam and gas power plants to run the several leases in that field. It will be constructed along different lines than any other in the field. Instead of regular screw joints and couplings, the pipe will be welded at the joints by oxy-acetylene process, making one solid line of the many joints of pipe. An extra heavy grade of pipe will be used, weighing 12.9 pounds to the foot. The total length of the line when it is constructed will be 18 miles.

McKITTRICK, KERN CO., CAL.—Pipe line construction. Cost not stated. Engineer, Engineering Dept. Shell Oil Co., 343 Sansome street, S. F. Owners, Shell Oil Co. The announcement that the Kern Trading and Oil Company and the General Petroleum Company, respectively, each will build a pipe line from the Midway and Sunset districts, traversing the vicinity of McKittrick en route, has revived the rumor circulated extensively some time ago, that the Royal Dutch Shell or Shell Company of California, intends to construct a pipe line from Coalinga to its tank farm, four miles in a southeasterly direction from McKittrick. Further information may be had from the company's engineer.

### POST OFFICES

WILLOWS, GLENN CO., CAL.—Post office, 2 story and base, brick and steel, \$75,000. Architects, Bliss & Faville, Balboa Bldg., S. F. Owners, United States Government. Official approval has been given preliminary plans for this building and the architects are now at work on the detail drawings. Bids will be called for shortly.

### RAILROAD CONSTRUCTION AND EQUIPMENT.

RICHMOND, CONTRA COSTA CO., CAL.—Spur tract construction. Cost not stated. Engineer, Engineering Dept. Santa Fe Co., L. A. Owners, Santa Fe Railroad Co. The City Council granted permission to the Atchison, Topeka and Santa Fe Railway Company to construct a spur track from its main line south of the municipal tunnel to the plant of the Richmond Brick Company. Work will be started in about two weeks.

RICHMOND, CONTRA COSTA CO., CAL.—Municipal railroad. Cost not stated. Engineer, City Engineer, Richmond. Owners, City of Richmond. Preparations are being made by the City Council to operate a municipal street car line through the tunnel at Ashland avenue.

SAN JOSE, SANTA CLARA CO., CAL.—Street railroad extension. Cost not stated. Engineer, Engineering Dept. San Jose Railroads, San Jose. Owners, San Jose Railroads Co. Application has been made to the County Supervisors by the San Jose Railroads for permission to construct and maintain for a period of 12 years a single or double tract standard gauge electric railroad, together with the necessary poles, wires, appliances and appurtenances, upon, along and over the following route and streets in the County of Santa Clara, to wit: Upon Alum Rock avenue from a point where said Alum Rock avenue is intersected by the easterly or northeasterly boundary line or limits of the City of San Jose; thence along said Alum Rock avenue in an easterly or northeasterly direction to a point thereon where said Alum Rock avenue would be intersected by the westerly or southwesterly line of Kirk avenue prolonged southerly and southeasterly. P. E. Chapin is general manager of the San Jose Railroads.

### RESIDENCES.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,700. Architect, none. Owners, Johnson & Johnson, 818 14th avenue, S. F. Location, north Cabrillo east 16th avenue. Will contain seven rooms, bath and sleeping porch. Interior finish pine, hardwood veneer and white enamel. Hardwood floors. Open fire place and tile or brick mantel. Furnace heat. Tile bath room. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

SAN FRANCISCO—Residences, 2, 2 story and base, frame, \$3,000 each. Architect, none. Owner Charles E. Reinhart, 17th and Kansas streets, S. F. Location, north 19th avenue west of Lamson. Each will contain six rooms and bath. Interior finish pine with some elm panels and hardwood floors. Open fire places and tile or brick mantels. Tile bath rooms. Automatic water heaters. Exteriors covered with rustic and brick veneer. Plans complete and work to be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,000. Architect, C. E. Gottschalk, Phelan Bldg., S. F. Owner, A. McFarlane. Location,

east 47th avenue north Cabrillo. Will contain seven rooms, bath and sleeping porch. Interior finish pine, elm panels and hardwood floors. Open fire place and tile or brick mantel. Tile bath room. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$6,500. Architect, Willis Polk, Hobart Bldg., S. F. Owner, Mrs. John W. Proctor. Location, southeast Scenic Way and 26th avenue. Will contain eight rooms, two baths and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors. Furnace heat, open fire places and hot water circulating system. Bath rooms finished in tile. Mantels tile and stone. Exterior covered with cement plaster. Contract price excavating and grading let to H. N. McClure for \$1,400. Working drawings being prepared.

SAN FRANCISCO—Residences, 2 1 story and base, frame, \$4,000. Architect, Joseph A. Leonard, 85 Cerritos avenue, S. F. Owners, Urban Realty Co. Location, west Urbano Drive north Victoria. Each will contain eight rooms, bath and sleeping porch. Interiors will be finished in pine, white enamel and hardwood. Hardwood floors. Furnace heat and open fire place. Mantels tile and brick. Tile bath rooms. Automatic water heaters. Exteriors covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame. Cost not stated. Architect, Nathaniel Blaisdell, 255 California street, S. F. Owner, John H. Sherry. Location, Lake and 22nd avenue. Will contain eight rooms, two baths and sleeping porch. Interior finish pine, white enamel and hardwood. Hardwood floors. Open fire places and furnace heat. Automatic water heater. Bath rooms finished in tile. Mantels tile or brick. Exterior covered with cement plaster. Plans complete and figures being taken.

SAN FRANCISCO—Residence, 2 and 2 story and base, frame. Cost not stated. Architect, G. A. Applegarth, Claus Spreckels Bldg., S. F. Owner, John A. Buck. Location, southwest Washington and Locust. Will contain twelve rooms, baths and sleeping porches. A separate garage will be erected. Interior of dwelling finished in pine, hardwood and brick. Exterior covered with cement plaster. Plans being prepared.

SAN FRANCISCO—Residence, 1 story and base, frame, \$4,000. Architect, M. T. Schwartz, Nevada Bank Bldg., S. F. Owner, J. S. Malloch. Location, Forest Hill. Will contain eight rooms, two baths and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors. Furnace heat, open fire places and automatic water heater. Mantels tile or brick. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

SAN FRANCISCO—Residences, 2, 2 story and base, \$2,750 each. Architect, none. Owner, Emil Nelson, 244 Rivalto, S. F. Location, west 15th avenue north

Balboa. Each will contain six rooms and bath. Interior finish pine and elm. Hardwood floors and open fire places. Mantels tile or brick. Imitation tile in baths. Automatic water heaters. Exteriors covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

ALAMEDA, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$6,000. Architects, Banning & Stewart, 5215 Broadway, Oakland. Owners, Banning & Stewart. Location, Alameda avenue near Grand. Will contain eight rooms, bath and sleeping porch. Interior finish—pine, hardwood and white enamel. Hardwood floors. Furnace heat, open fire places and automatic water heater. Tile bath rooms. Exterior covered with cement plaster. Plans being prepared.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$6,500. Architect, none. Owners, Moore & Thomas, 2195 62nd avenue, Oakland. Will contain eight rooms, bath and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors, furnace heat and open fire place. Automatic water heater. Mantel tile or brick. Tile bath room. Exterior cement plaster on metal bath. Plans complete and work to be done by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$6,000. Architects, Banning & Stewart, 5215 Broadway, Oakland. Owners, Banning & Stewart. Location, Lake Shore avenue near Walla Vista. Will contain eight rooms, bath and sleeping porch. Interior finish pine, white enamel and hardwood veneer. Hardwood floors. Furnace heat, open fire places and automatic water heater. Mantels tile or brick. Bath room finished in tile. Exterior covered with cement plaster. Plans being prepared.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,000. Architect, M. L. Diggs, 2114 Bowditch, Berkeley. Owner, J. C. O'Connor. Location, west Carlton south Prospect. Will contain seven rooms, bath and sleeping porch. Interior finish pine and white enamel. Hardwood floors. Open fire place and tile or brick mantel. Bath room tile. Automatic water heater. Exterior covered with cement plaster. Plans being prepared.

ALBANY, ALAMEDA CO., CAL.—Residences, 3, 1 story and base, frame, \$2,500 each. Architect, none. Owner, M. P. Brash, 5836 Ocean View, Oakland. Location, east Ventura north Marin. Each will contain five rooms and bath. Interior finish pine and white enamel. Some hardwood floors. Open fire places and tile or brick mantels. Automatic water heaters. Exteriors covered with cement plaster. Plans complete and work to be done by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$1,000. Architect, none. Owners, Fuller & Robbins, Athens Hotel, Oakland. Location, east Thomas south Prospect. Will contain eight rooms, bath and sleeping porch. Interior finish pine and hardwood with some white enamel. Furnace heat, open fire place and automatic water heater. Hardwood floors, tile bath and tile or brick mantel. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

OAKLAND, CAL.—Residence, 2 story

and base, frame, \$6,000. Architects, Banning & Stewart, 5215 Broadway, Oakland. Owners, Banning & Stewart. Location, Rockridge Boulevard. Will contain eight rooms, bath and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors. Furnace heat, automatic water heater and open fire place. Mantel tile or brick. Tile bath room. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

OAKLAND, CAL.—Residence, 1 story and base, frame, \$2,750. Architect, none. Owner, George H. Hollridge, 5226 Tatt avenue, Oakland. Location, east Broadway south Manila. Will contain seven rooms, bath and sleeping porch. Interior finish pine and white enamel. Hardwood floors. Open fire place and tile mantel. Tile bath room. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

ALBANY, ALAMEDA CO., CAL.—Residence, 1 story and base, frame, \$3,000. Architect, none. Owner, H. E. Pfanz, 3359 Shafter avenue, Oakland. Location, southeast Marin and Ventura. Will contain six rooms, bath and sleeping porch. Interior finish pine and white enamel. Some hardwood floors. Open fire place and tile mantel. Imitation tile in bath. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

OAKLAND, CAL.—Residence, 1 story and base, frame, \$2,500. Architect, none. Owner, G. W. Baumann, 5560 Trask, Oakland. Location, north Trask west Davis. Will contain six rooms and bath. Interior finish pine. Hardwood floors. Open fire place and tile mantel. Tile bath room. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

CHICO, BUTTE CO., CAL.—Residence, 1 story and base, frame, \$3,500. Architect, none. Owner, George H. Taber, Chico. Location, south Chestnut and Salem streets. Will contain six rooms, bath and sleeping porch. Interior finish pine and white enamel. Hardwood floors. Furnace heat and open fire place. Mantel tile or brick. Tile bath. Automatic water heater. Exterior cement plaster. Plans complete and work to be done by Day Labor.

#### Contracts Awarded.

BEVERLY HILLS, LOS ANGELES CO., CAL.—Residence, 2 story and base, frame, \$15,000. Architect's name not given. Owner, W. C. Campbell, Rodon Land and Water Co., L. A. Contractor, Frank E. Hartigan, Story Bldg., L. A. Contract price, \$15,000.

#### SCHOOLS.

BERKELEY, ALAMEDA CO., CAL.—College building exterior facing. Cost as follows. Architect, John Gabon Howard, 601 Mission street, S. F. Owners, Regents of the University of California. The Raymond Granite Co. presented the low bid at \$125,000 for granite facing for the Benli, Ida Wheeler Hall, and H. Bush the low bid for cement facing at \$18,750. Bids have been taken under advisement by

the Regents. A complete list of the bids received will be found under the heading of Oakland and Alameda County in this issue.

OAKLAND, CAL.—School addition, 2 story, frame, \$15,000. Architect, J. J. Donovan, Dalziel Bldg., Oakland. Owners, City of Oakland. Plans are being prepared for a two story frame addition to the Fremont School. Interior will be finished in pine with maple floors in the class rooms. The steam heating system will be extended into the new portion of the building. Exterior will be faced with cement plaster. Plans are being prepared.

RED BLUFF, TEHAMA CO., CAL.—School, 2 story and base, reinforced concrete or brick, \$90,000. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Red Bluff Union High School District. Bonds have recently been sold, working drawings are complete and construction of the building will be started at once. The building will contain twelve class rooms, auditorium, office and laboratories. Interior finish pine with maple floors. Steam heat, coal burning furnace, program clock and vacuum cleaning. Exterior faced with pressed brick or cement plaster. Bids will be called for at once.

ROSAMOND, KERN CO., CAL.—School, 1 story, frame and plaster, \$2,000. Architect, J. M. Saffell, New Fish Bldg., Bakersfield. Owners, Rosamond School District. The building will contain one class room with south and west porches, office and library. Interior finish pine and redwood. Hylo blackboards. Exterior rustic and cement plaster. Plans complete and figures to be called for at once.

WOODLAKE, TULARE CO., CAL.—School, 1 and 2 story, brick, \$29,780. Architect, O. L. Clark, Brower Bldg., Bakersfield. Owners, Woodlake School District. Phillbrick & Colvin of Modesto submitted the low figure for the construction of this building at \$29,780. D. B. Day of Woodlake was second at \$30,250. All bids were taken under advisement, the local School Board wishing to favor Day if possible.

WOODBURN, ORE.—School, 2 story and base, hollow tile, \$30,000. Architect, Anton H. Gould, Henry Bldg., Bldg., Portland. Owners, City of Woodburn. Will contain 12 class rooms, auditorium and offices. Interior finish pine with maple floors. Central heating system, program clocks and vacuum cleaning. Exterior faced with cement plaster.

SALEM, ORE.—School addition, 2 story, brick, \$11,000. Architect, Dept. of Indian Affairs, Washington, D. C. Owners, United States Government. Location, Salem Indian School. Plans are complete and figures are being taken for an addition to the Salem Indian School. The work was figured sometime ago and included additions to the steam heating system. All bids were rejected. Bids will be opened on November 15th. Plans can be secured from the superintendent or from the Department of Indian Affairs at Washington, D. C. An official proposal appears in another column of this issue.

#### Contracts Awarded.

WEED, SISKIYOU CO., CAL.—School addition, 1 story, frame, \$1,500. Architect, name not given. Owners, Town of Weed. Contractor, O. B. Cooper, Weed. Contract price, \$1,500.

## SEWERS, STREET WORK & WATER SYSTEMS.

**PRESIDIO OF SAN FRANCISCO**—Roads and walks, \$2,697.50. Engineer, Constructing Quartermaster, Fort Mason. Owners, United States Government. The Fay Improvement Co. submitted the lowest figure for constructing roads, walks and gutters at the Letterman General Hospital at \$3,697.50 and will probably be awarded the contract. A complete list of the figures appears under the heading of San Francisco in this issue.

**EASTON, SAN MATEO CO., CAL.**—Street improvement, \$250,000. Engineer, City Engineer, Easton. Owners, City of Easton. Trustee Edward Chevalier of Burlingame states that preparation is under way for 10 miles of new paved streets in the Easton section of that city. The property owners are signing petitions to the Trustees to order the work on practically every street in the Easton additions, including Burlingame Grove.

**SAN JOSE, SANTA CLARA CO., CAL.**—Street improvement. Cost not stated. Engineer, City Engineer, San Jose. Owners, City of San Jose. At a recent meeting of the Council resolutions of intention for the improvement of the roadway of a portion of William street near Third street, another near Sixth street, and also a portion of Eighth street near San Carlos were given a second reading and adopted. Bids on this work will soon be called for.

**SAN JOSE, SANTA CLARA CO., CAL.**—Crushed rock. Cost not stated. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. The County Supervisors have directed the Clerk of the Board to advertise for bids for Saratoga crushed rock to be delivered at the following places: Kennedy road, 1,630 cubic yards or more; Roberts road, 750 cubic yards; San Tomas Aquino, 1,110 cubic yards; Bryant street, 1,063 cubic yards; California avenue, 455 cubic yards; Ashby avenue, 389 cubic yards.

**SAUSALITO, MARIN CO., CAL.**—Sewer construction, \$11,458.70. Engineer, City Engineer, Sausalito. Owners, City of Sausalito. At the last meeting of the City Trustees one bid was received for doing the sewer work in Sewer District F. T. J. Tobin, 735 Filbert street, Oakland, bid \$11,458.70. Action on the bid was laid over until the next meeting.

**RICHMOND, CONTRA COSTA CO., CAL.**—Sewer construction (cost not stated). Engineer, City Engineer, Richmond. Owners, City of Richmond. A resolution of intention providing for the construction of lateral sewers was passed at the last meeting of the City Council. The streets affected are the intersections of Felton avenue and Wall street, Waller, Ohio, Florida and Center streets.

**RICHMOND, CONTRA COSTA CO., CAL.**—Outfall sewer. Cost not stated. Engineer, City Engineer, Chapman. Richmond. Owners, City of Richmond. City Engineer Chapman presented plans and specifications for the construction of an outfall sewer for the Bay Shore Division at the last meeting of the City Council. The plans include that district from Crest avenue to Washington avenue and south to the

bay. Action was laid over until next week.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Sewer construction, \$22,842.75. Engineer, City Engineer, Stockton. Owners, City of Stockton. Plans and specifications have been adopted by the Stockton City Council for the sewer of the Homestead, Kidd's addition, Mark's addition, the Vischer tract, Lane's addition, Sunset addition, county survey No. 3847, county survey No. 3227, part of the Thomas F. Walsh addition and part of Jackson's addition, in accordance with resolution of intention No. 534; also certain lots fronting on the north side of South street, as described in the resolution.

**SACRAMENTO, CAL.**—Street paving. Cost not stated. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. A resolution of intention providing for street work to be done in the alley between Magnolia and Madrone avenue, has been passed by the City Council. Bids on this work will soon be called for.

**AUBURN, PLACER CO., CAL.**—Tunnel construction. Cost not stated. Engineer, Engineering Dept. Pacific Gas and Electric Co., S. F. Owners Pacific Gas and Electric Co. The Pacific Gas and Electric Co. is making big preparations to resume construction work on its system in the vicinity of Auburn and Clippert Gap. The first work will be done on the partly completed tunnels which are to be about 10,000 feet in length, and of which 4,000 feet is already constructed.

**SAN LEANDRO, ALAMEDA CO., CAL.**—Street improvement. Cost not stated. Engineer, City Engineer, San Leandro. Owners, City of San Leandro. Bids will be received until November 15th for improvement of Hyde street from south line of Chumalia street to north line of Calland avenue, be curbed with redwood and sidewalked with oil macadam sidewalks, 10 feet in width. Also that a cast iron and concrete culvert be constructed in the opposite termination of Hyde street in Calland avenue.

**LOS ANGELES, CAL.**—Open cut, \$4,000,000. Engineer, City Engineer, Los Angeles. Owners, City of Los Angeles. The major project for an open cut through Bunker Hill at First and Second streets has been decided upon by the Public Works Committee of the City Council as that which the committee will act upon, according to an announcement made by Councilman John Topham, chairman of the committee. That the scheme for a small cut at First street, embracing only that street and 140 feet on each side of it, had been discarded by the Public Works Committee, and the bigger project for an 880-foot cut, extending from a line 140 feet north of First street to a line 140 feet south of Second street, had been revived by the committee was Topham's statement. The City Engineer was instructed to prepare the ordinance of intention for the open cut upon the basis of this project, and to fix the westerly boundary of the assessment district at Lakeshore avenue instead of Vermont avenue, as originally proposed.

**SEATTLE, WASH.**—Stand pipe, brick and steel, \$50,000. Engineer, City Engineer, Daniel Huntington, Seattle.

Owners, City of Seattle. The City Engineer has been instructed to prepare plans and specifications for the construction of a stand pipe on Beacon avenue near Fountain street. The structure will be about five stories high, 30 feet in diameter, of brick construction, enclosing a steel tank with a capacity of 300,000 gallons. L. B. Youngs is superintendent of the water department.

**SACRAMENTO, CAL.**—Transformer station, concrete construction, \$3,325. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. The lowest bid received for this work was from J. W. Terrell, 1111 29th street, Sacramento at \$3,325. He will probably be awarded the contract.

**RIVERSIDE, RIVERSIDE CO., CAL.**—Road construction. Cost not stated. Engineer, County Surveyor, Riverside. Owners, Riverside County. All bids received by the County Supervisors for the construction of 24 miles of desert highway from Palm Springs to Indio have been rejected and new bids will be received up to November 10th, 10 a. m. Further information may be had from the County Engineer at Riverside.

### Contracts Awarded.

**SAN FRANCISCO**—Beach esplanade, \$48,500. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Contractor, C. E. Lamburth, 118 Capp street, S. F. Contract price, \$48,500.

**SAN FRANCISCO**—Furnishing cement, \$10,613.25. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Contractors, Santa Cruz Portland Cement Co. Contract price, \$10,613.25.

**SAN JOSE, SANTA CLARA CO., CAL.**—Street improvement, \$14,340. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Contractors, Raich Improvement Co., Crocker Bldg., S. F. Contract price, \$14,340 for topeka top. Engineer's estimate, \$17,050.

**SANTA CRUZ, SANTA CRUZ CO., CAL.**—Street improvements, \$40,994.54. Engineer, City Engineer, Santa Cruz. Owners, City of Santa Cruz. Contractors, Howard Construction Co., Syndicate Bldg., Oakland. Contract price, \$40,994.54.

**HILLSBOROUGH, SAN MATEO CO., CAL.**—Road work, \$10,000. Engineer, City Engineer, Hillsborough. Owners, City of Hillsborough. Contractors, Raich Improvement Co., Crocker Bldg., S. F. Contract price, \$10,000.

**PITTSBURG, CONTRA COSTA CO., CAL.**—Sewer construction, \$1,132. Engineer, Town Engineer, Pittsburg. Owners, Town of Pittsburg. Contractor, L. X. Withers, Y. M. C. A. Bldg., Berkeley. Contract price, \$1,132.

**STEVENSON, WASH.**—Road construction, \$48,000. Engineer, County Surveyor, Stevenson. Owners, Skamania County. Contractor, H. M. Ambrose, Bates Dock Bldg., Portland. Contract price, \$48,000.

**RIVERSIDE, RIVERSIDE CO., CAL.**—Road construction, \$61,825. Engineer, County Surveyor, Riverside. Owners, Riverside County. Contractors, Conner Construction Co., Higgins Bldg., L. A. Contract price, \$61,825 for 8.9 miles.

**SAN JOSE, SANTA CLARA CO., CAL.**—Light tower steel, \$6,987. Engineer's name not given. Owners, City of San Jose. Contractors, Golden Gate Iron

Works, S. F., structural steel, \$6,057, and Lyden & Bickel, 269 Fell street, S. F., concrete work, \$942.

## STORES AND OFFICES.

**SAN FRANCISCO**—Stores, 2 story and base, brick and steel. Cost not stated. Architect, Alfred Henry Jacobs, 110 Sutter street, S. F. Owner's name withheld. Location, northwest corner of Sutter and Mason streets, covering an area of 45 by 137½ feet. Will contain one large store with mezzanine floor. Elevator service. Interior finish—pine, hardwood and ornamental plaster. Patent store fronts. Exterior faced with cement plaster. Plans being prepared.

**OAKDALE, STANISLAUS CO., CAL.**—Irrigation offices, 1 story and base, reinforced concrete, \$10,000. Architects, Stone & Wright, 24 South California street, Stockton. Owners, Oakdale Irrigation District. All bids received for this work have been rejected. The lowest figure submitted was from Johnson Bros., Tracy, at \$12,994. Plans will be revised.

**LOS ANGELES, CAL.**—Store and offices addition, 5 story and base. Class A, \$200,000. Architect, W. J. Dodd, Marsh-Strong Bldg., L. A. Owners, Pacific Mutual Life Insurance Co. Location, northwest corner of 6th and Olive streets, covering an area of 62 by 80 feet. Complete steel frame, concrete foundations and brick exterior walls. Interior finish pine, hardwood and metal trim. Steam heat, elevator service and vacuum cleaning. Metal window sash and frames and hollow tile interior partitions. Exterior faced with pressed brick trimmed with terra cotta. Special vaults and marble wainscot. Plans being completed and figures to be called for shortly.

**CALEXICO, IMPERIAL CO., CAL.**—Stores and offices, 2 story and base, reinforced concrete, \$50,000. Architect, Ralph Swearington, Calxico. Owners, Imperial Valley Hardware Co. Location, corner of Rockwood and Second streets, covering an area of 112 by 152 feet. The entire first floor will be occupied by the owners and upper floor will be arranged for offices. Interior finish pine and hardwood. Patent store fronts. Exterior faced with cement plaster. Plans are complete and figures are being taken. Both brick and reinforced concrete are being figured.

## Contracts Awarded.

**FRESNO, FRESNO CO., CAL.**—Stores and theatre, 1 story and base, brick, \$16,000. Architects, Swartz & Swartz, Rowell Bldg., Fresno. Owners, Kutner & Goldstein, Fresno. Contractor, Emitt Rigglin, 1908 Fresno street, Fresno. Contract price, \$16,000.

## MODEL PORCELAIN FACTORY IN KIANGSI.

[Consul General Edwin S. Cunningham, Hankow, China, July 26.]

The following translation from the Chinese newspaper Kuo Ming Hsin Pao has been made:

The Kiang Teh Cheng porcelain manufactory in Kiangsi was established in the time of the Ming dynasty. It was an imperial concern, which supplied all the fine porcelain for its maintenance and its products attained to a state of perfection. Later, manufactories were organized by the people and, on ac-

count of the lack of funds their products were far inferior in quality. It is said this was the only place that preserved the ancient ways of making porcelain, with beautiful ancient colors and exquisite designs, to the present time. It was largely destroyed during the late revolution, and the various samples and patterns which were kept there were all partitioned among themselves by the great men of the republican period. Recently Mr. Ko, the customs (taotai) of Kiukiang, obtained direct sanction from the President and a grant of \$20,000 gold to restart the works. This will be the national model manufactory of porcelain, and the productions will be limited to two special departments—one for the manufacture of porcelain of the highest quality to be used solely for presentation to the rulers of other powers as gifts, and one for the manufacture of articles for the supply of the market. The work will begin in the month of August.

Ching Teh Cheng is situated on the Yangtze River, near the open port of Kiukiang. Since 1396 the imperial porcelain has been produced, though the output has been small. It seems that the continuation of such a plant would be a commendable undertaking, as this is an art in which China has always excelled.

## SWISS COMMERCIAL ORGANIZATIONS.

Washington, D. C., Oct. 25, 1915. In order that American business men may be able to procure condensed, authoritative information with respect to the way in which the European nations carry on trade campaigns and organize their commercial activities at home, the Bureau of Foreign and Domestic Commerce, Department of Commerce, has been issuing pamphlet presentations of the subject, covering several of the leading European countries. Monographs on Germany, France, and the United Kingdom have already appeared, and one on Switzerland is the latest to come from the press.

This booklet, entitled "Commercial Organization in Switzerland," reviews the history of chambers of commerce and trade, explains the independent and official types of organizations and their functions, and gives particular attention to the Swiss Commercial and Industrial Association, which comprises in its membership all Swiss commercial organizations of consequence. There is a discussion of the Swiss Federal Department of Commerce and an outline of its evolution, as well as general information concerning such matters as the localization of industries, principal products, and commercial publications.

It is No. 101 in the Special Agents Series, and 5 cents will bring it from the Superintendent of Documents, Washington, D. C.

E. E. PRATT,  
Chief of Bureau of Foreign and Domestic Commerce.

## GOVERNMENT AIDS IN TESTS OF INGOTS.

Representatives of the United States Bureau of Standards have been assisting in the securing of data regarding 100 tons of Hadfield ingots acquired by an Eastern railroad, which were rolled at a near-by steelworks, and also a companion lot of Maryland ingots. The bureau, in co-operation with these concerns, is making a study of the prop-

erties of the rails rolled, and an examination of representative ingots and of blooms. Valuable information as to the relative properties of the two types of ingot is expected.

The Bureau of Standards has also continued its test ingot research, to determine to what extent the presence of blowholes should cause rejection of samples.

The bureau, in its monthly report, states that the use of the plant of a Maryland steel company for experimental purposes is of great value to the bureau, as it permits the taking of observations under actual manufacturing conditions and on a scale that would otherwise be impossible. Among the experiments conducted at the plant were those to determine whether it is possible to control the operation of the Bessemer, open-hearth, and other furnaces by aid of the pyrometer.

The Municipal Bond Market is looking up, and the Bond Buyers are looking the "Building and Engineering News" up. A proposal ad for your bonds in our columns will bring competition.

# OFFICIAL PROPOSALS.

## PROPOSALS FOR CLEARING.

**CLEARING**—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the U. S. Reclamation Service, Meadow Creek, Wash., until 2 o'clock p. m. December 1, 1915, for clearing the reservoir site at Lake Keechelus, Wash., of all timber, undergrowth and brush and for the purchase of sawmill machinery at the site. Bids are also invited on about 150,000 feet, board measure, of lumber and 200,000 feet, board measure, of logs in accordance with data contained in the specifications. For particulars address the U. S. Reclamation Service, Meadow Creek, Wash.; Denver, Colo., or Washington, D. C. A. P. DAVIS, chief engineer.

## PROPOSALS FOR BUILDING.

**BUILDING**—Department of the Interior, Office of Indian Affairs, Washington, D. C.—Sealed proposals plainly marked on the outside of the sealed envelope "Proposals for Addition to Brick Assembly Hall, Salem School, Oregon," and addressed to the Commissioner of Indian Affairs, Washington, D. C., will be received at the Indian Office until 2 o'clock p. m. of November 15, 1915, for furnishing materials and labor for the construction of an addition to the brick assembly hall, in strict accordance with the plans, specifications and instructions to bidders, which may be examined at the United States Indian warehouses at Chicago, Ill.; St. Louis, Mo., and Builders' Exchange at St. Paul, Minn., and at the office of the superintendent of the Salem Indian School, Chemawa, Ore. For further information apply to the superintendent of the Salem School, CATO SELLS, commissioner.

## PROPOSALS FOR BUILDING.

**BUILDING**—Fort Logan, Colo.—Sealed proposals in triplicate, for furnishing all materials and labor required in constructing basements under noncommissioned officers' quarters here will be received until 11 a. m. November 15, 1915. Information on application to quartermaster.

## PROPOSALS FOR CANAL SUPPLIES.

**PANAMA CIRCULAR 956**—Proposals for the purchase of Miscellaneous Iron and Steel Scrap offered For Sale by the Panama Canal and Which is no Longer Needed.—Sealed proposals will be received at the office of the general purchasing officer, the Panama Canal, Washington, D. C., until 10:30 a. m. November 22, 1915, at which time they will be opened in public, for purchasing the above-mentioned articles. Blanks and general information relating to this circular (No. 956) may be obtained from this office or the office of the assistant purchasing agent, Fort Mason, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

## PROPOSALS FOR CANAL SUPPLIES.

**PANAMA CIRCULAR 955**—Proposals for Steel Wire Rods and Bars, Galvanized Steel or Iron, Spring Steel, Steel Drill Rods, Wire Cable, Wire, Horseshoes, Nails, Bolt Spikes, Nuts, Bolts, Turnbuckles, Joining Shackles,

Missing Links, Cable Clips, Reamers, Twist Drills, Sheet Copper, Sheet Brass, Bronze Bars, Yellow Metal, Bronze Wire Cloth, Zinc Plate, Solder, Lead Pipe, Pipe Fittings, Ferrules, Foot Valves, Cocks, Kitchen Sinks, Shovels, Wheelbarrows, Harness, Basil Leather, Rubber Tires, Manila Rope, Oakum and Sandpaper.—Sealed proposals will be received at the office of the general purchasing officer, the Panama Canal, Washington, D. C., until 10:30 a. m. November 10, 1915, at which time they will be opened in public for furnishing the above mentioned articles. Blanks and general information relating to this circular (No. 955) may be obtained from this office or the office of the assistant purchasing agent, Fort Mason, San Francisco, Cal.; also from the engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

## PROPOSALS.

**OFFICE OF THE BOARD OF PUBLIC WORKS OF THE CITY AND COUNTY OF SAN FRANCISCO.**

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 24th day of November, 1915, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The construction of the Hetch-Hetchy Railroad.

Progressive payments will be made in the manner set forth in the specifications.

Said work must be done in accordance with the plans and specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within fifteen (15) calendar days and completed within three hundred (300) calendar days from the date of the contract to be made and entered into therefor.

The amount of bond for faithful performance of contract has been fixed at two hundred thousand dollars (\$200,000.00).

This attention of bidders is also called to Act 2892 of the Legislature of the State of California entitled "An act to secure the payment of claims of material men, mechanics, or laborers, employed by contractors upon State, Municipal, or other public work," which act provides that every contractor to whom is awarded a contract for the execution of public work in the State of California shall, before entering upon the performance of such work, file a good and sufficient bond in an amount not less than one-half of the total amount payable by the terms of the contract. (Approved March 27, 1897, Statutes 1897, Amended 1911, Statutes of 1911).

All proposals offered shall be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors of said City and County, for an amount not less than ten per centum of the aggregate of the proposal, and no proposal will be considered unless accompanied by such check.

Printed proposal forms will be furnished gratuitously upon application at the office of the City Engineer, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids. By order of the Board of Public Works.

E. J. CHURCHILL,  
Secretary.

## NOTICE TO HOUSE MOVERS.

FOR SALE for immediate removal, two frame buildings, No. 28 and No. 7 Bartlett Street, bet. 21st and 22nd Sts. Address Reid Bros., 104 Montgomery St., San Francisco. (\*)

## NOTICE TO CONTRACTORS.

## Bids Opened For Work At the Presidio.

**Constructing Quartermaster Receives Figures for Roads, Walks and Gutters at Letterman General Hospital.**

Bids were opened on October 26th at the office of the Constructing Quartermaster's office at Fort Mason for the improvement of roads and walks at the Letterman General Hospital in the Presidio of San Francisco. Following is a list of the bids received:

**Improvement of Roads, Walks and Gutters.**

Grace & Bernier	\$5,066.00
Frank M. Garden & Co.	3,096.00
Church & Clark	5,900.00
Fay Improvement Co.	2,697.50
City Street Improvement Co.	5,551.00
F. R. Ritchie	2,986.50
Adolph Wegner	1,938.00

A contract for the improvement of roads at Fort Miley has been awarded to Adolph Wegner for \$280.

## Magnesia Asbestos Company Sold.

**Plant Rubber and Supply Co. Purchase One of the Largest and Oldest Companies on the Coast.**

An interesting bit of trade news is given by the Plant Rubber & Supply Co. in announcing their purchase of the entire stock, brands and trade marks of the Magnesia Asbestos Supply Co.

The Magnesia Asbestos Supply Co. was one of the oldest and largest firms engaged in the asbestos business and was probably better known on the Pacific Coast than any other one firm. Charles A. Wright and Sam Gillis, both formerly connected with the Magnesia Asbestos Supply Co., and known throughout the trade, are now connected with the Plant Rubber & Supply Co., handling the same qualities of asbestos materials as in the past.

## OAKLAND AND ALAMEDA COUNTY.

**STREET IMPROVEMENT**—Cost not stated. San Leandro, Alameda Co., Cal. Engineer, City Engineer, Sah Leandro. Owners, City of San Leandro. Exterior faced with cement plaster. Plans being prepared.

**APARTMENT HOUSE**—3 story and base, frame and brick, \$18,000. Oakland, Cal. Architect, Alvin J. Stern, 306 11th street, Oakland. Owners, Sommerstrom Bros. Location, Jackson street. Will contain twelve suites of three rooms and bath. Interior finish pine and elm panels with some hardwood floors. Wall beds. Bath rooms tile. Central heating system and hot water supply. Exterior covered with rustic and brick veneer. Plans are complete and work to be done by Day Labor.

**COLLEGE BUILDING EXTERIOR FACING**—Cost as follows. Berkeley, Alameda Co., Cal. Architect John Galen Howard, 604 Mission street, S. F. Owners, Regents of the University of California. The Raymond Granite Company presented the low bid at \$225,000 for granite facing for the Benj. Ide Wheeler Hall, and H. Bosch the low bid for cement facing at \$18,750. Bids have been taken under advisement by the Regents. A complete list of the bids received will be found under the heading of Oakland and Alameda County in this issue.

**SCHOOL ADDITION**—2 story, frame, \$15,000. Oakland, Cal. Architect, J. J. Donovan, Balziel Bldg., Oakland. Owners, City of Oakland. Plans are being prepared for a two story frame addition to the Fremont School. Interior will be finished in pine with maple floors in the class rooms. The steam heating system will be extended into the new portion of the building. Exterior will be faced with cement plaster. Plans are being prepared.

## Bids Received For Two U. of C. Jobs.

Many Bids Opened for Work at University Hospital and for Exterior Facing on Benj. Ide Wheeler Hall.

Bids were opened at Monday's meeting of the Regents of the University of California for work at the University Hospital, Affiliated Colleges, 4th avenue and Parnassus, San Francisco,

and for the exterior facing of the Benj. Ide Wheeler Hall on the University Campus at Berkeley. Plans for the former were prepared by Architect Lewis P. Hobart and for the latter by Architect John Galen Howard.

No awards have been made. Following is a complete list of bids as opened: **Exterior Facing, Benjamin Ide Wheeler Hall.**

Siebert Co. submitted the lowest combined bid for the heating, ventilating and power plant at \$59,552. Several other firms also submitted combined bids on these branches of the work, but none were near enough to warrant consideration.

## SAN JOSE AND THE SANTA CLARA VALLEY

**CULVERTS**—Reinforced concrete. Cost not stated. Redwood City, San Mateo Co., Cal. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. The Supervisors have ordered the County Surveyor to prepare plans and specifications, secure separate bids and award the contract for building a culvert on the county road near Beresford. Further information may be had from the County Engineer at Redwood City.

**CULVERTS**—Reinforced concrete. Cost not stated. Redwood City, San Mateo Co., Cal. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. At the last meeting of the County Supervisors, the Clerk was authorized to advertise for bids for building certain culverts along the Middlefield road in the Third Township. Further information may be had from the County Engineer.

**STREET IMPROVEMENT**—\$250,000. Easton, San Mateo Co., Cal. Engineer, City Engineer, Easton. Owners, City of Easton. Trustee Edward Chevalier of Burlingame states that preparation is under way for 10 miles of new paved streets in the Easton section of that city. The property owners are signing petitions to the Trustees to order the work on practically every street in the Easton additions, including Burlingame Grove.

**STREET IMPROVEMENT**—Cost not stated. San Jose, Santa Clara Co., Cal. Engineer, City Engineer, San Jose. Owners, City of San Jose. At a recent meeting of the Council resolutions of intention for the improvement of the roadway of a portion of William street near Third street, another near Sixth street, and also a portion of Eighth street near San Carlos were given a second reading and adopted. Bids on this work will soon be called for.

**CRUSHED ROCK**—Cost not stated. San Jose, Santa Clara Co., Cal. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. The County Supervisors have directed the Clerk of the Board to advertise for bids for Saratoga crushed rock to be delivered at the following places: Kennedy road, 1,650 cubic yards or more; Roberts road, 750 cubic yards; San Tomas Aquino, 1,440 cubic yards; Bryant street, 1,082 cubic yards; California avenue, 455 cubic yards; Ashby avenue, 343 cubic yards.

**CITY HALL COMPLETION**—Frame construction. Cost not stated. Santa

Clara, Santa Clara Co., Cal. Architect, William Binder, Rea Bldg., San Jose. Owners, Town of Santa Clara. The Town Trustees at their last meeting considered the plans and specifications of Architect Willis Binder for the completion of the uncompleted section of the town hall. Action was laid over until next meeting. H. R. Roth is a member of the Board of Trustees.

**STREET RAILROAD EXTENSION**—Cost not stated. San Jose, Santa Clara Co., Cal. Engineer, Engineering Dept., San Jose Railroads, San Jose. Owners, San Jose Railroads Co. Application has been made to the County Supervisors by the San Jose Railroads for permission to construct and maintain for a period of 12 years a single or double track standard gauge electric railroad, together with the necessary poles, wires, appliances and appurtenances, upon, along and over the following route and streets in the County of Santa Clara, to wit: Upoon Alum Rock avenue from a point where said Alum Rock avenue is intersected by the easterly or northeasterly boundary line or limits of the city of San Jose; thence along said Alum Rock avenue in an easterly or northeasterly direction to a point thereon where said Alum Rock avenue would be intersected by the westerly or southwesterly line of Kirk avenue prolonged southerly and southeasterly. F. E. Chapin is general manager of the San Jose Railroads.

#### Contracts Awarded.

**BRIDGE**—Reinforced concrete. \$2,295. San Jose, Santa Clara Co., Cal. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Contractor, F. P. Moore, Monterey. Contract price, \$2,295.

**STREET IMPROVEMENT**—\$14,340. San Jose, Santa Clara Co., Cal. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Contractors, Raich Improvement Co., Crocker Bldg., S. F. Contract price, \$14,340 for Topoka top. Engineer's estimate, \$17,650.

**STREET IMPROVEMENTS**—\$10,991.54. Santa Cruz, Santa Cruz Co., Cal. Engineer, City Engineer, Santa Cruz. Owners, City of Santa Cruz. Contractors, Howard Construction Co., Syndicate Bldg., Oakland. Contract price, \$10,991.54.

**ROAD WORK**—\$10,000. Hillsborough, San Mateo Co., Cal. Engineer, City Engineer, Hillsborough. Owners, City of Hillsborough. Contractors, Raich Improvement Co., Crocker Bldg., S. F. Contract price, \$10,000.

**Wybro**

Reg. U. S. Pat. Office  
as good as they are  
famous.

The Panels that are

**White Brothers**

5th and Brannan Streets

San Francisco

**Wybro Panels combine Service & Quality with Price.**

It is not alone the "price" that counts in buying panels. The quality is of more than passing importance. WYBRO PANELS combine quality with service and price. Quality is first in Wybro Panels—the service they give is unsurpassed, and the price is **just right**—not high, nor low, but just the right price for the right panel.

200 varieties—price list free

**LIGHT TOWER STEEL**—\$6,087. San Jose, Santa Clara Co., Cal. Engineer's name not given. Owners, City of San Jose. Contractors, Golden Gate Iron Works, S. F., structural steel, \$6,087, and Lyden & Bickel, 269 Fell street, S. F., concrete work, \$342.

### MARIN, CONTRA COSTA AND SONOMA COUNTIES

**CULVERT**—Reinforced concrete. Cost not stated. Petaluma, Sonoma Co., Cal. Engineer, Engineering Dept. Northwestern Pacific Railroad, S. F. Owners, C. C. Winn and Mr. Neff. According to information obtained here Superintendent Neff and C. C. Winn of the Northwestern Pacific Railroad, accompanied by members of the City Council of Petaluma, visited their land in East Petaluma where the water how has caused considerable damage during the winter. After many suggestions it was decided to construct a culvert at the site. Plans for the culvert will be prepared in the offices of the railroad company.

**IRRIGATION PROJECT**—Cost not stated. Suisun, Solano Co., Cal. Engineer not selected. Owners, Glide Estate, William Denman, et al. According to word received a movement is under way to form an irrigation system, covering a large area of land situated between Suisun and Rio Vista, the project being fathered by some of the most extensive land owners within the bounds of the district, among whom are Mr. E. E. Brownell, William Denman and the Glide Estate, who own many hundreds of acres. Probably three-fourths of the land owners within the district have already signed a contract authorizing a survey to ascertain the probable cost of obtaining water from the Sacramento River at a point above Rio Vista, the course of a canal, as now figured on, being some distance north of the ditch made by the defunct Solano Irrigated Farms concern. The scheme as outlined for the new project is for the landowners to unite and form a co-operative organization, contributing toward the expense of building the system so much per acre. The preliminary proceedings of the proposed project have been worked up quietly, and nothing has yet been done except to make provisions for a preliminary survey, but those interested in promoting the scheme express confidence that something definite will be accomplished if a sufficient number of landowners will co-operate in the enterprise.

**SEWER CONSTRUCTION**—\$11,458.70. Sausalito, Marin Co., Cal. Engineer, City Engineer, Sausalito. Owners, City of Sausalito. At the last meeting of the City Trustees one bid was received for doing the sewer work in Sewer District F. T. J. Tobin, 733 Elbert street, Oakland, bid \$11,458.70. Action on the bid was laid over until the next meeting.

**SEWER CONSTRUCTION**—Cost not stated. Richmond, Contra Costa Co., Cal. Engineer, City Engineer, Richmond. Owners, City of Richmond. A resolution of intention providing for the construction of lateral sewers was passed at the last meeting of the City Council. The streets affected are the intersections of Felton avenue and

Wall street, Waller, Ohio, Florida and Center streets.

**OUTFALL SEWER**—Cost not stated. Richmond, Contra Costa County, Cal. Engineer, City Engineer Chapman. Owners, City of Richmond. City Engineer Chapman presented plans and specifications for the construction of an outfall sewer for the Bay Shore Division at the last meeting of the City Council. The plans include that district from Crest avenue to Washington avenue and south to the bay. Action was laid over until next week.

**IRRIGATION DITCH**—Cost not stated. Byron, Contra Costa Co., Cal. Engineer's name not given. Owners, Byron-Bethany Irrigation Co. Excavating bids for digging a ditch or canal from Indian Slough to the Bruns Hill, a distance of 6,000 feet, were opened by the directors of the Byron-Bethany Irrigation Company last week. All of them were rejected as being too high. There were four bidders. The lowest bid was that of A. B. Munson & Son of Stockton, for 17½¢ per cubic yard. The directors believe the work can be done for considerably less, as they have thoroughly examined the nature of the earth to be removed. The work will be done by Day Labor according to the directors.

**SPUR TRACK CONSTRUCTION**—Cost not stated. Richmond, Contra Costa Co., Cal. Engineering Dept. Santa Fe Co., L. A. Owners, Santa Fe Railroad Co. The City Council granted permission to the Atchison, Topeka and Santa Fe Railway Company to construct a spur track from its main line south of the municipal tunnel to the plant of the Richmond Brick Company. Work will be started in about two weeks.

**MUNICIPAL RAILROAD**—Cost not stated. Richmond, Contra Costa Co., Cal. Engineer, City Engineer, Richmond. Owners, City of Richmond. Preparations are being made by the City Council to operate a municipal car line through the tunnel at Ashland avenue.

### Contracts Awarded.

**SEWER CONSTRUCTION**—\$1,132. Pittsburg, Contra Costa Co., Cal. Engineer, Town Engineer, Pittsburg. Owners, Town of Pittsburg. Contractor, L. N. Withers, Y. M. C. A. Bldg., Berkeley. Contract price, \$1,132.

### FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA

**IRRIGATION OFFICES**—1 story and base, reinforced concrete, \$10,000. Oakdale, Stanislaus Co., Cal. Architects, Stone & Wright, 24 South California street, Stockton. Owners, Oakdale Irrigation District. All bids received for this work have been rejected. The lowest figure submitted was from Johnson Bros., Tracy, at \$12,994. Plans will be revised.

**PIPE LINE CONSTRUCTION**—Cost not stated. McKittrick, Kern Co., Cal. Engineer's name not given. Owners, Kern Trading and Oil Co., Bakersfield. An immense pipe project will soon be started here by the Kern Trading and Oil Co., who will lay a six and five-eighths inch pipe line from the Maricopa camp to the McKittrick field, for the purpose of conveying gas from the local properties to the McKittrick

leases of the company, furnishing fuel for steam and gas power plants to run the several leases in that field. It will be constructed along different lines than any other in the field. Instead of regular screw joints and couplings, the pipe will be welded at the joints by oxy-acetylene process, making one solid line of the many joints of pipe. An extra heavy grade of pipe will be used, weighing 12.9 pounds to the foot. The total length of the line when it is constructed will be 18 miles.

**PIPE LINE CONSTRUCTION**—Cost not stated. McKittrick, Kern Co., Cal. Engineer, Engineering Dept. Shell Oil Co., 343 Sansome street, S. F. Owners, Shell Oil Co. The announcement that the Kern Trading and Oil Company and the General Petroleum Company, respectively, each will build a pipe line from the Midway and Sunset districts, traversing the vicinity of McKittrick en route, has revived the rumor circulated extensively some time ago that the Royal Dutch Shell or Shell Company of California intends to construct a pipe line from Coalinga to its tank farm, four miles in a southeasterly direction from McKittrick. Further information may be had from the company's engineer.

**JAIL**—1 story and base, reinforced concrete. Cost not stated. Patterson, Stanislaus Co., Cal. Architect, none. Owners, Town of Patterson. The proposed jail and court room building will be under construction shortly, the preliminary plans for the building have been completed by Supervisor A. E. Clary. The sketches provide for a building about 22x53 feet in size, the court room being 20x20 feet. Lavatories, steel cages, baths and heating system is included in the work.

**MUNICIPAL AUDITORIUM**—2 story and base, brick, \$35,000. Visalia, Tulare Co., Cal. Architects, Coates & Traver, Rowell Bldg., Fresno. Owners, City of Visalia. Will contain large auditorium, stage, maple floor. Central heating system. Exterior faced with pressed brick. Bids being taken.

**SCHOOL**—1 story, frame and plaster, \$2,000. Rosamond, Kern Co., Cal. Architect, J. M. Saffell, New Fish Bldg., Bakersfield. Owners, Rosamond School District. The building will contain one class room with south and west porches, office and library. Interior finish pine and redwood. Hylo blackboards. Exterior rustic and cement plaster. Plans complete and figures to be called for at once.

**SCHOOL**—1 and 2 story, brick, \$29,780. Woodlake, Tulare Co., Cal. Architect, O. L. Clark, Brower Bldg., Bakersfield. Owners, Woodlake School District. Philbrick & Colin of Modesto submitted the low figure for the construction of this building at \$29,780. D. B. Day of Woodlake was second at \$30,250. All bids were taken under advisement, the local School Board wishing to favor Day if possible.

**IRRIGATION PROJECT**—\$1,750,000. Visalia, Tulare Co., Cal. Engineer's name not given. Owners, Lindsay-Strathmore Irrigation District. Members of the County Supervisors have formally approved the engineering plans for the Lindsay-Strathmore Irrigation District and passed an official order for an election to vote bonds to finance the construction. Further in-

formation will be given of this work at a later date.

### Contracts Awarded.

**STORES AND THEATRE**—1 story and base, brick, \$16,000. Fresno, Fresno Co., Cal. Architects, Swartz & Swartz, Rowell Bldg., Fresno. Owners, Kutner & Goldstein, Fresno. Contractor, Enlitt Rigglin, 1905 Fresno street, Fresno. Contract price, \$16,000.

## SACRAMENTO, STOCKTON AND NORTHERN CALIFORNIA.

**BRIDGE**—Steel and concrete. Cost not stated. Bridgeport, Mono Co., Cal. Engineer, County Surveyor, Bridgeport. Owners, Mono County. Bids will be opened on January 3rd for the construction of a pony truss steel bridge with reinforced concrete abutments, to be built across the East Walker River, about six miles north of Bridgeport. Span, 50 feet, 3 panel, 16-foot roadbed.

**BY-PASS**—Steel and concrete. Cost not stated. Sacramento, Cal. Engineer, State Highway Commission Sacramento. Owners, State of California. At the last meeting of the State Reclamation Board the State Highway Commission advised the Board that it had not yet been able to close a favorable contract for the construction of a bascule bridge over the borrow-pit on the east side of Yolo by-pass adjoining the levee of West Sacramento. This bridge was to serve as a part of the 14,000-foot concrete highway crossing the by-pass, and was to permit the passage of dredges necessary for protective work in connection with the flood control project. A temporary structure around this crossing has been built, so that on completion of the balance of the highway traffic may be accommodated. It is hoped the bascule can be constructed within the next few months.

**IRRIGATION PROJECT**—Cost not stated. Oroville, Butte Co., Cal. Engineer not selected. Owners, Thermalito Irrigation District. The committee chosen by property owners of Thermalito to formulate plans for an irrigation district has practically abandoned the project of securing water from the Oro system. The committee favors the project of procuring a water supply from the west branch of the Feather River, the water to be diverted at Cape Horn. It is estimated that a thousand inches of water will be available at this point. Oscar Warner, chairman of the committee, has asked the Chamber of Commerce of Oroville to aid in financing the preliminary campaign in behalf of the new plan. It is planned to irrigate 5,000 acres.

**IRRIGATION CANALS**—Cost not stated. Oroville, Butte Co., Cal. Engineer's name not given. Owners, Dry and Butte Creek Irrigation Districts. The Great Western Canal Company has begun work on the second and third units of the Western Canal. Teams, scrapers and a steam shovel are at work west of Higgs, the second unit extending from Dry Creek to Butte Creek. Work is also under way on the third unit, which will bring water to the 7,000 acre tract of rice land west of Nelson. The contract specifies that work must be completed by April 1st.

### LEVEE CONSTRUCTION AND RE-

**PAIRS**—\$20,000. Meridian, Sutter Co., Cal. Engineer, State Engineer McClure, Sacramento. Owners, State of California and Levee District No. 70. The State Engineering Department will soon establish a repair gang at Meridian for the purpose of strengthening the west levee of District 70. The levee is declared to be weak in places and liable to damage, unless it is strengthened. The work will be started in the near future, and by the time the floods come the levee will be in good condition.

**APARTMENT HOUSE**—3 story and base, brick and frame, \$10,000. Sacramento, Cal. Architect, none. Owner, Frank Mead, Sutterville road and Mead avenue, Sacramento. Location, 624 M street. Will contain 12 suites of two and three rooms. Interior finish pine. Wall beds. Hot water system. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**SEWER CONSTRUCTION**—\$32,843.75. Stockton, San Joaquin Co., Cal. Engineer, City Engineer, Stockton. Owners, City of Stockton. Plans and specifications have been adopted by the Stockton City Council for the sewerage of the Homestead, Kidd's addition, Mark's addition, the Vischer tract, Lane's addition, Sunset addition, county survey No. 2847, county survey No. 3227, part of the Thomas F. Walsh addition and part of Jackson's addition, in accordance with resolution of intention No. 534, also certain lots fronting on the north side of South street, as described in the resolution.

**STREET PAVING**—Cost not stated. Sacramento, Cal. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. A resolution of intention providing for street work to be done in the alley between Magnolia and Madrone avenue has been passed by the City Council. Bids on this work will soon be called for.

**TUNNEL CONSTRUCTION**—Cost not stated. Auburn, Placer Co., Cal. Engineer, Engineering Dept. Pacific Gas and Electric Co., S. F. Owners, Pacific Gas and Electric Co. The Pacific Gas and Electric Co. is making big preparations to resume construction work on its system in the vicinity of Auburn and Clipper Gap. The first work will be done on the partly completed tunnels, which are to be about 10,000 feet in length and of which 4,000 feet is already constructed.

**RESIDENCE**—1 story and base, frame, \$3,500. Chico, Butte Co., Cal. Architect, none. Owner, George H. Taber, Chico. Location, south Chestnut and Salem streets. Will contain six rooms, bath and sleeping porch. Interior finish pine and white enamel. Hardwood floors. Furnace heat and open fire place. Mantel tile or brick. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**IRRIGATION PROJECT**—Cost not stated. Doyle, Lassen Co., Cal. Engineer, William L. Wales, Woodland. Owners, Southern Lassen Irrigation District. The Southern Lassen Irrigation District has obtained the services of Attorney L. L. Dennett of Modesto. William L. Wales of Woodland is the engineer. A majority of land owners have signed the petition and the Su-

perior court has granted a writ of mandamus, at which time the Board will declare the district and call an election. The district comprises 21,500 acres in the southern end of Honey Valley. Bonds to finance the construction will be voted as soon as possible.

**POST OFFICE**—2 story and base, brick and steel, \$75,000. Willows, Glenn Co., Cal. Architects, Bliss & Faville, Balboa Bldg., S. F. Owners, United States Government. Official approval has been given preliminary plans for this building and the architects are now at work on the detail drawings. Bids will be called for shortly.

**SCHOOL**—2 story and base, reinforced concrete, \$90,000. Red Bluff, Tehama Co., Cal. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Red Bluff High School District. Bonds have recently been sold and working drawings are complete and construction of the building will be started at once. The building will contain twelve class rooms, auditorium, office and laboratories. Interior finish pine with maple floors. Steam heat, coal burning furnace, program clocks and vacuum cleaning. Exterior faced with pressed brick or cement plaster. Bids will be called for at once.

### Contracts Awarded.

**TRANSFORMER STATION**—Concrete construction, \$3,325. Sacramento, Cal. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. The lowest bid received for this work was from J. W. Terrell, 1111 29th street, Sacramento, at \$3,325. He will probably be awarded the contract.

**SCHOOL ADDITION**—1 story frame, \$4,705. Weed, Siskiyou Co., Cal. Architect's name not given. Owners, Town of Weed. Contractor, O. B. Cooper, Weed. Contract price, \$4,705.

## LOS ANGELES & SOUTHERN CALIFORNIA.

**CULVERTS AND GRADING**—Cost not stated. Ventura, Ventura Co., Cal. Engineer, County Surveyor, Ventura. Owners, Ventura County. Bids will be opened on November 6th for culverts and grading of the Santa Ana road. The road is located along the west side of the Ventura River, beginning at a point 3,700 feet north of Foster Park and extending northerly a distance of one and one-half miles. The grading consists of side hill work in earth and shale. Approximate quantities are as follows: Item 1, 82,250 cubic yards excavation unclassified; 2, 300 linear feet 18-inch corrugated iron pipe; 3, 134 linear feet of 24-inch corrugated iron pipe; 4, 238 linear feet of 30-inch corrugated iron pipe; 5, 130 linear feet of 42-inch corrugated iron pipe; 6, 64 linear feet of 18-inch corrugated iron pipe; 7, 85 cubic yards class B concrete; 8, 3,000 pounds reinforcing steel.

**BRIDGE**—Reinforced concrete and steel. Cost not stated. Riverside, Riverside Co., Cal. Engineer, County Surveyor, Riverside. Owners, Riverside County. Bids will be received on November 10th for the construction of a bridge across the Santa Ana River on Hammer avenue in the First Road District. Plans can be secured from the County Surveyor.

**BRIDGES**—Reinforced concrete. Cost as follows. Santa Barbara, Santa Bar-

bara Co., Cal. Engineer. Flaherty, Santa Barbara. Owners, Santa Barbara County. Contractors, Security Construction Co., 38th and Alameda streets, L. A., Dos Puenlos bridge, \$9,720. Boardman Construction Co., Story Bldg., L. A., Eagle Canyon Creek bridge, \$10,361.

**RECLAMATION WORK**—Cost not stated. San Luis Obispo, San Luis Obispo Co., Cal. Engineer, County Surveyor, San Luis Obispo. Owners, San Luis Obispo County. The Board of Supervisors at a recent meeting in discussing the construction of the pile and barb wire jetty for reclamation work at Santa Maria River, allowed John Grace, the contractor who was awarded the contract, to withdraw his bid. What action will be taken has not been mentioned.

**OPEN CUT**—\$1,000,000. Los Angeles, Cal. Engineer, City Engineer, Los Angeles. Owners, City of Los Angeles. The major project for an open cut through Bunker Hill at First and Second streets has been decided upon by the Public Works Committee of the City Council as that which the committee will act upon, according to an announcement made by Councilman John Topham, chairman of the committee. That the scheme for a small cut at First street, embracing only that street and 110 feet on each side of it, had been discarded by the Public Works Committee, and the bigger project for an 880-foot cut, extending from a line 140 feet north of First street to a line 140 feet south of Second street, had been revived by the committee was Topham's statement. The City Engineer was instructed to prepare the ordinance of intention for the open cut upon the basis of this project, and to fix the westerly boundary of the assessment district at Lakeshore avenue, instead of Vermont avenue, as originally proposed.

**WAREHOUSE**—1 story, reinforced concrete, \$117,138.75. San Pedro, Los Angeles Co., Cal. Engineer, Los Angeles Harbor Commission, L. A. Owners, Port of Los Angeles. The Merchants' Realty and Investment Co., Van Nuys Bldg., L. A., was the lowest bidder at \$117,138.75 for the erection of the seven story and basement reinforced concrete warehouse to be erected at San Pedro by the Harbor Commission. The P. O. Engstrom Co., 5th and Seaton streets, L. A., was the next lowest bidder at \$118,465. The bids were referred to the harbor engineer with instruction to present a report containing an estimate of the cost of the work if done by force account.

**LIBRARY**—1 story and base, brick, \$20,000. Los Angeles, Cal. Architect, Lester Hibbard, Marsh-Strong Bldg., L. A. Owners, City of Los Angeles. Location, corner of Workman street and Avenue 26. Will contain two reading rooms, office and stack rooms. Interior finish pine and hardwood with maple floors. Metal book stacks. Steam heat, oil burning furnace. Exterior faced with cement plaster and pressed brick. Plans being revised and bids to be called for shortly.

**ROAD CONSTRUCTION**—Cost not stated. Riverside, Riverside Co., Cal. Engineer, County Surveyor, Riverside.

Owners, Riverside County. All bids received by the County Supervisors for the construction of 21 miles of desert highway from Palm Springs to Indio have been rejected and new bids will be received up to November 10th, 10 a. m. Further information may be had from the County Engineer at Riverside.

**STORES AND OFFICES**—2 story and 5 story and base, Class A, \$200,000. Los Angeles, Cal. Architect, W. J. Lodd, Marsh-Strong Bldg., L. A. Owners, Pacific Mutual Life Insurance Co. Location, northwest corner of 6th and Olive streets, covering an area of 62 by 80 feet. Complete steel frame, concrete foundations and brick exterior walls. Interior finish pine, hardwood and metal trim. Steam heat, elevator service and vacuum cleaning. Metal window sash and frames and hollow tile interior partitions. Exterior faced with pressed brick trimmed with terracotta. Special vaults and marble wainscot. Plans being completed and figures to be called for shortly.

**STORES AND OFFICES**—p story and base, reinforced concrete, \$50,000. Calexico, Imperial Co., Cal. Architect, Ralph Swearington, Calexico. Owners, Imperial Valley Hardware Co. Location, corner of Rockwood and Second streets, covering an area of 112 by 152 feet. The entire first floor will be occupied by the owners and upper floor will be arranged for offices. Interior finish pine and hardwood. Patent store fronts. Exterior faced with cement plaster. Plans are complete and figures are being taken. Both brick and reinforced concrete are being figured.

#### Contracts Awarded.

**RESIDENCE**—2 story and base, frame, \$15,000. Beverly Hills, Los Angeles Co., Cal. Architect's name not given. Owner, W. C. Campbell, Rodeo Land and Water Co., L. A. Contractor, Frank E. Hartigan, Story Bldg., L. A. Contract price, \$15,000.

**APARTMENT HOUSE**—3 story and base, frame, \$28,000. Pasadena, Los Angeles Co., Cal. Architect, Albert Reed, Long Beach. Owner, Mrs. F. C. Pratt. Contractors, J. H. Woodworth & Son, Chamber of Commerce Bldg., Pasadena. Contract price, \$28,000.

**FACTORY**—1 and 2 story, steel and concrete. Cost not stated. San Pedro, Los Angeles Co., Cal. Engineer, Charles P. Grimwood. Owners, American Tuna Co., Pacific Electric Bldg., L. A. Contractors, F. O. Engstrom Co., 5th and Seaton streets, L. A. Contract awarded on the percentage basis. First unit only included, complete plant to cost \$650,000.

**PACKING PLANT**—1 story and base, reinforced concrete, \$25,000. North Pomona, Los Angeles Co., Cal. Architect, none. Owners, Indian Citrus Association. Contractor, D. C. Crookshank, Pomona. Contract price, \$25,000.

**PACKING PLANT**—1 story and base, Class A construction, \$56,431. Whittier, Los Angeles Co., Cal. Architects, A. W. Rea and C. E. Garstang, Black Bldg., L. A. Owners, Murphy Oil Co. Contractor, E. M. Wheatland, Whittier. Contract price, \$56,431.

**ROAD CONSTRUCTION**—\$61,825. Riverside, Riverside Co., Cal. Engineer, County Surveyor, Riverside. Owners, Riverside County. Contractors, Conner Construction Co., Higgins Bldg., L. A. Contract price, \$61,825 for 8.9 miles.

#### PORTLAND AND OREGON

**GARAGE**—2 story and base, reinforced concrete, \$25,000. Portland, Ore. Architects, Sutton & Whitney, Lewis Bldg., Portland. Owners, Kissel Kar Automobile Salesroom Co. Location, Broadway and Davis streets, covering an area of 100 feet square. Construction fireproof. Interior finish pine, hardwood and ornamental plaster in salesrooms. Elevator service. Exterior faced with cement plaster. Plans complete and figures being taken.

**SCHOOL**—2 story and base, hollow tile, \$30,000. Woodburn, Ore. Architect, Aaron H. Gould, Henry Bldg., Portland. Owners, City of Woodburn. Will contain twelve class rooms, auditorium and offices. Interior finish pine with maple floors. Central heating system, program clocks and vacuum cleaning. Exterior faced with cement plaster. Plans being prepared.

**SCHOOL ADDITION**—2 story, brick, \$11,000. Salem, Ore. Architect, Dept. of Indian Affairs, Washington, D. C. Owners, United States Government. Location, Salem Indian School. Plans are complete and figures are being taken for an addition to the Salem Indian School. The work was figured sometime ago and included additions to the steam heating system. All bids were rejected. Bids will be opened on November 15th. Plans can be secured from the superintendent or from the Department of Indian Affairs at Washington, D. C. An official proposal appears in another column of this issue.

#### Contracts Awarded.

**WAREHOUSE**—2 story and base, hollow tile, \$25,000. Eugene, Ore. Architect, J. R. Ford, Eugene. Owners, Allen & Lewis, Portland. Contractors, Applewhite & Ford, Eugene. Contract price, \$25,000.

#### SEATTLE AND WASHINGTON

**BRIDGE**—Steel and reinforced concrete, \$300,000. Seattle, Wash. Engineer, City Engineer Rapp, Seattle. Owners, City of Seattle. City Bridge Engineer Rapp has the plans for a proposed city bridge over the Lake Washington Canal at 10th avenue N. E. practically complete. Specifications, etc., will probably be in shape to permit the calling of bids the early part of this month. The bridge will have a central span of 216 feet, will be 80 feet wide of the double leaf bascule type, similar to the Fremont bridge. Temporary wooden approaches 3,000 feet long are called for. The sub-structure will cost \$125,000 and superstructure about \$365,000.

**APARTMENT HOUSE**—5 story and base, brick and steel, \$75,000. Seattle, Wash. Architects, Blackwell & Baker, Northern Bank Bldg., Seattle. Owners, Gardner & Lessey. Location, 4th near Virginia street, covering an area of 60 by 108 feet. Will contain a total

of 126 suites of two and three rooms. Interior finish pine and hardwood. Wall beds and tile baths. Steam heat, elevator service, hot water system and oil burning equipment. Exterior faced with pressed brick and terra cotta. Plans complete and figures to be called for at once.

**STAND PIPE**—Brick and steel, \$50,000. Seattle, Wash. Engineer, City Engineer, City Engineer Daniel Huntington, Seattle. Owners, City of Seattle. The City Engineer has been instructed to prepare plans and specifications for the construction of a stand pipe on Beacon avenue near Fountain street. The structure will be about five stories high, 30 feet in diameter, of brick construction, enclosing a steel tank with a capacity of 300,000 gallons. L. B. Youngs is superintendent of the water department.

**Contracts Awarded.**  
**ROAD CONSTRUCTION** — \$48,000. Stevenson, Wash. Engineer, County Surveyor, Stevenson. Owners, Skamania County. Contractor, H. M. Ambrose, Bates Dock Bldg., Portland. Contract price, \$48,000.

**NAMUR STADIUM.**

A fine specimen of concrete construction is the new stadium at Namur, in Belgium, which was laid out on the summit of the citadel, where it enjoyed a wide view. The grounds laid out for the games are about 1,000 feet long and 500 feet wide, and the stadium lies at one end of the grounds and consists of a series of reinforced concrete steps for seats, of 350 feet length. In the rear is a loggia construction with columns, which have tribunes on one side, while the other side serves for the scene of an open air theatre. In the middle of the loggia is the royal box. A good part of the structure is built on the Hennebique reinforced concrete system, and other parts in concrete or in stone.

**BRIDGE BIDS WANTED.**

**BRIDGEPORT, Mono Co., Cal.**—Sealed bids will be received by the Clerk of the Board of Supervisors of Mono County, until 12 noon, January 3, 1916, for the construction of a pony truss steel bridge with reinforced concrete abutments, to be built across the East Walker River, about six miles north of Bridgeport. The bridge will have a 50 foot span, 2 panels with a 16 foot roadbed. A certified check of ten per cent must accompany each bid. Further information and plans may be had from the Clerk of the Supervisors at Bridgeport.

Catalogues sent by American exporters to the consulate at Karachi, India, are reported to have been received with circular letters folded and placed between the leaves. Consul James Oliver Laing states that the letters often stick between the leaves in the hot, moist climate of the Arabian Sea district, and are sometimes not found when the catalogues are filed.

## BUILDING CONTRACTS.

### SAN MATEO COUNTY.

RESIDENCE AND GARAGE  
GLENWOOD AVE., Menlo Park. Ex-  
cavation, foundation, fireplace, brick  
work, flues, carpenter work, hard-  
ware, window shades, tin and sheet  
metal work, plumbing, glass, etc.,  
garage, chicken enclosures, etc., for  
one-story residence and garage.  
Owner.....Henry Meyer, San Fran-  
cisco.

Architect...Milton Lichtenstein, 111  
Ellis, San Francisco.  
Contractor...Weeden Bros., Menlo Park.  
Filed Oct. 21, '15. Dated Oct. 19, '15.  
When framed .....\$2000.  
When plastered .....2500  
When completed .....2630  
Usual 35 days.....2330  
TOTAL COST, \$9510

Bond, \$5000. Surety, The Aetna Ac-  
cident & Liability Co. Limit, forfeit,  
none. Plans and specifications filed.

#### ADDITIONS

ATHERTON. All work for additions  
and alterations to residence.  
Owner.....Dr. James G. Sharp, Prem.  
Architect...W. Garden Mitchell and  
Charles Ed Hodges, Bank-  
ers' Invst. Bldg., S. F.  
Contractor...Currie & Currie, 698 32rd  
Ave., San Francisco.

Filed Oct. 23, '15. Dated Oct. 19, '15.  
Frame up .....\$1377  
Rough plastered .....1377  
When completed .....1377  
Usual 35 days.....1377  
TOTAL COST, \$5508

Bond, \$2754. Surety, Globe Indemnity  
Co. of New York. Limit, 90 days. For-  
feit, \$5 per day. Plans and specifi-  
cations filed.

#### FRAME RESIDENCE & GARAGE

LOTS 18 AND 19 SUB NO. 1, San Mateo  
Park, San Mateo. All work for two-  
story and basement frame residence  
and garage.  
Owner.....F. M. Doak, San Mateo Pk.  
Architect...Will H. Toepke, 46 Kearny  
St., San Francisco.

THE WHOLE WORLD AWAITS THE ADVENT OF A PRACTICAL GAS HEATING DEVICE

WITH OUR UNIT PLANT FURNACES HEATING WITH CLEAN GAS IS AS PRACTICAL AND ECONOMICAL AS WITH DIRTY, DUSTY, SMOKY COAL OR OIL

**FLOOR FURNACE STYLE B**  
Size 14½ in. square by 2 ft. high  
Has 3-in. Fresh Air Intake with Damper.  
Has 3-in. Outlet Vent  
Fits in space between floor joists  
Hangs from Register which lays flush with floor.

**Style**

- A. Floor Furnace with fresh air intake on side. For use in buildings having sufficient fresh air circulation under same. For artificial gas only.
- B. Floor Furnace with fresh air intake at bottom. For use in buildings where it is desirable to obtain air directly from outside of cellar or basement. For artificial gas only.
- NOTE—Style A and B are built alike except for position of fresh air intake.
- C. Wall Furnace with fresh air intake at bottom. For artificial gas only.
- D. Wall Furnace with fresh air intake at back. For artificial gas only.
- NOTE—Style C and D are built alike except for position of fresh air intake.

Prices and Information on Natural Gas Furnaces Furnished on Application.

**Unit Plant Hot Blast Furnace**

**Delivers the Heat**

**A Complete Answer to the Heating Question.**

- Instantaneous**—Furnishes an instantaneous and continuous supply of
- Sanitary**—fresh warm air free from gas fumes, odors, smoke or dust.
- Hygienic**—Maintains an even temperature necessary to health and comfort.
- Scientific**—Built like a real hot air furnace reduced in size.
- Convenient**—Operated from inside of room, saving many steps to cellar.
- Simple**—Any child 10 years of age can operate, turn the key and apply match.
- Economical**—Wall furnace burns 10 cubic feet and floor furnace 20 cubic feet of gas per hour.
- Efficient**—Each furnace will heat from 2 to 5 rooms or from 3,000 to 9,000 cubic feet of space.
- Fireproof**—Has four thicknesses of metal and three air spaces of one inch each between fire and wood; fire is 20 inches from floor.
- Up to Date**—Uses exclusively the Johnson Hot Blast Burner, recognized as the most efficient ever constructed.
- Durable**—Is made from best grade of metal to be obtained.
- Finish**—Register electro plated Flemish Brass. The finish that lasts.
- Installation**—Can be installed by any gas appliance dealer, plumber, tinsmith or hardware merchant at nominal cost.
- Retail Prices**—Wall Furnace, any style \$22.50  
Floor Furnace, any style 30.00  
Installations and fittings extra.

**WALL FURNACE STYLE C**

Size of Wall Furnace front is 17x29 inches, with a recessed portion of 14x17½ inches between studding. Recessed portion has a 7-inch vent opening at top and a fresh air intake 3x12 inches at bottom operated with damper in front. Both vent and fresh air intake pipes go between studding.

### ABOUT OURSELVES.

Building and Engineering News offers the best medium in the entire west for the Engineering Profession to get in touch with and keep in touch with all the activities of this great and undeveloped western country that requires engineering service, skill and brains.

Our "Technical Section" contains illustrated descriptions of construction work now going on all over the western hemisphere in all the countries bordering on the Pacific Ocean by the men who are actually doing the work, the engineers designing the work, the contractors executing the work and the inspecting engineers supervising the details of the work.

We bring descriptive articles of the workings and activities of the various Government Engineering Bureaus in the different countries and will in course of time have brought our readers a complete birdseye view of all the important engineering undertakings inaugurated as a direct result of the determination of the American People to build the Panama Canal.

We bring the up-to-date reports of all the important decisions of the State Commissions on all matters of interest to Engineers.

We bring short descriptions of contemplated work with the preliminary estimates of the engineers in charge.

We also bring important discussions by the most prominent engineers the world over on the vital engineering questions of the day.

We bring articles on important development enterprises, both private and governmental.

Our "News Section" brings **each week a complete** advance summary of new work contemplated, arranged both as to character of work and location of work with a ready reference index of both, making it possible for the engineer and contractor at a glance to find out what is going on in his special line and in his locality. Our "Sealed Proposals" contains the official notices of all the most important work going on in the west.

We desire to be of real practical service to the entire profession and invite the engineers and professional men to send to this office news items of professional interest such as new construction work, completion of construction work, surveys, changes in engineering personnel, change of location of engineering offices, engagement of engineers on new projects, appointment of engineers to new positions.

It often happens that engineers who have worked together on a large piece of construction work, but through the vicissitudes of this kind of work become separated, would like to be together again when opportunities offer themselves, and here the best way to keep track of each other is by making this journal a clearing house of information regarding your whereabouts.

By constantly keeping us advised of your professional doings and location, your friends will always know where they can find you when a big job comes up where your efficient services are desired.

Therefore send in your subscription and all the professional information about yourself and your work. It will do all of us some good some day and you will be helping to build up a paper whose object is to serve you better and better.

Yours for efficient service.

## The Disposal Of Suspended Matters In Sewage.\*

By Rudolph Herling, D. Sc., Mem. Am.  
Soc. C. E., New York, N. Y. U. S. A.

Since the first World's Fair held in London, 1856, the centers of population of all civilized countries have grown to such proportions and so rapidly that many new problems concerning city works and their management have presented themselves for solution.

Among the more important of these problems are those which comprise the collection and proper disposal of the great variety and mass of refuse materials, the removal and treatment of which in large communities often presents a formidable task.

This task is not alone a financial one relating to the economical collection, removal and treatment. It is also a sanitary one, in order to prevent any injury to health and all nuisances incidentally liable to occur. Health may be injured by the spread of disease germs which get into the refuse from sick persons and animals; and various nuisances may be created by a delayed removal, causing chemical changes which create offensive products.

Since such undesirable results have arisen, efforts have been made to obviate them, sometimes successfully, when the conditions were simple and the bulk was small, and sometimes unsuccessfully, when the conditions were complex and involved.

It is less than a decade since we have been able to say that it is not only possible but economically practicable to collect all city refuse, solid and liquid, at the sources for delivery at suitable points, and to finally dispose of its parts so that nowhere along the line either a serious danger to health or a nuisance need exist.

The present paper is limited to a discussion of the treatment of the liquid refuse of a city, usually called sewage, the subject of removing solid refuse having been fully discussed at the International Congress on Hygiene and Demography, held in Washington in 1912. It is further limited to the brief assembly of the essential principles which govern the design and operation of sewerage works, with special reference to securing healthful results and preventing nuisances from the sus-

pended matter contained therein.

Sewage is the dirty waste water rejected by a community and serving as a carrier of light solid matter in suspension which is discharged from water-closets, bath tubs, wash bowls, sinks, etc. It contains, roughly, 1 part of organic matter and 1 part of mineral matter carried between 1,000 and 5,000 parts of water, this difference indicating the variation in different cities.

The organic matter, which alone concerns the question of health and nuisance, differs materially in quality. Some of it is unstable, breaks down quickly and may putrefy within a day, such as certain animal and vegetable liquids; and some is stable and decomposes very slowly, such as hair, wood fibre, epidermis, cartilage and the like.

The unstable matter causes all the nuisances arising from sewage, as it has but a slight resistance to decomposition. It first absorbs oxygen with avidity to form more stable compounds; these have no offensive odor of themselves nor do they produce gases with foul odors. When the conditions have become such that oxygen for absorption is no longer available in the medium holding the unstable matter, other chemical processes become active, producing chiefly hydrogen compounds. Among the latter we have those which produce foul smelling gases and others which do not.

The dangers to health lie in the transportation to other points of pathogenic bacteria contained in the fresh sewage from sick persons and in the subsequent possibility of their once more getting into the bodies of human beings and higher animals. Bacteria not only adhere to particles of solid matter, but unless disturbed, remain in any liquid carrying them. It is possible that solid particles of sewage may be stranded in sewers, be held back and finally be blown away by an air current, enter the atmosphere and thus, by contact, cause a new infection. It is also possible that liquids may splash and throw bacteria into the air. In both cases the danger of transmitting disease is extremely small if the sewers have smooth interior surfaces, no opportunities for eddies to form, and good grades to cause a rapid

velocity from the sewage receptacles to the outfall. These conditions have been advocated for many years and are the same which will also prevent nuisances.

### Sanitary Collection and delivery of Sewage.

Our wash and bath rooms, toilets, kitchens, laundries, etc., are now supplied with fixtures in such a manner that offensiveness can be entirely excluded. This is done simply by giving them forms and surfaces upon which the dirty water can flow away quickly, no solid particles remain on the surfaces and a final flushing with clean water will restore the receptacles to their condition before use.

The pipes carrying into the sewers the sewage thus generated should, likewise, carry it away quickly and completely. The necessary means for accomplishing this are first, smooth and evenly curved and pointed pipes, and second, good currents of air circulation. The former prevents the catching, retention and consequent putrefaction of solid particles, the latter tends to clean up the exposed surfaces which are otherwise usually covered with slimy growths. This air circulation is automatically established by providing openings to the sewer from the street surfaces, and openings to the house pipes above the roofs of buildings. The air currents are produced by differences of temperature within the sewers, on the street surfaces and above the roofs of buildings, and also by sudden discharges of large quantities of water down the house pipes. It will readily be seen that the currents cannot always be in the same direction. When the outside air is colder, the current must be upwards and vice versa. The reversal of air flow through the house pipes is not objectionable if the sewage is not putrescent, no foul deposits are in the pipes and ventilation is free and ample.

It was formerly strongly opposed, particularly in England, to have street sewer air pass up through the house pipes to the roof. It was feared that street sewer air might enter rooms through imperfect pipes or through the fixtures if their traps were not in order. This opposition is still free-

\*Paper read at the International Engineering Congress, San Francisco, September, 1915.

quently maintained. On the European Continent and in many American cities, the ventilation of street sewers through house pipes has, however, been found advantageous and the practice is growing. The house pipes are kept much cleaner, the slimy coating is largely removed and the escaping air above the roofs is less odorous than when the house pipes are trapped at the bottom against the street sewer. A careful examination made in this country proved that the escaping air from house pipes contains practically no disease germs or other bacteria and has no offensive odor if the ventilation is good.

After the house sewage enters the street sewers it should be kept flowing without any interruption. This result is readily gotten if the sewers are properly designed and built. The surfaces should be smooth. Vitrified clay pipes, used for small sewers more than any other kind in this country, have the smoothest surfaces. Brick sewers furnish a rough surface even if the joints are carefully made and the bricks are of the best. With good flushing and brushing down at proper intervals they may, however, be kept in a good condition, so as to entirely prevent offensive odors from the suspended sewage matter therein and disease germs from being retained in a virile condition.

Flushing is another important requirement to prevent offensive odors from the suspended matters in sewage. Above ground, within our houses and on our bodies, we use ample amounts of water for cleansing purposes. Below ground in sewers, ample flushing is equally and even more necessary, due to the relatively greater concentration of unstable decomposing suspended matter. Unfortunately, in our country the flushing of sewers has not been given as much attention as is desirable. In almost all European countries, both small and large sewers are flushed frequently, varying from several times a week to once in one or two months. The results of this frequent flushing are very satisfactory and the money is willingly appropriated.

In our country, particularly in smaller cities, we have extensively introduced automatic flush tanks at the heads of all pipe sewers. While these tanks keep the upper ends of the sewers clean and free from deposited suspended matter in a very satisfactory manner, they do not keep the larger sewers lower down the line free from deposits and odors. In this respect our sewer systems could be greatly improved and the odors therefrom materially diminished by introducing flushing arrangements.

When collecting sewers are very long and the distance to the outfall is great, which fact is generally associated with flat grades and slow velocities, we have almost always some putrefaction and offensive odors arising near the lower end. During the long run the oxygen has become exhausted and hydrogen compounds, notably sulphureted hydrogen, are developed. This condition may be improved by emphasizing several remedies above mentioned. Still another expedient is practicable, by replenishing, through arti-

ficial aeration, the dissolved air, from which the oxygen has been exhausted and putrefaction has been initiated. Experiments have been made recently, both in England and in America, to accomplish this purpose and have resulted in more or less success. Where it is possible to force air into a sewage pumping main, under a pressure of at least one atmosphere, good results have been obtained. The air is distributed throughout the water mass, evidenced by the fact that when the pressure is released, the excessive air causes a sewage of milk-like appearance from which the air bubbles soon disappear. If sewage bacteria are present in sufficient quantities, an accelerated oxidation of the dissolved organic matter takes place, and the distance of flow before putrefaction begins is lengthened.

Distributing air into the sewage within the flowing section under ordinary pressures seems as yet to have given only moderately good results.

There is still another method available by which sewage oxidation can be facilitated and putrefaction retarded, should the sewage have to flow a long distance to works for treatment. Incidentally, the expense of the final treatment would also be reduced thereby.

When we consider that but very little of the organic matter which is discharged into sewers at the house is dissolved, and that about one-half of it is dissolved when the sewage reaches the outfall of an average city, and also, that dissolved matter withdraws oxygen from the water more quickly than the suspended matter, we must conclude that a removal of the suspended matter by fine screening higher up the sewer, before much is dissolved, should be of benefit. Fine screens near the beginning of the main sewers might, for instance, not only prevent foul odors from the sewage near the lower districts, but prevent also the necessity and expense of works for oxidizing the amount of dissolved matter which is thus eliminated. Whether or not this expedient will be economical must be determined in each case.

The means for removing suspended matter from sewage are settling basins and fine screens. Settling basins require space in which the flowage can be brought to almost a standstill, and give sufficient time for the suspended matter to drop to the bottom of the basin. Unless this matter reaches a second basin for separate decomposition (see below under "Imhoff Tank") it must be frequently removed, which in the upper parts of a city's sewage system would generally be objectionable. The superiority of settling basins over screens lies chiefly in facilitating the deposit of the finer and water-saturated parts of the organic matter, which screens generally allow to pass on, and which is a condition in the lower parts of a city's system. The particles of suspended matter have their largest size near the sewage origin, and more particles may, therefore, be caught by a screen before a run in the sewer has begun to break them up. Most of this unbroken matter is lighter than water. It first floats and settles, if at all, after it is thor-

oughly water-logged. Therefore, it would appear that fine screens can be more effective in removing suspended matter near where main sewers begin than where they discharge, and that settling basins can be more effective near the latter points.

The above discussion has covered the general principles concerning suspended matter which should be considered when collecting sewage from an inhabited district, if a complete and rapid delivery to the outfall is to be secured under conditions which are both economical and non-offensive. We have now to mention the general principles which must be considered when finally disposing of the sewage.

#### Sanitary Disposal of Sewage.

Greater nuisances have been caused by improper sewage disposal than in the collecting system, and yet the ways of avoiding them do not differ much in expense or attention.

It was stated at the outset that we must place the sewage under such conditions that its decomposition will be facilitated by contact with oxygen, and in the absence of oxygen, by such combinations of hydrogen as will produce no offensive odors.

All processes of sewage treatment and disposal, if they are to be satisfactory, permanent and economical, should require, first, a separation from each other of the floating matter, of the settling matter and of the liquids.

As these three parts of the sewage are materially different, one being solid and light, one solid and heavy and one liquid, the methods of economical treatment, in order to make them inoffensive, will also be different in nearly all cases and, therefore, a separation is generally to be recommended. As yet it is not always made, and in some places it may not yet be of sufficient importance to justify the additional expenditure. The drift of opinion, however, is clearly in the direction of separation and we should endeavor to design our works accordingly.

The floating matter can be retained with little trouble and expense, either by screens or in settling tanks. Being often offensive, is best disposition is usually by fire or burial.

The settling matter, which forms the so-called sludge, is that part of the sewage which has always given the greatest amount of trouble. It has constituted the greatest nuisance, until within a few years ago, has successfully defied a treatment which would allow of its inoffensive disposal.

The bulk of the sludge does not naturally decompose by oxidation. Its exposure to the atmosphere allows but a thin film to oxidize at the surface, but the exposure permits it to take up many species of bacteria, some of which cause offensive putrefaction. Many ways and means have been tried for the last fifty years, both in England and Germany, to get inoffensive sludge decomposition. A solution was at last found in an expedient which allows the sludge to decompose under water with the exclusion, practically, of all fresh sewage and air.

The first step towards getting this result was taken by Dr. W. O. Travis of Hampton, England, who devised a two-story tank, the upper division serving as a settling tank with a slot at

the lower edge of an inclined bottom, through which the settling suspended matter passed into the lower division to accumulate and decompose. The in and out-flows of the two tanks were so proportioned that from three-fifths to four-fifths of the sewage passed through the upper division and one-fifth to two-fifths through the lower one. The largest Travis tank is in Norwich, England. So far as an in-offensive sludge decomposition is concerned, this Travis tank is not a success.

The same two-story tank was later built in the Emscher district of Germany, by Dr. Ing. K. Imhoff, with at least one important change. No sewage whatever was allowed to pass through the lower tank, thus preventing any part of the sludge from having a continuous contact with fresh sewage and air. Also other advantageous changes were made in this new tank.

The decomposition of the sludge takes place in the lower division and in the absence of dissolved oxygen, but the novel condition is that it continues in the absence, also, of sulphur bacteria producing sulphuretted hydrogen, and in the presence of bacteria producing substantially only methane and carbon dioxide gases, both of which have no offensive odor. The conditions in the tank gradually become adjusted to conditions favoring the life of substantially only those two classes of bacteria and causing practically all of the others to become inactive.

Quite a varied experience has already been gained with this Imhoff method of disposing of the settling suspended matter of sewage. It has been applied to dilute and strong sewage, to domestic and different trade sewage, and it has so far been found satisfactory in all cases where the conditions for the required special bacterial life were favorable.

We are now facing suggestions for some further variations and improvements of the method. Both in Germany and in the United States, thorough investigations of such suggestions have been and are still being made.

It is naturally found that the details of the process may differ with the character of the sewage. The same design and proportions of its parts may vary under different conditions. The topography of the site alone may determine quite different designs. For instance, we may find in one locality a deep double-deck Imhoff tank to be preferable, while in another two shallow single-deck tanks side by side may be more economical.

The first has the advantage of an automatic sludge separation. Its greater depth has the further advantage of placing the gases of decomposition under greater pressure which, when the sludge is finally withdrawn and discharged on the surface of the ground, causes the gases to expand and to make the sludge more porous and, therefore, more readily drained and dried than where gases form under shallower depths. The double-deck tank has, however, the disadvantage of greater depth of excavation, perhaps in rock or in wet soil, and also the necessity of getting the right propor-

tion of capacity between upper and lower tanks. If the proportion does not approximately correspond to that of the suspended and liquid matter, the efficiency and economical results may not be quite satisfactory. The shallower single-deck tanks have been studied in Berlin and in the United States, particularly by Mr. E. J. Fort, Chief Engineer, Bureau of Sewers, Borough of Brooklyn. It has been found that the suspended matter is decomposed in the same inoffensive manner as in the deep tanks. The gases of decomposition are also chiefly methane and carbon dioxide, and after final withdrawal, the sludge has also no offensive odor. There is, further, the advantage of complete independence of the two tanks, so that any irregularities in the sludge tank can never have a detrimental influence upon the sewage discharging in the settling tank, and the further advantage, that extensions can be more readily made and that an inspection of every part is easier than in the double-deck tank. On the other hand, the disadvantages are that the shallower depth causes the sludge to be less porous and less easily drainable, and that it must be pumped or otherwise specially conveyed from the gutter in the settling tank to the adjoining sludge tank. The separate sludge tanks can be built as single units and can be intermittently filled, or they can be built as a series of tanks continuously operated.

Where separate sludge tanks have been continuously exposed to the air, as in Baltimore and Worcester, inoffensive sludge, as coming from the Imhoff tanks, has not been obtained. The reason appears to be the long exposure of the sludge to the air. In the experiment station of the City of Brooklyn these tanks have been kept covered and the atmospheric air has been substantially excluded. The result has been a sludge as completely inoffensive as that obtained from the Imhoff tanks. It therefore seems desirable to cover such separate sludge tanks, to prevent the free access of bacteria from the air, and the space under the cover should be filled with the resulting gases of decomposition rising from the sludge. But, these gases, when excessive, must be allowed naturally to escape through proper sized openings, and the free inflow of atmospheric air can also be readily prevented.

The preference between the two methods, having the two tanks over or beside each other, may usually be decided on the relative economy of construction and operation, and on the desired quality of the sludge.

In the process of ripening, the sludge has a grayish color. When ripe it has become black and has a peculiar far-like though not disagreeable odor. It has also lost its original slimy and sticky consistency and has become porous and friable, allowing its water, which is clear, odorless and quite inoffensive, at once to be discharged into streams. The sludge of the shallower tanks is less porous and less easily and quickly drained.

The sludge generally reacts alkaline. Berlin report that when left in the tank too long it may again change to a grayish color, having a distinct acid

reaction, and offensive odor and it no longer drains easily. How this change is brought about is not reported, and it has not been noticed at some of the stations in the United States.

In order that the sludge may decompose satisfactorily and quickly, it must not be acid. The acidity can be generally produced, if not from manufacturing waste, from an excessive vegetable diet of a community. When it appears and interferes with the normal decomposition, the sludge should be brought into intimate contact with a moderate amount of fresh sewage, which is usually alkaline, although the amount of such sewage should not be enough to disturb the required bacterial flora already established in the sludge. It is generally better to add some clean hard water or some alkaline solutions.

Perhaps nowhere else than at the Berlin Experiment Station has the desirability of getting a good alkaline sludge been better demonstrated. It can commonly be obtained by a frequent stirring, so that fresh parts will be frequently exposed to bacterial action and the toxins removed. The stirring is best done by mechanical agitators. They should be used daily or more or less often as may be found best, according to the varying character of the newly deposited suspended matter. Comparative experiments with mechanical agitators and with compressed air bubbles forced in at the bottom of the sludge and rising through it have so far indicated a greater efficiency for the former.

As to the character of sludge withdrawals, experiments have indicated that the best results follow when the withdrawals are regular, frequent and in small amounts at a time.

Where sludge is spread upon beds for drying, the climate must be sufficiently temperate to prevent its long remaining frozen. Where the drying beds cannot be covered to moderate the winter temperature it is better to increase the size of the sludge tanks so that winter storage can be provided in them. This excessive storage does not so far seem to have been objectionable in this country. To keep the sludge in a good alkaline condition it is, however, well to agitate the odor as well as the fresher sludge.

The usual variations in the composition and temperature of the sewage necessarily produce irregularities in the behavior of the suspended matter, much of it may not readily settle into the sludge tank, or the lighter materials when released may rise up from it occasionally, therefore, we see excessive frothings or foam formation. When these amounts become quite large they require radical means for treatment. Small amounts can be scooped up at the surface and burned or buried. Large amounts require other methods of removal.

As a permanent practice it is not economical nor very efficient to break up the scum by hand with poles or with a stream of water, which causes much of it again to settle into the sludge tank. Agitation by mechanical means has been found more useful to settle the frothing and the scum.

Experience has gradually indicated the extent of area which should be

provided in the chimneys through which the light particles of suspended matter rise from the sludge tank to the surface. If they are made too small, they tend to cause the scum to rise up high and to flow over. If they are too large, they may, by a large exposure to the air, invite development of putrefactive bacteria and, therefore, the formation of a nuisance.

When such frothing is found on the surface of the tank, experiments have indicated that this objectionable condition may be removed also by draining or pumping out the sewage as far down into the sludge tank as practicable, and by refilling the space with clean water from the municipal supply; especially, if this is hard water and contains carbonate of lime. The frothing may also be reduced by adding to the sewage slight quantities of lime or soda before it enters the tank, especially, if the alkalinity of the sewage is very low.

Cases are now multiplying where some injury may be done both to the process of sludge decomposition, as well as to the otherwise odorless sewage treatment, by the admission to the sewers of gasoline, due to its growing use for automobiles, etc. This admission not only gives an objectionable odor at the sewage treatment works, not distinguished by most people from the odor of sewage, but it also reduces, and this is more important, the rate of bacterial activity in the sewage and sludge and, therefore, the desired rapid decomposition. Legal means may keep the injury from becoming serious.

The automatic sludge decomposition in separate tanks, as just described, should not entirely rule out the old method of precipitating the suspended matter by an added coagulating material, such as lime and the sulphates of alumina and iron, which method has been used for over 50 years. The precipitating processes are not always excessively expensive, and, in some cases, may actually be most economical in the removal of suspended matter. This may be particularly the case when only a clarification of the sewage is required and where plain settling, such as takes place in the upper chamber of the Imhoff tanks, is insufficient and, also, where such clarified sewage can be turned, without objection, into a sufficiently large water course.

There has recently been brought into more or less prominence the method of hastening the digestion of sludge by an artificial aeration, or, as it has now been called, by "activating" the sludge. Air is forced into sludge from the bottom of the tank in which it is stored and thereby agitates or activates the sludge, so that both an inoffensive condition and an accelerated aerobic decomposition has been maintained. Experiments are being conducted in several of our cities, and final results as to economical results when compared with other methods are not yet available.

Mr. H. W. Clark, Chief Chemist, Massachusetts State Department of Health and Director of the Lawrence Experiment Station, who has been continuing the classical work of the Massachusetts State Department of Health, began about 1889, has recently again experimented on the treatment of

sewage sludge. He states, in a letter, that since 1912 he initiated and developed a process of purifying sewage by aeration for the accumulation of "growths" in tanks containing layers of slate or other material placed in a nearly horizontal position, one or two inches apart. Air currents aid also in circulating the sewage between the slates and, in contact with the "growths," purify it in 5 hours. The process is said to have collected for removal from the Lawrence sewage 50 per cent of the total suspended matter.

Mr. Clark further says that this aeration was viewed at Lawrence by Dr. Gilbert J. Fowler of Manchester, in 1912, and was further investigated by him and other English workers, and that from it the process of "activated" sludge, a name given by Dr. Fowler, was developed.

Mr. Clark has also investigated sludge treatment in deep tanks and reaches the conclusion that the successful production of compact, inoffensive sludge depends upon the character of the sewage which produces it, and varies with slight differences in the chemical reactions within the tanks as well as in the methods of operating them. A slight agitation of the currents of air, water or sewage, or an increased alkalinity by the addition of lime, etc., gives, for some sludges, satisfactory results that cannot otherwise be obtained.

Mr. E. J. Fort of Brooklyn says that the results of his investigations seem to indicate, so far, that it is possible to purify sewage by forced aeration to any degree desired, but also, that because of the excessive expense, it is generally impracticable. He has not yet completed his experiments with "activated" sludge.

Mr. T. Chalkley Hatton, Chief Engineer of the Sewerage Commission of Milwaukee, is also experimenting with "activated" sludge, but, as with other experimenters, has not yet arrived at final conclusions. He is using Mr. Clark's suggested slate layers with enforced aeration and finds that after six hours a well nitrified effluent is obtained, as may be done in any properly operated contact bed with forced aeration, and in much less time in ordinary sprinkling filters. The sludge settles out in from 10 to 20 minutes and leaves a non-putrescible liquid. The sludge is well granulated and drains within a few hours to 50 per cent of moisture content.

The U. S. Public Health Service in Washington and the Baltimore Sewerage Commission have also recently begun to make tests on "activated" sludge and sewage aeration. The Engineering Record of March 6, 1915, in an article by L. C. Frank, Sanitary Engineer, U. S. Public Health Service, gives a review of the English previous experiments on that subject, as preliminary to the Baltimore tests. In 1912, Dr. Fowler and in 1913, Mr. Ardern experimented on sewage aeration at Manchester, but similar experiments had before been made in the United States and in Germany. These gentlemen found that well aerated, or "activated," sewage sludge was capable of causing a well nitrified sewage effluent by bringing such sludge in intimate contact and mixture with raw

sewage for from four to six hours, when the temperature was above 10 degrees C., and best at 20 degrees C. The process is essentially a biological one in both sludge and liquid, as has been known for many years. It is proposed at Baltimore to experiment in a tank through which sewage flows continually, and to use an Imhoff tank for the purpose.

It will be interesting, in due time, to learn of the results obtained at these several experiment stations. There does not seem to be a question any longer that inoffensive decomposition of sewage can be secured by sufficient aeration—a fact that has also been known for a long time. Agreement, however, does not yet exist on the most effective and economical way of applying and diffusing the air. Whether or not the process of "activating" sewage sludge for an inoffensive disposal will be preferable, by substituting an aerobic for an inoffensive anaerobic decomposition, depends upon the element of comparative cost of both in securing and maintaining the desired unobjectionable conditions.

#### ◆ OAKDALE COMPANY TO BID ON NEW RAILWAY.

The Utah Construction Company, which built the Oakdale irrigation system, is securing data to bid on the construction of the electric line into the Hetch-Hetchy Valley for the city of San Francisco. It is stated that if necessary, the Salt Lake Company will accept bonds for its work in the same manner that it built the \$2,000,000 system of the irrigation district. A large amount of stock which would be required on the construction work is on hand in this city. This is the same company which financed the completion of the Western Pacific Railway.

According to local men, the city of San Francisco will be unable to haul into the valley this season the supplies required for the construction of the temporary reservoir. There have been several recent snow storms and it is declared to be impractical to haul the 800 tons of cement and 400 tons of iron required for reinforcing, into the valley at this season of the year and in the time specified. Local contractors have all refused to bid on the contract, which would amount to \$50,000 for the hauling of the supplies alone.

#### ◆ S. P. PREPARES TO RUN INTO HETCH-HETCHY.

Surveys have been made by the Southern Pacific Railroad for an extension of their Oakdale line from Waterford into the Hetch-Hetchy Valley. This, it is said, explains the recent offer made by the railroad to the city of San Francisco to haul freight required for the Hetch-Hetchy water system into the valley.

It has been supposed the Southern Pacific intended to make use of the Sierra tracks as far as Rosasco and build from that point into the valley. However, it has been learned that the company has had a corps of surveyors in the field and has complete data for an extension of the Oakdale line from Waterford.

# Los Angeles Engineering Department.

By HOMER HAMLIN, City Engineer.

To the Honorable, The City Council:

Gentlemen: In accordance with the provisions of the Charter of the City of Los Angeles, Section 58, I beg in the following to present my annual report on the operation and activities of the Engineering Department:

The work during the year has been carried on under favorable conditions, and as in the past, the amount is continually increasing.

"The improvements voluntarily petitioned for and the large expenditures for such improvements, made by the Los Angeles property owners, surely speak strongly for the progressive tendencies of the city and the unlimited confidence which its citizens have in its future. Every branch of the department has been fully occupied, and the work performed is fully commensurate with the force employed.

The occupation of the new offices has added much to our efficiency and comfort, although the room allotted to each man is no greater than formerly.

The personnel of the principal heads of the organization is as follows:

Homer Hamlin, City Engineer.

A. C. Hansen, Chief Deputy.

J. C. Clausen, Engineer, Asst to City Engineer.

H. Z. Osborne, Jr., Engineer of Street Improvement, Design and Procedure.

C. S. Pope, Engineer of Street and Storm Drain Construction.

W. T. Knowlton, Engineer of Sewer Design.

E. A. Tuttle, Engineer of Storm Drain Design.

J. R. Prince, Chief Draftsman.

C. P. Cooke, Field Engineer.

R. W. Stewart, Engineer of Bridges.

F. A. Batty, Assistant Engineer in charge of Sewer Construction.

J. W. Cooke, Assistant Engineer of Substructures.

W. M. Moselle, Chief Clerk.

W. H. Laws Chief Field Deputy on Street Maintenance.

L. G. Mather, Superintendent of Garbage and Rubbish Collection.

T. W. Moore, Miscellaneous Inspections.

P. E. Davis, Chief Foreman, Resurfacing Excavations.

As predicted in my last annual report large areas have been annexed to the city during the past year, making the present territory within the city's boundary 288.21 square miles. This immense area presents problems and conditions in the proper administration of this office widely different from those necessary for smaller and more congested sections.

It will be necessary in the near future to permanently establish, preferably by a system of triangulation using the United States Coast and Geodetic survey System as a base, all the land and street lines within the city. This work should soon be inaugurated.

The construction and maintenance problems, and how to meet the needs of the various sections are being

worked out. This office is now in receipt of requests for various improvements in the recently annexed areas and to properly perform such work, authentic records pertaining to street and land lines, are essential. These are now being compiled as fast as possible but the task is a large one.

The vault housing the records of this office now contains about 36,000 separate plans, profiles, maps, field books, etc., which are of inestimable value. Their destruction would be an irreparable loss. Although the new vault is a great improvement over what was used in the old city hall, it is not what it should be from a fire protection standpoint for the housing of such valuable records. The index system of these records is being enlarged to conform with present and future conditions.

Large projects which have been given study during the year are: The Bunker Hill Cut and the various proposed viaducts over the Los Angeles River. The lowering of the Broadway Tunnel, a contract let a year ago, is now under way.

The improvements on the public streets of the City of Los Angeles, such as pavements, sewers, bridges, tunnels, etc., reach an estimated value at this date of over \$34,000,000.

Additional statistics which are of interest concerning the work done last year are as follows:

Approximate value of improve made during year.....	\$4,700,000
Miles of streets paved.....	60.51
Miles of streets graded and oiled .....	13.74
Miles of storm drains constructed .....	30.25
Miles of main sanitary sewers constructed .....	87.55
Total number of employees in the department about.....	1,430
New orders received from the Council, Board of Public Works, etc. ....	9,463
Official reports to Council, Board of Public Works, etc. ....	1,160
Sections in reports aforesaid, .....	6,530
Total number of ordinances passed by Council during year .....	2,251
Ordinances presented by this office .....	1,501
Ordinances to establish or change and establish grades .....	491
Final decrees entered for opening and widening Sts. ....	22
Condemnation maps furnished City Attorney during year. ....	700
Vauctions of streets and alleys completed during year .....	10
Rights-of-way secured during year .....	117
The Department of Street Maintenance and Inspection at the present writing maintains about 373 miles of paved streets and 718 miles of streets otherwise improved. The city at present embraces about 2,150 miles of dedicated public thoroughfares. The de-	

partment is following strictly the policy of applying maintenance only to those streets which have in some way been improved.

It has been realized more as the duties of street maintenance increase that provision should be made, providing the city with adequate road material sites such as quarries, pits, etc., of such extent and at such locations as would supply the municipal demand for years to come.

The Bureau of Resurfacing, namely: the force resurfacing all trenches in the public streets, except those included in Vrooman Act contracts, is now permanently and well organized. The innovation has proved to be satisfactory, resulting especially in more uniform and prompter service. Over 29,000 work orders were attended to by this department during the year. A force is now well started on the second year of forcing the lot cleaning ordinance. From last year's experience many details of handling the work are being improved upon. It is, however, a fact that the efforts of last year are largely the cause of a more general response to the notices being served on property owners to clean their property this year. To date this season 9,500 notices have been served and instead of doing the work by force account, the cleaning is let to the lowest bidder on competitive bids.

The situation as to the disposal of garbage and rubbish is satisfactory. The department is now collecting all garbage and non-combustible rubbish, and the service is prompt and efficient.

The plant of the Pacific Reduction Company is at this writing taking two-thirds of the total garbage output of that part of the city north of Manchester avenue, and all from this territory will be delivered to the plant by September first of this year. The method of disposal and the working of the reduction plant give every evidence of being successful. In another section of this report attention is called to the plans under way for a cooling system in connection with the water supply for the plant.

Non-combustible rubbish is collected and disposed of at convenient dumps. During last year about 100,000,000 pounds of garbage were collected.

The construction work in the different departments has been carried on about as usual. The amount of work performed is somewhat greater than last year amounting to approximately \$1,700,000. It is gratifying to note that the percentage of high class pavements of the total streets improved is constantly on the increase, being this year about 82 per cent, only 13.74 miles of grade and oil having been installed. All of our main thoroughfares are now paved and much work has been done in the industrial district.

The sanitary sewer situation is well in hand, about 80 per cent of the city's population being now served. During

the year a little over 57 miles of main sewer were added to the system which now comprises about 787 miles. The present outfall sewer is inadequate for the city's requirements and plans are being made and rights-of-way are being obtained for an additional outfall. This sewer will be in the near future an absolute necessity.

During the year studies have been made of sewage disposal at Hyperion. The plan contemplates the elimination of all solids and an appropriation has been asked for the installation of one unit of such a treatment system.

The first step in sewage disposal other than discharging the raw sewage into the ocean, has been taken in the installation of a disposal plant at Wilmington. An Imhoff tank has been installed and is nearly ready for operation. After much study and research the conclusion has been reached that this method of disposal will be successful.

The department has nearly completed the design for an adequate storm drain system for the entire city, and substantial progress in actual construction can be reported. Several districts such as the Arroyo de la Brea, Madison Virgil, Sunset Hollywood and Upper Alameda Street have been provided with drains; but to proposed systems in the resident districts much opposition develops.

Our long dry periods tend to mitigate the inconveniences resultant from periodically heavy storms during the winter and it is difficult for the property owners to see the necessity of storm sewers. However, the position is still maintained that storm sewers are essential to the proper design and maintenance of pavements, and will in every case prove a benefit commensurate with the expenditures.

The Bridge Department has completed one bridge during the year, located at Avenue Forty-three across the Arroyo Seco. The force of this department has been further occupied with miscellaneous structural work, such as the repair of bridges, river correction work and the lowering of the Broadway Tunnel. Much study has also been devoted to the Bunker Hill Cut.

The work in the Drafting Department, due to the additions to the city, will be greatly increased during the ensuing year. District maps and records must be prepared and compiled to meet the demand for improvements in the new territories.

The Right-of-Way Department, although obtaining during the year 117 easements and deeds, requiring 650 signatures, has met with a great many obstacles. The granting of a right-of-way is naturally followed by an improvement which in turn imposes an assessment on adjacent property and invariably the grantor of the right-of-way is one of those assessed. If the prospective grantor is not in favor of the improvement the right-of-way can not be obtained without a cash consideration. All our easements to date have been obtained practically without cost to the city, but large necessary improvements are being delayed for lack of rights-of-way. Condemnation takes time and the award is often not less than it could have been obtained for in the first instance. An adequately

provided appropriation for this purpose would be desirable.

I again urge the adoption of motor transportation wherever practical, both from an economic and necessity standpoint. The extent of the boundaries of the city are so large that every department operating in the field is handicapped for lack of rapid transportation.

The Department of Substructures is fulfilling the object for which it was initiated. The data now being procured will become more and more valuable as the city develops. Public utility corporations are realizing the value of the work and co-operating in many ways. It is the aim that this department shall be competent to plan for the most efficient future use of the underground portion of our streets, taking into consideration all of the city's future requirements.

The above report is a general review of the work during the year. For further details reference is made to the reports of the various heads of departments to whom, together with their respective assistants, I am largely indebted for the successes and achievements of last year.

Respectfully submitted,  
HOMER HAMILIN,  
City Engineer.

## Petroleum In 1914.\*

By Fletcher Hamilton, State Mineralogist.

Chief of the fuels of California is petroleum. A complete description of the industry is to be found in Bulletin 69, recently issued by the State Mining Bureau.

In preparing the statistics for the year 1914, several sources of information were available for comparison and use. Several marketing concerns issue carefully prepared monthly statements of gross production in each field, and this department gathers figures on price and other matters, directly from oil producers. The figures here given on gross production and monthly operations, are largely those published by the Independent Oil Producers Agency, and the figures showing well operation by fields are from the Standard Oil Company. Segregation of figures by counties can be made directly from field reports in all cases except for Los Angeles and Orange Counties, where the fields cross county lines. Figures on price are open to some question, as it must be remembered that a large portion of the oil does not enter the open market, but is consumed or refined directly by the producers. The prices given are averages for the oil which is actually sold.

The business of producing oil is not so profitable as it should be. Many operators continue to drill wells when there is not a great demand, and the over-production, of course, depresses the price. Just profits and stable conditions are more nearly assured to the producer who is able to refine and retail his product. Realization of this

fact is apt to lead to the formation of larger and stronger business units in the future. Doubtless, undue obstacles will not be placed in the way of such changes, if they are carried out with reasonable regard to public welfare. The fact cannot be too strongly emphasized that our oil resources are far from inexhaustible, and that needless production hastens the day when we shall stand stripped of one of our most valuable assets. Raising oil from the ground and selling it at a price too low to return the invested capital with interest, is about the same as drawing gold from a savings account and disposing of it at a discount. As in most lines of human endeavor, some operators have entered the oil business with more thought and preparation for the future than have some others.

The proportion of heavy and light oil produced in the various fields is shown by the following figures, for which we are indebted to the Standard Oil Company. Oil below 18 degrees Baume may be generally considered as unrefinable, or fuel oil; while the lighter oils yield varying amounts of refined products and a very large proportion of residuum or fuel oil. A very few years ago, the total amount of heavy oil was in excess of the light oil.

Financial results of the oil business during 1914 are shown by the following tables to be not greatly different from those of 1913, as published in Bulletin No. 69. It is particularly worthy of notice that the profitable, or dividend-paying, companies received a slightly higher price for their product than the average market price, probably due to the higher grade of oil produced by them. It is also noticeable that their production cost per barrel is slightly lower than the average, due to the fact that their wells are more productive. Operating cost per well is not always lower for the dividend companies than others. Profitable operations seem to depend generally upon large wells, high-grade oil, and proximity to market. There is nothing to indicate that unnatural causes or manipulations have affected the profits of one producer against another. It should be particularly noted that both price and profits are greater in the Los Angeles and Orange County fields than in others. Doubtless this is largely due to the proximity to market.

There is a large supply of oil now in storage, which, in many cases, might better be left in the ground and not subjected to losses by fire, leakage and evaporation as well as cost of storage. According to the Standard Oil Company, the stocks on hand on December 31st, amounted to 58,526,274 barrels, which is an increase of 10,656,097 barrels during the year. The figures are practically the same as those of the Independent Oil Producers Agency. The oft-repeated statement that this is less than a year's supply is of little moment in the face of a steady production which can supply the regular demand. It would be extremely interesting to know what proportion of the stock on hand is low-grade oil. In view of the difference in value and marketableness of various grades of oil, the concerns publishing monthly statistics would

\*From "Mineral Production for 1914" by Fletcher Hamilton, State Mineralogist, Bulletin No. 70 of California State Mining Bureau.

render to the public and themselves a distinct service by showing something of the amounts of high and low gravity oil produced and stored.

Production and Value of Oil by Counties.

County	1913		1914	
	Bbls.	Value	Bbls.	Value

EXPERTS TESTIFY IN BIG KERN OIL SUITS.

W. W. Cleott, a government geologist, and F. J. Burns, a director of the Obispo Oil Company, were the principal witnesses in the withdrawal suits on trial before Judge R. P. Bledsoe in the United States District Court.

Gas figured largely in the testimony, as the defense is trying to prove that gas was discovered on the property at stake, 160 acres in Kern County, stated in the government's complaint to be worth more than \$10,000,000, before President Taft's withdrawal order of September 27, 1909.

Mr. Burns was chairman of an investigation committee appointed by the Obispo Oil Company to make personal observations of the quality of the land in dispute. He reported that he found gas in substantial quantities.

## Department of Street Improvements, Plans and Proceedings In Los Angeles

By H. Z. Osborne, Jr.

The following branches of the Engineering Department come under my general supervision:

**Profiles:** Platting profiles, all except sewers (not including those in the territory acquired by the consolidation of Wilmington and San Pedro with the City of Los Angeles).

During the year 311 profiles were platted in this department and ten in the branch office at San Pedro.

**Grade Department:** (a) Preparing petitions to change and establish grades where an expression of opinion is required from the property owners. Twenty-five petitions of this character were prepared.

(b) Indicating grades for streets together with the necessary ordinances establishing such grades. 491 of such ordinances were compiled during the 12 months.

(c) Grade sheets for all improvement work and special construction work during this period.

(d) Indication of established grades on profiles and grades board for permanent record.

**Improvement Plans:** All plans required for street improvement work together with culverts and storm drains planned in connection with the Storm Drain Department.

Detail plans for approximately 75 miles of such work was thus prepared.

All official notices of street work were prepared for this work together with the outline of the bids for the contractors.

Preparation or check of all ordinances for street improvements, except sanitary sewers, including special improvement ordinances under the Vrooman Act for tunnels, bridges, storm drains, the Bunker Hill Cut, etc.

Preliminary assessment maps and copies of assessment maps for the City Clerk, the poster of street notices and the public office, for vault records and the branch office at San Pedro and Wilmington.

Bidding forms for street work have been prepared by this department during the year. This practically insures the regularity of all bids submitted.

Proofreading of practically all ordinances from the Engineering Department except those relating to sanitary sewers.

**Dedication:** Careful search of the records for dedication of streets to be improved under the Vrooman Act.

**Permits:** Curb and sidewalk and gutter investigations to insure construction to the proper width line and grade, as nearly as possible.

**Street Names:** The correcting and naming of streets requiring the preparation of ordinances.

**Curb Lines:** Investigations of conditions, present and future to meet the requirements of all parties concerned, as well as local geographic conditions.

**Trees:** Making necessary investigations to save shade trees along the line of the improvement where possible.

**Public Utility Poles and Constructed Work:** Investigations are made to damage constructed work as little as possible by contemplated street improvements.

**Railroad Franchises, Spur Tracks:** Careful check of same with recommendations to protect public interests.

**Correspondence:** Miscellaneous correspondence relating to all branches of public improvements.

**Authority for Street Improvements:** Systematic endeavor to secure proper authority and to clear up conflicting orders at the proper time.

**Reports:** Making of thousands of miscellaneous reports during the year, together with a monthly report showing the exact status of all streets ordered improved by the City Council.

**Rights-of-Way and Deeds:** Preparation and check of most of those required for street improvements.

New Orders received from Council, Board of Public Works, Board of Harbor Commissioners, etc.	9462
Official Reports to Council, Board of Public Works, Board of Harbor Commissioners, etc.	1160
Sections in reports aforesaid.	6530
Sections aforesaid from this department	2522
Search made for permits issued for curb, walk and gutter	501
Total number searches made for street dedication (including intersecting streets)	3501
Total number of ordinances passed by Council during the year	3501
Ordinances presented by office of City Engineer	1504
Ordinances presented during the year by this department	1317
Ordinances and permits checked or prepared and checked by this department, called for an expenditure of	\$3,971,826.57
Ordinances to establish or change and establish grades	491
No. of Preliminary Assessment Diagrams, Official Assessment Diagrams and copies of same made by this department during the year	1478
Change and establish grade petitions prepared	25
Profiles platted (in main office)	311
Streets paved, oiled and accepted during the year, miles	13.74
No. of miles of streets paved over last year's record	60.51
No. of ordinances abandoning proceedings, during the year	10.51
Miles of paving included in said ordinances	6.12

Your attention is respectfully called to the expenditure of \$3,971,826.57, called for by the ordinances and permits checked or prepared and checked by this department.

This amount exceeds that of any previous year in the history of Los Angeles.

Reference is made to the order system designed by the undersigned through which 43,512 orders from the Council and Board have passed since its installation. Its usefulness and flexibility has been further demonstrated as the city increases in area and the Engineer's office increases in varied departments.

Respectfully submitted,  
H. Z. OSBORNE, JR.,  
Engineer of Street Improvements,  
Plans and Proceedings.

## DETAILS OF PEOPLES WATER PLAN.

Every single disputable point in the Peoples Water reorganization has been agreed to by the conferees, representing all the various sorts of securities.

One more meeting only will be held, at which the completed reorganization plan will be submitted by the lawyers having the matter in hand, of drafting the various clauses, already agreed, to seriatim. According to one of the committeemen, there is no longer any possibility of a failure to agree.

The plan is precisely as set forth in this column a couple of weeks ago, with the following not very important modifications:

1. The name of the new company, which is to take over the Peoples Water Company through foreclosure sale, is to be the East Bay Water Company.

2. Instead of 2,000 shares of common stock, as at first suggested, 6,000 shares of new common are to be issued in exchange for the present common stock. Frank C. Havens is to receive a fair proportion of these, and in the event of a sale to the transbay water company to be organized by Rudolph Spreckels, Havens is to receive a sum in cash, which is understood to be in the neighborhood of \$250,000.

The most important point in the new reorganization is, that the Peoples Water bondholders, from the very beginning will receive about 7 per cent annually on about 50 per cent of the par value of their present holdings. Later, should the business flourish, the Series "B" preferred stock may be counted upon to yield a further return.

## San Francisco Street Work.

SAN FRANCISCO—During the past week the following street improvements were ordered by the Board of Supervisors:

Cyrus place, from Broadway to its southern termination, by the construction of an asphalt pavement.

Crossing of Twenty-eighth avenue and Judah street, by the construction of curbs, sidewalks, broken rock pavement and sewers.

Richland avenue, from Andover street to Murray street, by the construction of curbs, a 24-foot strip of basalt blocks contiguous to railroad tracks and asphalt on remainder of the roadway.

Congo street, from 75 feet south of Flood avenue to Mangels street, by the construction of curbs, catchbasins, culverts and a combination of brick and asphalt pavement.

Santa Rosa avenue, from San Jose avenue to Southern Pacific Railroad, by the construction of curbs, sidewalks and asphalt pavement.

Andover street, between Courtland avenue and Park street, by the construction of curbs, sidewalks, catchbasins, culverts and combination of basalt and asphalt pavement.

De Wolf street, from Lawrence avenue to the bridge over the Ocean Shore Railway, by the construction of curbs, sidewalks, catchbasins, culverts and asphalt pavement.

# State Water Problems Conference.

## Staff Article

The Water Problems Conference, which is an official State body, opened its second meeting at the State Railroad Commission headquarters in San Francisco on the 26th of October. The meeting was in the nature of a hearing, at which experts on various angles of water matters are presenting information so that the conference may be able to recommend to the Legislature measures which will co-ordinate all water problems.

C. E. Grunsky, consulting engineer of San Francisco, said the big difficulty at the present time in the development of water projects is the lack of stability of bonds, which frequently make it necessary for a district to pay much more for required work than it would cost at a cash price.

Grunsky suggested that the State Board of Public Works, which would succeed the Reclamation Board, also could handle all other engineering matters under the State, as well as other work now done under the State Water Commission, the State Conservation Commission and the State Engineering Department.

In order to stabilize bonds issued for irrigation, reclamation or drainage work, Grunsky would have the paper issued with the security of the State behind it irrespective of the success or failure of the project upon which the bonds were based. However, the property in the district upon which the bonds were issued would be called upon to pay the interest and sinking fund. At the present time only the district, with State approval, has been behind the bonds, with the result, he said, that through subterfuge, they are sold at much below par, frequently causing work to cost 20 and 30 per cent more than it should.

The engineer declared that the State took a step in the right direction when it created the Reclamation Board, and now to guarantee the success of future water projects it must go further and create a Board of Public Works. He believed that a constitutional amendment would be best to give this Board a sound foundation and also would be required to permit the State to stand behind all district irrigation, drainage or flood control projects.

A comparatively simple method of lending stability to old water district—irrigation, reclamation and drainage—bonds was suggested to the State Water Conference by Charles P. Eells, a bond attorney of San Francisco, one of the experts of the State in this branch of the law.

Eells said he did not believe it would be necessary for the State to lend its credit to water districts to stabilize their bonds; a few changes in the law supply would be required.

Three reasons were given by him for the poor market which greets this class of paper. They were:

First, the legal procedure for the issuance of such bonds is so elaborate that it is difficult to tell whether they conform to all requirements of the law.

Second, there is no limit on the amount of bonds to be issued, with the result that the prospective buyer is always afraid of an over-issuance of bonds which would bankrupt the district.

Third, the taxes to pay for the bonds are levied and disbursed by officers elected by the district, and these facts Eells regarded as destroying the confidence of the bond public.

The attorney suggested that all present laws relating to issuance of water district bonds be repealed and statutes similar to the present school district bond laws be submitted for them.

There is no difficulty in selling school bonds, because there is a limit on the amount that can be issued and the taxes are levied by the Board of Supervisors and not by the district trustees.

Thus while school bonds bearing 5 per cent interest find a ready market at a premium, Eells said that water district bonds bearing six and seven per cent interest have difficulty in finding a market at a discount.

Eells thought a limit of 25 per cent of the assessed value of the property in the district would be suitable for water district bonds.

A flood control idea old in the Alps of Switzerland, Germany, Austria and France was offered by M. V. Hartranft of Los Angeles.

This plan consists of building small check dams across ravines and canyons to catch the debris and retard the flow of the water. This plan is being tried out in some of the ravines of Los Angeles, Hartranft said, with much success. Hartranft added that although area back of the dams fills up with debris, this material had a water holding capacity of from 30 to 45 per cent and acts as a reservoir anyway.

Summer flow has been maintained in streams heretofore dry during the arid seasons by these "saturation" reservoirs and barren sides of the ravines have begun to grow willows which also retards the run-off.

The State Water Problems Conference learned finally that Sacramento Valley floods cannot be controlled by storage reservoirs. The by-pass plan is the only feasible plan.

E. G. Hopson, supervising engineer for the United States Reclamation Service for the Pacific Coast, told the members of the conference that the use of all storage reservoir sites available would affect the floods "only to an insignificant extent."

As a result of Hopson's statement it was established definitely that the by-pass system of flood control is the only one possible for the Sacramento Valley.

The conference adjourned until Monday, November 27th, when hearings will be continued.

It was decided at the November meeting to hear experts of power companies, irrigation companies, reclamation districts and irrigation districts. These papers probably will be more special in nature than those delivered at the conference which just closed.

## Railroad Commission.

Mt. Tamalpais and Muir Woods Railroad—Mill Valley residents have complained against the abandonment during the winter of the operation of its main line and also complaining of alleged irregularity at times in the train schedule.

Union Home Telegraph and Telephone Company—To borrow \$21,900 on notes to pay interest to accrue on \$182,500 of its six-year, 6 per cent, debenture bonds, which have been sold.

Western States Gas and Electric Company—Has applied for leave to draw down \$86,947.64 from the trustee of the bond issue, to pay for a hydraulic power plant and gas mains.

## Appellate Court.

By a decision of the Appellate Court the property owners along the old petroliothic street in Antioch, Contra Costa County, must pay the Raichs Improvement Company for the work done by it. This decision sustains the contention of City Attorney Greene.

Several years ago the city trustees entered into a contract with Contractor Swain for the petroliothic streets throughout the main section of town. The work was paid for by the property owners but in about a year the streets fell to pieces.

Later the city trustees decided to put down a better pavement and gave a contract to the Raichs Improvement Company for the work. The property owners, or rather some of them, alleged that so long as they had paid for one street improvement they were not liable for another. In order to settle the dispute the action was brought in the Superior Court. Judge R. H. Latimer sustained the contention of the property owners, merely to allow the matter to go to the high court. The decision means that the streets must be paid for a second time.

## ETCH-ETCHY WAR OPENED.

Irrigationists in the San Joaquin Valley have been quick to protest against the proposed hastened development of the Etch-Etchey water project. Declaring that any attempt on the part of the city to use the mountain sources until the nearby supply has been exhausted, is against the provision of the Raker bill, a formal protest has been made to Mayor Rolph.

## Sawtelle Paving.

At the special meeting of the Sawtelle trustees it was decided to drop the proposition of paving Santa Monica boulevard for the present at least, owing to a point of law which would prevent the city disposing of the bonds to pay for the work. A communication was received from the Clark & Henery Construction Company pointing out the error. The opinion of City Attorney C. D. Ballard, in which he advised the city to drop the proposition, was presented.

# ITEMS OF INTEREST.

Collected by GEORGE NELSON, C. E.

The Southern Counties Gas Company is making a strong bid for the use of natural gas in the lighting of Santa Ana streets. At a meeting of the street lighting committee, composed of citizens having in charge a project to get ornamental street lights for this city, an offer was made that is being investigated.

The gas company stated that it would agree to furnish the gas and maintain the lights for \$9.95 per year per light.

Whittier is to be supplied with natural gas, to be piped from the Standard Oil fields. The announcement was made by President Bain of the Southern Counties Gas Company, who stated that work will be rushed to complete the four-inch main to the Standard wells before the rains set in.

An official communication, announcing the award of contracts to build for the Government three submarines, was received from Secretary of the Navy Josephus Daniels by officials of the California Shipbuilding Company. The communication stated that the contracts were being prepared for signature.

P. E. Hatch, treasurer of the new shipbuilding company, stated that plans were being evolved whereby the Government will be given a free site at the Long Beach harbor for submarine repair shops, subsidiary to the naval base that the entire Southland is anxious to see established in the Los Angeles harbor.

Bids for the construction of the six-story warehouse on Municipal dock No. 1, at the outer harbor, Los Angeles, were opened by the harbor commission. The lowest bid was for approximately \$117,000. The city is to furnish the materials, and the contract is for labor and supervision only.

The harbor engineers were instructed by the commission to check up the bids, and also to prepare an estimate of what it would cost the city to do the work itself.

Regular sinking fund requirements aggregating \$500,000, which fell due November 1, will be met promptly by the Union Oil Company, according to a statement given out at the company's offices in the Union Oil building.

The payment will be divided into two parts, \$450,000 applying on the collateral trust 6 per cent serial gold notes and \$50,000 on the sinking fund of the Mission Transportation and Refining Company. These sums with others disbursed for similar purposes make a total of \$2,147,000 paid out by the Union so far this year.

The committee named by the Martinez Development Board to confer with the City Council relative to a bond issue to provide a municipally owned

water supply is gathering all facts needed and will present complete data showing the advantage of such ownership by the city. The committee is composed of A. Baccilliere, T. B. Swift, J. E. Miller, A. E. Dunkel and Henry J. Curry, all energetic workers in the city's interest.

There is a general sentiment here that Martinez as it proceeds on its new growth should establish municipal ownership of all public utilities. The scope of the committee's work will probably be widened to include other propositions.

The massive construction work of the new Shell oil refinery at Martinez is spreading out day by day over the extensive site and nearly every part of the area now has some portion of the plant going up on it. Slides in the Panama Canal have delayed probably for three weeks, until shipment can be made by railroad, large quantities of steel, piping and other material shipped from the East, but the big force of men is kept busy on other features of the work.

Building is going ahead so fast here that the Shell Company has lost the fear that its employees will not have enough residences to accommodate them and has given up the idea of constructing homes. Quite a number of buildings have been put up for offices and draughting quarters and for the foremen and superintendents in charge of the construction work now under way. About every foot of the acreage bought by the Shell Company will be utilized for the purposes of the refinery.

Finding that its business has more than doubled in the last four months, the Western Union Telegraph Company is fitting up a main office up-town. Its location up to this time has been at the Southern Pacific stations only. Increase in the telegraph business indicates progress in the city.

The City Council has ordered the laying of concrete walks on several streets that are receiving a new traffic through the advance of the city. Much street improvement is in progress in subdivisions, and bungalows are going up on all these new tracts.

Arkansas mills have just signed a contract with the Imperial Russian Government to furnish 300,000,000 feet of red oak for military purposes within the next few weeks. One order of 6,000,000 railroad ties is being rushed to complete the double track railway between Riga and Moscow.

Estimates of the value of the harbor holdings of the city by the City Auditor do not comport with what they are estimated to be worth by the Harbor Commission.

The City Auditor has prepared his statement of the value of municipal property owned by the city of Los An-

geles, and places the total at \$66,250,681.

The lowest estimate of the value of the city's harbor holdings by the harbor authorities is \$100,000,000, without including the development work done by the city.

Similarly low is the value of the water department and aqueduct, placed by the auditor at \$41,500,000. The aqueduct is valued alone at \$75,000,000 by William Mulholland, and the water works at not less than \$12,000,000.

The wonders of Los Angeles harbor and its facilities for handling the commerce of the Southwest were shown Hon. J. C. Clements, of the Interstate Commerce Commission, by a delegation from the Chamber of Commerce and representatives of the Harbor Commission. The party went by automobile, and after inspecting the harbor facilities they were entertained at luncheon at the Virginia by the Long Beach Chamber of Commerce.

The Madera Canal and Irrigation Company has under consideration a project to build an irrigation dam across the San Joaquin river at Polasky, or a short distance from Friant, near the mouth of Hildreth creek. The dam would store part of the flood waters of the river and would supply water to irrigate, it is estimated 120,000 acres of land, chiefly in Madera County. The dam would be 230 feet high from bedrock and would back the water for eleven miles, covering about 4,000 acres. The level of the canal would be 400 feet above the sea, making it possible to irrigate much of the high plain land of Madera County.

It is said that this site was chosen by the government engineers some time ago as the most feasible for a dam across the San Joaquin. The water would be diverted into Cottonwood Creek, and the land near Borden, Berenda and Madera would be served.

While Edison was building his first electric lighting plant in New York City another and smaller plant was being completed at Appleton, Wis. This was a small plant, the generator being driven by water power from a turbine wheel. The plant furnished current for but a few incandescent lamps but it has the honor of being the first commercial incandescent lighting installation in the world.

Two thousand feet of moving picture film was taken at Modesto, showing the dairy and alfalfa industries. The films are for the use of the University of California, for whom they were taken. They will be used in demonstrations and lectures.

# Technical Societies.

## SAN FRANCISCO ASSOCIATION OF MEMBERS OF THE AMERICAN SOCIETY OF CIVIL ENGINEERS.

### Officers for 1915.

President—A. M. Hunt.  
Vice-Presidents—H. L. Haehl, M. C. Couchot.  
Secretary—E. T. Thurston, Jr.  
Treasurer—P. E. Harroun.  
Board of Directors—M. C. Couchot, H. L. Haehl, A. M. Hunt, P. E. Harroun, E. T. Thurston, Jr., C. H. Snyder, C. B. Wing.

Weekly luncheons in College Room, Hoffbrau Cafe, Wednesdays at 12:30. Engineers welcome; Informal; no program.

Regular meetings are held bi-monthly at such time and place as may be appointed by the board of directors. The established custom is to meet on the third Fridays of February, April, June, August, October and December.

Address E. T. Thurston, Secretary, 213 Mechanics' Institute Bldg., Post street, San Francisco.

## SAN FRANCISCO CHAPTER AMERICAN INSTITUTE OF ARCHITECTS.

233 Post Street.

President—W. B. Faville.  
Vice-President—Edgar A. Matthews.  
Sec. Treas.—Sylvain Schnaittacher.  
Trustees—James W. Reid and Henry Schulze.  
Monthly meeting the third Thursday.

## STATE BOARD OF ARCHITECTS.

### Northern District.

John Bakewell, President.  
Sylvain Schnaittacher, Sec. Treas  
Joseph C. Newsom, Edgar Matthews,  
One vacancy.

## LOS ANGELES AND SOUTHERN CALIFORNIA.

## AMER. SOC. OF CIVIL ENGINEERS.

### So. Calif. Association of Members.

President.....Chas. T. Leeds  
First Vice-President.....Geo. S. Blnckley  
Second Vice-President.....H. Hawgood  
Treasurer.....Chas. H. Lee  
Meetings bi-monthly. Address all communications to W. K. Barnard, Secretary, 701 Central Bldg., Los Angeles.

## AMERICAN INSTITUTE ELEC. ENGINEERS—Los Angeles Section.

Chairman.....E. R. Northmore  
Secretary.....C. G. Pyle  
Asst. Secretary.....Edward Woodbury  
EXECUTIVE COMMITTEE — J. A. Lighthipe, J. E. Barker, Geo. A. Damon, A. W. Nye.

Regular meetings thrid Tuesday in each month. Address all communications to C. G. Pyle, Secretary, Standard Underground Cable Co., 914 Hilbernian Bldg., Los Angeles.

## ENGINEERS AND ARCHITECTS' ASSOCIATION OF SOUTHERN CALIFORNIA.

President.....Samuel Storrov  
Vice-President.....A. H. Koebig  
Second Vice-President.....W. A. E. Noble  
Sec. Treas.....H. Z. Osborne, Jr.  
DIRECTORS—Arthur S. Bent, J. J. Rackus, A. C. Martin, Kenneth Shibley.  
Regular monthly meetings as arranged by program committee. Address all communications to H. Z. Osborne, Jr., Secretary, care City Engineer's Office, Los Angeles.

## AMERICAN INSTITUTE OF ARCHITECTS—SOUTHERN CALIFORNIA CHAPTER.

President.....Albert C. Martin  
Vice-President.....S. Tilden Norton  
Secretary.....Bernard Parmentier  
Treasurer.....August Wackerbarth  
DIRECTORS—J. C. Allison, J. J. Blick, J. J. Backus.

Regular meetings second Tuesday evening each month. Address all communications to A. R. Walker, Acting Secretary, 1403 Hibernian Building.

## AMER. SOC. OF MECHANICAL ENGINEERS—Los Angeles Section.

Chairman.....Walter H. Adams  
Secretary.....Ford W. Harris  
EXECUTIVE COMMITTEE—W. H. Adams, Ford W. Harris, O. J. Root, W. W. Smith, Paul Weeks.  
Address all communications to Ford W. Harris, 1023 Higgins Bldg., Los Angeles.

## PACIFIC COAST SOCIETY OF ENGINEERING CONTRACTORS.

President.....Geo. F. Pennebaker  
Vice-President.....W. A. Russell  
Secretary-Treasurer.....F. C. Ayars  
DIRECTORS—Geo. F. Pennebaker, A. Russell, W. W. Brier, Geo. A. Rogers, L. S. Atkinson, Wm. Ledbetter, L. G. Garnsey, F. A. Hudson, F. H. Stout, C. L. Hyde, F. C. Ayars.

Address all communications to Frank C. Ayars, Secretary, 505-6 Douglas Bldg., Los Angeles.

## STATE BOARD OF ARCHITECTURE, SOUTHERN DISTRICT.

President.....J. P. Krempel, L. A.  
Secretary.....F. L. Roehrig, L. A.  
Member.....Octavius Morgan, L. A.  
Member.....S. P. Hunt, L. A.  
Member.....W. S. Hubbard, San Diego.  
Address all communications to Fred K. L. Roehrig, Secretary, 721 American Bank Bldg., Los Angeles.

DIRECTORS—A. J. Crawford, Wm. McArthur, J. J. Connor, W. R. Simons, C. V. Fowler, J. Burnstein, J. H. Judy, W. E. Stradley, L. B. Webster, E. Way-

## BUILDERS ASSOCIATION OF SAN DIEGO—Second Floor K. or P. Bldg., Corner Third and E Streets, San Diego.

President.....Wm. R. Weckerly  
Vice-President.....Chas. Kelly  
Treasurer.....Max Winter  
Secretary.....D. J. Miller  
DIRECTORS — Wm. R. Weckerly, Chas. Kelly, Max Winter, D. J. Miller, Robt. Houghton, H. V. Wenger, R. M. Gilson.

Address all communication to D. J. Miller, Secretary, Builders' Association, Second Floor, K. of P. Bldg. San Diego.

## SAN DIEGO ARCHITECTURAL ASSOCIATION.

President.....J. B. Lyman  
Vice-President.....Charles Cressy  
Secretary.....Robt. Halley, Jr.  
Treasurer.....G. A. Hansen  
Monthly luncheon at Rudder's first Monday each month. Address all communications to Robt. Halley, Jr., 314 Union Bldg., San Diego.

## PERSONAL.

Engineer Davenport Bromfield with a force of surveyors has commenced the work of subdividing the old Selby ranch at Athelton, valued at about \$500,000.

F. C. Paulin died at his home in Brentwood Park. He was 67 years of age.

Mr. Paulin was born in Woodstock, Ontario, Can., and came to California in 1900. Here he became interested almost immediately in Imperial lands, and promoted, organized and incorporated the cities of Imperial, Brawley, Calexico, Heber and Silsbee.

He was president of the Imperial Valley Improvement Company, the San Joaquin Valley Home Land and Realty Company and the Imperial Compress Company.

Amos Towne, formerly engaged in the electrical business in Long Beach, has just received patents on an electric water purifier. Towne claims his device will purify water taken from the Colorado River in half a minute, and that water treated by his invention is made sufficiently pure for use in storage batteries.

### APARTMENT HOUSES

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$5,000. Architect, Charles J. I. Devlin, Pacific Bldg., S. F. Owner, Daniel Moran. Location, southeast corner Octavia and Hayes. Will contain five stores on the first floor and a total of 10 rooms on the upper floors. Interior finish pine

and elm with hardwood floors. Wall beds. Steam heat and hot water supply. Bath rooms finished in tile. Patent store fronts. Exterior covered with cement plaster. Plans complete and figures being taken.

**SAN FRANCISCO**—Apartment house, 4 story and base, brick and steel. Cost not stated. Architect, Charles Peter Weeks, Mutual Bank Bldg., S. F. Owners, Lange & Beigstrom, Sharon Bldg., S. F. Location, Post between Jones and Leavenworth. Will contain a number of two and three room suites with wall beds and private bath rooms. Interior finish pine and hardwood. Hardwood floors. Steam heat, elevator service and hot water supply. Oil burning furnace. Tile in bath rooms. Exterior faced with pressed brick trimmed with terra cotta. Plans being prepared and work to be done by Day Labor under the direction of the owners.

**SAN FRANCISCO**—Apartment house, 2 story and base, frame, \$5,500. Architect, W. S. Rhodes, 3574 16th street, S. F. Owner, Henry Sipple. Location, 19th near Lexington. Will contain four suites of three rooms and bath. Interior finish pine and elm panels. Some hardwood floors. Tile bath rooms. Automatic water heaters. Exterior covered with rustic and cement plaster. Plans complete and figures being taken.

**SAN FRANCISCO**—Apartment house, 3 story and base, brick. Cost not stated. Architect, Edward G. Bolles, 650 Market street, S. F. Owner's name withheld. Location 18th and Valencia streets. Will contain stores on the first floor and a number of two and three room suites on the upper floors. Interior finish pine throughout with some hardwood floors. Patent store fronts. Steam heat and hot water supply. Wall beds and tile baths. Exterior faced with cement plaster. Plans being prepared.

**SAN FRANCISCO**—Apartment house, 2 story and base, frame, \$10,000. Architect, Edward E. Young, 251 Kearny street, S. F. Owner, Thomas Seohle, 363 14th avenue, S. F. Location, west Palm avenue north Euclid. Will contain four suites of four and five rooms and bath. Interior finish pine and elm panels. Hardwood floors. Open fire places. Hot water system. Wall beds. Tile bath rooms. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**BERKELEY, ALAMEDA CO., CAL.**—Apartment house, 2 story and base, brick and frame, \$22,000. Architect, James W. Plache, Acheson Bldg., Berkeley. Owner, W. Heywood. Location, University avenue and Grove. Will contain four stores and ten suites of three rooms and bath. Interior finish pine and hardwood with some hard-

wood floors. Steam heat and hot water supply. Wall beds. Tile bath rooms. Patent store fronts. Exterior faced with pressed brick veneer and cement plaster. Plans complete and figures being taken.

**SAN FRANCISCO**—Apartment house, 5 story and base, brick and steel, \$200,000. Architects, Smith & Stewart, 244 Kearny street, S. F. Owner's name withheld. Location, Mission near 5th. Will contain 300 rooms arranged in suites of two and three rooms on the upper floors and a number of modern stores on the ground floor. Interior finish pine and elm. Steam heat, elevator service, hot water system, oil burning plant and vacuum cleaning. Tile bath rooms and wall beds. Patent store fronts. Exterior faced with pressed brick trimmed with terra cotta. Plans being prepared.

**BERKELEY, ALAMEDA CO., CAL.**—Apartment house, 3 story and base, frame, \$23,000. Architect, Eugene K. Martin, 2192 Shattuck avenue, Berkeley. Owner, G. W. Higgins. Location, Virginia and Euclid avenue. Will contain 16 suites of three rooms and bath. Interior finish pine. Some hardwood floors. Rector system of heating, hot water supply and vacuum cleaning. Bath rooms tile. Wall beds. Exterior covered with cement plaster. Plans complete and architect taking sub-figures.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Apartment house, 3 story and base, frame, \$15,000. Architect, W. B. Thomas, Yosemite Theatre Bldg., Stockton. Owner, A. J. McPhee. Location, northeast corner San Joaquin and Poplar streets. Will contain a number of two and three room suites. Interior finish pine and elm with some hardwood floors. Central heating system, hot water supply and wall beds. Bath rooms tile. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

### Contracts Awarded

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$30,000. Architects, Falch & Knoll, Hearst Bldg., S. F. Owner, Isabella Daisley. Contractors, Higginson Co., Humboldt Bank Bldg., S. F. Contract price, \$30,000.

### BANKS

**RAVENDALE, LASSEN CO., CAL.**—Bank, 2 story, brick. Cost not stated. Architect's name not given. Owners, California Land and Power Co., W. B. Edwards, Pres., Havendale. Will contain banking rooms on first floor and hotel rooms above. Interior finish pine. Central heating system and hot water supply. Exterior faced with pressed brick. Plans complete and work to be done by Day Labor.

## BATH HOUSES.

**SAN RAFAEL, MARIN CO., CAL.**—Bath house filters. Cost not stated. Engineer, Town Engineer, San Rafael. Owners, Town of San Rafael. In the matter of filters for the Municipal Baths, the Council at its last meeting ordered the Clerk to readvertise for bids for the same. The bids will be received at the December session.

## BONDS

**CALEXICO, IMPERIAL CO., CAL.**—November 29th is the date set to decide the question of issuing and selling bonds of \$50,000, the proceeds to be used in the laying out of a civic center for this city.

Preparations are being made to call an election for voting bonds of \$100,000 to finance the construction of a water and sewer system for Calexico. Further information may be had from City Clerk Edward Browne.

**FORTUNA, HUMBOLDT CO., CAL.**—The Fortuna High School District voted bonds of \$24,000 last week to provide for the construction of a new high school building. The site of A. G. Campbell has been selected and plans will be ordered shortly for the building.

**LOS ANGELES, CAL.**—A million dollar bond election is being sought here to solve the water question in Colegrove, Hollywood and East Hollywood.

**PORTLAND, ORE.**—A call for bids has been issued for the purchase of \$600,000 worth of bonds, the proceeds of the sale to be used in the construction of the Suttles Lake Irrigation project in Jefferson County. Bids will be opened on November 22nd.

The cost of the project is given at \$533,330; the project consists of 35,000 acres, the cost per acre being \$14.15 for metal flume, which could be reduced to \$12.65 per acre by using wood flume.

**MARTINEZ, CONTRA COSTA CO., CAL.**—An election will be held in December to vote bonds for the construction of a new boulevard to Mt. Diablo from the tunnel road at Martinez. Plans for this work have already been completed by County Surveyor R. R. Arnold.

**FAIRVIEW, IDAHO.**—An election will be held November 22nd to vote bonds of \$22,000, for the construction of water works. Charles Gilbert is the City Clerk.

An election will be held in Council, Idaho, in the near future to vote \$15,000 to provide funds for the erection of a court house.

**REDWOOD CITY, SAN MATEO CO., CAL.**—An election providing \$18,000 for additional school facilities carried here last week. Two propositions were voted upon. The first for additional school sites and the second for building new schools.

**MERCED, MERCED CO., CAL.**—An election will be held next April to vote bonds for the purchase of additional fire apparatus. Other propositions may be included but as yet they are unknown.

**SACRAMENTO, CAL.**—Owing to the fact that Sacramento County will be reformed so that not more than 200 votes will be included in a precinct, the road bond election probably will not be held until after May 1, 1916.

**LOS ANGELES, CAL.**—The City Council has closed negotiations for the sale of \$5,474,000 of the 1914 power bond issue. An ordinance and a resolution has been passed providing for the acceptance of an offer of the Torrence-Marshall Company of Los Angeles to buy \$1,020,000 worth immediately.

**SAN BERNARDINO, SAN BERNARDINO CO., CAL.**—Protest has been filed with the Board of Supervisors by E. H. Rollins & Sons of San Francisco, bond buyers, regarding the disposition at private sale of \$625,000 in county highway bonds, the last block of the \$1,750,000 issue, to the Anglo and London Paris National Bank when notices had been sent out inviting bids from other houses.

The San Francisco firm declares that the action of the Board was unfair and against the interests of the county. The Rollins firm demands that the sale be rescinded and the bonds advertised and sold in competition.

**DENAIR, STANISLAUS CO., CAL.**—A petition has been filed with the County Supervisors asking that a lighting district be formed to be known as the Denair Lighting District of Stanislaus County. Further information may be had from County Clerk H. Benson at Modesto.

**MARICOPA, KERN CO., CAL.**—Bonds in the sum of \$25,000 for the erection of a new school building failed to carry by two votes. Another election will probably be called by the board of trustees.

**LA CANADA, LOS ANGELES CO., CAL.**—The proposed bond issue in the sum of \$25,000 for the erection of a new school building failed to carry by two votes. Another election will probably be called by the board of trustees.

**BAKER, ORE.**—Indications are that the election to be held here November 13th for the purpose of voting on the question of issuing \$125,000 bonds with which to construct a high school building, will carry.

Plans for the proposed building have already been submitted by several architects, although none has been selected.

**POMONA, LOS ANGELES CO., CAL.**—An election to vote bonds of \$50,000 for improvements will be held on January 11th, 1916. The following is a list of the improvements:

For grading, culing and covering shoulders of streets paved by Magill Construction Company this year, \$15,000.

For storm drain construction on Garey avenue and Fulton road, \$15,000.

For road extension and bath house in Ganesha Park, together with underground sprinkling system in Lincoln Park, \$10,000.

For paving intersection of Fifth street and installing culverts on East side of intersecting streets from Reber to Thomas street, \$5,000.

For construction of a building suitable for use by Chamber of Commerce, \$5,000.

**BAKERSFIELD, KERN CO., CAL.**—At a recent meeting of the school board the proposition of calling an election to vote bonds for the erection of a school building for the Kruse Terrace residents was taken under consideration. Tentative plans for the proposed structure were submitted by three Bakersfield architects, J. M. Saffell, O. L. Clark and T. B. Wiseman, and from these estimates for the amount of the bond will be made.

**SANTA CRUZ, SANTA CRUZ CO., CAL.**—Five bids were opened for the purchase of the \$10,000 school bond issue by the County Supervisors last week. When the bonds have been awarded bids for the proposed building will be called.

## BRIDGES, DAMS AND HARBOR WORK

**YOLO-BY-PASS, YOLO CO., CAL.**—Bridge, steel and reinforced concrete. Cost not stated. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Bids will be opened on November 29th for constructing a plate girder 80-foot clear span bridge with reinforced concrete approaches. Total length 141 feet. All former bids for this work were rejected. An official proposal appears in another column of this issue.

**SACRAMENTO, CAL.**—Bridge construction, reinforced concrete, \$2,850. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. No action of awarding the contract to J. W. Terrill, 1111 29th street, Sacramento, for the construction of the bridge in Del Paso Park was taken at the last meeting of the Park Board. The bid of Terrill was the lowest bid submitted, but was above the engineer's estimate. Terrill bid \$3,100, while the estimate was placed at \$2,850.

**MADERA, MADERA CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor, Madera. Owners, Madera County. The County Supervisors have authorized the construction of a new bridge over the creek near the Munich school house. Further information relative to this work may be had from the County Engineer at Madera.

**MYERS CREEK, IMPERIAL CO., CAL.**—Bridge construction, steel and concrete, \$25,320. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Holland Construction Co., San Diego, submitted the lowest figure for constructing the reinforced concrete and steel bridge over Myers Creek in Imperial County. Bids were opened by the State Highway Commission. Holland's bid was \$15,600 and the engineer's estimate is \$25,320.33. No contract has been awarded.

**BAKERSFIELD, KERN CO., CAL.**—BRIDGES and grading. Cost not stated. Engineer, County Surveyor, Bakersfield. Owners, Kern County. At a recent meeting of the County Supervisors the Clerk was instructed to advertise for bids until December 9th for bridges and grading of section 7 of the Caliente-Kernville highway, and for culverts, grading and paving of section 1-A of the Bakersfield-McKittrick highway.

**Contracts Awarded.**

SANGER, FRESNO CO., CAL. — Bridge, timber, \$1,092. Engineer, County Surveyor, Fresno. Owners, Fresno County. Contractors, Benson & Johnson, Kingsburg. Contract price, \$1,092.

HANFORD, KINGS CO., CAL. — Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor, Hanford. Owners, Kings County. Contractors, Adell-Cortwright Concrete Pipe Co., Hanford. Contract price not stated.

NEWVILLE, GLENN CO., CAL. — Bridge, reinforced concrete, \$6,000. Engineer, County Surveyor, Willows. Owners, Glenn County. Contractors, Cotton Bros., 549 32nd street, Oakland. Contract price, \$6,000.

**CHURCHES**

MENLO PARK, SAN MATEO CO., CAL. — Chapel, 1 story, reinforced concrete. Cost not stated. Architects, Shea & Lofquist, Bankers' Investment Bldg., S. F. Owners, St. Patrick's Theological Seminary. Construction will be fireproof. Interior finish pine, hardwood, art glass and ornamental plaster. Heat from central plant. Exterior faced with cement plaster. Preliminary plans complete.

MANTECA, SAN JOAQUIN CO., CAL. — Church, 1 story and base, frame. Cost not stated. Architect, Peter L. Sala, Commercial and Savings Bank Bldg., Stockton. Owners, Roman Catholic Church. Rev. Father W. McTough, pastor. Will contain main auditorium and Sunday school rooms. Interior finish pine. Some art glass windows. Exterior covered with rustic. Plans being prepared.

**FACTORIES AND WAREHOUSES**

SAN FRANCISCO — Factory, 4 story and base, reinforced concrete, \$200,000. Architect, Charles Peter Weeks, Mutual Bank Bldg., S. F. Owners, John B. Bollman Co. Location, 4th and Brannan streets. Will be fireproof throughout with concrete walls, floors and roof slabs. Interior finish pine. Hollow tile partitions, metal window sash and frames. Elevator service, steam heat, oil burning equipment and hot water system. Exterior faced with cement plaster. Plans complete and figures being taken.

PALO ALTO, SANTA CLARA CO., CAL. — Factory, 1 story, concrete and frame, \$5,000. Architect's name not given. Owners, Boden Automatic Hammer Co., 162 Second street, S. F. Will contain main factory room and offices. Cement floor. No interior finish. Exterior cement and corrugated iron. Plans being prepared.

LOS ANGELES, CAL. — Factory, 10 story and base, reinforced concrete. Cost not stated. Architect, A. C. Martin, Higgins Bldg., L. A. Owner's name withheld. Location near Alameda street, covering an area of 100 by 100 feet. Fireproof construction, reinforced walls, floors and roof slabs. Hollow tile partitions, metal window sash and frames. Elevator service and steam heat. Oil burning equipment. Exterior cement plaster. Plans being prepared. Bids being taken for reinforcing steel.

SEATTLE, WASH. — Warehouse addition, 4 story, reinforced concrete. Cost not stated. Engineer, Port of Seattle Commission. Owners, City of Seattle. All bids for the construction of the proposed 4 story reinforced concrete addition to the Port of Seattle, Whatcom avenue warehouse have been rejected and the project postponed indefinitely. Bids which were opened showed 11, brandt low bidder at \$69,500, and ranging from that to \$84,000 by Hoy & Co, railroad contractors of Spokane.

**FIRE HOUSES AND JAILS****Contracts Awarded.**

SAN QUENTIN, MARIN CO., CAL. — Motors for prison, \$5,700.90. Engineer, State Engineer, Sacramento. Owners, State of California. Contractors, General Electric Co., S. F. Contract price for 56 motors \$5,700.90.

**FIRE REPORT**

SEATTLE, WASH. — Pier 14 at the foot of Broad street, recently destroyed by fire, and owned by Ainsworth and Dunn Bldg., Seattle, will be rebuilt at a cost of \$30,000. The owners will prepare their own plans for the work.

LOS ANGELES, CAL. — Fire destroyed half of the five-story Douglas building in this city, causing a loss of \$200,000. Preparations are being made to have the structure repaired.

The United States Electrical Manufacturing Company's building on East Third street was destroyed by fire at a loss of \$60,000.

MODESTO, STANISLAUS CO., CAL. — Fire in the basement of the Modesto News caused damage to the amount of \$3,000 last week.

**FLATS**

SAN FRANCISCO — Flats, 3 story and base, frame. Cost not stated. Architects, Smith & Stewart, 244 Kearny street, S. F. Owner, Mrs. Buckmeister. Location, Webster near Herman. Will contain three modern flats of five and six rooms. Interior finish pine with some elm panels and hardwood floors. Open fire places and tile or brick mantels. Tile bath rooms. Automatic water heaters. Exterior covered with cement plaster and rustic. Plans being prepared.

SAN FRANCISCO — Flats, 3 story and base, frame, \$11,000. Architect, August Nordin, Mills Bldg., S. F. Owner, M. C. Mahoney. Location, north Green west of Octavia. Will contain six modern flats. Interior finish pine and elm panels with some hardwood floors. Open fire places and tile or brick mantels. Tile baths. Automatic water heaters. Exterior covered with rustic and cement plaster. Plans being prepared and figures to be called for at once.

SAN FRANCISCO — Flats, 2 story and base, frame, \$5,000. Architect, none. Owners, W. J. Hemminga Co., 1660 Fell street, S. F. Location, east 15th avenue south of California, covering an area of 25 by 64 feet. Will contain two flats of five and six rooms. Interior finish pine and elm panels with some hardwood floors. Open fire places and tile mantels. Automatic

water heaters. Exterior covered with cement plaster and rustic. Plans complete and work to be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL. — Flats, 2 story and base, frame, \$4,000. Architect, Eugene K. Martin, 2192 Shattuck avenue, Berkeley. Owner, L. Berovich. Location, corner of Cedar and Arch streets. Will contain two flats of five and six rooms. Interior finish pine and elm panels with some white enamel and hardwood floors. Open fire places and tile mantels. Bath rooms tile. Automatic water heaters. Exterior covered with cement plaster. Plans being prepared.

PITTSBURG, CONTRA COSTA CO., CAL. — Flat and store, 2 story and base, frame. Cost not stated. Architect, A. W. Cornelius, Merchants' National Bank Bldg., S. F. Owners, Grossben Bros. Will contain a store on the first floor and modern flats above. Interior finish pine. Exterior cement plaster and rustic. Plans complete and work to be done by Day Labor.

**GARAGES**

SAN FRANCISCO — Garage, 2 story and base. Class A construction. Cost not stated. Architects, Smith & Stewart, 244 Kearny street, S. F. Owner's name withheld. Location, California east of Leavenworth. Will cover a large ground area and has been designed for a commercial garage. Construction fireproof. Concrete floors. Machine shop. Exterior faced with cement plaster. Plans being prepared.

LOS ANGELES, CAL. — Garage, 2 story and base. Class C construction. Cost not stated. Architect, Albert C. Martin, Higgins Bldg., L. A. Owners, Tony Milcovitch and Miss T. Garibaldi. Location, Los Angeles street between 5th and 6th streets. Designed for a commercial garage. Concrete floors, metal window sash and frames. Exterior faced with pressed brick. Plans being prepared.

**GOVERNMENT WORK & SUPPLIES****Denver, Colo., Painting.**

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for painting plastering in the U. S. post office at Denver, Colo.:

D. J. Inman, Danville, Ill., \$4,922.  
Alfred Olson & Co., 6451 N. Clark street, Chicago, Ill., \$5,300.

Fairfax Bros. Co., Geneva, N. Y., \$5,650.

A. B. Brockmueller, Milwaukee, Wis., \$6,840.

J. P. Sullivan, 415 Indiana avenue, Chicago, Ill., \$6,931.

W. C. Redlich, 4 Sylvan Court, New York City, \$6,985.

The Denver Dry Goods Co., Denver, Colo., \$7,183.

The Abel-Pedersen Co., Sioux City, Iowa, \$7,497.

W. P. Nelson Co., 202 W. 32nd street, New York City, \$8,689.

Isidor Kissel, San Francisco, Cal., \$9,153.

Thomas H. Muller, Denver, Colo., \$9,323.

Theodore Laurence Painting Co., Kansas City, Mo., \$9,395.

Neptune B. Smyth, Inc., 473 E. 34th street, New York City, \$9,700.

Charles A. W. Rinschede, New York City, \$12,000.

#### Earthwork and Structures.

The following contracts have been awarded for earthwork and structures of the Bowdoin Canal, first unit, Milk River irrigation project, Mont.: To James O'Connor, Saco, Mont., schedules 1 and 2, involving 133,410 cubic yards of excavation and 9,000 cubic yards of overhaul, contract price \$18,618.50; to Jurgens, Booth & Co., Glasgow, Mont., schedules 3 and 4, involving 81,000 cubic yards of excavation, 450 cubic yards of reinforced concrete, 429 square yards dry paving, the placing of 30,000 pounds of steel reinforcement, and the placing in wooden structures of about 12,000 feet, B. M. of lumber. The work is located 17 miles east of Malta, on the Great Northern Railway.

#### Ironstone Canal.

The following is an abstract of the bids received by the U. S. Reclamation service, Montrose, Colo., for excavation, Ironstone Canal:

Mendenhall, Bird & Co., Springdale, Utah, items 1 to 4, \$12,455; 7 to 10, \$17,551.50; 13 to 16, \$9,163; 19 to 22, \$7,957; 25 to 28, \$6,878.

C. B. Sherwood, Rocky Ford, Colo., items 17 and 18, \$5,775; 23 and 24, \$5,742; 29 and 30, \$5,164.50; bid is for all three schedules bid for or none; separate proposition for items 23 and 24 only, \$6,090.

#### Earthwork and Structures.

The following bids were received at the office of the U. S. Reclamation Service at Powell, Wyo., for earthwork and structures, first unit, Franconia Division:

##### Schedule No. 1.

J. E. Hilton, Billings, Mont., \$18,315. Tibbs & Taggart, \$15,090. Threel Bros. & Jolley, Lovell, Wyo., \$16,190.

##### Schedule No. 2.

J. E. Hilton, \$32,330. Tibbs & Taggart, \$29,600. R. M. Lynn, Lovell, Wyo., \$27,076. Threel Bros. & Jolley, \$31,410.

##### Schedule No. 3.

J. E. Hilton, \$32,295. Tibbs & Taggart, \$38,270. Threel Bros. & Jolley, \$32,270.

##### Schedule No. 4.

Threel Bros. & Jolley, \$11,179.80. Security Bridge Co., Minneapolis, Minn., \$10,458.

Billings Engineering and Contracting Co., Billings, Mont., \$10,520.

##### Schedule No. 5.

Threel Bros. & Jolley, \$58,365.50. Security Bridge Co., \$54,628.50.

#### Idaho Falls, Idaho, Furniture.

The contract for installing furniture in the U. S. Post office at Idaho Falls, Idaho, has been awarded to McGuire Cabinet Co., Los Angeles, Cal., at \$1,280.

#### Everett, Wash., Post Office.

In the construction of the U. S. post office at Everett, Wash., for which Hendrickson & Co., Seattle, Wash., are the contractors, conduit manufactured by the National Metal Molding Co., and cabinet and tablet manufactured by the Frank Adam Electric Co. will be used in lieu of those previously named.

#### South Canal, Excavation.

Contract has been awarded to Jurgens, Booth & Co., of Glasgow, Mont., for building structures on the Nelson Reservoir, South Canal. Milk River irrigation project, Mont. The work involves about 25,000 cubic yards of excavation, 1,700 cubic yards of concrete, the placing of 115,000 pounds of steel reinforcement, the erection of 150 linear feet of metal flume, and placing in wooden structures of about 85,000 feet, B. M. of lumber. The estimated price is \$34,081.50.

#### Idaho Falls, Idaho, Post Office.

In the construction of the U. S. post office at Idaho Falls, Idaho, for which the Sound Construction & Engineering Co., Portland, Ore., has the contract, lighting fixtures manufactured by the Reading Chandelier Works will be used in lieu of those previously named.

#### Wood Stave Pipe.

Contract has been awarded to the Pacific Tank & Pipe Co., of San Francisco, Cal., for constructing 3,285 linear feet of 40-inch and 450 linear feet of 24-inch continuous wood stave pipe in connection with the Belle Fourche irrigation project, S. Dak. The pipe is to be of unpainted redwood. The contract price is \$12,454.

#### HALLS AND SOCIETY BUILDINGS

RICHMOND, CONTRA COSTA CO., CAL.—City hall, 2 story and base, reinforced concrete, \$50,000. Architects, James T. Narbett, associated with J. G. Ogdorn, Richmond. Owners, City of Richmond. Location, Macdonald avenue and 23rd street. Fireproof construction. Will contain all city offices. Interior finish pine and hardwood with tile and marble wainscot. Steam heat, hot water supply and oil burning system. Exterior faced with cement plaster. Plans nearly complete.

SACRAMENTO, CAL.—City hall and jail, 4 story and base. Class A construction, \$175,000. Architects, Shea & Lofquist, Bankers' Investment Bldg., S. F. Owners, City of Sacramento. Plans have been completed and approved for the construction of this building and bids will be called for at once. Construction will be fireproof. Will contain all city offices and the jail. Interior finish pine and hardwood with marble and tile wainscot and bases. Steam heat, oil burning equipment and vacuum cleaning. Exterior faced with cement plaster.

VISALIA, TULARE CO., CAL.—Municipal auditorium, 2 story and base, brick, \$35,000. Architects, Cortes & Traver, Rowell Bldg., Fresno. Owners, City of Visalia. An official announcement has been sent out stating that bids will close November 17th for the construction of the Visalia Municipal Auditorium.

#### HOTELS

MARTINEZ, CONTRA COSTA CO., CAL.—Hotel and stores, 3 story and base. Class C construction, \$35,000. Architect, none. Owner, William F. Ohm, 1615 Fell street, S. F. Will contain a number of stores on the first floor and modern hotel rooms and baths above. Interior finish pine. Steam

heat, oil burning equipment and hot water system. Patent store fronts. Exterior faced with cement plaster and pressed brick. Plans complete and work to be done by Day Labor.

LOS ANGELES, CAL.—Hotel and stores, 4 story and base. Class C construction, \$30,000. Architect, Charles H. Kysor, Wright and Callender Bldg., L. A. Owner, A. L. Phillips. Location, 8th near Ruth, covering an area of 55 by 100 feet. Will contain several stores and 60 rooms. Interior finish pine. Patent store fronts, steam heat and hot water service. Exterior faced with pressed brick. Plans complete and figures being taken.

#### IRRIGATION PROJECTS

MODESTO, STANISLAUS CO., CAL.—Concrete facing and curtain wall. Cost not stated. Engineer, Chief Engineer Hermann, Modesto. Owners, Modesto Irrigation District. As the result of re-advertisement for the work of constructing a concrete facing and curtain wall for dam No. 1 of the Modesto Irrigation District, due to the refusal of John Monk, lowest bidder on former advertisement at a figure of \$57,971, to proceed with the work, the district will have to pay at least \$15,000 more than his figure for the work. This was shown at the opening of bids by the board of directors the lowest of five bidders being Peart Bros. of Oakdale at a figure of \$72,800. The other bids were: Tibbits-Pacific Co., S. F., \$77,770; Contra Costa Construction Co., S. F., cost plus 15 per cent, with guarantee not to exceed \$75,000; Teichert & Ambrose of Sacramento, \$80,540; Ross Construction Co., S. F., \$78,050. Action will be taken on the bids in a few days.

MODESTO, STANISLAUS CO., CAL.—Culvert, concrete, \$1,520. Engineer, Chief Engineer Hermann, Modesto. Owners, Modesto Irrigation District. Secretary C. S. Abbott of the Modesto Irrigation District has been instructed to communicate with the Southern Pacific Co. stating that the district will accept the proposal of the company to build a large culvert under the track for the main drainage canal between Modesto and Salida. The present culvert is too small to carry the drainage water.

MODESTO, STANISLAUS CO., CAL.—Deepening canal. Cost not stated. Engineer, Chief Engineer F. C. Hermann, Modesto. Owners, Modesto Irrigation District. At the last meeting of the board of directors of the Modesto Irrigation District plans and specifications were adopted for deepening, cleaning and extending the main drainage canal of the district from the Southern Pacific's right-of-way to Pineau cut of the San Joaquin River. The bids are to be opened at 10 o'clock November 15th. Further information may be had from the district's Chief Engineer, F. C. Hermann, at Modesto.

OAKDALE, STANISLAUS CO., CAL.—Irrigation dam. Cost not stated. Engineers, William Mulholland and J. M. Howels, Oakdale. Owners, Oakdale Irrigation District. Work on the proposed Woodward reservoir near Oakdale will be started shortly, according to word received from this city. Farmers want immediate action on the project. William Mulholland, binder

of the Los Angeles aqueduct, and J. M. Howells, chief engineer of the Great Western Power Company, recommended an earth dam without the concrete core that originally was planned. Twelve test pits have been sunk to the site of the proposed dam, two of them 40 feet deep, and the rest ranging from 30 to 55 feet. The dam itself will be of earth, and sufficient material suitable for that purpose is close at hand. The first work on the dam itself will be the building of a large take-out, which will be a cement structure in culvert form. This structure alone will cost \$20,000, it is estimated. Should work start at once, it is thought that from 3,000 to 5,000 acre feet of water will be available late next season for irrigation purposes.

**LIVE OAK SUTTER CO., CAL.**—Deepening ditches, \$50,000. Engineer's name not given. Owners, Reclamation District No. 777, Live Oak. Land owners of District 777 have called a meeting to consider the matter of providing adequate drainage for the district. It is estimated it will cost \$50,000 to deepen present ditches sufficiently to insure the safety of orchard trees and other crops. Ways and means to provide drainage will be taken up.

**WOODLAND, YOLO CO., CAL.**—Irrigation project. Cost not stated. Engineer's name withheld. Owners, Prairie Ditch Co., Woodland. Articles of incorporation have been filed in Woodland by the Prairie Ditch Co., which plans to build an irrigation ditch, bulkheads, etc., to connect with a tributary of the main canal of the Yolo Water and Power Co. The stockholders are: Lou Ulrich, Dan McGregor, G. Benedict, H. T. Griffin, Andrew Strum, J. O. Davis, Samuel Frank, George Redden and B. B. Harr.

## RAILROAD CONSTRUCTION AND EQUIPMENT

**PORTLAND, ORE.**—Railroad construction, \$800,000. Engineer, Engineering Department, Oregon-Washington Railroad and Navigation Co., Portland. Owners, O.-W. R. & N. Co. The directors of the O.-W. R. & N. have announced that \$800,000 will be spent in rail renewals on various parts of the main line between Portland and Harrington. The units to be improved with the approximate cost are: Troutdale to Bonneville, 25 miles, with 90-pound steel, replacing 75-pound steel; cost \$190,000. Blalocks to Coyote, 37 miles, with 90-pound steel, replacing 75-pound steel; cost, \$290,000. Echo to Yaakum, 10 miles, with 90-pound steel, replacing 80-pound steel; cost, \$50,000. Pendleton to Gibbon, 25 miles, with 90-pound steel, replacing 80-pound steel; cost \$190,000. Gibbon to Duncan, 9 miles, with 90-pound steel, replacing 80-pound steel; cost, \$50,000. The aggregate distance to be covered by these renewals is 106 miles.

## RESIDENCES

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$8,000. Architects, Falch & Knoll, Hearst Bldg., S. F. Owner, Mrs. Allen. Location, Forest Hill. Will contain eight rooms, two baths, sleeping porch and separate garage. Interior finish pine, hard-

wood and white enamel. Hardwood floors. Furnace heat, open fire places and tile or brick mantels. Automatic water heater. Bath rooms finished in tile. Exterior covered with cement plaster on metal lath. Plans complete and figures being taken.

**SAN FRANCISCO**—Residences, 1, 3 story and base, frame, \$7,500 each. Architect, Willis Polk, Hobart Bldg., S. F. Owner, Norman B. Livermore, Merchants' National Bank Bldg., S. F. Location, Valley and Jones streets. Each will contain eight rooms, two baths and sleeping porch with basement garage. Interior finish pine and hardwood with some white enamel. Hardwood floors. Furnace heat, open fire places and hot water heaters. Mantels tile and brick. Bath rooms finished in tile. Exterior covered with cement plaster and brick veneer. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$2,200. Architect, none. Owner, Fred A. Steinmann, 4581 Mission street, S. F. Location, east Mission north Brazil. Will contain five rooms and bath. Interior finish pine with some elm panels and hardwood floors. Open fire place and tile or brick mantel. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Residences, 3, 2 story and base, frame \$10,000 to \$12,000 each. Architects, Falch & Knoll, Hearst Bldg., S. F. Owners, Newell-Murdoch Co. Location, Forest Hill. Each dwelling will contain nine rooms, three baths, sleeping porches and separate garages. Interiors will be finished in hardwood, pine and white enamel. Hardwood floors will be used throughout. Furnace heat, open fire places, hot water circulating system and tile or brick mantels. Bath rooms finished in tile. Exteriors covered with pressed brick veneer and cement plaster. Plans being prepared.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$2,500. Architect, none. Owners, Lindberg Bros., 257 Surrey street, S. F. Location, north Army east Bryant. Will contain six rooms and bath. Interior finish pine and redwood. Some hardwood floors. Open fire place and tile or brick mantel. Imitation tile in bath. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$3,760. Architect, J. A. Porporato, 719 Washington street, S. F. Owner, George V. Olivia, 2142 Larkin street. Location north Filbert west of Hyde. Will contain eight rooms, bath and sleeping porch. Interior finish pine and hardwood with some white enamel. Hardwood floors. Open fire places and tile mantels. Furnace heat and automatic water heater. Tile wainscot in bath room. Exterior covered with cement plaster on metal lath. Plans prepared and work to be done by Day Labor.

**OAKLAND, CAL.**—Residence, 1 story and base, frame, \$2,000. Architect, none. Owner, A. T. Anderson, 7353 Lockwood, Oakland. Location, north East 37th street west of Randolph.

Will contain five rooms, bath and sleeping porch. Interior finish pine with some white enamel. Hardwood floors and open fire place. Tile or brick mantel. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**OAKLAND, CAL.**—Residence, 1 story and base, frame, \$2,000. Architect, none. Owner, M. H. Tremble, 2475 Rawson, Oakland. Location, west 51st avenue south of Fortune. Will contain five rooms and bath. Interior finish pine and elm panels. Some hardwood floors. Open fire place and tile or brick mantel. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**OAKLAND, CAL.**—Residences, 4, 1 story and base, frame, \$1,500 each. Architect, none. Owner, J. B. Peppin, San Leandro. Location, 162nd avenue and Orange street. Will contain four rooms and bath. Interiors finished in pine throughout. Some hardwood floors. Open fire place and tile mantels. Exteriors covered with cement plaster. Plans complete and work to be done by Day Labor.

**OAKLAND, CAL.**—Residences, 2, 1½ story and base, frame, \$2,500 each. Architects, Hutchinson & McLean, 470 13th street, Oakland. Owner, W. A. Anderson, 1774 Aussen avenue, Oakland. Location, East 14th street. Will contain six rooms, bath and sleeping porch. Interior finish pine with some elm panels and white enamel. Hardwood floors. Open fire places and tile or brick mantels. Bath rooms finished in tile. Automatic water heaters. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 1 story and base, frame, \$2,500. Architect, Universal Drafting Bureau, 1844 5th avenue, Oakland. Owner, C. Texdahl. Will contain six rooms, bath and sleeping porch. Interior finish pine and redwood with some white enamel. Hardwood floors, open fire place and tile mantel. Automatic water heater. Bath room finished in tile. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**OAKLAND, CAL.**—Residence, 1 story and base, frame, \$2,500. Architect, none. Owner, E. L. Higgins, 5250 Miles avenue, Oakland. Location, west Thomas, south of Prospect. Will contain six rooms, bath and sleeping porch. Interior finish pine and white enamel. Some hardwood floors. Open fire place and tile or brick mantel. Tile bath room. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**OAKLAND, CAL.**—Residence, 2 story and base, frame, \$3,000. Architect, none. Owners, El Nido Building Co., 584 10th street Oakland. Location, east Valle Vista south Sunnyside. Will contain seven rooms, bath and sleeping porch. Interior finish pine and hardwood with some white enamel. Hardwood floors, open fire place and tile or brick mantel. Tile wainscot and floor in bath. Automatic water heater. Exterior covered with cement plaster.

Plans complete and work to be done by Day Labor.

OAKLAND, CAL.—Residence, 1 story and base, frame, \$2,000. Architect, none. Owners, Boyd, Carlos & Co., Hudson and Claremont streets, Oakland. Location, east Arbor avenue north Hudson. Will contain five rooms bath and sleeping porch. Interior finish pine and white enamel. Hardwood floors, open fire place and tile mantel. Bath room finished in tile. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$4,700. Architect, M. I. Diggs, 2444 Bowditch, Berkeley. Owner, J. C. O'Connor, 5314 Bryant avenue, Oakland. Location, east Carls-son south of Prospect. Will contain seven rooms, bath and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors, open fire places and tile or brick mantels. Furnace heat. Bath rooms finished in tile. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$8,000. Architect, H. H. Gutterston, 68 Post street, S. F. Owner, M. Brook. Location, Thousand Oaks. Will contain eight rooms, two baths and sleeping porches. Interior finish pine, hardwood and white enamel. Hardwood floors, open fire places, tile and brick mantels and furnace heat. Bath rooms finished in tile. Automatic water heater. Exterior covered with cement plaster. Plans complete and figures being taken.

DAVIS, YOLO CO., CAL.—Residence, 1 story and base, frame, \$5,500. Architect, none. Owner, A. R. Pedder, Davis. Location Bowers Addition. Will contain seven rooms, baths and sleeping porch. Interior finish pine and white enamel. Hardwood floors, furnace heat and open fire places. Mantels tile and brick. Bath rooms finished in tile. Automatic water heater. Exterior covered with cement plaster and rustic. Wall beds. Plans being prepared.

FRESNO, FRESNO CO., CAL.—Residence, 2 story and base, frame, \$3,000. Architect's name not given. Owner, A. E. Cockran, Fresno. Will contain seven rooms, bath and sleeping porch. Interior finish pine and white enamel. Hardwood floors and open fire places. Mantels tile or brick. Automatic water heater. Tile floor in bath. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

FRESNO, FRESNO CO., CAL.—Residence, 1 story and base, frame, \$2,000. Architect, none. Owner, K. C. Buyabala, 816 Mona avenue, Fresno. Location, 3211 Mona avenue. Will contain six rooms and bath. Interior finish pine throughout. Hardwood floors and open fire place. Mantel tile or brick. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

FRESNO, FRESNO CO., CAL.—Residence, 4, 2 story and base, frame, \$11,000 each. Architect, Eugene Mathewson, Forsythe Bldg., Fresno. Owners,

Shepard-Cochrane Co. Location, Ventura Vista Tract. Each will contain eight rooms, bath and sleeping porch. Interiors finished in pine, white enamel and hardwood veneer. Hardwood floors, open fire places and tile or brick mantels. Bath rooms tile. Automatic water heaters. Exteriors covered with cement plaster. Plans being prepared.

SAN FRANCISCO — Residence, 2 story and base, frame, \$2,750. Architect, none. Owner, A. R. Lapham, 511 12th avenue, S. F. Location, east 12th avenue south of Caballero. Will contain six rooms and bath. Interior finish pine and white enamel. Hardwood floors. Open fire place and tile mantel. Tile bath. Automatic water heater. Exterior cement plaster. Plans complete and work to be done by Day Labor.

#### Contracts Awarded.

VISALIA, TULARE CO., CAL.—Residence, 2 story and base, frame, \$7,500. Architects, Swartz & Swartz, Rowell Bldg., Fresno. Owner, Miss Mary F. Chatten. Contractor, D. L. Barnhart, Visalia. Contract price, \$7,500.

FRESNO, FRESNO CO., CAL.—Residence, 2 story and base, frame, \$3,000. Architect, Eugene Mathewson, Forsythe Bldg., Fresno. Owner, A. E. Cochran. Contractors, P. J. Stone & Son, 2007 Mariposa street, Fresno. Contract price, \$3,000.

#### SCHOOLS

CRYSTAL SPRINGS, SOLANO CO., CAL.—School, 1 story, frame. Cost not stated. Architect's name not given. Owners, Crystal Springs School District, John A. Wilson, clerk, Suisun. Will contain two class rooms. Interior finish pine. Exterior cement plaster or rustic. Plans complete and figures being taken. Bids open on November 15th.

TORNEY, CONTRA COSTA CO., CAL.—School, 1 story, hollow tile or frame. Cost as follows. Architect, Norman R. Coulter, 46 Kearny street, S. F. Owners, Selby School District, Kellar & Crane submitted the lowest bid for the work on propositions 1 and 2 while Calverell & Son were low on proposition 3, which calls for hollow tile. A complete list of the bids will be found under the heading of Marin and Contra Costa in this issue. No contract has been awarded.

VALLEJO, SOLANO CO., CAL.—School, 1 story, portable. Cost not stated. Architect, none. Owners, Town of Vallejo. Bids will be opened on November 17th at 8 p. m. for furnishing a portable school. Complete information can be secured from G. V. Whaley, secretary of the Board of Education.

BELLINGHAM, WASH. — School, 2 story and base, reinforced concrete and steel, \$115,000. Architects, Heath & Gove, National Realty Bldg., Tacoma. Owners, City of Bellingham. Plans have been completed for the new high school building and bids are now being taken. Construction will be fireproof. Interior finish pine with maple floors. Steam heat, oil burning furnace and vacuum cleaning. Exterior faced with pressed brick. Separate figures for general construction, heating and ventilating, plumbing and electric work.

SEATTLE, WASH.—Home economics building, 2 story, reinforced concrete, \$99,936. Architects, Bab & Gould, Deany Bldg., Seattle. Owners, State of Washington. Bids opened by the Board of Regents of the University of Washington for the construction of the home economics building show Finne & Giarde, Northern Bank Bldg., Seattle, low on their bid of \$99,936. Further mention will be made when the contract is awarded.

#### Contracts Awarded.

MILNES SCHOOL, DISTRICT, STANISLAUS CO., CAL.—School, 1 story, frame, \$5,965. Architect's name not given. Owners, Milnes School District. Contractor, R. E. De Vick, Oakdale. Contract price, \$5,965.

#### SEWERS, STREET WORK & WATER SYSTEMS

OAKDALE, STANISLAUS CO., CAL.—Street paving, \$50,000. Engineer, City Engineer, Oakdale. Owners, City of Oakdale. The City Trustees will take up for consideration at their next meeting the question of improving F street in order to connect with the State highway. To pave the street for its full length will cost about \$50,000. Further information will be given when a decision is reached.

BAKERSFIELD, KERN CO., CAL.—Sewer construction. Cost not stated. Engineer, City Engineer, Bakersfield. Owners, City of Bakersfield. At the last meeting of the City Council resolutions of intention in sewer district 31, covering a district between Palm and Dracona on S street were adopted. Bids on this work will be called shortly.

SANTA BARBARA, SANTA BARBARA CO., CAL.—Sewer construction. Cost not stated. Engineer, City Engineer, Santa Barbara. Owners, City of Santa Barbara. Bids will be opened on November 14th at 12 noon for constructing an 8-inch vitrified pipe sanitary sewer in Sola street from an existing manhole at the center of San Andreas and Sola streets to a manhole to be constructed in the center of Sola and Gillespie streets. To construct an 8-inch vitrified pipe sanitary sewer in Gillespie street from manhole to be constructed in Sola street to a manhole to be constructed in Michitoren street.

LOS ANGELES, CAL.—Road construction. Cost not stated. Engineer, County Surveyor, Los Angeles. Owners, County of Los Angeles. The Board of Supervisors directed the road commissioner to prepare plans and specifications for the construction of a road in Mint Canyon. The road is to be built of concrete, beginning at a point about five miles north of Saugus and extending to Palmdale in the Antelope Valley. Further information will be given of this work when the plans are complete.

YREKA, SISKIYOU CO., CAL.—State highway construction. Cost not stated. Engineer, State Highway Commissioner, Forum Bldg., Sacramento. Owners, State of California. T. A. Bedford, Division Engineer of the State Highway, accompanied by H. S. Conley, assistant engineer, and A. Lowden, resident engineer of the Siskiyou division, have returned from a tour of

inspection down the Klamath River as far as Happy Camp. This trip is preliminary to a survey to be made down the Klamath River for a road to connect with Humboldt County's automobile road to Orleans Bar and on to Eureka. This survey is to gather data on the feasibility of such a road to connect with the California-Oregon highway at the junction of the Shasta and Klamath Rivers between Yreka and Hornbrook. Such a road following the Klamath River to the coast would run on an easy grade and in a country where snow does not obstruct traffic in the winter time and could be used the year round. It is part of the Highway Engineer's plan to make a connecting loop between the coast and central highways of the state.

**WOODLAND, YOLO CO., CAL.—Street paving.** Cost not stated. Engineer, City Engineer, Woodland. Owners, City of Woodland. Although they have not been awarded the contract, the Clark & Henery Construction Co., Ochsner Bldg., Sacramento, is assembling material on the ground for the paving to be done in this city. When the bids were opened on the work the Clark & Henery Co. submitted the lowest figure.

**OAKLAND, CAL.—Street work.** Cost not stated. Engineer, City Engineer, Oakland. Owners, City of Oakland. At a recent meeting of the City Council the following action was taken relative to street improvements. Adopting plans and specifications for the construction of a sewer in Tompkins avenue from Yale avenue northwesterly, and recommending passage of resolution of same. Adopting plans and specifications for the improvement of Farnum street between Fruitvale avenue and 34th avenue, and recommending passage of resolution of same. Awarding contract to Ransome-Crummey Company forth improvement of 19th avenue, from East Twelfth street, southwesterly. Granting permission to Joseph Carroll to construct a sewer in Adeline street from the manhole in 56th street to a point 120 feet northwesterly therefrom.

**NAPA, NAPA CO., CAL.—Street improvement.** Cost not stated. Engineer, City Engineer, Napa. Owners, City of Napa. At the last meeting of the City Council bids for the improvement of Nursery, Ash, Vallejo and Jackson streets were ordered re-advertised as the bids were opened too soon and in violation of law. Further information with plans for this work may be had from the City Engineer or City Clerk at Napa.

**SAUSALITO, MARIN CO., CAL.—Street improvement.** Cost as follows. Engineer, Town Engineer, Sausalito. Owners, Town of Sausalito. At the last meeting of the Town Trustees the following bids were received for the improvement of West and Valley streets: Carnahan & Mulford, 45 Kearney street, S. F., \$2,177. Construction and Engineering Co., 1047 Folsom street, S. F., \$1,829.79. No action was taken in awarding a contract. Further information will be given of this work when an award of contract is made.

**DAILY CITY, SAN MATEO CO., CAL.—Sewer construction.** Cost not stated. Engineer, City Engineer, Daily City. Owners, Daily City. A resolution of

intention providing for the construction and installation of an 8-inch salt glazed vitrified sewer pipe along Bellevue avenue, commencing at Henrietta street running east 633 feet, an 8-inch salt glazed vitrified sewer pipe along Bellevue avenue from Olive street 633 feet to Whittier street; 8-inch salt glazed vitrified sewer pipe in the center line of Lowell street, 622 feet, 8-inch diameter salt glazed vitrified sewer pipe in the center line of Lowell street and running 422 feet; 8-inch diameter salt glazed vitrified sewer pipe, Bellevue avenue, 225 feet along said Lowell street, 15-inch salt glazed vitrified sewer pipe along said Lowell street, north 116 feet, 12 feet of 12-inch diameter salt glazed vitrified sewer pipe at the intersection of Bellevue avenue with Henrietta street; 12 feet of 15-inch diameter salt glazed vitrified sewer pipe at the intersection of Bellevue avenue with Oliver street, the construction of 1 manholes, 1 lamp-holes; 99 8 inch by 4 inch Y branches; 8 15 inch by 1 inch Y branches, 91 six feet rises pipes of salt glazed vitrified sewer pipe. Further information may be had from the City Clerk.

**SALINAS, MONTEREY CO., CAL.—Road construction.** Cost not stated. Engineer, County Surveyor Cozzins. Salinas. Owners, Monterey County. At the next meeting of the County Supervisors, County Surveyor Cozzins will submit plans for two road improvements to be made in Monterey County. One is the half mile cut on the hill near the Oliver ranch house, just beyond the Carmel River on the Coast road, in the Sur Road District. The other piece of road work is for the grading, macadamizing and surfacing of the 15-mile stretch from Del Monte to the Castroville city limits. Further information will be given on this work when the plans have been accepted.

**SAN FRANCISCO—Beach esplanade.** Cost not stated. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. The Board of Public Works has released C. E. Lambuth from his contract to construct the first section of the Ocean Beach esplanade, and will advertise for new bids to be opened November 12th. Lambuth's bid for this work was \$18,500, which amount he now claims was too low. Plans can be secured from the City Engineer's office, Temporary City Hall.

**FRESNO, FRESNO CO., CAL.—Street paving.** Cost not stated. Engineer, City Engineer, Fresno. Owners, City of Fresno. The City Council has accepted the offer of the Stewart Fruit Company to exchange a triangular piece of land at R and Ventura streets for another piece on Ventura and Angus, in order to arrange for the paving of Ventura avenue from R street to the city limits, a distance of about 8 blocks. The agreement will make it possible to straighten to a large extent the curve at the intersection of R and Ventura streets. A petition for paving is expected to be presented soon. Resolutions of intention providing for the improvement of Coast and Franklin avenues have been passed by the Council.

**FRESNO, FRESNO CO., CAL.—Electricity system.** Cost not stated. Engineer, City Engineer, Fresno. Own-

ers, City of Fresno. Plans for an electric system in the unlighted district of the city on J and Tuolumne streets were adopted at the last meeting of the City Council, and a resolution of intention providing for the installation of them has passed.

**STOCKTON, SAN JOAQUIN CO., CAL.—Road improvement.** Cost not stated. Engineer, County Surveyor, Stockton. Owners, San Joaquin County. At a recent meeting of the Supervisors plans and specifications were adopted for grading a little less than three miles of the French Camp road, from a point a mile east of Escalon to the Stanislaus County line. Bids for the work will be opened November 22nd at 11 o'clock a. m. Further information may be had from the County Engineer.

**SAN JOSE, SANTA CLARA CO., CAL.—Electrolifers.** Cost not stated. Engineer, City Engineer, San Jose. Owners, City of San Jose. The design of the Pacific States Electric Company for electrolifers to be installed on North First street has been accepted by the North First Street Improvement Association.

#### Contracts Awarded.

Plans complete, figures in and under advisement.

## Contracts Awarded.

**OAKLAND, CAL.** — Theatre, 1 story and base, brick, \$14,000. Architect, Merrill Newsom, 1718 Broadway, Oakland. Owner, Mr. Werum. Contractor, W. C. Brown, 1624 6th street, Oakland. Contract price, \$14,000. Note: Contractor is now taking sub-figures.

## CALIFORNIA RIVER VOLUMES MEASURED.

**Report of United States Geological Survey Contains Data on Principal Streams of State.**

The development of the water supply of California has in large part contributed to the material development of the State. In the days of '49 its first great boom was the result of finding gold in a creek bottom, and throughout the early gold days the rapid growth

## George Nelson, C. E.

Engineering	560 Mission St.
Financing	San Francisco, Cal.
Developments	503 Grant Bldg.
Construction	Los Angeles, Cal.

of California was made possible by the development of water supplies for use in placer mining. In later years came the great irrigation activities, and especially in southern California have the agricultural products become so valuable that in that part of the State water is probably worth more than it is anywhere else in the country. Throughout the Sacramento and San Joaquin valleys also water has relatively large value for irrigation. Still later came the recognition of the enormous importance of California water powers. In a few years the development of water power has grown until California ranks second only to New York in this respect.

## Importance of the Study of Stream Flow.

It is apparent that in a State so thoroughly dependent upon its water supplies investigations which will reveal the amount of water available in the streams and beneath the ground are of the highest importance. The people of California have recognized this fact and for many years have through their legislature co-operated with the United States Geological Survey in the determination of stream flow and the location of underground supplies.

## Records Are Available to the Public.

The Geological Survey has available for distribution the annual volumes on the surface water supply of the Pacific coast drainage basins in California covering the years 1901 to 1913 inclusive, with the exception of that for 1906, and all or any of these reports may be obtained free on application to the Director, U. S. Geological Survey, Washington, D. C. Inasmuch as the great value of these reports lies in the record having been kept for several years, thus showing the fluctuations from year to year, doubtless many engineers will find the complete set of great value to them.

## NOTICE TO LUMBER DEALERS.

Mr. Franklin H. Smith, Special Agent of the Bureau of Foreign and Domestic Commerce, who has spent a year in the Orient, Australia and New Zealand making extensive investigations for the markets for American lumber, will be at the Bureau, 305 Customhouse today. Mr. Smith will be here part of next week also and will be pleased to confer with anyone interested. The result of Mr. Smith's investigations is sure to prove of great value to lumbermen of the Pacific Coast. Arrangements for appointments may be made by telephoning Sutter 1425.

# OFFICIAL PROPOSALS.

## STATE OF CALIFORNIA.

### DEPARTMENT OF ENGINEERING. CALIFORNIA HIGHWAY COMMISSION

#### NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock P. M. on Nov. 29, 1915, at which time they will be publicly opened and read for construction in accordance with the specifications therefor, to which special reference is made, portions of State highway as follows:

Yolo County, near the easterly side of the Yolo By-pass (H-1-Yol-6-B), a plate girder bascule 50-foot clear span with reinforced concrete approaches. Total length about 141 feet.

Plans may be seen, and forms of proposals, bonds, contract, and specifications may be obtained, at the said office, and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the division in which the work is situated. The Division Engineers' offices are located at Willets, Dunsmuir, Sacramento, San Francisco, San Luis Obispo, Fresno, and Los Angeles.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

CHARLES D. BLANEY,  
NEWELL D. DARLINGTON,  
CHARLES F. STERN,  
California Highway Commission.  
ALSTON B. FLETCHER,  
Highway Engineer.  
WILSON R. ELLIS,  
Secretary. (\*)

Dated: Nov. 1, 1915.

#### PROPOSALS FOR BUILDING.

**BUILDING**—Sealed proposals indorsed "Proposals for Three Buildings" will be received at the naval station, Pearl Harbor, Hawaii, and at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. November 27, 1915, and then publicly opened, for constructing one reinforced concrete power house, one reinforced concrete operating building and one wooden double quarters for chief operators at the naval station, Pearl Harbor. Plans and specifications may be obtained on application to the bureau or to the commandant of the naval station named. H. R. STANFORD, chief of bureau.

#### PROPOSALS FOR ROLLER CASINGS, ETC.

**ROLLER CASINGS, ETC.**—Office of the General Purchasing Officer, Panama Canal, Washington, D. C.—Sealed proposals will be received here until November 16, 1915, under file 1909-C for furnishing 1 rolling plates, 2 roller casings, 4 roller cages, 4 roller bearing sleeves, 100 rollers, 4 thrust washers, 2 roller retaining rings, 100 rollers, 60 segments, 2 worm shafts and 2 worm wheels. For further information address F. T. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

#### PROPOSALS FOR CANAL SUPPLIES.

**PANAMA CIRCULAR 988**—Proposals for Cast Iron Keel Blocks, Cast Iron Bilge Block Slides, Garbage Incinerator, Drill Press, Lathe, Steel Tubing, Spring Plates, Nails, Rivets, Staples, Pipe Fittings, Water Closets, Sheet Lead, Holy Stones, Currying Brushes, Plate Glass, Airbrake Hose, Leather and Lard Oil.—Sealed proposals will be received at the office of the general purchasing officer, the Panama Canal, Washington, D. C., until 10:30 a. m. November 17, 1915, at which time they will be opened in public, for furnishing the above mentioned articles. Plans and general information relating to this circular (No. 988) may be obtained from this office or the office of the assistant purchasing agent, Fort Mason, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal.; F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

#### NORTH DAKOTA BUILDING. PROPOSALS FOR THE SALE AND REMOVAL OF THE NORTH DAKOTA STATE BUILDING AT THE PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS for the sale, and complete removal of the North Dakota State Building at the Panama-Pacific International Exposition, at San Francisco, Cal., are asked by the North Dakota Commission to the Panama-Pacific International Exposition.

One proposal is desired for the sale and complete removal of the building and fixtures and clearing lot to official grade.

All proposals shall be securely sealed accompanied by a certified check for ten per cent (10%) of the amount of the proposal, and mailed as follows: "To Will E. Holben, Secretary North Dakota Commission, to the Panama-Pacific International Exposition, North Dakota Building, Panama-Pacific International Exposition, San Francisco, Cal." Proposals will be received up to and including noon of Saturday, November 13, 1915.

A bond of \$2,000 shall be filed by successful bidder with the Secretary of the North Dakota Commission to guarantee the Commission that the removal of the building shall not start before December 5th, 1915, and that it shall be entirely removed on or before March 4th, 1916.

Commission reserves right to reject any or all bids.

**NORTH DAKOTA COMMISSION, North Dakota Building, Panama-Pacific International Exposition. (\*)**

#### PROPOSALS FOR THE SALE, WRECKING AND REMOVAL OF THE NORWAY BUILDING AT THE PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS for the sale, wrecking and complete removal of the Norway Building at the Panama-Pacific International Exposition, at San Francisco, Cal., are asked by the Norwegian-American Auxiliary.

Two proposals are desired, one to be for the sale, wrecking and complete removal of the building and furniture and clearing lot to official grade, and the other for the sale, wrecking and complete removal of the building without furniture.

All proposals shall be securely sealed and mailed as follows: "To J. R. Quistad, Secy., Norwegian-American Auxiliary, to the Panama-Pacific International Exposition, Norway Building,

Panama-Pacific International Exposition, San Francisco, Cal." Proposals will be received up to and including noon of Monday, November 15, 1915.

Commission reserves right to reject any or all bids.

**NORWEGIAN-AMERICAN AUXILIARY**  
P. L. Halse, President.

#### Call For Bids For Razing the Iowa Building on the Grounds of The Panama-Pacific International Exposition.

The undersigned will receive bids for razing the Iowa Building on the grounds of the Panama-Pacific International Exposition, in accordance with the rules of the Exposition Company and the Iowa Commission to the P. P. I. E.

No bids will be received after November 15, 1915. Full information may be obtained from the Iowa Commission to the P. P. I. E., at its offices at Iowa House, on the Exposition Grounds. IOWA COMMISSION TO THE P. P. I. E.  
Woodworth Clum, Secretary. (tt)

#### BIDS WANTED.

#### FOR WRECKING NEW YORK STATE BUILDING.

BIDS will be received until **twelve o'clock, noon, Thursday, November 18th**, for the sale of the New York State Building, Panama-Pacific International Exposition and the clearing of the site thereof. The bids to provide:

**FIRST** for the sale of the building to include to contain plumbing fixtures complete for 25 bathrooms, three toilet rooms, gas and electric fixtures and steam heating plant.

**SECOND** for the sale of the building without bathrooms, toilets, electric fixtures or steam plant.

Building and blue print plans, etc., may be examined at building at any time. Bids accompanied by twenty-five (25) per cent thereof to be submitted to New York State Commission, Panama-Pacific International Exposition.

**NORMAN E. MACK, Chairman.**  
**DANIEL L. RYAN, Secretary.**

#### NOTICE TO HOUSE-WRECKERS.

#### PROPOSAL FOR THE SALE AND REMOVAL OF THE LUMBERMEN'S BUILDING AND HOUSE OF HOO-HOO AT THE PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS for the sale and complete removal of The Lumbermen's Building and House of Hoo-Hoo, South Horticultural Gardens, Panama-Pacific International Exposition, San Francisco, Cal., are asked by the Board of Governors.

Proposals to be for the complete removal of Building from premises and grading of lot clear to curb, prior to March 15th, 1916. Proposal will be exclusive of small room at rear which is simply a lean-to and all radiators, furniture and draperies; but will include main building, plate glass in window openings, toilets, lavatories, pipe, both sanitary and water, chandeliers, lighting fixtures, flowers, shrubs and plants and logs and flower boxes in colonnade and pergolas and the pylons.

All proposals shall be securely sealed, accompanied by certified check for 10% of the amount of proposal and mailed as follows: "To A. B. Wastell, Executive Secretary, The Lumbermen's Building and House of Hoo-Hoo, 1111 Hobart Building, San Francisco, Cal." Proposals will be received up to and including noon of Saturday, November 20th, 1915.

The Board of Governors reserves the right to reject any or all bids and the 10% deposit will be forfeited if balance of the amount of accepted bid is not paid in to this Board by December 5th, 1915.

For further particulars apply to undersigned at 1111 Hobart Building, FOR THE BOARD OF GOVERNORS, A. B. WASTEL, Executive Secretary. (\*)

#### PROPOSALS FOR CLEARING.

**CLEARING**—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the U. S. Reclamation Service, Meadow Creek, Wash., until 2 o'clock p. m. December 1, 1915, for clearing the reservoir site at Lake Keechelus, Wash., of all timber, undergrowth and brush and for the purchase of sawmill machinery at the site. Bids are also invited on about 160,000 feet, board measure, of lumber and 200,000 feet, board measure, of logs in accordance with data contained in the specifications. For particulars in address the U. S. Reclamation Service, Meadow Creek, Wash.; Denver, Colo., or Washington, D. C. A. P. DAVIS, chief engineer.

#### PROPOSALS FOR BUILDING.

**BUILDING**—Department of the Interior, Office of Indian Affairs, Washington, D. C.—Sealed proposals plainly marked on the outside of the sealed envelope "Proposals for Addition to Erick Assembly Hall, Salem, School, Oregon," and addressed to the Commissioner of Indian Affairs, Washington, D. C., will be received at the Indian Office until 2 o'clock p. m. November 15, 1915, for furnishing materials and labor for the construction of an addition to the brick assembly hall, in strict accordance with the plans, specifications and instructions to bidders, which may be examined at the United States Indian warehouses at Chicago, Ill.; St. Louis, Mo., and Builders' Exchange at St. Paul, Minn., and at the office of the superintendent of the Salem Indian School, Chemawa, Ore. For further information apply to the superintendent of the Salem School. CATO SELLS, commissioner.

#### PROPOSALS FOR BUILDING.

**BUILDING**—Fort Logan, Colo.—Sealed proposals, in triplicate, for furnishing all materials and labor required in constructing basements under noncommissioned officers' quarters here will be received until 11 o'clock a. m. November 15, 1915. Information on application to quartermaster.

#### PROPOSALS FOR CANAL SUPPLIES.

**PANAMA CIRCULAR 986**—Proposals for the purchase of Miscellaneous Iron and Steel Scrap Offered for Sale by the Panama Canal and Which is no Longer Needed. Sealed proposals will be received at the office of the general purchasing officer the Panama Canal, Washington, D. C., until 10:30 a. m. November 22, 1915, at which time they will be opened in public, for purchasing the above-mentioned articles. Blanks and general information relating to this circular (No. 986) may be obtained from this office or the office of the assistant purchasing agent, Fort Mason, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOXER, major, corps of engineers, U. S. Army, general purchasing officer.

#### PROPOSALS.

**OFFICE OF THE BOARD OF PUBLIC Works of the City and County of San Francisco.**

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 24th day of November, 1915, for doing the following work, including the furnishing of the neces-

sary labor and materials therefor, to wit:

The construction of the Hetch-Hetchy Railroad.

Progressive payments will be made in the manner set forth in the specifications.

Said work must be done in accordance with the plans and specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within fifteen (15) calendar days and completed within three hundred (300) calendar days from the date of the contract to be made and entered into therefor.

The amount of bond for faithful performance of contract has been fixed at two hundred thousand dollars (\$200,000.00).

The attention of bidders is also called to Act 2895 of the Legislature of the State of California entitled "An act to secure the payment of claims of employed men, mechanics, or laborers employed by contractors upon State, Municipal, or other public work," which act provides that every contractor to whom is awarded a contract for the execution of public work in the State of California shall, before entering upon the performance of such work, file a good and sufficient bond in an amount not less than one-half of the total amount payable by the terms of the contract. (Approved March 27, 1897, Statutes 1897, Amended 1911, Statutes of 1911).

All proposals offered shall be accompanied by a check, certified by a responsible bank, payable to the order of the Clerk of the Supervisors of said City and County, for an amount not less than ten per centum of the proposed value of the proposal, and no proposal will be considered unless accompanied by such check.

Printed proposal forms will be furnished gratuitously upon application at the office of the City Engineer, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids. By order of the Board of Public Works. F. J. CHURCHILL, Secretary.

#### NOTICE TO HOUSE MOVERS.

FOR SALE for immediate removal two frame buildings, No. 29 and No. 71 Bartlett Street, bet. 21st and 22nd Sts. Address: Reid Bros., 104 Montgomery St., San Francisco. (\*)

**APARTMENT HOUSE**—2 story and base, frame, \$5,500. San Francisco. Architect, W. S. Rhodes, 3372 16th street, S. F. Owner, Henry Sipple. Location, 19th near Lexington. Will contain four suites of three rooms and bath. Interior finish pine and elm panels. Some hardwood floors. Tile bath rooms. Automatic water heaters. Exterior covered with rustic and cement plaster. Plans complete and figures being taken.

**APARTMENT HOUSE**—2 story and base, brick. Cost not stated. San Francisco. Architect, Edward G.

Bolles, 660 Market street, S. F. Owner's name withheld. Location, 18th and Valencia streets. Will contain stores on the first floor and a number of two and three room suites on the upper floors. Interior finish pine throughout with some hardwood floors. Patent store fronts. Steam heat and hot water supply. Wall beds and tile baths. Exterior faced with cement plaster. Plans being prepared.

**APARTMENT HOUSE**—2 story and base, frame, \$10,000. San Francisco. Architect, Edward E. Young, 251 Kearny street, S. F. Owner, Thomas Scoble, 363 14th avenue, S. F. Location, west Palm avenue north Euclid. Will contain four suites of four and five rooms and bath. Interior finish pine and elm panels. Hardwood floors. Open fire places. Hot water system. Wall beds. Tile bath rooms. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**BUREAU OF ARCHITECTURE**—City and County of San Francisco. The last monthly statement published by the Bureau of Architecture gives the following condition of plans and specifications underway in the office:

**ISOLATION HOSPITAL**—Plans and specifications are complete for the one story diphtheria carrier ward building and bids will be taken shortly.

**CENTRAL EMERGENCY HOSPITAL**—Working drawings are ready for tracing, pending the decision of the Department of Public Health regarding the location of the proposed structure.

**POLYTECHNIC HIGH SCHOOL**—Plans and specifications are complete for the lighting fixtures and bids will be advertised for shortly. Plans are being prepared for an athletic field at the westerly end of the site. The field will contain hand ball and tennis courts, basket ball courts, asphalt paving, etc.

**HALL OF JUSTICE, COUNTY JAIL**—Tracings for the installation of a passenger elevator are complete and are now being checked, estimates will be called for shortly.

**REDDING SCHOOL**—Plans and specifications have been completed and approved by the Board of Education. Bids will be taken the end of this month.

**SAN FRANCISCO HOSPITAL**—The preparation of plans and specifications for the northeast and southeast wings is progressing quite rapidly. The plans have been approved by the Department of Public Health. Date for calling bids will be announced shortly.

**ENGINE HOUSES**—Plans and specifications are being prepared for engine houses No. 4 and 17; preliminary sketches for No. 4 have been approved by the Board of Fire Commissioners, and working drawings are well under way. Bids will be called for in the near future.

**SCHOOL FOR BERNAL HEIGHTS DISTRICT**—Preliminary sketches have been prepared, these, together with estimates, will be handed to the Board of Education for their approval at once.

**FACTORY**—4 story and base, reinforced concrete, \$200,000. San Francisco. Architect, Charles Peter Weeks, Mutual Bank Bldg., S. F. Owners, John B. Bollman Co. Location, 11th and Brannan streets. Will be fireproof throughout, with concrete walls, floors and roof slabs. Interior finish pine. Hollow tile partitions, metal window sash and frames. Elevator service, steam heat, oil burning equipment and hot water system. Exterior faced with cement plaster. Plans complete and figures being taken.

**FLATS**—2 story and base, frame. Cost not stated. San Francisco. Architects, Smith & Stewart, 244 Kearny street, S. F. Owner, Mrs. Buckmeister. Location, Webster near Herman. Will contain three modern flats of five and six rooms. Interior finish pine with some elm panels and hardwood floors. Open fire places and tile or brick mantel. Tile bath rooms. Automatic water heaters. Exterior covered with cement plaster and rustic. Plans being prepared.

**FLATS**—3 story and base, frame, \$11,000. San Francisco. Architect, August Nordin, Mills Bldg., S. F. Owner, M. C. Mahoney. Location, north Green west of Octavia. Will contain six modern flats. Interior finish pine and elm panels with some hardwood floors. Open fire places and tile or brick mantels. Tile baths. Automatic water heaters. Exterior covered with rustic and cement plaster. Plans being prepared and figures to be called for at once.

**FLATS**—2 story and base, frame, \$5,000. San Francisco. Architect, none. Owners, W. J. Hemminga Co., 1660 Pell street, S. F. Location, east 15th avenue south of California, covering an area of 25 by 64 feet. Will contain two flats of five and six rooms. Interior finish pine and elm panels with some hardwood floors. Open fire places and tile mantels. Automatic water heaters. Exterior covered with cement plaster and rustic. Plans complete and work to be done by Day Labor.

**GARAGE**—2 story and base. Class A construction. Cost not stated. San Francisco. Architects, Smith & Stewart, 244 Kearny street, S. F. Owner's name withheld. Location, California east of Leavenworth. Will cover a large ground area and has been designed for a commercial garage. Construction fireproof. Concrete floors. Machine shop. Exterior faced with cement plaster. Plans being prepared.

**RESIDENCE**—2 story and base, frame, \$2,750. San Francisco. Architect, none. Owner, A. R. Lapham, 511 12th avenue, S. F. Location, east 12th avenue south of Cabrillo. Will contain six rooms and bath. Interior finish pine and white enamel. Hardwood floors. Open fire place and tile mantel. Tile bath. Automatic water heater. Exterior cement plaster. Plans complete and work to be done by Day Labor.

**BEACH ESPLANADE**—Cost not stated. San Francisco. Engineer, City

Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. The Board of Public Works has released C. E. Lambuth from his contract to construct the first section of the Ocean Beach Esplanade and will advertise for new bids to be opened November 12th. Lambuth's bid for this work was \$18,500, which amount he now claims was too low. Plans can be secured from the City Engineer's office, Temporary City Hall.

**MARKET ALTERATIONS**—Frame construction. Cost not stated. San Francisco. Architect, August G. Headman, New Call Bldg., S. F. Owner, Hermann's Market. Location, northeast corner of Bush and Franklin streets. Work will consist of installing of new stalls, marble and tile work, painting, plastering, plumbing and electric work. Plans are complete and figures are being taken.

**THEATRE**—1 story and base, brick and steel, \$27,500. San Francisco. Architect, Mathew O'Brien, Foxcroft Bldg., S. F. Owner, B. L. Losey. Location, south Geary west of Powell, covering an area of 137½ by 37½ feet. Construction fireproof. Interior finish pine and hardwood with ornamental plaster. Steam heat, modern ventilation and vacuum cleaning. Exterior faced with cement plaster. Plans complete, figures in and under advisement.

#### Contracts Awarded.

**APARTMENT HOUSE**—3 story and base, frame, \$30,000. San Francisco. Architects, Falch and Knoll, Hearst Bldg., S. F. Owner, Isabella Daisley. Contractors, Higginson Co., Humboldt Bank Bldg., S. F. Contract price, \$30,000.

## Loring P. Rixford Wins Competition

Sacramento Library Competition Attracts Fifty-Five Architects From all Parts of the State.

(By Special Wire.)

SACRAMENTO, CAL., Nov 4th, 1915—Competitive plans submitted by Architect Loring P. Rixford of San Francisco were selected by the Jury of Award for the new Sacramento Library to be erected in this city.

Architect Rixford's plan shows two wings connected by a main stack. On the main floor will be the children's library and periodical rooms. The main reading room and delivery rooms occupy the second floor, while the third floor is devoted to special libraries, branch and school libraries. Exterior has been treated in the Italian renaissance.

Fifty-five sets of plans were submitted, coming from architects in all of the principal cities of the State, including Los Angeles. Five honorable mentions were made as follows: Bliss & Faville, John Baur, Washington J. Miller, all of San Francisco, Withey & Davis of Los Angeles and Corlett & Stilberg of Oakland.

The competition was conducted under the American Institute of Architects schedule for competitions, Architect Edgar A. Mathews acting for the Institute.

The building will be a three-story and basement Class "A" structure and is to cost not in excess of \$90,000. The competition attracted more than the usual attention and many of the leading members of the profession competed.

#### OAKLAND AND ALAMEDA COUNTY

**STREET WORK**—Cost not stated. Oakland, Cal. Engineer, City Engineer, Oakland. Owners, City of Oakland. At a recent meeting of the City Council, the following action was taken relative to street improvements. Adopting plans and specifications for the construction of a sewer in Tompkins avenue from Yale avenue northwesterly and recommending passage of resolution of same. Adopting plans and specifications for the improvement of Farnum street between Fruitvale avenue and 34th avenue, and recommending passage of resolution for same. Awarding contract to Hansome-Crummey Company for the improvement of 19th avenue from East 12th street southwesterly. Granting permission to Joseph Carroll to construct a sewer in Adeline street from the manhole in 56th street to a point 120 feet northwesterly therefrom.

**RESIDENCE**—1 story and base, frame, \$2,000. Oakland, Cal. Architect, none. Owner, A. T. Andersen, 7225 Lockwood, Oakland. Location, north East 37th street west of Randolph. Will contain five rooms, bath and sleeping porch. Interior finish pine with some white enamel. Hardwood floors and open fire place. Tile or brick mantel. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**RESIDENCE**—1 story and base, frame, \$2,000. Oakland, Cal. Architect, none. Owner, M. H. Tremble, 2175 Rawson, Oakland. Location, west 51st avenue south of Fortune. Will contain five rooms and bath. Interior finish pine and elm panels. Some hardwood floors. Open fire place and tile or brick mantel. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**RESIDENCES**—1, 1 story and base, frame, \$1,500 each. Oakland, Cal. Architect, none. Owner, J. B. Deppan, San Leandro. Location, 162nd avenue and Orange street. Will contain four rooms and bath. Interiors finished in pine throughout. Some hardwood floors. Open fire place and tile mantels. Extérieurs covered with cement plaster. Plans complete and work to be done by Day Labor.

**RESIDENCES**—2, 1½ story and base, frame, \$2,500 each. Oakland, Cal. Architects, Hutchinson & McLean, 470 12th street, Oakland. Owner, W. A. Anderson, 1774 Assuron avenue, Oakland. Location East 11th street. Will contain six rooms, bath and sleeping porch. Interior finish pine with some

finished in tile. Automatic water heater. Exterior covered with cement plaster. Plans complete and figures being taken.

**APARTMENT HOUSE**—2 story and base, brick and frame, \$22,000. Berkeley, Alameda Co., Cal. Architect, James W. Placheck, Acheson Bldg., Berkeley. Owner, W. Heywood. Location, University avenue and Grove. Will contain four stores and ten suites of three rooms and bath. Interior finish pine and hardwood with some hardwood floors. Steam heat and hot water supply. Wall beds. Tile bath rooms. Patent store fronts. Exterior faced with pressed brick veneer and cement plaster. Plans complete and figures being taken.

**APARTMENT HOUSE**—3 story and base, frame, \$23,000. Berkeley, Alameda Co., Cal. Architect, Eugene K. Martin, 2192 Shattuck avenue, Berkeley. Owner, G. W. Higgins. Location, Virginia and Euclid avenue. Will contain sixteen suites of three rooms and bath. Interior finish pine. Some hardwood floors. Rector system of heating, hot water supply and vacuum cleaning. Bath rooms tile. Wall beds. Exterior covered with cement plaster. Plans complete and architect taking sub-figures.

**FLATS**—2 story and base, frame, \$4,000. Berkeley, Alameda Co., Cal. Architect, Eugene K. Martin, 2192 Shattuck avenue, Berkeley. Owner, L. Berovich. Location, corner of Cedar and Arch streets. Will contain two flats of five and six rooms. Interior finish pine and elm panels with some white enamel and hardwood floors. Open fire places and tile mantels. Bath rooms tile. Automatic water heaters. Exterior covered with cement plaster. Plans being prepared.

### Contracts Awarded

**THEATRE**—1 story and base, brick, \$14,000. Oakland, Cal. Architect, Merrill Newsom, 1748 Broadway, Oakland. Owner, Mr. Werum. Contractor, W. C. Brown, 1624 64th street, Oakland. Contract price, \$14,000. Note: Contractor is now taking sub-figures.

### SAN JOSE AND THE SANTA CLARA VALLEY

**SEWER CONSTRUCTION**—Cost not stated. Daly City, San Mateo Co., Cal. Engineer, City Engineer. Daly City owners, Daly City. A resolution of intention providing for the construction and installation of an 8-inch salt glazed vitrified sewer pipe along Bellevue avenue, commencing at Henrietta street, running east 623 feet; and an 8-inch salt glazed vitrified sewer pipe along Bellevue avenue from Olive street 623 feet to Whittier street; 8-inch salt glazed vitrified sewer pipe in the center line of Lowell street 623 feet, 8-inch diameter salt glazed vitrified sewer pipe in the center line of Lowell street and running 122 feet, 8-inch diameter salt glazed vitrified sewer pipe in Bellevue avenue 225 feet along said Lowell street; 15-inch salt salt glazed vitrified sewer pipe along said Lowell street north 116 feet; 12 feet of 12-inch diameter salt glazed vitrified sewer pipe at the intersection of Bellevue avenue with Henrietta

street; 12 feet of 15-inch diameter salt glazed vitrified sewer pipe at the intersection of Bellevue avenue with Oliver street; the construction of 4 manholes; 4 lampholes, 99 8-inch by 4-inch Y branches, 8 16-inch by 4-inch Y branches, 91 6 feet riser pipes of salt glazed vitrified sewer pipe. Further information may be had from the City Clerk.

**ROAD CONSTRUCTION**—Cost not stated. Salinas, Monterey Co., Cal. Engineer, County Surveyor Cozzins, Salinas. Owners, Monterey County. At the next meeting of the County Supervisors, County Surveyor Cozzins will submit plans for two road improvements to be made in Monterey County. One is the half mile cut on the hill near the Oliver ranch house, just beyond the Carmel River on the Coast road, in the Sur Road District. The other piece of road work is for the grading, macadamizing and surfacing of the 15-mile stretch from Del Monte to the Castoville city limits. Further information will be given on this work when the plans have been accepted.

**BRIDGE**—Reinforced concrete. Cost not stated. Madera, Madera Co., Cal. Engineer, County Surveyor, Madera. Owners, Madera County. The County Supervisors have authorized the construction of a new bridge over the creek near the Munich school house. Further information relative to this work may be had from the County Engineer at Madera.

**CHAPEL**—1 story, reinforced concrete. Cost not stated. Menlo Park, San Mateo Co., Cal. Architects, Shea & Lofquist, Bankers' Investment Bldg., S. F. Owners, St. Patrick's Theological Seminary. Construction will be fireproof. Interior finish pine, hardwood, art glass and ornamental plaster. Heat from central plant. Exterior faced with cement plaster. Preliminary plans complete.

**FACTORY**—1 story, concrete and frame, \$5,000. Palo Alto, Santa Clara Co., Cal. Architect's name not given. Owners, Boden Automatic Hammer Co., 162 Second street, S. F. Will contain main factory room and offices. Cement floor. No interior finish. Exterior cement and corrugated iron. Plans being prepared.

**ELECTROLIERS**—Cost not stated. San Jose, Santa Clara Co., Cal. Engineer, City Engineer, San Jose. Owners, City of San Jose. The design of the Pacific States Electric Company for electroliers to be installed on North First street has been accepted by the North First Street Improvement Association.

### Contracts Awarded.

**STREET IMPROVEMENT**—Cost as follows. San Jose, Santa Clara Co., Cal. Engineer, City Engineer, San Jose. Owners, City of San Jose. Contractors, Bell & Rice, San Jose, New avenue from Rucker to Leavesly, \$4,287. John Boyle, 660 North 10th street, San Jose, concrete curtain walls on Campbell Creek, \$1,462.

**PUTRISHING PIPE**—\$1,760.09. Redwood City, San Mateo Co., Cal. Engineer, Town Engineer, Redwood City. Owners, Town of Redwood City. Contractors, United States Pipe Co., S. F. Contract price, 1,750 feet of 6-inch and 1,900 feet of 4-inch pipe, \$1,760.09.

**RESIDENCE**—1 story and base, frame, \$2,000. Oakland, Cal. Architect, none. Owners, Boyd, Carlos & Co., Hudson and Claremont streets, Oakland. Location, east Arbor avenue north Hudson. Will contain five rooms, bath and sleeping porch. Interior finish pine and white enamel. Hardwood floors, open fire place and tile mantel. Bath room finished in tile. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**RESIDENCE**—2 story and base, frame, \$1,700. Oakland, Cal. Architect, M. L. Diggins, 2444 Bowditch, Berkeley. Owner, J. C. O'Connor, 3214 Bryant avenue, Oakland. Location, east Carlton south of Prospect. Will contain seven rooms, bath and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors, open fire places and tile or brick mantels. Furnace heat. Bath rooms finished in tile. Automatic water heater. Exterior covered with rustie and cement plaster. Plans complete and work to be done by Day Labor.

**RESIDENCE**—2 story and base, frame, \$6,000. Berkeley, Alameda Co., Cal. Architect, H. H. Gutterston, 68 Post street, S. F. Owner, Mr. Brock. Location, Thousand Oaks. Will contain eight rooms, two baths and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors, open fire places, tile and brick mantels and furnace heat. Bath rooms

## MARIN, CONTRA COSTA AND SONOMA COUNTIES

**CITY HALL**—2 story and base, reinforced concrete. \$50,000. Richmond, Contra Costa Co., Cal. Architect, James T. Narbett, associated with J. G. Ughorn, Richmond. Owners, City of Richmond. Location, Macdonald avenue and 23rd street. Fireproof construction. Will contain all city offices. Interior finish pine and hardwood with tile and marble wainscot. Steam heat, hot water supply and oil burning system. Exterior faced with cement plaster. Plans nearly complete.

**SCHOOL**—1 story, frame. Cost not stated. Crystal Springs, Solano Co., Cal. Architect's name not given. Owners, Crystal Springs School District. John A. Wilson, clerk, Suisun. Will contain two class rooms. Interior finish pine. Exterior cement plaster or rustic. Plans complete and figures being taken. Bids open on November 15th.

**STREET IMPROVEMENT**—Cost not stated. Napa, Napa Co., Cal. Engineer, City Engineer. Napa. Owners, City of Napa. At the last meeting of the City Council bids for the improvement of Nursery, Ash, Vallejo and Jackson streets were ordered re-advertised, as the bids were opened too soon and in violation of law. Further information together with plans for this work may be had from the City Engineer or City Clerk at Napa.

**STREET IMPROVEMENT**—Cost as follows. Sausalito, Marin Co., Cal. Engineer, Town Engineer. Sausalito. Owners, Town of Sausalito. At the last meeting of the Town Trustees the following bids were received for the improvement of West and Valley streets: Carnahan & Mulford, 45 Kearny street, S. F., \$2,177; Construction and Engineering Co., 1047 Folsom street, S. F., \$1,859.79. No action was taken in awarding a contract. Further information will be given of this work when an award of contract is made.

**BATH HOUSE FILTERS**—Cost not stated. San Rafael, Marin Co., Cal. Engineer, Town Engineer. San Rafael. Owners, Town of San Rafael. In the matter of filters for the Municipal Baths, the Council at its last meeting ordered the Clerk to re-advertise for bids for the same. The bids will be received at the December session.

**FLAT AND STORE**—2 story and base, frame. Cost not stated. Pittsburg, Contra Costa Co., Cal. Architect, W. A. Cornelius, Merchants' National Bank Bldg., S. F. Owners, Grosshen Bros. Will contain a store on the first floor and modern flats above. Interior finish pine. Exterior cement plaster and rustic. Plans complete and work to be done by Day Labor.

**HOTEL AND STORES**—2 story and base. Class C construction, \$35,000. Martinez, Contra Costa Co., Cal. Architect, none. Owner, William F. Ohm, 1615 Fell street, S. F. Will contain a number of stores on the first floor and modern hotel rooms and baths above. Interior finish pine. Steam heat, oil burning equipment and hot water system. Patent store fronts. Exterior faced with cement plaster and pressed brick. Plans complete and work to be done by Day Labor.

**SCHOOL**—1 story, hollow tile or frame. Cost as follows. Torrey, Contra Costa Co., Cal. Architect, Norman R. Coulter, 46 Kearny street, S. F. Owners, Selby School District. Kollar & Crane submitted the lowest bid for the work on propositions 1 and 2, while Caldwell & Son were low on proposition 3, which calls for hollow tile. A complete list of the bids will be found under the heading of Marin and Contra Costa in this issue. No contract has been awarded.

### Contracts Awarded.

**SEWER CONSTRUCTION**—Cost not stated. San Anselmo, Marin Co., Cal. Engineer, Town Engineer. San Anselmo.

mo. Owners, Town of San Anselmo. Contractors, Martin Rock Co., San Anselmo. Contract covers construction of sewers in Forest avenue and Willow avenue.

**SEWER CONSTRUCTION**—\$1,926.29. Sausalito, Marin Co., Cal. Engineer, Town Engineer. Sausalito. Owners, Town of Sausalito. Contractor, W. J. Tobin, 555 Filbert street, Oakland. Contract for sewers in District F. Contract price, \$11,926.29.

**MOTORS FOR PUMPS**—\$7,500.00. San Quentin, Marin Co., Cal. Engineer, State Engineer. Sacramento. Owners, State of California. Contractors, General Electric Co., S. F. Contract price for 56 motors \$7,500.00.

## School Bids Opened By Sibley Trustees.

All Figures Taken Under Advice of For One-Story School Designed by Architect Norman R. Coulter.

## FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA

**STREET PAVING**—\$50,000. Oakdale, Stanislaus Co., Cal. Engineer, City Engineer. Oakdale. Owners, City of Oakdale. The City Trustees will take up for consideration at their next meeting the question of improving F street in order to connect with the State highway. To pave the street for its full length will cost about \$50,000. Further information will be given when a decision is reached.

**SEWER CONSTRUCTION**—Cost not stated. Bakersfield, Kern Co., Cal. Engineer, City Engineer. Bakersfield. Owners, City of Bakersfield. At the last meeting of the City Council resolutions of intention in sewer district 53, covering a district between Palm and Diagona on S street were adopted. Bids on this work will be called shortly.

**CONCRETE FACING AND CURTAIN WALL**—Cost not stated. Modesto, Stanislaus Co., Cal. Engineer, Chief Engineer Hermann, Modesto. Owners, Modesto Irrigation District. As the result of re-advertisement for the work of constructing a concrete facing and curtain wall for Dam No. 1 of the Modesto Irrigation District, due to refusal of John Monk, lowest bidder on former advertisement at a figure of \$57,971, to proceed with the work, the district will have to pay at least \$15,000 more than his figure for the work. This was shown at the opening of bids by the board of directors, the lowest of five bidders being Pent Bros. of Oakdale, at a figure of \$72,800. The other bids were Tibbitts-Pacific Co., S. F.,

Costa County, for the construction of a one-story frame or hollow tile school building designed by Architect Norman R. Coulter, 46 Kearny street. Bids were submitted on three separate propositions as follows: Prop. 1, as per plans and specifications; Prop. 2, for Klingstone exterior facing and Prop. 3, for hollow tile walls and cement exterior facing. All bids were taken under advisement. Following is a complete list of the bids received:

\$77,770. Contra Costa Construction Co., S. F., cost plus 15 per cent, with guarantee not to exceed \$75,000; Teichert & Ambrose of Sacramento, \$89,540. Ross Construction Co., S. F., \$78,950. Action will be taken on the bids in a few days.

**CULVERT**—Concrete, \$1,520. Modesto, Stanislaus Co., Cal. Engineer, Chief Engineer Hermann. Modesto. Owners Modesto Irrigation District. Secretary C. S. Abbott of the Modesto Irrigation District has been instructed to communicate with the Southern Pacific Co. stating that the district will accept the proposal of the company to build a large culvert under the track for the main drainage canal between Modesto and Salida. The present culvert is too small to carry the drainage water.

**DEEPENING CANAL**—Cost not stated. Modesto, Stanislaus Co., Cal. Engineer, Chief Engineer E. C. Hermann. Modesto. Owners, Modesto Irrigation District. At the last meeting of the board of directors of the Modesto Irrigation District, plans and specifications were adopted for deepening, cleaning and extending the main drainage canal of the district from the Southern Pacific's right of way to Fanning cut of the San Joaquin River. The bids are to be opened at 10 o'clock November 15th. Further information may be had from the district's Chief Engineer, E. C. Hermann at Modesto. **IRRIGATION DAM**—Cost not stated. Oakdale, Stanislaus Co., Cal. Engineers, William Mulholland and J. M. Howells, Oakdale. Owners, Modesto Irrigation District. Plans and specifications were adopted for a concrete dam to be placed on Woodbury creek. The work will be started at once, according

to word received from this city. Farmers want immediate action on the project. William Mulholland, builder of the Los Angeles aqueduct, and J. M. Howells, chief engineer of the Great Western Power Company, recommended an earth dam without the concrete core that originally was planned. Twelve test pits have been sunk at the site of the proposed dam, two of them 40 feet deep and the rest ranging from 30 to 75 feet. The dam itself will be of earth, and sufficient material suitable for that purpose is close at hand. The first work on the dam itself will be the building of a large take-out, which will be a cement structure in culvert form. This structure alone will cost \$20,000, it is estimated. Should work start at once, it is thought that from 2,000 to 5,000 acre feet of water will be available late next season for irrigation purposes.

**RESIDENCE** — 2 story and base, frame, \$5,000. Fresno, Fresno Co., Cal. Architect's name not given. Owner, A. E. Cochran, Fresno. Will contain seven rooms, bath and sleeping porch. Interior finish pine and white enamel. Hardwood floors and open fire places. Mantels tile or brick. Automatic water heater. Tile floor in bath. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**RESIDENCE** — 1 story and base, frame, \$2,000. Fresno, Fresno Co., Cal. Architect, none. Owner, K. C. Buwalda, 516 Mona avenue, Fresno. Location, 5111 Mona avenue. Will contain six rooms and bath. Interior finish pine throughout. Hardwood floors and open fire place. Mantel tile or brick. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**RESIDENCES** — 4, 2 story and base, frame, \$4,000 each. Fresno, Fresno Co., Cal. Architect, Eugene Mathewson, Forsythe Bldg., Fresno. Owners, Shepard-Cochrane Co. Location, Ventura Vista Tract. Each will contain eight rooms, bath and sleeping porch. Interiors finished in pine, white enamel and hardwood veneer. Hardwood floors, open fire places and tile or brick mantels. Bath rooms tile. Automatic water heaters. Exteriors covered with cement plaster. Plans being prepared.

**MUNICIPAL AUDITORIUM** — 2 story and base, brick, \$55,000. Visalia, Tulare Co., Cal. Architects, Coates & Traver, Rowell Bldg., Fresno. Owners, City of Visalia. An official announcement has been sent out stating that bids will close November 17th for the construction of the Visalia Municipal Auditorium.

**STREET PAVING** — Cost not stated. Fresno, Fresno Co., Cal. Engineer, City Engineer, Fresno. Owners, City of Fresno. The City Council has accepted the offer of the Stewart Fruit Company to exchange a triangular piece on Ventura and Angus, in order to arrange for the paving of Ventura avenue from Railroad street to the city limits, a distance of about eight blocks. The agreement will make it possible to straighten to a large extent the curve at the intersection of R and Ventura streets. A petition for paving is expected to be presented soon. Resolutions of intention pro-

viding for the improvement of Const and Franklin avenues have been passed by the Council.

**ELECTROLIER SYSTEM** — Cost not stated. Fresno, Fresno Co., Cal. Engineer, City Engineer, Fresno. Owners, City of Fresno. Plans for an electrolier system in the unlighted district of the city on J and Tuolumne streets were adopted at the last meeting of the City Council, and a resolution of intention providing for the installation of them has been passed.

**BRIDGES AND GRADING** — Cost not stated. Bakersfield, Kern Co., Cal. Engineer, County Surveyor, Bakersfield. Owners, Kern County. At a recent meeting of the County Supervisors the Clerk was instructed to advertise for bids until December 9th for bridges and grading of section 3 of the Caliente-Kernville highway, and for culverts, grading and paving of section 1-A of the Bakersfield-McKittrick highway.

**STORES** — 1 story and base, brick. Cost not stated. Fresno, Fresno Co., Cal. Architect, Eugene Mathewson, Forsythe Bldg., Fresno. Owner, James Portheus. Location P and Tulare streets, covering an area of 15 by 65 feet. Will contain five stores. Interior finish pine. Patent store fronts. Exterior faced with pressed brick or cement plaster. Plans complete and figures being taken.

#### Contracts Awarded.

**STREET PAVING** — Cost not stated. Modesto, Stanislaus Co., Cal. Engineer, City Engineer, Modesto. Owners, City of Modesto. Contractor, W. E. Worswick, Jr., Fresno. Contract price not stated. Contract covers paving intersection of L and Mth streets.

**RESIDENCE** — 2 story and base, frame, \$7,890. Visalia, Tulare Co., Cal. Architects, Swartz & Swartz, Rowell Bldg., Fresno. Owner, Miss Mary F. Chatten. Contractor, D. L. Barnhart, Visalia. Contract price, \$7,890.

**RESIDENCE** — 2 story and base, frame, \$5,000. Fresno, Fresno Co., Cal. Architect, Eugene Mathewson, Forsythe Bldg., Fresno. Owner, A. E. Cochran. Contractors, F. J. Stone & Son, 2007 Mariposa street, Fresno. Contract price, \$5,000.

**BRIDGE** — Timber, \$1,092. Sanger, Fresno Co., Cal. Engineer, County Surveyor, Fresno. Owners, Fresno County. Contractors, Benson & Johnson, Kingsburg. Contract price, \$1,092.

**BRIDGE** — Reinforced concrete. Cost not stated. Hanford, Kings Co., Cal. Engineer, County Surveyor, Hanford. Owners, Kings County. Contractors, Adell-Cortwright Concrete Pipe Co., Hanford. Contract price not stated.

**BRIDGE** — Reinforced concrete, \$6,000. Newville, Glenn Co., Cal. Engineer, County Surveyor, Willows. Owners, Glenn County. Contractors, Patton Bros., 510 32nd street, Oakland. Contract price, \$6,000.

**SCHOOL** — 1 story, frame, \$5,965. Milnes School District, Stanislaus Co., Cal. Architect's name not given. Owners, Milnes School District. Contractor, R. E. De Viek, Oakdale. Contract price, \$5,965.

#### SACRAMENTO, STOCKTON AND NORTHERN CALIFORNIA

**SCHOOL** — 1 story, portable. Cost not stated. Vallejo, Solano Co., Cal. Architect, none. Owners, Town of Val-

lejo. Bids will be opened on November 17th at 8 p. m. for furnishing a portable school. Complete information can be secured from G. V. Whaley, secretary of the Board of Education.

**STATE HIGHWAY CONSTRUCTION** — Cost not stated. Yreka, Siskiyou Co., Cal. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. T. A. Bedloid, Division Engineer of the State Highway, accompanied by H. S. Conley, assistant engineer, and A. Lowden, resident engineer of the Siskiyou division, have returned from a tour of inspection down the Klamath River as far as Happy Camp. This trip is preliminary to a survey to be made down the Klamath River for a road to connect with Humboldt County's automobile road to Orleans Bar and on to Eureka. This survey is to gather data on the feasibility of such a road to connect with the California-Oregon highway at the junction of the Shasta and Klamath Rivers between Yreka and Hornbrook. Such a road following the Klamath River to the coast would run on an easy grade and in a country where snow does not obstruct traffic in the winter time and could be used the year round. It is part of the Highway Engineer's plan to make a connecting loop between the coast and central highways of the State.

**STREET PAVING** — Cost not stated. Woodland Yolo Co., Cal. Engineer, City Engineer, Woodland. Owners, City of Woodland. Although they have not been awarded the contract, the Clark & Henery Construction Co., Ochsner Bldg., Sacramento, is assembling material on the ground for the paving to be done in this city. When bids were opened on the work the Clark & Henery Co. submitted the lowest figure.

**DEEPENING DITCHES** — \$50,000. Live Oak, Sutter Co., Cal. Engineer's name not given. Owners, Reclamation District No. 777, Live Oak. Land owners of District 777 have called a meeting to consider the matter of providing adequate drainage for the district. It is estimated it will cost \$50,000 to deepen present ditches sufficiently to insure the safety of orchard trees and other crops. Ways and means to provide drainage will be taken up.

**RESIDENCE** — 1 story and base, frame, \$6,500. Davis, Yolo Co., Cal. Architect, none. Owner, A. R. Pedder, Davis. Location, Bowers' Addition. Will contain seven rooms, baths and sleeping porch. Interior finish pine and white enamel. Hardwood floors, furnace heat and open fire places. Mantels tile and brick. Bath rooms finished in tile. Automatic water heater. Exterior covered with cement plaster and rustic. Wall beds. Plans being prepared.

**APARTMENT HOUSE** — 3 story and base, frame, \$15,000. Stockton, San Joaquin Co., Cal. Architect, W. B. Thomas, Yosemite Theatre Bldg., Stockton. Owner, A. J. McPhee. Location, northeast corner San Joaquin and Poplar streets. Will contain a number of two and three room suites. Interior finish pine and elm with some hardwood floors. Central heating system, hot water supply and wall beds. Bath rooms tile. Exterior covered with rustic and cement plaster. Plans

complete and work to be done by Day Labor.

**BRIDGE**—Steel and reinforced concrete. Cost not stated. Yolo By-pass, Yolo Co., Cal. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Bids will be opened on November 29th for constructing a plate girder 80-foot clear span bridge with reinforced concrete approaches. Total length 141 feet. All former bids for this work were rejected. An official proposal appears in another column of this issue.

**BRIDGE CONSTRUCTION**—Reinforced concrete, \$2,850. Sacramento, Cal. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. No action of awarding the contract to J. W. Terrill, 1111 29th street, Sacramento, for the construction of the bridge in Del Paso Park was taken at the last meeting of the Park Board. The bid of Terrill was the lowest bid submitted, but was above the engineer's estimate. Terrill bid \$3,160, while the estimate was placed at \$2,850.

**CHURCH**—1 story and base, frame. Cost not stated. Manteca, San Joaquin Co., Cal. Architect, Peter L. Sala, Commercial & Savings Bank Bldg., Stockton. Owners, Roman Catholic Church, Rev. Father W. E. McCough, pastor. Will contain main auditorium and Sunday school rooms. Interior finish pine. Some art glass windows. Exterior covered with rustic. Plans being prepared.

**CITY HALL AND JAIL**—4 story and base. Class A construction, \$175,000. Sacramento, Cal. Architects, Shea & Loquist, Bankers' Investment Bldg., S. F. Owners, City of Sacramento. Plans have been completed and approved for the construction of this building and bids will be called for at once. Construction will be fireproof. Will contain all city offices and the jail. Interior finish pine and hardwood with marble and tile wainscot and bases. Steam heat, oil burning equipment and vacuum cleaning. Exterior faced with cement plaster.

**BANK**—2 story, brick. Cost not stated. Ravendale, Lassen Co., Cal. Architect's name not given. Owners, California Land and Power Co., W. B. Edwards, Pres., Ravendale. Will contain banking rooms on first floor and hotel rooms above. Interior finish pine. Central heating system and hot water supply. Exterior faced with pressed brick. Plans complete and work to be done by Day Labor.

**IRRIGATION PROJECT**—Cost not stated. Woodland, Yolo Co., Cal. Engineer's name withheld. Owners, Prairie Ditch Co., Woodland. Articles of incorporation have been filed in Woodland by the Prairie Ditch Co., which plans to build an irrigation ditch, bulkheads, etc., to connect with a tributary of the main Yolo Water & Power Company's canal. The stockholders are: Lou Ulrich, Dan McGregor, G. Benedict, H. T. Griffin, Andrew Steum, J. O. Davis, Samuel Frank, George Redden and B. B. Hare.

**ROAD IMPROVEMENT**—Cost not stated. Stockton, San Joaquin Co., Cal. Engineer, County Surveyor, Stockton. Owners, San Joaquin County. At a recent meeting of the County Supervisors plans and specifications were

adopted for grading a little less than three miles of the French Camp road from a point a mile east of Escalon to the Stanislaus County line. Bids for the work will be opened November 22nd at 11 o'clock a. m.

**Contracts Awarded.**  
**TRANSPORTER STATION FOR SEWER PLANT**—\$3,325. Sacramento, Cal. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Contractor, J. W. Terrill, 1111 29th street, Sacramento. Contract price, \$3,325.

## LOS ANGELES AND SOUTHERN CALIFORNIA

**SEWER CONSTRUCTION**—Cost not stated. Santa Barbara, Santa Barbara Co., Cal. Engineer, City Engineer, Santa Barbara. Owners, City of Santa Barbara. Bids will be opened on November 18th at 12 noon for constructing an 8-inch vitrified pipe sanitary sewer in Sola street from an existing manhole at the center of San Andreas and Sola streets to a manhole to be constructed in the center of Sola and Gillespie streets. To construct an 8-inch vitrified pipe sanitary sewer in Gillespie street from manhole to be constructed in Sola street to a manhole to be constructed in Michitorenca street.

**ROAD CONSTRUCTION**—Cost not stated. Los Angeles, Cal. Engineer, County Surveyor, Los Angeles Owners, County of Los Angeles. The Board of Supervisors directed the road commissioner to prepare plans and specifications for the construction of a road in Mint Canyon. The road is to be built of concrete, beginning at a point about five miles north of Saugus and extending to Palmdale in the Antelope Valley. Further information will be given of this work when the plans are complete.

**BRIDGE CONSTRUCTION**—Steel and concrete, \$25,320. Myers Creek, Imperial Co., Cal. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Holland Construction Co., San Diego, submitted the lowest figure for constructing the reinforced concrete and steel highway bridge over Myers Creek in Imperial County. Bids were opened by the State Highway Commission. Holland's bid was \$15,600 and the engineer's estimate is \$25,320.33. No contract has been awarded.

**FACTORY**—10 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architect, A. C. Martin, Higgins Bldg., L. A. owner's name withheld. Location, near Mameda

street, covering an area of 100 by 100 feet. Fireproof construction, reinforced walls, floors and roof slabs. Hollow tile partitions, metal window sash and frames. Elevator service and steam heat, oil burning equipment. Exterior cement plaster. Plans being prepared. Bids being taken for reinforcing steel.

**HOTEL AND STORES**—1 story and base. Class C construction, \$20,000. Los Angeles, Cal. Architect, Charles H. Kysor, Wright and Callender Bldg., L. A. Owner, A. L. Phillips. Location, 6th near Ruth, covering an area of 35 by 100 feet. Will contain several stores and sixty rooms. Interior finish pine. Patent store fronts, steam heat and hot water service. Exterior faced with pressed brick. Plans complete and figures being taken.

**GARAGE**—2 story and base. Class C construction. Cost not stated. Los Angeles, Cal. Architect, Albert C. Martin, Higgins Bldg., L. A. Owners, Tony Milcovitch and Miss T. Garibaldi. Location, Los Angeles street between 5th and 6th streets. Designed for a commercial garage. Concrete floors, metal window sash and frames. Exterior faced with pressed brick. Plans being prepared.

**Contracts Awarded.**  
**STREET IMPROVEMENT**—\$13,475. Santa Barbara, Santa Barbara Co., Cal. Engineer, City Engineer, Santa Barbara. Owners, City of Santa Barbara. Contractors, F. R. Ritchie & Co., Chronicle Bldg., S. F. Contract for repaving East Boulevard including Booth Point. Contract price, \$13,475.

**OUTFALL SEWER**—\$206,199.10. El Centro, Imperial Co., Cal. Engineer, City Engineer, El Centro Owners, Towns of El Centro and Imperial. Contractor, James Kennedy, Washington Bldg., L. A. Contract price, \$206,199.10.

## PORTLAND AND OREGON

**RAILROAD CONSTRUCTION**—\$800,000. Portland, Ore. Engineer, Engineering Dept. Oregon - Washington Railroad & Navigation Co., Portland. Owners, O. W. R. & N. Co. The directors of the O. W. R. & N. have announced that \$800,000 will be spent in rail renewals on various parts of the main line between Portland and Harrington. The units to be improved with the approximate costs are: Troutdale to Honneville, 25 miles, with 30-pound steel, replacing 75-pound steel; cost, \$120,000. Blalocks to Coyote, 37 miles, with 30-pound steel, replacing

**Wybro**

The Panels that are  
famous.

**White Brothers**

5th and Brannan Streets

San Francisco

**Wybro Panels combine Service & Quality with Price.**

It is not alone the "price" that counts in buying panels. The quality is of more than passing importance.

WYBRO PANELS combine quality with service and price. Quality is first in Wybro Panels—the service they give is unsurpassed, and the price is just right—not high, nor low—but just the right price for the right panel.

200 varieties—price list free.

75-pound steel; cost, \$290,000. Echo to Yakum, 10 miles, with 90-pound steel, replacing 80-pound steel; cost, \$80,000. Pendleton to Gibbon, 25 miles, with 90-pound steel, replacing 80-pound steel; cost, \$190,000. Gibbon to Duncan, 9 miles, with 90-pound steel, replacing 80-pound steel; cost, \$50,000. The aggregate distance to be covered by these renewals is 106 miles.

### SEATTLE AND WASHINGTON

**WAREHOUSE ADDITION**—4 story, reinforced concrete. Cost not stated. Seattle, Wash. Engineer, Port of Seattle Commission. Owners, City of Seattle. All bids for the construction of the proposed four-story reinforced concrete addition to the Port of Seattle, Whatem avenue warehouse, have been rejected and the project postponed indefinitely. Bids which were opened showed H. Brandt low bidder at \$60,500, and ranging from that to \$84,000 by Hoy & Co., railroad contractors of Spokane.

**SCHOOL**—2 story and base, reinforced concrete and steel, \$115,000. Bellingham, Wash. Architects, Heath & Gove, National Realty Bldg., Tacoma. Owners, City of Bellingham. Plans have been completed for the new high school building and bids are now being taken. Construction will be fireproof. Interior finish pine with maple floors. Steam heat, oil burning furnace and vacuum cleaning. Exterior faced with pressed brick. Separate figures for general construction, heating and ventilating, plumbing and electric work.

**HOME ECONOMICS BUILDING**—2 story and base, reinforced concrete, \$99,926. Seattle, Wash. Architects, Behh & Gould, Denny Bldg., Seattle. Owners, State of Washington. Bids opened by the Board of Regents of the University of Washington for the construction of the home economics building show Finne & Gjarde, Northern Bank Bldg., Seattle, low on their bid of \$99,926. Further mention will be made when the contract is awarded.

**OFFICES AND CLUB ROOMS**—12 story and base, reinforced concrete, \$400,000. Seattle, Wash. Architect, A. Warren Gould, American Bank Bldg., associated with George W. Lawton, Owner, James Moses, leased to The Artie Club. Location, northeast northeast corner of 3rd and Cherry, covering an area of 120 by 112 feet. Will contain 180 offices on the Third avenue frontage, while the entire Cherry street frontage will be occupied by the Artie Club. Concrete walls, floors and roof. Interior finish pine and hardwood with special trim in the club rooms. Steam heat, oil burning plant, vacuum cleaning, hot water supply and three elevators. Metal window sash and frames, hollow tile partitions. Exterior faced with pressed brick and terra cotta. Plans ready for figures within a month.

## Unit Plant Hot Blast Furnace

### Delivers the Heat

#### A Complete Answer to the Heating Question.

**Instantaneous**—Furnishes an instantaneous and continuous supply of **Sanitary**—fresh warm air free from gas fumes, odors, smoke or dust.

**Hygienic**—Maintains an even temperature necessary to health and comfort.

**Scientific**—Built like a real hot air furnace reduced in size.

**Convenient**—Operated from inside of room, saving many steps to cellar.

**Simple**—Any child 10 years of age can operate, turn the key and apply match.

**Economical**—Wall furnace burns 10 cubic feet and floor furnace 20 cubic feet of gas per hour.

**Efficient**—Each furnace will heat from 2 to 5 rooms or from 3,000 to 9,000 cubic feet of space.

**Fireproof**—Has four thicknesses of metal and three air spaces of one inch each between fire and wood; fire is 20 inches from floor.

**Up to Date**—Uses exclusively the Johnson Hot Blast Burner, recognized as the most efficient ever constructed.

**Durable**—Is made from best grade of metal to be obtained.

**Finish**—Register electro plated Flemish Brass. The finish that lasts.

**Installation**—Can be installed by any gas appliance dealer, plumber, tinsmith or hardware merchant at nominal cost.

**Retail Prices**—Wall Furnace, any style, \$22.50  
Floor Furnace, any style, \$30.00  
Installations and fittings extra.

**WALL FURNACE STYLE C**

Size of Wall Furnace front is 17x19 inches, with a recessed portion of 11x17x1 inches between studding. Recessed portion has a 7-inch vent opening at top and a fresh air intake 3x12 inches at bottom operated with damper in front. Both vent and fresh air intake pipes go between studding.

**FLOOR FURNACE STYLE B**  
Size 14½ in. square by 2 ft. high  
Has 8-in. Fresh Air Intake with Damper.  
Has 3-in. Outlet Vent  
Fits in space between floor joists  
Hangs from register which lays flush with floor.

#### Style

A. Floor Furnace with fresh air intake on side. For use in buildings having sufficient fresh air circulation under same. For artificial gas only.

B. Floor Furnace with fresh air intake at bottom. For use in buildings where it is desirable to obtain air directly from outside of cellar or basement. For artificial gas only.

NOTE—Style A and B are built alike except for position of fresh air intake.

C. Wall Furnace with fresh air intake at bottom. For artificial gas only.

D. Wall Furnace with fresh air intake at back. For artificial gas only.

NOTE—Style C and D are built alike except for position of fresh air intake.

Prices and Information on Natural Gas Furnaces Furnished on Application.

## Unit Plant Hot Blast Furnace

### Delivers the Heat

#### A Complete Answer to the Heating Question.

**Instantaneous**—Furnishes an instantaneous and continuous supply of Sanitary—fresh warm air free from gas fumes, odors, smoke or dust.

**Hygienic**—Maintains an even temperature necessary to health and comfort.

**Scientific**—Built like a real hot air furnace reduced in size.

**Convenient**—Operated from inside of room, saving many steps to cellar.

**Simple**—Any child 10 years of age can operate, turn the key and apply match.

**Economical**—Wall furnace burns 10 cubic feet and floor furnace 20 cubic feet of gas per hour.

**Efficient**—Each furnace will heat from 2 to 5 rooms or from 3,000 to 9,000 cubic feet of space.

**Fireproof**—Has four thicknesses of metal and three air spaces of one inch each between fire and wood; fire is 20 inches from floor.

**Up to Date**—Uses exclusively the Johnson Hot Blast Burner, recognized as the most efficient ever constructed.

**Durable**—Is made from best grade of metal to be obtained.

**Finish**—Register electro plated Flemish Brass. The finish that lasts.

**Installation**—Can be installed by any gas appliance dealer, plumber, tinsmith or hardware merchant at nominal cost.

**Retail Prices**—Wall Furnace, any style, \$22.50  
Floor Furnace, any style, \$30.00  
Installations and fittings extra.

#### WALL FURNACE STYLE C

Size of Wall Furnace front is 17x19 inches, with a recessed portion of 14x17x4 inches between studding. Recessed portion has a 2-inch vent opening at top and a fresh air intake 3x12 inches at bottom operated with damper in front. Both vent and fresh air intake pipes go between studding.

## Economics Of Highway Maintenance.

By George Nelson, C. E.

Constructing Concrete Base, California State Highway, Near Niles Alameda County.

### Protection for Road Surfaces.

The good roads movement is certainly attaining a powerful impetus in this country. Modern highways are being constructed and old roads and trails rebuilt from Maine to California. The advent first of the bicycle and later of the automobile and the motor truck have changed an attitude of indifference in the great majority of men and women to one of more or less enthusiastic interest. With characteristic American energy, we have demanded good roads and have demanded that they be produced at once, and the result is the greatest mileage of road construction in the last five years ever accomplished in a similar period in the history of the world.

In the meantime we have forgotten all about maintaining our new possessions. When we have voted a great bond issue, appointed a commission, and have finally seen the men and teams digging and hauling and rolling on our new avenues of commerce and pleasure, it has seemed to us that the whole thing was done in respect to the roads, and that all that remained was to meet the interest on the bonds and finally to retire them at maturity.

From many parts of the country, however, are now coming walls of disappointment incited by the discovery

that this comfortable view of road building is not borne out by the facts. The demand for good smooth roadways for automobiles and motor trucks has led a large number of our road officials to place the emphasis on surfaces rather than on foundations, with the inevitable result of this policy in any form of construction. The destructive action of swiftly moving automobiles on water-bound macadam roads of old type is too well known to need further comment. A newer development is that of the effect upon road surfaces and upon the weaker bridges and culverts of the gigantic motor trucks that are now taking the place of freight trains for local and interurban haulage. The jitney bus, the latest and most popular of our means of passenger transportation with its load of six or eight tons, carried at a high rate of speed over city streets and suburban roads, is also an important factor in the rapid deterioration of pavements. Threshing outfits and other heavy engine propelled vehicles sometimes travel the highways with their great wheels equipped with the spikes or other projections which are desirable for crossing fields, and these, of course, tend to rapidly tear up the road bed. The old and familiar agent of highway destruction, the heavy

horse-drawn wagon with narrow tires, is just as effective now in its evil work as ever. All these facts call for the most intelligent consideration on the part of the highway officials and of the public which pays the bills.

Various expedients are suggested and are even attempted in different localities for lessening the ill effects upon road surfaces of some of the vehicles above discussed. In some places an attempt is made to limit the weight of freight carrying motor trucks and of their loads. In other places their drivers are supposed to be limited to certain rates of speed. Many States are now prohibiting the appearance upon the highways of traction and other industrial engines with spurred wheels, and undoubtedly there are to be found on the statute books of half of the States, some feeble and forgotten laws with regard to the width of tires of heavy horse-drawn wagons.

All of these attempts are, as we have seen, almost wholly unsuccessful. There is no doubt that the hauling of heavy loads of merchandise on motor driven vehicles is one of the inevitable developments of our period, in the same way as the swift transportation of passengers by automobiles. Restrictive legislation never makes much headway against economic devel-

opment. If there is any region where the wide tire laws are effectively enforced, the news of it has not come to the attention of highway officials generally.

All this could be remedied by the imposition of a logical highway tax. The owner of any vehicle which travels the streets and highways should be required to take out an annual license and to have a numbered tag attached to his vehicle, as is now done with automobiles. The cost of this license could be graded all the way from a merely nominal sum in the case of bicycles, up to an absolutely prohibitive tax in the case of four-horse wagons with two-inch tires or motor trucks intended for loads out of proportion to the capacity of road surfaces and bridge structures. The theory should be that the tax or license fee paid on each vehicle should be in proportion to its destructive effect upon the streets and roads, and it could readily be so arranged as to absolutely

iron corrugated pipe would undoubtedly take the place of most of the frail and impermanent culvert structures, and reinforced concrete, erected under thoroughly competent supervision, that of the decaying timber and plank bridges for the larger streams.

The raising of highway funds would thus become automatic and comparatively simple. We must not flatter ourselves, however, that any portion of the community would be escaping its proper share of the burden. Whether or not we own or drive vehicles, we are all served by them in a greater or less degree, and undoubtedly the expenses of operating them whether in the form of fuel and oil, drivers, or licenses taxes, is laid upon us in the form of the cost of transportation or of the commodities delivered. The method of taxing vehicles in proportion to the wear and tear produced upon the streets and roads, is recommended not as a means of shifting the burden from the shoulders of the own

posed on the surface of a sheet or plates gives opportunity for the formation of a galvanic couple and, therefore, for the corrosion of iron.

The existence of a commercial form of iron which is practically free from impurities has made it possible to construct pipes of relatively thin plates with assurance of reasonable permanence. The corrugated form and overlapping joints of this type of construction results in a very remarkable increase of strength over that of a plain cylinder and also in other striking advantages in practice. The pipe is quite capable of sinking and bending with a shifting and settling embankment without suffering any serious injury, and many of them are in use where this has taken place to a very considerable extent, and which yet are giving good service and seem likely to continue so doing for very long periods. This is, of course, a striking superiority to any rigid form of construction.

Typical Installation of Pure Iron Culvert Under California Highways.

exclude those vehicles which were destructive out of proportion to their service to the community.

The whole of the fund thus acquired should be devoted to highway construction and maintenance. This method of raising street and highway moneys would have many advantages aside from the obvious one of promptness and ease of collection. As above shown it could be used to render difficult or impossible the use of the most undesirable vehicles. The license and tag system would extend the responsibility of drivers of all sorts of vehicles which is now intended to cover automobiles and motor trucks only. The active users of the highways would be those directly taxed for their maintenance, and would thus feel a more direct interest in the wise and efficient use of the funds. Semi-irresponsible boards of commissioners would not be allowed to waste the public moneys in temporary or make-shift road construction, or in the building of wooden bridges and culverts. Pure

ers of real estate, but as the most efficient means for accomplishing several desirable objects other than the raising of the necessary money.

#### Pure Iron Corrugated Pipe for Drainage.

One of the interesting developments in highway and railway construction and maintenance is the rapidly extending use of corrugated culvert pipe made from pure iron. The large amount of evidence which has been published on the comparatively high resistance to corrosion afforded by iron from which impurities have been almost wholly excluded, leaves very little necessity for further discussion on this point.

Briefly, the principle is that rust and corrosion arise from electro-chemical processes substantially similar to those of the galvanic battery of voltaic cell, and thus depend upon the exposure of two metals or other substances of varying electro-potential to moisture and oxygen. Any substance differing electro-chemically from iron and ex-

The corrugations also enable the pipe to absorb expansion and contraction arising from temperature changes. A very curious fact with regard to this form of pipe is that it clears itself from silt and other obstructions better than smooth pipe. This statement would be found incredible, were it not for the fact that it has been proven many times over where the pipe is used in the form of inverted siphons. Of these there are a great many in the Southwest, and keeping them clear from silt is a very important matter. The explanation seems to be that the corrugations excite ripples in the flowing water and keep the silt in suspension so that it may pass through the pipe. A natural condition somewhat parallel to this is found in the beds of streams. Where these are rough and stony and the water is, therefore, constantly roiled, there is little or no deposit of mud. In the smooth stretches, however, where the only motion is that of the current, mud rapidly accumulates.

# RURAL HIGHWAYS.

By L. W. Page, Director, Office of Public Roads, U. S. Department of the Interior, Washington, D. C., U. S. A.

## Economic Considerations.

The fundamental problems which confront an engineer in dealing with public road improvement are concerned with determining, first, which roads should be improved; second, what types of improvement should be employed; and, third, what methods of construction and maintenance are most efficient. To solve these problems intelligently requires skill in handling questions of economics in addition to engineering ability. In other words, the highway engineer should be able to determine what to build and where to build it, as well as how the building is to be done, and he should bear in mind that as much waste is likely to result from improving the wrong roads or employing wrong types of improvement as from using faulty materials or methods in making the improvements.

The only reasonable basis for determining which of perhaps a great number of public roads in a community should be improved, or the order in which improvements should take place, is public convenience. In order to make each improvement add the maximum amount to the convenience of the public, however, it is necessary that the engineer who plans the improvements must have a comprehensive understanding of the economic and social relationship which exists between different parts of the community under consideration and also the effect which different roads, if improved, would have in making this relationship more advantageous.

In order to gain a comprehensive understanding of this kind it is usually necessary for the engineer to prepare a plan showing the various highways in proper relation to each other, and showing also how population and industries are distributed. The amount and character of traffic using each important road, or which would use an improved road having the same location, may be estimated by means of traffic counts or otherwise, and should be shown on the plan.

With such a plan before him, it is practical for an engineer to lay out an intelligent system of improved highways which would accommodate the entire community, and to assign relative weights to each unit of the system according to its importance.

The type selected should ordinarily be shown to have a net economic advantage over any other type which might be selected. The economic efficiency of improved roads is affected by a number of factors, some of which are usually more or less indeterminate, but an intelligent evaluation of these factors evidently forms a much more satisfactory basis for making comparisons than would be formed by any set of arbitrary assumptions.

The principal factors which affect

the economic efficiency of an improved road and upon which economic comparisons should be based are: First, cost of construction; second, cost of maintenance; third, amount and character of traffic; and fourth, the average unit cost of hauling before and after the improvement is made.

The first factor, cost of construction, can usually be satisfactorily estimated for any particular road, when the conditions which affect the availability of materials, the character of labor, the prevailing gradients, etc., are understood. These conditions should all be indicated on the model system plan.

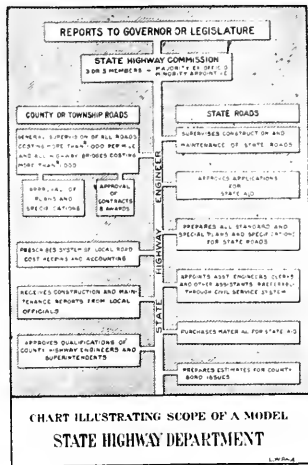

The second factor, cost of maintenance, is dependent on the character of material used, the volume and character of traffic, and the climatic and topographic conditions which affect the road under consideration. For most types of road improvement, the effect of these variables can be estimated within reasonably close limits from the data already available.

The third factor, amount and character of traffic, has its principal importance, from an economic view point, in the effect which it has on the cost of maintenance.

The fourth factor, average unit cost of hauling before and after the improvement, varies very slightly for different types of improved roads, provided that they are all equally well maintained. If the unit cost of hauling before and after the improvement, and the total volume of traffic using the road are known, the total annual saving resulting from the improvement can be estimated; and, if the improvement is to be justified economically, this total annual saving must be sufficient, after all costs for maintenance and repairs are deducted, to pay a reasonable interest on the original investment.

If a model system of highways has been previously worked out, and the importance of each unit in the system has been properly weighted, it is apparent that the investigation for determining the proper type of improvement to employ on each road will be greatly simplified. It is also apparent that the more comprehensive this system can be made within reasonable limits, the less will be the duplication of work required and the greater will be the possibility of securing satisfactory results through efficient organization. The state is therefore much better circumstanced for planning and supervising road improvement work than are any of its political subdivisions.

There are now forty-two states out of the total of forty-eight which have established highway departments of one kind or another and the organizations under which these departments operate are being constantly revised and improved. This shows that the public is awaking to the advantages to be gained by having all highway

work done under a scientific and comprehensive organization. There is also unquestionably a growing public demand for quantitative assurance that every dollar levied for the purpose of highway improvement is being spent to the best possible advantage, and in order for the engineer to meet this demand, he must be in a position to analyze the factors which affect the economic efficiency of improved roads and reduce the findings to a more or less quantitative rational basis.

## Construction.

The customary methods of constructing and maintaining the various types of improved roads are generally well understood by the engineering profession, or at least by those members of the profession who have been sufficiently interested to follow the discussions concerning highway work which are constantly appearing in engineering literature.

The principal types of improved roads are earth, sand-clay, gravel, macadam, bituminous macadam, Portland cement concrete and brick. It seems best to touch only on those features of construction concerning which there has been more or less difference of opinion among engineers, and to express such opinions regarding these features as the experience of the Office of Public Roads would appear to justify.

Diagram shows cross-sections, illustrating each type of road mentioned above, which are believed to represent the best modern practice in highway construction. It should be borne in mind, however, that no typical sections could be made sufficiently general to meet all conditions, and still be of value. Some of the details shown in the diagram, furthermore, have not

\*From a paper presented at the International Engineering Congress, San Francisco, Cal., September, 1915.

been universally accepted as representing the best practice, and are more or less liable to be superseded.

The amount of crown which should be given the cross-section of an improved road, for example, is a matter of very great importance and one which has been much discussed. The two factors which have had the most influence in determining this detail are first, the desirability of draining water off to the sides as quickly as possible after it falls on the road, and second, the desirability of keeping the cross-section as flat as possible in order that traffic may not be unduly encouraged to use only the center of the roadway. The character of the road surface determines which of these factors should be given most consideration.

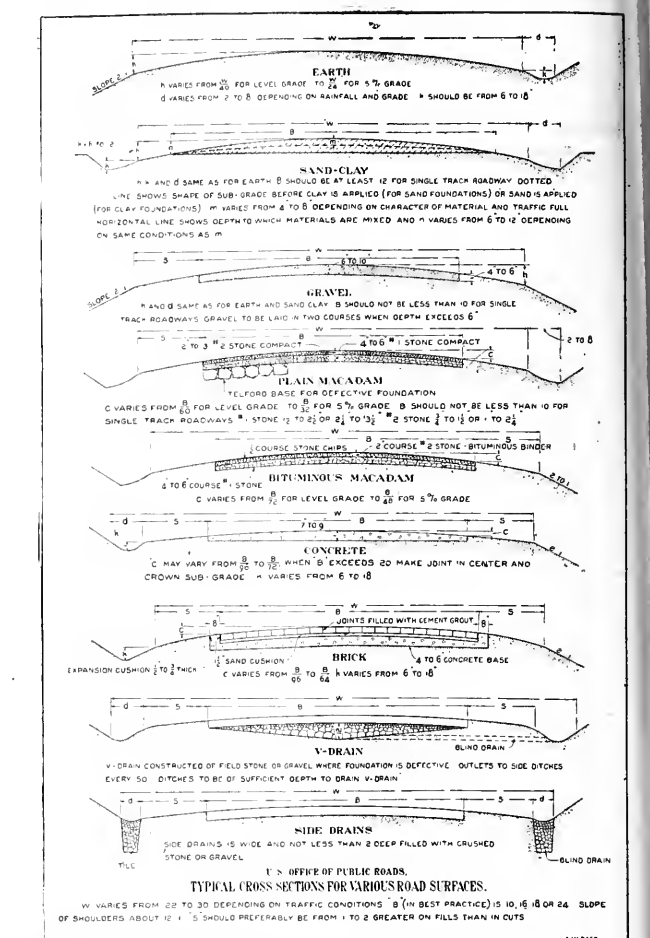

Another much discussed point relates to whether the subgrade for brick and concrete roads should be given a flat or crowned cross-section, and it will be observed that the Office of Public Roads at present recommends the flat cross-section, especially for concrete pavements, where the width does not exceed about 20 feet. This recommendation is based, for the most part, on the fact that fewer longitudinal cracks have been observed in pavements having flat sub-grade cross-sections than where the sub-grade is crowned, and the use of such flat cross-sections adds comparatively little to the cost of the narrower concrete pavements, in which the longitudinal cracks are most objectionable.

Defective foundations can be corrected in a number of ways. Surface drainage is of course the first consideration, and when properly planned, is ordinarily adequate. Some combinations of soil and topographic conditions, however, render effective surface drainage impracticable, and in such cases, one of three methods of foundation treatment shown here will usually be found satisfactory. The Telford base is especially adapted to soils which, even when well drained, are more or less unstable; the V-drain to localities where field stones may be cheaply obtained, and the side ditches to all locations where the soil is inclined to be springy or hard to drain.

#### Maintenance.

No paper on the subject of "Rural Highways" would be complete without discussing at least to some extent, the important question of road maintenance. Scientific care in planning and constructing public roads cannot possibly obviate the necessity for maintaining them, though it can no doubt greatly assist in meeting this necessity by causing it to be fully recognized and its importance properly appreciated.

The work of maintaining public roads is necessarily more routine in character than other classes of road improvement work, and would therefore seem to be more susceptible to advantage from standardization of methods. In the United States, however, there are discouragingly few localities in which any attempt at systematic maintenance has been made, and these are to be found only in states having strongly centralized control. In many of the states which have well organized highway departments and even those in which state aid for

construction is an established policy, all road maintenance work is still being done or left undone under the supervision of the county, township or other local administrations. Judging by the annual reports of the various state road officials, however, it seems that they are practically all agreed that this arrangement is not satisfactory and are accordingly seeking to have the laws or appropriations under which they operate so changed that the work of maintaining the state-aid roads will be done under state supervision. This change has already been made in a number of states, and so far as is known, an immediate improvement has resulted.

#### Conclusion.

In conclusion it seems fitting to pay some tribute of appreciation to the efforts of highway engineers and other public road officials throughout the country who, notwithstanding the arduous nature of their prescribed duties, are always ready to co-operate in collecting and disseminating information relating to road improvement

work which might be of value to other communities, and who almost uniformly show even broader-minded disposition in their willingness to profit by the experience of others whenever the opportunity is afforded them.

Everyone has observed the employment of pure iron corrugated culverts in highway work in the most progressive States. Some of the railroads that have made quite extensive use of Arco corrugated pipe are the Western Pacific, the Northwestern Pacific, the Soo Line and the Southern. The Pennsylvania has one 12-inch corrugated Arco culvert under the four tracks of its main line near Marsh Run, where it has been in service under perhaps the heaviest railroad traffic in the world for six or seven years and which appears to be in practically perfect condition. In Central and South America and various portions of the Orient, this type of culvert is extensively employed because of its lightness, ease of installation and practical certainty of good results under more or less difficult conditions.

# Multnomah County, Oregon, Highway System.

## Staff Article

Chronological events leading up to award of contracts for over 600,000 square yards of Warrentite Roadway in Multnomah County, Portland, Ore., June 17, 1915.

In 1903 the first bitulithic pavement under the Warren Bros. Co. patents was introduced and laid in Portland, Ore., on Park avenue.

In 1904 bitulithic was selected by the City Council as the type of pavement for Fifth street, also other downtown streets and contract awarded for approximately 36,203 square yards of pavement.

During the years 1905 to 1913 inclusive the taxpayers and city officials of Portland being highly satisfied with the merits of bitulithic construction contracted and laid over 145 miles of this type of pavement, having an average width of 40 feet.

In 1913 the first piece of asphaltic concrete (Topeka) pavement was laid on sundry streets with the claim that it was "just as good" as bitulithic and cheaper in price—the city also tried some plain concrete on several streets owing to its low cost.

In the spring of 1913 the County Commissioners of Multnomah County built two miles of Warrentite resurfacing macadam on Linnton road, this being their first attempt to apply a modern wearing surface on any of the county highways.

About two years ago at a meeting of the Advisory Board to the County Commissioners, Mr. J. B. Yeon, a prominent Portland capitalist and business man, was appointed County Roadmaster, without salary, for the purpose of providing some definite plan for the construction of permanent highways—this action was taken after many protests had been made by prominent taxpayers of Portland, the citizens of which own 65 per cent of all taxable property in Multnomah County, that the macadam roads were costing an excessive amount of money each year for maintenance and requested that steps be taken immediately to eliminate this annual waste of public funds. [From the Portland, Ore., Morning Oregonian, November 19, 1913.]

For a millionaire to give us his own business for a whole year, deny himself of many comforts that pertain to on in his station in life, don rubber boots, overalls and jumper and give his time—without a cent of pay—to the occupation of supervising the county roads is rather a long step towards altruistic ideals.

Nevertheless, that is what John B. Yeon, lumber king, real estate holder, owner of the Yeon Building, capitalist, automobilist and good roads enthusiast has agreed to do for the people of Multnomah County. \* \* \*

"I expect to do the business the same as if it were my own," said Mr. Yeon yesterday. \* \* \*

"At the end of the year I shall expect to give the people of Multnomah Coun-

ty an accounting for every dollar.

"I expect to point to the roads of this county and show the people that they have 100 cents' worth of improvement for every dollar I spend.

"I have made no plans excepting one—there will be no politics on this job. Pull won't count. I shall hire and fire men on their merits or demerits only. \* \* \*

"I want to give Multnomah County good permanent roads—the kind that won't have to be rebuilt for twenty years." \* \* \*

W. M. Ladd, of the Ladd & Tilton Bank gave his emphatic endorsement to a 2 mill levy, provided Mr. Yeon accepted the roadmastership. \* \* \*

Among those present were hotel men, bankers, merchants, manufacturers and laboring men, and the representatives were unanimous in the opinion that a 2 mill assessment be made. \* \* \*

Upon Mr. Yeon's appointment being confirmed officially he at once delegated Messrs. S. Benson and E. E. Coovert, also prominent business men and capitalists of Portland, to represent him in making a complete examination of all classes of hard surface pavements. These two gentlemen made a thorough investigation of the paving situation through the East and Middle West, personally interviewing many engineers and city officials and both collected considerable data on cost of road construction and durability of the material as a permanent pavement.

As a result of their findings and upon the approval of the County Roadmaster, a small contract for two miles of warrentite was awarded in the summer of 1914 for resurfacing old macadam on Riverside Drive.

During the early part of 1915 Mr. Yeon announced that it was his intention to submit to the voters of Multnomah County a proposition to issue \$1,250,000 in bonds for road work, same to be retired serially in 15 years' time. Shortly after the bond election, the County Roadmaster with Messrs. Benson et al openly advocated the use of Warrentite Roadway as the best and most economical road surface on the market.

[From the Portland, Ore., Evening Telegram, April 23, 1915.]

"I want warrentite and brick for the trunk roads of Multnomah County. This is no time for experimenting. I'll fight to protect the public and prevent the money voted for bonds from being wasted."

This is the declaration of S. Benson. "To the County Commissioners I shall recommend Warrentite and brick, the latter for the steep grades and dangerous places, but the Warren people need not think that because this will be my recommendation that they will have a cinch. Prices must be right and the quality of work must be the best."

This is the statement of Roadmaster John B. Yeon.

Together they are willing to stake their reputations and assume the responsibility, and say their sole interest is to see that the public gets its money's worth and that the roads laid are real roads, durable roads.

With the statement of their position on the paving question, Yeon and Benson have brought the big paving fight into the limelight. It has been smoldering, threatening and been whispered for weeks, lurking in the background, preparing to break out and precipitate a row in the middle of May when the bids are opened. Therefore, to take the public into their confidence and explain, clearly, why they believe warrentite and brick the best, Messrs. Benson and Yeon decided to tell their position without delay.

"Let it be borne in mind," said Roadmaster Yeon, "that there will be open specifications and competition. The fact that I believe warrentite the best does not mean that Warren Brothers have a cinch, for the price must be right or the bids will be thrown out. We know there is opposition to a patented pavement, but the people of Portland have not complained against this pavement except on the ground of price and that is why the price must be right. Anyone can bid on warrentite and every contractor may do so, for all I know—I do know that several are figuring on bidding on this pavement.

Mr. Benson is most emphatic in his stand. He has spent time and several thousands of dollars making a study and compiling data on all sorts of pavement.

"Why spend money for pavements that won't stand up?" asks Benson. "Any pavement looks good when it is laid, but how about 10 years later? We have reports from all parts of the United States on pavements, and the general verdict is for warrentite. I personally prefer brick, but brick is too expensive except to be used on steep grades and at bad turns, so I say lay brick on the grades and warrentite elsewhere.

"Our reports show that warrentite is a good pavement and that others are not good, so it would be folly to throw away the money the people voted by putting it into pavements which we are convinced in advance are not going to last. Asphaltic concrete, otherwise known as Topeka, does not wear, it has not given the desired service in this city, for it does not last long enough. And as for cement, there has never been a good cement road. The cement men say, 'Well, it wasn't mixed right,' but what assurance has anyone that the right mixture will be found for Multnomah County when it has not been found in California, for instance, when hundreds of miles were laid and went to pieces? In California they now have to cover their cement roads with asphalt.

"This paving question is vital. The taxpayers do not want their money

wasted, and if the bond issue is used for experimental purposes it will be a waste. Every contractor can bid on warrentite, and I hope they do, and I think they will. The price must be at the right figure, and I believe the owners of the patent are wise enough to realize that they cannot afford to gouge—if they do, then something will happen to make them wake up.

The preference for warrentite is not made haphazard, but from long study, analysis, investigation and tests of the most practical kind. We should benefit from the experiments of others, not make them ourselves. We have gone into the smallest details, and I am firmly convinced that the best roads we can get will be warrentite. There will be kicks against this statement, but I am willing to stake my reputation that it will serve better than the others, and in making this selection over others I assume full responsibility. My sole wish is to see the taxpayers get the best for their money."

"No one realizes better than I do," said Roadmaster Yeon, "that my own reputation is at stake in this matter. But I want to do this thing right, and when it is all over I want to be able to look every taxpayer in Multnomah County squarely in the eye and say to him he has received full value for every dollar spent and a general result that every citizen of the State will be proud of. From investigation, I know the county can get the best results from brick and warrentite. We have out there on the Columbia River one of the scenic highways of the world. So far, I believe it could not be better built. Its grade is right, not over 5 per cent, the curves are right, and it has been constructed with the idea of getting the very best out of the scenic effects. That it should carry the best paving goes without saying. As I look at it, it is going to be an object lesson for the whole State."

The bond issue election was held the latter part of April and carried by a majority of 3 to 1 after meeting minor opposition. Prior to bids being received for the building of these roads, the Portland Chamber of Commerce with a membership of 5,000 of the most prominent business men in the city of Portland appointed a special committee from their executive board to look into the merits of hard surface pavements, said paving committee being composed of F. W. Mulkey (Chairman), Attorney and Commissioner of the Port of Portland, Rodney L. Glisan, Attorney and Capitalist, and Frank McCrillis, prominent real estate and insurance man—after a six week's impartial investigation and the taking of testimony of representatives of every known type of pavement, they concluded their report strongly condemning the use of so-called asphaltic concrete (Topeka) and plain concrete pavements on account of the unsatisfactory results secured from these pavements in this vicinity.

The Portland Chamber of Commerce through its board of directors, consisting of 35 prominent men, unanimously endorsed the use of warrentite pavement for all county roads under this bond issue, giving as their reason the success of the Warren pavements now

in use in the city of Portland from 5 to 12 years, which demonstrated conclusively its durability and wearing qualities.

[From the Portland, Ore., Voter, June 19, 1915.]

The paving report printed in full in last week's issue of the Oregon Voter was unanimously adopted by the board of trustees. \* \* \*

On June 9th, 1915, bids were opened for surfacing a large mileage of Multnomah County macadam roads at an estimated cost of \$1,250,000. A tabulation of all proposals showed asphaltic concrete and plain concrete pavements underbid warrentite from \$180,000 to \$250,000. The matter was then referred to Roadmaster Yeon by the County Commissioners for recommendations, who reported that he would refuse to assume any responsibility for the laying of any but the warrentite pavement, as to his mind this material has proven by long test to be durable and low in maintenance cost, and therefore would not recommend Topeke or concrete pavements owing to their experimental stage, ease of cracking and the many indications of their failure on the work already laid in this city.

[The paving report was printed in full in Building and Engineering News for July 7, 1915. Editor.]

The County Commissioners, consisting of Messrs. Lightner, Holbrook and Holman, met in session on June 18th and awarded contracts in general conformity with the County Roadmaster's recommendations, being backed by delegations of important property owners and newspapers whose reports are extracted as follows:

Warren Construction Co: Columbia River highway, 179,820 sq. yds. warrentite; Sandy road, 136,000 sq. yds. warrentite; total 315,820 sq. yds.

Pacific Bridge Company: Columbia River highway, section D, 97,244 sq. yds. warrentite.

Oskar Huber: Powel Valley road, 81,640 sq. yds. warrentite.

Boydjohn-Arnold & Peterson: Canyon road, section A, 8,620 sq. yds. warrentite.

Clark & Henery Construction Company: Base Line road, 93,222 sq. yds. warrentite. Total warrentite yardage, 596,546 sq. yds.

Boydjohn-Arnold & Peterson: Columbia River highway, 6,682 sq. yds. brick.

Montague & O'Reilly Company: Foster road, 46,400 sq. yds. concrete; Capitol highway, 45,070 sq. yds. concrete; Canyon road, section B, 9,450 sq. yds. concrete; total concrete, 100,920 sq. yds.

Total yardage for all pavements, 704,148 sq. yds.

84.8 per cent of the total yardage awarded by the County Commissioners for hard surface pavements represents warrentite construction. Warrentite was unanimously adopted at \$250,000 over the lowest bid on asphaltic concrete pavement and at \$180,000 over the lowest bid for highest type of concrete pavement, namely, Wayne County, Mich., specifications.

In this connection it might be interesting to know that all the Portland newspapers and many civic organizations highly endorsed and compliment-

ed the commissioners on their good judgment in adopting warrentite on 85 per cent of the total work let as against experimental types of construction which were offered at a great saving in first cost.

[From the Portland, Ore., Journal, June 22, 1915.]

Work on hard surfacing the main travelled roads of the county at a cost of \$1,250,000 is at last under way and by next week it should be in full swing.

The first actual construction was begun yesterday by the Warren Construction Company on the Sandy road where the highway joins the city boundary. A crew of men was put to work scarifying and preparing the old macadam base to receive its coating of crushed rock and asphalt.

On the other roads the different contractors are securing sites for mixing plants and assembling equipment.

The roads are to be paved to a width of 18 feet, with macadam shoulders two feet in width. \* \* \*

#### MULTNOMAH COUNTY PAVING.

Better roads for the outlying portions of Multnomah County, Oregon, are, in the opinion of Rufus C. Holman, chairman of the Board of County Commissioners, an urgent need, and the forthcoming budget of expenditures to be made during the coming year should not omit necessary appropriations for this work, he says.

Now that the main highways of the county have been hard surfaced, he thinks the roads further out should be improved to make a continuous thoroughfare from the country districts into the city.

"By the hard surface work that has been going on this season," said Mr. Holman, "we will have our main roads in such condition that we will be able to save a large part of the maintenance charges that have formerly been an annual expense, and this money might well, in my opinion, be devoted to putting the roads into the near-by country districts in good condition. Just what amounts of money will be required I cannot now say, as I am having the figures compiled, but I feel this should be cared for in making up the forthcoming budget.

"Right here, close at hand, on the west of us, perhaps at a distance ranging from six to ten miles, is a large area of rich and productive country that is practically inaccessible on account of poor roads.

"I want to see sufficient funds put into our budget for the development of roads into this section.

"I feel sure this effort will be repaid many times in the good that will be accomplished."

#### MILITARY ROADS.

Thomas A. Edison has come out strongly for improved roads and bridges as a means of insuring quick movements of troops in case of war, even at Federal expense. Mr. Edison is quoted as follows:

"I should go beyond the mere providing of men and munitions, and I would have the Government revamp the country on a strategic basis; for

instance the Government ought to build a system of military roads along the seaboard and take charge of all roads which have a strategic value, put them and keep them in splendid condition, reduce the grades, widen them where necessary and strengthen the bridges for the passage of the artillery and heavy trucks.

#### McKITTRICK - BAKERSFIELD ROAD COMPLETED.

Contractors Castro & Blaisdell have completed the work of grading the Bakersfield-McKittrick highway from a point beginning at the eastern termination of the McKittrick foothills and ending at the western, where the road connects with the corporate limits of the city of McKittrick. The highway between the localities indicated is to remain in its present condition until after the rains of the fall.

#### ORANGE COUNTY HIGHWAYS.

The Orange County Highway Commission is nearing the completion of its work. Surveyors and part of the office force have been dismissed and the department is now getting ready to finish the last of the roads under its jurisdiction.

When the commission had finished 107 miles of road planned in the original bond issue of \$1,270,000 there was a surplus of \$240,000 on hand. The roads now building are being financed out of the surplus. In the division of the surplus it was agreed by the Board of Supervisors that the current expense fund of the county would be drawn upon to pave a road between Placentia and Yorba, and to pave the Santa Ana Canyon road. Those roads will be improved under the direction of the Board of Supervisors and County Surveyor McBride.

#### MOUNT DIABLO BOULEVARD.

The second scenic boulevard that climbs the slopes of Mount Diablo at an average grade of 5 per cent will be completed soon.

Announcement is made that in order to enhance the natural beauty of the scenic trip thousand of toyon or "red berries," madrone and pine trees will be planted along the new boulevard. The young trees and shrubs are already under cultivation in the big Homestead nurseries at the foot of Diablo just out of Walnut Creek.

Twenty miles of water pipes have been laid along the boulevard to feed the young trees and shrubs when planted. The red berries, madrone and pine are natives of the Diablo country and will fit in admirably with the beauties of natural wooded growth along the mountain.

Plans are taking shape for the construction of an observatory on the summit equipped with a six-inch telescope that will be a permanent advertising medium for twenty-seven counties and hundreds of towns visible from the summit of Diablo.

The construction of a unique inn, in which the natural contour of the mountain and the rock formations on the summit will be utilized, is another plan of development under consideration.

#### YOLO CAUSEWAY.

By January 1st travel will be passing over the Yolo by-pass causeway, connecting Sacramento and the main trunk line of the State highway with the laterals on the west side of the valley, according to the State Highway Commission.

The bridge, which is three miles in length, is 90 per cent finished, and the contractors are now at work building the railing and laying a small strip of the flooring.

In West Sacramento the contractors are nearing the completion of a strip of highway that will run from a point half a mile west of the M street bridge to the east end of the causeway. It has not yet been decided whether the highway shall cross the M street bridge or over the Southern Pacific bridge.

#### LINCOLN HIGHWAY COMPLETELY MARKED.

The second year of the Lincoln Highway propaganda, far from falling short of the accomplishments which marked its establishment and first year of progress has, on the contrary, witnessed an even greater development, according to Austin F. Bement, secretary of the Lincoln Highway Association.

The first year of the Lincoln Highway's existence was a year of big things. Over half of the entire length of the road was actually marked, and much was done towards its beautification. The commendation of the President of the United States, the Governors of the States traversed, many members of the United States Senate and House, and other prominent men in every field of endeavor served to give the work tremendous impetus.

To all practical purposes, the Lincoln Highway is now completely marked from New York to San Francisco. There are points where the marking is not as complete as it should be, but this is being rapidly taken care of. Automobile clubs, local good roads organizations, boards of commerce and other civic and patriotic organizations, have made it a point to complete the marking in their localities. In many places the tourists find the red, white and blue marker on every successive telegraph pole for miles, as in sections of Iowa and Nebraska. Again only one or two to the mile will be found, this particularly in the far west, where the Lincoln Highway is the only road and it is practically impossible to "go wrong."

In Utah and Nevada, States of tremendous areas and sparse population, great effort has been put forth toward improvement of the Lincoln Highway by the ranchers living along its course. The aid of the counties has been given in as great a measure as possible, and over \$5,000 has been spent on the route in these two States in the past year. These desert roads are for more than 75 per cent of their extent kept in good driving condition, and the constant attention the Lincoln Highway receives, even miles from the nearest communities, tends to constantly better its surface.

The Lincoln Highway from Lake Tahoe on the Nevada-California border to San Francisco is practically in boulevard condition for 100 per cent of its length. The roads of California and the marvelous scenery of the high Sierra along the Lincoln Highway have drawn thousands of tourists West this season.

Figures as to touring increase run from 25 per cent in the Eastern States to as high as 500 to 600 per cent at Western points. D. E. Watkins of the California State Automobile Association of San Francisco estimates that 25,000 motor cars have entered the State this year, the majority coming over the Lincoln Highway. Two years ago less than one-tenth of this number drove into California.

#### MINT CANYON ROAD.

Prospects for the completion of the Mint Canyon road to connect with the Antelope Valley, Los Angeles County, by the end of 1916, were declared bright by R. W. Pridham, chairman of the Board of Supervisors when he announced a new plan of action for the building of that much-needed highway.

Chairman Pridham, strongly seconded by Supervisor Hamilton, declared that he would bring before the Supervisors a plan for financing the construction of the highway by use of a portion of the automobile license funds, and, if necessary, the surplus funds of the county to supplement the county road fund.

"The property owners in the Antelope Valley are entitled to immediate consideration of plans for connecting up the unfinished links in this highway," said Supervisor Pridham.

"The Board of Supervisors has already let a contract for a five-mile link of this road from Saugus to Palmdale and a five-mile road north from Saugus with a bridge over Soledad Creek connecting with Mint Canyon. I am further in favor of issuing an order immediately to the road commissioner to prepare plans and specifications for the entire mileage of the Mint Canyon road that is not already provided for, which amounts to about thirty-five miles."

"I also further favor building the road from county funds in order to complete it by the end of 1916 and of appropriating sufficient money from the auto license fund for the same purpose. I will present the matter at the next meeting and also will advocate that when the steam shovel finishes its work on the Topanga Canyon road it be put to work on the Mint Canyon road."

#### KLAMATH RIVER ROAD.

Following a trip of inspection made by Division Engineer T. A. Bedford of the State Highway and his assistants, Engineers Comly and Lowden, it is reported a survey will be made of the proposed road down the Klamath River as soon as members of the engineering force can be spared from work on the highway.

The road is projected from Yreka to the Klamath River and then down the

stream to Orleans Bar by way of Happy Camp. The terminus of the road is at Eureka, and the road is completed from that city to the line between Humboldt and Siskiyou Counties, near Orleans Bar.

The building of this road means the construction of the loop connecting the road down the coast with the highway through the Sacramento Valley to San Francisco. Long before the organization of the State Highway Commission such a road had been hoped for by residents of northern and western Siskiyou, and since work on the state system of highways has been commenced there has been much talk of the building of this loop.

The opening of the road down the Klamath River means an immense development of mining, stock raising, horticultural and agricultural resources which are dormant at present on account of the lack of transportation. There are immense deposits of copper thoroughly prospected and proven to be of great value, provided means of transportation are afforded.

#### ROAD ECONOMICS.

##### Department of Agriculture Will Keep Record of Highway Mileage.

During the past twenty years State governments have been active in a constantly increasing measure in behalf of road improvement. To January 1, 1915, expenditures aggregating \$211,859,163 have been made from the appropriations by the legislatures of 39 States. With these funds improved roads to the extent of 35,477 miles have been constructed during this period of twenty years.

The results accomplished by the various State highway departments are ascertained through a corps of collaborators, made up of one collaborator in each State highway department. Through these collaborators the office of public roads and rural engineering obtains monthly reports showing progress made, funds expended, and work contemplated in the respective States. In this way the office has assembled exact information as to the expenditure of State and local funds for construction of roads and bridges, for maintenance, and for overhead expenses; the amount of State funds available for road work in 1915; the mileage of State and State-aid roads constructed; and the mileage of roads maintained by the State. The information thus collected has been carefully tabulated and checked so as to show progress from year to year throughout the United States in the improvement and maintenance of the public roads.

##### SCOTIA BRIDGE IS COMPLETED.

Making a record for the construction of steel highway bridges, the Mercer-Fraser Company has just completed the big steel bridge across the Eel River at Scotia, Humboldt County, Cal. The bridge replaces the steel cable bridge which went out during the high water of last winter.

The Mercer-Fraser Company was awarded the contract on June 15 of this year and began work on the struc-

ture on July 10. By employing a system of daily reports from the shipping point in the east from which the steel was obtained the building material was kept constantly on the move and few delays were experienced in the receipt of material. Whenever a car became held up on the way out to this coast the company was immediately informed of the fact and could take the necessary steps to keep the car moving.

In consequence the building operations proceeded steadily and in less than four months the contract has been filled. As it now stands the bridge consists of two steel spans, pin connected, of 35 feet each in length. The spans are supported on concrete piers. The contract price was \$54,395.

The bridge is now ready for use and will be opened to the public just as soon as it has been accepted by the Board of Supervisors.

##### PIT RIVER BRIDGE NEARLY COMPLETED.

Rapid progress is being made in the construction of the new reinforced concrete bridge across Pit River at Wyndham Ferry, at the mouth of McCloud River, on the line of the State highway. Nearly all the false work is in.

The span of 240 feet is said to be the longest in the State. The bridge will cost a little over \$27,000. The north end of the bridge passes over the Sacramento and Eastern Railroad, which runs along the river.

##### TULARE COUNTY LETS CONTRACTS FOR BRIDGES.

Contracts have been let by the Supervisors for the construction of new concrete bridges on the line of the State highway through Tulare County, the total cost of which will be \$20,000. These will be sufficient for that portion of the State road for which funds are now available. All told, Tulare County must build bridges to the value of \$120,000 when the State highway is completed the entire length of the county.

#### DEVILISH CARTOONS.

His Satanic Majesty, the Devil, is a favorite character with the German cartoonist, according to Cartoons Magazine, but the Devil's grandmother is supposed to be even more satanic than Old Nick himself. Thus, an Austrian cartoonist has the Devil's grandmother asking him why he is fixing himself up so well. "I'll tell you, grandma," is the reply, "I'm expecting five kings, a czar and a president, and when such distinguished company arrives I must present a front."

##### TRAFFIC OVER SOME OF THE WORLD'S BUSY HIGHWAY BRIDGES.

In a paper recently presented before the Western Society of Engineers, Charles M. Spofford, gave the follow-

ing statistics concerning the width of roadway and traffic over some of the important bridges of the world.

**Brooklyn Bridge.**—Width of roadway. Two roadways at 16 ft. 9 in. each between curbs, with single street car track on each.

Traffic in 1909. Surface cars, round trip, 1,489,364; average per day, including Sundays, 4,680 single trips. Other vehicles, 1,525,262; average per day of twenty-four hours, including Sundays, 4,178.

**Manhattan Bridge, N. Y.**—Width of roadway. One roadway at 35 ft. without street car tracks.

Total roadway vehicle traffic in 1910, 918,535; average per day, including Sundays, 2,516.

Total roadway vehicle traffic in 1909, 1,673,333; average per day including Sundays, 4,554.

**Queensboro Bridge.**—Width of roadway. One roadway 33 ft. 1½ in. clear with space for street car on either side, giving a total width of 53 ft. 2½ in.

**Waterloo Bridge, London.**—Width of roadway in the clear, 27 ft. 6 in., 10,192 horse and motor vehicles. No street cars.

**Blackfriars Bridge.**—Width of roadways in the clear, 73 ft. 6 in., 14,067 horse and motor vehicles, including 1,429 electric tram cars.

The following figures are from the 1911 Report of the London Traffic Branch of the Board of Trade and refers to traffic on one day in 1911 between 8 a. m. and 8 p. m.

**Westminster Bridge, London.**—Width of roadway in the clear, 54 ft., 14,618 horse and motor vehicles, including 2,975 electric tram cars.

**London Bridge.**—Width of roadway in the clear, 37 ft., 13,771 horse and motor vehicles. No street cars.

**Tower Bridge, London.**—Width of roadway in the clear 35 ft., 9,552 horse and motor vehicles. No street cars.

**Northern Avenue Bridge, Boston.**—Width of roadway. Two roadways each 18 ft. 9 in., and one roadway at 18 ft. 6 in. between curbs, without provision for street cars. Traffic on February 27, 1913, between 7 a. m. and 6 p. m., 3,644 vehicles.

**Congress Street Bridge, Boston.**—Width of roadway. One roadway 44 ft. between curbs on fixed spans; 31 ft. 4 in. between curbs on draw-span. This bridge, including draw-span, is used regularly by three lines of vehicles. No street cars. Traffic on September 11, 1908, 7,362 vehicles.

**Malden Bridge, Draw-Span, Boston.**—Width of roadway. Two roadways each 19 feet. 6 in. between curbs, with street car track on each roadway.

**Roadway Bridge, Boston.**—Width between curbs 40 ft., with double track street railway. Traffic on March 8, 1915, from 6 a. m. to 10 p. m., 398 cars, 1,925 other vehicles. Four lines of traffic.

**Meridian Street Bridge, Boston.**—This bridge is a comparatively narrow structure, having a distance between trusses of 25 feet and between curbs of 21 ft. 3 in. The traffic across this bridge on Sept. 10, 1912, between 6 a. m. and 10 p. m., consisted of 1,145 vehicles, including street cars.

## San Bernardino County Highways.

B. Gill Chairman; W. A. Freemire, George S. Hinekey, Commissioners; J. Bright, Jr., Engineer; R. H. Mack, secretary.

On October 20th, 1914, a bond issue of \$1,750,000 was voted by the people of this county for the purpose of constructing 191 miles of permanent roads. It was proposed to build two types of roads, the concrete and macadam, 90 miles of the former and 100 miles of the latter. The concrete road to be 16 feet wide and 5 inches thick, composed of a 1:2:4 mix, almost level, there being very little crown, and expansion joints placed at a slight interval in every forty feet of the pavement.

The macadam road to be 5 inches thick after rolling. Both types of road have two feet of oil shoulders on each side and a wearing surface composed of asphaltic oil shoulders on each side and a wearing surface composed of asphaltic oil and screenings, at least one-half inch thick.

The money from the sale of the bonds is placed with the County Treasurer for the credit of the Highway Commission on March 9th, 1915, and work begun at once.

The Highway Commission has made a light departure from the usual method of contracting the work, in that they are building most of the roads by account, under the direction of the Commission, only one contract having been let at this time and two more contracts being advertised.

There are eleven force account gangs working, six of which are laying concrete, four laying macadam, and one doing the twenty-one mile road built through the Cajon Pass, which is more or less mountainous.

Six concrete gangs are averaging the aggregate, a little over one-half meter per day and the macadam gangs at the same, and at the present time they are averaging about fifteen miles of completed roadway a month. All gangs, and up to date there have been completed twelve miles of concrete road and two miles of macadam.

The two types of culverts they are using are the corrugated iron pipe and reinforced concrete.

## Riverside County Highways.

Commissioners—W. B. Clancy, Chairman; A. P. Campbell, Secretary; Sam C. Evans, Geo. M. Pearson, Chief Engineer, Wm. H. Stearns, Assistant Engineer; Mrs. C. L. Gilmore, Assistant Secretary.

Amount of bond issue, \$1,125,000. Types of road adopted, concrete, 15 miles wide, 4 inches thick and a 1:2:4 mix, will be 105.3 miles. Macadam road 7 feet wide will be 17 miles. Oil dirt about 16 miles. Graded road, 30 miles. Surfaced with local material miles. Heavy graded road 9 miles. All types of each type constructed—miles of concrete laid; 3 miles of macadam laid; 40 miles of graded road. County furnishes f. o. b. nearest siding, sand, gravel, cement, reinforcing

steel and corrugated iron pipe. Macadam work contractor furnishes rock.

There is 60 miles of concrete roads under contract or completed; 3 miles of heavy grading contracted for which is about 60 per cent completed. This road will be contracted next year after hills have settled.

Ten miles of oil roads and 12.6 miles of macadam under contract; 83 miles of graded road under contract. First contract was signed October 7, 1911.

### SAN MATEO COUNTY

#### From Colma to Halfmoon Bay Completed.

This highway is a part of the San Mateo County highway system that is being built under the 1½ million dollar bond issue.

From Colma to Halfmoon Bay is a distance of twenty-eight miles. From the State highway at Colma, through the town, the surface of the new road is of asphalt. A short distance beyond the town limits marks the beginning of the fine smooth new macadam road with an asphaltic oil wearing surface, which leads over the hills west of Colma on a 5 per cent grade. This easy grade continues until San Pedro Mountain is reached, then a 6 per cent grade leads to the crest, from where, at a point 1500 feet above sea level, a magnificent panoramic view of the Pacific ocean and San Francisco bay may be had.

The ocean shore is reached at Edgemar, from which point it follows the coast line to the town of Montara.

From Montara to Halfmoon Bay the road has a concrete base with an asphaltic oil surface. The entire road has a driving surface of sixteen feet, giving ample room for machines to pass and making the "safety first" factor a prominent one.

### PARKDALE - COTOPAXI ROAD IN COLORADO.

A Colorado highway which is destined to become known for its scenic attractions was completed recently. It is a twenty-three-mile stretch between the towns of Parkdale and Cotopaxi, and forms a gateway to the western part of the State through the cañon of the Arkansas River.

Construction of the road began two years ago and cost \$100,000, according to State Highway Commissioner Ehrhart, who announced its completion. Thirty thousand of the \$100,000 of cost was contributed by the counties the highway traverses, the remainder being furnished by the State. It was constructed partly by convict labor.

From an engineering standpoint the road represents one of the most difficult pieces of construction in the entire system of State highways. Much of the way was cut through solid granite, it being necessary at one point to build the highway through a tunnel. The road skirts the Arkansas River the entire distance, offering scenic attractions typical of the Colorado Rockies.

The new highway takes the place of a thirty-two-mile hill road between Parkdale and Cotopaxi, which ran through Copper gulch and crossed the sandy bottom of the gulch forty-eight

times in eight miles. It gives an easy water grade between Canyon City and Salida, and is particularly important in that it is a link in the Santa Fe trail and Rainbow transcontinental route from the east to the Pacific coast.

## Effect Of Various Vehicles On Modern Roads.

The Massachusetts Highway Commission, after a full investigation, officially states in its annual report, recently issued, that the greatest cause of the destruction of modern roads is not the automobile nor the motor truck, but the heavily loaded vehicle drawn by horses.

In two instances quoted in the current report, fifty to seventy-five ice teams a day, carrying three tons or more each on 2½-inch to 3-inch tires, broke up within a month the side of the road on which the loaded teams traveled, while the surface lasted three months on the other side where the teams came back empty. For miles beyond the ice houses the roads are still in good condition. These roads are of macadam treated with heavy asphaltic oil.

"The traffic study shows that it is not the number of teams, but heavy teams—two or more horses and heavy loads on narrow tires—that cause the failure," says the report.

#### Some of the Findings.

A carefully prepared statement as to the causes of wear and what certain roads will stand, is presented as one of the results of the traffic study entered on some years ago by the commission. Among the results are the following:

A good gravel road will wear reasonably under a daily traffic composed of 50 to 75 light teams, 25 to 30 loaded one-horse vehicles, 10 to 12 loaded two or more horse-drawn wagons and 100 to 150 automobiles. With a larger number of automobiles, the gravel should be oiled. The oiling presents what is spoken of as a "blanket" surface, consisting of heavy asphaltic oil and sand. If the oil be applied hot, the blanket surface will last three to five years; if cold, it must be renewed every year.

Oiled gravel will stand fairly well under 75 to 100 light teams, 30 to 50 heavy one-horse vehicles, 20 heavy wagons with two or more horses and 500 to 700 automobiles daily.

Water-bound macadam will stand under a daily traffic of 175 to 200 light teams, 175 to 200 heavy one-horse vehicles and 60 to 80, perhaps more, heavy wagons with two or more horses. If even 50 to 100 automobiles per day go over the road at high speed, dust layers will be serviceable. With a really good dust-layer the road will stand 500 to 600 automobiles a day, although the stones will wear.

#### Autos Keep Road Rotted.

Water-bound macadam with an oil and sand blanket, applied hot, will be economical with 750 to 200 light teams, 150 to 100 heavy one-horse vehicles, 25 to 50 heavy wagons with two or more horses, and automobiles up to 1,000, or more with fewer teams and with 50 or more motor trucks. The large number

of automobiles seems to keep the oil rolled down when it would cut up and crumble without this traffic. This same road, however, will cut up and crumble under a traffic of 100 heavy one-horse vehicles and 50 two or more horse wagons on narrow tires, such as loaded farm wagons, ice wagons, loads of wood.

### FRESNO COUNTY HIGHWAYS.

A question of vital importance to the voters of this section of California—the proposed additional \$15,000,000 bond issue to complete the present state highways and build three laterals from the San Joaquin Valley to the coast—has developed since the visit here of C. P. Stern, State Highway Commissioner.

It is now planned to have the county highway system link with the lateral to the coast from the Visalia-Hanford lateral via Coalinga. The question now is whether the county highway will run direct from Fresno to Coalinga, or will connect with the lateral between Hanford and Coalinga.

J. B. Woodson, division engineer for the State highway, and W. S. Farley, engineer for the Fresno County Highway Commission, this week made a trip through the Coalinga district. Later they were joined by John Neu, H. E. Vogel and Harry Winnes, the members of the Fresno County Highway Commission.

Voters of Fresno County are more interested in the lateral that will lead through Coalinga. The other laterals will be through Pacheco pass from a point in Madera County to Santa Clara County, and from Bakersfield to San Luis Obispo County.

## Tuolumne County, Cal. Roadwork

The Hon. Board of Supervisors,  
Tuolumne County, Cal.

Gentlemen:

As requested I hereby present a report on the operations of the Austin gasoline roller and the Buffalo Pitts steam roller with scarifiers and scrapers on the Columbia road.

The portion of road reconstructed lies between Browns Flat and the Pedro ranch, a distance of 5,760 feet, or 1.08 of a mile. The grades run from level up to 10 per cent. The grades were not changed. The width of road was from 11 to 20 feet, with an average width of 17 feet; the width was increased to from 15 to 23 feet, with an average width of about 19 feet.

The road was exceptionally rough, and was hard to work on account of the numerous boulders and large rocks near the surface, embedded firmly in the soil.

#### Time Occupied.

The time occupied during operations was 6½ days, from Thursday morning the 6th to Thursday noon the 14th inst., omitting Sunday the 10th.

#### Operating Expense of Austin Gasoline Roller.

Distillate, 121 gals at 10c per gal.	\$12.10
Gasoline, 1 gal at 25c per gal.	.25
Lubricating oil, 1 gal.	.38
Cup grease, 2½ lbs at 11c per lb.	.27
Bolts	.05
Waste	.10

Total for period of 6½ days...\$13.21

Cost per day	2.03
Length of road reconstructed per day	438.5 ft.
Time occupied in reconstructing	1 mile
Cost per mile	\$24.45

#### Operating Expenses of Buffalo Steam Roller.

Crude oil, 568 gals at 5c per gal.	\$28.40
Wood, 3-8 load at \$1 per load.	1.50
Water, 6½ days at \$1 per month	.21
Lubricating oil, 1½ gals at 30c per gal.	.45
Engine oil, ½ gal at 50c per gal.	.15
Cup grease, 3 lbs at 11c per lb.	.32
Waste	.10

Total for period of 6½ days	\$31.23
Cost per day	4.80
Length of road reconstructed per day	438.5 ft.
Time occupied in reconstructing	1 mile
Cost per mile	\$57.80

#### Entire Labor Expense (Including Surveying.)

Wages, (both machines)	\$230.25
Apportioned to each machine	115.12
Cost per day, (each machine)	17.71
Cost per mile, (each machine)	213.39

#### Powder and Implements Expense.

Powder, fuse and caps	\$2.35
Picks and shovels	1.00
Drills sharpened	1.40
Scarifier teeth sharpened	1.00

Total (both machines)	5.75
Apportioned to each machine	2.87
Cost per day, (each machine)	.44
Cost per mile, (each machine)	5.31

#### Gasoline Roller.

Entire cost per day	\$ 20.18
Entire cost per mile	245.16

#### Steam Roller.

Entire cost per day	\$ 22.95
Entire cost per mile	275.53

#### Speed of Machines.

Ordinary speed of gasoline roller, 1.43 miles per hour. Distance travelled per day of 8 hours	11.44 miles.
---	--------------

Ordinary speed of steam roller, .50 miles per hour. Distance travelled per day of 8 hours	10.56 miles.
---	--------------

(Note: One hour is deducted from the steam roller per day for time occupied in taking water four times daily.)

#### Remarks.

Austin Gasoline Roller: This roller is the single cylinder type of machine, and is said to weigh 12 tons. Its water tank holds 135 gallons, or sufficient to run two days. Its distillate storage tank holds 32½ gallons, or sufficient for 1½ days run.

This roller scarified the entire road both ways, excepting the hill immediately beyond the water trough, which has a grade of 10 per cent; here the roller scarified downhill only.

The time occupied in starting this roller in the morning is, ordinarily, 20 minutes.

Austin Scarifier: This scarifier is a compact machine weighing about 6,500 pounds. It has proven to be a success in this demonstration. It has 4 reversible teeth 34 inches long by 2½ inches square.

Austin Giant Scraper: This scraper or grader weighs about 2,000 pounds. It has a blade 7 feet long by 18 inches wide and has done satisfactory work.

Buffalo Pitts Steam Roller: This roller weighs 12-13 tons. Its water tank holds 225 gallons and has to be refilled 4 times daily, the average consumption of water being about 900 gallons. Each refilling occupies 15 minutes with water convenient to road. The fuel tank holds 85 gallons or sufficient for a day's run.

Using the Austin scarifier this roller was able to scarify both ways on all the road. It scarified up-hill on the steepest portion—16 per cent, without trouble, although it should be men-

tioned that the road had been previously spiked. This roller seems to be more powerful than the gasoline roller. The time occupied in starting this roller in the morning is, ordinarily, 15 minutes.

Scarifier and Scraper—The Ohio Invincible: This is a combined scarifier and scraper, weighing over 6,000 lbs. The scarifier has six steel teeth, 24 inches by 2½ inches, bent at the point and located in front of the scraper. The scarifier was not a success on this road, being evidently, not strong enough; it was damaged on the first trip.

The scraper has a blade 8 feet long by 18 inches wide. It worked successfully.

Each machine worked one-half of the road the entire length. The gasoline roller worked the south or outside half and the steam roller worked the north or inside half. The south half, worked by the gasoline roller was, if anything, the worse side of the road. Both machines did good work. The steam roller worked a trifle faster than the gasoline roller, but when the time occupied in refilling the water tank is taken into consideration, the steam roller had no advantage, in distance travelled, over the gasoline roller in a day's run. Water, on this demonstration was convenient, and the crude oil was obtained from Jamestown.

One very important factor, which should be taken into consideration, but which could not be ascertained in this short demonstration, is the wear and tear, or the life of each machine. It would probably take a few years constant use of each machine to ascertain this, and of course, the only way the county could determine this factor would be by purchasing both machines.

Respectfully submitted,

ROBERT THOM,  
County Surveyor.

### CONTRA COSTA COUNTY HIGHWAYS.

Contra Costa County has awakened to the value of good roads and is making a strenuous effort to overcome obstacles that have interfered with its road development.

And one of the first results of its good roads campaign, inaugurated several months ago, is the announcement that by December 1 the Tunnel road, "the gateway" into the Mt. Diablo country, will be open to traffic in a brand-new dress of concrete.

From the north portal of the inter-county tunnel to Walnut Creek, a distance of thirteen miles, the reconstructed highway will possess an average width of twenty-two feet, of which eighteen feet will be of concrete five inches deep.

The surfacing, whether of asphalt or oil and gravel, will be done next spring. Meanwhile the highway will prove a boon to motorists lured to the Mount Diablo country by its scenic beauties.

Simultaneously with the completion of the tunnel road is the fact the second scenic highway to the summit of Mount Diablo will be finished on that date. This highway will be the finest mountain roadway in the West, and will have an average grade of 5 per

cent to the very summit of the meridian mountain.

While during the summer months motorists made the trip to the summit by the old road out of Danville and by way of the Mount Diablo Park Club, this climb was found rather strenuous. Consequently they will welcome the new boulevard, with its easy grade. The old road has been closed pending the completion of the new boulevard.

Other highway work throughout the county is being rushed to completion.

The Bay Point road from Martinez to Stockton, which shortens the distance between the two cities by six miles is nearly finished.

## The Mount Whitney Road.

Last August agitation was started for the building of a road up Mount Whitney, and an expedition was organized which spent three weeks gathering data and making the preliminary survey of the proposed route. The party found the road feasible.

The first ten miles of the proposed road lies within the boundaries of Kern County, running from Weldon, on Kern River, elevation 2,000 feet, to the first table lands at an elevation of 6,250 feet. While this portion of the road will be the most difficult to build, still there are no serious obstacles to overcome, and in no instance will more than a 10 per cent grade be necessary.

Kern County will undertake to construct this portion of the highway as soon as the remainder of the project is assured. From these first table lands to Mount Whitney the road will approximate eighty-five miles, and the general character of the foundation through which it will pass is decomposed granite and loose rock. In fact, the greater part of the entire distance will be through loose material, all of which is suitable for a permanent highway.

In order to facilitate and bring about actual results in the shortest time possible, a permanent organization was effected at Big Meadows one evening while the expedition party was still intact. Before a blazing campfire of pine logs, in the very heart of the Sierra Nevada, was organized the Mount Whitney Road Association, which has for its sole purpose the building, or of causing to be built, an automobile road to Mount Whitney, the highest point in the United States, which will at the same time give to the people a scenic route unsurpassed anywhere in the world.

The association is comprised of the entire membership of the expedition and an executive committee of the following officers: C. A. Barlow of Bakersfield, president; Horace G. Miller and Standish L. Mitchell of the Automobile Club of Southern California, Ernest V. Sutton of the Los Angeles Chamber of Commerce, Angus Crites of Bakersfield, personal representative of Governor Johnson, and Jefferson Gilliam of Isabella, as vice-presidents; Frank E. Smith of Bakersfield, secretary and treasurer; G. W. Jones of the engineering department of Los Angeles County, and G. W. Barton, County Engineer of Kern County, as engineers. A

meeting of this executive committee was held at the Kern County Board of Trade in Bakersfield September 15, to confer with Court Du Bois, U. S. Assistant Forester, and C. E. Pachford, Assistant U. S. District Forester, both of whom are strong believers in the great value this project would prove to the Forestry Department.

So enthusiastic was the party over the possibilities of the great project when the members reached the summit of Mt. Whitney they thereupon filed the following notice of location in the name of the people:

### "Notice of Location.

"We, the undersigned, citizens of world, hereby locate in behalf of the people for all time the following described pleasure land, to wit:

"Beginning at Mount Whitney, thence running easterly to the edge of the plateau, thence southerly along said plateau to Onyx, Kern County, California, lying and situate on the south bank of Kern River, known as the south fork, thence westerly along said south fork of Kern River, to the junction of said south fork and Kern River proper, then northerly, following the meanderings of said Kern River to a point due west of Mount Whitney, thence easterly to point of beginning;

Together with all mountain peaks, distant views, meadows, parks, canyons, forests, brooks, vistas, scenery, crystal air, and all other spots, points and attractions;

"To have and to hold for themselves and their heirs for health and amusement.

"The initial monument of this location is a mound of rock on the highest point of the United States proper, which is on the extreme peak of Mount Whitney, the Queen of the Sierra Nevada.

"Dated and potted this tenth day of August, 1915. (Signed)

Horace G. Miller, vice-president, and Standish L. Mitchell, secretary, and Carl E. McStay, special representative of the Automobile Club of Southern California; Ernest V. Sutton, Los Angeles Chamber of Commerce; G. W. Jones, engineer Los Angeles County Road Department; Walter Vail, official photographer; N. D. Darlington, State Highway Commissioner; Wilbur Hall, Saturday Evening Post; Walter M. McStay, Los Angeles Examiner; C. A. Barlow, president Kern County Board of Trade; Angus Crites, personal representative of Governor Johnson; J. H. Thomer, C. H. Bennett and Frank E. Smith, of Board of Supervisors, Kern County; J. W. Kelly, captain of the expedition; Jeff Gilliam, chief guide and manager; Charles B. Hartwick, Tatt Petroleum reporter; Walter V. Wohlke, managing editor Sunset Magazine; G. Hassel, Sunset Magazine; A. M. Barton, Engineer Kern County; Wright Jewett and Vance Anderson of Kern County Branch of Auto Club of Southern California; E. Hatchford, assistant district United States Forester, J. Cunningham, United States Forest Supervisor; T. Beard, forest ranger."

The findings of the engineers are unanimous as to the feasibility of the route proposed, and all are of the opinion that an automobile road can be

Built to within one and one-half miles of Whitney's summit at a cost surprisingly low for mountain roads.

As a matter of fact there are absolutely no difficult engineering problems to overcome, and of the ninety-five miles of proposed road, not more than five miles are of expensive construction.

Petitions for the proposed Mt. Whitney highway from Bakersfield to the county line above Weldon on the South Fork of the Kern River have been filed with the County Supervisors of Kern County.

The petitions call for a scenic road on the Kern River from Bakersfield into the Hot Springs Valley, on to Weldon and from Weldon to the plateau. Roughly, it is estimated that the road will cost in the neighborhood of \$200,000, though it may run under that figure.

The Board of supervisors has appointed a committee to investigate the proposition and to find out what amount of money will be required to build the proposed road before calling the election for bonds.

## STATE CORPORATION DEPARTMENT

American Tuna Company, Los Angeles, which proposes to secure a site on Los Angeles harbor and to build a fish canning factory, is permitted to sell 25,000 shares of preferred stock at par, \$1 per share, to net not less than \$0, and to issue a like number of common shares to E. M. Heron, S. Takeuchi and G. W. Lake. The common shares are to be held as an escrow until such time as the company is able to pay annual dividends of 6 per cent on the common after the payment of a like dividend on outstanding preferred.

Excelsior Film Manufacturing Co., Los Angeles, is permitted to sell 1,193 shares at par, \$10 per share, and to issue 1,193 shares to H. M. Joss and Paul Sullivan in exchange for a scenario and organization expenses. The permit provides, in accordance with the application, that the holders of the shares sold for money shall be reimbursed to the full par value before any dividends are paid to the Joss-Sullivan shares. Thereafter the latter shall receive \$6,000 dividends and further earnings shall be distributed to all shares alike. The company proposes to produce a feature film play to be known as "The Mockery."

Security Building Company, San Francisco, is permitted to sell 250 shares at par, \$100 per share, to net 100 per cent, for the purpose of subdividing and building on its property.

Millennium Dawn Industrial Corporation, Los Angeles, an organization of colored people, who propose to go into the laundry, restaurant and other lines of business on a co-operative basis, is permitted to sell 1,000 shares at par, \$1 per share, to net the full amount of the selling price.

Concordia, a San Francisco Club, is permitted to issue \$175,000 bonds to net par for the purpose of redeeming an outstanding issue of \$150,000 held by club members, the balance to apply to building obligations. The bonds are subject to a first mortgage of \$35,000.

Interior finish pine and hardwood with some hardwood floors. Steam heat, oil burning system, vacuum cleaning, hot water supply and automatic elevator. Bath rooms tile. Wall beds. Exterior faced with pressed brick. Plans complete and figures to be taken at once.

**OAKLAND, CAL.**—Apartment house alterations, 2 story, frame, \$2,000. Architect, none. Owner, H. T. Sherriff, 1218 6th avenue, Oakland. Location, Athol avenue near Newton. Work will consist of altering two-story frame dwelling into two-room apartments. Plans complete and work to be done by Day Labor.

### BONDS.

**STOCKTON, SAN JOAQUIN CO., CAL.**—At a recent meet the board of directors of the South San Joaquin Irrigation District it was decided to call for bids for the sale of \$150,000 worth of 5 per cent bonds. The proceeds of the sale will be used to finance the construction of the Woodward reservoir.

**FORTUNA, HUMBOLDT CO., CAL.**—An election held in Fortuna recently for the voting of bonds of \$10,000, the proceeds to be used in the construction of a high school building, carried by a large majority. A site for the proposed building has already been secured. Bids for the bonds are now being taken.

**ASTORIA, ORE.**—Bonds of \$100,000 have been voted for the erection of a grade school building in the central part of this city. It is the intention of the board to erect a building containing thirty class rooms. An architect will be selected immediately.

**WINTERS, YOLO CO., CAL.**—The bond election held in Winters to vote bonds of \$7,000 for a school building

carried by a vote of 8 to 1. The Supervisors of the county have voted \$6,000 towards building the structure, bringing the cost up to \$13,000. As yet no architect has been selected.

**MODESTO, STANISLAUS CO., CAL.**—The required number of signatures having been secured, the Modesto Board of Trade has presented the petition for the laying out of a system of good roads in Stanislaus County to the Supervisors. Action is expected shortly.

**SACRAMENTO, CAL.**—Acting on the advice of the Attorney-General, the State Board of Control will refuse to use State funds for the purchase of \$25,000 worth of high school bonds issued by the Riverside High School District.

The Board of Control was advised by the Attorney-General that the bonds were not a good investment because the procedure leading up to their issuing was defective. It is probable that the district will hold another election.

**CHICO, BUTTE CO., CAL.**—Following a conference between Martin Polk, County Surveyor of Butte County, and Supervisor C. E. Porter, held with the State Highway Commission, relative to the question of whether Butte has sufficient bonds to construct the unit between Gridley and the Sutter County line, the Treasurer of Butte was instructed to furnish the data.

The unit in question is the last open link in the main trunk line in Butte County, and is about three miles long.

**SAN ANDREAS, CALAVERAS CO., CAL.**—A Calaveras delegation has appeared before the State Highway Commission and asked that they be furnished with information relative to the site of the bridge to be constructed in line with the State highway over Mokelumne River between San Andreas and Valley Spring.

**BUREAK, LOS ANGELES CO., CAL.**—The election held to vote bonds for fire equipment, electric lighting and the construction of a new city hall, carried last week.

**HANFORD, KINGS CO., CAL.**—Robert W. Graff, of San Leandro, representing the Travelers' Insurance Company, plans to erect a new store building on his property with a 175 foot frontage on Douty street, opposite the Central grammar school.

**LAKEPORT, LAKE CO., CAL.**—The Lake County Supervisors have adopted the petition and have ordered an election for the proposed Lake County water district. The date of the election has been set for December 30th.

**NILAND, CAL.**—The Security Commercial and Savings Bank of El Centro has purchased the \$30,000 school bonds of the Niland School District.

**TAFT, KERN CO., CAL.**—The election held to vote \$60,000 school bonds carried. An architect will be selected in the near future to design plans for the proposed high school to be erected from the sale of the bonds.

**SUNSVILLE, LASSEN CO., CAL.**—The Supervisors have granted the petition to submit the Southern Lassen irrigation project to the voters, but will not be able to set the date for the election until such time as they hear the State Engineer's report. The State Engineer will report on the project as

soon as possible, and the Supervisors will hear the report November 21.

**IRICA, ORANGE CO., CAL.**—An election will be held December 14th to vote bonds of \$66,000 for a school building. Plans for the building have been prepared by Los Angeles architects.

**POMONA, LOS ANGELES CO., CAL.**—A special election will be held on January 11 to vote bonds in the sum of \$10,000 for enlarging the bath house and constructing an underground sprinkling system in the city parks, \$5,000 for the erection of a chamber of commerce building; \$15,000 for the construction of storm sewers, and \$20,000 for street improvements.

**RIVERVIEW, RIVERSIDE CO., CAL.**—The Board of Supervisors has sold the bond issue of the Indio Permanent Road Division. Bonds in the sum of \$65,000 were voted for the improvement of fifty-six miles of road.

**NEWPORT BEACH, ORANGE CO., CAL.**—The Board of Trustees has decided to call a special election for the purpose of voting bonds in the sum of \$30,000 for the installation of a municipal gas distributing system.

**HUNTINGTON BEACH, ORANGE CO., CAL.**—The Board of Trustees will at once call a special election to vote bonds for the installation of a gas distributing system for the city.

**JACKSON, AMADOR CO., CAL.**—Lawrence Burke, former chairman of the Board of Supervisors of Amador County, at a mass meeting recommended that a bond issue of \$250,000 be called for the building and maintenance of good roads throughout Amador County. Burke points out that the county is expending from \$20,000 to \$25,000 a year on roads and that this fund would be sufficient to meet the interest on the bond issue.

**SANTA BARBARA, SANTA BARBARA CO., CAL.**—It is undecided here whether to place on the ballot for the coming election a proposition to move back the east boulevard 50 feet at an estimate cost of \$55,000 or to build a seawall along the present line of the boulevard at an estimated cost of \$90,000, with \$25,000 additional for repaving. The matter is now under consideration of the City Council.

**LOS ANGELES, CAL.**—Formal action concluding the sale of \$2,610,000 worth of aqueduct power bonds to Wm. R. Compton Company of St. Louis, and \$50,000 worth of the same issue to the Chase National Bank of New York, has been taken by the City Council.

**CALEXICO, IMPERIAL CO., CAL.**—The ordinance calling for the \$30,000 civic center bond issue on November 29th, has been passed by the City Trustees.

**FRESNO, FRESNO CO., CAL.**—A second request for the establishment of a new station building in Fresno has been forwarded to the officials of the Southern Pacific Railroad by the Merchants' Association of Fresno.

**SAN LUIS OBISPO, SAN LUIS OBISPO CO., CAL.**—The election held last week to vote bonds of \$10,000 for the purchase of additional fire apparatus carried by a large majority. A call for bids for the various items wanted will be issued after the bonds have been sold.

## BRIDGES, DAMS AND HARBOR WORK

**BRIDGES AND BRIDGE TIMBERS.**—Cost not stated. Engineer's name not given. Owners, Hankow-Canton Railroad. American consular officer reports that tenders will be received until December 7, 1915, by Robert W. Hunt & Co., 2200 Insurance Exchange, Chicago, Ill., and West Street-Building, New York, N. Y., for the construction of steel bridges and the furnishing of bridge timbers for the Hankow-Canton Railway, China. Copies of the drawings and specifications may be examined at the bureau or its branch offices. (Refer to files Nos 67587 and 68110). San Francisco Branch, New Custom House.

**SAN FRANCISCO.**—Steel rolling doors. Cost not stated. Engineer, Assistant State Engineer, Ferry Bldg., S. F. Owners, State of California. Bids will be opened on November 26th by the State Board of Harbor Commissioners, Ferry Bldg., for furnishing and installing steel rolling doors on Pier No. 35. Plans and specifications can be secured from the office of the Secretary at the Ferry Building. An official proposal appears in another column of this issue.

**SANTA CRUZ, SANTA CRUZ CO., CAL.**—Bridge, steel and concrete. Cost not stated. Engineer, County Surveyor, Santa Cruz. Owners, Santa Cruz County. Bids were opened for the furnishing of material and for the construction of the bridge over the Pajaro River at Chittenden, the cost of which is to be borne by Santa Cruz and San Benito Counties. The following bids were received: The Midland Bridge Co., Kansas City, Mo., \$4,957; Ralston Iron Works, 20th and Indiana, S. F., \$5,170; Dyer Bros., 17th and Kansas, S. F., \$4,260; Clinton Bridge Works, Crocker Bldg., S. F., \$4,095; Security Construction Co., 38th and Alameda, Los Angeles, \$3,654. All bids were taken under advisement.

**CHICO, BUTTE CO., CAL.**—Bridge construction, steel and concrete. Cost not stated. Engineer, County Surveyor, Chico. Owners, Butte County. To prevent any overflow of water over the holdings of the Leland Stanford University, arrangements have been made to lengthen the new bridge forty feet that will span Butte Creek on the State Highway. The bridge will be 340 feet in length, entirely of steel and concrete construction. Further mention of this work will be made.

**SACRAMENTO, CAL.**—Bridge construction. Cost not stated. Engineer's name not given. Owners, Yolo County. Jesse Poundstone, superintendent of Reclamation District 108, met with Yolo representatives and the State Reclamation Board in Sacramento and arranged for the building of a bridge across Sycamore Slough in Yolo County. The Reclamation Board has formally granted permission to the Yolo Supervisors to drive piling for the strengthening of the old bridge, but later it was made known that the county favored a new bridge, and as a result of this understanding the Reclamation Board rescinded its former action permitting the repair of the old bridge. The new bridge will permit the passage of dredgers. The site of the proposed new structure is

but a short distance from the old bridge. The right-of-way connecting it with the county road will be furnished by the reclamation district.

**AUBURN, PLACER CO., CAL.**—Culvert, reinforced concrete. Cost not stated. Engineer, County Surveyor, Auburn. Owners, Placer County. Supervisor Geisendorfer has been given authority to construct a concrete culvert over a creek crossing the Colfax and Forest Hill road by the Board of Supervisors.

**RED BLUFF, TEHAMA CO., CAL.**—Bridges, reinforced concrete. Cost not stated. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. At the last meeting of the County Supervisors the matter of building two bridges at Los Molinas was brought before the Board. After consideration the Board ordered County Surveyor Lunning to prepare plans and estimates for the proposed structure. Further information will be given when the plans are completed.

**MARYSVILLE, YUBA CO., CAL.**—Bridge removal. Cost not stated. Engineer, County Surveyor L. B. Cook, Marysville. Owners, Yuba County. County Surveyor L. B. Cook has plans prepared for the removal of the old D street bridge, and the Clerk of the Supervisors has been instructed to advertise for bids on the work. The work has been advertised under two plans. The first plan is that the contract shall be to take down the old bridge and transport it to the county hospital grounds, where it can be used by the county for repairing the other bridges in the county. The other plan is to sell it entirely to the highest bidder, who will be allowed to use the material in the old bridge as he sees fit.

**SACRAMENTO, CAL.**—Bridge reinforced concrete, \$3,000. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Recommendation has been made by the City Board of Park Directors that all bids for the construction of the concrete bridge in Del Paso Park be rejected. This was done at the request of Director Frank Atkinson, who said he believed a lower bid could be obtained. H. W. Terrell was the lowest bidder. His bid was \$2,550 on the City Engineer's plan and \$3,100 on the plan of Jenkins & Wells. The engineer's estimate was \$3,300. Terrell outbid Jenkins & Wells on their own plans, but Atkinson told the Board he believed the bid could be bettered.

**SAN LUIS OBISPO, SAN LUIS OBISPO CO., CAL.**—Bridge reinforced concrete, \$6,000. Engineer, County Surveyor, San Luis Obispo. Owners, San Luis Obispo County. In response to a petition presented, the County Supervisors have directed that a bridge be constructed at the Santa Maria crossing on the road leading from Nipomo to Santa Maria, also that the road be repaired where necessary at a cost not to exceed \$6,000. The work will be done by the county.

**HANFORD, KINGS CO., CAL.**—Bridge and culverts. Cost not stated. Engineer, County Surveyor, Hanford. Owners, Kings County. At the last session of the Board of Supervisors, plans and specifications for bridges and culverts on highway No. 1 divisions A and B, were accepted, and the County Clerk was instructed to advertise for

bids for their construction. This portion of the county's improved highway is that running north and west from this city to Ilardwick, and north five miles from the fair ground road three miles west of this city. Further information may be had from the County Engineer at Hanford.

**CORCORAN, KINGS CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor, Hanford. Owners, Kings county. The County Supervisors have authorized Supervisor McClellan to construct a bridge over the Tule River on what is known as Dairy avenue, running south of Corcoran.

**BAKERSFIELD, KERN CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor, Bakersfield. Owners, Kern County. At the last meeting of the Supervisors bids were ordered advertised for a bridge on the Brundage Lane road over the central branch of Kern Island canal, to be opened on December 7th at 10 a. m.

**SANTA BARBARA, SANTA BARBARA CO., CAL.**—Bridges, 4, reinforced concrete, \$50,000 to \$60,000. Engineers, Mayberry & Parker, Pacific Electric Bldg., L. A., associated with Fred Johnston, Santa Barbara. Owners, Santa Barbara County. The engineers have been commissioned to prepare plans for four reinforced concrete bridges to be constructed on the State highway in Santa Barbara County.

**VENTURA, VENTURA CO., CAL.**—Culvert, reinforced concrete. Cost not stated. Engineer, County Surveyor, Ventura. Owners, Ventura County. Bids will be received by the Board of Supervisors up to 11 a. m. of November 22, 1915, for the construction of the Gardner culvert on Telephone road, about 1½ miles west of Saticoy. The approximate quantities are as follows: 16 yards of class B concrete, 3,700 pounds of reinforcing steel, 62 feet of corrugated iron pipe, 50 feet of guard fence and 135 yards of earth fill.

#### Contracts Awarded.

**VISALIA, TULARE CO., CAL.**—Bridges, reinforced concrete. Cost as follows. Engineer, County Surveyor, Visalia. Owners, Tulare County. Contracts were let for the construction of five bridges over Cross Creek on the Goshen-Traver division of the State highway in Tulare County at the last meeting of the County Supervisors. The contracts were awarded to the following: Parlier Construction Co., bridge No. 1, \$1,512; bridge No. 3, \$3,355; bridge No. 5, \$3,388; Noble, Sullivan & Noble, bridge No. 2, \$2,672; Manning Bros., Fresno, bridge No. 4, \$2,270.

**VENTURA, VENTURA CO., CAL.**—Bridge, reinforced concrete, \$1,856. Engineer, County Surveyor, Ventura. Owners, Ventura County. Contractor, J. P. Hunter, L. A. Contract price, \$1,856. George Nowalk, Santa Paula, was awarded the contract for river protection work at \$1,185. Engineer's estimate \$5,000.

**HOLLISTER, SAN BENITO CO., CAL.**—Bridge, concrete and timber, \$1,835. Engineer, County Surveyor, Hollister. Owners, San Benito County. Contractor, E. J. Spaulding, Hollister. Contract price, \$1,895.

**VENTURA, VENTURA CO., CAL.**—Grading and culverts, \$20,000. Engi-

neer, County Surveyor, Ventura. Owners, Ventura County. Contractor, B. E. Black, Ventura. Contract price, \$20,000.

**MERCED, MERCED CO., CAL.**—Bridge, reinforced concrete, \$4,725. Engineer, County Surveyor A. E. Cowell, Merced. Owners, Merced County. Contractors, Angle & Bibler, Dos Palos. Contract price, \$4,725.

#### FACTORIES AND WAREHOUSES

**MARYSVILLE, YUBA CO., CAL.**—Purifier, \$6,000. Engineer, Engineering Dept., Pacific Gas and Electric Co., S. F. Owners, Pacific Gas and Electric Co. The Pacific Gas and Electric Co., with a view of bettering its local service, has under way the construction of a new purifier at its plant on 4th street near the levee.

**LOS ANGELES, CAL.**—Warehouse, 7 story and base, reinforced concrete. Cost not stated. Architect, Albert C. Martin, Higgins Bldg., L. A. Owner, J. C. Hills, Pasadena. Location, Alpine and San Fernando streets, covering an area of 100 by 100 feet. Fireproof construction, reinforced concrete walls, floors and roof slabs. Hollow tile interior partitions, metal window sash and frames. Two elevators, automatic sprinkler system. Exterior faced with cement plaster. Plans being prepared.

#### Contracts Awarded

**EL CENTRO, IMPERIAL CO., CAL.**—Warehouse, 1 story and base, reinforced concrete, \$25,000. Architect, Don W. Wells, 134 North 7th street, El Centro. Owners, Delta Mercantile Co. Contractors, John Harnish Co., Stimson Bldg., L. A. Contract price, \$25,000.

#### FIRE HOUSES AND JAILS

**DINUBA, TULARE CO., CAL.**—Jail, 1 story, reinforced concrete. Cost not stated. Architect, none. Owners, Town of Dinuba. A new three-cell building will be constructed in Dinuba. The county will pay half the cost of the proposed building. Further information may be had from the City Clerk at Dinuba.

#### FIRE REPORT

**SANTA ROSA, SONOMA CO., CAL.**—The Hall & Shuman warehouse was destroyed by fire last week, causing a loss of \$10,000, on which was carried \$2,400 insurance.

**CLIFTON, ARIZ.**—The copper concentrators of the Arizona Copper Company have been destroyed by fire. The loss is estimated at between \$750,000 and \$1,000,000.

**LOS ANGELES, CAL.**—A fire starting in the Douglas building in this city caused damage to the amount of \$250,000. Preparations are being made to repair the structure.

**REDDING, SHASTA CO., CAL.**—Three residences, the property of Mrs. E. A. Reid, Mrs. Neie Cedenning and Edward Gardner, were destroyed by fire last week. The loss is estimated at \$11,000. All of the property destroyed was covered by insurance.

#### FLATS

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$1,900. Architect, none. Owner, A. C. Hurrell, 9 Sharon street,

S. F. Location, east 10th avenue south Bathoa. Will contain two flats of five and six rooms. Interior finish pine and hardwood with hardwood floors, open fire places, tile mantels and automatic water heaters. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

SAN FRANCISCO—Flats, 2 story and base, frame, \$5,000. Architect, none. Owner, L. B. Ham, 1613 Lake street, S. F. Location, north California west 17th avenue. Will contain two flats of six and seven rooms. Interior finish pine and hardwood. Hardwood floors, open fire places, tile or brick mantels and automatic water heaters. Tile baths. Exterior cement plaster. Plans complete and work by Day Labor.

SAN FRANCISCO—Flats, 2 story and base, frame, \$5,000. Architect, Albert Lapachet, 110 Sutter street, S. F. Owner's name withheld. Location, Union near Hyde. Will contain two flats of seven rooms and bath. Interior finish pine, hardwood and white enamel. Hardwood floors, open fire places, furnace heat and tile mantels. Tile baths. Automatic water heaters. Exterior covered with cement plaster. Plans being prepared.

OAKLAND, CAL.—Flats and store, 2 story and base, frame, \$5,000. Architect, none. Owner, C. Welchoff, 8412 East 14th street, Oakland. Location, northwest corner 90th avenue and East 14th street. Will contain stores and flats. Interior finish pine. Open fire places and tile mantels. Automatic water heaters. Exterior covered with rustic. Plans complete and work by Day Labor.

## GARAGES

SAN FRANCISCO—Garage, 2 story and base, reinforced concrete, \$35,000. Architect, August G. Headman, New Call Bldg., S. F. Owner, J. K. Bigelow. Location, north Bush between Powell and Mason, covering an area of 57½ by 137½ feet. Fireproof construction with concrete floors and roof slabs. Two inclines. Special electric work and gasoline storage tanks. Exterior faced with cement plaster. Plans complete and figures being taken.

## GOVERNMENT WORK & SUPPLIES

### U. S. Reclamation Service, Winches.

The following bids were received by the chief engineer, U. S. Reclamation Service, Washington, D. C., for furnishing 10 hoists for radial gates, New Jackson Lake dam:

McKinnon Iron Works, Ashtabula, Ohio, \$2,200; shipping weight, 20,000 lbs; time, 3 months.

Joshua Hendy Iron Works, 75 Fremont street, San Francisco, Cal., \$1,640; weight, 14,500 lbs; delivery, Sunnyvale, Cal., December 15.

Clyde Iron Works, Duluth, Minn., f. o. b. Duluth, \$1,770; weight, 15,000 lbs; 6 weeks.

Samuel T. Williams, 223 North Calvert street, Baltimore, Md., f. o. b. Cardiff, Md., \$1,150; weight not stated; time, January 29.

Western Iron Works, Seattle, Wash., \$1,314; weight, 18,000 lbs; delivery, 30 working days.

El Paso Foundry & Machine Co., El Paso, Tex., \$1,154.50; weight, 14,000 lbs; time, December 30.

Link Belt Co., Chicago, Ill., f. o. b. Chicago, \$1,558; weight, 11,000 lbs; time, January 6.

Stacey-Schmidt Mfg. Co., York, Pa., f. o. b. York, \$1,625; weight, 16,000 lbs; time, January 31.

The Vulcan Iron Works, Denver, Col., f. o. b. Denver, \$1,369; weight, 12,000 lbs; time, 15 days.

J. & J. B. Millholland Co., Pittsburgh, Pa., f. o. b. Pittsburgh, \$1,350; weight, 15,000 lbs; time, January 20.

Webster Manufacturing Co., Tiffin, Ohio, delivery, Tiffin, \$1,500; weight, 21,000 lbs; time, 60 days.

Penn Bridge Co., Beaver Falls, Pa., delivery, Claysville, Pa., 948; weight, 13,000 lbs; time, January 30.

American Hoist & Derrick Co., St. Paul, Minn., \$1,634; weight, 15,500 lbs; time, 6 weeks.

Baker Iron Works Co., Los Angeles, Cal., \$1,600; weight, 14,100 lbs; time, 30 days.

Rosedale Foundry & Machine Co., Pittsburgh, Pa., \$1,260; weight, 11,400 lbs; time, January 11.

J. S. Mundy Hoisting Co., Newark, N. J., \$1,150; weight, 20,000 lbs; time, 60 days.

Ellicott Machine Corporation, Baltimore, Md., \$2,077.68; weight, 15,000 lbs; time, February 1.

Whiting Foundry Equipment Co., Harvey, Ill., \$1,740; weight, 17,800 lbs; time, 90 days.

N. J. Foundry & Machine Co., 30 West street, New York City, delivery, Niagara Falls, \$1,397; weight, 12,700 lbs; time, 70 days.

### Stockton, Cal., Repairs to Stone.

The contract for damproofing the stonework at the U. S. post office, Stockton, Cal., has been awarded to Construction and Engineering Co., Inc., at \$883.

### Light Vessel No. 83, Repairs.

The following bids were received by the lighthouse inspector, 15th district, San Francisco, Cal., for docking and repairing light vessel No. 83: Item 1, Necessary items; 2, optional items.

Moore & Scott Iron Works, San Francisco, Cal., item 1, \$1,594; 2, \$963.60; 15 days, incomplete.

Main Street Iron Works, San Francisco, Cal., item 1, \$2,407.50; 2, \$1,113.09; 15 days, incomplete.

Mare Island Navy Yard, item 1, \$1,406; 2, \$1,013.12; 10 days, incomplete.

United Engineering Works, San Francisco, Cal., item 1, \$1,312.35; 2, \$1,027.15; 12 days, accepted.

Union Iron Works, San Francisco, Cal., item 1, \$2,574.50; 2, \$2,096; 12 days.

### Everett, Wash., Post Office.

In the construction of the U. S. post office at Everett, Wash., for which Henricson & Co., Seattle, Wash., has the contract, air valves manufactured by the Kelly Brass Works and radiator valves manufactured by the Kennedy Valve Mfg. Co. will be used.

### San Francisco, Cal., Sub-Treasurer.

As previously reported the contract for the completion of the second story of the U. S. Sub-Treasurer, San Francisco, Cal., was awarded to the Construction and Engineering Company, of San Francisco, Cal. In the prosecution

of the work, air valves for radiators manufactured by the Monash-Younger Co. will be used.

### Reclamation Work.

Contract has been awarded for the construction of Mission lateral H and sub-laterals, Flathead irrigation project, Montana, to Wilson Brothers of Polson, Mont. The contract price is \$16,123.50. The contract involves the construction of about 10 miles of laterals and appurtenant structures embracing 14,000 cubic yards of excavation, 140 cubic yards of concrete, 430 square yards of paving, the placing of 9,800 pounds of steel and about 32,000 feet B. M. of lumber. The work is situated on the Flathead River, about 17 miles northeast of Dixon.

### Bozeman, Mont., Furniture.

The contract for installing furniture in the U. S. post office at Bozeman, Mont., has been awarded to McGuire Cabinet Co., Los Angeles, Cal., at \$1,415.55.

### Hanford, Cal., Vault Shelving.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for installing metal vault shelving in the U. S. post office at Hanford, Cal.:

The H. H. Shults Co., Gowanda, N. Y., \$295.

The American Bank Protection Co., Minneapolis, Minn., \$316.

The Berger Mfg. Co., Canton, Ohio, \$322.

The Keyless Lock Co., Indianapolis, Ind., \$390.

Watson Mfg. Co., Jamestown, N. Y., \$371.

Van Dorn Iron Works Co., Cleveland, Ohio, \$396.

The Canton Art Metal Co., Canton, Ohio, \$405.

The General Fireproofing Co., Washington, D. C., \$445.

Art Metal Construction Co., Jamestown, N. Y., \$482.

SAN FRANCISCO—Restoration work. concrete construction, \$48,000. Architect, G. A. Applegarth, Spreckels Bldg., S. F. Owners, United States Government. Plans are being completed by the California Historical Society for the complete restoration of the headquarters of the Spanish Commandate of 1755, headquarters of the Mexican Commandate of 1824 and the first headquarters of the American Army of 1846 in the Presidio of San Francisco. The present building used as officers' club, and the only adobe building left on the Presidio reservation, is the nucleus around which the society plans to work. A new front, one story in height and 159 feet long and 103 feet deep will be added. It is planned to make the new building one of the highest types of old Mission architecture in the State. Rooms will be provided around an open patio. Congress will be asked for a special appropriation.

FORT BARRY, MARIN CO., CAL.—Fencing. Cost not stated. Engineer, Constructing Quartermaster, Fort Mason. Owners, United States Government. Bids will be opened on November 26th for wire fencing at Fort Barry. Plans can be secured from the Constructing Quartermaster. An official

proposal appears in another column of this issue.

## HALLS AND SOCIETY BUILDINGS

**PORTLAND, ORE.**—Labor Temple, 3 story and base. Class A construction. \$100,000. Architects, Houghlading & Dougan, Henry Bldg., Portland. Owners, Labor Temple Association. Location, Stout and Morrison and Washington streets, covering an area of 11,200 square feet. Will contain offices, meeting rooms and social rooms. Interior finish pine. Steam heat and hot water system. Exterior faced with pressed brick and terra cotta. Plans being prepared.

## HOSPITALS

**SAN FRANCISCO**—Hospital alterations. Cost not stated. Architect, Albert Lapachet, 110 Sutter street, S. F. Owners, French Hospital Association. Location 5th avenue and Geary. Work will consist of extensive alterations to kitchen and kitchen equipment, and the installation of a modern ventilating system. Plans complete and figures being taken.

**OAKLAND, CAL.**—Hospital dormitory and day hall, 2, 2 story. Class A construction. Cost not stated. Architect, Charles Peter Weeks, Mutual Bank Bldg., S. F. Owners, Alameda County. An official proposal calling for bids on this work, which were to have been opened on November 29th has been rescinded. Further mention will be made when new bids are called.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Hospital storage barn, frame, \$1,447.70. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. E. W. Book of Stockton submitted the lowest bid at \$1,447.70 for the construction of a hay storage and feed barn at Stockton. A complete list of the bids will be found under the heading of Sacramento, Stockton and Northern California.

**COVINA, LOS ANGELES CO., CAL.**—Orphans' Home, group of 1 and 2 story, reinforced concrete, \$75,000. Architect, John F. Blee, Union League Bldg., L. A. Owners, Masonic Orphans Home. The architect has just been selected to prepare plans for these buildings and details of construction have not been made public. Further mention will be made when plans are complete.

**PORTLAND, ORE.**—Hospital, 4 story and base. Class A construction, \$100,000. Architect not selected. Owners, Multnomah County. The County Commission will appropriate \$100,000 in the 1916 budget for the erection of a county hospital building. A structure to cost \$100,000 has been discussed and plans for such a structure were prepared by Bridges & Webber, local architects, several years ago. The present building is inadequate and a fire trap, according to reports of physicians of the county.

## IRRIGATION PROJECTS

**MODESTO, STANISLAUS CO., CAL.**—Irrigation work, concrete drops. Engineer Herrmann, Modesto. Owners, Modesto Irrigation District. Thurston & Co., Mechanics Institute Bldg., S. F., submitted the lowest figure for drops

in lateral No. 3 at \$20,956.95 and will be awarded the contract.

**MODESTO, STANISLAUS CO., CAL.**—Irrigation work. Cost not stated. Engineer, Herrmann, Modesto. Owners, Modesto Irrigation District. Chief Engineer F. C. Herrmann of the Modesto Irrigation District was authorized to draw plans and specifications for the Weldly Hill on lateral No. 1, four miles east of Modesto, to take the place of a wooden flume now doing service, by the Board of Directors of the Modesto Irrigation District at a recent meeting. Authorization was also given for drawing plans for concrete headgates for laterals No. 1 and 5.

**SANTA ANA, ORANGE CO., CAL.**—Irrigation gates and bridges. Cost not stated. Engineer, H. Clay Kellogg, Santa Ana. Owners, Newberg Protection District. Chief Engineer H. Clay Kellogg has been instructed by the directors of the Newberg Protection District to prepare plans for gates and bridges in accordance with the district's recent agreement with the Willows Land Company, and at Rice's Point. Further mention will be made of this work when plans are complete.

**TURLOCK, STANISLAUS CO., CAL.**—Irrigation work. Cost not stated. Engineer's name not given. Owners, Turlock Irrigation District. At the last meeting of the directors of the Turlock Irrigation District the following improvements to the district were considered: The extension of lateral 8 and the construction of a new side gate in the Ceres main, at the head of the Yeiser ditch.

## Contracts Awarded

**SANTA ANA, ORANGE CO., CAL.**—Moving earth. Cost as follows. Engineer, H. Clay Kellogg, Santa Ana. Owners, Newberg Protection District. Contractor, J. C. Farnsworth, Santa Ana. Contract price, 15 cents per yard, 2,700 yards.

**OAKDALE, STANISLAUS CO., CAL.**—Irrigation canal work. Cost not stated. Engineer's name not given. Owners, Oakdale Irrigation District. Contractor, Edward O'Malley, 180 Jessie street, S. F. Contract taken on percentage basis.

**EUREKA, HUMBOLDT CO., CAL.**—Storage dam, concrete. Cost not stated. Engineer, E. J. Burke, Eureka. Owners, Cottage Gardens Nurseries Co. Contractors, Elsmore & Jacobs, 431 G street, Eureka. Contract price not stated. Stanford & Lax, Eureka, tool house and machine room. Cost not stated.

## LIBRARIES

**SAN FRANCISCO**—Library work. Cost not stated. Architect, George William Kelham, Sharon Bldg., S. F. Owners, City and County of San Francisco. Bids will be opened by the Library Trustees on November 22 for furnishing artificial travertine stone, plain and ornamental plastering for the new main library building in the Civic Center. Plans can be secured from the office of the architect. An official proposal appears in another column of this issue.

**SACRAMENTO, CAL.**—Library, 2 story and base. Class A construction, \$20,000. Architect, Loring P. Rixford, Sharon Bldg., S. F. Owners, City of

Sacramento. Architect Rixford's plans have been approved in competition with 56 other sets of plans for the new library building. A complete description of the building and competition will be found under the heading of Sacramento and Northern California in this issue.

## MAUSOLEUMS.

**SUNSET VIEW CEMETERY, CONTRA COSTA CO., CAL.**—Mausoleum, 1 story, reinforced concrete, \$300,000. Architect's name not given. Owners, Pacific Mausoleum Co., Union Savings Bank Bldg., Oakland. Will contain 1,000 crypts, 500 niches for urns and chapel. Construction, fireproof. Art glass, modern plumbing and electric work, ornamental iron. Exterior faced with cement plaster. Plans complete and work to be carried on under Day Labor system by J. Flood Walker, 305 east 14th street, Santa Ana.

**MONROVIA, LOS ANGELES CO., CAL.**—Mausoleum, 1 story. Class A construction. Cost not stated. Architect's name not given. Owners, Monrovia Mausoleum Co., represented by T. W. Dryden, Story Bldg., L. A. Will contain 200 crypts, urns and chapel. Interior finish marble. Modern plumbing and electric work. Exterior faced with cement plaster. Plans complete and figures being taken.

**WHITTIER, LOS ANGELES CO., CAL.**—Mausoleum, 1 story. Class A construction, \$70,000. Architect, J. J. Frauenfelder, Story Bldg., L. A. Owners, Whittier Heights Cemetery Association. Will contain 200 crypts, urns and chapel. Interior finish marble. Plumbing, electric work and art glass. Exterior faced with cement plaster. Work to be done by Day Labor under the direction of Frank B. Gibson, Story Bldg., L. A.

## POWER DEVELOPMENT.

**SAN FRANCISCO**—Power development, \$11,000,000. Engineer, Engineering Department, Pacific Gas and Electric Co., S. F. Owners, Pacific Gas and Electric Co. The State Railroad Commission has authorized the Pacific Gas and Electric Co. to issue to March 1st, 1917, \$12,500,000 worth of first preferred stock. With the exception of \$1,447,500, which will be used in reimbursing the treasury, the issue will be used in construction work. The main outlays planned are: For the construction of a concrete dam and spillway to increase storage capacity of Lake Spaulding, Placer County, \$503,116.27. For increasing the capacity of the Drumm plant, Placer County, to 10,000 kilowatt, \$565,269.78. For the construction of three power houses in the Lake Spaulding District, \$1,110,976.48. For the construction of a three-speed transformer line from the Drumm power house to Cordelia substation, \$566,229.29. For the building of a substation at Cordelia and the construction of a power line to the Ridge substation, \$203,621.72. For the extension of the Cordelia-San Rafael power line from Schuetzen Park across the Golden Gate to Station F, in San Francisco, \$772,947.72. For the construction of an arch pipe line to supply Potrero peninsula to the San Francisco County

line, \$47,956.16. The erection of the eight-story class A office building and which is now under construction on Sutter street, San Francisco, at a cost of \$112,285, is also included in the appropriation. The remainder of the issue is apportioned in small amounts for construction and extension work of minor import.

## RAILROAD CONSTRUCTION AND EQUIPMENT

**RIVERSIDE, RIVERSIDE CO., CAL.**—Railroad construction. Cost not stated. Engineer, Engineering Dept. Santa Fe, L. A. Owners, Santa Fe Railroad Co. The Santa Fe Railroad is making preparations to carry out the orders of the State Railroad Commission with reference to the rebuilding the inland route of its line from Murrieta on to San Diego. The work will be started at Murrieta then to Elsinore and on to Highgrove.

### Contracts Awarded

**VISALIA, TULARE CO., CAL.**—Passenger station, 1 and 2 story, reinforced concrete, \$43,000. Architect, Engineering Dept. Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. Contractor, E. E. Etherton, Monadnock Bldg., S. F. Contract price, \$43,000.

## RESIDENCES

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$4,000. Architect, Joseph A. Leonard, 85 Cerritos avenue, S. F. Owners, Urban Realty Co. Location, northwest corner Paloma and Ocean avenue. Will contain eight rooms, two baths and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors. Open fire places and furnace heat. Mantels, tile and brick. Bath rooms tile. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$15,000. Architect, W. H. Crim, Jr., 125 Kearny street, S. F. Owner, Henry K. Williard. Location, north Vallejo east of Divisadero. Will contain ten rooms, several baths and a basement garage. Interior finish pine and hardwood with white enamel in the bed rooms. Hardwood floors throughout. Furnace heat, hot water system and open fire places. Mantels tile and brick. Bath rooms tile. Exterior covered with cement plaster. Bids in and under advisement.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$5,000. Architect, Edward E. Young, 251 Kearny street, S. F. Owners, McMullin-von Voorhies Co., 110 Jessie street, S. F. Location, Claremont Court, S. F. Will contain eight rooms, two baths and sleeping porch. Interior finish pine, white enamel and hardwood. Hardwood floors. Furnace heat, open fire places and tile or brick mantels. Bath rooms tile. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Residences, 5, 2 story and base, frame \$3,000 each. Architect, none. Owners, MacArthur Bros., 1560 Fell street, S. F. Location,

north 19th west of Douglas. Will contain six rooms and bath. Interior finish pine and hardwood veneer. Hardwood floors. Open fire places and tile and brick mantels. Tile bath rooms. Automatic water heaters. Exteriors covered with cement plaster and rustic. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$2,000. Architect, none. Owner, John E. McCarthy, 1310 13th avenue, S. F. Location, east San Gabriel south Capistrano. Will contain six rooms and bath. Interior finish pine. Hardwood floors and open fire place. Mantel tile. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Residences, 2, 1 story and base, frame, \$2,000 each. Architect none. Owners, MacArthur Bros., 1560 Fell street, S. F. Location, north Persia east Naples. Will contain six rooms and bath. Interiors finished in pine throughout. Some hardwood floors. Open fire places and tile mantels. Automatic water heaters. Exteriors rustic and cement plaster. Plans complete and work to be done by Day Labor.

**OAKLAND, CAL.**—Residence, 2 story and base, frame, \$5,000. Architects, Banning & Stewart, 5215 Broadway, Oakland. Owners, Banning & Stewart. Location, east Belgrave north Napa. Will contain eight rooms, two baths and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors. Furnace heat and open fire place. Mantel tile or brick. Tile bath. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**PIEDMONT, ALAMEDA CO., CAL.**—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, V. N. Strang, 1521 9th street, Alameda. Location, Nova Piedmont. Will contain seven rooms, bath and sleeping porch. Interior finish pine and white enamel. Hardwood floors. Open fire places and tile mantels. Bath room tile. Automatic water heater. Exterior cement plaster. Plans complete and work to be done by Day Labor.

**PIEDMONT, ALAMEDA CO., CAL.**—Residence, 1 story and base, frame, \$2,600. Architect, none. Owner, A. H. Hiohan, 1020 55th street, Oakland. Location, west Greenbank east Lake avenue. Will contain six rooms and bath. Interior finish pine with some elm panels and hardwood floors. Open fire place and tile or brick mantel. Tile bath. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**PIEDMONT, ALAMEDA CO., CAL.**—Residence, 2 story and base, frame \$4,000. Architect, Olin S. Grove, 2911 Telegraph avenue, Oakland. Owner, Mrs. Rosiva Rose. Location, Manor Drive. Will contain eight rooms, bath and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors. Open fire places and tile or brick mantels. Tile bath. Automatic water heater. Exterior covered with cement plaster. Plans com-

plete and work to be done by Day Labor.

**OAKLAND, CAL.**—Residence, 1 story and base, frame, \$2,500. Architect, none. Owner, G. W. Quinn, 758 9th avenue, Oakland. Location, west 10th avenue north Bancroft. Will contain six rooms and bath. Interior finish pine and white enamel. Hardwood floors, open fire place and tile mantel. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 2 story and base, frame. Cost not stated. Architect, Eugene K. Martin, 2192 Shattuck avenue, Berkeley. Owner, L. Berceovich. Location, Cedar and Arch streets. Will contain eight rooms, bath and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors. Open fire places and tile mantels. Bath rooms tile. Automatic water heater. Exterior covered with cement plaster. Plans complete and figures being taken.

**OAKLAND, CAL.**—Residence, 2 story and base, frame, \$3,500. Architect, none. Owner, B. A. Stewart, 8 Fairview avenue, Piedmont. Location, east Valle Vista. Will contain six rooms, bath and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors. Furnace heat and open fire places. Mantels tile and brick. Bath room tile. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**OAKLAND, CAL.**—Residence, 2 story and base, frame, \$4,250. Architect, none. Owner, H. H. Swalley, 710 Walker avenue, Oakland. Location, northwest corner Hudson and Arbor streets. Will contain seven rooms, bath and sleeping porch. Interior finish, pine, white enamel and hardwoods. Hardwood floors, furnace heat and open fire places. Mantels tile or brick. Bath rooms tile. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**PIEDMONT, ALAMEDA CO., CAL.**—Residence, 2 story and base, frame, \$8,000. Architect, Sidney B. Newsom, Nevada Bank Bldg., S. F. Owner, R. B. Bain. Will contain ten rooms, three baths and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors. Open fire places and furnace heat. Mantels tile and brick. Automatic water heater. Baths tile. Exterior cement plaster. Plans complete and revised figures being taken.

**OAKLAND, CAL.**—Residence, 2 story and base, frame, \$3,000. Architect, Hiram K. Lovell, Dalziel Bldg., Oakland. Owner, F. L. Wavy. Location, east Dana north Alcatraz. Will contain seven rooms, bath and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors. Open fire place and tile mantel. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 1 story and base, frame, \$2,250. Architect, none. Owner, C. J. Urang, 5487 Claremont avenue, Oakland. Location, east California north

Derby. Will contain five rooms and bath. Interior finish pine throughout. Some hardwood floors. Open fire place and tile mantel. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 1 story and base, frame, \$2,500. Architect, none. Owner, H. C. Pfarr, 320 Forest street, Oakland. Location, north Derby west Grant. Will contain five rooms and bath. Interior finish pine. Hardwood floors, open fire place and automatic water heater. Exterior cement plaster. Plans complete and work to be done by Day Labor.

**OAKLAND, CAL.**—Residence, 2 story and base, frame, \$4,000. Architect, M. I. Diggs, 2114 Bowditch, Berkeley. Owner, J. C. O'Connor. Location, east Carlton south Prospect. Will contain eight rooms, two baths and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors. Open fire places and furnace heat. Mantels tile and brick. Bath rooms tile. Automatic water heater. Exterior cement plaster. Plans complete and work to be done by Day Labor.

**PIEDMONT, ALAMEDA CO., CAL.**—Residence, 2 story and base, frame, \$2,250. Architect, none. Owner, W. H. Kerrigan, 5153 Shafter avenue, Oakland. Location, 21 Pacific avenue. Will contain five rooms and bath. Interior finish pine, hardwood floors. Open fire place and tile mantel. Automatic water heater. Exterior covered with cement plaster. Plans complete and work by Day Labor.

**OAKLAND, CAL.**—Residence, 1 story and base, frame, \$2,500. Architect, none. Owner, L. G. Pfarr, 5441 Shafter avenue, Oakland. Location, north 14th street west Shafter. Will contain five rooms and bath. Interior finish pine. Some hardwood floors, open fire place and tile mantel. Automatic water heater. Exterior covered with cement plaster. Plans complete and work by Day Labor.

**OAKLAND, CAL.**—Residence, 1 story and base, frame, \$2,500. Architect, none. Owner, G. W. Baumann, 3360 Trask street, Oakland. Location, northeast corner Trask and Maris. Will contain seven rooms and bath. Interior finish pine. Some hardwood floors, open fire place and tile mantel. Automatic water heater. Exterior cement plaster. Work by Day Labor.

**OAKLAND, CAL.**—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, Paul Woodburn, 3965 Greenwood, Oakland. Location, east Broadway south Prospect. Will contain seven rooms and bath. Interior will be finished in pine and white enamel. Hardwood floors, open fire places and tile or brick mantels. Automatic water heater. Exterior covered with cement plaster. Plans complete and work by Day Labor.

**FRESNO, FRESNO CO., CAL.**—Residence, 2 story and base, frame, \$5,000. Architect, none. Owner, H. H. Chorbajain, Fresno. Location, M street between Mono and Ventura. Will contain eight rooms, bath and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors. Open fire places and tile mantels. Bath room tile. Automatic water heater. Exterior covered with cement plaster. Plans being prepared.

**FRESNO, FRESNO CO., CAL.**—Residence, 1 story and base, frame, \$2,000. Architect, none. Owner, C. L. Saylor, 1035 Green street, Fresno. Location, Fresno Heights. Will contain six rooms and bath. Interior finish pine. Some hardwood floors. Open fire place and tile mantel. Automatic water heater. Exterior cement and rustic. Plans complete and work by Day Labor.

**SACRAMENTO, CAL.**—Residence, 1 story and base, frame, \$2,500. Architect, none. Owner, D. McKay, 3029 E street, Sacramento. Location, 3105 E street. Will contain six rooms and bath. Interior finish pine. Some hardwood floors. Open fire place and tile mantel. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work by Day Labor.

#### Contracts Awarded

**SARATOGA, SANTA CLARA CO., CAL.**—Residence, 1 and 2 story and base, frame, \$30,000. Architect, Carl Werner, Phelan Bldg., S. F. Owner, Bradford Webster. Contractor, John Rodoni, Saratoga. Contract price, \$20,000.

**BEVERLY, LOS ANGELES CO., CAL.**—Residence, 2 story and base, frame and brick. Cost not stated. Architect, W. J. Dodd, Marsh-Strong Bldg., L. A. Owner, Roland Bishop. Contractors, Barklew & Gould, 1017 East 21st street, L. A. Contract price not stated. Dwelling will contain 16 rooms and 6 baths.

#### SCHOOLS

**BERKELEY, ALAMEDA CO., CAL.**—School painting, \$2,150. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Bids opened for painting at the California School for the Deaf and Blind show D. Zelinsky, S. F., low at \$2,150. He will probably be awarded the contract. A complete list of the bids appears under the heading of Oakland and Alameda County in this issue.

Plans being prepared.

**ROSEVILLE, PLACER CO., CAL.**—School lighting fixtures. Cost not stated. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Roseville School District. Bids will be received up to November 20th for furnishing and installing electric fixtures in the new school building.

**MUNICH SCHOOL DISTRICT, MERCED CO., CAL.**—School addition and out buildings, frame. Cost not stated. Architects, Cowell & Redesen, Merced

Owners, Munich School District. Bids will be opened on November 20th for constructing an addition to the present building and building out buildings. Plans can be secured from the architects.

**KINGSBURG, FRESNO CO., CAL.**—School, 1 story and base, reinforced concrete, \$10,000. Architects, Johnson Bros., Kingsburg. Owners, Kingsburg School District. Bids will be called for at once by the Trustees of Kingsburg Union High School District for the construction of a school building, for which bonds have been sold.

**IRAE, ORANGE CO., CAL.**—School, 1 story and base, hollow tile, \$55,000. Architects, E. R. Jeffery & F. E. Schaefer, Westley Roberts Bldg., L. A. Owners, Irae School District. Will cover an area of 250 by 176 feet. Interior finish pine with maple floors. Modern school plumbing and a central heating system. Exterior faced with cement plaster. Plans being prepared.

**VICTORVILLE, SAN BERNARDINO CO., CAL.**—School, 1 story and base, brick or hollow tile, \$20,000. Architect, Lester H. Hibbard, Marsh-Strong Bldg., L. A. Owners, Victorville School District. The architect has just been commissioned to prepare the plans and detailed information is not available. Further mention will be made of the work.

#### Contracts Awarded

**BURBANK, LOS ANGELES CO., CAL.**—School, 1 story and base, brick, \$19,797. Architects, Tuttle & Angel, Delta Bldg., L. A. Owners, Burbank School District. Contractors, May Bros., First National Bank Bldg., Glendale. Contract price, \$19,797.

**SEATTLE, WASH.**—College building, 1 story and base, Class A construction, \$143,254. Architects, Charles Bebb and Carl Gould, Denny Bldg., Seattle. Owners, State of Washington. Contractors, Finne & Gjarde, Northern Bank Bldg., Seattle. Contract price, \$143,254. Contract covers the general construction of the Home Economics Building.

**SHEN, TULARE CO., CAL.**—School 1 story, brick, \$8,000. Architect, Ernest J. Kump, Rowell Bldg., Fresno. Owners, Goshen School District. Contractor, Charles D. Sturtevant, Fresno. Contract price, \$8,000.

#### SEWERS, STREET WORK & WATER SYSTEMS

**SAN FRANCISCO**—Paving. Cost not stated. Engineer, Assistant State Engineer, Ferry Bldg., S. F. Owners, State of California. Bids will be opened on November 26th for wood block paving on Pier No. 37. Plans can be secured from the office of the Secretary, Ferry Bldg. An official proposal appears in another column of this issue.

**SAN MATEO, SAN MATEO CO., CAL.**—Street paving and culverts. Cost not stated. Engineer, City Engineer, San Mateo. Owners, City of San Mateo. Bids will be opened on November 22 at 8 p. m. for grading, laying thereon corrugated iron culverts, and paving with an asphaltic concrete wearing surface 1½ inches thick laid upon a hydraulic cement concrete base 4 inches thick, portions of El Camino Real between San Mateo Creek and the northwesterly limits.

**SAN MATEO, SAN MATEO CO., CAL.**—Street paving. Cost not stated. En-

gineer, City Engineer, San Mateo, Owners, City of San Mateo. At the last meeting of the City Trustees, steps were taken to pave the intersections of cross streets with the county road. The funds for the improvement have been provided and bids will soon be called for.

**SAN MATEO, SAN MATEO CO., CAL.**—Street paving. Cost not stated. Engineer, City Engineer, San Mateo, Owners, City of San Mateo. A majority voted in favor of street paving in additions 1, 2, 3 and 4 together with the Burlingame Grove Tract. The engineer has been directed to prepare the necessary plans and specifications for the work. Bids will be called on the completion of the plans.

**DAILY CITY, SAN MATEO CO., CAL.**—Street improvements. Cost not stated. Engineer, City Engineer, Daily City, Owners, Daily City. A resolution has been passed by the Board of Trustees declaring its intention to improve portions of Mission Road, Melrose, Myrtle, Garden, Colma Winter and Ocean Streets; Knowles, Theta, Vista and Park avenues; Park Avenue North, Park Avenue South, Lake avenue and Orange avenue.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Sewer construction, \$22,843.75. Engineer, City Engineer, Stockton, Owners, City of Stockton. The lowest bid received for sewer construction covered by resolution No. 524 was submitted by William F. Edwards at \$21,467.24. The engineer's estimate on the work was \$22,843.75. Bids were taken under advisement.

**OROVILLE, BUTTE CO., CAL.**—Culvert work. Cost not stated. Engineer, County Surveyor, Oroville, Owners, Butte County. The County Supervisors at a recent session authorized the construction of a culvert at Canino on the Oroville-Chico road, and to have pipe installed near Crum's ranch on the same road. The installation of a culvert was also authorized upon the Oroville-Forestown road at the McKee place.

**WILLOWS, GLENN CO., CAL.**—Street paving. Cost not stated. Engineer, Town Engineer, Willows, Owners, Town of Willows. The town of Willows will shortly call for bids to complete the paving of the State highway through Willows, eight blocks, four on either end of the street. The eight blocks within the city limits, according to the town board, need only be paved according to State highway specifications.

**OROVILLE, BUTTE CO., CAL.**—Road improvement. Cost not stated. Engineer, County Surveyor, Oroville, Owners, Butte County. The Board of Supervisors has decided to advertise for bids in connection with contemplated repairs on the county road leading from Chico to the Glanella bridge. Bids were to have been opened Saturday, November 6th, but the Board decided to postpone action until November 20th. The work calls for graveling and grading of a portion of the road in the overflow section along the river.

**SAN FRANCISCO**—Beach esplanade, \$59,975. Engineer, City Engineer, Temporary City Hall, S. E. Owens, City and County of San Francisco. J. D. Hannah submitted the lowest figure for this work and will probably be

awarded the contract. A complete list of the bids appears under the heading of San Francisco in this issue.

**SALINAS, MONTEREY CO., CAL.**—Street paving. Cost not stated. Engineer, City Engineer, Salinas, Owners, City of Salinas. Plans are now being completed for the macadamizing of Sasual street in Salinas. The street will be improved from Monterey to California street. Further information may be had from the City Engineer.

**EL CENTRO, IMPERIAL CO., CAL.**—State highway construction. Cost not stated. Engineer, State Highway Commission, Forum Bldg., Sacramento, Owners, State of California. Bids will be opened on December 6th for constructing Portland cement concrete highway, approximately 12 miles in length, from Dixieland to El Centro. Plans can be secured from the branch offices of the Commission in San Francisco and Los Angeles. An official proposal appears in another column of this issue.

**FRESNO, FRESNO CO., CAL.**—Arch, concrete, \$2,000. Architects, Glass & Butler, Republican Bldg., Fresno, Owners, City of Fresno. Plans have been completed by Glass & Butler, 3 Republican Bldg., Fresno, for the construction of the arch which will be erected at the southern entrance of Van Ness Boulevard. Bids will be called for in a few days. Further information may be had from the architects.

**BAKERSFIELD, KERN CO., CAL.**—Highway construction. Cost not stated. Engineer, County Surveyor, Bakersfield, Owners, Kern County. Plans of the County Highway Commission for the construction of division 11, section 3 of the Caliente-Kernville highway were accepted by the Board of Supervisors and bids will be received until 10 o'clock a. m. December 9th. The plans of the commission for the highway division 5, section 1-A, McKittrick-Bakersfield road, were also accepted and bids will be received until December 9th at 10:30 a. m.

**SAN RAFAEL, MARIN CO., CAL.**—Street improvements. Cost not stated. Engineer, City Engineer, San Rafael, Owners, City of San Rafael. At the last meeting of the City Trustees the matter of improving several streets was brought up. A resolution establishing the grade on Pine street was adopted. Specifications for street improvements were adopted as follows: Sixth street from B to H; D from San Rafael avenue to Wolfe avenue; San Rafael avenue from C to D; Clark street its full length from Ross to Greenwood avenue; C street from 2nd to Mahon Creek; G street from 5th to the railroad; Center street from H to J street; Pine from Center to Harcourt; Cijos street from 3rd to 4th; Toll road from 2nd street to the city limits. All of these streets are to be macadamized with an asphalt surfacing, except the toll road, which is to have a concrete base, the same as the State highway. The concrete surface to be 20 feet wide with a 3-foot shoulder on either side. The asphalt surface on the macadamized streets is to be a thin coating, which will cost about 1 cent per foot.

**MARTINEZ, CONTRA COSTA CO., CAL.**—Boulevard construction. Cost not stated. Engineer, County Surveyor

R. R. Arnold, Martinez, Owners, Contra Costa County. Plans have been completed by County Surveyor R. R. Arnold for the construction of the new boulevard to Mount Diablo from the tunnel road in this city. The plans will be brought before the district boulevard commissioners and then go to the Board of Supervisors for approval.

**OAKLAND, CAL.**—Street improvement. Cost not stated. Engineer, City Engineer, Oakland, Owners, City of Oakland. Bids will be opened on December 2 for work under resolutions as follows: That 64th avenue be paved with oil macadam from the northeastern line of East 14th street to the northeastern line of the Jeannette Von Ah Tract; that Harmon avenue and Bromley avenue from the northwestern line of said tract to the northwestern line of 64th avenue, each be curbed with redwood, guttered with concrete gutters 3 feet wide, and paved with oil macadam; also that cement sidewalks six feet wide be constructed on both sides of Harmon avenue and on the northeastern side of Bromley avenue.

**OAKLAND, CAL.**—Street improvement. Cost not stated. Engineer, City Engineer, Oakland, Owners, City of Oakland. Bids will be opened on December 2 for the improvement of 27th avenue from the northeastern line of East 22nd street, be graded, curbed with redwood, guttered with concrete gutters 3 feet wide, paved with oil macadam, and sidewalked with cement sidewalks six feet wide; also that the crossing of 27th avenue with East 22nd street, be graded, curbed with redwood, paved with oil macadam, sidewalked with cement sidewalks and culverted with two corrugated iron and concrete culverts each having two branches.

**HAYWARD, ALAMEDA CO., CAL.**—Street improvement. Cost not stated. Engineer, Town Engineer, Hayward, Owners, Town of Hayward. At the last meeting of the Town Trustees specifications were approved for the improvement of the B and Watkins street crossing. Bids on this work will be called for shortly. The matter of repairing First street from A to the bridge and upper A street from 3rd street to the bridge was referred to the street and building committee and the Town Engineer.

**PORTLAND, ORE.**—Road construction and repair, \$581,221. Engineer, Roadmaster Yeon, Portland, Owners, Multnomah County. For maintenance and new construction work, Roadmaster Yeon estimates \$581,221 will be necessary in 1916. Provision is made for \$75,661 for the Columbia Highway and \$24,000 for new construction work in various other parts of the county. Among the items included are the following: St. Helens road, regrade 3 miles, \$75,000; Germantown road, grade, macadam, \$15,000; Capitol highway, half mile, paving, \$10,000; Base Line road, extensions, \$50,000; eliminating grade crossings, \$15,000; Sky Line, macadam, \$20,000; Sky Line, 3 miles, \$10,000; Fairmount Boulevard, macadam 3 miles, \$26,000; redress ditches and shoulders, \$8,000; St. Helens road, widen 2 feet, \$3,000; Freyman avenue, grading, \$15,000; Stanbards, \$2,000; Sandy road, relocate and grade, \$10,000; Sandy cut-off grade, \$10,000. Pe-

titions for other improvements were not included. The largest improvement asked for is the Columbia boulevard extending from St. Johns, the cost of which is estimated at \$18,000 per mile, a total of \$162,000; hard surface Fairview road, 1 mile, \$15,000; paving East 52nd street extension, 5 miles, \$50,000; total \$241,000.

#### Contracts Awarded

**LINDSAY, TULARE CO., CAL.**—Street paving. Cost not stated. Engineer, City Engineer, Lindsay. Owners, City of Lindsay. Contractors, Worswick Street Paving Co., Union National Bank Bldg., Fresno. Contract for five blocks. Cost not stated.

**BAKERSFIELD, KERN CO., CAL.**—Road construction. Cost not stated. Engineer, County Surveyor Bakersfield. Owners, Kern County. Contractors, Clark-Henry Co., Ochsner Bldg., Sacramento. Contract price not stated.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Sanitary sewers, \$27,467.24. Engineer, City Engineer, Stockton. Owners, City of Stockton. Contractor, William F. Edwards, 675 31st street, Oakland. Contract price, \$27,467.24.

**SAN LUIS OBISPO, SAN LUIS OBISPO CO., CAL.**—Road extension, \$7,000. Engineer, County Surveyor, San Luis Obispo. Owners, San Luis Obispo County. Contractors, Colony Holding Co., San Luis Obispo. Contract price, 25 cents per cubic yard for 28,000 cubic yards.

**BAKERSFIELD, KERN CO., CAL.**—Highway construction, \$13,464.54. Engineer, County Surveyor, Bakersfield. Owners, Kern County. Contractor, Robert Shearer, Pacific Electric Bldg., L. A. Contract price, \$13,464.54.

**MORGAN HILL, SANTA CLARA CO., CAL.**—Street paving. Cost not stated. Engineer, Town Engineer, Morgan Hill. Owners, Town of Morgan Hill. Contractors, Casley & Hamilton, San Jose. Contract price not stated.

**SOUTH SAN FRANCISCO, SAN MATEO CO., CAL.**—Street paving and sidewalks. Cost as follows, Engineer, City Engineer, South San Francisco. Owners, City of South San Francisco. Contractors, F. R. Ritchie & Co., Chronicle Bldg., S. F., paving, \$8,074.12; sidewalks, \$7,883.15.

**SAN RAFAEL, MARIN CO., CAL.**—Road grading and fills, \$3,995. Engineer, County Surveyor, San Rafael. Owners, Marin County. Contractor, P. P. Scilacci & H. Gisel, San Rafael. Contract price, \$3,995.

**SAUSALITO, MARIN CO., CAL.**—Street improvement. Cost not stated. Engineer, Town Engineer, Sausalito. Owners, Town of Sausalito. Contractors, Carnahan & Mulford, 45 Kearny street, S. F. Contract price not stated.

**SACRAMENTO, CAL.**—Street improvement. Cost not stated. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Contractors, Clark & Henry Construction Co., Ochsner Bldg., Sacramento. Contract price not stated.

**WOODLAND, YOLO CO., CAL.**—Street paving. Cost as follows, Engineer, City Engineer, Woodland. Owners, City of Woodland. Contractors, Clark & Henry Construction Co., Ochsner Bldg., Sacramento. Contract price, 11½¢ per square foot and 12½¢ per square foot.

**SONORA, TUOLUMNE CO., CAL.**—Sewer construction, \$2,525.57. Engi-

neer, Town Engineer, Sonora. Owners, Town of Sonora. Contractor, W. J. Tobin, 735 Filbert street, Oakland. Contract price, \$2,525.57.

#### STORES AND OFFICES

**SAN FRANCISCO**—Stores, 1 story and base, brick and frame, \$10,000. Architect, August G. Headman, New Call Bldg., S. F. Owner, Arthur H. Rochford. Location, east Taylor south Washington, covering an area of 30 by 100 feet. Will contain modern market. Tile floors and wainscot. Patent store fronts. Exterior faced with pressed brick. Plans being prepared.

**BERKELEY, ALAMEDA CO., CAL.**—Stores, 1 story and base, brick, \$7,000. Architect, J. Henry Boehr, Delger Bldg., Oakland. Owner, J. H. Wright. Location, Telegraph avenue and Ashby. Will contain three stores. Interior finish pine. Modern plumbing and electric work. Patent store fronts. Exterior faced with pressed brick. Work to be done under the superintendence of Alfred Legault, Delger Bldg., who is now taking sub-figures.

**OAKLAND, CAL.**—Store and lofts alteration, 3 story, brick, \$18,000. Architect, none. Owners, University Investment Co. Location, southwest corner of 14th and Washington streets. The upper floors will be rearranged for lofts. Included in the work is brick, steel, carpentry work, plumbing, plastering, electric work and painting. Plans are complete and the work will be done by Day Labor.

**SANTA ROSA, SONOMA CO., CAL.**—Office, 1 story, frame, \$2,000. Architects, Turton & Herbert, Santa Rosa Bank Bldg., Santa Rosa. Owners, Commercial Club. Building has been designed for offices of the organization and meeting rooms. Interior finish pine. Central heating system from adjoining bank building. Exterior faced with cement plaster. Plans being prepared.

**OAKDALE, STANISLAUS CO., CAL.**—Offices, 1 story and base. Class C construction, \$10,000. Architects, Stone & Wright, San Joaquin Bldg., Stockton. Owners, Oakdale Irrigation District. Revised plans are now being prepared for this building. Figures taken some time ago all ran too high and revision of the plans was necessary. Further mention will be made of the work when new bids are called for.

#### Contracts Awarded

**LOS ANGELES, CAL.**—Office addition, 3 story and base. Class A construction, \$200,000. Architect, W. J. Dodd, Marsh Strong Bldg., L. A. Owners, Pacific Mutual Life Insurance Co. Contractors, C. J. Kubach Co., Contract price, \$200,000.

**LOS ANGELES, CAL.**—Office building, 3 story and base, reinforced concrete. Cost not stated. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, W. G. Kerckhoff. Contractors, Weymouth & Crowell, 2026 west 9th street, L. A. Contract price not stated.

**CALEXICO, IMPERIAL CO., CAL.**—Stores and offices, 2 story and base, reinforced concrete. Cost not stated. Architects, Zimmer & Tiebner, El Centro. Owner, M. Harris. Contractors, M. D. Hays Construction Co. Contract price not stated.

Reports.

419 Wilcox Building

Los Angeles,

California

**SEATTLE, WASH.**—Stores and offices 1 and 2 story, brick, hollow tile and concrete, \$50,000. Architects, Charles Lieb and Carl Gould, Denny Bldg., Seattle. Owners, Puget Mill Co. Contractors, Butler Contracting Co., Central Bank Bldg., Seattle. Contract price, \$50,000.

#### THEATRES

**ANAHEIM, ORANGE CO., CAL.**—Theatre and offices, 2 story and base, brick, \$10,000. Architect, Eugene M. Purfee, Anaheim. Owner, John Casson. Location, Center street. Will contain motion picture theatre and stores on first floor and offices above. Interior finish pine and hardwood. Patent store fronts. Modern plumbing and electric work. Exterior faced with pressed brick. Plans being prepared.

#### PLAN NEW RAILROAD IN CENTRAL OREGON.

**PORTLAND, ORE.**—The first evidence of revival or railway construction on a considerable scale in the Northwest was afforded in Portland by the organization of the Oregon, California & Eastern Railway Company, designed to supply some 400 miles of standard gauge lines for Central Oregon and adjacent territory, at an estimated expenditure of \$7,000,000.

The project, its promoters have announced, promises a new and direct all-rail line directly south through Central Oregon to Nevada, California and the East, saving several hundred miles over the present routes to Reno, Carson City and other Nevada and Northwestern California points. It was said it also would open new and rich trade territory in Central Oregon and Northern California and Nevada.

# OFFICIAL PROPOSALS.

## NOTICE TO STEEL ROLLING DOOR MANUFACTURERS.

OFFICE OF THE BOARD OF STATE Harbor Commissioners, Union Depot and Ferry House, San Francisco, California.

Sealed proposals or bids will be received at this office at or prior to **11 o'clock a. m., on Friday, November 26, 1915**, for furnishing and installing steel rolling doors on the shed on Pier No. 35, on the water front of the City and County of San Francisco, in accordance with the plans and specifications prepared for these doors by the Chief Engineer and adopted by the Board August 9, 1915, and on file in this office, to which special reference is hereby made.

No bid will be received unless it is made on a blank form furnished from this office. Each bid shall be accompanied by a certified check for an amount equal to Five (5) per cent of the amount of the proposal, to be made payable to the order of the Secretary of the Board, conditioned that if the proposal is accepted and the contract awarded, and if the bidder shall fail or neglect to execute a contract and give the bond required within six days after the award is made, in that case said sum mentioned in said check shall be deemed liquidated damages for such failure and neglect and shall be paid into the San Francisco Harbor Improvement Fund.

The bond required to be not less than one-half of the amount of the bid, with two or more sureties to be approved by the Board of State Harbor Commissioners, and conditioned for the faithful performance by the contractor of all the terms and conditions of said contract according to the true intent and meaning thereof and to the satisfaction of said Board; and said bond shall be effective as provided in an act approved May 1 1911, for the protection of material men, mechanics and laborers.

Bids will not be considered by this Board unless delivered to the Secretary or to the Assistant Secretary at the office of the Secretary, Room 17, Ferry Building, at or prior to **11 o'clock a. m., on Friday, November 26, 1915**, at which time and place the bids will be opened.

The Board reserves the right to reject any or all bids if deemed for the best interest of the State.

Bidders are invited to be present at the opening of the bids.

Plans and specifications of this work to be had at Room 18, Ferry Building, upon depositing \$20.00 for same, which will be returned on return of plans and specifications.

Bidders are requested to mark envelope containing bid: "Bid for Steel Rolling Doors."

J. J. LAYNER,  
THOMAS S. WILLIAMS,  
J. H. McCALLUM,  
Board of State Harbor Commissioners.  
JEROME NEWMAN,  
Chief Engineer.  
LEO V. MEIERLE, JR.,  
Secretary.

## NOTICE TO CONTRACTORS.

SEALED proposals will be received by the Board of Trustees of the San Francisco Public Library and Reading Rooms, at the office of the Secretary of the Board, Hayes and Franklin streets, San Francisco, Cal., at **twelve o'clock noon, Monday, November 22, 1915**, for the "Interior Artificial Roman Travertine Stone and Plain and Ornamental Plastering of the main portions" of the San Francisco Public Library Building, in accordance with the plans and specifications on file in the office of George W. Kelham, Architect, 365 Sharon Building.

Each proposal must be accompanied by a certified check or a surety bond, in the sum of ten per cent (10%) of the amount of the bid; made payable to the Board of Trustees of the San Francisco Public Library and Reading Rooms, or the bid will not be considered. When the award of contract is made, all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bonds.

The contractor to whom the contract is awarded will be required to furnish a labor and material bond in the sum of ten per cent (10%) of the amount of the contract, also a completion bond in the sum of twenty-five per cent (25%) of the amount of the contract. The bond must be of a Surety Company or of individuals who are satisfactory to the Library Trustees. The right is reserved to reject any and all bids.

Each bid or proposal must be accompanied by a sample of both "plastic" and "cast" imitation "Travertine." The samples must be plainly marked with bidder's name, and are to be 2 feet 0 inches by 2 feet 0 inches in size, and made in exact accordance with the specifications for this work.

Plans and specifications may be obtained from the architect, by depositing \$20.00, which sum will be refunded upon the return of the plans and specifications in good condition, or before the date and time of the submission of the bids.

By order of the Board of Trustees of the San Francisco Public Library and Reading Rooms.

GEORGE A. MULLIN,  
Secretary.

## PROPOSALS FOR BUILDING.

BUILDING — Sealed proposals, in accordance with "Proposals for Three Buildings" will be received at the naval station, Pearl Harbor, Hawaii, and at the bureau of yards and docks, Navy Department, Washington, D. C., until **11 o'clock a. m., December 4, 1915**, and then there publicly opened, for constructing one reinforced concrete power house, one reinforced concrete operating building and one wooden double quarters for chief operator at the naval station, Pearl Harbor, Hawaii. Plans and specifications can be obtained on application to the bureau or to the commandant of the naval station named. H. R. STANFORD, chief of bureau.

## PROPOSALS FOR BUILDING.

BUILDING — Sealed proposals, in accordance with "Proposals for Five Buildings" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until **11 o'clock a. m., January 4, 1916**, and then there publicly opened, for a power house and an operating building of reinforced concrete and steel construction and three

quarters of wood construction for commanding officer, married operators and bachelor operators at the naval station, Cavite, P. I. Plans and specifications can be obtained on application to the bureau or to the commandant of the naval station named. Proposals will also be received at the naval station, Cavite, P. I., until **4:30 o'clock p. m., January 4, 1916**, and opened at **10 o'clock a. m., January 5, 1916**. H. R. STANFORD, chief of bureau.

## PROPOSALS FOR CANAL SUPPLIES.

PANAMA CIRCULAR 990—Proposals for Iron Castings, Wrought Iron or Steel Pipe, Mule Shoes, Horseshoe Nails, Screws, Cotter's, Tacks, Turn-buckles, Bronze Bars, Brass Chain, Shovels, Manue Forks, Mop Handles, Tool Handles, Brooms, Scrub Brushes, Roof Brushes, Paint Brushes, Snatch Blocks, Tackle Blocks, Lanterns, Buckets, Oil cans, Lantern Globes, Window Glass, Scythe Stems, Steel Tapes, Rules, Plumbbobs, Gate Valves, Hose Couplings, Door Bolts, Locks, Hasps, Hinges, Door Hooks, Furniture Casters, Hose Packing, Asbestos Gaskets, Sash Cord, Chalk Line, Twine, Tarpaulins, Sheet piling, Bunting, Railway Flags, Cheesecloth, Oilcloth, Linoleum, Emery Cloth, Sandpaper, Leather Belting, Belt Lacing, Ship's Felt, Cork, Boiler Lagging, Crayons, Metal Polish, Beeswax, Candles, Potassium Chlorate, Borax, Lye, Paper and White Oak Lumber.—

Sealed proposals will be received at the office of the general purchasing officer, the Panama Canal, Washington, D. C., until **10 o'clock a. m., November 26, 1915**, at which time they will be opened in public for furnishing the above mentioned articles. Blanks and general information relating to this circular No. 990 may be obtained from this office, or the office of the assistant purchasing agent, Fort Mason, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal.; F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

## NOTICE TO CONTRACTORS.

OFFICE OF THE BOARD OF STATE Harbor Commissioners, Union Depot and Ferry House, San Francisco, California.

Sealed proposals or bids will be received at this office at or prior to **11 o'clock a. m., on Friday, November 26, 1915**, for furnishing material and constructing wood block pavement on Pier No. 56, on the waterfront of the City and County of San Francisco, in accordance with the plans and specifications prepared therefor by the Chief Engineer and adopted by the Board May 21, 1914, and on file in this office, to which special reference is hereby made. The materials to be used in this work shall consist of the requisite quantities of wood paving blocks, sand and asphalt. All materials will be subjected to a rigid examination and test, and if found defective, undersized, unsuitable or not as specified, will be condemned and must be immediately removed from the work by the contractor at his expense.

No bid will be received unless it is made on a blank form furnished from this office. Each bid shall be accompanied by a certified check for an amount equal to Five (5) per cent of the amount of the proposal, to be made payable to the order of the Secretary of the Board, conditioned that if the proposal is accepted and the contract awarded, and if the bidder shall fail or neglect to execute a contract and give the bond required within six days after the award is made, in that case said sum mentioned in

## FOR CEMENT, SAND AND CRUSHED ROCK.

U. S. Engineer Office, 723 Central Building, Los Angeles, Cal., November 10, 1915.—Sealed proposals for furnishing American Portland cement, sand and crushed rock at San Pedro, Cal., will be received at this office until **11 A. M., December 10, 1915**, and then opened. Information on application. R. R. RAYMOND, Major, Engineers.

said check shall be deemed liquidated damages for such failure and neglect and shall be paid into the San Francisco Harbor Improvement Fund.

The bond required to be not less than one-half of the amount of the bid, with two or more sureties to be approved by the Board of State Harbor Commissioners, and conditioned for the faithful performance by the contractor of all the terms and conditions of said contract according to the true intent and meaning thereof and to the satisfaction of said Board; and said bond shall be effective as provided in an act approved May 1 1911, for the protection of material men, mechanics and laborers.

Bids will not be considered by this Board unless delivered to the Secretary or to the Assistant Secretary at the office of the Secretary, Room 17, Ferry Building, at or prior to 11 o'clock a. m., on Friday, November 26, 1915, at which time and place the bids will be opened.

The Board reserves the right to reject any or all bids if deemed for the best interest of the State.

Bidders are invited to be present at the opening of the bids. Plans and specifications of this work to be had at Room 18, Ferry Building, upon depositing \$20.00 for same, which will be returned on return of plans and specifications.

Bidders are requested to mark envelope containing bid: "Bid for Wood Block Pavement Pier No. 33."

##### BIDS WANTED FOR CONSTRUCTING WIRE FENCE.

OFFICE CONSTRUCTING QUARTERMASTER, Fort Mason, Cal.—SEALED PROPOSALS for constructing wire fence at Fort Barry, Cal., will be received here until 11 A. M., November 26, 1915, and then opened. Further information on application. (\*)

##### PROPOSAL FOR BIDS.

BIDS are requested for the structure of steel and steel erection combined for the University Library, University of California, Berkeley, Cal.

SEALED BIDS will be received at the Office of the Comptroller, University of California, Berkeley, Cal., at or before 9 A. M., Wednesday, December 1st, for structural steel and steel erection (combined), as per plans and specifications on file and obtainable after 9 A. M., Tuesday, November 16th, at the Cashier's Window in said Office. A deposit of \$50.00 will be required

for each set of plans and specifications taken out, which deposit will be refunded upon return of said plans and specifications, accompanied by a regular bid for the work. No bids will be received unless accompanied by a certified check or bond in favor of the undersigned, equal to 10% of the bid, to secure execution of the contract by the successful bidder.

The right is reserved to reject any or all bids.

THE REGENTS OF THE UNIVERSITY OF CALIFORNIA. (\*)

##### WEST VIRGINIA BUILDING.

##### PROPOSALS FOR THE SALE, WRECKING AND REMOVAL OF THE WEST VIRGINIA STATE BUILDING AT THE PANAMA-PACIFIC INTERNATIONAL EXPOSITION, AND FOR THE SALE OF FURNITURE, ETC.

SEALED PROPOSALS for the sale, wrecking and complete removal of the West Virginia State Building at the Panama-Pacific International Exposition at San Francisco, California, are asked by the West Virginia Commission.

TWO PROPOSALS are desired, one to be for the sale, wrecking and complete removal of the building and fixtures, and clearing lot to official grade; and the other for the sale, wrecking and complete removal of the building without fixtures and clearing lot to official grade.

ALSO, PROPOSALS are desired for the sale of all furniture and hangings contained in the West Virginia Building. The furnishings include eight bed-room suites and a large equipment of reed furniture. Hangings, carpets, etc., are of best quality and as good as new.

Proposals on the above shall be separate and all proposals shall be securely sealed, accompanied by a certified check for ten per cent (10%) of the amount of the proposal, and mailed as follows: To G. A. Bolden, Resident Secretary, West Virginia Commission, West Virginia Building, Exposition Grounds, San Francisco, California.

Building and furnishings may be inspected at any time between the hours of 11 A. M. and 4 P. M., Sundays excepted.

Proposals will be received up to and including noon of Thursday, November 18th, 1915. The West Virginia Commission reserves right to reject any or all bids.

WEST VIRGINIA COMMISSION,  
By G. A. BOLDEN,  
Resident Secretary. (\*)

##### DEPARTMENT OF ENGINEERING.

##### CALIFORNIA HIGHWAY COMMISSION

##### NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock P. M. on December 6, 1915, at which time they will be publicly opened and read for construction in accordance with the specifications therefor, to which special reference is made, portions of State highway as follows:

Imperial County, from Dixieland to El Centro (VII-imp-12-C) about 12 miles in length, to be paved with Portland cement concrete.

Plans may be seen, and forms of proposals, bonds, contracts and specifications may be obtained, at the said office, and they may be seen at the office of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at Willits, Dunsmuir, Sacramento, San Francisco, San Luis Obispo, Fresno, and Los Angeles.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the

"Notice to Contractors" annexed to the blank form of proposal, lot and directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all bids or to accept the bid deemed for the best interest of the State.

NEWELL D. DARLINGTON,  
CHARLES F. STERN,  
California Highway Commission.  
AUSTIN B. FLETCHER,  
Highway Engineer.  
WILSON R. ELLIS,  
Secretary. (\*)

Dated: November 9, 1915.

##### ROAD.

MARINE RAILWAY.—Sealed proposals indorsed "Proposals for Marine Railway" will be received at the Bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m., November 27, 1915, and then and there publicly opened for constructing a marine railway at the naval station, Pearl Harbor, Hawaii. Proposals are invited on separate component parts of the complete railway. Plans and specifications may be obtained on application to the bureau or to the commandant of the naval station named, H. R. STANFORD, chief of bureau.

##### PROPOSALS FOR CANAL SUPPLIES.

PANAMA CIRCULAR 956.—Proposals for the purchase of Miscellaneous Iron and Steel Scrap Offered For Sale by the Panama Canal and Which is no Longer Needed.—Sealed proposals will be received at the office of the general purchasing officer the Panama Canal, Washington, D. C., until 1030 a. m., November 22, 1915, at which time they will be opened in public, for purchasing the above mentioned materials. Plans and general information relating to this circular (No. 956) may be obtained from this office or the office of the assistant purchasing agent, Fort Mason, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

##### PROPOSALS.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 24th day of November, 1915, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The construction of the Hetch-Hetchy Railroad.

Progressive payments will be made in the manner set forth in the specifications.

Said work must be done in accordance with the plans and specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within fifteen (15) calendar days after completion of the hundred (100) calendar days from the date of the contract to be made and entered into therefor.

The amount of bond for faithful performance of contract has been fixed at two hundred thousand dollars (\$200,000.00).

The attention of bidders is also called to Act 2385 of the Legislature of the State of California entitled "An Act to secure the payment of claims of material men, mechanics, or laborers, employed by contractors upon State, Municipal, or other public work," which act provides that every contractor to whom is awarded a contract for the execution of public work in the State of California shall, before entering upon the performance of such work, file a good and sufficient bond in an amount not less than one-half of the total amount payable by the terms of the contract. (Approved March 27, 1897, Statutes 1897, Amendment of 1911, Statutes 1911.)

All proposals offered shall be accom-

and a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors of said City and County, for an amount not less than ten per centum of the aggregate of the proposal, and no proposal will be considered unless accompanied by such check.

Printed proposal forms will be furnished gratuitously upon application at the office of the City Engineer, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids. By order of the Board of Public Works. P. J. CHURCHILL, Secretary.

#### PROPOSAL FOR THE SALE, WRECKING AND REMOVAL OF THE CITY OF NEW YORK BUILDING AT THE PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED BIDS OR ESTIMATES WILL BE received by Morton L. Fouquet, Special Representative of the City of New York, at the City of New York Building, Panama-Pacific International Exposition, until 11 o'clock A. M. on WEDNESDAY, NOVEMBER 24th, 1915 FOR THE CITY OF NEW YORK BUILDING, INCLUDING THE PLANTING.

Building to be removed and site restored in accordance with the Rules and Regulations of the Exposition. Removal of structure not to interfere with the packing and removal of exhibits.

The bidder to enclose with his bid a certified check, drawn to an amount equivalent to 10% of his bid, and to be prepared to furnish a certified check equivalent to the balance of his bid at the opening of the bids on Wednesday, November 24th, at eleven o'clock, A. M.

Bids will be compared and the contract awarded at a lump or aggregate sum.

The right is reserved to reject any or all bids. (\*)

#### PROPOSALS FOR THE SALE, WRECKING AND REMOVAL OF THE FRENCH BUILDING AT THE PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS for the sale, wrecking and complete removal of the French Building at the Panama-Pacific International Exposition at San Francisco, California, are asked by the French Commission.

PROPOSALS are desired for the sale, wrecking and complete removal of the building and clearing lot to official grade.

Proposals shall be securely sealed, accompanied by a certified check for ten per cent (10%) of the amount of the proposal, and mailed as follows: "P. J. Gregoire, Secretary, French Commission, French Building, Exposition Grounds, San Francisco, California."

Building may be inspected at any time between the hours of 11 A. M. and 4 P. M., Sundays excepted.

Proposals will be received up to and including noon of Friday, November 26th, 1915. The French Commission reserves right to reject any or all bids.

Bids will be opened by the Library Trustees on November 22 for furnishing artificial travertine stone, plain and ornamental plastering for the new main library building in the Civic Center. Plans can be secured from the office of the architect. An official proposal appears in another column of this issue.

BEACH ESPLANADE—\$59,975. San Francisco. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. J. D. Hannah submitted the lowest figure for this work and will probably be awarded the contract. A complete list of the bids appears under the heading of San Francisco in this issue.

## OAKLAND AND ALAMEDA COUNTY

STREET IMPROVEMENT—Cost not stated. Oakland, Cal. Engineer, City Engineer. Oakland. Owners, City of Oakland. Bids will be opened on December 2 for work under resolutions as follows: That 6th avenue be paved with oil macadam from the northwestern line of East 14th street to the northeastern line of the Jeannette Von Ah Tract. That Harmon avenue and Bromley avenue from the northwestern line of said tract to the northwestern line of 64th avenue, each be curbed with redwood, guttered with concrete gutters 3 feet wide, and paved with oil macadam; also that cement sidewalks six feet wide be constructed on both sides of Harmon avenue and on the northeastern side of Bromley avenue.

STREET IMPROVEMENT—Cost not stated. Oakland, Cal. Engineer, City Engineer. Oakland. Owners, City of Oakland. Bids will be opened on December 2 for the improvement of 27th avenue, from the northeastern line of 22nd street, be graded, curbed with redwood, guttered with concrete gutters 3 feet wide, paved with oil macadam, and sidewalked with cement sidewalks six feet wide; also that the crossing of 27th avenue with East 22nd street be graded, curbed with redwood, paved with oil macadam, sidewalked with cement sidewalks and culverted with two corrugated iron and concrete culverts each having two branches.

STREET IMPROVEMENT—Cost not stated. Hayward, Alameda Co., Cal. Engineer, Town Engineer. Hayward. Owners, Town of Hayward. At the last meeting of the Town Trustees specifications were approved for the improvement of the B and Watkins street crossing. Bids on this work will be called for shortly. The matter of repairing First street from A to the bridge and upper A street from 3rd street to the bridge was referred to the street and building committee and the Town Engineer.

RESIDENCE—2 story and base, frame, \$5,000. Oakland, Cal. Architects, Banning & Stewart, 5215 Broadway, Oakland. Owners, Banning & Stewart. Location, east Belgrave north Napa. Will contain eight rooms, two baths and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors. Furnace heat and open fire place. Mantel tile or brick.

## CITY BIDS OPENED.

### NEW BIDS OPENED FOR CONSTRUCTION OF OCEAN BEACH ESPLANADE. J. D. HANNAH LOW MAN FOR WORK.

Nine sets of bids were opened at Friday's meeting of the Board of Public Works for the construction of the reinforced concrete esplanade. J. D. Hannah submitted the lowest bid at \$59,975 and will probably be awarded the contract. Proposition 1 is for the esplanade per lineal foot and Proposition 2 for reconstructing rubble wall per cubic yard.

C. E. Lamburth submitted the lowest bid when the work was first figured at \$49,000, but asked that he be allowed to withdraw his bid. Following is a complete list of the bids received:

Bidder	Prop. 1	Prop. 2	Prop. 3
J. D. Hannah	\$89.50	\$6.00	\$59,975
E. S. Mulford	103.00	6.00	68,750
C. E. Lamburth	104.70	6.00	69,855
Healy Tibbitts Constr. Co.	109.00	5.00	72,350
Contra Costa Constr. Co.	102.00	2.00	67,200
T. J. Snea	100.00	5.00	66,500
Karl Ehrhart	102.00	3.50	67,350
Foster Vogt & Co.	95.30	4.35	63,120
John Grace	98.00	8.00	66,100

Tile bath. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

RESIDENCE — 2 story and base, frame, \$3,000. Piedmont, Alameda Co., Cal. Architect, none. Owner, V. N. Strang, 1521 9th street, Alameda. Location, Nova Piedmont. Will contain seven rooms, bath and sleeping porch. Interior finish pine and white enamel. Hardwood floors. Open fire places and tile mantels. Bath room tile. Automatic water heater. Exterior cement plaster. Plans complete and work to be done by Day Labor.

RESIDENCE — 1 story and base, frame, \$2,000. Piedmont, Alameda Co., Cal. Architect, none. Owner, A. H. Mohan, 1020 55th street, Oakland. Location, west Greenbank east Lake avenue. Will contain six rooms and bath. Interior finish pine with some elm panels and hardwood floors. Open fire place and tile or brick mantel. Tile bath. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

RESIDENCE — 2 story and base, frame, \$4,000. Piedmont, Alameda Co., Cal. Architect, Olin S. Grove, 2911 Telegraph avenue, Oakland. Owner, Mrs. Rosiva Rose, Location, Manor Drive. Will contain eight rooms, bath and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors. Open fire places and tile or brick mantels. Tile bath. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

RESIDENCE — 1 story and base, frame, \$2,500. Oakland, Cal. Architect, none. Owner, G. W. Quinn, 758 9th avenue, S. F. Location, west 10th avenue north Bancroft. Will contain six rooms and bath. Interior finish pine and white enamel. Hardwood floors. Open fire place and tile mantel. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

RESIDENCE — 2 story and base, frame, Cost not stated. Berkeley, Alameda Co., Cal. Architect, Eugene K. Martin, 2192 Shattuck avenue, Berkeley. Owner, L. Berovich. Location, Cedar and Arch streets. Will contain eight rooms, bath and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors. Open fire places and tile mantels. Bath rooms tile. Automatic water heater. Exterior covered with cement plaster. Plans complete and figures being taken.

RESIDENCE — 2 story and base, frame, \$3,500. Oakland, Cal. Architect, none. Owner, B. A. Stewart, 8 Fairview avenue, Piedmont. Location, east Valle Vista. Will contain six rooms, bath and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors. Furnace heat and open fire places. Mantels tile and brick. Bath room tile. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

RESIDENCE — 2 story and base, frame, \$1,250. Oakland, Cal. Architect, none. Owner, H. M. Swalley, 710 Walker avenue, Oakland. Location, northwest corner Hudson and Arbor streets. Will contain seven rooms,

bath and sleeping porch. Interior finish pine, white enamel and hardwoods. Hardwood floors, furnace heat and open fire places. Mantels tile or brick. Bath rooms tile. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

RESIDENCE — 2 story and base, frame, \$3,000. Piedmont, Alameda Co., Cal. Architect, Sidney B. Newsom, Nevada Bank Bldg., S. F. Owner, R. B. Bain. Will contain ten rooms, three baths and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors. Open fire places and furnace heat. Mantels tile and brick. Automatic water heater. Baths tile. Exterior cement plaster. Plans complete and revised figures being taken.

RESIDENCE — 2 story and base, frame, \$3,000. Oakland, Cal. Architect, Hiram K. Lovell, Dalziel Bldg., Oakland. Owner, F. L. Wayne. Location, east Dana north Alcatraz. Will contain seven rooms, bath and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors. Open fire place and tile mantel. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

RESIDENCE — 1 story and base, frame, \$2,250. Berkeley, Alameda Co., Cal. Architect, none. Owner, C. J. Pfirang, 5487 Claremont avenue, Oakland. Location, east California north Derby. Will contain five rooms and bath. Interior finish pine throughout. Some hardwood floors. Open fire place and tile mantel. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

RESIDENCE — 1 story and base, frame, \$2,500. Berkeley, Alameda Co., Cal. Architect, none. Owner, H. C. Pfirang, 720 Forest street, Oakland. Location, north Derby west Grant. Will contain five rooms and bath. Interior finish pine. Hardwood floors, open fire place and automatic water heater. Exterior cement plaster. Plans complete and work by Day Labor.

RESIDENCE — 2 story and base, frame, \$4,000. Oakland, Cal. Architect, M. I. Diggs, 244 Bowditch, Berkeley. Owner, J. C. O'Connor. Location, east Carlton south Prospect. Will contain eight rooms, two baths and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors. Open fire places and furnace heat. Mantels tile and brick. Bath rooms tile. Automatic water heater.

Exterior cement plaster. Plans complete and work by Day Labor.

RESIDENCE — 2 story and base, frame, \$2,250. Piedmont, Alameda Co., Cal. Architect, none. Owner, W. J. Kerrigan, 5153 Shafter avenue, Oakland. Location 21 Pacific avenue. Will contain five rooms and bath. Interior finish pine, hardwood floors. Open fire place and tile mantel. Automatic water heater. Exterior covered with cement plaster. Plans complete and work by Day Labor.

RESIDENCE — 1 story and base, frame, \$2,500. Oakland, Cal. Architect, none. Owner, L. G. Pfirang, 5441 Shafter avenue, Oakland. Location, north 14th street west Shafter. Will contain five rooms and bath. Interior finish pine. Some hardwood floors, open fire place and tile mantel. Automatic water heater. Exterior covered with cement plaster. Plans complete and work by Day Labor.

RESIDENCE — 1 story and base, frame, \$2,500. Oakland, Cal. Architect, none. Owner, G. W. Baumann, 5360 Trask street, Oakland. Location, northeast corner Trask and Maris. Will contain seven rooms and bath. Interior finished in pine. Some hardwood floors, open fire place and tile mantel. Automatic water heater. Exterior cement plaster. Work by Day Labor.

RESIDENCE — 2 story and base, frame, \$3,000. Oakland, Cal. Architect, none. Owner, Paul Woodburn, 2965 Greenwood, Oakland. Location, east Broadway south Prospect. Will contain seven rooms and bath. Interior will be finished in pine and white enamel. Hardwood floors, open fire places and tile or brick mantels. Automatic water heater. Exterior covered with cement plaster. Plans complete and work by Day Labor.

APARTMENT HOUSE ALTERATION — 2 story, frame, \$2,000. Oakland, Cal. Architect, none. Owner, H. T. Sheriff, 1218 8th avenue, Oakland. Location, Athol avenue near Newton. Work will consist of altering two story frame dwelling into two-room apartments. Plans complete and work to be done by Day Labor.

FLATS AND STORE — 2 story and base, frame, \$5,000. Oakland, Cal. Architect, none. Owner, C. Welcher, 8412 East 14th street, Oakland. Location, northwest corner 96th avenue and East 14th street. Will contain stores and flats. Interior finish pine, open fire places and tile mantels. Automatic water heaters. Exterior covered with rustic. Plans complete and work by Day Labor.

**Wybro**

Reg. U. S. Pat. Office  
as good as they are  
The Panels that are  
famous.

**White Brothers**  
5th and Brannan Streets

**Wybro Panels combine Service & Quality with Price.**

It is not alone the "price" that counts in buying panels. The quality is of more than passing importance. WYBRO PANELS combine quality with service and price. Quality is first in Wybro Panels—the service they give is unsurpassed, and the price is just right—not high, nor low—but just the right price for the right panel.

200 varieties—price list free.

**White Brothers**

San Francisco

**HOSPITAL, DORMITORY AND DAY HALL**—2, 2 story. Class A construction. Cost not stated. Oakland, Cal. Architect, Charles Peter Weeks, Mutual Bank Bldg., S. F. Owners, Alameda County. W. T. Baker .....	2,700
Schneider-Shoefelt & Jones ..	2,740
J. Llewlyn .....	2,900
C. R. Sobig .....	3,260
Mayer Walk and John Metzger ..	3,450
Robert Swan .....	3,480
Elling A. Hansen .....	3,675
Fairwell & Nelson .....	3,860
Ferd F. Christ .....	3,988
Vincent J. Donovan .....	4,900

## SAN JOSE AND THE SANTA CLARA VALLEY

**BRIDGE**—Steel and concrete. Cost not stated. Santa Cruz, Santa Cruz Co., Cal. Engineer, County Surveyor, Santa Cruz. Owners, Santa Cruz County. Bids were opened for the furnishing of material and for the construction of the bridge over the Pajaro River at Chittenden, the cost of which is to be borne by Santa Cruz and San Benito counties. The following bids were received: The Midland Bridge Co., Kansas City, Mo., \$1,957 and \$1,379 for construction; Balston Iron Works, 20th and Indiana, S. F., \$5,170; Dyer Bros., 17th and Kansas, S. F., \$4,200; Clinton Bridge Works, Crocker Bldg., S. F., \$5,694; Security Construction Co., 38th and Alameda, Los Angeles, \$5,654. All bids were taken under advisement.

**STREET PAVING AND CULVERTS**—Cost not stated. San Mateo, San Mateo Co., Cal. Engineer, City Engineer, San Mateo. Owners, City of San Mateo. Bids will be opened on November 22 at 8 p. m. for grading, laying there in corrugated iron culverts, and paving with an asphaltic concrete wearing surface 1½ inches thick laid upon a hydraulic cement concrete base 4 inches thick, portions of El Camino Real between San Mateo Creek and the northwesterly limits.

**STREET PAVING**—Cost not stated. San Mateo, San Mateo Co., Cal. Engineer, City Engineer, San Mateo. Owners, City of San Mateo. At the last meeting of the City Trustees, steps were taken to pave the intersections of cross streets with the county road. The funds for the improvements has been provided and bids will soon be called for.

**STREET PAVING**—Cost not stated. San Mateo, San Mateo Co., Cal. Engineer, City Engineer, San Mateo. Owners, City of San Mateo. A majority voted in favor of the street paving additions 1, 2, 3 and 4 together with the Burlingame Grove Tract. The engineer has been directed to prepare the necessary plans and specifications for the work. Bids will be called on the completion of the plans.

**STREET IMPROVEMENTS**—Cost not stated. Daly City, San Mateo Co., Cal. Engineer, City Engineer, Daly City. Owners, Daly City. A resolution has been passed by the Board of Trustees declaring its intention to improve portions of Mission road, Melrose street, Myrtle street, Garden street, Colma street, Winter street, Ocean street, Knowles avenue, Theta Avenue, Vista avenue, Park avenue, north, Park avenue south, Lake avenue and Orange avenue.

**SCHOOL**—1 story and base, frame. Cost not stated. San Bruno, San Mateo Co., Cal. Architects, Edwards & Norberg, Bank Bldg., Burlingame. Owners, San Bruno School District. The building will contain four class rooms and an assembly hall. Interior finish pine with maple floors. Central heating system. Modern plumbing and electric work. Exterior cement plaster. Plans being prepared.

**STREET PAVING**—Cost not stated. Salinas, Monterey Co., Cal. Engineer, City Engineer, Salinas. Owners, City of Salinas. Plans are now being completed for the macadamizing of Sasual

street in Salinas. The street will be improved from Monterey to California street. Further information may be had from the City Engineer.

### Contracts Awarded.

**BRIDGE**—Concrete and timber, \$1,895. Hollister, San Benito Co., Cal. Engineer, County Surveyor, Hollister. Owners, San Benito County. Contractor, E. J. Spaulding, Hollister. Contract price, \$1,895.

**STREET PAVING**—Cost not stated. Morgan Hill, Santa Clara Co., Cal. Engineer, Town Engineer, Morgan Hill. Owners, Town of Morgan Hill. Contractors, Casley & Hamilton, San Jose. Contract price not stated.

**STREET PAVING AND SIDEWALKS**—Cost as follows. South San Francisco, San Mateo Co., Cal. Engineer, City Engineer, South San Francisco. Owners, City of South San Francisco. Contractors, P. R. Ritchie & Co., Chronicle Bldg., S. F., paving, \$8,074.12; sidewalks, \$7,883.15.

**RESIDENCE**—1 and 2 story and base, frame, \$39,000. Saratoga, Santa Clara Co., Cal. Architect, Carl Werner, Phelan Bldg., S. F. Owner, Bradford Webster. Contractor, John Rodoni, Saratoga. Contract price, \$30,000.

## MARIN, CONTRA COSTA AND SONOMA COUNTIES

**STREET IMPROVEMENTS**—Cost not stated. San Rafael, Marin Co., Cal. Engineer, City Engineer, San Rafael. Owners, City of San Rafael. At the last meeting of the City Trustees the matter of improving several streets was brought up. A resolution establishing the grade on Pine street was adopted. Specifications for street improvements were adopted as follows: Sixth street from B to H; D from San Rafael avenue to Wolfe avenue; San Rafael avenue from C to D; Clark street its full length from Ross to Greenwood avenue; C street from 3rd to Mahon Creek; G street from 5th to the railroad; Center street from H to J street; Pine from Center to Harcourt; Cijos street from 2nd to 4th; Toll road from 2nd street to the city limits. All of these streets are to be macadamized with an asphalt surfacing, except the town road, which is to have a concrete base, the same as the State highway, the concrete surface to be 20 feet wide with a 2-foot shoulder on either side. The asphalt surface on the macadamized streets is to be a thin coating which will cost about 1 cent per foot.

**BOULEVARD CONSTRUCTION**—Cost not stated. Martinez, Contra Costa Co., Cal. Engineer, County Surveyor R. R. Arnold, Martinez. Owners, Contra Costa County. Plans have been completed by County Surveyor R. R. Arnold for the construction of the new boulevard to Mount Diablo from the tunnel road in this city. The plans will be brought before the district boulevard commissioners and then go to the Board of Supervisors for approval.

**MAUSOLEUM**—1 story, reinforced concrete, \$300,000. Sunset View Cemetery, Contra Costa Co., Cal. Architect's name not given. Owners, Pacific Mausoleum Co., Union Savings Bank Bldg., Oakland. Will contain 1,000 crypts, 509 niches for urns and chapel. Con-

struction fireproof. Art glass, modern plumbing and electric work. Ornamental iron. Exterior faced with cement plaster. Plans complete and work to be carried on under Day Labor system by J. Flood Walker, 303 East 14th street, Santa Ana.

**FENCING**—Cost not stated. Fort Barry, Marin Co., Cal. Engineer, Constructing Quartermaster, Fort Mason. Owners, United States Government. Bids will be opened on November 26th for wire fencing at Fort Barry. Plans can be secured from the Constructing Quartermaster. An official proposal appears in another column of this issue.

**SCHOOL**—1 story and base. Class C \$10,000. Richmond, Contra Costa Co., Cal. Architects name not given. Owners, City of Richmond. Bids will be received up to November 20th for the construction of the first unit of the Pullman School. The complete building will cost in the neighborhood of \$40,000. Plans can be secured from the Clerk of the Board of Education.

**OFFICE**—1 story, frame, \$2,000. Santa Rosa, Sonoma Co., Cal. Architects, Turton & Herbert, Santa Rosa Bank Bldg., Santa Rosa. Owners, Commercial Club. Building has been designed for offices of the organization and meeting rooms. Interior finish pine. Central heating system from adjoining bank building. Exterior faced with cement plaster. Plans being prepared.

### Contracts Awarded.

**ROAD GRADING AND FILL**—\$3,995. San Rafael, Marin Co., Cal. Engineer, County Surveyor, San Rafael. Owners, Marin County. Contractors, P. F. Sciacci & H. Gisel, San Rafael. Contract price, \$3,995.

**STREET IMPROVEMENT**—Cost not stated. Sausalito, Marin Co., Cal. Engineer, Town Engineer, Sausalito. Owners, Town of Sausalito. Contractors, Carnahan & Mulford, 45 Kearny street, S. F. Contract price not stated.

### FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA

**BRIDGE**—Reinforced concrete, \$6,000. San Luis Obispo, San Luis Obispo Co., Cal. Engineer, County Surveyor, San Luis Obispo. Owners, San Luis Obispo County. In response to a petition presented, the County Supervisors have directed that a bridge be constructed at the Santa Maria crossing on the road leading from Nipomo to Santa Maria; also that the road be repaired where necessary at a cost not to exceed \$6,000. The work will be done by the county.

**BRIDGE AND CULVERTS**—Reinforced concrete. Cost not stated. Hanford, Kings Co., Cal. Engineer, County Surveyor, Hanford. Owners, Kings County. At the last session of the Board of Supervisors, plans and specifications for bridges and culverts on highway No. 1, divisions A and B, were accepted, and the County Clerk instructed to advertise for bids for their construction. This portion of the county improved highway is that running north and west from this city

to Hardwick, and north five miles from the fair ground road three miles west of this city. Further information may be had from the County Engineer at Hanford.

**BRIDGE**—Reinforced concrete. Cost not stated. Corcoran, Kings Co., Cal. Engineer, County Surveyor, Hanford. Owners, Kings County. The County Supervisors have authorized Supervisor McClellan to construct a bridge over the Tule River on what is known as Dairy avenue, running south of Corcoran.

**BRIDGES**—Reinforced concrete. Cost as follows. Visalia, Tulare Co., Cal. Engineer, County Surveyor, Visalia. Owners, Tulare County. Contracts were let for the construction of five bridges over Cross Creek on the Goshen-Traver division of the State Highway in Tulare County at the last meeting of the County Supervisors. The contracts were awarded to the following: Parlier Construction Co. bridge No. 1, \$1,512; bridge No. 3, \$3,355; bridge No. 5, \$3,385; Noble, Sullivan & Noble, bridge No. 2, \$2,072; Manning Bros., Fresno, bridge No. 4, \$2,270.

**ARCH**—Concrete, \$2,000. Fresno, Fresno Co., Cal. Architects, Glass & Butner, 3 Republican Bldg., Fresno, for the construction of the arch which will be erected at the southern entrance of Van Ness Boulevard. Bids will be called for in a few days. Further information may be had from the architects.

**HIGHWAY CONSTRUCTION**—Cost not stated. Bakersfield, Kern Co., Cal. Engineer, County Surveyor, Bakersfield. Owners, Kern County. Plans of the County Highway Commission for the construction of division 11, section 3 of the Caliente-Kernville highway were accepted by the Board of Supervisors and bids will be received until 10 o'clock a. m. December 9th. The plans of the commission for the highway of division 5, section 1-A, McKittick-Bakersfield road, were also accepted and bids will be received until December 9 at 10:30 a. m.

**IRRIGATION WORK**—Concrete drops. Modesto, Stanislaus Co., Cal. Engineer, Herrmann, Modesto. Owners, Modesto Irrigation District. Thurston & Co., Mechanics' Institute Bldg., S. F., presented the lowest figure for drops in lateral No. 3 at \$20,956.95 and will probably be awarded the contract.

**IRRIGATION WORK**—Cost not stated. Modesto, Stanislaus Co., Cal. Engineer, Herrmann, Modesto. Owners, Modesto Irrigation District. Chief Engineer P. C. Herrmann of the Modesto Irrigation District was authorized to draw plans and specifications for the Weldly fill on lateral No. 1, four miles east of Modesto, to take the place of a wooden flume now doing service, by the Board of Directors of the Modesto Irrigation District at a recent meeting. Authorization was also given for drawing plans for concrete headgates for laterals No. 4 and 5.

**RESIDENCE**—2 story and base, frame, \$5,000. Fresno, Fresno Co., Cal. Architect, none. Owner, H. H. Chorbajain, Fresno. Location, M street between Mono and Ventura. Will contain eight rooms, bath and sleeping porch. Interior finish pine and hardwood with white enamel. Hardwood floors, open fire places and tile mantels. Bath room

1. A full water closet. Exterior covered with cement plaster. Plans being prepared.

**RESIDENCE**—1 story and base, frame, \$2,000. Fresno, Fresno Co., Cal. Architect, none. Owner, C. L. Saylor, 1035 Green street, Fresno. Location, Fresno Heights. Will contain six rooms and bath. Interior finish pine. Some hardwood floors. Open fire place and tile mantel. Automatic water heater. Exterior cement and rustic. Plans complete and work by Day Labor.

**BRIDGE**—Reinforced concrete. Cost not stated. Bakersfield, Kern Co., Cal. Engineer, County Surveyor, Bakersfield. Owners, Kern County. At the last meeting of the supervisors bids were ordered advertised for a bridge on the Brundage Lane road over the central branch of Kern Island canal, to be opened on December 7th at 10 a. m.

**JAIL**—1 story, reinforced concrete. Cost not stated. Dinuba, Tulare Co., Cal. Architect, none. Owners, Town of Dinuba. A new three-cell building will be constructed in Dinuba. The county will pay half the cost of the proposed building. Further information may be had from the City Clerk at Dinuba.

**IRRIGATION WORK**—Cost not stated. Turlock, Stanislaus Co., Cal. Engineer's name not given. Owners, Turlock Irrigation District. At the last meeting of the directors of the Turlock Irrigation District the following improvements to the district were considered. The extension of lateral 8 and the construction of a new side gate in the Ceres main, at the head of the Yeiser ditch.

**SCHOOL ADDITION AND OUT BUILDINGS**—Frame. Cost not stated. Munich School District, Merced Co., Cal. Architects, Cowell & Bedeser, Merced. Owners, Munich School District. Bids will be opened on November 26th for constructing an addition to the present building and building out buildings. Plans can be secured from the architects.

**SCHOOL**—1 story and base, reinforced concrete, \$40,000. Kingsburg, Fresno Co., Cal. Architects, Johnson Bros., Kingsburg. Owners, Kingsburg School District. Bids will be called for at once by the Trustees of Kingsburg Union High School District for the construction of a school building for which bonds have already been sold.

**OFFICES**—1 story and base, Class C construction, \$10,000. Oakdale, Stanislaus Co., Cal. Architects, Stone & Wright, San Joaquin Bldg., Stockton. Owners, Oakdale Irrigation District. Revised plans are now being prepared for this building. Figures taken some time ago all ran too high and revision of the plans was necessary. Further mention will be made of the work when new bids are called for.

### Contracts Awarded

**IRRIGATION CANAL WORK**—Cost not stated. Oakdale, Stanislaus Co., Cal. Engineer's name not given. Owners, Oakdale Irrigation District. Contractor, Edward O'Malley, 150 Jesse street, S. F. Contract taken on percentage basis.

**HIGHWAY CONSTRUCTION**—\$13,-164.51. Bakersfield, Kern Co., Cal. Engineer, County Surveyor, Bakersfield, Owners, Kern County. Contractor, Robert Shearer, Pacific Electric Bldg., L. A. Contract price, \$13,164.51.

**BRIDGE**—Reinforced concrete, \$4,725. Merced, Merced Co., Cal. Engineer, County Surveyor A. E. Cowell, Merced. Owners, Merced County. Contractors, Angle & Bibler, Dos Palos. Contract price, \$4,725.

**PASSENGER STATION**—1 and 2 story reinforced concrete, \$13,000. Visalia, Tulare Co., Cal. Architect, Engineer Department Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. Contractor, E. E. Ether-ton, Monadnock Bldg., S. F. Contract price, \$13,000.

**SCHOOL**—1 story, brick, \$8,000. Goshen, Tulare Co., Cal. Architect, Ernest J. Kump, Rowell Bldg., Fresno. Owners, Goshen School District. Contractor, Charles D. Sturtevant, Fresno. Contract price, \$8,000.

**STREET PAVING**—Cost not stated. Lindsay, Tulare Co., Cal. Engineer, City Engineer, Lindsay. Owners, City of Lindsay. Contractors, Worswick Street Paving Co., Union National Bank Bldg., Fresno. Contract for five blocks. Cost not stated.

**ROAD CONSTRUCTION**—Cost not stated. Bakersfield, Kern Co., Cal. Engineer, County Surveyor, Bakersfield. Owners, Kern County. Contractors, Clark-Henery Co., Ochser Bldg., Sacramento. Contract price not stated.

## SACRAMENTO, STOCKTON AND NORTHERN CALIFORNIA

**HOSPITAL STORAGE BARN**—Frame \$4,447.70. Stockton, San Joaquin Co., Cal. Architect, State Architect George H. McDougall, Sacramento. Owners, State of California. E. W. Book of Stockton submitted the lowest bid at \$4,447.70 for the construction of a hay storage and feed barn at Stockton. A complete list of the bids will be found under the heading of Sacramento, Stockton and Northern California.

**LIBRARY**—2 story and base. Class A construction, \$90,000. Sacramento, Cal. Architect, Loring P. Rixford, Sharon Bldg., S. F. Owners, City of Sacramento. Architect Rixford's plans have been approved in competition with 56 other sets of plans for the new library building. A complete description of the building and competition will be found under the heading of Sacramento and Northern California in this issue.

**BRIDGE CONSTRUCTION**—Steel and concrete. Cost not stated. Chico, Butte Co., Cal. Engineer, County Surveyor, Chico. Owners, Butte County. To prevent any overflow of water over the holdings of the Leland Stanford University, arrangements have been made to lengthen the new bridge forty feet that will span Butte Creek on the State Highway. The bridge will be 340 feet in length, entirely of steel and concrete construction. Further mention of this work will be made.

**BRIDGE CONSTRUCTION**—Cost not stated. Sacramento, Cal. Engineer's name not given. Owners, Yolo County. Jesse Poundstone, superintendent of

Reclamation District 108, met with Yolo representatives and the State Reclamation Board in Sacramento and arranged for the building of a bridge across Sycamore Slough in Yolo County. The Reclamation Board has formally granted permission to the Yolo Supervisors to drive piling for the strengthening of the old bridge, but later it was made known that the county favored a new bridge, and as a result of this understanding the Reclamation Board rescinded its former action permitting the repair of the old bridge. The new bridge will permit the passage of dredgers. The site of the proposed new structure is but a short distance from the old bridge. The right-of-way connecting it with the county road will be furnished by the reclamation district.

**CULVERT**—Reinforced concrete. Cost not stated. Auburn, Placer Co., Cal. Engineer, County Surveyor, Auburn. Owners, Placer County. Supervisor Geisendorfer has been given authority to construct a concrete culvert over a creek crossing the Colfax and Forest Hill road by the Board of Supervisors.

**BRIDGES**—Reinforced concrete. Cost not stated. Red Bluff, Tehama Co., Cal. Engineer, County Surveyor Lunning, Red Bluff. Owners, Tehama County. At the last meeting of the County Supervisors the matter of building two bridges at Los Molinas was brought before the Board. After consideration the Board ordered County Surveyor Lunning to prepare plans and estimates for the proposed structure. Further information will be given when the plans are complete.

**BRIDGE REMOVAL**—Cost not stated. Marysville, Yuba Co., Cal. Engineer, County Surveyor L. B. Cook, Marysville. Owners, Yuba County. County Surveyor L. B. Cook has plans prepared for the removal of the old D street bridge, and the Clerk of the Supervisors has been instructed to advertise for bids on the work. The work has been advertised under two plans. The first plan is that the contract shall be to take down the old bridge and transport it to the county hospital grounds, where it can be used by the county for repairing the other bridges in the county. The other plan is to sell it entirely to the highest bidder, who will be allowed to use the material in the old bridge as he sees fit.

**BRIDGE**—Reinforced concrete, \$2,600. Sacramento, Cal. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Recommendation has been made by the City Board of Park Directors that all bids for the construction of the concrete bridge in Del Paso Park be rejected. This was done at the request of Director Frank Atkinson, who said he believed a lower bid could be received. H. W. Terrell was the lowest bidder. His bid was \$2,550 on the City Engineer's plan, and \$4,000 on the plan of Jenkins & Wells. The Engineer's estimate was \$2,300. Terrell outbid Jenkins & Wells on their own plans, but Atkinson told the Board he believed the bid could be bettered.

**SEWER CONSTRUCTION**—\$32,843.75. Stockton, San Joaquin Co., Cal. Engineer, City Engineer, Stockton. Own-

ers, City of Stockton. The lowest bid received for sewer construction covered by resolution No. 524 was submitted by William F. Edwards at \$27,467.24. The engineer's estimate on the work was \$32,843.75. Bids were taken under advisement.

**CULVERT WORK**—Cost not stated. Oroville, Butte Co., Cal. Engineer, County Surveyor, Oroville. Owners, Butte County. The County Supervisors at a recent session authorized the construction of a culvert at Camino on the Oroville-Chico road, and to have pipe installed near Crum's ranch on the same road. The installation of a culvert was also authorized upon the Oroville-Forbestown road at the McKee place.

**STREET PAVING**—Cost not stated. Willows, Glenn Co., Cal. Engineer, Town Engineer, Willows. Owners, Town of Willows. The Town of Willows will shortly call for bids to complete the paving of the State highway through Willows, eight blocks, four on either end of the street. The eight blocks within the city limits, according to the town board, need only be paved according to State highway specifications.

**ROAD IMPROVEMENT**—Cost not stated. Oroville, Butte Co., Cal. Engineer, County Surveyor, Oroville. Owners, Butte County. The Board of Supervisors has decided to readvertise for bids in connection with contemplated repairs on the county road leading from Chico to the Gianella bridge. Bids were to have been opened Saturday, November 6th, but the Board decided to postpone action until November 20th. The work calls for graveling and grading a portion of the road in the overflow section along the river.

**STORAGE DAM**—Concrete. Cost not stated. Eureka, Humboldt Co., Cal. Engineer, E. J. Burke, Eureka. Owners, Cottage Gardens Nurseries Co. Contractors, Elsemore & Jacobs, 431 G street, Eureka. Contract price not stated. Stanfort & Lax, Eureka, tool house and machine room. Cost not stated.

**RESIDENCE**—1 story and base, frame, \$2,500. Sacramento, Cal. Architect, none. Owner, D. McKay, 3029 E street, Sacramento. Location, 3105 E street. Will contain six rooms and bath. Interior finish pine. Some hardwood floors. Open fire place and tile mantel. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work by Day Labor.

**PURIFIER**—\$6,000. Marysville, Yuba Co., Cal. Engineer, Engineering Dept. Pacific Gas and Electric Co., S. F. Owners, Pacific Gas and Electric Co. The Pacific Gas and Electric Co., with a view of bettering its local service, has under way the construction of a new purifier at its plant on 4th street, near the levee.

**SCHOOL LIGHTING FIXTURES**—Cost not stated. Roseville, Placer Co., Cal. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Roseville School District. Bids will be received up to November 20th for furnishing and installing electric fixtures in the new school building.

**SANITARY SEWERS**—\$27,467.24. Stockton, San Joaquin Co., Cal. Engi-

neer, City Engineer, Stockton. Owners, City of Stockton. Contractor, William F. Edwards, 675 31st street, Oakland. Contract price, \$27,167.24.

#### Contracts Awarded

**STREET IMPROVEMENT**—Cost not stated. Sacramento, Cal. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Contractors, Clark & Henery Construction Co., Ochsner Bldg., Sacramento. Contract price not stated.

**STREET PAVING**—Cost as follows. Woodland, Yolo Co., Cal. Engineer, City Engineer, Woodland. Owners, City of Woodland. Contractors, Clark & Henery Construction Co., Ochsner Bldg., Sacramento. Contract price, 1 1/4c per square foot and 12 1/2c per square foot.

**SEWER CONSTRUCTION**—\$2,823.57. Sonora, Tuolumne Co., Cal. Engineer, Town Engineer, Sonora. Owners, Town of Sonora. Contractor, W. J. Tobin, 735 Filbert street, Oakland. Contract price, \$2,823.57.

## Bids For State Job At Stockton.

## LOS ANGELES AND SOUTHERN CALIFORNIA

#### STATE HIGHWAY CONSTRUCTION

—Cost not stated. El Centro, Imperial Co., Cal. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Bids will be opened on December 6th for constructing Portland cement concrete highway, approximately 12 miles in length, from Dixieland to El Centro. Plans can be secured from the branch offices of the Commission in San Francisco and Los Angeles. An official proposal appears in another column of this issue.

#### IRRIGATION GATES AND BRIDGES

—Cost not stated. Santa Ana, Orange Co., Cal. Engineer, H. Clay Kellogg, Santa Ana. Owners, Newberg Protec-

tion District. Chief Engineer H. Clay Kellogg has been instructed by the directors of the Newberg Protection District to prepare plans for gates and bridges in accordance with the district's recent agreement with the Wilows Land Company's and at Ilce's Point. Further mention will be made of this work when plans are complete.

**RESIDENCE**—2 story and base, frame and brick. Cost not stated. Beverly, Los Angeles Co., Cal. Architect, W. J. Dodd, Marsh-Strong Bldg., 12 A. Owner, Roland Bishop, Contractors, Barkeley & Gould, 1017 East 21st street, L. A. Contract price not stated. Dwelling will contain 16 rooms and 6 baths.

**BRIDGES**—4, reinforced concrete, \$50,000 to \$60,000. Santa Barbara, Santa Barbara Co., Cal. Engineers, Mayberry & Parker, Pacific Electric Bldg., L. A., associated with Fred Johnston, Santa Barbara. Owners, Santa Barbara County. The engineers have been commissioned to prepare plans for four reinforced concrete bridges to be constructed on the State highway in Santa Barbara County.

**CULVERT**—Reinforced concrete. Cost not stated. Ventura, Ventura Co., Cal. Engineer, County Surveyor, Ventura. Owners, Ventura County. Bids will be received by the Board of Supervisors up to 11 a. m. of November 22, 1915, for the construction of the Gardner culvert on Telephone road, about 1 1/2 miles west of Saticoy. The approximate quantities are as follows: 46 yards of class B concrete, 3,700 lbs of reinforcing steel, 62 ft of corrugated iron pipe, 50 ft of guard fence, 135 yds of earth fill.

**MAUSOLEUM**—1 story. Class A construction. Cost not stated. Monrovia, Los Angeles Co., Cal. Architect's name not given. Owners, Monrovia Mausoleum Co., represented by T. W. Dryden, Story Bldg., L. A. Will contain 200 crypts, urns and chapel. Interior finish marble. Modern plumbing and electric work. Exterior faced with cement plaster. Plans complete and figures being taken.

**MAUSOLEUM**—1 story. Class A construction, \$50,000. Whittier, Los Angeles Co., Cal. Architect, J. J. Frauenfelder, Story Bldg., L. A. Owners, Whittier Heights Cemetery Association. Will contain 200 crypts, urns and chapel. Interior finish marble. Plumbing, electric work and art glass. Exterior faced with cement plaster. Work to be done by Day Labor under the direction of Frank B. Gibson, Story Bldg., L. A.

**WAREHOUSE**—1 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architect, Albert C. Martin, Higgins Bldg., L. A. Owner, J. C. Hills, Pasadena. Location, Alpine and San Fernando streets, covering an area of 100 by 100 feet. Fireproof construction, reinforced concrete walls, floors and roof slabs. Hollow tile interior partitions, metal window sash and frames. Two elevators, automatic sprinkler system. Exterior faced with cement plaster. Plans being prepared.

**ORPHANS HOME GROUP**—1 and 2 story, reinforced concrete, \$75,000. Covina, Los Angeles Co., Cal. Architect, John F. Blee, Union League Bldg., L. A. Owners, Masonic Orphans' Home. The

### PORTLAND AND OREGON

**ROAD CONSTRUCTION AND REPAIR**—\$58,221. **Portland, Ore.** Engineer, Roadmaster Yeon, Portland. Owners, Multnomah County. For maintenance and new construction work, Roadmaster Yeon estimates \$58,221 will be necessary in 1916. Provision is made for \$73,561 for the Columbia Highway and \$231,000 for new construction work in various other parts of the county. Among the items included are the following: St. Helens road, regrade 3 miles, \$35,000; Germantown road, grade, macadam, \$15,000; Capital highway, half mile, paving, \$10,000; Base Line, road extension, \$50,000; eliminating grade crossings, \$15,000; Sky Line, macadam, \$20,000; Sky Line, 3 miles, \$10,000; Fairmount Boulevard, macadam, 3 miles, \$26,000; regrade ditches and shoulders, \$8,000; St. Helens road, widen two feet, \$2,000; Freyman avenue, grading, \$15,000; signboards, \$2,000; Sandy Road, relocate and grade, \$10,000; Sandy cut-off grade, \$10,000. Petitions for other improvements were not included. The largest improvement asked for is the Columbia Boulevard extending from St. Johns, the cost of which is estimated at \$18,000 per mile, a total of \$162,000; hard surface Fairview road, 4 miles, \$45,000; paving East 82nd street extension, 5 miles, \$80,000; total, \$241,000.

**LABOR TEMPLE**—3 story and base. **Class A construction, \$100,000. Portland, Ore.** Architects, Houghtaling & Dongan, Henry Bldg., Portland. Owners, Labor Temple Association. Location Stout and Morrison and Washington streets, covering an area of 11,200 square feet. Will contain offices, meeting rooms and social rooms. Interior finish pine. Steam heat and hot water system. Exterior faced with pressed brick and terra cotta. Plans being prepared.

**HOSPITAL**—4 story and base. **Class A construction, \$100,000. Portland, Ore.** Architect not selected. Owners, Multnomah County. The County Commission will appropriate \$400,000 in the

1916 budget for the erection of a county hospital building. A structure to cost \$100,000 has been discussed and plans for such a structure were prepared by Bridges & Webber, local architects, several years ago. The present building is inadequate and a fire trap, according to reports of physicians of the county.

### SEATTLE AND WASHINGTON

**APARTMENT HOUSE**—5 and 6 story and base, brick and steel, \$75,000. **Seattle, Wash.** Architect, Louis Baeder, White Bldg., Seattle. Owner, Ernest Carstens. Location, southwest corner Boren avenue and Pine street, covering an area of 53 by 120 feet. Will contain 57 apartments of two, three and four rooms. Interior finish pine and hardwood with some hardwood floors. Steam heat, oil burning system, vacuum cleaning, hot water supply and automatic elevator. Bath rooms tile. Wall beds. Exterior faced with pressed brick. Plans complete and figures to be taken at once.

**COLLEGE BUILDING**—4 story and base. **Class A construction, \$143,254. Seattle, Wash.** Architects, Charles Bebb and Carl Gould, Denny Bldg., Seattle. Owners, State of Washington. Contractors, Finne & Garde, Northern Bank Bldg., Seattle. Contract price, \$143,254. Contract covers the general construction of the Home Economics Building.

#### Contracts Awarded

**STORES AND OFFICE**—1 and 2 story brick, hollow tile and concrete, \$50,000. **Seattle, Wash.** Architects, Charles Bebb & Carl Gould, Denny Bldg., Seattle. Owners, Puget Mill Co. Contractors, Butler Contracting Co., Central Bank Bldg., Seattle. Contract price, \$50,000.

### CHINA PLANS INDUSTRIAL PROGRESS.

[London and China Telegraph, Oct. 18.]

The Chinese Ministry of Agriculture and Commerce has decided to include an additional sum of \$15,000,000 in the budget estimates for the next year for the purpose of pushing the development of industrial and commercial undertakings. This sum is proposed to be apportioned as follows: (1) The establishment and equipment of a model industrial factory, \$6,000,000; (2) the establishment of various kinds of working depots for experimental purposes, \$1,000,000; (3) subsidies and rewards for the encouragement of industrial and commercial enterprises, mining operations, fishery, and cattle-breeding business, \$4,000,000; (4) initial expenses for the improvement of agricultural methods, \$5,000,000; (5) initial expenses for the improvement of products for export, \$500,000; (6) provision of funds for the training of experts in various branches of the industrial business. [These amounts represent silver currency, or about one-half the equivalent of United States gold.]

A Chinese merchant named Chow Wen-ching has petitioned the Ministry of Agriculture and Commerce for permission to establish a sugar refinery in Peking, to be conducted on foreign lines. It is said that the petition has been granted, and that the work of building will commence immediately.—Commerce Reports.

**FLOOR FURNACE STYLE B**  
Size 14½ in. square by 2 ft. high  
Has 8-in. Fresh Air Intake with Damper.  
Has 3-in. Outlet Vent  
Fits in space between floor joists  
Hangs from Register which lays flush with floor.

#### Style

- Floor Furnace with fresh air intake on side. For use in buildings having sufficient fresh air circulation under same. For artificial gas only.
- Floor Furnace with fresh air intake at bottom. For use in buildings where it is desirable to obtain air directly from outside of cellar or basement. For artificial gas only.  
NOTE—Style A and B are built alike except for position of fresh air intake.
- Wall Furnace with fresh air intake at bottom. For artificial gas only.
- Wall Furnace with fresh air intake at back. For artificial gas only.  
NOTE—Style C and D are built alike except for position of fresh air intake.

Prices and Information on Natural Gas Furnaces Furnished on Application.

## Unit Plant Hot Blast Furnace

### Delivers the Heat

#### A Complete Answer to the Heating Question.

- Instantaneous**—Furnishes an instantaneous and continuous supply of
- Sanitary**—fresh warm air free from gas fumes, odors, smoke or dust.
- Hygienic**—Maintains an even temperature necessary to health and comfort.
- Scientific**—Built like a real hot air furnace reduced in size.
- Convenient**—Operated from inside of room, saving many steps to cellar.
- Simple**—Any child 10 years of age can operate, turn the key and apply match.
- Economical**—Wall furnace burns 10 cubic feet and floor furnace 20 cubic feet of gas per hour.
- Efficient**—Each furnace will heat from 2 to 5 rooms or from 3,000 to 9,000 cubic feet of space.
- Fireproof**—Has four thicknesses of metal and three air spaces of one inch each between fire and wood; fire is 20 inches from floor.
- Up to Date**—Uses exclusively the Johnson Hot Blast Burner, recognized as the most efficient ever constructed.
- Durable**—Is made from best grade of metal to be obtained.
- Finish**—Register electro plated Flemish Brass. The finish that lasts.
- Installation**—Can be installed by any gas appliance dealer, plumber, tinsmith or hardware merchant at nominal cost.
- Retail Prices**—Wall Furnace, any style, \$22.50  
Floor Furnace, any style, 30.00  
Installations and fittings extra.

#### WALL FURNACE STYLE C

Size of Wall Furnace front is 17x19 inches, with a recessed portion of 14x17 inches between studding. Recessed portion has a 2-inch vent opening at top and a fresh air intake 3x12 inches at bottom operated with damper in front. Both vent and fresh air intake pipes go between studding.

## The Status Of Chinese Railways.\*

By Charles Davis Jameson, M. AM. Soc. C. E., Supervising Engineer and Architect to the Imperial Chinese Board of Foreign Affairs  
(Wai Wu Pu), Peking, China.

A short account of railway history in China is necessary to an understanding of the present status of Chinese railways.

The first definite plan for a railway in China was a petition by the foreign merchants in Shanghai, mostly English and Americans, dated July 20, 1863, to the then Governor of the Province of Kiangsu, H. E. Li Hung Chang, asking for the sole right to build and operate a railway from Shanghai on the sea to Soochow, the capital of the Province, sixty miles due west. The petition was not granted, Li maintaining that railways to be beneficial to China must be owned and operated by Chinese. Not until many years later was China prepared for the reception of foreign ideas. In 1864, Sir McDonald Stephenson, an eminent British engineer, arrived in China, on his own initiative, to impress the advantages of railways on China. He located on paper an ideal railway system for China as a new and undeveloped country. Knowing but little of China or its peoples, he did not realize that China was old, densely populated, with well defined trade routes, and that no expert was necessary to locate main trunk lines. They were obvious to even a casual student of China's trade and geography. Sir McDonald Stephenson's scheme was received with thanks and all courtesy by the Chinese Government, pigeonholed, and never discontinued.

The next scheme was the Woosung Railway, from Shanghai on the Huangpu River to Woosung at its mouth, a distance of twelve miles. To circumvent the Chinese objections, the right of way was purchased by Jardine Matheson and Company on which to build an ordinary road. The embankment was built, and in January, 1876, rails and rolling stock for a narrow-gauge, light railway arrived in Shanghai and on June 30, the road was opened for traffic for a distance of five miles. Only July 1 everyone was invited to travel free for two days. All went well. The people were delighted and traffic was beyond expectation, but the Chinese authorities wanted no foreign railway. On August 3, a coolie, evidently bent on suicide, was run over and killed and the running of trains was stopped. Eventually the Chinese

Government bought the railway, payment to be made in three semi-annual payments. On December 1, 1876, the road was opened again and operated the entire distance to Woosung until the last payment was made. Then the Chinese took possession, demolished the road, shipped rails and rolling stock to Formosa, where they rusted away on the beach, and erected a small temple to the Queen of Heaven upon the site of the Shanghai Railway Station.

During 1887 to 1893 there was constructed on the Island of Formosa, then a part of China, some sixty miles of metre-gauge railway, by the Chinese. The alignment and grades were such as to prohibit economical loads and speed, and the construction was of inferior quality. At this point the work was stopped by orders from Peking, and the railway gradually went to pieces until the taking over of Formosa by the Japanese in 1896.

### The Kaiping Railway.

Li Hung Chang became Viceroy of Chihli about 1870; soon afterwards there was organized the China Merchant Steam Navigation Company, with a fleet of coast steamers, Chinese capital and under Chinese management. The officers of the steamers were British. Much coal was needed and only Japanese coal was available. China's vast coal deposits were mined only by Chinese methods, with a small output, and none were available for the supply of ocean steamers. This led to the formation in 1875, of the Chinese Engineering and Mining Company and to the opening and operating of the Kaiping coal fields by foreign methods with Chinese capital and management. This deposit lies near Tangshan, about half way between Shanhai Kwan and Taku at the mouth of the Pei River leading to Tientsin, the port of Peking. These two companies were organized and managed by Tong King Sing with the support of His Excellency Li Hung Chang, Viceroy. To Mr. Tong, however, should be given full credit for originating and carrying to completion this advanced policy, which ultimately gave China a railway system.

The Kaiping coal mines at Tangshan were twenty-nine miles from the nearest point of delivery on the sea, and railways were proposed, sanctioned by the Throne, and C. W. Kinder, M. I. C. E., K. M. G., etc., was appointed engineer. The Imperial Sanction was re-

voked, and a canal to connect with the Peking River was decided upon. This canal could not reach the mines by seven miles, and a tramway with mule power was constructed. Thanks to the insistence of Mr. Kinder, the gauge was 4 feet 8½ inches, the standard gauge, thus saving China from the curse and expense of the metre gauge. The tramway and canal were finished in 1881. Still fighting for steam motive-power, Mr. Kinder began to build a locomotive from scraps, the boiler and cylinders from a portable winding engine, wheels bought as old iron, and the frame from channel iron borrowed from the mining company. The cost of construction was £75. By persistence and the influence of His Excellency Li, permission was granted to finish the "monster," and on June 9, 1881, the one hundredth anniversary of the birth of George Stephenson, this locomotive was christened the "Rocket of China" and at once put to daily use; opposition ceased, and the next year two shunting engines were purchased.

Thus was inaugurated China's railway system. In 1887 the railway was completed from Tangshan, via Tongku, to Tientsin; in 1894, from Tangshan to Shanhai Kwan, and in 1897, from Tientsin to Peking. The Government of China had, by 1898, realized two points regarding the introduction of railways: First, the absolute necessity of railways, and, second, the impossibility of procuring Chinese capital for the building of railways. The Chinese would not subscribe because of lack of confidence in the Chinese Government, much of this feeling being due to experience.

The Chinese Government still stood fast that foreigners should own no railways in China and that the main trunk lines, at least, should belong to the central government. The result was "The Railway Concessions."

The concessions granted to Russia in Manchuria, to the Germans in Shantung and to the French in southwest China are on a different basis from the many concessions granted to syndicates proper, principally, because to the Russian, German and French, the railway was not the end desired, but merely a means to the end, and that end colonization.

The terms of the ordinary concession were more or less as follows. China granted to the syndicate as a contractor, the right to build a definite rail-

\*Paper presented at the International Engineering Congress, San Francisco, September, 1915.

Then was seen the difference between the methods of the continental and the Anglo-Saxon. They were all there with any amount of good money behind them. The English and American would not sign until every detail of the agreement was satisfactory. The Belgian or French would sign almost any agreement that gave them the absolute right to the work and then

All the railways of China, with the exception of a few short lines usually for some special purpose, are government owned and government run. They are all under the Ministry of Communication (Chao Tung Pu) located in Peking. On all the railways having a foreign indebtedness, certain positions are filled by foreigners (chief engineer, resident engineers, chief accountant, traffic manager, chief of the mechanical department, etc.), with necessary foreign assistants. The nationality of these foreign employees, in every case, follows the nationality of the syndicate furnishing the capital, except in subordinate positions. From this, one can see the small opportunities there are in China for Americans in railway employment. American participation in the construction of Chinese railways has been, to say the least, unfortunate, and, of course, the non-participation of Americans in this work has

The following list shows the more important lines for which agreements have been made:

#### PRELIMINARY DRAINAGE WORK IS BEING DONE.

Engineer Don J. Zumwalt, who has a crew of surveyors at work on Klamath marsh, in the northern part of Klamath County, Oreg., has stated the preliminary work in the drainage of the marsh is progressing nicely. The work is being done under supervision of the Klamath Drainage District, and is for the purpose of determining how much of the land actually can be drained and what the cost will be.

The Klamath Drainage District, composed of forty owners of Klamath marsh land, expects soon to issue bonds for the work of reclamation.

#### SOUTHERN SIERRAS CO. GETS A BIG CONTRACT.

The Southern Sierras Power Company has secured a contract to furnish 2,000 horsepower to the big new cement plant of the Southwestern Portland Cement Company at Victorville for a period of 20 years.

The daily capacity of the new plant being constructed at Victorville will be 2,000 barrels. The plant is located one mile west of Victorville, near the Mojave River. The raw material is quarried six miles north of Victorville, transported over their own standard gauge line, and connected with the main line of the Santa Fe system at

their plant location. Their deposit of raw material is considered one of the best in the world, with an almost unlimited quantity. L. D. Gilbert, chief engineer of the Southwestern Portland Cement Company, designed the plant, which is to be the most modern of its kind in existence.

The Southwestern Portland Cement Company plant is about four miles south of the Golden State Portland Cement Company of Oro Grande, which is also operated by electricity furnished by the Southern Sierras Power Company with a connected load of 1500 horse power.

#### NORTHERN COUNTIES HOWL FOR HIGHWAYS.

The State Highway Commission is in a quandary. Counties in all parts of the State are clamoring for roads and the commission has no funds to build them. The \$18,000,000 bond issue is completely played out—that is the portion that has not been expended is appropriated for roads which the surveys have been made for, and bids called for. For the most part, the money has been used for the trunk line system from the Oregon line down through the State. A small portion has been spent for main laterals.

Representatives of five northern counties are gnashing their teeth and clamoring they did not get a square deal from the Highway Commission. They say they supported the \$18,000,000 issue and didn't get their share of highways even though they offered to buy bonds.

Another bond issue of \$15,000,000 will be on the ballot next year and if the people turn it down State highway work will just about be halted.

#### RAILROAD GETS LAND.

A section of land comprising a total of eighty-nine town lots, through the center of the town of Blythe, has been granted to the California Southern Railroad for its tracks and depot, according to an announcement from that place. The right of way is along Commercial street for a distance of about a quarter of a mile and is granted with the understanding that the railroad will erect a substantial depot and rush to completion the remainder of its line between Blythe and Blythe Junction in the Palo Verde Valley.

Blythe is the only town in the valley and is the trading center of a large agricultural district. It has at present a population of about 700, together with stores, a bank and two cotton gins. The near approach of the railroad is said to have created a considerable demand for lots in the town.

#### REPORT OF MAGNESITE.

The annual statement of the United States Geological Survey on the production of magnesite in 1914, now available for distribution, shows an increase over 1913 of 17 per cent, 17,293 short tons of crude magnesite, valued at \$74,422, having been produced or sold and treated in the United States during the year.

## Drafting Department of the City of Los Angeles.\*

By J. R. Prince, Chief Draftsman.

The area of the city prior to May 22, 1915, was 107.62 square miles. This has now been more than doubled by the recent annexation of San Fernando Addition containing 169.89 square miles; Palms Addition containing 7.3 square miles and Baidstowm Addition containing 3.1 square miles. These last areas are approximate only, but are as near as can be figured from the data now available. The total area of the city is therefore 288.21 square miles.

The greatest length from north to south on a straight line is 44 miles; the greatest breadth from east to west is 29 miles. The length of the boundary line is approximately 212 miles. Comparing the above area with that of New York City: the U. S. Census Bureau gives the land area of New York City as 286 square miles. Deducting 1.16 square miles, the approximate water area of Los Angeles harbor between the pierhead lines (the area of the outer harbor not being included) from the total area of 288.21 square miles gives a land area of 286.75 square miles, which is a little more than that of New York City. The population of this enormous area according to the Los Angeles Directory Company is only 529,000, while that of New York City is five and a quarter millions.

### District Maps.

A special effort has been made during the year to complete the district maps on a 100 foot scale of all the city prior to the recent annexations.

Twenty-eight maps have been completed and traced, five of which lie in the Wilmington and San Pedro districts. Five others are in course of preparation and will be completed in the near future. We, therefore, now have 100 foot scale maps of practically all of the city prior to the annexations of this year.

### Opening and Widening Streets, Parks, Etc.

There has been a falling off in orders for the opening and widening of streets, acquisitions of land for park and library purposes over the last few years.

Orders pending prior to July 1, 1914 62  
New proceedings taken up during the year ..... 29  
Final decrees entered ..... 22  
Total proceedings now pending in different stages of completion... 69

Among the more important proceedings for the opening and widening of streets may be cited Long Beach avenue from 20th street to Slauson avenue, a distance of about two miles. An attempt was first made for this opening in 1910, but was abandoned on account of protests. This proceeding has now progressed to the stage of the delivery of the condemnation maps to the City Attorney.

Surveys and maps have been prepared for the extension of Canyon Drive through Brush Canyon, and for

a winding scenic road over the estate of J. S. Spires (deceased), connecting with the roads in Griffith Park. It is hoped that all the land required will be obtained by deed without resort to condemnation.

Surveys and maps have been prepared of the present traveled road known as Los Feliz Road from a point about 1800 feet north of the Old Patent Boundary to Ivanhoe, a distance of about one mile. This old road has been traveled for many years, but no complete dedication has been made. This matter was taken up by the county and road papers were filed on March 17, 1895, for the purpose of securing a road forty feet in width, but was never completed. Preliminary steps have also been taken to extend Alessandro street from its intersection with this old road to San Fernando road; this however will require a bridge over the Los Angeles River. This road is much needed and should be secured in the near future.

Surveys and preliminary locations have been made for a boulevard from the intersection of the west city boundary with the first street south of 257th street, known as Wilmington road at Harbor City, to a point in the Wilmington and San Pedro road, approximately 1000 feet southerly of the intersection of Vermont avenue and West First street, Wilmington. This will give an important new highway between Wilmington, San Pedro and Redondo. A suggestion has also been made to connect the same with West Seventh street, Wilmington, thereby opening up a new main road to Long Beach. The total length of the first location is about 2.6 miles. The land required will all probably be obtained without resort to condemnation.

Proceedings were instituted for the acquisition of land for public park purposes in the Short Line Villa Tract at Sierra Vista, under an order of the City Council, dated April 15, 1912. The ordinance of intention describing the land proposed to be condemned was prepared and presented to the City Council, who duly adopted the same, but never became effective.

An order was also received for the condemnation of land proposed to be acquired for public park and playground purposes, known as Gissell and Verdugo Road Park, extending from San Fernando Road for about one half mile northerly, between the tracks of the Los Angeles Railway Company and the Salt Lake Railway company. An ordinance describing the land to be condemned was duly presented to the City Council, but on account of protests has been deferred until the latter part of this year.

The widening of Vermont avenue to a width of 120 feet, between Sixth street and Los Feliz Road has met with considerable opposition on account of the heavy assessments which

would have to be levied to pay the awards allowed by the courts for the land taken. I understand that the City Council has agreed to the abandonment of the proceedings provided the property owners pay 50 per cent of the costs to date.

Nothing further has been done with the widening of West First street to a width of 90 feet, from Lake Shore avenue to Vermont avenue, nor with the opening and widening of Temple street to the same width from Vermont avenue to the west city boundary.

The proceedings for the opening of Broadway from Tenth street to Pico street have reached the stage of collection of the assessments, and the proceedings for the opening of Broadway from Pico street to Washington street, are before the Superior Court to determine the awards.

The proceedings for the condemnation of the land to be acquired for Silver Lake Park Way are still tied up in the courts. A decision is looked for at the October term of the Supreme Court. If, however, this proves to be unfavorable, the only solution seems to be an amendment to the City Charter.

Proceedings for the condemnation of the land proposed to be acquired for Arroyo Seco Park Way are held in abeyance, but will come up before the City Council for further consideration on August 18th of this year.

Final decrees of condemnation have been entered as follows:

Land as an acquisition to Exposition Park, being the numbered lots north of 39th street between Hoover street and Menlo avenue, Alley east of Main street from Washington street to 21st street, Canal street from West 6th street to West 7th street (Wilmington), Dayton avenue from Avenue 20 to Pasadena avenue, Edward avenue from Moss avenue to Anita avenue, Griffin avenue from Zonal avenue to Charlotte avenue, Hoover street from 9th street to San Marino street, Lillian Way from Waring avenue to Melrose avenue, Maubert avenue from Sunset Boulevard to Los Feliz avenue, McKinley avenue from 40th street to Vernon avenue, Pasadena avenue from 38th street to York Boulevard, Peccan street to Las Vegas street, Sixth avenue from Pico street to Dorchester avenue, Seventy-fourth street from Moneta avenue to Figueroa street, Seventy-fifth street from Moneta avenue to Figueroa street, Seventy-sixth street from Moneta avenue to Figueroa street, West 5th street from Canal street to Main street (Wilmington), Western avenue entrance to Griffith Park, Library site at First street and Chicago street, Library site at 45th street and Central avenue, Library site at Workman street and Avenue 26, Right of way for sewer purposes through I. R. List property.

Vacation of Streets, Alleys, Etc.  
Orders pending for the vacation of streets and alleys prior to July 1, 1914 ..... 14  
New orders taken up during fiscal year ..... 32  
Orders closed and completed during the year ..... 10  
Proceedings now pending ..... 36

### Vrooman Act.

There have been prepared and delivered to the Board of Public Works 250 Vrooman Act diagrams for the improvement and sewerage of streets,

\*From Report of City Engineer of the City of Los Angeles, 1914-1915.

making in duplicate a total of 660 separate maps, an increase of 17 per cent over last year. In addition to these, 10 diagrams for improvement work under the Act of 1913 have been delivered. Many of these maps covered very large districts, making it necessary to divide the maps into three or four sheets.

There have also been prepared in addition to the above 51 diagrams for contract work now running.

There have also been prepared 470 tracings for the purpose of making blue prints for transmission to the City Council for approval of assessment districts.

Three hundred and seventy-three jobs for street improvement work were figured, constituting 2636 separate bids. In addition to these 310 final estimates were made.

#### New Sub-divisions.

Fifty-three new sub-division maps were referred to this department for checking and approval, and against 100 for the year 1913-1914. Several of these maps were located in territory where no official surveys had been made. It was, therefore, necessary to do considerable field work in order to check the same, especially those in the vicinity of the lands bordering on the Los Angeles River bed. The city receives no direct compensation for this work, but it is of material advantage when platting district maps.

#### Ornamental Lighting.

Nineteen assessment maps for ornamental lighting of streets have been prepared, together with 12 diagrams showing the location of posts. The preparation of these maps is a continual repetition of work from year to year. This is due to the fact that contracts for the furnishing of electric current are only made for the period of one year. Attention was called last year to this continual repetition of work. Property owners have discussed this matter with me many times, asking why assessments cannot be made for a longer period of time, or if this is impractical, why the assessments cannot be placed on the tax rolls. The only solution seems to be by an entirely new method of procedure.

#### City Attorney, Assistance to.

This department, as usual, has done a very considerable amount of research work of the old archives, especially in connection with the dedication of streets, for the use of the City Attorney in defense of suits against the city; also for use in actions brought by the city.

The research commenced last year to determine the width of streets in the old part of the city has continued, and much valuable information has been obtained, which I am sure will be of great use in the future.

Many of the reports refer to sketches or maps which we have been unable to find. Some of these may be among the miscellaneous un-indexed maps in the City Clerks' vault. Efforts will be made as soon as time will permit to examine the same. After this work is completed I would suggest making a special volume, together with an index to the same, thereby preserving for

future use, and avoiding a possible repetition of work.

#### Suit for Recovery of Land in the Los Angeles River Bed.

I regret to say that in the suit for the recovery of land claimed under adverse possession has not yet been determined. Considerable further searching has been done in connection therewith. The action has been set for trial a number of times but for some reason or other seems to be continually postponed.

Further searching has also been done as to the city's rights to all the lands embraced within the river bed between the northerly and southerly limits as defined by Ordinances Nos. 257 (Old Series) and 6035 (New Series).

#### Blue Printing.

20,322 blue and blue line prints have been made of the various city maps and plans, being equivalent to 106,992 square feet. This shows an increase of 15,692 square feet over that of last year. The suggestion has been made that the city and county should combine and install a plant in order to do their own blue printing. I do not believe such an arrangement would be of advantage to the city, owing to the fact that the city and county offices are so far apart. The time consumed in messenger service would be very considerable, and I am sure would offset any cost that might be saved. I am, however, of the opinion that the time has arrived when the city should install a plant of its own. I do not believe there would be very much saving in cost over the contract price now obtained, but the city would have the advantage of obtaining prints at a moment's notice, and much of the bookkeeping work, writing of orders, etc., could be done away with. The amount of blue printing which will be called for during the next year, owing to the enormous increase in area of the city will no doubt be very great. Last year's contract was very satisfactory, but a private contractor can hardly be expected to give precedence to the city's work, for which he receives a very low price, when he has a considerable amount of private work on hand at much higher rates.

#### General.

The following is a complete list of the number of maps, drawings, Vrooman Act diagrams, searches, etc., which have been prepared under my supervision during the fiscal year:

New district maps completed, 28; new district maps traced, 25; district maps retraced, 2; 200-foot scale maps, 1; Vrooman Act diagrams, 15; record maps platting on district maps, originals, 58; same, tracings, 58; same, house numbering, 58; same, blue line prints of originals, 21; ordinances platting on district maps, originals, 111; same, tracings, 111; same, house numbering, 111; same, blue line prints of originals, 84. Descriptive deeds platting on district maps, originals, 97; same, tracings, 197; same, blue line prints of originals, 98; same, house numbering, 157. Original maps for opening and widening of streets, 17; condemnation maps for opening and widening of streets, 17; assessment maps for opening and widening of streets, parks, etc., 11; condemnation maps furnished the City Attorney for opening and widening of streets, tracings, 6. Vrooman Act diagrams made in duplicate, 76; diagrams under the Act of 1913, 10; preliminary assessment maps, 170; bids for street

improvement figured and checked, 2,636; final estimates for street improvements figured, 349; Lighting Act location of posts, 12; Exhibit maps for court cases and miscellaneous maps, original, 1; same, tracings, 26. New record subdivision maps checked and approved, 53; same, traced from recorded maps, 179. Record subdivision maps traced from recorded maps, annexations, 202; blue prints made of recorded subdivision maps, San Fernando annexation, 600; deeds to city, descriptions prepared and checked, 194; certificates of title made for deeds to city, 88; recorded instruments copied and checked, 112; recorded instruments copied, Palms annexation, 201; record property owners certified to, 1,266; maps for posting of notices of assessment districts, checked, 507; posting affidavits, checked, 507; protests to opening and widening of streets, parks, etc., checked, 10; representing a total frontage of 1,074,198 feet. Reports to City Council and Board of Public Works, 898; ordinances indexed and pasted in office records, 2,181; ordinances re-indexed, 5,300; searches on court cases, application for quit claim, etc., 20; miscellaneous maps to Council and Board of Public Works, 37. Total number of blue and blue line prints made, 20,322. Total number of square feet of blue and blue line prints made, 106,992.

The map of the city on a scale of 2,000 feet to the inch has been brought up to date and will again be reproduced and made a part of this year's report. The progress of street improvements, sewers, etc., being shown thereon by different colors.

A new map showing the territory annexed to the city has also been prepared.

Sixteen standard plans of manholes, flush tanks, culverts, etc., have been re-drawn, making a total with the 50 plans drawn last year of 66. These have all been re-produced by Photolithography to a uniform size of 8x11 inches. They have proved to be very valuable for use in the office and are being much sought after by engineers and those employed in kindred professions in cities all over the United States.

I am pleased to state that an opinion has recently been received from the City Attorney upholding our contention as to the lands legally dedicated as Elysian Park, and confirming the lands set aside and described under Ordinance No. 218 (Old Series). The area of Elysian Park as described under Ordinance No. 5619 (New Series) is 525 acres (planimeter measurement). The area as embraced under Ordinance No. 218 (Old Series) is 583 acres; the difference being an increase of 58 acres.

Very little work has of course been done in the gathering of the records of the newly annexed territory. Copies, however, of all recorded maps of the Palms District and Land-town have been obtained and we are securing as fast as possible blue prints of the recorded maps covering the San Fernando Valley.

A preliminary index map has been outlined of this new territory, together with that adjoining and contiguous thereto. It is proposed to continue an index scheme for all the territory which may possibly be annexed to the city in the future. This will simplify the changing of the index books, the insertion of the number covering any new addition being all that will be required.

# The Crane Exhibit.

## Staff Article

One of the most complete and distinctive exhibits in the Machinery Palace of the Panama-Pacific Exposition is the Crane exhibit of valves and a description of it will show the correctness of this our contention.

Passing through the main west entrance we find ourselves inside of a structure in which Lincoln Beachey, the aviator, managed to manipulate his aeroplane. We walk over a floor space of 357,224 square feet—more than eight acres—laid out in streets and avenues, divided into blocks in which are exhibited the world's latest work in things mechanical.

The streets, named from First to Fifth, run north and south of the building; the avenues, named from A to I, run east and west. Avenue E, stretching directly before us to the main east entrance, is the middle of the building from north to south, and Third street, running from the main south to the main north entrance, is the middle of the building from east to west.

As there is no building beyond the Palace of Machinery, the great bulk of travel by those visiting the Exposition will be toward the west entrances, and, naturally, most of this will gravitate toward the main entrance on this side. You will see presently why we mention these details. As we stand for a few moments just inside the entrance, looking about the vast interior, we begin to pick out distinctive features here and there. One is particularly dominant and invites our curiosity. It towers like a great iron chimney above its lower surroundings. We move toward it one block, one exhibiting section, coming to Second street and Avenue E, and the towering object reveals itself as a gigantic valve, a landmark for the exhibit of Crane Co., Chicago and Bridgeport—for the big valve was made at the Bridgeport Division of Crane Co.

Let us walk around block 20 before we enter the exhibit and take note of the details of the products therein arranged and displayed. The block is 63 feet on each side, giving a floor space of 3,969 square feet. The principal entrances are marked by arches, the legs of the arches being joined into railings comprising various sized valves, fittings, and specialties made by the company.

Coming back to the entrance from Second street we pass through an arch made of pipe specials, finding the towering valve on our left and a great back pressure and exhaust relief valve on our right. These two objects strike the eye first of all, especially when walking toward the east, but the great valve may be seen from nearly every street and avenue of approach to the Crane Co. block.

Once inside the railing we may take our time to look over the exhibit in detail; but first we are drawn to get a

closer acquaintance with the big valve. We are told by one of the men in charge that it is a 72-inch cylinder-operated gate valve, that it weighs approximately 57,000 pounds—twenty-eight and a half tons; that the distance from the bottom of the valve to the end of the stem when the gate is open is 32 feet 10 inches; that the diameter of the cylinder is 44 inches, the diameter of the stem is 1½ inches, and the working pressure 25 pounds steam and 50 pounds water. We also are informed that a number of these huge valves have been installed in various parts of the country, particularly in city water supply and large water power plant lines. During this talk the attendant has been idly toying with a small brass object. It is three inches high from the bottom to the top of the stem when opened, and an inch and three-eighths face to face and has an opening into which a one-eighth bit of pipe may be screwed. It weighs two ounces. This is the other end of the line of valves made by Crane Co., a one-eighth-inch brass globe valve. Anything in valves for any purpose—steam, water, gas, ammonia, etc.—between these sizes the company makes, and most of them may be seen, at least the representatives of the various classes, in this exhibit.

Now a turn to the right brings us to the bulky back pressure and exhaust relief valve, also from the shops of the Bridgeport Division. This is a forty-eight-inch valve with a cylinder to hold the valve open. The interior space is roomy enough to seat four persons, the valve has a sufficient area to relieve any condenser now in existence—and when condensers demand anything larger, Crane Co. is prepared to furnish it. The distance from the bottom of this valve to the end of the stem, when the valve is open, is 15 feet; its weight 14,000 pounds—seven tons; face to face measurement, 96 inches; maximum diameter of the body, 7 feet 2½ inches. What the towering valve to the left has in height this one offsets in girth.

Another especially noteworthy feature is the valve a trifle to the rear of the big back pressure valve—a 24-inch extra heavy cast steel rising-stem gate valve. This is motor operated, the motor being so wired that it automatically opens and closes the valve, allowing it to be operated either automatically or by hand. The body, bonnet and disc are of Crane cast steel; the thickness of the body is 1½ inches, thickness of flange 2½ inches, size of by-pass 1 inches, diameter of stem 3 inches, face to face measurement 31 inches, height with the valve open 11 feet, weight 8,200 pounds—more than four tons.

As we ramble toward Avenue D we note that the entrance on that side is worthy of close attention. Entrance is through an arch composed of drainage fittings and pipe bends. The

drainage fittings here seen are now generally used in sanitary piping in all buildings. The fittings are connected with wrought pipe and screwed thread joints. This type of construction is the most sanitary type of piping equipment consisting of special long and easy sweep fittings and wrought pipe, having a smooth interior. The fittings are made with a shoulder which the pipe abuts, forming a continuous joint and leaving no pocket for the lodgement of solid matter. The fittings are made in all sizes from 1 inch to 14 inches, comprising 53 shapes and 460 patterns. They are furnished, black, tarred, or galvanized, either in cast or malleable iron.

The Third street entrance is another arch composed of pipe bends and ammonia separator. Flanking this entrance are two condensers and an exhibit of valves and fittings used in refrigerating plants. The material is of the best quality and the fittings of the highest type now in existence for this character of work. All flanged fittings and valves are made of the same center to face dimensions, so that any fitting or any valve may be replaced or an addition may be made to the piping without the necessity of cutting off or adding to existing piping.

The three entrance arches naturally invite attention to pipe bends and this complete feature of the Crane shops. The bending of pipe for use in all kinds of piping lines, railings, etc., has grown to be one of the most important factors of the valve and fitting industry. The bends at these three entrances of the Crane Co. exhibit—Avenue D, Second street and Third street—show in a limited way the possibilities of this feature. On a table in the west section of the exhibit may be seen nine kinds all of different shapes. Many of these shapes may be obtained in any size or weight of pipe; others in pipe up to 30-inch outside diameter. In the Chicago shops of Crane Co., one department covering 50,000 square feet and employing 220 men is devoted exclusively to pipe bending, flanging, cutting threads, and welding pipe for complete piping equipment.

Attractive features of the exhibit are the graceful pedestals on which are mounted various Crane products, most of them cut in section so as to show their inner construction.

On these pedestals may be seen: A 6-inch No. 37-E Crane-Erwood valve; a 6-inch No. 29-A cast steel angle valve; a 6-inch No. 30-E "Y" pattern stop check valve; an 8-inch No. 415-V combination back pressure and exhaust relief valve; a 5-inch blow-off valve, 2½-inch No. 399 "Y" pattern blow-off valve, and 2½-inch No. 316 blow-off cock; 4-inch No. 1116 pop safety valves mounted on a "Y" base; 6-inch No. 28-A cast steel "Y" pattern stop check valves; a 12-inch No. 600 whistle; a 6-inch No. 53-E balance ex-

pansion joint; a 6-inch No. 1123 iron body water relief valve; a 9-inch drip pocket with water gauges; a 6-inch No. 013 extra heavy vertical separator; a 12-inch No. 03 oil separator; a 6-inch standard base tee; an 8-inch No. 395 foot valve; an 8-inch No. 115-A stay-open type exhaust relief valve; a 6-inch C. C. strainer; a 6-inch iron-body type "B" pressure regulator valve; a 3-inch No. 021 receiver separator; a 6-inch No. 359 J. D. angle valve; a 6-inch No. 343 medium angle valve; 4-inch No. 1117-A cast steel pop safety valves mounted on a "Y" base; a 6-inch No. 1503 ammonia angle valve; a locomotive turret with three No. 1183 locomotive pop safety valves.

Twenty attractive oak tables bear the following, sectioned where necessary to show interior construction and operation: An 8 by 6 inch welded steel header showing flanged joints;  $\frac{3}{4}$ -inch Nos. 33, 1, and 101 Crane-tilt traps; 6-inch No. 461 standard, No. 501 medium, and No. 9-Extra heavy gate valves; 6-inch No. 351, standard, No. 341 medium, and No. 27-E extra heavy globe valves; 6-inch No. 498 low pressure, No. 462 standard hub and gate valve and 6-inch No. 374 hub end check valve; 6-inch No. 367 standard, No. 39-E extra heavy, and No. 221-II hydraulic check valves; 6-inch No. 401 standard, No. 409 double, and No. 412 low pressure expansion joints; 6-inch standard, extra heavy, hydraulic flanged tees; 2-inch miniature pipe bends, seven pieces; 4-inch Nos. 1009, 1002, 1003, 1007, 1010, 1022, 1026, 1028, 1030, 1035, 1045, and 1056 drainage fittings;  $1\frac{1}{2}$ -inch Nos. 1057 and 1058 drainage street elbows; a cast steel lateral with risers; 6-inch No. 7-A cast steel gate valve; 2-inch No. 201-D cast steel gate valve; 6-inch cast steel elbow flanged; 6-inch No. 481 standard, No. 58-E extra heavy double disc gate valves; 6-inch No. 471 quick opening gate valve; a variety of ammonia goods; branch tees, panel, etc., for 24-inch motor operated gate valve; 6-inch standard, cast iron medium, cast iron extra heavy, cast iron No. 1 L. S. malleable flat band, malleable hydraulic L. S. and cast steel elbows; 6-inch cast iron water fittings; 6-inch base elbow screwed; 6-inch and 12-inch hydraulic flanged tees; 6-inch No. 467 standard flanged gate, No. 462 $\frac{1}{2}$  hub end gate, and No. 375 flanged check valves, underwriters.

There are also tables supporting show cases. In these eight show cases may be seen, ranging from one-eighth inch to two and a half inch, brass globe valves, wedge gate and gate valves, hose and garden hose valves, quick opening gate valves, hydraulic gate valves, hydraulic globe valves, radiator valves, for all services, check valves, steam cocks, ball pattern; railing fittings, slip and screw joint variable angle railing fittings, auxiliary railing fittings, hitching post caps, gas fittings, pattern railing fittings, flush joint stair rail fittings, malleable street elbows, service tees, crosses, return bends, unions, cast iron reducing elbows, reducing tees, cast iron crosses, "Y" bends, iron plugs, iron bushings, 45 degree elbows, malleable and cast iron fittings, union elbows, waste nuts, lock nuts, plugs, long screws, etc., pricing practically the entire Crane line in brass, cast iron, malleable iron

and galvanized. Ammonia return bends, unions, flanged unions, globe valves, angle valves, expansion globe valve, expansion angle valve, gauges, relief valves, check valves, sediment trap, elbow and tees, ammonia double pipe water cooler return bend, water return hand complete, oil separator, etc. Articles in this part of the exhibit are sectioned wherever it is desirable to show inner construction and operation.

Four cabinets complete the display of the smaller goods showing globe and angle valves, frost valve, cab hose sprinkler valve, three way valve, check valve, air brake fittings and car heater fittings, ash pan blower valve, blow off valves and mine cocks.

Crane Co. prepared this exhibit for the Panama-Pacific International Exposition with three objects in view:

First, As a comprehensive demonstration of the completeness, adaptability, elasticity, and dependableness of the various lines of Crane products.

Second, As a practical educational feature for both the engineer and the layman who cannot fail to carry away something of permanent value in the way of exact knowledge from a visit to the Crane exhibit.

Third, As an exposition of the greatest piping material for the use of steam, water, gas, ammonia, etc., made at any time thus far by any one concern in the world, the material shown and its arrangement being the "latest word" in modern piping material.

Here may be seen valves in brass, hard metal, cast iron, malleable iron, ferrosteel, and cast steel, in sizes ranging from one-eighth of an inch to seventy-two inches and in weight from two ounces to 59,000 pounds. (It would take 564,000 of the smallest valves in the exhibit to equal the weight of the largest valve shown.)

The valves are displayed as operated by hand-wheel, gears, levers, hydraulic cylinders, electric motors, and automatically. The pressures range from twenty-nine inches of vacuum to 3,000 pounds hydrostatic. The temperatures range from minus degrees F. to 800 degrees F.

Fittings are shown in brass, hard metal, cast iron, malleable iron, ferrosteel, and cast steel, in sizes from one-eighth of an inch to eighteen inches, weighing from three-quarters of an ounce to 2,000 pounds, with pressures and temperatures the same as for the valves.

Nothing that is necessary to the proper equipment of the pipe lines and their accessories for the modern power plant is missing from this exhibit. It is at once a spectacle in metal and a school in up-to-date installation.

To the student in "safety first" in the power plant there are features of peculiar interest. Here he may see steam pop safety valves, water relief valves, double acting emergency cut-out valves, automatic stop cock check valves, exhaust relief valves, back pressure valves, Crane-tilt traps, self-cleaning strainers, pressure regulators, fusible plugs, whistles and whistle valves, steam separators, oil separators, pipe bends, expansion bends and blow-off valves. Each one of these has its definite purpose in the modern

plant where efficiency is to be joined with safety and economy, where quality is to be considered before a comparatively trifling difference in initial cost.

#### Arches of the Crane Exhibit.

Not the least striking features of the Crane Exhibit at San Francisco are the three arches through which visitors pass into the exhibit block from Second street, Avenue D and Third street.

What we have called the Main Entrance to the exhibit, because of the line of greatest travel, is on the Second street side of the block. The arch is 19 feet high, and is made up of an 18-inch cast steel header, a 20-inch welded steel header, a proportionate "U" bend for the main curve with a loop bend below.

The left wing of this arch, serving as a railing, is composed of extra heavy gate valves from 18 inches down to 2 inches. The right wing comprises extra heavy flanged reducing tees from 18 inches down to 2 inches, and from 10 inches to 1 inch extra heavy cast iron screwed elbows. The Avenue D arch is made up of a 6-inch ammonia separator, 6-inch quarter bends and 6-inch by 4-inch tees. The left wing is a 3-inch double pipe brine cooler; the right wing a 2-inch atmospheric ammonia condenser. The height of this arch is 12 feet. On the Third street entrance the arch is 15 feet high, and consists of 8-inch drainage fittings and 6-inch quarter bend pipes. The left wing consists of cast steel angle valves and cast steel check valves mounted on a 12-inch welded steel header. The right wing is made up of globe and angle "Y" pattern stop check valves mounted on a 12-inch welded steel header.

The railing on the Avenue E side of the block is an attractive practical illustration of some of the things that may be done with pipe and Crane railing fittings.

#### GREAT WESTERN WINS SHELL CONTRACT.

W. S. Van Winkle, manager of the sales department of the Great Western Power Company has announced that his company had landed the contract for furnishing light and power to the plant of the Shell at Martinez, for which both the Pacific Gas and Electric and the Great Western have been fighting for some time.

The Great Western is now expending \$100,000 in Contra Costa, extending its service, according to Van Winkle. Recently the company landed the contract for lighting and furnishing electric power to the Somers warehouse at Crockett.

#### LIFT EMBARGO ON IRRIGATION BONDS.

State Controller John S. Chambers and State Treasurer Friend Richardson have informed P. H. Griffin of the Oakland Irrigation District that they will shortly lift the embargo on irrigation bonds. Hitherto irrigation bonds have not been accepted as security for State deposits. Chambers and Richardson will shortly tour the valley and investigate the different Irrigation districts.

## EDITORIALS.

The growth of a new industry from a small beginning to a position of importance is always a very interesting phenomenon, and especially so when it takes place right at home before your very eyes and offers the chance for close observation of the turns of the wheels of progress.

It has been the writer's great good fortune to be able to make some observations of this kind, and these lines are penned as an appreciation of this opportunity and in the hope that they might be of interest to some of our readers.

The California Corrugated Culvert Company is the concern under observation, and its growth has, thanks to the farsighted management and policies of the Messrs. Force, father and sons, been true to the proverb that of a little acorn grew a mighty oak.

The company was organized and the first plant built at 5th and Parker streets, West Berkeley, in the year 1905, where the factory and office together covered some 1500 square feet of ground. The plant was increased in 1910 to 5,000 square feet of ground at which time also the Los Angeles branch was established.

In 1912 it was again increased to 12,500 square feet and in 1915, the present year, it was found necessary to almost treble the space, it being now 31,750 square feet.

The machine tool equipment in 1908 consisted of some drills and rolls for turning the sheets into shape. In the years gone by new and improved types of rolls have been designed and built. Combined punches and riveters have been installed to which have been added devices of the company's own design and manufacture that has greatly increased the capacity and enables the manufacture of a better product.

The quality of the product has always been the first consideration and when that was attained the efficiency of the plant was brought a par, and the plant is now by far the largest and best equipped culvert plant in the world.

The present enlargement is, as far as the building is concerned, almost entirely a new plant, and it has taken extremely good management to keep the plant running full capacity at the same time the new building was being erected.

The new plant is a model plant in many respects: it is fireproof, and it takes a special permit from the general manager to carry a piece of wood into the building.

The roof is of steel trusses of saw-tooth design, giving perfect light and ventilation and added ease of future additional expansion. The workbenches are of iron, the lockers and partitions are of iron, and the storage bins in the metal stock room for all kinds of supplies are also of iron.

The floor is of concrete and it took 20 carloads of concrete mix to make it.

A very efficient and economical handling and grouping of operations has been arranged for.

The sheets for flume enter the window openings on rollers by gravity, go through the necessary operations and wind up at the shipping doors, where traveling cranes with electric hoists load them on the cars; the same is also true of the culvert end of the work.

One corner of the building has been set aside for a permanent exhibit of all products manufactured.

All machinery is so safeguarded that an accident is almost an impossibility and the following letter vouches for the accuracy of this statement:

STATE COMPENSATION INSURANCE FUND  
of the

STATE OF CALIFORNIA

Executive Offices

Underwood Bldg., 525 Market Street,  
San Francisco,

San Francisco, Cal., April 30, 1915.

California Corrugated Culvert Co.,

Fifth and Parker streets,

West Berkeley, California.

Gentlemen: We wish to congratulate you on the manner in which you have applied the principle of "Safety First" in the carrying on of your manufacturing operations. We commend you not alone because you have very efficiently guarded all machinery and have removed or decreased the physical hazards in an unusually careful and conscientious way, but because you have recognized that safety depends to a great extent upon the frame of mind of the employee, and that good sanitary conditions and cheerful surroundings will prevent many needless accidents. The good lighting, ventilation and other sanitary conditions of your plant, together with the work of your safety committee, should result in efficient and careful work on the part of your employees and should minimize the occurrence of accidents.

We have been able to allow you a reduction of approximately 3% per cent in your rate on account of your safety work, but without doubt you realize that the more important benefit which you derive from your efforts in safety and welfare work, is the increased efficiency of your employees, and the improved character of their work.

Yours very truly,

STATE COMPENSATION INSURANCE FUND,

By (Signed) E. F. GOELZER,

Chief Inspector.

The beginning in 1908 was made by the manufacture of culverts only, but the opportunity for the manufacture of irrigation gates of various designs offered itself, then watering troughs and tanks were added and lately flumes

have been manufactured with great success, and the plant is now the best equipped flume plant in the United States; and it is also especially well equipped to handle heavy sheet metal up to 10 gauge. From a little acorn grew a mighty oak.

### BUTTE COUNTY HIGHWAY BRIDGES

Bridge building operations in Butte County are occupying the attention of County Surveyor Martin C. Polk. Work is brisk along those lines, and the contractors in charge of the erection of the various bridges are putting forth every effort to have all completed before the winter rains begin.

According to figures supplied by Surveyor Polk, thirty-one bridges, aggregating a total length of more than 2,500 feet, at a cost of about \$60,000, are now being constructed, or have recently been completed.

The largest bridge will span Butte Creek, south of Chico. The bridge will be 310 feet in length and cost approximately \$14,000. It is being constructed of concrete and steel, and, according to contractor E. D. Sharp, will be completed by December 15th.

Four of the eight bridges on the route of the State highway, between Chico and Nelson, have been completed by the Chico Construction Company. The aggregate length of the bridges is 250 feet. They are constructed of concrete and reinforced with steel. The total cost of the eight bridges will be approximately \$15,000.

On the Princeton-Biggs road, eight bridges are being erected. These bridges will be of concrete, and will replace wooden frame bridges. The total length of these structures is 300 feet. The cost will be about \$4,000.

Seven bridges are being constructed in the Nelson district, the largest, 200 feet long, will span Dry Creek, south of Nelson. The cost for the seven bridges will be near \$10,000.

John Oldham, in charge of the construction of the bridge to cross Pine Creek at Cana, announces the bridge will be ready for acceptance by Surveyor Polk December 1st. The bridge is 180 feet in length and cost \$3,000. A bridge over Campbell Creek, one-quarter of a mile south of the Tehama County line, is nearing completion. The bridge is forty feet long, and will cost \$1,200.

### RICHMOND TO HAVE REPORT ON WATER.

J. H. Dockweiler, water supply expert, has been retained by the water commission of Richmond to furnish the city with a report on its water supply. Three thousand five hundred dollars has been appropriated to defray the expenses of the report.

# Letters To the Editor.

**BENT BROTHERS**  
ENGINEERING CONTRACTORS  
General Offices: Central Building  
Los Angeles, California.

Los Angeles, Cal., Nov. 17, 1915.

Mr. Geo. Nelson,

Building and Engineering News,  
560 Mission St., San Francisco, Cal.

Dear Sir: Replying to yours of Nov. 16th referring to clipping from last Sunday Times regarding Long Beach Sewer, would say the item is ridiculous because there has never been the slightest ground on which it could be brought before the grand jury. The most the Clay people's representatives have been able to claim, is that Olmsted & Gillelen's money should be held up, or rather they should be penalized for what they claim are engineering blunders. I only wish we could get somebody to father that grand jury insinuation, but we can't. Capt. Milner, the Chief Inspector, who is quoted, denies ever having said anything of the kind and lays in onto the reporter, who, he says, misquoted him.

Meantime the job is nearing the finish and is going to be the best sewer system in California. The Clay people will of course do all in their power to injure us by blocking the payment, but it won't get them very far.

Yours,

A. S. BENT.

## SEWER AFFAIRS TO GRAND JURY.

### Long Beach Investigators to Carry Matter Up.

LONG BEACH, Nov. 13.—It was declared today by Capt. A. N. Milner, inspector for the city in the construction of the main outfall sewer, that, no matter what action the City Commission took in the matter of the hearing on alleged defects of the sewer, the entire case would be placed before the Los Angeles County grand jury.

The sewer hearing, lasting two weeks, developed allegations that the sewer contractors and engineers were inefficient. Commissioners have not yet decided upon the merits of the lengthy testimony adduced at this hearing.

Capt. Milner and F. S. Craig have been the complainants in the hearing. It is stated that the matter has already been placed before county officials. The contractors have not yet received pay for their work.

[Above item appeared in the Los Angeles Times for Sunday, the 14th of November, and we at once wrote the contractors on this work to get their side of the matter, and by return mail got their prompt reply.—Editor.]

**OLMSTED & GILLELEN**  
Consulting Engineers  
1112 Hollingsworth Building  
Los Angeles, Cal.

Nov. 18, 1915.

Mr. George Nelson,  
Editor Building & Engineering News,  
560 Mission St.,  
San Francisco, Cal.

Dear Sir: Your very kind offer of November 16th to publish our version of the Long Beach controversy is greatly appreciated.

The real facts of the case are that F. S. Craig, a politician recently defeated in a city election, endeavored to discredit the administration and thereby improve his political position for future office seeking by attacking the plans and the general construction work on the Long Beach Sewer System. A hearing on these charges was held before the City Commissioners and we are enclosing you the published results of this hearing as they appeared in the Long Beach Telegram of November 17th.

Again thanking you for your kind offer to publish the real truth of the affair, we are

Yours very truly,

OLMSTED & GILLELEN.

Per Frank Gillelen.

(Long Beach Telegram, Nov. 17, 1915.)

## SEWER ENGINEERS AND CONTRACTORS CLEARED

### Of Charges Made Against Them Regarding Construction of Main Outfall System.

Basing their conclusions on the facts presented at the recent public hearing, four members of the municipal commission this morning presented a verdict completely vindicating the sanitary engineers, Olmsted & Gillelen, and the Arthur S. Bent Construction Company, in the building of the main outfall sewer system.

Not one of the charges preferred by Frank S. Craig, former works board president who instigated the investigation, are held to be borne out by the evidence. The report simply confirms in detail the widespread belief during the latter part of the hearing that Craig's case had completely collapsed under the weight of unbiased testimony.

Two reports were brought in by the commission, the majority verdict being signed by Major W. T. Lisenby, and Commissioners J. R. Williams, C. J. Hargis and Harry B. Riley.

A minority report, differing from the majority statement on only three items, was presented and signed by Affairs Commissioner F. M. Cates. Cates disagrees from the unanimous verdict of his colleagues in the following points: First, that economy would have followed initial installation of Ys in the sewer system; second, that some

pipe in the industrial district covered as an extra, should have been included in the specifications; and third, that the city would have been better protected in the purchase of cement had the specifications required a product showing no retrogression.

Aside from the above mentioned particulars, the minority signer stated that he was in accord with the views of the majority in the conclusion that other charges had not been proved by the facts and evidence in the case.

In another portion of this issue appears the two verdicts in full, but The Telegram takes this occasion to second the decision of the commission and to state the belief that the opinion is in accord with the complete facts.

Both reports after being read were ordered filed and their contents spread on the minutes of the session, this latter action being taken on the advice of the City Attorney.

The complainant in the case served notice of his appeal from the majority report, and asked to be given a certified copy of the concluding documents. He held that in at least ten counts the majority had erred.

Presentation of the verdict publicly marks the closing chapter in an investigation that has been officially under way for two months and unofficially for a longer period. The commission has had its findings under consideration since the close of the public hearing, numerous executive sessions being held for the purpose of its discussion and a verdict was reached only late Tuesday afternoon.

## TULARE STREET PAVING BEGINS.

The preliminary work of paving the streets of Tulare started upon the arrival of Fred Dean, paving superintendent of the Federal Construction Company. He has been superintending the paving work at Porterville and will work in co-operation with A. P. Bosworth, City Superintendent, in the paving work in Tulare. The full crew will be put to work at once. All machinery and material has been ordered and that which has not already arrived, will be here within the next few days.

## SCENIC ROAD TO MOUNT HOOD.

All the preliminary survey work for the proposed scenic road around to the east and south of Mount Hood will be completed within a week or ten days, according to the report of J. T. Schuyler, engineer in charge. Mr. Schuyler says that a survey of the main line is completed and that the work now being carried forward is for proposed side roads to points of scenic interest.

The Forestry Department will ask the coming Congress for an appropriation for the construction of the proposed road.

# Technical Societies.

## SAN FRANCISCO ASSOCIATION OF MEMBERS OF THE AMERICAN SOCIETY OF CIVIL ENGINEERS.

### Officers for 1915.

President—A. M. Hunt.  
Vice-Presidents—H. L. Haehl, M. C. Couchot.

Secretary—E. T. Thurston, Jr.  
Treasurer—P. E. Harroun.  
Board of Directors—M. C. Couchot, H. L. Haehl, A. M. Hunt, P. E. Harroun, E. T. Thurston, Jr., C. H. Snyder, C. B. Wing.

Weekly luncheons in College Room, Hoffbrau Cafe, Wednesdays at 12:30. Engineers welcome; Informal; no program.

Regular meetings are held bi-monthly at such time and place as may be appointed by the board of directors. The established custom is to meet on the third Fridays of February, April, June, August, October and December.

Address E. T. Thurston, Secretary, 913 Mechanics' Institute Bldg., Post street, San Francisco.

## SAN FRANCISCO CHAPTER AMERICAN INSTITUTE OF ARCHITECTS.

233 Post Street.

Address all communications to Frank C. Ayars, Secretary, 505-6 Douglas Bldg., Los Angeles.

## PERSONAL.

R. A. Birk and P. C. Gillette of Chistobal and Balboa, Panama, respectively, civil engineers in the employ of the government, are guests at the Rosslyn. They will be in Los Angeles for several days. The two men have been at the Canal Zone for several years and are now on leaves of absence.

They will visit San Francisco and will from that point start a trip across the continent which will take several weeks. They will return to New Orleans and will sail from that port to Panama to resume their duties. They stated that the menacing slides occurred before they departed and that the problem, in their opinion, will be solved by the first of the year.

City Engineer S. G. Bennett of Oakland has resigned to take a position as field engineer for the Ventura County Highway Commission.

Superintendent of Streets C. M. Davis of the city of Oroville has tendered his resignation to City Clerk E. J. Mitchell, and a special meeting of the Trustees has been called to select his successor. James Parker, who for several years has done street work in this city, is an applicant for the position, and it is believed will land the job.

H. T. Corey, author of a work on Imperial Valley Irrigation system and prominently identified with the early history of Imperial Valley as an engineering capacity, has completed a notable addition to the publications bearing on the irrigation system and engineering data pertaining to the Imperial Valley. The volume is issued by the J. J. Newbegin press of San Francisco and is embellished with insets from the American Society of Civil Engineers. It is technical in aspect, but conceded to be highly educative in character. Only a limited number of volumes were issued, these being mainly for distribution to irrigation engineers.

Harry Cauthard, formerly in charge of the Sacramento Valley Irrigation Company's canal system on the West Side, with headquarters at Willows, has been named chief construction engineer for the Western Canal System, and has established headquarters in Chico. Cauthard's first task will be to construct flood barriers to prevent injury to canal construction work now in progress.

Joseph H. Moore, civil engineer of Eureka filed with the Supervisors of Humboldt County a map of a new building tract to be known as Nob Hill tract. It lies south of the city and is to be devoted to residences. The Supervisors approved the map.

### PAINT THE ROOF.

Exhaustive tests have shown that the use of high-grade paints upon a shingled roof largely eliminates the danger of roof conflagrations, such as are usually started by hot cinders and burning brands carried through the air from a distance. Exposure tests have shown that high-grade lined oil house paints, upon a shingled roof, largely eliminates the danger of flame which such paint affords. It has additional properties to recommend it, such as waterproofing qualities, ornamental character, and ability to withstand long exposure.—Educational Bureau, Paint Manufacturers' Association of the United States.

### APARTMENT HOUSES

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$28,000. Architects, Welsh & Carey. Merchants' National Bank Bldg., S. F. Owner's name withheld. Location 24th and Church streets. Will contain stores on the first floor besides the entrance. Upper floors arranged for two, three and four room apartments. Interior finish pine and elm panels with some hardwood floors. Steam heat and hot water supply. Wall beds. Bath rooms tile and composition floors. Exterior covered with cement plaster. Plans being prepared.

**SAN FRANCISCO**—Apartment house, 2 story and base, frame, \$8,500. Architect, R. R. Christensen, Lick Bldg., S. F. Owner's name withheld. Location 26th avenue, Richmond District. Will contain four suites of three rooms and bath. Interior finish pine with hardwood floors. Central heating system and hot water supply. Wall beds and tile baths. Exterior covered with cement plaster and brick veneer. Plans being prepared.

**SAN FRANCISCO**—Apartment house, 3 story and base, brick and steel, \$30,000. Architect, W. G. Hind, 46 Kearny street, S. F. Owner, Clyde S. Payne. Location, south Bush west of Hyde. Will contain three and four room suites. Interior finish pine and hardwood with some hardwood floors. Steam heat, automatic elevator and hot water supply. Bath rooms finished in tile. Wall beds. Exterior faced with pressed brick and cement plaster. Plans complete and segregated contracts being awarded.

**BERKELEY, ALAMEDA CO., CAL.**—Apartment house, 2 story and base, frame, \$25,000. Architects, Wright & Rushforth, 354 California street. Owner, H. A. Mattern. Location, east Hille-gass south Stuart. Will contain 52 rooms arranged in two and three room suites. Interior finish pine and hardwood with some white enamel and hardwood floors. Steam heat and a hot water system. Wall beds. Bath rooms finished in tile. Marble and tile entrance. Exterior faced with cement plaster. Plans complete and figures being taken.

**PITTSBURG, CONTRA COSTA CO., CAL.**—Apartment house, 2 story and base, frame, \$11,000. Architect, O. R. Thayer, 20 Montgomery street, S. F. Owner, Charles E. Perry, Pittsburg. Will contain eight suites of three and four rooms. Interior finish pine throughout. Hot water system. Wall beds. Exterior covered with shingles and brick veneer. Plans complete and in the hands of the owner who will do the work by day labor.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Apartment house, 3 story and base, brick and concrete. Cost not

stated. Architect, W. B. Thomas, Yosemite Bldg., Stockton. Owner, B. Granich. Location, east California north of Channel. Will contain two stores and 41 apartments of two and three rooms. Interior finish pine and elm. Hardwood floors. Steam heat, oil burning system and hot water supply. Bath rooms finished in tile. Wall beds and patent store fronts. Exterior faced with pressed brick and cement plaster. Plans being prepared.

**SAN FRANCISCO**—Apartment house, 6 story and base, steel and brick, \$85,000. Architects, Rousseau & Rousseau, 110 Sutter street, S. F. Owners, Gerard Investment Co. Location, southeast corner of Geary and Leavenworth streets, covering an area of 44 by 83 feet. Will contain 40 apartments of three and four rooms. Interior finish pine, hardwood and white enamel. Hardwood and tile floors, marble wainscot and ornamental plaster. Steam heat, elevator service, oil burning plant, vacuum cleaning and hot water supply. Bath rooms tile. Wall beds. Exterior faced with pressed brick trimmed with terrazzo. Plans complete and work by Day Labor.

**SAN BERNARDINO, SAN BERNARDINO CO., CAL.**—Apartment house and stores, 2 story and base. Class C construction. Cost not stated. Architects, Train & Williams, Exchange Bldg., L. A. Owner, Ralph Swing. Will cover an area of 40 by 110 feet. Two stores and eight apartments of three and four rooms. Interior finish pine. Wall beds. Hot water system. Tile baths and patent store fronts. Exterior faced with pressed brick. Plans being prepared.

**LOS ANGELES, CAL.**—Apartment house, 4 story and base. Class C construction, \$55,000. Architect, L. T. Mayo, Black Bldg., L. A. Owner, Mr. Bramhall. Location, corner of 8th and Hoover streets, covering an area of 60 by 130 feet. Will contain 102 rooms arranged in two and three room suites with private baths and wall beds. Interior finish pine and elm panels. Some hardwood floors. Steam heat, automatic elevator and hot water system. Tile bath rooms. Exterior faced with pressed brick. Plans being prepared.

### Contracts Awarded.

**LOS ANGELES, CAL.**—Apartment house, 3 story and base, frame, \$25,000. Architect, A. L. Reed, 224 Pacific avenue, Long Beach. Owner, Mrs. Ida G. Platt. Contractors, J. H. Woodworth & Son, Chamber of Commerce Bldg., Pasadena. Contract price, \$25,000.

**SAN FRANCISCO**—Apartment house, 4 story and base, brick and frame. Cost not stated. Architects, Rousseau & Rousseau, 110 Sutter street, S. F. Owner, Floyd C. Curry. Contractors, Higgins Co., Humboldt Bank Bldg., S. F. Contract price not stated.

## BATH HOUSES.

SEATTLE, WASH.—Bath house, 1 and 2 story and base, reinforced concrete, \$250,000. Architect, B. Marcus Pretica, Pantages Bldg., Seattle. Owners, Albert Shubach, C. D. Stimpson and Jacob Berger. Location, corner of Leona and 2nd avenue, covering an area of 130 by 180 feet. Plunge will be 110 by 60 feet. There will be showers and tub baths. Interior pine, tile and marble. Fireproof construction. Steam heat, oil burning plant and pumping plant capable of 750 gallons per minute. Exterior faced with cement plaster. Plans being prepared.

## BONDS

SANTA CLARA, SANTA CLARA CO., CAL.—At their session last week the Board of Town Trustees decided to submit the question of issuing and selling bonds of \$45,000 for paving improvements to the voters.

The proceeds of the sale of these bonds, if the issue carries, will be to complete the paving of that portion of the State highway running through Santa Clara on the San Jose-San Francisco road.

H. B. Fisher, Town Engineer, estimates that the paving of the uncompleted portion of the State highway in Santa Clara would cost \$26,999 and the contemplated improvements on the Homestead road and Lincoln street would cost \$18,010.

BAKERSFIELD, KERN CO., CAL.—The Board of Education has decided to call an election on December 14th for the purpose of voting bonds in the sum of \$75,000 for additional school facilities. The funds will be used to erect two new school buildings, one on Tenth street, owned by the board, and one on a lot at Union and Nineteenth, to be purchased out of the money derived from the sale of the bonds, and equipment for the new buildings.

PORTLAND, ORE.—The Medynski bond issue was defeated at an election held in Portland recently. There were 108 for the issue and 1,478 against. The Medynski plan called for an issue of \$1,030,000 in paving and refunding bonds.

SAN BRUNO, SAN MATEO CO., CAL.—The citizens of San Bruno last week voted bonds of \$20,000 for the erection of a new school building. The building to be erected is estimated to cost \$17,500. The remainder of the sale of the bonds will be used to install a heating plant in the structure.

WASCO, KERN CO., CAL.—An election held to vote bonds of \$45,000 to provide for the construction of a high school carried last week. Plans for the building will be ordered shortly.

RICHMOND, CONTRA COSTA CO., CAL.—Petitions are now in circulation addressed to the Council opposing the calling of additional bond elections.

SARAFENTO, CAL.—The last of the Sacramento city school bonds have been sold to the N. W. Halsey Company. The bonds sold amounted to \$206,000. The proceeds will be used in making school improvements.

TERRA BELLA, TULARE CO., CAL.—To finance the construction of im-

provements to be made the Terra Bella Irrigation District, recently formed, will soon call an election to vote bonds.

OAKDALE, STANISLAUS CO., CAL.—Application has been made by County Librarian Miss C. D. Provines with the Carnegie Corporation asking that a library building to cost \$7,000 be erected here. It is thought if the request is granted additional money will be secured to erect a more costly building.

SELBY, CONTRA COSTA CO., CAL.—On December 11th an election will be held to vote bonds of \$11,000 for the construction of a school building. This will be the second election held in this district for the voting of these bonds.

AUBURN, PLACER CO., CAL.—All three propositions providing for city improvements were carried at the election held in Auburn last week. Proposition 1 provided \$15,000 for the extension of sewers, construction of a septic disposal system and enlarging several of the main sewers. Proposition 2 provided \$5,000 for the purchase of fire auto trucks, and proposition 3, for the installation of a fire alarm system. When the bonds have been sold bids for the above work will be called for.

BAKER, ORE.—Bonds of \$125,000 were voted here last week. The issue will provide funds for the erection of a high school building.

KENNETT, SHASTA CO., CAL.—The City Trustees have received two bids for the purchase of the Kennett bridge bonds amounting to \$5,000.

THE DALLES, ORE.—A proposition to vote bonds of \$290,000 will be discussed by the County Court and other active boosters at a meeting to be held here this week.

SAN RAFAEL, MARIN CO., CAL.—The proposition of calling a special election to vote bonds of \$40,000 to provide funds for dredging the San Rafael Canal was laid over for further consideration at the last meeting of the Council.

WOLTERS SCHOOL DISTRICT, CAL.—The voters here are contemplating calling an election to vote bonds of \$12,000 for the erection of a school building.

WHITTIER, LOS ANGELES CO., CAL.—Engineer F. C. Roberts, Marsh-Strong Bldg., L. A., has been commissioned to prepare plans for a new water works and distributing system to be installed at Whittier at a cost of \$100,000. A bond election will be called to vote funds for the work.

RIVERSIDE, RIVERSIDE CO., CAL.—The \$30,000 bond issue of the Mecca Road District has been declared invalid on account of irregularities at the polls.

INDIO, RIVERSIDE CO., CAL.—The \$65,000 highway bonds have been sold.

SAN RAFAEL, MARIN CO., CAL.—At the last meeting of the board of directors of the Municipal Water District a resolution was adopted to advertise for bids for the sale of \$600,000 of the bonds to be sold December 21st, \$300,000 to be delivered in January, and \$300,000 in April.

The plan of the board of directors is to use about \$150,000 in the purchase of the Howard-Shafter properties, \$130,000 for tunnel work, road work, preliminary work on the Alpine dam, and purchase of right of way

over the Jory and Cascade properties and \$289,000 for the purchase of the North Coast Company's property, at the payment of interest for the first year.

CALEXICO, IMPERIAL CO., CAL.—The sale of \$10,000 additional Calexico school bonds has been authorized by the Supervisors.

CALEXICO, IMPERIAL CO., CAL.—Tuesday, December 28th, is the date set for the \$100,000 bond election to determine whether water and sewer extension work shall be carried out in Calexico, the trustees passing the ordinance on first reading. Three separate issues are contained in the election one for sewer extension in different parts of the city; another for water extension on the east side and also for fire protection in the downtown section. The last item, \$5,000, is concerned with the proposed purchase of a fire truck for the city.

## BRIDGES, DAMS AND HARBOR WORK

SAN JOSE, SANTA CLARA CO., CAL.—Revetment wall, reinforced concrete. Cost not stated. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. At the last meeting of the Santa Clara Supervisors plans and specifications for a reinforced concrete revetment and curtain wall on the Los Gatos Creek were approved and bids were ordered to be received up to December 6th at 11 a. m. Further information may be had from the County Clerk or Engineer at San Jose.

SAN JOSE, SANTA CLARA CO., CAL.—Culvert, reinforced concrete. Cost not stated. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Plans and specifications prepared by the County Engineer for the construction of a concrete culvert on Edmonston avenue in Supervisor District No. 1, near Morgan Hill, were accepted by the county Supervisors and bids for the work were ordered received up to December 6th at 11 a. m.

SAN JOSE, SANTA CLARA CO., CAL.—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. The Santa Clara County Supervisors at the last meeting ordered the County Engineer to prepare plans and specifications for the construction of a reinforced concrete bridge over the Guadalupe Creek on the Branham road near the railroad crossing. On completion and approval of the plans bids for this work will be called.

AUBURN, PLACER CO., CAL.—Bridge, timber construction. Cost not stated. Engineer, County Surveyor, Auburn. Owners, Placer County. Bids will be opened on December 7th for the construction of a wooden bridge, 420 feet long, across Dry Creek on the section line between sections 8 and 9, Tp. 10 N., R. 6 E., M. D. B. and M., in Supervisor District No. 1.

VISALIA, TULARE CO., CAL.—Bridges, 2, reinforced concrete and timber. Cost not stated. Engineer, County Surveyor, Visalia. Owners, Tulare County. At a recent meeting of the County Supervisors, bids were ordered received up to December 7th for the construction of two bridges in the Second District, one over Sand Creek and

one of reinforced concrete construction over the Alta Canal. Further information may be had from the County Engineer at Visalia.

**SANTA BARBARA, SANTA BARBARA CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor, Santa Barbara. Owners, Santa Barbara County. Plans have been completed by the County Engineer for the construction of two bridges in Gaviota Canyon, the overhead crossing of the railroad near Ellwood and a bridge at El Capitán. The plans are now in the hands of the State Highway Commission awaiting their approval. Bids will be called immediately by the County Supervisors of Santa Barbara.

**RED BLUFF, TEHAMA CO., CAL.**—Bridge, timber construction. Cost not stated. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. In response to a petition presented to the County Supervisors the County Engineer has been instructed to prepare plans and specifications for a wooden bridge to be erected over the North Fork of Mill Creek and Dry Creek in Road District No. 3. Bids will be called for on the completion and approval of the plans.

**MERCED, MERCED CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor, Merced. Owners, Merced County. At the last meeting of the County Supervisors the construction of a bridge on Pacheco Pass road in District No. 5, was ordered. A resolution was adopted at the same meeting that the county pay one-half of the cost of a concrete bridge across South Slough at the city limits.

**MERCED, MERCED CO., CAL.**—Bridges, timber and reinforced concrete. Cost not stated. Engineer, County Surveyor, Merced. Owners, Merced County. The Merced County Supervisors have directed the County Engineer to prepare plans and specifications for bridges to be constructed in the county as follows: Cottonwood to Newman road, over canal near Hubbard and Carmichael; also bridge over Quinto Creek on Cottonwood school house road near Clay school house. Bids for the construction of these bridges will be called for on the completion and adoption of the plans.

**MODESTO, STANISLAUS CO., CAL.**—Bridges, reinforced concrete. Cost not stated. Engineer, County Surveyor, Modesto. Owners, Stanislaus County. Bids will be received until December 11th for the construction of a bridge over a branch of Dry Creek and a reinforced concrete bridge over lateral No. 5, of the Modesto Irrigation District.

**SALLINAS, MONTEREY CO., CAL.**—Bridge approach, reinforced concrete. Cost not stated. Engineer, County Surveyor Howard F. Cozzens, Sallinas. Owners, Monterey County. The County Supervisors at their last meeting directed the County Surveyor to construct an approach to the bridge crossing the Pajaro River at Watsonville under the Day Labor system.

**WILLOWS, GLENN CO., CAL.**—Bridge, reinforced concrete, \$7,000. Engineer, County Surveyor, Willows. Owners, Glenn County. Cotton Bros., 516 32nd street, Oakland, bridge contractors, have asked the Supervisors

to release them from a contract for building the Salt Creek bridge at Newryllie. The Cottons bid \$6,000. They now say they made a mistake of \$1,000 and that their bid should have read \$7,000. Even at that figure they were the lowest bidders. The Supervisors have taken the matter under consideration and will make their decision known at the December meeting.

#### Contracts Awarded.

**SANTA CRUZ, SANTA CRUZ CO., CAL.**—Bridge, reinforced concrete, \$1,575. Engineer, County Surveyor, Santa Cruz. Owners, Santa Cruz County. Contractors, Foster-Vogt Co., 503 Market street, S. F. Contract price, \$1,575.

#### CHURCHES

**FRESNO, FRESNO CO., CAL.**—Church, 2 story and base, brick and steel. Cost not stated. Architect, Robert B. Hotchkiss, Rowell Bldg., Fresno. Owners, First Church of Christ, Scientist. Location, corner of Calaveras and N streets, covering an area of 82 by 115 feet. Will contain the main auditorium, seating 900 people, Sunday school rooms and reading rooms. Interior finish pine, hardwood and ornamental plaster. Central heating system and vacuum cleaning. Art glass windows. Exterior faced with pressed brick trimmed with terra cotta. Plans complete and figures being taken.

**PORTLAND, ORE.**—Mausoleum, 1 story, reinforced concrete and granite, \$60,000. Architects, Lawrence and Holford, Chamber of Commerce Bldg., Portland. Owners, Portland Mausoleum Co. Location, Riverview Cemetery. Will contain 350 crypts. Interior finish stone and ornamental plaster. Modern electric work and plumbing. Exterior faced with granite. Plans being prepared.

**MERCED, MERCED CO., CAL.**—Church, 1 story and base, brick, \$20,000. Architects, Cowell & Bedesen, Merced. Owners, Central Presbyterian Church. Location, 20th and L streets. Designed in the classic style. Will contain main auditorium, Sunday school rooms and pastor's study. Interior finish pine and ornamental plaster. Art glass windows. Central heating system. **OAKLAND, CAL.**—The cabinet shop of Alfred Moack at Fifth and Franklin streets was destroyed by fire last week. The damage is placed at several thousand dollars.

### FLATS

**SAN FRANCISCO**—Flats, 3, 3 story and base, frame, \$6,000 each. Architect, L. Traverso, 834 Union street, S. F. Owners, L. Cavagnaro & Co. Location, west Taylor south of Lombard. Each will contain three flats of five and six rooms. Interior finish pine and elm panels with some hardwood floors. Open fire places and tile mantels. Tile bath rooms. Marble and tile entrance. Exteriors covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Flats and shop, 2 story and base, frame, \$7,000. Architect, none. Owner, William Helbing. Location, north Fulton west of Franklin, covering an area of 28 by 120 feet. First floor arranged for automobile paint shop and upper floor for two flats. Interior finish pine. Some hardwood floors. Open fire places and tile mantels. Exterior covered with ship-lap and cement plaster. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$4,000. Architect, none. Owner, Oscar H. Curtaz, 1420 Market street, S. F. Location, north Fulton west of Franklin, covering an area of 28 by 120 feet. Will contain two six-room flats. Interior finish pine and elm panels. Hardwood floors, open fire places and tile or brick mantels. Tile bath rooms. Automatic water heaters. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**SACRAMENTO, CAL.**—Flats, 2 story and base, frame, \$4,500. Architect, none. Owner, W. B. Ellis, 520 1/2 20th street, Sacramento. Location, 1517 28th street. Will contain two flats of five and six rooms. Interiors finished in pine and elm panels. Hardwood floors and open fire places. Mantels tile or brick. Tile wainscot in bath rooms. Automatic water heaters. Exterior covered with rustic and cement plaster on metal lath. Plans complete and work to be done by Day Labor.

### GARAGES

**SAN FRANCISCO**—Garage, 2 story and base. Class A construction, \$25,000. Architect, August G. Headman, New Call Bldg., S. F. Owner, J. K. Bigelow. Location, north Bush between Powell and Mason streets, covering an area of 87 1/2 by 137 1/2 feet. Construction, fireproof. Concrete floors. Two inclines. Metal window sash and frames. Special tanks. Exterior faced with cement plaster. Plans complete and figures being taken.

**LOS ANGELES, CAL.**—Garage 3 story and base. Class A construction, \$100,000. Architects, Morgan, Walls & Morgan, Van Nuy's Bldg., L. A. Owners, J. W. Leavitt & Co. Location, Oliver street, covering an area of 100 by 120 feet. Construction steel and reinforced concrete. Main floor fitted up for office and sales rooms. Interior finish pine, hardwoods and tile. Upper floors, storage space, repair rooms and shipping department. Exterior faced with cement plaster. Plans being prepared.

**LOS ANGELES, CAL.**—Garage, 2 story and base, brick. Cost not stated. Architect, Albert C. Martin, Higgins Bldg., L. A. Owner, Tony Milovitch and Miss T. Garibaldi. Location, Los Angeles street between 5th and 6th streets, covering an area of 60 by 115 feet. Designed for a commercial garage. Concrete floors, metal window sash and frames and special gasoline storage tanks. Exterior faced with pressed brick. Plans complete and figures being taken.

### Contracts Awarded.

**EUREKA, HUMBOLDT CO., CAL.**—Garage, 1 story and base, brick, \$6,244. Architect, E. J. Burke, Eureka. Owner, S. S. Mitchell. Contractors, Mercer-Fraser Co., Eureka. Contract price, \$6,244.

### GOVERNMENT WORK & SUPPLIES

#### Reclamation Work.

A summation of the work of the Reclamation Service to the beginning of the present fiscal year shows that it has dug 9,592 miles of canals and ditches and excavated 89 tunnels, with an aggregate length of more than 25 miles. Dams of masonry, earth crib, and rock fill have been erected with a total volume of 12,200,000 cubic yards. These include the two highest dams in the world. The available reservoir capacity at this time is approximately 6,500,000 acre feet, or sufficient to cover the states of New Jersey and Delaware to a depth of 12 inches. The service has built 4,622 bridges, with a total length of 19 miles. Its culverts number 3,714 and are 36 miles long. There are now in operation 298 miles of pipe line and 85 miles of flumes. The service has built 784 miles of wagon road, much of it in what was before inaccessible mountain regions. 82 miles of railroad, 2,554 miles of telephone lines, 429 miles of power transmission lines, and 1,068 buildings, such as power houses, pumping stations, offices, residences, barns and store-houses. The projects now under way or completed embrace approximately 3,000,000 acres of irrigable land, divided in about 60,000 farms of from 10 to 160 acres each. During the year 1915 water was available from government ditches for 1,450,407 acres on 29,017 farms, and the government was under contract to supply water to 1,055,003 acres. The excavations of rock and earth amount to 130,149,368 cubic yards. The government has used 2,561,382 barrels of cement and has manufactured 1,177,215 barrels of cement and sand cement. The power developed amounts to approximately 35,000 horsepower. The net investment of the service to date is approximately \$100,000,000.

#### Canal Circular 977.

The following bids were received by the general purchasing officer, Panama Canal, Washington, D. C., November 4, under circular 977, for furnishing the annual supply of fuel oil during the calendar year 1916:

Bid 1. Standard Oil Co., 200 Bush street, San Francisco, Cal., Balboa, 92c per bbl, 20 to 25 days; Cristobal, \$1.05, 22 to 27 days; in 60,000-bbl lots.

2. The Texas Co., 17 Battery Place, New York City, at Cristobal, \$1.55 per bbl, less 25 per cent, 60 days, more than 25 per cent, 120 days; alternate bid, \$1.49, half Mexican; for delivery before January 1, \$1.65 and \$1.59.

#### Reclamation Service, Chain Shafts, Etc.

The following bids were received by the chief engineer, U. S. Reclamation Service, Washington, D. C., November 8 for furnishing chain shafts for rolling crest of Grand River diversion dam, Grand Valley project, Colo.:

Item 1, 1 chain shaft for 60-ft roller; 2, 6 do, for 70-ft rollers; 3, operating chain and guard chain for 60-ft roller; 4, 6 operating and guard chains for 70-ft rollers; 5, 1 safety for 60-ft roller and 6 do, for 70-ft roller.

Vulcan Iron Works, Denver, Colo., items 1 to 5, \$8,750; time June 1.

Lakeside Bridge & Steel Co., North Milwaukee, Wis., items 1 to 4, \$5,147; 5, \$891; delivery, item 1, 35 days; 2, 35 days; 3, 4, and 5, 60 days.

Link Belt Co., Chicago, Ill., items 1 to 4, \$10,500; 5, \$1,572; delivery, items 1, 3, and 5, February 21; 2 and 4, March 22, 1916.

#### Cylinder Gates.

The following bids were received by the U. S. Reclamation Service at Denver, Colo., under advertisement No. 853, for cylinder gates:

Darbyshire-Harvie Iron & Machine Co., El Paso, Tex., \$1,235.

El Paso Foundry & Machine Co., El Paso, Tex., \$1,300.

Minneapolis Steel & Machinery Co., Minneapolis, Minn., \$1,050.

Vulcan Iron Works, Denver, Colo., \$1,125.

Western Pipe & Steel Co. of California, Richmond, Cal., \$960; accepted.

Seattle Construction & Dry Dock Co., Seattle, Wash., \$1,380.

#### Butte, Mont., Repairs.

The contract for repairing the work-room roof at the U. S. post office, Butte, Mont., has been awarded to the Montana Roofing Co., Butte, Mont., at \$116.

#### Panama, Spuds.

The following bids were received on November 6 by the assistant purchasing agent of the Panama Canal, at San Francisco, Cal., for furnishing three spuds of Douglas fir, 34x34 ins x 70 ft:

Van Arsdale Lumber Co., San Francisco, Cal., \$599 ea.

W. R. Grace & Co., San Francisco, Cal., \$420; accepted.

#### Denver, Colo., Chutes.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., November 8 for installing chutes in the U. S. post office at Denver, Colo.:

American Mailing Device Corp., 103

Park avenue, New York City, \$712; 10 days.

Cutler Mail Chute Co., Rochester, N. Y., \$718; 60 days.

#### Prospective Bidders.

Plans and specifications have been furnished the following firms for work at Pearl Harbor, radio buildings. Bids close December 4:

W. N. Concanon, San Francisco, Cal. Spalding Construction Co., Hialto Building, San Francisco, Cal.

Construction and Engineering Co., San Francisco, Cal.

Trussed Concrete Steel Co., Washington, D. C.

#### Post Office Buildings.

A new plan has been adopted by Secretary McAdoo for classification of post office buildings. The regulation will be referred to postal receipts and will be as follows:

Class A—Marble or granite facing; fireproof throughout; metal frames, sashes and doors; interior finish to include the finer grades of marble, ornamental bronze work, mahogany, etc.; public spaces to have monumental treatment; mural decorations; special interior lighting fixtures.

Class B—Limestone or sandstone facing; fireproof throughout; exterior frames and sash, metal; interior frames and sash, metal; interior finish to exclude the more expensive woods and marbles; ornamental metal to be used only where iron is suitable; restricted ornament in public spaces.

Class C—Brick facing with stone or terra cotta trimmings; fireproof floors; non-fireproof roof, frames, sashes and doors, wood; interior finish to exclude the more expensive woods and marbles, the latter used only where sanitary conditions demand; public spaces restricted to very simple forms of ornament.

Class D—Brick facing; little stone or terra cotta used; only first floor fireproof; stock sash, frames, doors, etc., where advisable; ordinary class of building.

### HALLS AND SOCIETY BUILDINGS

#### Contracts Awarded

VISALIA, TULARE CO., CAL.—Municipal auditorium, 2 story and base, brick and steel, \$32,000. Architects, Coates & Traver, Rowell Bldg., Fresno. Owners, City of Visalia. Contractors, Trewitt & Shields, Fresno. Contract price, \$32,000.

#### HOSPITALS

SAN FRANCISCO—Hospital wings, 3 story, Class A construction. Cost as follows. Architect's names as given below. Owners, City and County of San Francisco. The Board of Public Works has requested the Supervisors to provide funds for the construction of both the southeast and northeast wings of the San Francisco Hospital. Architect, Hermann Barth, 12 Geary street, has plans for the southeast wing complete and the same have officially been approved. The sum of \$55,250 is asked by the Board of Works to start this construction. Architect John Reid, Jr., First National Bank Bldg., has plans

complete for the northeast wing, and the Board of Works has requested the sum of \$10,500 to start this construction. Both buildings will be of the Class A type, with steel frames and brick exterior walls, hollow tile interior partitions and concrete floors. Bids will be called for shortly.

EUREKA, HUMBOLDT CO., CAL.—Hospital, 1 and 2 story and base, frame, \$13,000; \$1,000 additional for equipment. Architect, E. J. Burke, Eureka. Owners, Humboldt County. Will contain wards and private rooms for male and female patients. Interior finish pine with some hardwood floors. Furnace heat and hot water system. Tile bath rooms and operating room. Exterior covered with rustic and shingles. Plans complete and figures being taken.

NORWALK, LOS ANGELES CO., CAL.—Hospital laundry, 1 story and base, concrete and frame. Cost not stated. Architect, State Architect George B. McBougall, Sacramento. Owners, State of California. Bids will be received until December 15th for the construction of a laundry building. Exterior faced with cement plaster. Plans and specifications on file at the State Department of Engineering. An official proposal appears in another column of this issue.

LOS ANGELES, CAL.—Hardwood floors, etc. Cost not stated. Architect, none. Owners, United States Government. Sealed proposals will be received at office of Treasurer Pacific Branch, N. H. D. V. S., Soldiers' Home, Los Angeles County, Cal., and there opened at 12 o'clock M., December 11, 1915, for furnishing and laying hardwood and composition floors in three barracks at above location. Specifications and other information can be had upon application to the Treasurer, Geo. T. Baggott, Treasurer.

### IRRIGATION PROJECTS

SALEM, ORE.—Irrigation work, \$1,600,000. Engineer's name not given. Owners, Graves Creek Irrigation District. State Engineer Lewis has issued a permit to the Graves Creek irrigation project to appropriate sufficient water from Graves and Jumpoff creeks to irrigate 20,000 acres of land and to develop 3,000 horsepower. Two large reservoirs are included in the plans and, exclusive of them, the cost of the works is estimated at \$1,600,000. The project is located in Josephine County.

MODESTO, STANISLAUS CO., CAL.—Irrigation work. Cost not stated. Engineer, Herrmann, Modesto. Owners, Modesto Irrigation District. Bids received by the Board of Directors of the Modesto Irrigation District for the work of cleaning, deepening and extending the main drainage canal of the district were rejected as they were above Engineer Herrmann's estimate. The bidders were Contra Costa Construction Co., S. F., \$26,000; Ross Construction Co., Sacramento, \$19,150. The work will now be done under the Day Labor system in charge of Engineer Herrmann.

WILLOWS, GLENN CO., CAL.—Irrigation canals. Cost not stated. Engineer's name not given. Owners, Glenn County Irrigation District. Proposals are wanted at once for the construction

tion of a system of canals and laterals and deep drains in Glenn County. For information and plans see Washington Dodge, 1 Sansome street, San Francisco.

LA PINE, ORE.—Irrigation power equipment. Cost not stated. Engineer's name not given. Owners, Pringle Falls Water and Power Co., Portland. The Pringle Falls Water and Power Co., with head offices in Portland, has just been sold to a syndicate of Eastern capitalists headed by Tomes Bros. of Nebraska. The consideration is said to have been \$300,000. The plans of the new company as announced are to supply water for the irrigation of the entire La Pine basin and Eden Coulee, Silver Lake and Port Rock valleys. Power and light for La Pine will also be among the first steps in development. The power plant, which is practically finished, will be immediately equipped, a sawmill with a daily capacity of 150,000 feet will be erected in the spring.

#### Contracts Awarded

MODESTO, STANISLAUS CO., CAL.—Irrigation work. Cost as follows. Engineer, Herrmann, Modesto. Owners, Modesto Irrigation District. Tieslau Bros., 110 Jessie street, S. F., for building the transition section of the main canal to connect with the Dry Creek flume, \$2,572; G. J. Ulrich, Modesto, for building nine concrete drops in lateral No. 3, \$19,540; and Peart Bros. of Oakland for construction of concrete facing and curtain wall for dam No. 1 of the Dallas reservoir, \$72,800.

#### LIBRARIES

BERKELEY, ALAMEDA CO., CAL.—Library structural steel work. Cost not stated. Architect, John Galen Howard, 604 Mission street, S. F. Owners, University of California. Plans and specifications have been completed and figures will be received up to 9 A. M. of December 1st for furnishing and erecting the structural steel for the new University Library building. Plans can be secured from the office of the Comptroller at Berkeley. An official proposal appears in another column of this issue.

### RAILROAD CONSTRUCTION AND EQUIPMENT

SEATTLE, WASH.—Railroad sheds, 2 story and base, frame, \$60,000. Architect, West. Port of Seattle Commission, Seattle. Owners, City of Seattle. Location, Spokane avenue, covering a large ground area. Exterior corrugated iron. Plans complete and figures being taken. Bids close on December 8th.

#### RESIDENCES

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,500. Architect, none. Owners, Oscar Heyman & Bro., 712 Market street, S. F. Location, east 15th avenue north of Balboa. Will contain five rooms and bath. Interior finish pine and elm panels. Hardwood floors, open tile place and tile or brick mantel. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, A. R. Lapham, 511 12th avenue, S. F. Location, east 12th avenue north of Cabrillo. Will contain six rooms, bath and sleeping porch. Interior finish pine and elm panels with some hardwood floors. Open fire place and tile or brick mantel. Tile bath room. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Residences, 4, 1 story and base, frame, \$2,000 each. Architect, B. R. Christensen, Lick Bldg., S. F. Owner's name withheld. Location, Sunnyside District. Each house will contain five rooms and bath. Interior finish pine throughout. Hardwood floors. Open fire places and tile or brick mantels. Automatic water heaters. Exteriors covered with rustic and shingles. Plans complete and figures being taken.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 2 story and base, frame, \$5,000. Architect, Harris Allen, Central Bank Bldg., Oakland. Owner, R. L. Underhill. Location, Tamalpais near Rose. Will contain nine rooms, bath and sleeping porch. Interior finish pine, elm panels and white enamel. Hardwood floors and open fire place. Tile or brick mantel. Imitation tile in bath room. Automatic water heater. Exterior covered with shakes. Plans being prepared.

**OAKLAND, CAL.**—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, George W. Nunes, 5430 Dover street, Oakland. Location, north Chabot Road east of Claremont. Will contain six rooms, bath and sleeping porch. Interior finish pine and white enamel. Hardwood floors. Open fire places and tile or brick mantel. Imitation tile bath. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**PIEDMONT, ALAMEDA CO., CAL.**—Residence, 1½ story and base, frame, \$3,000. Architect, C. Walde, 1223 Telegraph avenue, Oakland. Owner, W. F. Neary. Location, west York Drive north of Holly Place. Will contain seven rooms, bath and sleeping porch. Interior finish pine, hardwoods and white enamel. Hardwood floors. Open fire places and tile mantels. Furnace heat. Automatic water heater. Bath room finished in tile. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**ALAMEDA, ALAMEDA CO., CAL.**—Residence, 1 story and base, frame, \$2,000. Architect, none. Owner, Conrad Roth, 2117 Pacific avenue, Alameda. Location, corner of Schiller and Buena Vista avenues. Will contain five rooms, bath and sleeping porch. Interior finish pine and white enamel. Some hardwood floors. Open fire places and tile mantels. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**ALAMEDA, ALAMEDA CO., CAL.**—Residence, 1 story and base, frame, \$2,000. Architect, none. Owner, F. P. Montague, 2911 East 16th street, Oakland. Location, 1652 Central avenue. Will contain five rooms and bath. Interior finish pine throughout. Some

hardwood floors. Open fire place and tile or brick mantel. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 1 story and base, frame, \$3,000. Architect, none. Owner, Charles M. Johnson, 2317 Carlton street, Berkeley. Location, west Benvenue south of Webster. Will contain six rooms, bath and sleeping porch. Interior finish pine, hardwood veneer and white enamel. Hardwood floors, furnace heat and open fire places. Mantels tile or brick. Bath room tile. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**BERKELEY, ALAMEDA CO., CAL.**—Residences, 2, 1 story and base, frame, \$2,200 each. Architects, Hutchinson & McLean, 470 13th street, Oakland. Owner, John D. Garrettson, 4119 Mahalia avenue, Oakland. Location, south Julia west of California. Each will contain six rooms and bath. Interior finish pine with some elm panels. Hardwood floors and open fire places. Mantels tile and brick. Automatic water heaters. Exteriors covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 2 story and base, frame, \$3,000. Architect, H. H. Gutterson, 68 Post street, S. F. Owners, Mason-McDuffie Co. Location, south Garber west of Oak Knoll. Will contain seven rooms, bath and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors. Furnace heat, open fire places and tile or brick mantels. Bath rooms tile. Automatic water heater. Exterior covered with cement plaster. Plans being prepared.

**OAKLAND, CAL.**—Residence, 2 story and base, frame, \$4,500. Architect, M. L. Diggs, 2444 Bowditch, Berkeley. Owner, J. C. O'Connor. Location, east Carlton south of Prospect. Will contain eight rooms, two baths and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors. Open fire places and tile or brick mantels. Furnace heat and automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**PETALUMA, SONOMA CO., CAL.**—Residence, 2 story and base, frame. Cost not stated. Architect, Warren Perry, 604 Mission street, S. F. Owner, Henry B. Wintringham, Petaluma. Will contain eight rooms, two baths and office. Interior finish pine, hardwood and white enamel. Hardwood floors. Open fire places and tile or brick mantels. Bath rooms tile. Furnace heat and automatic water heater. Exterior covered with cement plaster. Plans complete and figures being taken.

**OAKDALE, STANISLAUS CO., CAL.**—Residence, 2 story and base, frame, \$11,000. Architect's name not given. Owner, T. G. Roberts, Oakdale. Location, 1st avenue and Walnut street. Will contain nine rooms, two baths and sleeping porch. Interior finish pine and hardwood with some white enamel. Hardwood floors. Furnace heat and

open fire places. Mantels tile or brick. Automatic water heater. Bath rooms finished in tile. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**FRESNO, FRESNO CO., CAL.**—Residences, 1 story and base, frame, \$2,500 each. Architect, none. Owners, Central California Land and Improvement Co., 955 I street, Fresno. The Central California Land and Improvement Company is planning the erection of several bungalows on the La Sierra or Einstein tract. Work is to be commenced at once on the first dwelling located on McKinley near Belmont, which will be modern in every particular, with white asbestos roof. Edwin Einstein is secretary of the company.

**FRESNO, FRESNO CO., CAL.**—Residence, 1 story and base, frame, \$1,500. Architect, none. Owner, J. R. Church, 1221 Y street, Fresno. Location, Riverside Addition. Will contain five rooms and bath. Interior finish pine. Some hardwood floors. Open fire place. Automatic water heater. Exterior covered with rustic. Plans complete and work by Day Labor.

**FRESNO, FRESNO CO., CAL.**—Residence, 2 story and base, frame, \$2,750. Architect, none. Owners, Gede & Gede, 451 Poplar avenue, Fresno. Location, Smith Tract. Will contain six rooms, bath and sleeping porch. Interior finish pine and white enamel. Hardwood floors. Open fire place and tile mantel. Automatic water heater. Exterior covered with cement plaster. Plans complete and work by Day Labor.

## SCHOOLS

**SAN FRANCISCO**—School, 2 and 3 story and base. Class A construction, \$125,000. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owners, City and County of San Francisco. #### SEWERS, STREET WORK & WATER SYSTEMS

**ANTIOCH, CONTRA COSTA CO., CAL.**—Street paving. Cost as follows. Engineer, City Engineer, Antioch. Owners, City of Antioch. The following bids were opened by the Trustess for paving the principal streets of Antioch: Ralsch Improvement Co., 1108 Crocker Bldg., S. F., \$15,489.89. McGilivray Construction Co., 1007 7th street, Sacramento, \$15,891.80. City Improvement Co., Whittell Bldg., S. F., \$21,850.00. A contract will be awarded shortly.

**RICHMOND, CONTRA COSTA CO., CAL.**—Street improvement. Cost not stated. Engineer, City Engineer, Richmond. Owners, City of Richmond. At the last meeting of the City Council plans and specifications prepared by City Engineer Chapman were approved for the improvement of 33rd street, and bids were ordered called until November 29th. Further information may be had from the City Engineer.

**REDONDO BEACH, LOS ANGELES CO., CAL.**—Street improvement. Cost not stated. Engineer, City Engineer, Redondo Beach. Owners, City of Redondo Beach. At the last meeting of the City Trustees the following action was taken relative to public improvements. A resolution adopting specifications for the construction of a wood bridge across Beryl street on Lucia avenue was approved. The City Engineer was instructed to prepare plans and specifications and estimate the cost of building a public comfort station at the north approach to the municipal pier.

In the matter of the substitution of concrete lamp posts for iron ones on the municipal wharf, after much discussion the special engineer was instructed to arrange for the substitution.

**SANTA BARBARA, SANTA BARBARA CO., CAL.**—Road improvement. Cost not stated. Engineer, County Surveyor, Santa Barbara. Owners, Santa Barbara County. The City Council has plans under way for the paving of west Mission street from Bath to San Andreas, and out to Modoc road to join with the county paving.

**PASCO ROBLES, SAN LUIS OBISPO CO., CAL.**—Sewer construction. Cost not stated. Engineer, City Engineer Paso Robles. Owners, City of Paso Robles. The City Trustees have ordered bids received for the construction of sewers in certain streets of the city. Bids close November 29th. Further information may be had from the City Clerk at Paso Robles.

**BERKELEY, ALAMEDA CO., CAL.**—Street improvement. Cost not stated. Engineer, City Engineer, Berkeley. Owners, City of Berkeley. Bids will be opened on November 30th for constructing concrete culverts 6 feet by 6 inside dimensions in Cordornices Creek across Santa Fe avenue, Masonic avenue and Evelyn avenue; that earth fill be made in said streets south of the northern boundary line of the City of Berkeley to the level of the top of the creek banks, and that macadam be placed on top of the fill in Evelyn avenue to a width of 16 feet.

**SAN LEANDRO, ALAMEDA CO., CAL.**—Street extension. Cost not stated. Engineer, City Engineer Goodwin, San Leandro. Owners, City of San Leandro. At the last meeting of the Town Board City Engineer Robert L. Goodwin was asked to furnish plans and specifications for the improvement of Sybil avenue, which will be extended through to the Foothill Boulevard. Further mention will be made of this work when the plans are complete.

**REDWOOD CITY, SAN MATEO CO., CAL.**—Street pavement. Cost not stated. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. The County Surveyor was instructed at a recent meeting of the County Supervisors to prepare plans and specifications for a 16-foot 5-inch macadam road with the necessary screenings on the Holy Cross fill from Cypress Lawn to the gate at Holy Cross. Further information will be made of this work when the plans are completed.

**SALEM, ORE.**—State highway work. Cost as follows. Engineer, State Highway Commission, Salem. Owners, State of Oregon. The State Highway Commission apportioned the 1915 highway funds as follows: For administration expenses and bridges, \$25,000; Clatsop County, \$20,500; Columbia County, \$26,000; Hood River, \$5,000; Hood River and Wasco, \$45,000; Crook, \$10,000; Washington, \$11,500; Douglas and Josephine, \$20,000; Yamhill, Tillamook, \$3,000; Lane, \$5,000; Polk, \$5,000; Jackson, \$15,000; making a total of \$337,000.

**ALAMEDA, ALAMEDA CO., CAL.**—Street paving. Cost not stated. Engineer, City Engineer, Alameda. Owners, City of Alameda. Bids are now

being received for the improvement of Central avenue from Fernside to 4th street, thus giving this city a paved boulevard from one end of the city to the other. Bidders are to furnish their own specifications for the work. Further information may be had from the City Clerk at Alameda.

**REDWOOD CITY, SAN MATEO CO., CAL.**—Sewer construction. Cost not stated. Engineer, City Engineer, Redwood City. Owners, Redwood City. The City Trustees at their last meeting instructed the City Engineer to prepare plans and specifications for the construction of a sewer on the county road from James street to Broadway. Further mention will be made of the work when the plans are complete.

**SALINAS, MONTEREY CO., CAL.**—Road construction. Cost not stated. Engineer, County Surveyor Cozzins, Salinas. Owners, Monterey County. At the last meeting of the County Supervisors plans and specifications prepared by County Surveyor Cozzins for grading and macadamizing the Monterey-Castroville road, in Monterey, Allsai and Pajaro road districts, were approved, and bids were ordered called until December 6th at 2 p. m. Plans were also approved for the improving of a portion of the Coast road, near the Oliver ranch house, in Sur road district, and bids were ordered called for December 6th. Plans and specifications together with full information relative to both improvements may be had from the County Surveyor at Salinas.

**TURLOCK, STANISLAUS CO., CAL.**—Street improvement. Cost not stated. Engineer, City Engineer, Turlock. Owners, City of Turlock. Plans and specifications prepared by the City Engineer for the improvement of Diablo street from the easterly property line of Marshall street to the north property line of East avenue, were adopted at the last meeting of the City Trustees. The specifications provide that the street be oiled, rolled, graded and curbed with granite curbs. Bids on this work will soon be called for.

#### Contracts Awarded.

**OAKLAND, CAL.**—Stores, 1 story and base. Class A construction, \$18,000. Architects, Richardson & Burrell, Albany Bldg., Oakland. Owners, First Trust and Savings Bank. Contractor, F. A. Muller, Syndicate Bldg., Oakland. Contract price, \$18,000. Contractor taking sub-figures.

**DELANO, KERN CO., CAL.**—Market, 1 story and base, brick. Cost not stated. Architect, none. Owner, Luther E. Crow. Contractors, Trewhitt & Shields, Fresno. Contract price not stated.

## THEATRES

## Contracts Awarded.

**LOS ANGELES, CAL.**—Motion picture studio, frame, \$20,000. Architect, none. Owners, National Drama Co. Contractors, W. M. Shumway Co., 6057 Hollywood avenue, L. A. Contract price, \$20,000.

## Building Totals for the Month Of October.

Building totals for the month of October, 1915, point to a most satisfactory condition prevailing in building circles, not only in San Francisco and the adjoining territory, but throughout the entire United States. A close comparison is given in the following table, published by the American Con-

tractor of Chicago, of the prosperity of the building business in seventy-six American cities for the month of October.

Concerning the totals as given for San Francisco during October 1914, and 1915, in the following table our readers should bear in mind the fact that during October, 1914, the City and County of San Francisco awarded the contract for the Twin Peaks Tunnel, an enterprise which, involved the expenditure of \$3,372,000, or considerably more than one-half of the total of building construction for the month while the Panama-Pacific International Exposition spent \$584,257 during October, 1914, against nothing in the same month of this year. Excepting these two items the grand total for October of 1914 was \$1,985,746 while October, 1915, with no large items of City and County construction, shows a grand total of \$2,261,687.

October is not only the largest of any of the months during 1915, but totals the most of any October since 1908, as is shown by the following table giving the total for the month of October since 1906.

October, 1906	\$6,826,331
October, 1907	4,906,430
October, 1908	3,062,047
October, 1909	2,083,285
October, 1910	1,772,952
October, 1911	1,928,826
October, 1912	1,918,839
October, 1913	777,387
October, 1914	5,942,013
October, 1915	2,261,687

## BUILDING OPERATIONS FOR OCTOBER.

Building operations for October made decidedly the best showing for the year to date. Official reports received by the American Contractor, Chicago, from 76 cities show building permits issued for the month to amount to \$64,587,622, as compared with \$49,274,609 for October last year, an increase of 42 per cent. There was a gain of 32 per cent in September and one of 14 per cent in August, the comparative reports for months earlier in the year all showing losses as compared with 1914. The increase last month was so large that it seems to mark a full return to the normal amount of construction work. The improvement is general throughout the country, 54 of the 76 cities showing gains. Among the cities making the more notable increases are the following, together with the percentage of their gains: Akron, 299; Albany, 193; Baltimore, 110; Boston, 100; Cincinnati, 115; Dayton, 762; Harrisburg, 196; Kansas City, 183; Manchester, 198; Minneapolis, 120; Nashville, 120; Oklahoma, 2,027; Omaha, 128; St. Joseph, 146; Sioux City, 180; Spokane, 170; Springfield, Ill., 156; Toledo, 101; Washington, 230; Wichita, 412.

The influence of the splendid slowing of the past three months has practically offset the reverses of the first seven months of the year, the total returns for ten months reaching \$566,823,188, as compared with \$574,316,049, for the corresponding months of 1914, a decrease of only one per cent. Following are the details:

	October 1915.	October 1914.
Akron	\$ 1,215,045	\$ 204,815

Alameda	29,918	28,511

#### NOTICE TO STEEL ROLLING DOOR MANUFACTURERS.

OFFICE OF THE BOARD OF STATE Harbor Commissioners, Union Depot and Ferry House, San Francisco, California.

Sealed proposals or bids will be received at this office at or prior to **11 o'clock a. m. on Friday, November 26, 1915**, for furnishing and installing steel rolling doors on the shed on Pier No. 35, on the water front of the City and County of San Francisco, in accordance with the plans and specifications prepared for these doors by the Chief Engineer and adopted by the Board August 9, 1915, and on file in this office, to which special reference is hereby made.

No bid will be received unless it is made on a blank form furnished from this office. Each bid shall be accompanied by a certified check for an amount equal to Five (5) per cent of the amount of the proposal, to be made payable to the order of the Secretary of the Board, conditioned that if the proposal is accepted and the contract awarded, and if the bidder shall fail or neglect to execute and complete the contract and give the bond required within six days after the award is made, in that case said sum mentioned in said check shall be deemed liquidated damages for such failure and neglect and shall be paid into the San Francisco Harbor Improvement Fund.

The bond required to be not less than one-half of the amount of the bid, with two or more sureties to be approved by the Board of State Harbor Commissioners, and conditioned for the faithful performance by the contractor of all the terms and conditions of said contract according to the true intent and meaning thereof and to the satisfaction of said Board; and said bond shall shall be effective as provided in an act approved May 1 1911, for the protection of material men, mechanics and laborers.

Bids will not be considered by this Board unless delivered to the Secretary or to the Assistant Secretary at the office of the Secretary, Room 17, Ferry Building, at or prior to **11 o'clock a. m. on Friday, November 26, 1915**, at which time and place the bids will be opened.

The Board reserves the right to reject any or all bids if deemed for the best interest of the State.

Bidders are invited to be present at the opening of the bids.

Plans and specifications of this work to be had at Room 18, Ferry Building, upon depositing \$20.00 for same, which will be returned on return of plans and specifications.

Bidders are requested to mark envelope containing bid: "Bid for Steel Rolling Doors."

#### NOTICE TO CONTRACTORS.

#### PHILIPPINE BUILDING FOR SALE.

SEALED BIDS for the purchase of the Philippine Building and fixtures pertaining thereto on the Grounds of the Panama-Pacific International Exposition will be received from date

until **11 A. M., November 26, 1915**. Said building contains the following material from the Philippine Islands: approximately 40,000 board feet of hardwoods, 42 palma brava columns, 1,000 square yards sauali and 281 windows and transoms of shell work.

Full details relative to the building and fixtures may be obtained from the Secretary of the Philippine Board at his office in the Philippine Building be-

tween the hours of 8 A. M. and 5 P. M.  
All bids should be securely sealed and accompanied by a certified check for 10% of the amount of the bid. The envelope should be marked "Bid for purchase of Philippine Building" and should be addressed to The Director-General, Philippine Board, Panama-Pacific International Exposition.  
The right is reserved to reject any or all bids.

W. W. BARCLAY,  
Director-General,  
Philippine Board P. I. E. (\*)

#### BIDS WANTED FOR CONSTRUCTING WIRE FENCE.

OFFICE CONSTRUCTING QUARTERMASTER, Fort Mason, Cal.—SEALED PROPOSALS for constructing wire fence at Fort Barry, Cal., will be received here until 11 A. M., November 26, 1915, and then opened. Further information on application. (\*)

#### PROPOSAL FOR BIDS.

BIDS are requested for the structural steel and steel erection (combined) for the University Library, University of California, Berkeley, Cal.

SEALED BIDS will be received at the Office of the Comptroller, University of California, Berkeley, Cal., at or before 9 A. M., Wednesday, December 2, 1915. Plans and specifications for each set of plans and specifications taken out, which deposit will be refunded upon return of said plans and specifications, accompanied by a cash deposit of \$50.00 will be required for each set of plans and specifications. No bids will be received unless accompanied by a certified check or bond in favor of the undersigned, equal to 10% of the bid, to secure execution of the contract by the successful bidder.  
The right is reserved to reject any or all bids.  
THE REGENTS OF THE UNIVERSITY OF CALIFORNIA. (\*)

#### WEST VIRGINIA BUILDING.

PROPOSALS FOR THE SALE, WRECKING AND REMOVAL OF THE WEST VIRGINIA STATE BUILDING AT THE PANAMA-PACIFIC INTERNATIONAL EXPOSITION, AND FOR THE SALE OF FURNITURE, ETC.

SEALED PROPOSALS for the sale, wrecking and complete removal of the West Virginia State Building at the Panama-Pacific International Exposition at San Francisco, California, are asked by the West Virginia Commission.

TWO PROPOSALS are desired, one to be for the sale, wrecking and complete removal of the building and fixtures, and clearing lot to official grade; and the other for the sale, wrecking and complete removal of the building and fixtures, and clearing lot to official grade.

ALSO, PROPOSALS are desired for the sale of all furniture and hangings contained in the West Virginia Building. The furnishings include eight bed-room suites and a large equipment of reed furniture. Hangings, carpets, etc., are of best quality and as good as new.

Proposals on the above shall be separate and all proposals shall be securely sealed, accompanied by a certified check for ten per cent (10%) of the amount of the proposal, and mailed as follows: "To G. A. Bolden, Resident Secretary, West Virginia Commission, West Virginia Building, Exposition Grounds, San Francisco, California."

Building and furnishings may be inspected at any time between the hours of 11 A. M. and 4 P. M., Sundays excepted.

Proposals will be received up to and including noon of Thursday, November 18th, 1915. The West Virginia Commission reserves right to reject any or all bids.

M., November 30, 1915. The right to reject any and all bids is reserved. Address W. D. SMITH, Missouri Building, Exposition Grounds. (\*)

#### NOTICE TO HOUSE-WRECKERS.

PROPOSAL FOR THE SALE AND REMOVAL OF THE LUMBERMEN'S BUILDING AND HOUSE OF HOO-HOO AT THE PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS for the sale and complete removal of The Lumbermen's Building and House of Hoo-Hoo, South Horticultural Gardens, Panama-Pacific International Exposition, San Francisco, Cal., are asked by the Board of Governors.

Proposals to be for the complete removal of Building from premises and grading of lot clear to level of curb, prior to March 15th, 1916. Proposal will be exclusive of small room at rear which is simply a lean-to and all radiators, furniture and draperies; but will include main building, plate glass in window openings, toilets, lavatories, pipe, both sanitary and water, chandeliers, lighting fixtures, doors, shrub and plants and logs and flower boxes in colonnade and pergolas and the pylons.

All proposals shall be securely sealed, accompanied by certified check for 10% of the amount of proposal and mailed as follows: "To A. B. Wastell, Executive Secretary, The Lumbermen's Building and House of Hoo-Hoo, 1111 Hobart Building, San Francisco, Cal." Proposals will be received up to and including noon of Saturday, November 20th, 1915.

The Board of Governors reserves the right to reject any or all bids and the 10% deposit will be forfeited. Balance of the amount of accepted bid is not paid in to this Board by December 5th, 1915.

For further particulars apply to undersigned at 1111 Hobart Building, FOR THE BOARD OF GOVERNORS.

A. B. WASTELL,  
Executive Secretary. (\*)

SPECIAL AGENT HAS BUSY DAYS IN TOUR OF COUNTRY.

WASHINGTON, D. C., Nov. 17, 1915.—Great interest has been shown by American manufacturers in the action of the Bureau of Foreign and Domestic Commerce, Department of Commerce, in sending out an export trade adviser on a tour of cities in various parts of the country, and the resulting large demands upon the time of this adviser, Special Agent Stanley H. Rose, have brought very busy days to him in every place that he has visited.

Mr. Rose has been in Ohio this week, and his three days' schedule at Springfield was made up of conferences with business men and representatives of manufacturing plants, held at the rooms of the Commercial Club, and addresses before several organizations, some of which called for active work until late in the evening, following days in which there were very few spare moments.

On the first day of his visit to Springfield, Mr. Rose held conferences beginning at 10 A. M., with representatives of power machinery manufacturers, at 1:30 P. M., with makers of machine tools and specialties, and at

with makers of miscellaneous lines of goods. At 12:15 P. M., he addressed the Rotary Club on "Ethics of Foreign Trade," and at 7:30 in the evening spoke before the Commercial Club on "Government Aid in Increasing Springfield's Foreign Trade," illustrating the latter address with stereopticon slides emphasizing the superiority of American-made goods in foreign countries.

On the second day, the conference hours with manufacturers were repeated, morning and afternoon, with special attention given to agricultural implements, automobile accessories and specialties, and miscellaneous goods. In the evening, Mr. Rose addressed the Spanish classes of the high school and Wittenberg College, explaining why Spanish should be studied, and giving valuable information about opportunities open for students of Spanish.

The conferences of the third day, held morning and afternoon, were on grinding and separating machinery, and household necessities, concluding a period during which the foreign markets for the products of Ohio industrial plants were very widely discussed. The representative of the Bureau of Foreign and Domestic Commerce, in his reports to Washington, pays a tribute to the energy and efficiency of the Springfield Commercial Club, which contributed very much to the success of his visit.

From Springfield Mr. Rose went to Columbus, and will proceed to Lincoln, and Omaha, Neb., Des Moines, Davenport, and Burlington, Iowa, St. Louis, Mo., Louisville, Ky., Cincinnati, and Marietta, Ohio, Johnstown, and Reading, Pa., and the New York office of the Bureau, closing that portion of his tour on December 24. Early in 1916, he will start out on a tour of the centers he has not yet been able to reach.

In the earlier portion of his present tour, he visited Baltimore, New York City, Albany, Buffalo, Rochester, Fairmont, W. Va., Indianapolis, Chicago, Kalamazoo, Grand Rapids, Detroit, and Toledo.

Appointment of Chinese commercial attaches to Great Britain, Japan, Russia, France, Germany, Belgium, and the United States is being considered at Peking.

#### NEW PACIFIC SERVICE TO START NEXT MONTH.

[Extract from Japan Chronicle, Oct. 1, forwarded by Consul General George H. Scidmore, Yokohama.]

The Java-China-Japan Line will establish a regular service once a month between Batavia, Samarang, Soerabaya, Macassar, Manila, Hongkong, Kobe, Yokohama, and San Francisco. According to the Asahi (Osaka), the necessary arrangements for connection with the Southern Pacific Railway have been made, and the first steamer on the new service will leave Batavia December 15.

The Municipal Bond Market is looking up, and the Bond Buyers are looking the "Building and Engineering News" up. A proposal ad for your bonds in our columns will bring competition.

### Contracts Awarded.

**STREET IMPROVEMENT**—\$1,856.79. Sausalito, Marin Co., Cal. Engineer, City Engineer, Sausalito. Owners, City of Sausalito. Contractors, Construc-

tion and Engineering Co., 1017 Polson street, S. F. Contract price, \$1,856.79.

## FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA

**BRIDGES**—2. Reinforced concrete and timber. Cost not stated. Visalia, Tulare Co., Cal. Engineer, County Surveyor, Visalia. Owners, Tulare County. At a recent meeting of the County Supervisors, bids were ordered received up to December 5th for the construction of two bridges in the Second District, one over Sand Creek and one of reinforced concrete construction over the Alta Canal. Further information may be had from the County Engineer at Visalia.

**CHURCH**—2 story and base, brick and steel. Cost not stated. Fresno, Fresno Co., Cal. Architect, Robert B. Hotchkirk, Rowell Bldg., Fresno. Owners, First Church of Christ, Scientist Location, corner of Caleveras and N streets, covering an area of 82 by 115 feet. Will contain the main auditorium, seating 900 people, Sunday school rooms and reading rooms. Interior finish pine, hardwood and ornamental plaster. Central heating system and vacuum cleaning. Art glass windows. Exterior faced with pressed brick trimmed with terra cotta. Plans complete and figures being taken.

**RESIDENCE**—2 story and base, frame, \$11,000. Oakdale, Stanislaus Co., Cal. Architect's name not given. Owner, T. G. Roberts, Oakdale. Location, 1st avenue and Walnut street. Will contain nine rooms, two baths and sleeping porch. Interior finish pine and hardwood with some white enamel. Hardwood floors. Furnace heat and open fire places. Mantels tile or brick. Automatic water heater. Bath rooms finished in tile. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**RESIDENCES**—1 story and base, frame, \$2,500 each. Fresno, Fresno Co., Cal. Architect, none. Owners, Central California Land and Improvement Co., 955 I street, Fresno. The Central California Land and Improvement Co. is planning the erection of several bungalows on the La Sierra or Einstein tract. Work is to be commenced at once on the first dwelling located on McKinley near Belmont, which will be modern in every particular, with white asbestos roof. Edwin Einstein is secretary of the company.

**RESIDENCE**—1 story and base, frame, \$1,500. Fresno, Fresno Co., Cal. Architect, none. Owner, J. R. Church, 1221 V street, Fresno. Location, Riverdale Addition. Will contain five rooms and bath. Interior finish pine. Some hardwood floors. Open fire place. Automatic water heater. Exterior covered with rustic. Plans complete and work by Day Labor.

**RESIDENCE**—2 story and base, frame, \$2,750. Fresno, Fresno Co., Cal. Architect, none. Owners, Gede and Gede, 451 Poplar avenue, Fresno. Location, Smith Tract. Will contain six rooms, bath and sleeping porch. Interior finish pine and white enamel. Hardwood floors. Open fire place and tile mantel. Automatic water heater. Exterior covered with cement plaster. Plans complete and work by Day Labor.

**BRIDGE**—Reinforced concrete. Cost not stated. Merced, Merced Co., Cal. Engineer, County Surveyor, Merced. Owners, Merced Co. At the last meeting of the County Supervisors the construction of a bridge on Pacheco Pass road in District No. 3, was ordered. A resolution was adopted at the same meeting that the county pay one-half of the cost of a concrete bridge across South Slough at the city limits.

**BRIDGES**—Timber and reinforced concrete. Cost not stated. Merced, Merced Co., Cal. Engineer, County Surveyor, Merced. Owners, Merced County. The Merced County Supervisors have directed the County Engineer to prepare plans and specifications for bridges to be constructed in the county as follows: Cottonwood to Newman road, over canal near Hubbard Carmichael; also bridges over Quinto Creek on Cottonwood school house road near Clay school house. Bids for the construction of these bridges will be called for on the completion and adoption of the plans.

**BRIDGES**—Reinforced concrete. Cost not stated. Modesto, Stanislaus Co., Cal. Engineer, County Surveyor, Modesto. Owners, Stanislaus County. Bids will be received until December 11th for the construction of a reinforced concrete bridge over lateral No. 3, of Modesto Irrigation District.

**CHURCH**—1 story and base, brick, \$26,000. Merced, Merced Co., Cal. Architects, Cowell & Bedeson, Merced. Owners, Central Presbyterian Church. Location 20th and L streets. Designed in the classic style. Will contain main auditorium, Sunday school rooms and pastor's study. Interior finish pine and ornamental plaster. Art glass windows. Central heating system. Exterior faced with pressed brick. Plans approved and bids to be called for shortly.

**IRRIGATION WORK**—Cost not stated. Modesto, Stanislaus Co., Cal. Engineer, Herrmann, Modesto. Owners, Modesto Irrigation District. Bids received by the Board of Directors of the Modesto Irrigation District for the work of cleaning, deepening and extending the main drainage canal of the district were rejected as they were above Engineer Herrmann's estimate. The bidders were Contra Costa Construction Co., S. F., \$26,000; Ross Construction Co., Sacramento, \$19,150. The work will be done under the Day Labor system in charge of Engineer Herrmann.

**STREET IMPROVEMENT**—Cost not stated. Turlock, Stanislaus Co., Cal. Engineer, City Engineer, Turlock. Owners, City of Turlock. Plans and specifications prepared by the City Engineer for the improvement of Diablo street from the easterly property line of Marshall street to the north property line of East avenue, were adopted at the last meeting of the City Trustees. The specifications provide that the street be oiled, rolled, graded and curbed with granite curbs. Bids on this work will soon be called for.

#### Contracts Awarded.

**IRRIGATION WORK**—Cost as follows. Modesto, Stanislaus Co., Cal. Engineer, Herrmann, Modesto. Owners, Modesto Irrigation District. Ties-

lau Bros., 110 Jessie street, S. F., for building the transition section of the main canal to connect with the Dry Creek flume, \$2,572; G. J. Ulrich, Modesto, for building nine concrete drops in lateral No. 3, \$19,340; and Pearl Bros., of Oakdale for construction of concrete facing and curtain wall for dam No. 1 of the Hales reservoir, \$72,800.

**JAIL**—1 story and base, reinforced concrete. Cost not stated. San Luis Obispo, San Luis Obispo Co., Cal. Architect's name not given. Owners, Town of San Luis Obispo. At the last meeting of the City Council specifications for a new jail building were adopted. Bids will be called for shortly.

**MUNICIPAL AUDITORIUM**—2 story and base, brick and steel, \$23,000. Visalia, Tulare Co., Cal. Architects, Coates & Traver, Rowell Eldg., Fresno. Owners, City of Visalia. Contractors, Trewitt & Shields, Fresno. Contract price, \$23,000.

**SCHOOL**—2 story and base, reinforced concrete, \$29,750. Woodlake, Tulare Co., Cal. Architect, O. L. Clark, Blower Bldg., Bakersfield. Owners, Woodlake School District. Contractors, Philbrook & Colvin, Turlock. Contract price, \$29,750.

**MARKET**—1 story and base, brick. Cost not stated. Delano, Kern Co., Cal. Architect, none. Owner, Luther B. Crow, Contractors, Trewitt & Shields, Fresno. Contract price not stated.

### SACRAMENTO, STOCKTON AND NORTHERN CALIFORNIA

**BRIDGE**—Timber construction. Cost not stated. Auburn, Placer Co., Cal. Engineer, County Surveyor, Auburn. Owners, Placer County. Bids will be opened on December 7th for the construction of a wooden bridge, 420 feet long, across Dry Creek on the section line between sections 8 and 9, Tp. 10 N., R. 4 E., M. D. B. and M., in Supervisor District No. 1.

**APARTMENT HOUSE**—3 story and base, brick and concrete. Cost not stated. Architect, W. B. Thomas, Yosemite Bldg., Stockton. Owner, B. Granich. Location, east California north of Channel. Will contain two stores and 41 apartments of two and three rooms. Interior finish pine and elm. Hardwood floors. Steam heat, oil burning system and hot water supply. Bath room finished in tile. Wall beds and patent store fronts. Exterior faced with pressed brick and cement plaster. Plans being prepared.

**BRIDGE**—Timber construction. Cost not stated. Red Bluff, Tehama Co., Cal. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. In response to a petition presented to the County Supervisors the County Engineer has been instructed to prepare plans and specifications for a wooden bridge to be erected over the North Fork of Mill Creek and Dry Creek in Road District No. 3. Bids will be called for on completion and approval of the plans.

**FLATS**—2 story and base, frame, \$4,500. Sacramento, Cal. Architect, none. Owner, W. B. Ellis, 520 1/2 20th street, Sacramento. Location, 1517 25th street. Will contain two flats of five

and six rooms. Interiors finished in pine and elm panels. Hardwood floors and open fire places. Mantels tile or brick. Tile wainscot in bath rooms. Automatic water heaters. Exterior covered with rustic and cement plaster on metal lath. Plans complete and work to be done by Day Labor.

**BRIDGE**—Reinforced concrete, \$7,000. Willows, Glenn Co., Cal. Engineer, County Surveyor, Willows. Owners, Glenn County. Cotton Bros., 532 1/2 2nd street, Oakland, bridge contractors, have asked the Supervisors to release them from a contract for building the Salt Creek bridge at Newville. The Cottons bid \$6,000. They now say they made a mistake of \$1,000 and that their bid should have read \$7,000. Even at that figure they were the lowest bidders. The Supervisors have taken the matter under consideration and will make their decision known at the December meeting.

**IRRIGATION CANALS**—Cost not stated. Willows, Glenn Co., Cal. Engineer's name not given. Owners, Glenn County Irrigation District. Proposals are wanted at once for the construction of a system of canals, laterals and deep drains in Glenn County. For information and plans see Washington Dodge, 1 Sansome street, San Francisco.

**HOSPITAL**—1 and 2 story and base, frame, \$13,000, and \$4,000 additional for equipment. Eureka, Humboldt Co., Cal. Architect, E. J. Burke, Eureka. Owners, Humboldt County. Will contain wards and private rooms for male and female patients. Interior finish pine with some hardwood floors. Furnace heat and hot water system. Tile bath rooms and operating rooms. Exterior covered with rustic and shingles. Plans complete and figures being taken.

#### Contracts Awarded.

**Wybro**

Reg. U. S. Pat. Office  
as good as they are  
The Panels that are  
Iamous.

### Wybro Panels combine Service & Quality with Price.

It is not alone the "price" that counts in buying panels. The quality is of more than passing importance.

WYBRO PANELS combine quality with service and price. Quality is first in Wybro Panels—the service they give is unsurpassed, and the price is just right—not high, nor low—but just the right price for the right panel.

200 varieties—price list free.

**White Brothers**

5th and Brannan Streets

San Francisco

Contractors, Richards-Neustadt Co., Wright & Callender Bldg., L. A. Contract price not stated.

### PORTLAND AND OREGON

**STATE HIGHWAY WORK**—Cost as follows. Salem, Ore. Engineer, State Highway Commission, Salem. Owners, State of Oregon. The State Highway Commission apportioned the 1916 highway funds as follows: For administration expenses and bridges, \$25,000; Clatsop County, \$20,500; Columbia County, \$26,000; Hood River, \$5,000; Hood River and Wasco, \$15,000; Crook, \$10,000; Yamhill, Tillamook, \$9,000; Lane, \$5,000; Polk, \$5,000; Jackson, \$15,000; making a total of \$237,000.

**IRRIGATION WORK**—\$1,000,000. Salem, Ore. Engineer's name not given. Owners, Graves Creek Irrigation District. State Engineer Lewis has issued a permit to the Graves Creek irrigation project to appropriate sufficient water from Graves and Jumpoff creeks to irrigate 20,000 acres of land and to develop 3,000 horsepower. Two large reservoirs are included in the plans, and, exclusive of them, the cost of the works is estimated at \$1,000,000. The project is located in Josephine county.

**MAUSOLEUM**—1 story, reinforced concrete and granite, \$60,000. Portland, Ore. Architects, Lawrence and Holford, Chamber of Commerce Bldg., Portland. Owners, Portland Mausoleum Co. Location Riverview Cemetery. Will contain 350 crypts. Interior finish stone and ornamental plaster. Modern electric work and plumbing. Exterior faced with granite. Plans being prepared.

**IRRIGATION POWER EQUIPMENT**—Cost not stated. La Pine, Ore. Engineer's name not given. Owners, Pringle Falls Water and Power Co., Portland. The Pringle Falls Water and Power Co., with head offices in Portland, has just been sold to a syndicate of Eastern capitalists headed by Tomes Bros. of Nebraska. The consideration is said to have been \$300,000. The plans of the new company as announced are to supply water for the irrigation of the entire La Pine basin and Eden Coulee, Silver Lake and Fort Rock valleys. Power and light for La Pine

will also be among the first steps in development. The power plant, which is practically finished, will be immediately equipped, and a sawmill with a daily capacity of 150,000 feet, will be erected in the spring.

### SEATTLE AND WASHINGTON

**BATH HOUSE**—1 and 2 story and base, reinforced concrete, \$250,000. Seattle, Wash. Architect, B. Marcus Practice, Pantages Bldg., Seattle. Owners, Albert Shubach, C. D. Stimpson and Jacob Berger. Location, corner of Leonra and 2nd avenue, covering an area of 180 by 180 feet. Plunge will be 110 by 60 feet. There will be showers and tub baths. Interior pine, tile and marble. Fireproof construction. Steam heat, oil burning plant and pumping plant capable of pumping 750 gallons per minute. Exterior faced with cement plaster. Plans being prepared.

**RAILROAD SHEDS**—2 story and base, frame, \$60,000. Seattle, Wash. Architect, West, Port of Seattle Commission, Seattle. Owners, City of Seattle. Location, Spokane avenue, covering a large ground area. Exterior corrugated iron. Plans complete and figures being taken. Bids close on December 8th.

### CONSULAR TRADE CONFERENCES.

Consul Lester Maynard, of Amoy, China, states that he will be in the United States on leave of absence until about December 31, 1915, and that his address will be care of the Department of State, Washington, D. C.

The leave of absence of Consul Willys R. Peck, of Tsingtau, China, having been extended he will be in Washington, D. C., from about December 1, 1915, to January 31, 1916. (11)

The annual statement on the production of abrasive materials in the United States in 1914 is now available for distribution by the Geological Survey. Under this heading are considered only those mineral products which are used for grinding and polishing and other abrasive operations. The value of all the abrasive materials consumed in the United States during the year amounted to \$3,614,263.

The Municipal Bond Market is looking up, and the Bond Buyers are looking the "Building and Engineering News" up. A proposal ad for your bonds in our columns will bring competition.

## Unit Plant Hot Blast Furnace

### Delivers the Heat

#### A Complete Answer to the Heating Question.

Instantaneous—Furnishes an instantaneous and continuous supply of Sanitary—fresh warm air free from gas fumes, odors, smoke or dust.

Hygienic—Maintains an even temperature necessary to health and comfort.

Scientific—Built like a real hot air furnace reduced in size.

Convenient—Operated from inside of room, saving many steps to cellar.

Simple—Any child 10 years of age can operate, turn the key and apply match.

Economical—Wall furnace burns 10 cubic feet and floor furnace 20 cubic feet of gas per hour.

Efficient—Each furnace will heat from 2 to 5 rooms or from 3,000 to 9,000 cubic feet of space.

Fireproof—Has four thicknesses of metal and three air spaces of one inch each between fire and wood; fire is 20 inches from floor.

Up to Date—Uses exclusively the Johnson Hot Blast Burner, recognized as the most efficient ever constructed.

Durable—Is made from best grade of metal to be obtained.

Finish—Register electro plated Flemish Brass. The finish that lasts.

Installation—Can be installed by any gas appliance dealer, plumber, tinsmith or hardware merchant at nominal cost.

Retail Prices—Wall Furnace, any style, \$22.50  
Floor Furnace, any style, \$30.00  
Installations and fittings extra.

#### WALL FURNACE STYLE C

Size of Wall Furnace front is 11x19 inches, with a recessed portion of 14x17 inches between studding. Recessed portion has a 2-inch vent opening at top and a fresh air intake 3x12 inches at bottom operated with damper in front. Both vent and fresh air intake pipes go between studding.

## Have Cracksmen Abandoned Attempts To Force Bank Vaults.

By S. Furry Laucks, Vice-President  
and General Manager York Safe  
and Lock Co., York, Pa.

No properly constructed bank vault, not one, has, for many years past, been forcibly entered by burglars whatever the measure of their skill or the means employed.

Surprising as this assertion may appear, in view of the prevalent opinion to the contrary, it is literally true save for the one qualification that it applies alone to bank vaults scientifically constructed and of the first class.

It is frankly admitted that public opinion inclines to the belief that no bank vault has ever been, or can be, built that will successfully withstand

If, then, we persist in cherishing such impressions, the possession of which we cannot explain or justify, and without subjecting them to the ordeals of investigation and proof, it can only be because we are indifferent to the truth, or that we lack the initiative and mental energy to descend to the "Bottom of the well," where, we are told, "lies Truth" awaiting discovery by the earnest seeker and indefatigable toiler. Moreover, and assuming that we have endeavored to ascertain the truth as to any matter of alleged fact, we should

taken, belief to the contrary must be ascribed to an amazing credulity as to the burglar's reputed skill and to an utter absence of knowledge of the mechanical devices and processes by which bank and safe deposit vaults have, by their makers, been brought to their present state of impregnability.

Nor is the public's indifference and ignorance in this regard surprising when it is reflected that it is not the masses who purchase these vaults; and for which reason, doubtless, the public deems itself to be without interest in the subject and without any

an assault by expert cracksmen; but popular opinion is more frequently wrong than right, and especially so as to matters with all the phases of which the public is not accurately and fully informed.

We sometimes, and innocently, mistake mere mental impressions, subconsciously acquired, for opinions— but there usually comes a time, and inevitably if our perceptive faculties are not wilfully restrained, when the failure of these impressions to comport with the established order of things, or the logic of passing events, becomes acutely obvious.

And, finally, if we arbitrarily endow mere impressions with the warrant and dignity of ascertained truth and proclaim them as such with the intent to influence the minds of others, we shall be faithless alike to our consciences and to our fellows.

It is not true that all bank vaults can be forcibly looted by cracksmen and the prevalent, though utterly mis-

incentive to ascertain whether such structures are or are not actually burglar-proof. It is that relatively small part of the community, namely, the bankers, and individuals and corporations who, as custodians of funds and securities intrusted to them by others must select and provide means for their safe keeping. The incentive to ascertain the relative merits of differently constructed types of vaults is theirs, for theirs is the responsibility for the final determination and selection. No one better than the writer knows with what conscientious care and intelligent discrimination

numerous of the leading bankers of the country have approached and performed this duty.

Many thousands of dollars, in the aggregate, are annually expended for security vaults—single contracts sometimes running into a quarter of a million of dollars. It is absurd to pretend to believe, and wofully wrong to assert, that the expenditure of such huge sums falls of its purpose to provide absolute protection for moneys and treasure against the peradventure of theft by burglars, or their destruction, whether by the agencies of fire, or riotous attack or of mob violence.

It is manifestly and inexcusably wrong to seek to impair the faith of bank and safe deposit patrons in the impregnability of bank and safe deposit vaults—if there be no warrant for such impairment—and yet, that very result is well nigh unavoidable if self-constituted oracles—not caring or seeking to know the truth—and not knowing it—are permitted, without rebuke, to persist in the practice of proclaiming broadcast their impressions—acquired they know not when or how—that "There's nothing that's burglar-proof."

To all who desire to be accurately informed as to what constitutes a burglar-proof bank or safe deposit vault, the sources of information are easily accessible and ample. No financial institution or safe deposit company, if possessed of the proper type of vault, presents an inspection by the public of that particular feature of its equipment. On the contrary such inspection is usually invited and appreciated.

In like manner, reputable vault builders invite and welcome the most searching investigation by the public into their methods of construction, and into the character and qualities of material employed. There is no desire on the part of its designer and builder, and no occasion, if he be honest in his intentions and capable in practice, to make a mystery of the structural features of a bank or safe deposit vault any more than there is, or should be, any wish or need to obscure the processes by which great bridges and towering skyscrapers are created.

The thousands upon thousands of bank depositors and patrons of safe deposit companies, the officials and shareholders in financial institutions; and the corporations engaged in vault building, with their thousands of skilled artisans, all have a community interest in progressing that particular mechanical art to the highest possible plane of efficiency.

It is the constant policy of my company to promote and conserve that interest and to bring the general public to a wider and better knowledge of what has been and is being accomplished in that line of mechanical endeavor. And it was in furtherance of that policy, more than from any other consideration, that my company sent seven carloads of safes and vault work across the continent to display at the Panama-Pacific International Exposition.

Whether the exhibit has created a greater popular interest in, and promoted the public knowledge of, scientific vault construction is better told by an editorial entitled:

#### "PRIZE BANK VAULTS AND SAFES. The Big and Remarkably Varied Exhibit That Won the Grand Prize"

which appeared in the September, 1915, issue of the Coast Banker, San Francisco; and from which we quote as follows, and in part only:

"One of the largest and, admittedly, one of the most complete and elaborate of the many thousands of exhibits at the Exposition, occupying an entire block in the Palace of Machinery, and a floor space of 3,300 square feet, the display by the York Safe & Lock Co. is of a character and upon a scale and at a cost never before attempted at any international exposition at home or abroad by any manufacturer of safes and vaults.

"The value of the company's products displayed by the York Safe & Lock Co. is approximately \$100,000. In addition, the cost of installing and maintaining the exhibit has exceeded \$30,000—the freight charges alone amounting to over \$8,000.

A surprising measure of interest is being manifested in this company's exhibit, but it is the massive bank and safe deposit vault erected within the exhibit space precisely as such vaults are built for banks and other financial institutions, with no single detail of construction or equipment having been omitted, that is proving to be the crowning feature of the display and a sensational interest to visitors.

"This is especially true of visitors from foreign parts who are frank to say that they had never before seen anything approaching this vault's wondrous mechanism and the surpassing beauty of its finish.

"It is of interest to note, and gratifying to record, in connection with this exhibit, that the York Safe & Lock Co. attained the highest honors at the Panama-Pacific International Exposition, its entire line of safes and vaults having made, under the rules of the international jury of awards, a perfect score (100 points out of a possible 100) and thereby winning the Grand Prize."

While the limits of this article do not permit us to describe or to discuss in detail the technical engineering and constructive features of modern vault building of the first class, we ought, perhaps, to make brief reference to the general features of the completed product and for this purpose the writer has selected the vault, now being exhibited at the Panama-Pacific International Exposition by his company, and an illustration of which accompanies this article.

This particular vault is twenty-four feet long, twelve feet wide, and ten feet high.

A concrete foundation bed, four feet thick, sustains its weight of 310,000 pounds.

The circular entrance door—eighty inches in diameter—though weighing sixteen tons, can be moved with one finger, so exquisitely is it balanced on its specially designed ball bearing hinges.

The massive bolt-work by which this door is locked—when closed—the ingenious operating mechanism, and its control by combination and time locks, have proved never-ending sources of astonishment and delight to visitors who daily through the exhibit space,

A rear entrance to this vault, for

emergency use only, is an exact counterpart of the main entrance except that the diameter of its opening is but twenty-two inches.

Among the several metals of which these doors are composed are "non-burnable" composite plates which can not be drilled, or penetrated with the electric arc or the oxy-acetylene flame. This metal was invented, patented, is owned by and used exclusively by the York Safe & Lock Co.

The walls of the vault are of concrete in which is embedded a heavy drill-proof steel grille (erected on the foundation before the concrete is poured.) In addition, the interior walls, floor and ceiling are lined throughout with successive layers of open-hearth and five-ply welded drill-proof steel plates all bolted together and secured with steel angle frames.

Entrance to the vault, after great circular door has been opened, is had through the gate of a heavy grille of beautifully polished steel.

The interior of the vault is divided by a second grille and gate of polished steel into two compartments—one for the use of the bank, and the other for the safe deposit patrons.

The safe deposit section contains many hundreds of safe deposit boxes, of varying sizes. These boxes are made of the finest grade steel, with heavy steel doors mounted on polished brass hinges and with bronze case locks, fitted with both the deposit and master key tumblers. Each deposit box has an interior metal bond-box, handsomely finished. The steel doors to all the safe deposit boxes are finished by first being polished and coppered and then nickel plated, buffed and jiggered.

The bank department of the vault is completely equipped with Reserve and Collateral Safes, Money Safes, Tellers' Chests, Coin Lockers, etc., together with units of metal filing devices, such as roller book shelves, cupboards, check, deposit slip, document and letter files, all of the latest pattern, style and finish.

The ceiling of the vault is finished with steel plates and mouldings, forming panels, all draw filed and highly polished.

The interior is electric lighted, with a switch at the vault entrance, and the floor is tiled throughout with hexagon vitrified tile.

Both the Main and Emergency entrance doors, their goose-neck crane hinges, bolt-work systems, frames for the glass doors protecting the bolt-work and locks, and the architraves are drawn and beautifully polished. The pressure system, blocks and housings are nickel plated and buffed, and the six-spoke pilot wheel by which they are actuated is equipped with polished hard rubber grips, as is the six-spoke pilot wheel which projects and retracts the locking bolts.

If that which is here written shall serve to incite an interest, where none has heretofore existed; and if it creates a desire to be better informed, and the determination to be possessed of the truth as to bank vaults, and their capacity to successfully resist every device designed and employed to overcome them, it will have not only served its avowed purpose but will have justified the time given by the reader to its perusal.

# Over Three Million Tons Of Pig Iron In October.\*

For the first time in the history of the industry, pig-iron production in the United States passed the 3,000,000-ton mark in October. At the opening of the month statistics showed that production was proceeding at the rate of 36,000,000 gross tons a year. Further additions to the list of active furnaces were made as the month advanced. Returns received largely by wire show that the output of coke iron in the 31 days of last month reached the altogether unprecedented figure of 3,125,191 tons, or 102,822 tons a day against 2,852,561 tons in September, or 95,085 tons a day. Thus for the first time the daily output of pig iron runs into six figures. The steel companies produced at the rate of 73,595 tons a day, their total for the month being 2,281,456 tons, or more than twice that of January. The merchant furnaces

also gained, their daily rate being 26,227 tons, against 21,198 tons in September.

There was a net gain in active furnaces last month, or from 268 to 276 furnaces, and the capacity active November 1 was 101,819 tons a day, against 97,535 tons a day on October 1. Estimating charcoal iron, pig iron was

being made on November 1 at the prodigious rate of 37,500,000 tons a year, against a rate of 36,000,000 tons a year one month previous.

### Daily Rate of Production.

The daily rate of production of coke and anthracite pig iron by months, from October, 1914, is as follows:

Daily Rate of Pig-Iron Production by Months—Gross Tons.

	Steel works	Merchant	Total
October, 1911	11,926	16,335	28,261
November	15,395	15,396	30,791
December	15,381	15,515	30,896
January, 1915	15,398	15,661	31,059
February	11,192	15,621	26,813
March	16,026	16,779	32,805
April	17,716	17,716	35,432
May	18,655	18,655	37,310
June	20,339	20,339	40,678
July	19,796	19,796	39,592
August	21,865	21,865	43,730
September	24,108	24,108	48,216
October	26,227	26,227	52,454

The New High Mark in American Pig Iron Output—A Daily Rate of 100,822 Gross Tons.

Diagram of Daily Average Production by Months of Coke and Anthracite Pig Iron in the United States from Jan. 1, 1908, to Nov. 1, 1915. Also Monthly Average Prices of Southern No. 2 Foundry Iron at Cincinnati and Local No. 2 Foundry Iron at Chicago District Furnace.

\*The Iron Age, Nov., 1915.

### Production of Steel Companies.

The accompanying table gives the production of all coke and anthracite furnaces in October and the three months preceeding:

**Monthly Pig-Iron Production — Gross Tons.**

	July (31 days)	Aug. (31 days)	Sept. (30 days)	Oct. (31 days)
New York	178,515	196,126	199,119	198,572

### The Record of Production

Returns from all furnaces of the United States Steel Corporation and the various independent steel companies show the following totals of product month by month. Only steel-making iron is included in the figures below, together with ferromanganese and pig-iron. These last, while stated separately, are also included in the columns of "total production."

The net gain of eight in the number of active furnaces last month is represented by ten furnaces blown in and two furnaces blown out or banked. Furnaces blown in include Robeson and one Bird Coleman in the Lebanon Valley, one Edgar Thomson in the Pittsburgh district, Ella in the Shenango Valley, Newburgh in northern Ohio, Belfont in the Hanging Rock district, Bessie in the Hocking Valley, Max Meadows in Virginia, one Ashland in Kentucky and one Bessemer in Alabama.

Among furnaces blown out were Lawrence in the Hanging Rock district (banked) and La Follette in Tennessee.

**Diagram of Pig Iron Production and Prices.**

The fluctuations in pig iron production from January, 1908, to the present time are shown in the accompanying chart. The figures represented by the heavy lines are those of daily average production, by months, of coke and anthracite iron. The two other curves on the chart represent monthly average prices of Southern No. 2 foundry pig at Cincinnati and of local No. 2 foundry iron at furnace at Chicago. They are based on the weekly market quotations of The Iron Age. The figures for daily average production, beginning January, 1908, are as follows:

# ALLOY STEELS.\*

By George L. Norris, Pittsburgh, Pa.

Steel can broadly be defined as an alloy of iron and carbon that can be forged and rolled. From expediency and necessities of manufacture, certain impurities beneficial or otherwise are present, but not in sufficient amounts to materially alter the characteristics of the pure alloy of iron and carbon.

Under this definition, steel, or as it is now often referred to, carbon steel, is usually within the following maximum composition:

Carbon, 1.50%.  
Manganese, 1.00%.  
Silicon, 0.35%.  
Phosphorus, 0.05%.  
Sulphur, 0.05%.

An "alloy" steel is steel alloyed with one or more metals, in sufficient amounts to influence or change the characteristics of steel, and still possible of forging or rolling.

The usual steel alloying metals are manganese, silicon, nickel, chromium, tungsten and vanadium. As these metals will all alloy with each other, it is evident that it is possible to obtain a great variety of alloy steels.

Steel containing upwards of 1.50% manganese is not commonly considered an alloy steel, although this percentage of manganese undoubtedly has some effect on the characteristics of steel. This is due no doubt to the fact that manganese is always present in steel.

The alloy steels are usually divided into two groups: "ternary" steel, with one metal alloyed, and "quaternary" steels, with two metals alloyed. The more complex alloy steels are practically limited to high-speed tool steels.

The general characteristics of alloy steels are high elastic limit and great strength, combined with a high degree of toughness as compared with the carbon steel with which they are alloyed. The strength and hardness can be enormously increased by heat-treatment (quenching and tempering) and still have the steel retain great toughness.

Alloy steels are not as a rule placed in service in the condition as forged or rolled. The forging and rolling temperatures are usually so high that the steel requires heat-treatment to refine the grain and develop the exact combination of strength, hardness and toughness desired. It is frequently necessary to anneal after forging in order to facilitate machining operations. This, of course, necessitates subsequent heat-treatment.

Most of the alloy steels are of medium or low carbon content. The corresponding simple or carbon steels are only slightly or moderately improved in strength by heat-treatment.

The use of alloy steels in cutting tools dates back nearly a hundred

years, although it was not until after 1850 or 1860 that alloy steels for this purpose became firmly established.

With the advent of iron-clad warships began the struggle for supremacy between projectile and armor plate that has been so fruitful in the development of alloy steels. Chromium, nickel and nickel-chromium steels are largely the result of this struggle.

The publication in 1888 by Hadfield of the results of an extensive research of the alloys of manganese and steel, which resulted in the discovery of a remarkable new alloy steel, marks a period of active investigation into the effect of other metals on steel, the most important of these were the investigations on nickel steels by Jas. Hiley in 1889, which demonstrated that a mild open-hearth steel, such as used for structural, general forging and machinery purposes, when alloyed with 3% or 4% nickel had considerable higher elastic limit and tensile strength, with practically the same or greater ductility. One of the earliest and most extensive applications of nickel steel was for armor plate. For many years nickel alloy steel was the principal alloy steel in use.

During this same period referred to, Hadfield made investigation of the effects of silicon on steel, and also a very complete study of chromium steels, which for some time had been used in a small way for springs and special forgings, but principally for tools and armor piercing projectiles.

The development of high-speed steel about 1900, making it possible to readily machine heat-treated alloy steels, and the advent of the automobile with its demand for superior steel, have brought about the present extensive use and development of alloy steels.

The automobile industry, with its demand for steel of high strength and durability, has been undoubtedly the most important factor in the development of commercial alloy steels, and the largest consumer. Alloy steels are used extensively for transmission gears and shafting, axles, steering levers and spindles, springs, chassis frames, crank shaft, cam shaft, connecting rods, valves and many other parts of automobiles.

They are also extensively employed in forgings for high-speed engines, marine engines, locomotives, electrical machinery, mining machinery and other mechanical engineering structures.

The use of alloy steels in bridge construction has been limited, but there is undoubtedly a field in long-span bridges for an alloy steel of high strength that can be used in the condition as rolled, preferably, or at most with a simple annealing.

Concurrent and having a marked influence on the development of alloy steels, was the discovery of large quantities

of vanadium ore in Peru, thus assuring a source of supply at a reasonable cost of this rare metal, which is the most powerful yet discovered for alloying with steel, that is, in small amounts.

The most important of the engineering or constructional alloy steels are those containing nickel, chromium and vanadium, singly or in combination. With all these steels it is possible, through heat-treatment, to obtain a tremendous range in strength, in round numbers varying from 100,000 to 2,000,000 pounds per square inch, depending also, of course, upon the size of the section.

It is not possible nor within the province of this paper to go deeply into the technology of alloy steels, but only to briefly describe the principal alloy steels and their characteristics.

## Manganese Steel.

This steel usually contains 10% to 12% of manganese and approximately 1% of carbon. It is practically non-magnetic and has a peculiar hardness to which it owes a remarkable resistance to abrasion. It is extremely difficult to machine. It has high strength and toughness, but relatively low elastic limit. With care it can be forged and rolled. It has found its principal application in castings for crushing and grinding machinery and railroad crossings. Manganese steel has the peculiar property of being toughened and softened by quenching in water, resembling copper in this respect. All manganese steel castings are subjected to this treatment to remove brittleness.

## Silicon Steel.

There are two types of silicon steel, one of which has found some application as an engineering steel. This steel, frequently called silicon manganese steel, is generally covered by the following limits of composition:

Carbon, 0.15% to 0.65%.  
Silicon, 1.50% to 2.00%.  
Manganese, 0.50% to 0.80%.

The manganese is normal, contrary to what is indicated by the name. The principal application of this steel is for automobile springs, and to some extent for gears. It loses readily through heat treatment, and is very brittle in the direction at right angles to rolling. It is very sensitive to heat-treatment, and a relatively small variation in annealing temperature after quenching has a strong effect on the result obtained.

The other type of silicon steel contains 1% to 5% silicon, is low in carbon and manganese, and is extensively used for electrical transformer sheets. On account of its high permeability and electrical resistance structurally, it is used, and has been used structurally.

## Nickel Steel.

Nickel alloy steels are of all percentages of nickel, and are of important use in engineering. The increasing consumption of nickel in the medium

\*A paper presented at the International Engineering Congress, San Francisco, 1915.

carbon steel with 3% to 4% of nickel, commonly known as 3½% nickel steel. The presence of manganese in nickel steel is very essential, as it has a marked effect on the mechanical properties. The amount of manganese should range from 0.50% to 0.80%. This steel has been extensively used since its introduction in 1889, and is a good all-round engineering and structural steel with considerably higher elastic limit and tensile strength than the corresponding carbon steel, and with practically the same degree of ductility. The low-carbon steel, 0.10% to 0.20% carbon, is used extensively for case-hardening parts. It case-hardens more readily than carbon steel and gives a harder casing with a strong, tough, fibrous core. A great deal of nickel steel with carbon from 0.20% to 0.35% has been used in shapes and plates as rolled, and in annealed eyebars for bridge construction. In this condition, which is not to be recommended for forgings, the following are typical physical properties:

Elastic limits, lbs. per sq. in., 45,000 to 60,000.

Tensile strength, lbs. per sq. in., 80,000 to 100,000.

Elongation in 2 inches, per cent., 20% to 15%.

Reduction of area, per cent., 40% to 25%.

Annealed nickel steel forgings have only slight advantage in strength over carbon steel, and consequently are not advantageous either from an engineering standpoint or commercially unless heat-treated. With heat-treatment it gives considerably higher strength than carbon steel, combined with greater ductility or toughness. It does not give as high values as the nickel-chromium and chromium-vanadium steels. Nickel steel rolls and forges readily and machines easily. It develops a very thick, hard scale which is apt to give considerable trouble in drop-forging and is hard on the dies. Nickel steel is very liable to develop seaminess, especially when made in large heats and cast into large ingots, as is now customary. It requires a large discard to ensure soundness. The use of nickel steel in forgings, and particularly drop-forgings, is falling off in favor of other alloy steels with greater values.

#### Chromium Steel.

The use of this steel is confined principally to a few specialties and it is not in general use for an all-round engineering steel. One of the principal uses is for ball and ball races. The great mineralogical hardness obtained by quenching is very desirable for this purpose. The steel for this application contains approximately 1% each of carbon and chromium.

Chromium steel is also used for stamp mill shoes, and in combination with soft steel in laminated plates for construction of burglar-proof safes, and in the same combination in bars for jails.

The low- and medium-carbon types, containing 0.80% or less of chromium, have somewhat higher mechanical properties than the corresponding carbon steel. It is not used to any great extent, other alloy steels being superior, both in static and dynamic strength. Chromium steel is also very liable to crack and check in heat-treatment.

#### Nickel-Chromium Steel.

The addition of chromium to nickel steel has a marked effect, greatly increasing the strength and resistance to shock and particularly the mineralogical hardness. It is more difficult to forge and heat-treat and harder to machine, and is also liable to the seaminess frequently present in nickel steel. There are three types of this steel, differing both in the percentage of nickel and chromium, and all with low or medium carbon:

Nickel-Chromium Steel		Carbon	
1st	3.5%	1.50%	0.25% to 0.45%
2nd	2.0%	1.00%	0.10% to 0.15%
3rd	1.5%	0.50%	0.10% to 0.15%

The first type is used principally for armor plate and armor-piercing projectiles and came into use about 1895, superseding the nickel plates and chromium projectiles. The other two types were developed by the automobile industry. The second type is largely for automobile forgings. It gives high strength with heat-treatment, has great hardness and good shock and fatigue resisting qualities. The third type is largely used for all-round engineering steel. It is used for automobile forgings and for a variety of miscellaneous drop-forgings and machine parts. It is an excellent case-hardening steel, carbonizing readily. This type is more tractable in working, heat-treatment and machining than the other two. It is also somewhat lower in tensile strength.

#### Vanadium Steel.

The additions of small amounts of vanadium, generally under 0.25%, to simple carbon steel or any of the alloy steels increases very considerably—about 20% or more—the elastic limit and breaking strength, without materially affecting the ductility. To an even greater extent it increases the resistance to shock and fatigue.

The vanadium steel which has been up to now most generally used is a chromium-vanadium steel of the following typical composition:

Carbon,	0.10% to 0.55%.
Manganese,	0.50% to 0.80%.
Chromium,	0.80% to 1.00%.
Vanadium,	over 0.15%.

The lower carbon type, 0.10% to 0.20%, is used mainly for case-hardening and is the best steel for this purpose. It carbonizes readily, gives the highest maximum carbon and finest grain. The casing is very strongly coherent to the core, very hard, tough and strong and practically free from any tendency to flake or powder. The core is remarkably strong and tough.

The higher limits of carbon, 0.45% to 0.55%, are extensively used for automobile and locomotive springs, giving remarkable resiliency and endurance. It is also extensively used for oil-tempered gears.

The range in carbon from 0.35% to 0.45% is largely employed for crank shafts, locomotive axles, crank pins, connecting rods, hammer piston rods, automobile transmissions and crank axle shafts.

The range from 0.25% to 0.35% carbon is used for automobile forgings of all kinds and a great variety of miscellaneous work requiring the best combination of static and dynamic strength.

As illustrating the wonderful shock and fatigue enduring qualities of

chrome-vanadium steel, drop-hammer piston rods of this material are giving many times the length of service of carbon, nickel and chromium-nickel steel rods.

Vanadium steels have a much wider heat-treatment range than other steels. The desired physical properties can be obtained with a higher draw-back or annealing temperature, which is very advantageous as more completely removing quenching strains, and also as a manufacturing proposition.

Chromium-vanadium steel, forges and machines better than nickel-chromium steel, is not as liable to injury in heating for forging, is not so liable to crack or check in heat-treatment and is free from the seaminess tendency of steel containing nickel.

Carbon steel with a small percentage of vanadium, from 0.15% to 0.20%, has been used extensively for locomotive frame castings with great success. The failures of these frames from all causes over a period of nearly ten years has been only a fraction of one per cent.

In tool-steel grades, this steel has better cutting qualities, hardens deeper and more uniformly, and has remarkable toughness. In what are termed battering tools, chisels, cutters, dies, etc., it gives several times the length of service of ordinary carbon tool steel.

The handicap of high cost of vanadium has almost disappeared, and simple carbon-vanadium steel in the ordinary forging grades will undoubtedly soon become very widely used as an all-round engineering steel, when a better steel than carbon is required. It is remarkably clean and is as easily worked as carbon steel. It is free from the seaminess and ugly scale of nickel steels and the tendency to check and crack of the chromium steels, particularly nickel-chromium.

Tests of carbon-vanadium steel rails in curves are showing about 20% less wear than rails with 0.15% to 0.20% higher carbon, and are also considerably stronger. The difference in wear will doubtless be much greater when the carbon percentage in the vanadium rails is increased to that of the standard rails.

In simple annealed forgings, plain vanadium steel has physical properties well above those specified for heat-treated (quenched and tempered) carbon steel.

This type of vanadium steel has a wider range of quenching temperature than nickel or nickel-chromium steels; and for mechanical properties after heat-treatment is practically on an equality with 3½% nickel or the low nickel-chromium steels in general use, and apparently has higher fatigue resisting qualities.

While nickel and chromium interfere seriously with the welding quality of steel, vanadium does not, but on the contrary improves this quality. Vanadium steel wire is in common use for autogenous welding.

#### Tungsten Steel.

This is principally used for magnets for magnetos and to some extent in hook saws and special tool steels. Tungsten is seldom used in engineering constructional steels, and then usually in combination with chromium.

The following table shows the typical engineering alloy steels and their tensile properties for the same heat-treatment draw-back temperature. This is in all cases 600 degrees Centigrade (about 1100 degrees Fahrenheit). The specimens in most cases were heat-treated in the form of inch rounds and were machined after treatment.

Carbon %	Manganese %	Nickel %	Chromium %	Vanadium %	Residual Phosphorus lbs. per sq. in.	Tensile Strength lbs. per sq. in.	Elongation in 2 in. %	Reduction of Area %

#### Complex Alloy Steel.

Practically none of the constructional steels contain three or more alloy metals. The only steel in this class to be considered is what is commonly known as high-speed steel. Robert Mushet developed and patented about 1860 an air-hardening steel that was very very much superior to carbon tool steel for machining hard material. Mushet steel, as it was known, had about the following composition:

Carbon, 2.00%.  
Manganese, 1.75%.  
Silicon, 0.75%.  
Chromium, 0.40%.  
Tungsten, 5.50%.

At the Paris Exposition in 1900, the Bethlehem Steel Company exhibited a new tool steel that took wonderfully heavy cuts at high speeds, the point of the tool heating up to a strong blue color without losing its edge. This steel, which immediately became known as high-speed steel, was the culmination of the research work carried on for many years by Mr. F. W. Taylor and later published in his monograph "The Art of Cutting Metals." The difference between this steel and Mushet steel is apparent from the following typical composition:

Carbon, 0.60%.  
Manganese, 0.20%.  
Silicon, 0.10%.  
Tungsten, 18.00%.

With this steel, cutting speeds of over 90 feet per minute were obtained.

Within three or four years it was found that the addition of vanadium to high-speed steel made it possible to still greatly increase the speed and size of cut. At first only about 0.30% vanadium was added, but this has been increased until now 1.00% is practically the standard amount in most high-speed steels, and speeds of 140 feet and upward per minute have been attained.

Lately the addition of cobalt to high-speed steel has been meeting with favor as still further improving the endurance of the steel. The amount of cobalt generally used is 3% to 4%, with no change in the percentage of the other metals—tungsten, chromium and vanadium.

Park, San Mateo County, and which is controlled and managed by the University of California. The new rates go into effect in 30 days, and reduce the flat rate for unmetered service to \$1.50 from \$2., and retrogrades the metered charges so as to distribute them upon the different classes of consumers more equitably.

The order also disposes of a complaint of J. W. Leggett and other residents of Menlo Park, who more than two years ago claimed before the commission that the water supply was inadequate and its quality wretched. The water is now excellent and ample.

The complaint against the rates was by John Billesback and others, and was chiefly against the \$2 minimum for domestic use.

The Ingwood Water Company and the Hyde Park Water Company of Los Angeles County have filed with the Railroad Commission an application for authority for the first named concern to purchase all the assets of the latter, except real estate, for the Ingwood Company to change its water rates, to issue bonds to refund indebtedness of the Company, to buy the plant and system of the Hyde Park Water Company and provide for additions and betterments.

The price fixed for the system of the Hyde Park Company is \$20,000 payable in bonds of the Ingwood Company.

#### Railroad Commission News.

The Railroad Commission has issued an order fixing water rates to be charged by the San Gabriel Valley Water Company for domestic and irrigation purposes. The rates for domestic, industrial and commercial use are \$1 a month for 600 cubic feet or less; 12 cents per 100 cubic feet, up to 5,000 cubic feet, and 10 cents over 5,000.

For municipal use 10 cents a 100 cubic feet is fixed, with a minimum of \$250 a month for fire hydrant service, and fire hydrants \$2 a month each.

For irrigation the charge is to be 50 cents a 1,000 cubic feet or less.

A complaint against the company was brought by Granada Park Water Committee, and the San Gabriel Company asked the Commission to examine its schedule of rates, saying that they did not return the cost of maintenance and interest on its investment. The company further said that the rates in San Gabriel, San Marino, Oak Knoll, and Los Angeles County, do not bring the company the annual charges on the various plants supplying the municipalities with water.

The Commission estimated the reasonable cost new of the physical properties of the company, exclusive of the real estate, at \$378,797, and the reasonable cost now of the plant of the company, combining all elements of value at \$50,117. The rates fixed by the Commission are aimed to return a fair interest on this amount, and at a slight raise over present rates.

The Railroad Commission has issued an order adjusting the rates to be charged for water by the Bear Gulch Water Company, which serves Menlo

The City of San Fernando, Los Angeles County, has filed with the Railroad Commission an application for authority to build Jessie street over the tracks of the Southern Pacific Company.

#### Water Commission News.

##### LUMBER AND EARTH DAM.

The State Water Commission is kept busy with the many applications submitted to it for the appropriation of water from the various sources in the State. Of interest to this section in general is the permit just granted by the Commission to J. W. Squires and R. B. Gilmour of Stockton to use 160 miner's inches, or four cubic feet of water, from Littlejohn Creek, which has its rise in the foothill region of Calaveras and San Joaquin counties, and empties into the San Joaquin River through the French Camp Slough south of Stockton. The permit was granted for the purpose of irrigating 142 acres of farming land. The water is to be diverted at a point 60 feet west of 1830 feet north of the southwest corner of section 35, T. 1 N., R. 7 E., M. D. M. The creek is to be dammed with a lumber and earth dam, 5 feet high, 55 feet on top and 20 feet on bottom, and the main ditch is to be three-eighths of a mile long. Littlejohn Creek carries storm waters and is available for irrigation only a portion of the year. No protests were filed against the use of the water from this source. The permit does not guarantee the supply, and was granted by the Water Commission subject to the rights before existing on the stream.

# Technical Societies.

## SAN FRANCISCO ASSOCIATION OF MEMBERS OF THE AMERICAN SOCIETY OF CIVIL ENGINEERS.

### Officers for 1915.

President—A. M. Hunt.  
Vice-Presidents—H. L. Haehl, M. C. Couchot.

Secretary—E. T. Thurston, Jr.

Treasurer—P. E. Harroun.

Board of Directors—M. C. Couchot, H. L. Haehl, A. M. Hunt, P. E. Harroun, E. T. Thurston, Jr., C. H. Snyder, C. B. Wing.

Weekly luncheons in College Room, Hoffbrau Cafe, Wednesdays at 12:30. Engineers welcome; informal; no program.

Regular meetings are held bi-monthly at such time and place as may be appointed by the board of directors. The established custom is to meet on the third Fridays of February, April, June, August, October and December.

Address E. T. Thurston, Secretary, 213 Mechanics' Institute Bldg., Post street, San Francisco.

## SAN FRANCISCO CHAPTER AMERICAN INSTITUTE OF ARCHITECTS.

233 Post Street.

President—W. B. Faville.

Vice-President—Edgar A. Matthews.

Sec.-Treas.—Sylvain Schnaittacher.

Trustees—James W. Reid and Henry Schulze.

Monthly meeting the third Thursday.

## STATE BOARD OF ARCHITECTS.

### Northern District.

John Bakewell, President.  
Sylvain Schnaittacher, Sec.-Treas.  
Joseph C. Newsom, Edgar Matthews.  
One vacancy.

## LOS ANGELES AND SOUTHERN CALIFORNIA.

## AMER. SOC. OF CIVIL ENGINEERS, So. Calif. Association of Members.

President.....Chas. T. Leeds  
First Vice-President.....Geo. S. Binkley  
Second Vice-President.....H. Hawgood  
Treasurer.....Chas. H. Lee  
Meetings bi-monthly. Address all communications to W. K. Barnard, Secretary, 701 Central Bldg., Los Angeles.

## AMERICAN INSTITUTE ELEC. ENGINEERS—Los Angeles Section.

Chairman.....E. R. Northmore  
Secretary.....C. G. Pyle  
Asst. Secretary.....Edward Woodbury  
EXECUTIVE COMMITTEE — J. A. Lighthipe, J. E. Barker, Geo. A. Damon, A. W. Nye.

Regular meetings third Tuesday in each month. Address all communications to C. G. Pyle, Secretary, Standard Underground Cable Co., 914 Hibernian Bldg., Los Angeles.

## ENGINEERS AND ARCHITECTS' ASSOCIATION OF SOUTHERN CALIFORNIA.

President.....Samuel Storrow  
Vice-President.....A. H. Koebig  
Second Vice-President.....W. A. E. Noble  
Sec.-Treas.....H. Z. Osborne, Jr.  
DIRECTORS—Arthur S. Bent, J. J. Backus, A. C. Martin, Kenneth Shibley.  
Regular monthly meetings as arranged by program committee. Address all communications to H. Z. Osborne, Jr., Secretary, care City Engineer's Office, Los Angeles.

## AMERICAN INSTITUTE OF ARCHITECTS—SOUTHERN CALIFORNIA CHAPTER.

President.....S. Tilden Norton  
Vice-President.....J. E. Allison  
Secretary.....Fernand Parmentier  
Treasurer.....August Wackerbarth  
DIRECTORS — J. J. Blick, J. J. Backus and Robert D. Parquhar, for the 1, 2 and 3 year terms respectively.

Regular meetings second Tuesday evening each month. Address all communications to A. R. Walker, Acting Secretary, 1402 Hibernian Building.

## AMER. SOC. OF MECHANICAL ENGINEERS—Los Angeles Section.

Chairman.....Walter H. Adams  
Secretary.....Ford W. Harris

### EXECUTIVE COMMITTEE—W. H. Adams, Ford W. Harris, O. J. Root, W. W. Smith, Paul Weeks.

Address all communications to Ford W. Harris, 1029 Higgins Bldg., Los Angeles.

## STATE BOARD OF ARCHITECTURE, SOUTHERN DISTRICT.

President.....J. P. Krempel, L. A. Secretary.....F. L. Roehrig, L. A. Member.....Octavius Morgan, L. A. Member.....S. P. Hunt, L. A. Member.....W. S. Hebbard, San Diego.  
Address all communications to Fred'k L. Roehrig, Secretary, 721 American Bank Bldg., Los Angeles.

## UNITED STATES.

Baron Elichi Shibusawa, a leading banker of Japan, who is visiting the United States to study banking facilities and to further trade relations between the two countries, has arrived in Seattle, Wash., with the party of seven that is accompanying him on his tour. From Seattle he will proceed to Chicago, arriving in the Illinois city on November 22. After spending three days in Chicago, the visitors are due in Pittsburgh November 25 for a two days stay, Philadelphia the 27th, one day; New York, the 28th; Boston the 29th, two days; return to New York, the 30th, for five days; Washington, December 5, two days; Houston, Tex., December 8, two days; Los Angeles, December 12, one day; and will conclude the tour at San Francisco on December 14.

# ADVANCE CONSTRUCTION NEWS.

Classified According to Character of Work.

## APARTMENT HOUSES

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$15,000. Architect, Benj. G. McDougall, Sheldon Bldg., S. F. Owner, Arthur Arlett, Sheldon Bldg. Location, Powell near Washington. Will contain a number of two and three room suites with private baths and wall beds. Interior finish pine and elm panels and some hardwood floors. Steam heat and a hot water system. Bath rooms will have composition floors. Marble and tile entrance. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Apartment house, 4 story and base, brick and steel, \$20,000. Architect, George C. Thomas, Russ Bldg., S. F. Owner, A. Penziner. Location, east Hyde north of Ellis. Will contain fifteen apartments of two and three rooms. All suites will have wall beds and private baths. Interior finish pine and elm panels. Some hardwood floors. Steam heat, automatic elevator and hot water system. Bath rooms tile. Marble and tile entrance. Exterior faced with cement plaster and pressed brick. Plans complete and figures to be taken shortly.

**SAN FRANCISCO**—Apartment house, 2 story and base, frame, \$10,000. Architect, Edward E. Young, 251 Kearny street, S. F. Owner, Thomas Scohle, 363 14th avenue, S. F. Location, northeast corner Geary and 19th avenue, covering an area of 52½ by 67 feet. First floor arranged for a store. Upper floor will contain four suites of four rooms and bath. Interior finish pine and elm with some white enamel and hardwood floors. Hot water system and wall beds. Exterior covered with cement plaster and rustic. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Apartment house, 1 story and base, Class C construction, \$40,000. Architect, J. C. Hladik, Monadnock Bldg., S. F. Owner's name not given. Location, south Bush east of Hyde. Will contain a number of two and three room suites with private baths and wall beds. Interior finish pine, gum and white enamel. Some hardwood floors. Steam heat, automatic elevator and hot water supply. Bath rooms will have composition floors and tile wainscot. Marble and tile wainscot in lobby. Exterior faced with pressed brick trimmed with terra cotta. Plans complete and figures being taken.

**SACRAMENTO, CAL.**—Apartment house, 2 story and base, frame, \$8,000. Architect, P. J. Herold, Forum Bldg., Sacramento. Owner, George B. Stack. Location, corner of 15th and M streets. Will contain 20 rooms arranged en suite, besides private baths. Interior finish pine with some hardwood floors.

Hot water supply. Wall beds. Exterior covered with cement plaster. Plans complete and a contract for the carpentry and mill work awarded to Chatterton Bros. Bids being taken for the balance of the work.

## BANKS

**WALNUT GROVE, SACRAMENTO CO., CAL.**—Bank, 2 story and base, brick and steel, \$13,228. Architect, W. H. Weeks, 75 Post street, S. F. Owner, Bank of Alex Brown. Contractor, H. P. Smith, Walnut Grove. Contract price, \$13,228.

## BONDS.

**FORTUNA, HUMBOLDT CO., CAL.**—The \$24,000 school bonds voted by the Fortuna High School District are now being advertised for sale. A new school building will be erected when the bonds have been sold.

**THERMALITO, BUTTE CO., CAL.**—A meeting held by landowners to form an irrigation district resulted unanimously in favor of the plan. Petitions will be sent out immediately. Bonds will be voted to raise funds to finance the improvements necessary.

**COLUSA, COLUSA CO., CAL.**—E. H. Rollins & Sons have purchased from Colusa County \$120,000 state highway bonds.

**EUGENE, ORE.**—An election will be held in the near future to vote bonds for the construction of a bridge across the Willamette River at Harrisburg.

**HOLLYWOOD, LOS ANGELES CO., CAL.**—A petition bearing 3,900 names has been forwarded from Hollywood to the Los Angeles City Council asking them to set a date to vote water bonds.

**HILLSBOROUGH, SAN MATEO CO., CAL.**—Road bonds of \$10,000 were sold by the Hillsborough Trustees to the Anglo and London-Paris National Bank at a premium of \$1,273.

**ALAMO, CONTRA COSTA CO., CAL.**—The Mount Diablo Boulevard Commission has set December 18th as the date for the \$90,000 bond election. The proposition includes five towns, and will mean 31 miles of highway to cost \$120,000. Contra Costa County is to appropriate \$20,000 of the cost.

**ESCONDIDO, SAN DIEGO CO., CAL.**—An election has been called by the City Trustees for November 30th to vote on the issuance of \$50,000 in bonds for the acquisition of an electric light and gas plant, \$10,000 for the former and \$40,000 for the latter.

**SAN ANSELMO, MARIN CO., CAL.**—A local exchange says: "The opinion of Goodfellow, Ellis, Moore & Orish on the legality of additional bond issues of a sanitary district clears the way for White's Hill-to-the-Bay sewer. It makes possible the addition of the Fairfax and Manor territory as well as the Bon Air tract below Kentfield to the present district No. 1."

**SACRAMENTO, CAL.**—State Treasurer Clinton S. Richardson and State Comptroller J. S. Chambers have decided that irrigation bonds will be accepted in the future as security for state deposits. The decision was arrived at after a visit to the Oakdale and South San Joaquin irrigation districts. This is a reversal of the policy adopted in the past.

**MADERA, MADERA CO., CAL.**—Steps are now well under way for the formation of the Madera Irrigation district, comprising 250,000 acres of land, the system as outlined including a dam near Pollasky on the San Joaquin River. Preparation of a map showing the lands of the proposed district available for irrigation is now in progress.

**FRESNO, FRESNO CO., CAL.**—The city administration is preparing to call a bond election in January for larger sewers in the city and additions with the corporate limits, for a storm sewer and other public improvements. City Engineer Cronkite will prepare plans for the improvements to be made.

**REDDING, SIESTA CO., CAL.**—The Anderson-Cottonwood Irrigation district has been notified by bond experts that the \$100,000 bonds voted by them are legal. The proceeds of the sale of these bonds will be used in irrigation improvements.

**RIVERBANK, YOLO CO., CAL.**—The Riverbank Improvement Club will suggest at the Supervisors' next meeting that they appropriate \$10,000 to build a city hall.

**MT. DIABLO BOULEVARD DISTRICT, CONTRA COSTA CO., CAL.**—Bids are now being advertised for sale for the purchase of bonds of \$50,000. The proceeds will be used in the construction of a boulevard.

**CHINO, SAN BERNARDINO CO., CAL.**—It is probable that the election to vote improvement bonds in this city will not be held until next spring.

When the election is called it is expected that the road bonds will amount to \$73,000 while the sewer bonds will be \$52,000, making a total bonded indebtedness for roads and sewers of \$125,000.

**SAN RAFAEL, MARIN CO., CAL.**—The directors of the Marin Municipal Water district are preparing to advertise for bidders for the sale of \$600,000 worth of bonds on December 21st, \$200,000 to be delivered in January, 1916, and \$400,000 in April.

The plan of the directors is to use \$250,000 of this money in the purchase of the Howard-Shafter properties, \$100,000 for road and tunnel work on the Alpine dam site and the purchase of the right of way over the Jorey and Cascade ranches, and the balance of \$250,000 for the purchase of the North Coast Water Co. property.

**MARICOPA, PINAL CO., CAL.**—Bids for the purchase of bonds in the sum of \$15,000 are being received by the County Supervisors to finance the erec-

tion of a school building in the Mari-copa School district.

**HILLIARD SCHOOL DISTRICT.** PRESNO CO., CAL.—Bonds of \$15,000 have been voted by the Hilliard School district and are being advertised for sale. On the sale of these bonds plans for a school will be ordered.

**SAN LEANDRO, ALAMEDA CO., CAL.**—The proposition of voting bonds of \$125,000 carried by a large majority. The proceeds of the sale will be used in school improvements.

**WOLTERS SCHOOL DISTRICT.** PRESNO CO., CAL.—Bonds of \$12,000 have been voted and are now on sale. When sold a new school will be erected from the proceeds of the sale.

### BRIDGES, DAMS AND HARBOR WORK

**RED BLUFF, TEHAMA CO., CAL.**—Bridge, steel and reinforced concrete. Cost not stated. Engineer, County Surveyor, Red Bluff, owners, Tehama County. The County Surveyor was instructed at the last meeting of the County Supervisors to prepare plans and specifications for a steel and concrete bridge across Brickyard Creek on the Red Bluff and Coming road in Road District No. 2. Bids will be called for on the completion and acceptance of the plans by the County Board.

**RED BLUFF, TEHAMA CO., CAL.**—Bridges, etc. Cost not stated. Engineer, County Surveyor, Red Bluff, Owners, Tehama County. At the last meeting of the County Supervisors the County Surveyor was instructed to prepare plans for the following work: That the County Surveyor be ordered to prepare specifications for trenching a portion of the Paynes Creek road beginning at Seven Mile Creek and continuing on to Hog Lake. The county to furnish the rock crusher and the bidders to state the amount charged per cubic yard for crushed rock and placing same on the road. The County Surveyor was also ordered to prepare plans and specifications for repairing the Minger Creek bridge and for the construction of jetties near the lower Deer Creek bridge in Road District No. 5. It was moved by Supervisor Samson that Supervisor Kauffman be authorized to have the east approach to the bridge across the Sacramento River at Tehama repaired.

**MARYSVILLE, YUBA CO., CAL.**—Bridge removal. Cost not stated. Engineer, County Surveyor, Marysville, Owners, Yuba County. The bid of A. C. Knox and K. W. Gordon for the removal of the old Yuba River bridge was rejected by the Supervisors at their last meeting. It is the intention of the board to have the bridge removed to make way for a new structure to be erected there. The work of removing will now be done under the direction of the County Surveyor.

**GRASS VALLEY, NEVADA CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor, Grass Valley, Owners, Nevada County. The old bridge over Little Wolf Creek on the Colfax road is being razed to make way for the new concrete bridge to be constructed. The work is under the supervision of C. J. Miller, chairman of the Board of Supervisors. Bids for the new structure will be called for shortly.

### Contracts Awarded

**SACRAMENTO, CAL.**—Lavo, 1909, \$11,250. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Contractors, A. Teichert & Son, 1001 1/2 Bldg., Sacramento. Contract price, \$11,250.

**HANFORD, KINGS CO., CAL.**—Bridges and culverts. Cost as follows: Engineer, County Surveyor, Hanford, Owners, Kings County. Contractor, S. G. Smart, Bakerfield. Contract price, No. 1A, laying concrete, \$7.19 per cubic yard, No. 1B, \$7.19 per cubic yard; No. 2, laying steel, half cent per pound.

### CHURCHES

**SAN FRANCISCO**—Church, 1 story and base, frame and concrete, \$17,000. Architect, Leo J. Devin, Pacific Bldg., S. F. Owners, St. Charles Church. Location, 18th and Shotwell streets. Designed in the Mission style. Will contain main auditorium and Sunday school rooms. Interior finished in pine and ornamental plaster. Art glass windows. Exterior covered with cement plaster. Plans being prepared.

**SAN FRANCISCO**—Church addition, 1 story, frame, \$1,000. Architect, W. J. Wythe, Central Bank Bldg., Oakland, Owners, Bethany Church. Location, Mission and Richmond avenue. Addition will contain Sunday school rooms and social room. Interior finish pine. Exterior covered with cement plaster. Plans complete and figures being taken.

**FAIRFIELD, SOLANO CO., CAL.**—Church, 1 story and base, frame, \$7,500. Architect, W. J. Wythe, Central Bank Bldg., Oakland. Owners, Fairfield Methodist Church. Will contain main auditorium, Sunday school rooms, social parlors and pastor's study. Interior finish pine and ornamental plaster. Some art glass windows. Exterior covered with cement plaster. Plans being prepared.

### Contracts Awarded.

**BRIHACH, MERCED CO., CAL.**—Church completion, frame, \$5,000. Architect, John J. Foley, 46 Kearny street, S. F. Owners, Roman Catholic Church. Contractor, A. Wayne, Atwater. Contract price, \$5,000.

**LA JOLLA, SAN DIEGO CO., CAL.**—Church, 1 story and base, brick and hollow tile. Cost not stated. Architects, Reginald Johnson and C. M. Winslow, Grant Bldg., San Diego, Owners, Union Congregational Church. Contractor, Ralph Tillinghast, La Jolla. Contract price not stated.

### COURT HOUSES.

**SACRAMENTO, CAL.**—City hall and jail, 1 story and base, reinforced concrete, \$175,000. Architects, Shea & Loquist, Bankers' Investment Bldg., S. F. Owners, City of Sacramento. The closing date for figures on this work has been officially announced as December 9th between 10 and 11 a. m. Plans can be secured only from the City Clerk at Sacramento. An official proposal appears in another column of this issue.

### FACTORIES AND WAREHOUSES

**MARTINEZ, CONTRA COSTA CO., CAL.**—Winery, 2 story, brick and frame. Cost not stated. Architect, none. Owner, J. E. Colton, Martinez. J. E. Colton has purchased a site 50 by 100 feet on Howard street and will erect an addition to his present winery building. A two-story frame and part brick addition will be erected on the additional ground. Work will be started shortly.

**LOS ANGELES, CAL.**—Factory group, 1 and 2 story and base, steel and reinforced concrete, \$500,000. Engineer, Engineering Dept. American Can Co., New York City, Owners, American Can Co. The American Can Co., C. J. Gordon representative, Los Angeles Investment Bldg., has purchased a five-acre site on the west side of Santa Fe avenue, between 45th and 49th streets, and will establish a branch factory. Several large factory buildings and machine shops will be erected.

**CAMARILLO, VENTURA CO., CAL.**—Storage building, 1 story and base, reinforced concrete. Cost not stated. Architect, Alfred F. Priest, Fay Bldg., L. A. Owners, J. F. Lewis & Son. Will cover an area of 100 by 135 feet. Designed for cold storage and refrigerating plant. Interior finish pine. Carrier system, metal window sash and frames and metal covered doors. Exterior faced with cement plaster. Plans complete and work to be done by Day Labor under direction of the architect.

### FIRE REPORT

**SAN FRANCISCO**—The warehouse of Scott, Magner and Miller and the Western Planing Mill, together with a number of smaller structures, were destroyed by fire last Saturday. The loss is estimated at \$65,000. The loss is partly covered by insurance.

**SAN JOSE, SANTA CLARA CO., CAL.**—The grill room building in Luna Park was destroyed by fire last week, causing a loss of \$5,000.

**SANTA CRUZ, SANTA CRUZ CO., CAL.**—The foundry building owned by Walter Ruffcon & Co., was destroyed last week. The loss is estimated at \$5,000.

**WOODLAND, YOLO CO., CAL.**—The residence of J. H. Taylor of Woodland was destroyed by fire, causing a loss of \$2,500.

**SAN FRANCISCO, CAL.**—Offices and living quarters in the Weinhard Brewery, Harrison near Eighth street, were destroyed by fire last week. The loss is covered by insurance.

### FLATS

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$6,000. Architect, none. Owner, W. W. Roddall, 2500 Filbert street, S. F. Location, west Baker south Filbert. Will contain two flats of five and six rooms. Interiors finished in pine, gum and hardwood. Hardwood floors and open fire places. Mantels tile and brick. Bath rooms finished in tile. H. Lynn, Lovell, Wyo., at \$27,076.

### Hanford, Cal., Shelving.

The contract for installing metal vault shelving in the U. S. post office at Hanford, Cal., has been awarded to the H. H. Shults Co., Gowanda, N. Y., at \$295.

### Pasadena, Cal., Shelving.

The contract for installing metal vault shelving in the U. S. post office at Pasadena, Cal., has been awarded to American Bank Protection Co., Minneapolis, Minn., at \$282.

### Pearl Harbor, Marine Railway.

Attention is invited to official advertisement appearing elsewhere in this issue extending the time of opening bids for the marine railway at Pearl Harbor, Hawaii, from November 27 to December 18.

### Salem Indian School, Addition.

The following bids were received by the Commissioner of Indian Affairs, Washington, D. C., for the construction of an addition to brick assembly hall, Salem Indian School, Ore.:  
Fred A. Erickson, Salem, Ore., \$7,215; 10 days.

L. C. Denison, 185 S. 19th street, Salem, Ore., \$7,200; 130 days.

Edward J. Barrett, Portland, Ore., \$7,860; 90 days.

Stewart & Engstrom, Salem, Ore., \$5,750; 90 days.

Southwick & Hendrick, Salem, Ore., \$6,661; 150 days.

A. J. Anderson, Salem, Ore., \$7,980; 120 days.

### Washington Navy Yard, Gas Engines.

The following bids were received by the supply officer, U. S. navy yard, Washington, D. C., for furnishing four gasoline engines for delivery at the Puget Sound navy yard, under N. S. A. requisition 39:  
Buffalo Gas Engine Co., Buffalo, N. Y., \$6,967; 60 days.

Gas Engine and Power Co., and Charles L. Seabury Co., Morris Heights, N. Y., \$7,920; time 15 days.  
Van Blerck Engine Co., Washington, D. C., bid A, \$8,115.50; B, \$7,561.50; 15 days.

Sterling Engine Co., Buffalo, N. Y., \$8,151; 50 days.

### Idaho Falls, Construction.

In the construction of the U. S. post office at Idaho Falls, Idaho, for which the Sound Construction and Engineering Co., Portland, Ore., has the contract, fixtures and material manufactured by the following firms will be used: Pendant switches, Perkins; canopy switches, Cutler-Hammer Mfg. Co.; keyless sockets, Weber; reflectors and glassware, Macbeth-Evans Co.; lighting fixtures manufactured by the Reading Chandelier Works will be used in lieu of those previously approved.

### Denver, Colo., Painting.

The contract for painting plastering in the U. S. post office at Denver, Colo., has been awarded to D. J. Inman, Danville, Ill., at \$1,923; time to complete 120 days.

### Panama Canal Barges.

The Panama Canal, purchasing department, Washington, D. C., has issued the following circular under file M-10-2, for dump barges:

The Panama Canal contemplates purchasing four strongly-built wooden or steel dump barges in good working condition, either new or second hand, of from 1,000 to 1,500 cubic yards capacity, capable of handling and passing heavy rock masses through the bottom doors. Barges with door lifting gear operated by steam are desired, but consideration may be given to barges with hand-operated gear. The barges should be well found in every respect, and the bidder shall dock the barges for purpose of inspection if so required by the Panama Canal.

The Panama Canal would be glad to receive quotations in triplicate for barges of the above description. Alternative prices are desired for the barges delivered (1) at seaport in United States and (2) at Colon or Balboa, Isthmus of Panama.

Bidders should state in their quotations a separate price per barge for dry docking the barge, in case the Panama Canal desires to dock same.

Information concerning barges offered for sale should include whether the barges are of wood or steel construction, when and where built, place

and barges may be examined, and time and place of delivery. Tenders should be accompanied by drawings sufficiently complete to show general construction and method of manipulating hopper doors.

It should be understood in submitting quotations under this inquiry that the Panama Canal is not bound to purchase any barges, but that it may purchase the barges under the price submitted if it desires to do so.

Quotations should be submitted at the earliest practicable date.

### Perplexities of the Eight-Hour Law.

The Army and Navy officers who have to do with the application of the eight-hour law still find themselves perplexed with the provisions of that measure at every turn. One Army engineer recently suggested that in calls for bids hereafter there should be inserted something which should be a guide to bidders as to the operation of the law such as announcing that the law is construed to apply to all field work and not to subcontracts for the materials nor to the fabrication in the shop where work under these contracts forms but a small part of the work on the project. The War Department does not approve of this aid to bidders. It is believed that the government has gone as far as it may reasonably be expected to go. The opinions on the subject from the law officers are considered as being well known to contractors, and bidders are furnished with all possible information on the subject when they submit questions. It is believed that, until the effect of the law upon the industrial world is better understood by a longer period of application, the incorporation of explanation of the law in the calls for bids should be very restricted, if incorporated at all. It is appreciated that contractors, on the other hand, are more or less apprehensive of the scope of the law and seek to obtain advice from the department that no costly mistakes may be made.

ISLAND OF GUAM—Radio towers, steel. Cost not stated. Engineers, Bureau of Yards and Docks, Washington, D. C. Owners, United States Government. Bids will be received until December 21st for the construction of a 100-foot steel radio tower at the Island of Guam.

## HALLS AND SOCIETY BUILDINGS

SAN FRANCISCO—Women's gymnasium and club, 1 story and base, Class A construction, \$100,000. Architects, Ellis & Paville, Balboa Bldg., S. F. Owners, Women's Athletic Association. Location, north Sutter between Mason and Taylor. Will cover a large ground area. Complete steel frame, exterior walls of brick, faced with pressed brick trimmed with terra cotta. Hollow tile interior partitions. Metal window sash and frames. Steam heat, elevator service, vacuum cleaning and hot water system. Special plume. Interior finish pine and hardwoods. Plans complete and figures being taken.

SAN DIEGO, SAN DIEGO CO., CAL.—Lodge hall, 3 story and base, brick, \$29,000. Architects, W. S. Hubbard and C. M. Winslow, Grant Bldg., San Diego.

Owners, University Club. Location, east 7th between A and Ash streets. Will contain offices, dormitories, club rooms, banquet hall and kitchen. Interior finish pine and hardwood with hardwood floors. Central heating system and hot water supply. Exterior faced with cement plaster. Plans complete and figures being taken.

### HOSPITALS

**PRESIDIO OF SAN FRANCISCO**—Hospital addition, 2 story and base, reinforced concrete, \$24,000. Architect, Constructing Quartermaster's Office, Fort Mason. Owners, United States Government. D. Zelinsky submitted the low figure for the general construction of Addition B to the Nurses Dormitory at the Letterman General Hospital at \$18,550. Frank M. Garden Co. were low on the entire work at \$21,996. No awards have been made.

**OAKLAND, CAL.**—Hospital day hall and dormitories, 2, 2 story and base, brick and steel. Cost not stated. Architect, Charles Peter Weeks, Mutual Bank Bldg., S. F. Owners, Alameda County. Under the new proposal issued last Friday for the construction of these buildings bids will be opened on December 20th at 10 a. m. Plans and specifications can be secured from the offices of the County Clerk.

**EUREKA, HUMBOLDT CO., CAL.**—Hospital addition, 1 story, frame. Cost not stated. Architect, E. J. Burke, Eureka. Owners, Humboldt County. Bids will be received until December 14th for the construction of an addition to the present County Hospital. Plans can be secured from the architect.

### LIBRARIES

**SAN FRANCISCO**—Library granite work and ornamental plaster. Cost as follows. Architect, George William Kelham, Sharon Bldg., S. F. Owners, City and County of San Francisco. Bids opened for the exterior granite facing show the McMillary-Raymond Granite Co. low for the exterior facing at \$360,750 and Lyden & Bickel low for the ornamental plaster and artificial Roman Travertine stone at \$42,396. A contract for the granite work will be let to the low bidders at once. Bids for the other work have been taken under advertisement. A complete list of the figures will be found under the heading of San Francisco in this issue.

**TURLOCK, STANISLAUS CO., CAL.**—Library, 1 story and base, brick and concrete, \$10,000. Architects, Bowen & Davis, McKenzie Bldg., Fresno. Owners, Town of Turlock. Will be designed in the classic style and will contain two main reading rooms, children's room and offices of the librarian. Interior finish pine with hardwood floors. Metal book stacks. Central heating system. Exterior faced with cement plaster. Plans being prepared.

**EAST HOLLYWOOD, LOS ANGELES CO., CAL.**—Library, 1 story and base, brick or hollow tile, \$30,000. Architect, C. H. Russell, Story Bldg., L. A. Owners, City of East Hollywood. Will contain main reading room, children's room, offices and stack room on the main floor. Auditorium seating 300 people and work room will occupy the

basement. Interior finish pine and hardwood. Hardwood floor. Steam heat, metal book stacks. Exterior faced with pressed brick. Plans being prepared.

### IRRIGATION PROJECTS

**LOS ANGELES, CAL.**—Irrigation work. Cost not stated. Engineer, County Surveyor, L. A. Owners, Los Angeles County. Owing to alleged irregularities, the bids for the construction of an irrigation system in water works district No. 1 were rejected by the Supervisors and the mechanical department of the county was instructed to prepare new plans and specifications. It was said the specifications were vague in a number of respects and the bidders felt compelled to go outside of them in figuring on the work to be done.

### POST OFFICES

**BAKERSFIELD, KERN CO., CAL.**—Post office, 2 story and base, Class A construction. Cost not stated. Architect, Supervising Architect, Washington, D. C. Owners, United States Government. Location, 18th and G streets, covering an area of 100 by 132 feet. Interior finish pine and hardwood with tile, hardwood and cement floors. Steam heat, oil burning equipment and vacuum cleaning. Exterior faced with pressed brick. Plans complete and figures to be called for shortly.

### RAILROAD CONSTRUCTION AND EQUIPMENT

**SAN FRANCISCO**—Hetch-Hetchy railroad construction, \$1,620,000. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. E. Rehrich, Bank of Italy Bldg., S. F., submitted the lowest figure for the construction of 67 miles of single track railroad into the Hetch-Hetchy site and will probably be awarded the contract. A complete list of the bids received appears under the heading of San Francisco in this issue.

#### Contracts Awarded.

**SAN FRANCISCO**—Steel sand bins. Cost as follows. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Contractors, Ocean Shore Iron Works, S. F. Contract price, \$340 for bins 15 feet 11 inches and \$115 for bins 21 feet 9 inches.

### RESIDENCES

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, Charles J. H. Schultz, 5709 Geary street, S. F. Location, east 18th avenue south of Anza. Will contain six rooms and bath. Interior finish pine and elm panels. Some hardwood floors. Open fire places and tile or brick mantels. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Residences, 2 story and base, frame, \$2,000 each. Architect, none. Owner, W. R. Kohn, 170 Arguello Boulevard, S. F. Location, east 10th avenue south of Balboa. Each

will contain seven rooms, bath and sleeping porches. Interiors finished in pine, elm and white enamel. Hardwood floors. Open fire places and tile or brick mantels. Automatic water heaters. Bath rooms tile. Exteriors covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Residences, 2, 1 story and base, frame, \$2,500 each. Architect, none. Owner, F. Nelson, 30 Presidio Terrace, S. F. Location, west 27th avenue north Irving and west Hillway south of Carl. Will contain six rooms and bath with sleeping porches and basement garage. Interior finish pine, white enamel and elm panels. Hardwood floors and open fire places. Mantels tile and brick. Imitation tile in bath rooms. Automatic water heaters. Exteriors covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Residence, 2 and 3 story and base, Class A construction, \$150,000. Architect, Willis Polk, Hobart Bldg., S. F. Owner, Andrew Welch, Jr. Location, Broadway between Broderick and Baker. Will contain 26 rooms, a number of baths, sleeping porches, conservatory and large hall rooms. Separate garage and servants' rooms. Complete steel frame, concrete walls and floors. Hardwood interior trim, marble and tile mantels, tile bath rooms, steam heat, oil burning equipment, hot water circulating system and vacuum cleaning. Exterior faced with terra cotta and brick. #### SCHOOLS

OAKLAND, CAL.—School building, 1 story and base, frame, cost not stated. Architect, John C. Montgomery, Bldg., Oakland. Contractor, J. C. Montgomery. Plans will be received by the boards for the school building on the 15th day of this month. Plans for the school building will be received by the boards for the school building on the 15th day of this month.

RED BLUFF, CAL.—School building, 1 story and base, frame, \$10,000. Architect, J. C. Montgomery, Bldg., Oakland. Contractor, J. C. Montgomery. Plans will be received by the boards for the school building on the 15th day of this month.

given. Owners, City of Richmond. The following contractors submitted the low bids for the first unit of the new Pullman School and will probably be awarded the contracts: General construction, Robert Glaze, Humboldt Bank Bldg., S. F., \$9,282; J. E. O'Mara, S. F., heating, \$655, and J. L. Collins, plumbing, \$1,011.

**LODI, SAN JOAQUIN CO., CAL.**—School, 2 story and base, reinforced concrete or brick, \$10,000. Architects, Stone & Wright, 21 California street, Stockton. Owners, City of Lodi. Location, East Pine street. Will contain six class rooms and an assembly hall. Interior finish pine with maple floors. Steam heat, oil burning plant. Exterior faced with cement plaster or pressed brick. Plans approved and bids to be called for shortly.

**SANTA CRUZ, SANTA CRUZ CO., CAL.**—School, 1 story and base, reinforced concrete, \$25,000. Architect, John I. Foley, 16 Kearny street, S. F. Owners, Santa Cruz Mission School. Will be designed along similar lines to the famous old Mission School at Santa Cruz. There will be six class rooms, special room for typewriting and an assembly hall. Interior finish pine. Central heating system, probably warm air. Exterior cement plaster. Clay tile roof. Plans being prepared.

**COACHELLA, RIVERSIDE CO., CAL.**—School, 1 story and base, hollow tile or concrete. Cost not stated. Architect, G. Stanley Wilson, Virginia Block, Riverside. Owners, Coachella School District. Will contain nine class rooms, assembly hall and office. Interior finish pine with maple floors. Central heating system, oil burning furnace. Exterior faced with cement plaster. Plans complete and ready for figures.

**OXNARD, VENTURA CO., CAL.**—School, 1 story and base, brick. Cost not stated. Architects, Allison & Allison, Hibernian Bldg., L. A. Owners, Town of Oxnard. Will contain six class rooms and an auditorium. Interior finish pine with maple floors in the class rooms. Central heating system. Exterior covered with pressed brick. Plans being prepared.

**SANTA MARGARITA, SAN LUIS OBISPO CO., CAL.**—School, 1 story, frame, \$1,500. Architects, J. J. Roth, Atascadero. Owners, Santa Margarita School District. The lowest bid received for this work was for \$1,875, and all figures were rejected. New bids are being called for and will be opened on December 14th. Plans can be secured from the architect.

#### Contracts Awarded.

**BERKELEY, ALAMEDA CO., CAL.**—Granite facing, \$225,000. Architect, John Galen Howard, 601 Mission street, S. F. Owners, Regents of the University of California. Contractors, Raymond Granite Co., S. F., exterior facing for Benj. Ide Wheeler Hall. Contract price, \$225,000.

#### SEWERS, STREET WORK & WATER SYSTEMS

**OAKLAND, CAL.** Sewer construction. Cost not stated. Engineer, City Engineer, Oakland. Owners, City of Oakland. At a recent meeting of the City Council plans and specifications were adopted for the sewerage of

Tompkins avenue from Yale avenue northwesterly, and recommending passage of resolution of intention of same. Bids on this work will be called for shortly.

**OROVILLE, BUTTE CO., CAL.** Road improvement. Cost not stated. Engineer, County Surveyor, Oroville. Owners, Butte County. All bids received by the Butte County Supervisors for the repair of the River road were rejected at the last meeting of the Board, as all were above the estimate. The work will now be done by the county. The following bids were received: J. L. Mery Co., \$5,825; Chico Construction Co., \$5,110; George Taber, \$5,537.

**SAN ANDREAS, CALAVERAS CO., CAL.**—Highway construction. Cost not stated. Engineer, County Surveyor, San Andreas. Owners, Calaveras County. The survey of the state highway lateral from San Andreas to the San Joaquin County line has been started. Included in the highway work is the construction of a bridge across the Calaveras River between San Andreas and North Branch, which has been declared unsafe, and for which plans have already been prepared. Further mention will be made of this work.

**EUREKA, HUMBOLDT CO., CAL.**—Street lighting system, \$3,500. Engineer, City Engineer, Eureka. Owners, City of Eureka. The proposition of maintaining and installing an ornamental lighting system on Second street is being considered by the business men and property owners on that thoroughfare. It is thought that the system could be placed at an estimate of \$4,500, this being for six blocks from the corner of G street to the Occidental Pavilion. Action will be taken shortly.

**FREEMPORT, SACRAMENTO CO., CAL.**—Levee repair. Cost not stated. Engineer, E. A. Bailey, Sacramento. Owners, State of California. Owing to the dangerous condition of the east side of the Sacramento River at Portuguese Bend at Freemport, the Reclamation Board has instructed Flood Control Engineer E. A. Bailey to submit at the next meeting detailed estimates of the cost of permanent repair.

**DAILY CITY, SAN MATEO CO., CAL.**—Sewer construction. Cost not stated. Engineer, Town Engineer, Daily City. Owners, Town of Daily City. Bids will be received until December 13th for constructing an 8-inch salt-glazed, vitrified sewer pipe along Bellevue avenue, 2,662 feet; 12 feet of 12-inch diameter salt glazed, vitrified sewer pipe at the intersection of Bellevue avenue with Henrietta street; 12 feet of 15-inch diameter salt glazed, vitrified sewer pipe at intersection of Bellevue avenue with Oliver street; the construction of 4 manholes; 4 lampholes; 29 8x4 inch Y branches; 8 4x4 inch Y branches; 91 6 feet riser pipes of salt glazed, vitrified sewer pipe.

**SAN MATEO, SAN MATEO CO., CAL.**—Street improvement. Cost not stated. Engineer, City Engineer, San Mateo. Owners, City of San Mateo. At the last meeting of the City Trustees, new specifications and a new resolution for the improvement of Parroilhet and Peninsula avenues were adopted after the former had been rescinded, and the clerk was directed to call for bids for the work. Further information may

be had from the City Engineer at San Mateo.

**SOUTH SAN FRANCISCO, SAN MATEO CO., CAL.**—Sewer construction. Cost not stated. Engineer, City Engineer, South San Francisco. Owners, South San Francisco. At the last meeting of the City Trustees H. F. Sharp petitioned the board to construct a sewer on Pine avenue from Olive to Linden avenue. The City Engineer was instructed to have the work done.

**MODESTO, STANISLAUS CO., CAL.**—Street pavement. Cost not stated. Engineer, City Engineer, Modesto. Owners, City of Modesto. At a special meeting of the City Council the matter of paving McHenry avenue was taken up and a survey ordered. This will cover the portion of the street from the corner of Needham avenue and Annie street north to Stoddard avenue. The portion of the street from Stoddard avenue to the bridge over the canal will not be paved until some agreement with the county can be made. The east side of this portion of McHenry avenue is in the city and the west side in the county. It is probable that the same kind of construction as on the state highway, concrete base with oil surface will be tried out on this street. Further mention will be made of this work.

**SANTA ROSA, SONOMA CO., CAL.**—Highway construction. Cost not stated. Engineer, County Surveyor, associated with State Highway Commission. Owners, Sonoma-Marin Counties and State of California. The construction of the Black Point cut-off is now assured. At a special meeting held by the Sonoma County Supervisors the matter of Sonoma County's share of payment was satisfactorily arranged. Sonoma County has agreed to pay into the state treasury \$190,000 and Marin County \$35,000. Bids will be called for shortly.

**LOS ANGELES, CAL.**—Paved walks and road. Cost not stated. Engineer, State Engineer McClure, Sacramento. Owners, State of California. Bids will be received until December 27th at 12 noon for paved walks, road and gutters on the grounds of the State Normal School at Los Angeles. Plans can be secured from the State Department of Engineering. An official proposal appears in another column of this issue.

**OLYMPIA, WASH.**—Highway construction. Cost as follows. Engineer, State Highway Commission, Olympia. Owners, State of Washington. Bids will be received by the State Highway Commission until December 20th for the construction of 25 miles of the Inland Empire Highway as follows: Rosalia south, 7 miles, \$27,000; Pullman south, 9 miles, \$30,000; Touchet-Walula, 7 miles, \$34,000, and Kennewick west, 13 miles, \$34,000.

**STIRLING CITY, BUTTE CO., CAL.**—Water system. Cost not stated. Engineer, none. Owners, Diamond Match Co. The Diamond Match Company is putting in a complete system in its new lumber yard. A total of 2,500 feet of 8-inch and 1,500 feet of 4-inch water main will be used.

**EUREKA, HUMBOLDT CO., CAL.**—Furnishing water pipe. Cost not stated. Engineer, City Engineer, Eureka. Owners, City of Eureka. Bids will be opened on December 7th for furnishing f. o. b. steamer at San Francisco on or

before February 1st, 1916, 8,000 feet 2-inch black pipe and 1,500 feet of 1-inch galvanized pipe, standard weight, random lengths, for the Eureka Water Department.

**SAN GABRIEL, LOS ANGELES CO., CAL.**—Street paving, \$17,625. Engineer, City Engineer, San Gabriel. Owners, City of San Gabriel. The M. R. Company, 826 San Fernando Bldg., L. A., was the lowest bidder at approximately \$17,633 for improving a portion of Las Tunas Drive. The work will include 210,000 square feet of macadam paving and 11,000 lineal feet of curb. No action was taken on awarding the contract.

**SAWTELLE, LOS ANGELES CO., CAL.**—Street paving and curb. Cost not stated. Engineer, City Engineer, Sawtelle. Owners, City of Sawtelle. Bids will be received by the City Clerk up to 5 p. m. of December 20th for grading, macadamizing and constructing concrete curbs in Wabash street between Iowa avenue and Santa Monica Boulevard in accordance with plans and specifications on file in the office of the City Engineer.

**LOS ANGELES, CAL.**—Highway construction, \$68,962. Engineer, County Surveyor, Los Angeles. Owners, Los Angeles County. The Supervisors will soon issue a call for the construction of the first five miles of the Mint Canyon road. Plans for the work have been completed by Road Commissioner Joyner and will be adopted at the next meeting of the Board. Commissioner Joyner estimates the building of the first five miles of this road will cost \$68,962, or \$13,792 a mile. The road will be of concrete construction 20 feet wide and 5 inches thick.

**LOS ANGELES, CAL.**—Flood protection. Cost not stated. Engineer, County Surveyor, Los Angeles. Owners, Los Angeles County. The Road Commissioner has been authorized by the Board of Supervisors to do the necessary flood protection work connected with the construction of the Saugus-Palmdale road by force account. This work consists of the building of a number of short dykes along the banks of Santa Clara River.

#### Contracts Awarded

# OFFICIAL PROPOSALS.

## BIDS FOR RANGES.

BIDS will be received by the purchasing agent of the Los Angeles Board of Education up to 10 A. M. of December 1, 1915, for furnishing the school department with 112 ranges. Specifications may be obtained at the office of the purchasing clerk, 1137 San Pedro street, Los Angeles. For further particulars address same.

## PROPOSALS FOR PAINTING.

PAINTING -- Treasury department, office of the Supervising Architect, Washington, D. C. -- Sealed proposals will be received here until 10 a. m. December 8, 1915, for painting plastering in the U. S. public building at San Diego, Cal. For further information address the supervising architect.

## SEALED PROPOSALS.

BIDS WILL BE RECEIVED BY THE City Commission in the Council Chamber, City Hall Building, on 1 street between Ninth and Tenth streets, in the City of Sacramento, between the hours of ten o'clock a. m. and eleven o'clock a. m. on Thursday, December 9th, 1915, for furnishing all labor and materials for the general construction complete (excepting the jail work), of a Hall of Justice Building for the City of Sacramento, State of California, said building to be erected on portions of Lots Numbers One and Two in the block bounded by Sixth and Seventh and H and I streets in said City, in accordance with plans and specifications prepared by Shea & Lofquist, Architects, said plans and specifications having been heretofore adopted by the City Commission of said City, and said plans and specifications now being on file in the office of the City Clerk of said City, and open to the inspection of the public at all times during office hours, and copies thereof may be obtained by prospective bidders upon receipt of check on respondent bank made payable to City Clerk in the sum of Fifteen (\$15.00) Dollars, or deposit of cash in said sum, said check or cash deposit to be forwarded to bidder upon return of plans and specifications in good condition.

At the same time, on the same date, and in said Council Chamber, bids will also be received for the furnishing and erection complete of all jail cells and corridor work, concrete floors of same, etc., for said Hall of Justice Building, in accordance with plans and specifications prepared by Shea & Lofquist, Architects, subject to the same conditions as above stipulated for general construction of said building, including deposit for plans and specifications.

All work to be performed must be to the satisfaction of said City Commission of said City.

All such proposals must comply with the requirements of the New Charter of the City of Sacramento effective July 1st, 1912, and bidders are hereby cautioned that no bid which fails to comply therewith can be considered.

Bids must be submitted upon printed forms prepared by the City, copies of which, together with a circular of instructions, will be supplied free upon application to the undersigned, upon receipt of information from bidder whether form required would be personal bid, co-partnership bid, or corporation bid.

The successful bidder must give bond to the City of Sacramento conditioned for the faithful performance of the contract, and containing the stipulations prescribed in Section 162 of the said New Charter and Ordinance No.

186, Third Series of the City of Sacramento.

A certified check on a responsible bank, made payable to City Clerk for an amount not less than ten (10) per cent of the aggregate of the proposal must accompany each bid.

The right to reject any and all bids is reserved to the City by the provisions of said Charter.

M. J. DESMOND,  
City Clerk of the City of Sacramento,  
County of Sacramento, State of California,  
Office City Hall Building, Sacramento, California.

## PROPOSALS FOR CANAL SUPPLIES.

PANAMA CIRCULAR 992--Proposals for Centrifugal Pumps, Dipper Lips, Steel and Iron Castings, Spring Plates, Pig Iron, Sheet Copper, Hatchets, Hammers, Hand Saws, Hackaws, Blades, Anvils, Rakes, Pickers, Spirit Level, Anvils, Vises, Steel Clamps, Chisels, Carpenters' Braces, Pipe Tones, Tinners' Shears, Planes, Drills, Drill Sleeves, Copper, Degrales, Gauges, Grease Cups, Valves, Cocks, Wagon Wheels, Water Gauge Lamps, Lamp Chimneys, Fire Hose, Manila Rope, Coal Tar Pitch, Rock Salt, Lime, Canvas Skins, Paper and Poplar Lumber.--Sealed proposals will be received at the office of the general purchasing officer, the Panama Canal, Washington, D. C., until 10:30 a. m. December 8, 1915, at which time they will be opened in public for furnishing the above mentioned articles. Plans and general information relating to this circular (No. 992) may be obtained from this office or the office of the assistant purchasing agent, Fort Mason, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

## PROPOSALS FOR STEEL TOWERS.

STEEL TOWERS--Sealed proposals indorsed "Proposals for Steel Towers" must be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. January 8, 1916, and then there publicly opened, for two 400-foot steel towers at the radio station, Island of Guam. Plans and specifications may be obtained on application to the bureau. H. R. STANFORD, chief of bureau.

## PROPOSALS FOR RAILROAD.

MARINE RAILWAY -- Sealed proposals indorsed "Proposals for Marine Railway" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. December 18, 1915, and then there publicly opened, for constructing a marine railway at the naval station, Pearl Harbor, Hawaii. Proposals are invited on separate component parts of the complete railway. Plans and specifications may be obtained on application to the bureau or to the commandant of the naval station named. The original date of opening was September 18, 1915, which was postponed to November 27, 1915. H. R. STANFORD, chief of bureau.

## PROPOSALS FOR BUILDING.

BUILDING -- Sealed proposals indorsed "Proposals for Five Buildings" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. January 4, 1916, and then there publicly opened, for a power house and an operating building of reinforced concrete and steel construction and three quarters of wood construction for commanding officer, married operators and bachelor operators at the naval station, Cavite, P. I. Plans and specifications can be obtained on application to the bureau or to the commandant of the naval station named. Proposals will also be received at the naval station, Cavite, P. I., until 4:30 o'clock p. m. January 4, 1916, and opened at 10 o'clock a. m. January 5, 1916. H. R. STANFORD, chief of bureau.

## NOTICE TO CONTRACTORS.

SEALED BIDS will be received by W. F. McClure, State Engineer, Forum Building, Sacramento, California, up to and including 12 o'clock, Noon, Monday, December 27, 1915, said bids then and there to be publicly opened and

read for furnishing all plant, materials and labor, and doing the work required for the complete construction of paved roads, walks, combined walks, and roads and for drains in the State Normal School Grounds, Los Angeles, California, in accordance with the plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Such bids will be received for the Entire Work, and must be submitted on forms prepared and furnished by the State Department of Engineering. Cash, a bidder's bond, or a certified check in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

A deposit of Five (\$5.00) Dollars will be required for plans and specifications, the deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering, at Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

A bid must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope: "Proposal for Paved Roads, Walks, etc., State Normal School Grounds, Los Angeles, California."

(SIGNED) W. F. McCLURE,  
State Engineer. (\*)

## PROPOSAL FOR PURCHASE AND REMOVAL OF AUSTRALIAN BUILDING.

PROPOSALS for the purchase and removal of the Australian Pavilion and Buildings at the Panama-Pacific International Exposition will be received by the undersigned up to Noon of Tuesday the 7th day of December, 1915. Proposals should be for lots as follows:

1. The buildings complete as they stand.
2. The buildings not including the items in Nos. 3 and 4.
3. Queensland Maple Panelling in Reception Hall plans and specifications.
4. Hoffman Heater and Arco Steam Boiler, Radiators and Plumbing and Lighting Fixtures.

Purchasers of Buildings will be required to grade the lot to the official grade in accordance with the conditions on which the land is held for Exposition purposes.

Proposals should be accompanied by a certified cheque for 10% of the amount of the proposal. No proposal necessarily accepted.

F. J. QUINLAN,  
Australian Pavilion,  
Exposition Grounds. (\*)

## PROPOSALS FOR BUILDING.

BUILDING -- Sealed proposals indorsed "Proposals for Five Buildings" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. January 4, 1916, and then there publicly opened, for a power house and an operating building of reinforced concrete and steel construction and three quarters of wood construction for commanding officer, married operators and bachelor operators at the naval station, Cavite, P. I. Plans and specifications can be obtained on application to the bureau or to the commandant of the naval station named. Proposals will also be received at the naval station, Cavite, P. I., until 4:30 o'clock p. m. January 4, 1916, and opened at 10 o'clock a. m. January 5, 1916. H. R. STANFORD, chief of bureau.

**PROPOSALS.**

**OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.**

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 5th day of December, 1915, for doing the following work:

Furnishing and installing Director's and Bulletin Boards in the City Hall.

Progressive payments will be made. Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made.

The amount of bond for faithful performance of contract has been fixed at \$750.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the Architect, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works, F. J. CHURCHILL, Secretary.

**PROPOSALS FOR BUILDING.**

**BUILDING**—Sealed proposals, indorsed "Proposals for Three Buildings" will be received at the naval station, Pearl Harbor, Hawaii, and at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m., December 4, 1915, and then there publicly opened, for constructing one reinforced concrete power house, one reinforced concrete operating building and one wooden double quarters for chief operator at the naval station, Pearl Harbor, Hawaii. Plans and specifications can be obtained on application to the bureau or to the commandant of the naval station named. H. R. STANFORD, chief of bureau.

**PROPOSALS FOR BUILDING.**

**BUILDING**—Sealed proposals, indorsed "Proposals for Five Buildings" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m., January 4, 1916, and then there publicly opened, for a power house and an operating building of reinforced concrete and steel construction and three quarters of wood construction for commanding officer, married operators and bachelor operators at the naval station, Cavite, P. I., until 4:30 o'clock p. m., January 4, 1916, and opened at 10 o'clock a. m., January 5, 1916. H. R. STANFORD, chief of bureau.

**CALIFORNIA HIGHWAY COMMISSION**

**NOTICE TO CONTRACTORS.**

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock P. M. on December 11, 1915, at which time they will be publicly opened and read for construction in accordance with the specifications therefore, to which special reference is made, portions of State highway as follows:

Imperial County, from Dixland to El Centro (VII-Im-12-C) about 12 miles in length, to be paved with Portland cement concrete.

Plans may be seen, and forms of proposals, bonds, contract, and specifications may be obtained, at the said office, and they may be seen at the office of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at Willits, Dunsmuir, Sacramento, San Francisco, San Luis Obispo, Fresno, and Los Angeles.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

CHARLES D. BLANEY, NEWELL D. DARLINGTON, CHARLES F. STERN, California Highway Commission. AUSTIN B. FLETCHER, Highway Engineer. WILSON R. ELLIS, Secretary. (\*)

Dated: November 9, 1915.

**FOR CEMENT, SAND AND CRUSHED ROCK.**

U. S. Engineer Office, 725 Central Building, Los Angeles, Cal., November 10, 1915.—Sealed proposals for furnishing American Portland cement, sand and crushed rock at San Pedro, Cal., will be received at this office until 11 A. M., December 10, 1915, and then opened. Information on application. R. R. RAYMOND, Major, Engineers.

**PROPOSALS FOR THE SALE, WRECKING AND REMOVAL OF THE FRENCH BUILDING AT THE PANAMA-PACIFIC INTERNATIONAL EXPOSITION.**

SEALED PROPOSALS for the sale, wrecking and complete removal of the French Building at the Panama-Pacific International Exposition at San Francisco, California, are asked by the French Commission.

PROPOSALS are desired for the sale, wrecking and complete removal of the building and clearing lot to official grade.

Proposals shall be securely sealed, accompanied by a certified check for ten per cent (10%) of the amount of the proposal, and mailed as follows: P. J. Gregoire, Secretary, French Commission, French Building, Exposition Grounds, San Francisco, California.

Building may be inspected at any time between the hours of 11 A. M. and 4 P. M., Sundays excepted.

Proposals will be received up to and including noon of Friday, November 26th, 1915. The French Commission reserves the right to reject any or all bids.

FRENCH COMMISSION. P. J. GREGOIRE, Secretary. (\*)

**STATE OF CALIFORNIA.**

**DEPARTMENT OF ENGINEERING.**

**CALIFORNIA HIGHWAY COMMISSION**

**NOTICE TO CONTRACTORS.**

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock P. M. on December 25, 1915, at which time they will be publicly opened and read for construction in accordance with the specification therefore, to which special reference is made, portions of State highway as follows:

Placer County, from Roseville to Penryn (III-Pla-1-A), about 7.5 miles in length, to be paved with Portland cement concrete.

Placer County, from Penryn to Auburn (III-Pla-1-B), about 6.5 miles in

length, to be paved with Portland cement concrete.

Tehama County, from Corning to Prosperity (II-Teh-7-A and 7-B), about 10.2 miles in length, to be paved with Portland cement concrete.

Sonoma and Marin Counties, across Petaluma Creek at Green Point (IV-Son-Mar-8-A), a bridge comprising a tied trestle span 148 feet long, two concrete and steel approach spans each about 50 feet long, and about 1122 feet of crescented pile trestle.

Plans may be seen, and forms of proposals, bonds, contract, and specifications may be obtained, at the said office, and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated.

The Division Engineers' offices are located at Willits, Dunsmuir, Sacramento, San Francisco, San Luis Obispo, Fresno, and Los Angeles.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

CHARLES D. BLANEY, NEWELL D. DARLINGTON, CHARLES F. STERN, California Highway Commission. AUSTIN B. FLETCHER, Highway Engineer. WILSON R. ELLIS, Secretary. (\*)

Dated: Nov. 23, 1915.

**IDEAL HOME EXHIBIT IN AUSTRALIA.**

[Sydney Morning Herald, Oct. 19; supplementing note on "Ideal Home Competition in Australia," in Commerce Reports for Oct. 12, 1915.]

An ideal home exhibition is to be opened by the Governor on Monday, October 25, in the Sydney Town Hall. The exhibition is being organized by the Institute of Architects. The idea is to build and furnish a home which will entail a minimum amount of work for the housewife and to demonstrate how a home can be made beautiful at comparatively little cost to the owner. A model cottage, costing £700 (\$3,406), is to be erected on the floor of the town hall, and it will be decorated and furnished in an artistic but inexpensive manner. Several of the large city firms will also erect rooms furnished in an artistic style. The arts-and-crafts section will show over 100 of its exhibits for the beautifying of the home. Commerce Reports.

**CHURCH ADDITION**—1 story, frame, \$4,000. San Francisco. Architect, W. J. Wythe, Central Bank Bldg., Oakland. Owners, Bethany Church. Location, Mission and Richland avenue. Addition will contain Sunday school rooms and social room. Interior finish pine. Exterior covered with cement plaster. Plans complete and figures being taken.

**FLATS**—2 story and base, frame, \$6,000. San Francisco. Architect, none. Owner, W. W. Reinalt, 2500 Filbert street, S. F. Location, west Baker south of Filbert. Will contain two flats of five and six rooms. Interiors finished in pine, gum and hardwood. Hardwood floors and open fire places. Mantels tile and brick. Bath rooms finished in tile. Automatic water heaters. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**FLATS**—3 story and base, frame, \$8,000. San Francisco. Architect, Edward E. Young, 251 Kearny street, S. F. Owner, Edward E. Young. Location, south Clay west of Leavenworth, covering an area of 25 by 52 feet. Will contain six flats of four and five rooms. Interiors finished in pine, gum and hardwood. Hardwood floors and open places. Wall beds. Mantels tile or brick. Special kitchen equipment. Exterior covered with brick veneer and shiplap. Plans complete and work to be done by Day Labor.

**RADIO TOWERS**—Steel. Cost not stated. Island of Guam. Engineers, Bureau of Yards and Docks, Washington, D. C. Owners, United States Government. Bids will be received until December 21st for the construction of a 100-foot steel radio tower at the Island of Guam.

**WOMAN'S GYMNASIUM AND CLUB**—1 story and base. Class A construction, \$100,000. San Francisco. Archi-

interiors finished in pine, gum and white enamel. Hardwood floors and open fire places. Mantels tile and brick. Automatic water heaters. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**RESIDENCE**—2 story and base, frame, \$2,600. Oakland, Cal. Architect, none. Owner, Edward Larmer, 470 Boulevard Way, Oakland. Location, north Alcatraz west of Hillegas. Will contain six rooms, bath and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors and open fire places. Mantels tile or brick. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**RESIDENCE**—1 story and base, frame, \$2,000. Oakland, Cal. Architect, none. Owner, William E. Roth, 2820 Summit street, Oakland. Location, north Brookdale west of Lilac. Will contain six rooms, bath and sleeping porch. Interior finish pine, gum and white enamel. Hardwood floors and open fire place. Mantel tile or brick. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**RESIDENCE**—1 story and base, frame, \$2,500. Oakland, Cal. Architect, none. Owner, F. R. Jordan, 1497 Oak street, Oakland. Location, south Harvard avenue east of College. Will contain five rooms, bath and sleeping porch. Interior finish pine and white enamel. Hardwood floors. Open fire place and tile or brick mantel. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**RESIDENCE**—1½ story and base, frame, \$3,000. Oakland, Cal. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, Walter H. Packard. Location west Thomas south of Prospect. Will contain seven rooms, bath and sleeping porch. Interior finish pine, gum and white enamel. Hardwood floors and open fire places. Mantels tile or brick. Tile bath room. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**RESIDENCE**—1 story and base, frame, \$2,500. Oakland, Cal. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, Robert Farmer. Location, northeast corner 11th avenue and East 24th street. Will contain a store on the first floor and five living rooms above. Interior finish pine. Some hardwood floors. Open fire place and tile mantel. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**RESIDENCES**—2, 2 story and base, frame. Cost not stated. Oakland, Cal. Architect, Charles F. Mau, Macdonough Bldg., Oakland. Owners, Charles F. Mau and F. W. Denswell. Location, Grand avenue near Sunnyslope. Will contain six rooms, bath and sleeping porches. Interiors finished in pine, gum and white enamel. Hardwood floors, open fire places and tile or brick mantels. Imitation tile in bath rooms. Automatic water heaters. Exterior

covered with cement plaster. Plans complete and architect taking sub-figures.

**RESIDENCE**—1 story and base, frame, \$1,500. Oakland, Cal. Architect, none. Owner, E. A. Dodge, 1011 69th avenue, Oakland. Location, south Noble west of 61st street. Will contain five rooms and bath. Interior finish pine throughout. Some hardwood floors. Open fire place and tile mantel. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**HOSPITAL DAY HALL AND PORTHOLIES**—2, 2 story and base, brick and steel. Cost not stated. Oakland, Cal. Architect, Charles Peter Weeks, Mutual Bank Bldg., S. F. Owners, Alameda County. Under the new proposal issued last Friday for the construction of these buildings bids will be opened on December 20th at 10 a. m. Plans and specifications can be secured from the offices of the County Clerk.

**SCHOOL ADDITION**—2 story and base, frame. Cost not stated. Oakland, Cal. Architect, John J. Donovan, Daziel Bldg., Oakland. Owners, City of Oakland. Bids will be received until December 6th for the construction of a two-story addition to the Fremont School. Plans can be secured from the Secretary of the Board of Education.

#### Contracts Awarded

**RESIDENCE**—2 story and base, frame, \$25,000. Piedmont, Alameda Co., Cal. Architect, Julia Morgan, Merchants' Exchange Bldg., S. F. Owner, J. L. Lombard, Contractor, Bruce B. Burnett, 316 Oak avenue, Oakland. Contract price, \$25,000.

**GRANITE FACING**—\$225,000. Berkeley, Alameda Co., Cal. Architect, John Galen Howard, 601 Mission street, S. F. Owners, Regents of the University of California. Contractors, Raymond Granite Co., S. F., exterior facing for Benj. Ide Wheeler Hall. Contract price, \$225,000.

**THEATRE ALTERATION**—Class C construction \$66,000. Oakland, Cal. Architect, Carl Werner, Phelan Bldg., S. F. Owner, C. J. Heesman. Contractors, Van Sant-Houghton Co., 503 Market street, S. F. Contract price, \$66,000.

#### SAN JOSE AND THE SANTA CLARA VALLEY

**SEWER CONSTRUCTION**—Cost not stated. Daly City, San Mateo Co., Cal. Engineer, Town Engineer, Daly City. Owners, Town of Daly City. Bids will be received until December 12th for constructing an 8-inch salt glazed vitrified sewer pipe along Bellevue avenue, 2,662 feet; 12 feet of 12-inch diameter salt glazed vitrified sewer pipe at the intersection of Bellevue avenue with Henrietta street, 12 feet of 15-inch diameter salt glazed vitrified sewer pipe at intersection of Bellevue avenue with Oliver street, the construction of 4 manholes; 4 lampholes, 29 8x11 inch V branches, 8 15x4 inch V branches, 91 6-foot riser pipes of salt glazed vitrified sewer pipe.

**STREET IMPROVEMENT**—Cost not stated. San Mateo, San Mateo Co., Cal. Engineer, City Engineer, San Mateo. Owners, City of San Mateo. At the last meeting of the City Trustees, new

specifications and a new resolution for the improvement of Barretto and Peninsula avenues were adopted after the former had been rescinded and the clerk was directed to call for bids for the work. Further information may be had from the City Engineer at San Mateo.

**SEWER CONSTRUCTION**—Cost not stated. South San Francisco, San Mateo Co., Cal. Engineer, City Engineer, South San Francisco. Owners, South San Francisco. At the last meeting of the City Trustees, H. F. Sharp petitioned the Board to construct a sewer on Pine avenue from olive to Linden avenue. The City Engineer was instructed to have the work done.

**SCHOOL**—1 story and base, reinforced concrete, \$25,000. Santa Cruz, Santa Cruz Co., Cal. Architect, John J. Foley, 46 Kearny street, S. F. Owners, Santa Cruz Mission School. Will be designed along similar lines to the famous old Mission School at Santa Cruz. There will be six class rooms, special room for typewriting and an assembly hall. Interior finish pine. Central heating system, probably warm air. Exterior cement plaster, clay tile roof. Plans being prepared.

#### Contracts Awarded

**STREET PAVING**—\$4,432. San Mateo, San Mateo Co., Cal. Engineer, City Engineer, San Mateo. Owners, City of San Mateo. Contractors, Federal Construction Co., Sharon Bldg., S. F. Contract price, \$4,432.

**FURNISHING PIPE**—Cost as follows. Santa Cruz, Santa Cruz Co., Cal. Engineer, City Engineer, Santa Cruz. Owners, City of Santa Cruz. Contractors, United State Pipe Co., 681 Market street, S. F., \$36.60 per ton; specials, \$60 per ton.

#### MARIN, CONTRA COSTA AND SONOMA COUNTIES

**HIGHWAY CONSTRUCTION**—Cost not stated. Santa Rosa, Sonoma Co., Cal. Engineer, County Surveyor, associated with State Highway Commission. Owners, Sonoma-Marin Counties and the State of California. The construction of the Black Point cut-off is now assured. At a special meeting held by the Sonoma County Supervisors the matter of Sonoma County's share of payment was satisfactorily arranged. Sonoma County has agreed to pay into the State Treasury \$190,000 and Marin County \$75,000. Bids will be called for shortly.

**STREET IMPROVEMENTS AND SEWERS**—Cost as follows. Napa, Napa Co., Cal. Engineer, Town Engineer, Napa. Owners, Town of Napa. At a recent meeting of the City Council the following contracts were awarded: Geo. Brington, improvements of Ash street, \$91,137; P. A. Barge, improvement of Jackson street, \$1,263.11; P. A. Barge, sewer on Nursery street, \$35,07.

**CHURCH**—1 story and base, frame, \$7,500. Fairfield, Solano Co., Cal. Architect, W. J. Wythe, Central Bank Bldg., Oakland. Owners, Fairfield Methodist Church. Will contain main auditorium, Sunday school rooms, social parlors and pastor's study. Interior finish pine and ornamental plaster. Some art glass windows. Exte-

rior covered with cement plaster. Plans being prepared.

**SCHOOL**—1 story and base, brick. Cost as follows. Richmond, Contra Costa Co., Cal. Architect's name not given. Owners, City of Richmond. The following contractors submitted the low bids for the first unit of the new Pullman school and will probably be awarded the contracts: General construction, Robert Glaze, Humboldt Bank Bldg., S. F., \$9,282; J. E. O'Mara, S. F., heating \$655, and J. I. Collins, plumbing, \$1,011.

**WINERY**—2 story, brick and frame. Cost not stated. Martinez, Contra Costa Co., Cal. Architect, none. Owner, J. E. Colton, Martinez. J. E. Colton has purchased a site 50 by 100 feet on Howard street and will erect an addition to his present winery building. A two-story frame and part brick addition will be erected on the additional ground. Work will be started shortly.

**STORE**—1 story and base, reinforced concrete. Cost not stated. Napa, Napa Co., Cal. Architect, L. M. Turton, Napa. Owner, J. G. Platt, Napa. Location, Combs street between 4th and 5th streets. Arranged for a number of modern stores. Patent store fronts and marble bases. Interior finish pine. Exterior faced with cement plaster. Plans complete.

#### Contracts Awarded.

**SEWERS AND PUMP**—\$5,844.58. Richmond, Contra Costa Co., Cal. Engineer, City Engineer, Richmond. Owners, City of Richmond. Contractors Richmond Dredging Co., Monadnock Bldg., S. F., sublet to Chambers & Heafey, Bacon Bldg., Oakland.

**RESIDENCE**—2 story and base, frame, \$1,000. Cotati, Sonoma Co., Cal. Architect, John J. Foley, 46 Kearny street, S. F. Owner, Roman Catholic Church. Contractor, A. Herrmann, Pengrove. Contract price, \$4,000.

#### FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA

**STREET PAVEMENT**—Cost not stated. Modesto, Stanislaus Co., Cal. Engineer, City Engineer, Modesto. Owners, City of Modesto. At a special meeting of the City Council the matter of paving McHenry avenue was taken up and a survey ordered. This will cover the portion of the street from the corner of Needham avenue and Annie street north to Stoddard avenue. The portion of the street from Stoddard avenue to the bridge over the canal will not be paved until some agreement with the county can be made. The east side of this portion of McHenry avenue is in the city and the west side in the county. It is probable that the same kind of construction as on the state highway, concrete base with oil surface will be tried out on this street. Further mention will be made of this work.

**RESIDENCE**—1 story and base, frame, \$2,000. Fresno, Fresno Co., Cal. Architect, none. Owners, Reese & Atkins, 742 Weldon street, Fresno. Location, Alta Vista Tract. Will contain six rooms and bath. Interior finish pine throughout. Some hardwood floors. Open fire place and tile or brick mantel. Automatic water heater. Exterior cement plaster. Plans complete and work to be done by Day Labor,

**LIBRARY**—1 story and base, brick and concrete, \$10,000. Turlock, Stanislaus Co., Cal. Architects, Bowen & Davis, McKenzie Bldg., Fresno. Owners, Town of Turlock. Will be designed in the classic style and will contain two main reading rooms, children's room and offices of the librarian. Interior finish pine with hardwood floors. Metal book stacks. Central heating system. Exterior faced with cement plaster. Plans being prepared.

**POST OFFICE**—2 story and base. Class A construction. Cost not stated. Bakersfield, Kern Co., Cal. Architect, Supervising Architect, Washington, D. C. Owners, United States Government. Location, 18th and G streets, covering an area of 100 by 132 feet. Steel frame. Interior finish pine and hardwood with tile, hardwood and cement floors. Steam heat, oil burning equipment and vacuum cleaning. Exterior faced with stone and pressed brick. Plans complete and figures to be called for shortly.

#### Contracts Awarded.

**BRIDGES AND CULVERTS**—Cost as follows. Hanford, Kings Co., Cal. Engineer, County Surveyor, Hanford. Owners, Kings County. Contractor, S. G. Smart, Bakersfield. Contract price, No. 1A, laying concrete, \$7.19 per cubic yard; No. 1B, laying concrete, \$7.19 per cubic yard; No. 2, laying steel, half cent per pound.

**ROAD IMPROVEMENT**—Cost not stated. Oroville, Butte Co., Cal. Engineer, County Surveyor, Oroville. Owners, Butte County. All bids received by the Butte County Supervisors for the repair of the River road were rejected at the last meeting of the Board, as all were above the estimate. The work will now be done by the county. The following bids were received: J. L. Mery Co., \$5,825; Chico Construction Co., \$5,114; George Taber, \$5,537.

**CHURCH COMPLETION**—Frame, \$5,000. Brijach, Merced Co., Cal. Architect, John J. Foley, 46 Kearny street, S. F. Owners, Roman Catholic Church. Contractor, A. Wayne, Atwater. Contract price, \$5,000.

#### SACRAMENTO, STOCKTON AND NORTHERN CALIFORNIA

**HIGHWAY CONSTRUCTION**—Cost not stated. San Andreas, Calaveras Co., Cal. Engineer, County Surveyor, San Andreas. Owners, Calaveras County. The survey of the state highway lateral from San Andreas to the San Joaquin County line, has been started. Included in the highway work in the construction of a bridge across the Calaveras River between San Andreas and North Branch, which has been declared unsafe, and for which plans have already been prepared. Further mention will be made of this work.

**BRIDGE**—Steel and reinforced concrete. Cost not stated. Red Bluff, Tehama Co., Cal. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. The County Surveyor was instructed at the last meeting of the County Supervisors to prepare plans and specifications for a steel and concrete bridge across Brickyard Creek on the Red Bluff and Corning road, in Road District No. 2. Bids will be called

for on the completion and acceptance of the plans by the County Board.

**BRIDGES, ETC.**—Cost not stated. Red Bluff, Tehama Co., Cal. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. At the last meeting of the County Supervisors the County Surveyor was instructed to prepare plans for the following work: That the County Surveyor be ordered to prepare specifications for trenching a portion of the Paynes Creek road, beginning at Seven Mile Creek and continuing on to Hog Lake. The county to furnish the rock crusher and the bidders to state the amount charged per cubic yard for crushed rock and placing same on the road. The County Surveyor was also ordered to prepare plans and specifications for repairing the Minger Creek bridge and for the construction of jetties near the lower Deer Creek bridge in Road District No. 5. It was moved by Supervisor Samson that Supervisor Kauffman be authorized to have the east approach to the bridge across the Sacramento River at Tehama repaired.

**BRIDGE REMOVAL**—Cost not stated. Marysville, Yuba Co., Cal. Engineer, County Surveyor, Marysville. Owners, Yuba County. The bid of A. C. Knox and K. W. Gordon for the removal of the old Yuba River bridge was rejected by the Supervisors at their last meeting. It is the intention of the Board to have the bridge removed to make way for a new structure to be erected there. The work of removing will now be done under the direction of the County Surveyor.

**BRIDGE**—Reinforced concrete. Cost not stated. Grass Valley, Nevada Co., Cal. Engineer, County Surveyor, Grass Valley. Owners, Nevada County. The old bridge over Little Wolf Creek on the Colfax road is being razed to make way for the new concrete bridge to be constructed. The work is under the supervision of C. J. Miller, chairman of the Board of Supervisors. Bids for the new structure will be called for shortly.

**STREET LIGHTING SYSTEM**—\$3,500. Eureka, Humboldt Co., Cal. Engineer, City Engineer, Eureka. Owners, City of Eureka. The proposition of maintaining and installing an ornamental lighting system on Second street is being considered by the business men and property owners on that thoroughfare. It is thought that the system could be placed at an estimate of \$3,500, this being for six blocks from the corner of G street to the Occidental Pavilion. Action will be taken shortly.

**LEVEE REPAIR**—Cost not stated. Freepoint, Sacramento Co., Cal. Engineer, E. A. Bailey, Sacramento. Owners, State of California. Owing to the dangerous condition of the east side of the Sacramento River at Portuguese Bend at Freepoint, the Reclamation Board has instructed Flood Control Engineer E. A. Bailey to submit at the next meeting detailed estimates of the cost of permanent repair.

**RESIDENCE**—1 story and base, frame, \$2,500. Sacramento, Cal. Architect, none. Owner, W. D. McKoy, 2629 E street, Sacramento. Location, 2317 27th street. Will contain six rooms, bath and sleeping porch. Interior finish pine, hardwood and white

enamel. Hardwood floors. Open fire places and tile or brick mantels. Automatic water heater. Exterior covered with rustle and cement plaster. Plans complete and work to be done by Day Labor.

**RESIDENCE**—1 story and base, frame, \$2,000. Sacramento, Cal. Architect, none. Owner, Joseph Edenhofner, 3011 Cypress avenue, Sacramento. Location, 2208 18th street. Will contain six rooms, bath and sleeping porch. Interior finish pine and white enamel. Hardwood floors. Open fire place and tile or brick mantel. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**APARTMENT HOUSE**—2 story and base, frame, \$8,000. Sacramento, Cal. Architect, P. J. Herold, Forum Bldg., Sacramento. Owner, George B. Stack. Location, corner of 15th and M streets. Will contain 20 rooms arranged en suite besides private baths. Interior finish pine with some hardwood floors. Hot water supply. Wall beds. Exterior covered with cement plaster. Plans complete and a contract for the carpentry and mill work awarded to Chatterton Bros. Bids being taken for the balance of the work.

**WATER SYSTEM**—Cost not stated. Stirling City, Butte Co., Cal. Engineer, none. Owners, Diamond Match Co. The Diamond Match Company is putting in a complete system in its new lumber yard. A total of 2,500 feet of 8-inch and 1,500 feet of 4-inch water main will be used.

**FURNISHING WATER PIPE**—Cost not stated. Eureka, Humboldt Co., Cal. Engineer, City Engineer, Eureka. Owners, City of Eureka. Bids will be opened on December 7th for furnishing f. o. b. steamer at San Francisco on or before February 1st, 1916, 8,000 feet 2-inch back pipe and 1,500 feet of 1-inch galvanized pipe, standard weight, random lengths, for the Eureka Water Department.

**CITY HALL AND JAIL**—1 story and base, reinforced concrete, \$175,000. Sacramento, Cal. Architects, Shea & Loftquist, Bankers' Investment Bldg., S. F. Owners, City of Sacramento. The closing date for figures on this work has been officially announced as December 9th between 10 and 11 a. m. Plans can only be secured from the City Clerk at Sacramento. An official proposal appears in another column of this issue.

**HOSPITAL ADDITION**—1 story, frame. Cost not stated. Eureka, Humboldt Co., Cal. Architect, E. J. Burke, Eureka. Owners, Humboldt County. Bids will be received until December 14th for the construction of an addition to the present county hospital. Plans can be secured from the architect.

**SCHOOL**—2 story and base, reinforced concrete or brick, \$10,000. Lodi, San Joaquin Co., Cal. Architects, Stone & Wright, 21 South California street, Stockton. Owners, City of Lodi. Location, East Pine street. Will contain six class rooms and an assembly hall. Interior finished in pine with maple floors. Steam heat, oil burning plant. Exterior faced with cement plaster or pressed brick. Plans approved and bids to be called for shortly.

### Contracts Awarded.

**LEVEE REPAIRS**—\$11,250. Sacramento, Cal. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Contractors, A. Teichert & Son, Ochsner Bldg., Sacramento. Contract price, \$11,250.

**RESIDENCE**—2 story and base, brick and frame, \$15,000. Los Angeles, Cal. Architects, Milwaukee Building Co., Wright and Callender Bldg., L. A. Owner, Harry Chandler, Contractors, Milwaukee Building Co., Wright and Callender Bldg., L. A. Contract price, \$15,000.

**BANK**—2 story and base, brick and concrete, \$13,228. Walnut Grove, Sacramento, California. Architect, W. H. Weeks, 75 Post street, S. F. Owner, Bank of Alex Brown. Contractor, H. P. Smith, Walnut Grove. Contract price, \$13,228.

### LOS ANGELES AND SOUTHERN CALIFORNIA

**PAVED WALKS AND ROAD**—Cost not stated. Los Angeles, Cal. Engineer, State Engineer McClure, Sacramento. Owners, State of California. Bids will be received until December 21st at 12 noon for paved walks, road and gutters on the ground of the State Normal School at Los Angeles. Plans can be secured from the State Department of Engineering. An official proposal appears in another column of this issue.

**FACTORY GROUP**—1 and 2 story and base, steel and reinforced concrete, \$500,000. Los Angeles, Cal. Engineer, Engineering Dept. American Can Co., New York City. Owners, American Can Co. The American Can Co., C. J. Gordon representative, Los Angeles Investment Bldg., has purchased a five-acre site on the west side of Santa Fe avenue between 48th and 49th streets and will establish a branch factory. Several large factory buildings and machine shops will be erected.

**STORAGE BUILDING**—1 story and base, reinforced concrete. Cost not stated. Camarillo, Ventura Co., Cal. Architect, Alfred F. Priest, Fay Bldg., L. A. Owners, J. F. Lewis & Son. Will cover and area of 100 by 125 feet. Designed for cold storage and refrigerating plant. Interior finish pine. Carrier system, metal window sash and frames and metal covered doors. Exterior faced with cement plaster. Plans complete and work to be done by Day Labor under direction of the architect.

**FLATS**—2 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Eisen & Sons, Wilcox Bldg., L. A. Owner, Milton Metzler. Location, corner of 8th and New Hampshire streets. Will contain six five-room flats in each building. Interiors finished in pine, hardwood and white enamel. Hardwood floors. Open fire places and tile mantels. Wall beds. Bath rooms tile. Exteriors faced with pressed brick. Plans complete and work to be done by Day Labor.

**LOBBY HALL**—3 story and base, brick, \$20,000. San Diego, Architects, W. S. Hubbard and C. M. Winslow, Grant Bldg., San Diego. Owners, University Club. Location, east 7th between A and Ash streets. Will contain offices, dormitories, club rooms, banquet hall and kitchen. Interior finish

pine and hardwood with hardwood floors. Central heating system and hot water supply. Exterior faced with cement plaster. Plans complete and figures being taken.

**LIBRARY**—1 story and base, brick on hollow tile, \$20,000. East Hollywood, Los Angeles Co., Cal. Architect, C. H. Russell, Story Bldg., L. A. Owners, City of East Hollywood. Will contain main reading room, children's room, offices and stack room on the main floor. Auditorium seating 300 people and work room will occupy the basement. Interior finish pine and hardwood. Hardwood floor. Steam heat, metal hook stacks. Exterior Exterior faced with pressed brick. Plans being prepared.

**SCHOOL**—1 story and base, hollow tile or concrete. Cost not stated. Coachella, Riverside Co., Cal. Architect, G. Stanley Wilson, Virginia Block, Riverside. Owners, Coachella School District. Will contain nine class rooms, assembly hall and office. Interior finish pine with maple floors. Central heating system, oil burning furnace. Exterior faced with cement plaster. Plans complete and ready for figures.

**SCHOOL**, One story and base, brick. Cost not stated. Oxnard, Ventura Co., Cal. Architects, Allison & Allison, Hibernian Bldg., L. A. Owners, Town of Oxnard. Will contain six class rooms and an auditorium. Interior finish pine with maple floors in the class rooms. Central heating system. Ex. Plans being prepared.

**SCHOOL**—1 story, frame, \$1,500. Santa Margarita, San Luis Obispo Co., Cal. Architect, J. J. Roth, Atascadero. Owners, Santa Margarita School District. The lowest bid received for this work was \$1,875 and all figures were rejected. New bids are being called for and will be opened on December 11th. Plans can be secured from the architect.

**IRRIGATION WORK**—Cost not stated. Los Angeles, Cal. Engineer, County Surveyor, L. A. Owners, Los Angeles County. Owing to alleged irregularities, the bids for the construction of an irrigation system in water works district No. 1 were rejected by the Supervisors, and the mechanical department of the county was instructed to prepare new plans and specifications. It was said the specifications were vague in a number of respects and the bidders felt compelled to go outside of them in figuring on the work to be done.

**STREET PAVING**—\$17,635. San Gabriel, Los Angeles Co., Cal. Engineer, City Engineer, San Gabriel. Owners, City of San Gabriel. The M. R. Company, 826 San Fernando Bldg., L. A., was the lowest bidder at approximately \$17,635 for improving a portion of Las Tunas Drive. The work will include 210,000 square feet of macadam paving, and 11,000 lineal feet of curb. No action was taken on awarding the contract.

**STREET PAVING AND CURBS**—Cost not stated. Sawtelle, Los Angeles Co., Cal. Engineer, City Engineer, Sawtelle. Owners, City of Sawtelle. Bids will be received by the City Clerk up to 5 p. m. of December 20th, for grading, macadamizing and constructing concrete curbs in Wabash street

between Iowa avenue and Santa Monica Boulevard, in accordance with plans and specifications on file in the office of the City Engineer.

**HIGHWAY CONSTRUCTION** — \$68,962. Los Angeles, Cal. Engineer, County Surveyor Los Angeles. Owners, Los Angeles County. The Supervisors will soon issue a call for the construction of the first five miles of the Mint Canyon road. Plans for the work have been completed by Road Commissioner Joyner and will be adopted at the next meeting of the Board. Commissioner Joyner estimates the building of the first five miles of this road will cost \$68,962, or \$13,792 a mile. The road will be of concrete construction, 20 feet wide and 5 inches thick. Further mention will be made of this work when bids have been called.

**FLOOD PROTECTION** — Cost not stated. Los Angeles, Cal. Engineer, County Surveyor, Los Angeles. Owners, Los Angeles County. The Road Commissioner has been authorized by the Board of Supervisors to do the necessary flood protection work connected with the construction of the Saugus-Palmdale road by force account. The work consists of the building of a number of short dykes along the banks of Santa Clara River.

#### Contracts Awarded

#### ORGANIZING BUSINESS NATIONALITY

By John H. Fahey

President of the Chamber of Commerce of the United States.

Three years ago the Chamber of Commerce of the United States was organized. It had no membership and it hadn't a dollar.

Today it stands as the spokesman of 680 commercial organizations representing nearly 300,000 business men, firms and corporations throughout the United States.

In three years it has become a great constructive force in the business life of this Nation. It has helped vital commercial legislation at Washington. It suggested important amendments to the Federal Reserve Act, assisted in the readjustment of the Department of Commerce and influenced important modifications that appear in the final form of the Trust Bills.

As the time of the Fourth Annual Meeting approaches, the great business convention to be held in Washington, February 8, 9, and 10, the National Chamber stands committed, through referendum, to the proposition to the upbuilding of a Merchant Marine, a National Budget, and a permanent non-partisan Tariff Commission.

Agriculture and Labor have long been organized. Now the Chamber of Commerce of the United States is organizing business nationally. It has nothing to conceal. It is the mouthpiece of no clique or group. The New York banker and the San Francisco merchant may be found in its membership. Its voice is the voice of American Business. It speaks for all.

Let me say to business men everywhere the National Chamber is your organization. It is fighting your battle. It is doing what you could never hope to do single-handed or through local organization. It is contending for just what you want to see in this whole country—business stability, integrity, sanity, understanding. And it wants, and needs, and indeed must have the encouragement and support of every live, patriotic business man in the United States.

#### A BLIND MAN'S WORK.

A blind man at Westbrook, Me., has built an ell to his house, laid the hardwood floors and installed a hot water system.

### TEAK IN SIAM AND INDO-CHINA.

The Bureau of Foreign and Domestic  
Commerce has just published, in  
pamphlet form, an account of the teak-  
market situation in two of the coun-  
tries of southeastern Asia. The detail-  
ed information contained in it was  
gathered by Commercial Agent Frank-  
lin H. Smith during the course of his  
investigations into the lumber markets  
of the Far East and Australasia.

Teak is one of the most valuable and  
interesting of woods. Teak logs when  
first cut will not float. It is strongly  
and characteristically scented, of oily  
texture, and the surface feels greasy  
to the touch. The oil is considered to  
resist the entrance of water into the  
wood and to prevent the wood becom-  
ing water-soaked after it has once  
been thoroughly seasoned. Teak  
darkens with age, and finally after a

number of years becomes almost black.

The principal use of teak is in ship-  
building, especially for decking and as  
backing for armor plate. Its durability  
and lack of corrosive effect on steel  
make it particularly suitable for the  
latter purpose. Teak has been used to  
some extent for gun carriages, but is  
not now considered well adapted for  
that purpose, on account of its splitting  
too readily. In India it is used for all  
purposes in house and ship building,  
for bridges, railway sleepers, furniture,  
shingles, etc. It is also used for carv-  
ing, the Burmese carved teak wood  
being especially noted.

Mr. Smith's booklet, entitled "Teak  
in Siam and Indo-China," is No. 108 in  
the Special Agents Series. It discusses  
the various grades and prices of the  
wood and the methods obtaining in the  
industry, and presents statistics of ex-  
ports from both the countries visited.  
Five cents is the price of this publica-  
tion, obtainable from the Superintend-  
ent of Documents, Washington, D. C.—  
Commerce Reports.

### AUSTRALIAN TENDENCY TO DOLLAR EXCHANGE.

[Report of Canadian Government Trade  
Commissioner, Melbourne, Sept. 29.]

The most disturbing factor in Aus-  
tralia trade with Canada and the United  
States in recent months has been the  
marked variation in the rate of con-  
version from dollars into sterling. The  
lowest rate advised was \$4.48 to the  
pound, which represented a loss of  
about 10 per cent to the purchasers of  
goods invoiced in dollar currency. This  
variation has completely upset the even  
tenor of trade between the North  
American Continent and Australia.  
Sellers of staple lines of Canadian and  
American goods have been obliged to  
quote dollar prices, thus throwing the  
loss, by conversion into sterling, on to  
the purchaser, or, if quoting sterling  
prices based on a named fixed rate of  
exchange, having the fluctuations ad-  
justed by the Australian buyers of the  
goods. This naturally has made busi-  
ness difficult and buyers have been op-  
erating on a "hand-to-mouth" policy.  
The visit of the British Finance Com-  
mission to the United States has al-  
ready had a steadying effect upon ex-  
change, which today is reported at,  
nominally, \$4.75, and consequently  
there is a tendency for Australian buy-  
ers to operate on quotations submitted  
in dollars.—Commerce Reports.

### MEXICAN BORDER CONDITIONS IM- PROVED.

[Vice Consul William P. Blocker,  
Piedras Negras, State of Coahuila,  
November 6.]

The situation in the Piedras Negras  
consular district is much improved; in  
fact, fighting has become a thing of  
the past. The passenger, freight, and  
other trains of the Mexican National  
Railroad are operating daily to and  
from southern points without molesta-  
tion.

Many Americans and other foreigners  
are crossing the International Bridge  
daily en route to their homes in the  
interior, with a view to again settling  
down to work and rebuilding their  
business. Those coming out say condi-  
tions are becoming better each day.—  
Commerce Reports.

## Catarrh Can Be Relieved

**T**HERE IS NO NEED for you to continually suffer from Catarrh and Cold in the Head. It makes you miserable, doesn't it? You really don't care whether things go right or not and you wonder when you'll ever get over it. And you will not get over it until you get the Clover Leaf Catarrh Remedy, and use it. It will relieve you, and you'll wonder why you had not used it sooner. We are so positive that this will relieve you of your Catarrh or Cold in the Head, that we guarantee you satisfaction or we will refund your money.

## Electric Motive Power in the Operation of Railroads.

By William Hood, Mem. Am. Soc. C. E.,  
Chief Engineer, Southern Pacific  
Co., San Francisco, Cal.

In considering the question of electric motive power versus the use of steam locomotives, the probability of the electric motive power being proper for adoption is evidently greater when a new railroad is to be equipped than if the question pertains to an existing railroad, and lies between retaining the steam locomotives or purchasing new electric locomotives in addition to the other expenses of equipping the road for electrical operation.

This question is especially important when the existing railroad is an extensive suburban system, with steam locomotives and cars of special adaptation to the service and not suitable for general use on a steam-operated main line, and which suburban system is giving satisfactory returns on the investment.

In such a case the change to electrical operation, with the probability of cost being much in excess of the estimates and the possibility of increase of traffic being much less than predicted, together with the practical loss of the original rolling stock may transform a satisfactory remunerative property into a heavily losing investment for a disastrously long period.

That is, the probabilities of the propriety of electrical operation are:

(1) Greatest on a new main line railroad;

(2) Next greatest on an existing main line railroad when the equipment, other than motive power equipment, will not be changed.

(3) And next greatest on a portion, that is on one or more operating divisions of an existing main line railroad, when the equipment, other than motive power equipment, will not be changed;

(4) And least on a railroad when electrification involves scrapping or nearly corresponding salvage value of existing equipment.

When these matters are under consideration, the amount of risk to investors depends on whether the one making the decision is in charge of matters that he does understand and also of matters that he does not understand, the decision being either a matter of fiat or otherwise, as the case may be.

The inconveniences of electrical operation of part of a main line, a di-

vision or more, have been so fully discussed as to require no more than mention, as for instance, the certainty of increased investment for motive power of both classes over that required for operation of the entire road either by steam or by electric locomotives.

When this partial method is correctly adopted, the evident disadvantages of the two kinds of motive power must have been more than balanced by the saving due to the electrical operation of the parts of the road so operated.

The question of whether or not to adopt electric motive power on a portion, for instance on an operating division, of a main line elsewhere operated by steam locomotives is especially likely to be taken under advisement in reference to a mountain operating division having a steep grade system of considerable length, the electric operation at first glance appearing particularly attractive on such a piece of railroad.

Evidently such a railroad if already built with a double track is more conveniently operated either with electric locomotives or with steam locomotives, than if built with only a single main line track.

The opinion that is sometimes entertained, however, that in cases where a single-track road overburdened with traffic is handled by steam locomotives, the substitution of electric locomotives will materially postpone the expenditure necessary for double tracking the road is not always correct, excepting with the condition that an unusual and, perhaps properly termed, unreasonable and impracticable amount of electric power is available at a cost that can be properly contemplated.

The reason for this condition is that on a single-track mountain railroad operating division with a steep grade system and having a considerable number of daily passenger trains throughout the year, the time of passage of these trains over the mountain division cannot be materially modified, owing to necessary business adjustment of times of departure from and arrival at important terminals. And with a considerable freight traffic at all times, and perhaps several times the average freight traffic at certain seasons of the year, it is necessary to have a number of freight trains of maximum practicable size one after the other, and as

near as practicable to each other, up the steep grade, at such periods of the twenty-four-hour day as will least interfere with the passenger train movements.

This is accomplished without difficulty with the use of steam locomotives, which, per varying necessities of traffic volume, can be used on any operating division.

When such mountain operating division is operated electrically, however, not only must the adequate number of electric locomotives be on hand for meeting these traffic conditions, but the amount of electric power available must correspond to the special traffic requirements.

If the necessary method of operation of a single-track road heretofore outlined, the maximum power-house output for freight trains only, at certain seasons of the year, might reach about 40,000 kilowatts, with perhaps 8,000 kilowatts for passenger trains, being about 48,000 kilowatts in all, and possibly more; while for much of the year the requirements would be very considerably less, making an undesirable method of power production as to cost of operation and of installation.

In general, a transportation company will find it impolitic to attempt to equalize power production and fluctuating consumption on so large a scale by entering the market and selling power to suitable consumers in competition with power producing companies regularly in the business of supplying the market.

This results in the cost of power to a railroad company for operating a mountain division being, in general, equal to the entire cost of operating the power house or houses and their related plants plus the entire fixed charges, without very material variation in this cost on account of variation in amount of traffic as between seasons of the year or as between the several years.

That is, the cost of power under to the actual power expenditure for these conditions has no direct relation conducting transportation, and in a way is analogous to the fixed charges pertaining to power plant installation, as well as to the fixed charges pertaining to the cost of the railroad itself, which fixed charges are constant, regardless of traffic fluctuations.

On a similar mountain division having a 2% grade and with a double track, the conditions would evidently be much

\*A paper presented at the International Engineering Congress, San Francisco, September, 1915.

## The Electrification of the Puget Sound Lines of the Chicago, Milwaukee & St. Paul Railway.

By A. H. Armstrong, Assistant Engineer, Railway and Traction Department General Electric Co.

more favorable, and the maximum power-house output for freight trains only at the heaviest traffic period might be no more than 10,000 kilowatts, with perhaps 8,000 kilowatts for passenger trains, being 18,000 kilowatts in all; while for much of the year the requirements would be considerably less.

In general, the cost of double tracking a mountain division will be so great that it should not be done until absolutely necessary, especially in view of possible failure of traffic to increase or even remain constant, on account. For instance, of the construction of competitive lines, entered into judiciously or otherwise.

Evidently on light grade railroads the question of amount of installation of power plant versus fluctuations of traffic is less serious.

The reduction in the necessary production of electric energy by the returning to the line of energy produced by the control of descending trains on a mountain division, electrically operated, might be worth the expense of installation of the necessary appliances as effecting some fuel saving in a steam-power electric-generating station; but when the electric energy is developed in a water-power station, the power saving would be of doubtful value, and in particular because, as heretofore outlined, the cost of power so produced is not per kilowatt hour or any usual function, but is essentially so much per year, regardless of any ordinary fluctuations of power requirements.

The increasing cost of fuel for steam locomotives or for steam electric-generating plants tends to hasten the time when railroads will be operated by electric power generated by hydraulic plans, particularly on mountain grades.

Presumably much more would have been accomplished in this direction if the National laws and regulations had been so modified as to give to railroad companies the necessary confidence to enable them to make the very large investment required.

Some large water-power locations made by railroad corporations with a view to their development and utilization for mountain railroad operation have, after considerable preliminary expenditure, been abandoned when it was found that after the installation expenditure, the right to continue the operation would depend entirely on the several successive Secretaries of the Interior.

This condition is well understood and preliminary steps have been taken at times to correct it, but without satisfactory results in the way of legislation.

The author gives a brief account of the scope of the work undertaken on this most important of steam road electrifications. He gives a description of the power supply available, the cost of power to the railway company, the type of substation and rolling stock equipment, and the overhead construction adopted. It is of special interest to note that the trolley potential is to be 3,000 volts, which is the highest direct-current potential yet adopted in this country for railway work. Editor.

Plans for the electrification of the first engine division of the Chicago, Milwaukee & St. Paul Railway have been completed and contracts let with the General Electric Company for electric locomotives, substation apparatus and line material, and with the Montana Power Company for the construction of transmission and trolley lines. The initial electrification of 11 $\frac{1}{2}$  miles of main line between Three Forks and Deer Lodge is the first step toward the electrification of four engine divisions extending from Harlowton, Montana, to Avery, Idaho, a total distance of approximately 140 miles with approximately 650 miles of track, including yards and sidings. The construction of this section is now well under way. While this comprises the extent of track to be equipped in the near future, it is understood that plans are being made to extend the electrification from Harlowton to the Coast, a distance of 550 miles. Should the operating results of the initial installation prove as satisfactory as anticipated.

The plans of the Chicago, Milwaukee & St. Paul Railway are of especial interest, as this is the first attempt to install and operate electric locomotives on tracks extending over several engine divisions, under which conditions it is claimed the full advantage of electrification can be secured. The various terminal and tunnel installations made in the past have been more or less necessary by reason of local conditions, but the electrification of the Chicago, Milwaukee & St. Paul is undertaken purely on economic grounds with the expectation that superior operating results with electric locomotives will effect a sufficient reduction in the present cost of steam operation to return an attractive percentage on the large investment required. If the savings anticipated are realized in the electric operation of the Chicago, Milwaukee & St. Paul, this initial installation will constitute one of the most important milestones in electric railway progress, and it should forebode large future developments in heavy steam road electrification. The success of electric operation on such a large scale will at least settle the engineering and economic questions involved in making such installation, and will limit the future problems of electrification to the ways and means of raising the required capital to effect the change in motive power.

The first step taken towards electrification by the Chicago, Milwaukee & St. Paul Railway was to enter into a contract with the Montana Power Company for an adequate supply of power over the 410 miles of main line considered for immediate electrification. The precautions taken both by the Railway Company and Power Company to safeguard the continuity of power supply should guarantee a reliable source of power, subject to few interruptions of a momentary nature only.

The Montana Power Company covers a great part of Montana and part of Idaho with its network of transmission lines which are fed from a number of sources of which the principal are tabulated below:

	k.w.
Madison River .....	11,000
Canyon Ferry .....	7,500
Hanser Lake .....	14,000
Big Hole .....	3,000
Butte, steam turbine .....	5,000
Rainbow Falls .....	21,000
Small powers aggregating.....	7,330

Total power developed ..... 68,890

Further developments part of which are under construction are as follows:

	k.w.
Great Falls .....	85,000
Holter .....	20,000
Thompson Falls .....	30,000
Snake River .....	20,000
Missoula River .....	10,000

Total power developed ..... 175,000

Total power capacity developed and undeveloped, 244,000 kw.

The several power sites are interconnected by transmission lines; the earlier ones are supported on wooden poles and operate at 50,000 volts and the later installations are supported on steel towers and operate at 100,000 volts. Ample water storage capacity (100,000 acre-feet), is provided in the Hebgen Reservoir and this is supplemented by auxiliary reservoir capacity at the several power sites which brings the total up to 418,000 acre-feet. The Hebgen Reservoir is so located at the head waters of the Madison River that water drawn from it can supply in turn the several installations on the Madison and Missouri Rivers, so that the same storage water is used a number of times, giving an available storage capacity considerably greater than is indicated by the figures given. It would seem, therefore, in changing from coal to electricity as a source of motive power, that the railroad is amply protected as regards reliability and continuity of power supply.

Due to the great facilities available and the low cost of construction under the favorable conditions existing, the Railway Company will purchase power at a contract rate of 0.536 cents per kilowatt-hour, based upon 60 per cent load factor. It is expected under these conditions that the cost of power for locomotives will be considerably less than is now expended for coal. The contract between the Railway and Power companies provides that the

Freight train on the two per cent grade between Piedmont and Donald on the Chicago, Milwaukee & St. Paul Railway

Eagle's Nest on the Chicago, Milwaukee & St. Paul Railway

Map showing Section of the Chicago, Milwaukee & St. Paul to be Electrified

Profile of Section of the Chicago, Milwaukee & St. Paul Undergoing Electrifications

total electrification between Harlowton and Avery, comprising four engine divisions will be in operation by January 1, 1918.

In order to connect the substations with the several feeding-in points of the Montana Power transmission lines, a tie-in transmission line is being built by the Railway Company which will permit feeding each substation from two directions and from two or more sources of power. This transmission line will be constructed with wooden poles and suspension type insulators, and will operate at 100,000 volts. It will follow in general the right of way of the Railway Company, except where advantage can be taken of a shorter route over public domain to avoid the necessarily circuitous line of the railway in the mountain districts.

The immediate electrification of 113 miles will include four substations

others after a careful investigation extending over two years. The 2,400-volt direct-current installation of the Butte, Anaconda & Pacific Railway in the immediate territory of the proposed Chicago, Milwaukee & St. Paul electrification has furnished an excellent demonstration of high-voltage direct-current-locomotive operation during the past year and a half, and the selection of 3,000 volts direct current for the Chicago, Milwaukee & St. Paul Railway was due in a large measure to the entirely satisfactory performance of the Butte, Anaconda & Pacific installation.

The equipment for this road was also furnished by the General Electric Company, and a comparison based on six months steam and electric operation shows a total net saving of more than 26 per cent on the investment or total cost of electrification. These figures do not take into account the increased

#### Substations.

The substation sites of the Chicago, Milwaukee & St. Paul Railway electrified zone provide for an average intervening distance of approximately 35 miles, notwithstanding that the first installation embraces 29.8 miles of two per cent grade westbound and 10.4 miles of 1.66 per cent grade eastbound over the main range of the Rocky Mountains. With this extreme distance between substations and considering the heavy traffic and small amount of feeder copper to be installed, it becomes apparent that such a high potential as 3,000 volts direct current permits a minimum investment in substation apparatus and considerable latitude as to location of sites.

The substations will be of the indoor type, the transformers being three-phase, oil-cooled, with 100,000 volts primary and 2,000 volts secondary windings. The synchronous motors will

260-ton Locomotive for the Chicago, Milwaukee & St. Paul Railway

containing step-down transformers and motor-generator sets with the necessary controlling switchboard apparatus to convert 100,000 volts, 60 cycle, three-phase power to 3,000 volts direct current. This is the first direct-current installation using such a high potential as 3,000 volts, and this system was adopted in preference to all

capacity of the lines, improvement to the service, and the more regular working hours for the crews. The comparison also shows that the tonnage per train has been increased by 75 per cent, while the number of trains has been decreased by 25 per cent, with a saving of 27 per cent in the time required per trip.

operated at the latter potential. The transformers will be rated 1,000 and 250 kva and will be provided with 100, 75 per cent taps in the primary, and 25 per cent starting taps in the secondary.

The motor-generator sets will comprise 50 cycle synchronous motor and direct-current generators will be sep-

arately excited by small generators direct-connected to each end of the motor generator shaft. The direct-current generators will be compound wound and will maintain constant potential up to 150 per cent load and will have a capacity for momentary overloads up to three times their normal rating. To insure good commutation on these overloads the generators are equipped with commutating poles and compensating pole face windings. The synchronous motors will also be utilized as synchronous condensers and it is expected that the transmission line voltage can be so regulated thereby as to eliminate any effect of the fluctuating railway load.

wire. This form of construction permits the collection of very heavy currents by reason of the twin contact of the pantograph with the two trolley wires and also insures sparkless collection under the extremes of either heavy current at low speed or more moderate current at very high speeds. It seems that the twin conductor type of construction is equally adapted to the heavy grades, calling for the collection of very heavy currents, and on the more level portions of the profile where maximum speeds of 60 m. p. h. will be reached with the passenger trains having a total weight of over 1,000 tons. The advantage of this type of construction is due partly to the

feet, the Rocky Mountains at an elevation of 6350, the Bitter Root Mountains at an elevation of 4200 feet and the Cascade Mountains at an elevation of 3010 feet. The first electrification between Three Forks and Deer Lodge calls for locomotive operation over 20.8 miles of 2 per cent grade between Piedmont and Donald at the crest of the main Rocky Mountain Divide, so that the locomotives will be fully tested out as to their capacity and general service performance in overcoming the natural obstacles of the first engine division. The initial contract calls for nine freight and three passenger locomotives having the above character-

#### Overhead Construction.

Trolley construction will be of the catenary type in which a 4-0 trolley wire is flexibly suspended from a steel catenary supported on wooden poles, the construction being "bracket" wherever track alignment will permit and "cross span" on the sharper curves and in the yards. Steel supports instead of wooden poles will be used in yards where the number of tracks to be spanned exceeds the possibilities of wooden pole construction. Poles for the first installation are already on the ground and 30 miles of poles are set.

As the result of careful investigation and experiments a novel construction of trolley will be installed composed of the so-called twin-conductor trolley. This comprises two 4-0 wires suspended side by side from the same catenary by independent hangers alternately connected to each trolley

greater surface for the collection of current, and partly to the very great flexibility of the alternately suspended trolley wires, a form of construction which eliminates any tendency to flash at the hangers either at low or high speed. Including sidings, passing and yard tracks, the 113 miles of route mileage is increased to approximately 168 miles of single track to be equipped between Deer Lodge and Three Forks in the initial installation.

The locomotives to be manufactured by the General Electric Company are of special interest for many reasons. They are the first locomotives to be constructed for railroad service with direct-current motors designed for so high a potential as 3,000 volts. They will weigh approximately 260 tons and will have a continuous capacity greater than any steam or electric locomotive yet constructed. Perhaps the most interesting part of the equipment is the control, which is arranged to effect regenerative electric braking on down grades. This feature as yet has never been accomplished with direct-current motors on so large a scale. The general characteristics are tabulated her-

The Chicago, Milwaukee & St. Paul Railway from Harlowton to the Coast crosses four mountain ranges. The Belt Mountains at an elevation of 5768

istics. The freight and passenger locomotives are similar in all respects except that the passenger locomotives will be provided with a gear ratio permitting the operation of 800 tons trailing passenger trains at approximately 60 m. p. h., and will further be equipped with an oil-fired steam-heating outfit for the trailing cars. The interchangeability of all electrical and mechanical parts of the freight and passenger electric locomotives is considered to be of very great importance from the standpoint of operation and maintenance.

Total weight .....	260 tons
Weight on drivers .....	200 tons
Weight on each guiding truck .....	30 tons
Number of driving axles .....	8
Number of motors .....	8
Number of guiding trucks .....	2
Number of axles per guiding truck .....	2
Total length of locomotive .....	112 feet
Rigid wheel base .....	10 feet
Voltage of locomotive .....	3000
Voltage per motor .....	1500
H.P. rating one hour—each motor .....	430
H.P. rating continuous—each motor .....	375
H.P. rating one hour—complete locomotive .....	3440
H.P. rating continuous—complete locomotive .....	3000
Trailing load capacity, two per cent .....	1250 tons
Trailing load capacity, one per cent .....	2500 tons
Approximate speed at these loads and grades .....	16 m.p.h.

The cab consists of two similar sections extending practically the full length of the locomotive. Each section is approximately 32 feet long and the cab roof is about 14 feet above the rail exclusive of housings for the ventilation. The trolley bases are about five feet above the roof owing to the unusual height of the trolley wire which will be located at a maximum elevation of 25 feet above the rail. The outer end of each cab will contain a compartment for the engineer while the remainder is occupied by the electric control equipment, train heater, air brake apparatus, etc.

#### Motors.

The eight motors for the complete locomotive will be Type GE-255-A. This motor has a normal one-hour rating of 430 h. p. with a continuous rating of 375 h. p. The eight motors will thus give the locomotive a one-hour rating of 3440 h. p. and a continuous rating of 3000 h. p. which makes it more powerful than any steam locomotive ever built. The tractive effort available for starting trains will approximate 120,000 pounds at 30 per cent coefficient of adhesion.

Each motor will be twin geared to its driving axle in the same manner as on the Rutte, Anaconda & Pacific, the Detroit River Tunnel and the Baltimore and Ohio locomotives, a pinion being mounted on each end of the armature shaft. The motor is of the commutating-pole type and has openings for forced ventilation from a motor-driven blower located in the cab.

The freight locomotives are designed to haul a 2500-ton trailing load on all gradients up to 1 per cent at a speed of approximately 16 m. p. h., and this same train load, unbroken, will be carried over the 1.66 and 2 per cent ruling grades on the west and east slope of the Rocky Mountain Divide with the help of a second similar freight locomotive acting as a pusher. Track provision is being made at Donald, the summit of the grade, to enable the pusher locomotive to run around the train and be coupled to the head end to permit electric braking on down grade. In this case the entire train will be under compression and held back by the two locomotives at this head end, the entire electric braking of the two locomotives being under the control of the motorman in the operating cab of the leading locomotive. It is considered that electric braking will prove very valuable in this mountain railroading, as in addition to providing the greatest safety in operation, it also returns a considerable amount of energy to the substations and transmission system which can be utilized by other trains demanding power. In this connection, the electric locomotives will have electric braking capacity to hold back the entire train on down grades, leaving the airbrake equipment with which they are also equipped, to be used only in emergency and when stopping the train. There is therefore provided a duplicate braking system on down grades which should result in safety of operation and should eliminate breakdowns, wheel and track wear and overheating, as well as leading to a reduction in maintenance and an improvement in track condition.

With the completion of the remaining engine divisions it is proposed to take advantage of the possibilities afforded by the introduction of the electric locomotive by combining the present four steam-engine divisions into two locomotive divisions of approximately 250 miles length changing crews, however, at the present division points. As the electric locomotive needs inspection only after a run of approximately 2,000 miles, requires no stops for taking on coal or water, or layover due to dumping ashes, cleaning boilers or petty roundhouse repairs, it is expected that the greater flexibility of the locomotive so provided will result in considerable change in the method of handling trains now limited by the restrictions of the steam engine.

The electrification of the Chicago, Milwaukee & St. Paul Railway is under the direction of Mr. A. C. Goodnow, Assistant to the President in charge of construction, and the field work is under the charge of Mr. R. Beunckes, Electrical Engineer of the railway.

\*From article in General Electric Review.

## Water Commission News.

### IRON PIPE LINE.

The State Water Commission has just granted to L. J. Stone of Waddington, Humboldt County, a permit to use three miners' inches, or three-fourths of a cubic foot of water, from Soldiers' Grove spring, in the Van Luzen watershed in that county, for gold mining purposes. The water is diverted at a point in the SW<sup>1</sup>/<sub>4</sub> of the NE<sup>1</sup>/<sub>4</sub> of Sec. 14, T. 2 N., R. 4 E., Humboldt meridian. A three-inch pipe line is to be run a distance of 3,500 feet to carry the water to the quartz mill and camp.

## Railroad Commission News.

An interesting report of certain features of the operations of the urban railways of San Francisco and Los Angeles has been prepared by the California Railroad Commission, affording comparisons between the street car traffic of the two cities.

The report includes the United Railroads of San Francisco, the Municipal Railway and the California Street Cable Railway, which are all the lines in San Francisco, but in Los Angeles it does not include the local traffic of the Pacific Electric Railway, which is inconsiderable, as the line is chiefly an interurban one. The statement is based on data submitted for the year ending June 30, 1915, and the figures are as follows:

	San Francisco	Los Angeles
Passenger car miles	36,587,629	29,261,200
Passenger car hours	3,591,611	3,128,042
Regular fare passengers	201,574,155	125,939,865
Revenue transfer passengers	1,517,360	
Total passenger revenue	203,091,515	125,939,865
Free Transfer Passengers	79,234,452	42,965,583
Total All Passengers	282,325,967	168,905,448
Passenger Revenue	\$10,944,930.49	\$6,202,161.35
Average Fare Revenue Passengers	.04946	.04925
Average Fare All Passengers	.02558	.02672
Revenue from Transportation per Car mile	.32849	.21199
Revenue from Transportation per Car hour	2.56677	1.98308

The Railroad Commission has issued an order authorizing the Consolidated Water Company of Pomona, Los Angeles County to issue \$225,000 face value, 6 per cent 20 year bonds at par, less 6 per cent commission also to execute a deed of trust to secure the bonds. The money obtained by the sale of the securities is to refund present indebtedness, bonds and promissory notes. The bonded indebtedness is \$175,000 and the notes \$50,000.

Imperial County has filed with the Railroad Commission and application for authority to build highways across the tracks of the Southern Pacific Company at five points.

## SANTA FE MUST BUILD TEMECULA-OCEANSIDE.

Protest of the Atchison, Topeka and Santa Fe Railway Company against the order of the State Railroad Commission that they construct a standard gauge connection between Temecula and Oceanside, has been overruled by that body, which Saturday denied the petition of the railroad company for a rehearing of the case. The construction of the line, which the company will now be compelled to build, will afford direct connection between San Bernardino, Riverside and the port of San Diego.

The original order of the Railroad Commission was issued September 20, 1915. The railroad filed a petition for a rehearing of the case. This has been met with refusal, leaving the original order in force.

## CITY CAN COMPEL RAILROAD TO ACT.

That a city or municipality can compel a street railway company to sprinkle its own right of way within the city, is the effect of a decision by the Supreme Court of California in refusing to grant the petition of the Pacific Gas and Electric Railway Company for a hearing in the Supreme Court of its action against the city of Sacramento. This means the Supreme Court fully agrees with the Appellate Court, which held the city could compel the company to sprinkle.

It is the first time the point has been ruled upon by a California Supreme Court.

## COUNTY TO SPEND \$500,000.

TACOMA, WASH.—County Engineer White reports about \$500,000 will be expended next year by Pierce County in the construction of new highways. Practically all of this will be paying work probably, \$50,000 being spent in grading.

## Technical Societies.

### SAN FRANCISCO ASSOCIATION OF MEMBERS OF THE AMERICAN SOCIETY OF CIVIL ENGINEERS.

#### Officers for 1915.

President—A. M. Hunt.  
Vice-Presidents—H. L. Hachl, M. C. Couchot.

Secretary—E. T. Thurston, Jr.  
Treasurer—P. E. Harroun.  
Board of Directors—M. C. Couchot, H. L. Hachl, A. M. Hunt, P. E. Harroun, E. T. Thurston, Jr., C. H. Snyder, C. B. Wing.

Weekly luncheons in College Room, Hoffbrau Cafe, Wednesdays at 12:30. Engineers welcome; Informal; no program.

Regular meetings are held bi-monthly at such time and place as may be appointed by the board of directors. The established custom is to meet on the third Fridays of February, April, June, August, October and December.

Address E. T. Thurston, Secretary, 513 Mechanics' Institute Bldg., Post street, San Francisco.

### SAN FRANCISCO CHAPTER AMERICAN INSTITUTE OF ARCHITECTS. 233 Post Street.

President—W. B. Faville.  
Vice-President—Edgar A. Matthews.  
Sec.-Treas.—Sylvain Schnaittacher.  
Trustees—James W. Reid and Henry Schulze.  
Monthly meeting the third Thursday.

### STATE BOARD OF ARCHITECTS.

#### Northern District.

John Bakewell, President.  
Sylvain Schnaittacher, Sec.-Treas.  
Joseph C. Newsom, Edgar Matthews,  
One vacancy.

### LOS ANGELES AND SOUTHERN CALIFORNIA.

#### AMER. SOC. OF CIVIL ENGINEERS. So. Calif. Association of Members.

President.....Chas. T. Leeds  
First Vice-President.....Geo. S. Binckley  
Second Vice-President.....H. Hawgood  
Treasurer.....Chas. H. Lee  
Meetings bi-monthly. Address all communications to W. K. Barnard, Secretary, 701 Central Bldg., Los Angeles.

#### AMERICAN INSTITUTE ELEC. ENGINEERS—Los Angeles Section.

Chairman.....E. R. Northmore  
Secretary.....C. G. Pyle  
Asst. Secretary.....Edward Woodbury  
EXECUTIVE COMMITTEE — J. A. Lighthipe, J. E. Barker, Geo. A. Damon, A. W. Nye.

Regular meetings third Tuesday in each month. Address all communications to C. G. Pyle, Secretary, Standard Underground Cable Co., 914 Hibernian Bldg., Los Angeles.

### ENGINEERS AND ARCHITECTS' ASSOCIATION OF SOUTHERN CALIFORNIA.

President.....Samuel Storrow  
Vice-President.....A. H. Koebig  
Second Vice-President.....W. A. E. Noble  
Sec.-Treas.....H. Z. Osborne, Jr.  
DIRECTORS—Arthur S. Bent, J. J. Backus, A. C. Martin, Kenneth Shibley.  
Regular monthly meetings as arranged by program committee. Address all communications to H. Z. Osborne, Jr., Secretary, care City Engineer's Office, Los Angeles.

#### AMERICAN INSTITUTE OF ARCHITECTS—SOUTHERN CALIFORNIA CHAPTER.

President.....S. Tilden Norton  
Vice-President.....J. E. Allison  
Secretary.....Fernand Parmentier  
Treasurer.....August Wackerbarth  
DIRECTORS — J. J. Blick, J. J. Backus and Robert D. Farquhar, for the 1, 2 and 3 year terms respectively.  
Regular meetings second Tuesday evening each month. Address all communications to A. R. Walker, Acting Secretary, 1403 Hibernian Building.

#### AMER. SOC. OF MECHANICAL ENGINEERS—Los Angeles Section.

Chairman.....Walter H. Adams  
Secretary.....Ford W. Harris  
EXECUTIVE COMMITTEE—W. H. Adams, Ford W. Harris, O. J. Root, W. W. Smith, Paul Weeks.  
Address all communications to Ford W. Harris, 1029 Higgins Bldg., Los Angeles.

#### STATE BOARD OF ARCHITECTURE, SOUTHERN DISTRICT.

President.....J. P. Krempel, L. A.  
Secretary.....F. L. Roehrig, L. A.  
Member.....Octavius Morgan, L. A.  
Member.....S. P. Hunt, L. A.  
Member.....W. S. Hebbard, San Diego.  
Address all communications to Fred'k L. Roehrig, Secretary, 721 American Bank Bldg., Los Angeles.

#### BUILDERS EXCHANGE OF LOS ANGELES.

President.....John H. Bean  
First Vice-President.....P. J. Bolin  
Second Vice-President.....S. L. Weaver  
Third Vice-President.....M. A. Berne  
Treasurer.....John Griffin  
Secretary.....J. T. Campbell  
DIRECTORS—A. J. Crawford, Wm. McArthur, J. J. O'Connor, W. R. Simons, C. V. Fowler, J. Burnstein, J. H. Judy, W. E. Stradley, L. B. Webster, E. Waymon.

#### PACIFIC COAST SOCIETY OF ENGINEERING CONTRACTORS.

President.....Geo. F. Pennebaker  
Vice-President.....W. A. Russell  
Secretary-Treasurer.....F. C. Ayars  
DIRECTORS—Geo. F. Pennebaker, W. A. Russell, W. W. Brier, Geo. A. Rogers, L. S. Atkinson, Wm. Ledbetter, L. G. Garnsey, F. A. Hudson, F. H. Stout, C. L. Hyde, F. C. Ayars.  
Address all communications to Frank C. Ayars, Secretary, 505-6 Douglas Bldg., Los Angeles.

## PERSONAL.

Harry A. Kelsey, superintendent of streets of Berkeley, will January 1 be succeeded by Thomas Bither, a young engineer now employed as a street inspector. This has been announced by Fred T. Robson, commissioner of public works.

Fred C. Roberts, former city engineer of Daly City and constructor of the municipal water system, has been appointed general inspector in the State architectural department. Roberts was named to succeed W. J. Young, who was dismissed on the grounds of inefficiency by State Architect McDougal.

County Engineer E. H. Annear of Stanislaus County has returned from a trip to San Mateo and Contra Costa counties for the purpose of investigating what these counties are doing in the matter of building permanent roads. San Mateo County has voted a bond issue of \$1,200,000 for permanent road building while Contra Costa County is following the plan of building 12 miles of permanent roads a year by direct taxes. Engineer Annear studied both the financial situation of the two counties and the type of road building now in progress, for the purpose of securing information that may be of use in case Stanislaus should proceed with permanent road building in the near future.

#### HIGHWAY SURVEY CAMP TRANSFERRED.

C. A. Utley, who is in charge of the survey of the lateral from Auburn to Grass Valley for the State Highway Commission, has transferred his headquarters from Auburn to Grass Valley.

Utley's crew of surveyors is working five miles this side of Bear River. Three months more will be required to complete the survey. Other engineers in the party are Howard Briley, Wendell Woodworth, Jr., Seth W. Sampson and H. S. Kirk.

#### CHINESE ENGINEER TO RUT MATERIAL FOR RAILROAD.

H. T. Hsia, an engineer of the Chinese ministry of communications, is in consultation with manufacturers of steel rails and other railroad supplies and equipment in Pittsburgh. He explained that the Chinese Government contemplates the construction of 4,000 miles of railroad and he has been commissioned to investigate American standards with a view to placing orders in this country.

Hitherto railroad construction in China has been under the direction of European engineers who have inaugurated European methods.

Individual  
Issued Daily  
Indispensable  
To the live  
Manufacturer.  
Yours,

Larsen Construction Reports,  
Tel Douglas 2371 560 Mission St.,  
Douglas 2372 San Francisco.

Pebble manufacture is a new industry in Nevada. Foreign pebbles for grinding cement, etc., imported into the United States in 1914 had a value of \$478,146.

## APARTMENT HOUSES

**SAN FRANCISCO**—Apartment house and stores, 4 story and base, brick and steel, \$10,000. Architect, Joseph Cahen, 45 Kearny street, S. F. Owner, E. J. Greenwood. Location, northwest Bush and Powell streets, covering an area of 57½ by 70 feet. Will contain several stores on the first floor beside the lobby and entrance. Upper floors arranged for 31 suites of two and three rooms. Wall beds and private baths. Interior finish pine and hardwood with some hardwood floors. Steam heat, automatic elevator and hot water supply. Patent store fronts. Exterior faced with pressed brick and cement plaster. Plans complete and ready for figures.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$15,000. Architect, Benj. G. McDougall, Sheldon Bldg., S. F. Owner, Arthur Arlett, Call Bldg. Location, east Powell north of Washington, covering an area of 19½ feet by 48. Will contain six apartments of three rooms each with wall beds and private baths. Interior finished in pine and elm panels with some hardwood floors. Central heating system and hot water supply. Bath rooms finished in tile. Exterior faced with cement plaster. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Apartment house, 4 story and base. Class C construction, \$21,000. Architect, J. F. Dunn, Monadnock Bldg., S. F. Owner, W. F. Humphrey Investment Co. Location, north Pine west of Leavenworth. Will contain a total of 12 suites of three and four rooms. Interior finish pine and hardwood with some hardwood floors. All apartments will have wall beds and private baths. Plans provide for steam heat, automatic elevator and hot water supply. Bath rooms tile. Exterior faced with cement plaster and pressed brick. Plans being prepared.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$17,000. Architect, Joseph M. Geary, 2581 Post street, S. F. Owner, J. H. Kruse, 23rd and Polson streets. Location, southwest corner of 23rd and Howard streets covering an area of 13 feet 10 inches by 75 feet. Will contain twelve suites of three and four rooms. Interior finish pine and elm panels. Some hardwood floors. Wall beds and private baths. Steam heat and a hot water system. Exterior covered with cement plaster on metal lath. Plans complete and work to be done by Day Labor.

**OAKLAND, CAL.**—Apartment house, 3 story and base, frame, \$20,000. Architect, none. Owner, John Conant, 542 25th street, Oakland. Location, north 25th street west of Telegraph. Will contain a number of large apartments which will be finished in pine, hardwoods and white enamel. Hardwood floors. Steam heat and a hot water supply. Open fire places and tile or brick mantels. Bath rooms tile. Wall beds. Exterior covered with cement

Bids now being taken for garden furniture, marble, interior decoration, vac-plaster on metal lath. Plans complete and owner taking subfigures.

**SEATTLE, WASH.**—Apartment house, 5 story and base, mill construction, \$75,000. Architects, Martin & Pagan, Northern Bank Bldg., Seattle. Owners, Gardner and Lessey, 2621 4th avenue. Location, 4th avenue, covering an area of 60 by 108 feet. Will contain a large number of two, three and four room apartments with wall beds and private baths. Interior finished in pine and hardwood with some hardwood floors. Steam heat, automatic elevators and a hot water supply. Bath rooms tile. Exterior faced with pressed brick trimmed with terra cotta. Plans complete and segregated figures being taken.

**SEATTLE, WASH.**—Apartment house, 3 story and base, brick, \$40,000. Architect, J. I. Ripley, 2447 4th avenue, Seattle. Owner, F. H. Webber. Location, corner of 24th avenue and Spruce streets, covering an area of 53 by 66 feet. Will contain two and three room apartments with wall beds and private baths. Interior finish pine and hardwood with some white enamel. Hardwood floors. Steam heat, oil burning plant and hot water supply. Bath rooms tile. Marble and tile wainscot. Exterior faced with pressed brick. Plans complete and segregated figures to be taken.

**SEATTLE, WASH.**—Apartment house, 3 story and base, brick, \$45,000. Architect, H. Ryan, Northern Bank Bldg., Seattle. Owner's name not given. Location, Capitol Hill, covering an area of 80 by 120 feet. Will contain 32 suites of two and three rooms with wall beds and private baths. Interior finish pine and hardwood with some hardwood floors and white enamel. Steam heat, automatic elevator and hot water supply. Bath rooms finished in tile. Marble and tile wainscot. Exterior faced with pressed brick. Plans complete and figures being taken.

**SAN FRANCISCO**—Apartment house, 7 story and base, steel and brick. Cost not stated. Architects, Housseau & Rousseau, 110 Sutter street, S. F. Owner's name not given. Location, northwest Pine and Stockton, covering an area of 50 by 67½ feet. Will contain a large number of two and three room apartments with all modern conveniences. Complete steel frame. Interior finish pine and hardwood with hardwood floors. Steam heat, oil burning furnace, automatic elevator and hot water system. Bath rooms tile. Vacuum cleaning. Wall beds. Exterior faced with pressed brick trimmed with terra cotta. Plans being prepared and contracts to be let by January 1st.

**OAKLAND, CAL.**—Apartment house completion, 1 story and base, brick. Cost not stated. Architects, Richardson & Burrell, Albany Bldg., Oakland. Owners, Hinkel and Sommerstrom Bros. Location 14th and Alice streets,

uum cleaning system and household furnishings.

**OAKLAND, CAL.**—Apartment house, 3 story and base, frame, \$90,000. Architects, Richardson & Burrell, Albany Bldg., Oakland. Owner's name withheld. Location, Lake District. Will contain a total of 110 rooms which will be arranged in suites of two, three, four and five rooms. Interior finish pine and hardwood with some white enamel. Hardwood floors. Steam heat, oil burning furnace, hot water supply and vacuum cleaning. Bath rooms tile. Wall beds. Exterior covered with pressed brick and cement plaster. Working drawings being completed.

**OAKLAND, CAL.**—Apartment house and stores, 4 story and base, brick, \$70,000. Architects, Richardson & Burrell, Albany Bldg., Oakland. Owners, Sommarstrom Bros. Location, Telegraph avenue and 24th street, covering an area of 100 by 100 feet. Ground floor arranged for stores and main office and lobby. Upper floors will contain two, three and four room suites. Interior finish pine, hardwood and white enamel. Hardwood floors. Steam heat, vacuum cleaning, hot water system and automatic elevator. Oil burning plant. Bath rooms tile. Wall beds. Patent store fronts. Exterior faced with pressed brick. Plans being prepared.

**OAKLAND, CAL.**—Apartment house completion, 4 story and base, brick. Cost not stated. Architects, Richardson & Burrell, Albany Bldg., Oakland. Owners, Sommarstrom Bros. Location, southwest 11th and Oak streets. Bids are now being taken for marble and tile work, ornamental iron and interior decorations.

#### Contracts Awarded

**SEATTLE, WASH.**—Apartment house, 3 story and base, mill construction, \$75,000. Architect, David Dow, 21st and Spruce streets, Seattle. Owner's name not given. Contractor, David Dow, 21st and Spruce. Contract price, \$75,000.

**SAN FRANCISCO.**—Apartment house, 3 story and base. Class C construction, \$30,000. Architect, W. G. Hind, 46 Kearny street, S. F. Owner, Clyde S. Payne. The following contracts in addition to those previously mentioned have been awarded: Iron work, C. J. Hillard Co., 19th and Minnesota; plumbing, Jas. H. Pinkerton, 2266 Fulton; heating, Atlas Heating and Ventilating Co., 1th and Frelon; metal work and flues, Bartholme & Hartmann; electric work, Brouillet Electric Co., 492 Castro; plastering, J. Marconi, 737 Greenwich; painting, A. Huck, 59 Capp street; hardware, Bennett Bros., 514 Market street; roofing, Thomas H. Price Co., Monadnock Bldg.; lumber, S. F. Lumber Co., foot of Mason street; millwork, Builders Supply Depot, 12 8th street. Bids are still being taken for the marble and tile work, glass, lighting fixtures and shades.

#### BANKS

##### Contracts Awarded.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Bank and offices, 4 story and base. Class A construction. Cost not stated. Architect, C. W. Dickey, Central Bank Bldg., Oakland. Owners, Stockton Savings Bank. Contractors,

P. J. Walker Co., Monadnock Bldg., S. F. Contract price not stated. Note: The contractors are now taking subfigures on the work, and have awarded the structural steel work to the Builders' Iron Works of Stockton.

#### BATH HOUSES.

**ALAMEDA, ALAMEDA CO., CAL.**—Bathing resort, frame and concrete. Cost not stated. Architect, Edwin J. Symmes, Pacific Bldg., S. F. Owners, Surf Beach Amusement Co. Architect Edward J. Symmes states that he has plans complete and will take figures within a week or ten days for the largest reinforced concrete swimming tank in the United States. The tank will be 75x300 feet and will be lined on the bottom and sides with tile. A large reinforced concrete bulkhead and a pier will also be constructed. Strehlow, Freese & Peterson already have the contract for fencing and for the construction of the passenger station. A large pavilion with maple floor will also be erected and a number of frame and plaster concession booths. H. S. Thompson will construct the largest roller coaster in the country on property at this resort.

#### BONDS.

**LODI, SAN JOAQUIN CO., CAL.**—December 17th is the date set for voting on the question on issuing bonds of \$10,000 with which to erect a new grammar school building. A new building is necessary owing to the crowded conditions of the present ones.

**WALNUT CREEK, CONTRA COSTA CO., CAL.**—Jos. L. Silveira, banker of Walnut Creek, has purchased a site in this town on which he will make improvements costing \$10,000. At present there is a factory building on the site.

**LOS ANGELES, CAL.**—Members of the Board of Library Commission have unfolded plans for a campaign for a central library building to Mayor Sebastian. Sketches of the proposed structure have been prepared by Los Angeles architects. The proposed building will cost about \$1,000,000.

**OAKDALE, STANISLAUS CO., CAL.**—E. J. Knight & Co., have purchased \$11,500 of the \$10,000 bond issue of the Oakdale Irrigation District. The proceeds of the sale of these bonds will be used in irrigation improvements.

**LOYALTON, SIERRA CO., CAL.**—The Trustees have passed an ordinance calling an election to vote bonds of \$5,000 for the construction of an electric lighting power plant.

**ASTORIA, ORE.**—The election held to vote bonds of \$100,000 carried. It is proposed to erect a building containing 30 class rooms. Plans will be ordered immediately.

**ANDERSON, SHASTA CO., CAL.**—E. Eels, San Francisco attorney, has sent word that the bonds voted by the Anderson-Cottonwood Irrigation are valid and preparations are now being made to place them on the market. The bonds voted amounted to \$400,000, which will be used in irrigation improvements.

**BLITHIE, RIVERSIDE CO., CAL.**—Authority to issue \$350,000 first mortgage bonds, \$400,000 second mortgage

and \$350,000 of capital stock has been given the California Southern Railroad Company by the State Railroad Commission. Of the entire amount \$285,000 will be used in building up of the road. Extensions and repairs to the present system will be made.

**CALIXICO, IMPERIAL CO., CAL.**—For the establishment of a public park, so called civic center, the election held here last week carried by a large vote.

**PARADISE, BUTTE CO., CAL.**—The petitions for the organization of Paradise Irrigation District are complete and will be presented to the Supervisors at their next meeting. The proposed district will take in about ten thousand acres and water will be taken from Little Butte Creek or from Little West Branch, or both.

**MARTINEZ, CONTRA COSTA CO., CAL.**—Considerable opposition has developed here against the proposed bond issue to build an oil and macadam road to Mount Diablo. The proposition has been approved by the County Supervisors, who intended to pay \$30,000 from county funds. The total cost of the road is placed at \$125,000.

**AUBURN, PLACER CO., CAL.**—An ordinance providing for the issue of \$22,000 worth of bonds for municipal improvements has been given its first reading by the Trustees. The bonds were voted last month.

**GLOBE, ARIZ.**—Bonds of \$350,000 have been voted for county highway improvements by Gila County at a recent election.

**OXNARD, LOS ANGELES CO., CAL.**—A bond election will be called shortly to provide funds for the erection of a school building. Plans for the proposed structure are now being prepared by Los Angeles architects.

**EAGLE ROCK, CAL.**—The proposition to vote bonds of \$65,000 for the erection of new schools failed to carry. It is thought another election will be called.

**WOLTERS, FRESNO CO., CAL.**—An election will be held December 17th to decide the question of issuing and selling bonds of \$12,000 for school improvements.

#### BRIDGES, DAMS AND HARBOR WORK

**SACRAMENTO, CAL.**—Bridge, steel and concrete, \$28,061.13. Engineer, State Highway Commission, Sacramento. Owners, State of California. Bids opened at the last meeting of the State Highway Commission for the construction of a bridge over the Yolo By-Pass show the Security Construction Co., Los Angeles, low at \$24,671. Bids have been taken under advertisement. The engineer's estimate was \$28,061.13. A complete list of the bids received will be found under the heading of Sacramento in this issue.

**SANTA BARBARA, SANTA BARBARA CO., CAL.**—Bridge, steel and reinforced concrete, \$100,000 to \$125,000. Engineer, A. V. Saph, Rialto Bldg., S. F. Owners, Santa Barbara County. A. V. Saph has been appointed consulting engineer for the state highway bridge across the Santa Ynez River at Cuesta and Zaca Canyons, and will start on plans for the work immediately. The Cuesta-Zaca bridge is the largest and most expensive structure to be built

on the state highway out of the county bridge fund. From this fund \$50,000 will be taken as the county's contribution toward the cost of the bridge, while the state will contribute between \$50,000 and \$75,000.

**PASCO, WASH.**—Bridge, steel and reinforced concrete. Cost not stated. Engineer, C. E. Fowler, Central Bldg., Seattle. Owners, Walla Walla and Franklin Counties. C. E. Fowler, consulting engineer, is preparing plans for the construction of a steel bridge over the Snake River between Pasco and Burbank for Franklin and Walla Walla Counties, and will have them ready for contractors the latter part of December. The bridge will rest on concrete piers, will be about 800 feet long with about 2,000 feet of approaches.

**SALZM, ORE.**—Bridge, steel or reinforced concrete, \$125,000 or more. Engineer's name not given. Owners, Marion and Polk Counties. Competitive plans will be submitted with proposals for the construction of the proposed bridge to be built jointly by Marion and Polk Counties. The selection of plans will probably be made by the State Highway Department. Plans will include a draw span, and will be either a steel or concrete structure.

### Contracts Awarded

**MEYERS CREEK, IMPERIAL CO., CAL.**—Bridge, reinforced concrete. Cost, \$15,000. Engineer, State Highway Commission, Sacramento. Owners, State of California. Contractors, Holland Construction Co., Granger Bldg., San Diego. Contract price, \$15,000. Engineer's estimate, \$25,320.53.

### CHURCHES

**YUBA CITY, YUBA CO., CAL.**—Mausoleum, 1 story and base, reinforced concrete, \$60,000. Architect, Consolidated Mausoleum Co., Flatiron Bldg., S. F. Owners, Sutter-Yuba Cemetery Association. Will contain a number of crypts, chapel and office. Interior finished in stone and marble. Exterior faced with cement plaster and granite. Plans complete and work to be done by Day Labor.

**LOS ANGELES, CAL.**—Church, 2 story and base, brick, \$50,000. Architect, Frank L. Melrose, 6772 Hollywood Boulevard, L. A. Owners, Fifth Church of Christ, Scientist. Location, Hollywood and La Brea. Will contain large main auditorium, reading rooms and Sunday school rooms. Interior finish hardwood and ornamental plaster. All glass windows. Central heating system. Exterior faced with pressed brick. Revised plans complete and figures being taken.

**SAN BERNARDINO, SAN BERNARDINO CO., CAL.**—Church, 1 story and base, reinforced concrete or hollow tile, \$35,000. Architects, Jeffery & Scherer, Wesley Roberts Bldg., L. A. Owners, First Congregational Church. Will cover an area of 95 by 150 feet. Interior arranged for main auditorium, seating 250 people, fifteen glass rooms, social parlors and pastor's study. Interior finish pine and ornamental plaster. All glass windows. Exterior faced with cement plaster. Plans complete and figures being taken.

### COURT HOUSES.

**SAN FRANCISCO**—City hall draperies. Cost not stated. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Bids will be opened on December 15th by the Board of Public Works for furnishing the draperies for the mayor's office and council chambers.

### FACTORIES AND WAREHOUSES

**SAN FRANCISCO**—Factory alterations, \$3,500. Architect, none. Owners, Rosenbergs Bros., 269 Brannan street. Work will consist of cutting a number of openings in the present brick walls and installing fire escapes. Plans are complete and work will be done by Day Labor.

**BERKELEY, ALAMEDA CO., CAL.**—Factory group, 3, 4 story and base, mill construction, \$200,000. Architect's name not given. Owners, Peet Bros. Mfg. Co. Superintendents of construction, P. J. Walker Co., Monadnock Bldg., S. F. Location, Pardee and Third streets. Main building will cover an area of 165 by 215 feet, while the other two structures will be but a little smaller. Heavy mill type of construction with brick exterior walls. Modern plumbing and electric work, elevators, steam heat and electric work. Separate power plant. Work is the first unit of a large soap factory which, when complete, will represent an expenditure in construction of over \$1,000,000.

**SEATTLE, WASH.**—Warehouse, 1 story and base, reinforced concrete, \$50,000. Architects, Engineering Dept. American Paper Co., 55 Atlantic street, Seattle. Owners, American Paper Co. Location, southwest Junction and Atlantic streets, covering an area of 120 by 150 feet. Construction fireproof with reinforced concrete floors and walls. No interior finish. Elevator service, metal window sash and frames and fireproof doors. Exterior faced with cement plaster. Plans complete and figures being taken.

**SAN FRANCISCO**—Warehouse, 2 story and base, reinforced concrete. Cost not stated. Architect, Charles Puff, Merchants Exchange Bldg., S. F. Owners, American Marine Paint Co. Location, Brannan and Ellery streets. This project, which was temporarily abandoned, has been revived and working drawings are now being prepared. Exterior will be faced with cement plaster. Construction will be fireproof.

**TORRENOCE, IMPERIAL CO., CAL.**—Glass factory, 5, 1 and 2 story frame and corrugated iron, \$40,000. Architect's name not given. Owners, The Hurricane Glass Co. Work is now under way by Day Labor on this group of buildings. Concrete floors will be used. Exteriors will be covered with corrugated iron. Adolph Sieroty, Eastern Outfitting Co., L. A., is the secretary of the company.

### Contracts Awarded.

**SAN FRANCISCO**—Factory, 1 story and base, reinforced concrete, \$175,000. Architect, Charles Peter W. K. United Bank Bldg., S. F. Owner, John Hollman Co. Contractor, Lange & Bergstrom, Sharon Bldg., S. F. Contract price, \$175,000.

**OAKLAND, CAL.**—Warehouse, 2 story. Class C construction, \$14,000. Architect, C. W. Dickey, Central Bank Bldg., Oakland. Owners, Luckenbach Steamship Co. Contractor, G. Armstrong, 1629 Alcatraz avenue, Berkeley. Contract price, \$14,000.

### FLATS

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$5,000. Architect, none. Owner, Mrs. Lillie Cook, 637 Minna street, S. F. Location, south Minna west of 9th street. Will contain three flats of four and five rooms. Interior finish pine, open fire places and tile mantels. Automatic water heaters. Exterior covered with rustic and shiplap.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$5,000. Architect, none. Owner, John V. Stiefel, 181 23rd avenue, S. F. Location, south Lake west of 19th avenue, covering an area of 25 by 65 feet. Will contain two flats of five and six rooms. Interior finish pine and elm panels. Hardwood floors. Open fire places and tile mantels. Bath rooms tiled. Automatic water heaters. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$3,000. Architect, none. Owner, A. M. Sylvia, 271 20th avenue, S. F. Location, west 19th avenue south of California, covering an area of 25 by 100 feet. Will contain two flats of five and six rooms. Interior finish pine and elm panels. Hardwood floors, open fire places and tile mantels. Bath rooms tile wainscot. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Flats, 2, 2 story and base, frame, \$5,000 each. Architect, none. Owner, L. B. Ham, 1643 Lake street, S. F. Location, east 10th avenue north of California. Each building will contain two modern flats of five and six rooms. Interior finish will be of pine, elm and white enamel. Hardwood floors will be used. Open fire places and tile or brick mantels. Bath rooms tile wainscot. Automatic water heaters. Marble and tile entrance. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

### FIRE REPORT

**LOS ANGELES, CAL.**—More than half of the town of Avalon, on Santa Catalina Island, was destroyed by fire last week. Two large hotels, bath house, club, business and a number of freight warehouse buildings were destroyed. It is estimated that the loss is \$1,000,000.

**FRESNO, FRESNO CO., CAL.**—Hickman's Canning store, Mariposa street, was destroyed by fire last week. The loss is estimated at \$15,000.

**SANTA ROSA, SONOMA CO., CAL.**—The town of Graton was partially destroyed by fire last week. Fire also destroyed the largest hotel building in Graton, another small town near Graton.

**ELFAKA, HUMBOLDT CO., CAL.**—A mine explosion in the Garberville Extension hotel caused a fire which did damage estimated at \$20,000.

**SAN FRANCISCO**—The fire in the Town Hall, burned last week caused little damage and will have no effect on the progress of the work according to City Engineer O'Shaughnessy.

**ISLETON, SACRAMENTO CO., CAL.**—The Oriental quarter of this city has been destroyed at a loss of \$80,000. There was but little insurance carried on any of the structures destroyed.

**SAN BERNARDINO, SAN BERNARDINO CO., CAL.**—Fire last week destroyed the store building of the Home Furniture Company in San Bernardino. It is thought the loss will reach \$60,000, partly covered by insurance.

## GARAGES

**OAKLAND, CAL.**—Garage, 1 story and base, brick, \$5,500. Architect, William Wilde, 1725 Broadway, Oakland. Owner, O. J. Mead. Location, Broadway between 29th and Orchid streets. Will be arranged for storage space only. Cement floor. Metal window sash and frames. Exterior faced with pressed brick. Plans complete and figures being taken.

## HALLS AND SOCIETY BUILDINGS

**SAN FRANCISCO**—Athletic Club, 4 story and base, brick and steel. Cost not stated. Architects, Bliss & Faville, Balboa Bldg., S. F. Owners, Women's Athletic Association. Location, north Sutter between Mason and Taylor. Revised plans are now out for figures for the structural steel work for this building. About 250 tons of steel is required.

## GOVERNMENT WORK & SUPPLIES

### San Francisco Circular No. 68.

The following awards have been made by the depot quartermaster, San Francisco, Cal., under office circular No. 68, opened November 1:

1. Bid 1. Weeks-Howe-Emerson Co., 51 Market street, San Francisco, Cal.  
2. Bowers Rubber Works, 68 Sacramento street, San Francisco, Cal.  
3. Zellerbach Paper Co., Battery and Jackson streets, San Francisco, Cal.

4. West Coast Wire & Iron Works, 745 Folsom street, San Francisco, Cal.  
5. Judson Mfg. Co., 819 Folsom street, San Francisco, Cal.

6. Whittier-Coburn Co., 301 Howard street, San Francisco, Cal.  
7. G. M. Josselyn & Co., 58 Sacramento street, San Francisco, Cal.

8. Dunham, Carrigan & Hayden Co., 140 Kansas street, San Francisco, Cal.  
9. Western Electric Co., 680 Folsom street, San Francisco, Cal.

10. Crane Co., 2nd and Brannan streets, San Francisco, Cal.  
11. National Brass & Copper Tube Co., 639 Mission street, San Francisco, Cal.

12. California Steam & Plumbing Supply Co., 671 5th street, New York City.

13. International Haystack Co., Menadnock Building, San Francisco, Cal.  
14. York-California construction Co., 832 Folsom street, San Francisco, Cal.

15. Keystone Bros., 120 2nd street, San Francisco, Cal.  
16. Morgan & Allen Co., 150 Post street, San Francisco, Cal.

17. Henry Disston & Sons Co., 155 1st street, San Francisco, Cal.  
18. Coffin-Kiddington Co., 301 Mission street, San Francisco, Cal.

19. W. P. Fuller & Co., 701 Mission street, San Francisco, Cal.  
20. Marshall-Newsell Supply Co., 142 Stuart street, San Francisco, Cal.

21. W. E. Musher & Co., 410 Mission street, San Francisco, Cal.  
22. The Heyman Welding Co., 720 Mission street, San Francisco, Cal.

23. Baker & Hamilton, 1th and Brannan streets, San Francisco, Cal.  
24. Berger Mfg. Co., 1420 Mission street, San Francisco, Cal.

25. Selby Smelting & Lead Co., Merchants' Exchange Building, San Francisco, Cal.

26. Honnook, Merrill & Stetson, 6th and Biexum streets, San Francisco, Cal.

27. Plant Rubber & Supply Co., 32 Beale street, San Francisco, Cal.  
28. Pacific States Electric Co., 575 Mission street, San Francisco, Cal.

29. Magnus Bros., 119 Jackson street, San Francisco, Cal.  
30. Sun Tent & Awning Co., 51 Washington street, San Francisco, Cal.

31. C. F. Weber & Co., 365 Market street, San Francisco, Cal.  
32. John Clark Saddlery Co., Portland, Ore.

33. Garlock Packing Co., 650 Howard street, San Francisco, Cal.  
34. Yates & Co., 762 Folsom street, San Francisco, Cal.

35. U. S. Rubber Co. of California, 50 Fremont street, San Francisco, Cal.  
36. The George Lawrence Co., Portland, Ore.

37. S. H. Frank & Co., 416 Battery street, San Francisco, Cal.  
38. Koenig & Zanetti, 1270 7th avenue, San Francisco, Cal.

39. H. W. Johns-Manville Co., 2nd and Howard streets, San Francisco, Cal.  
40. The Holland Mfg. Co., 685 Broadway, New York City.

41. Mangum & Otter Co., 561 Mission street, San Francisco, Cal.  
42. American Rubber Mfg. Co., 410 Mission street, San Francisco, Cal.

43. Johnson & Joseph Co., 41 Sacramento street, San Francisco, Cal.  
44. C. A. Wood Preserving Co., Rialto Building, San Francisco, Cal.

45. The Sherwin-Williams Co., 154 2nd street, San Francisco, Cal.  
46. Howe-Scate Co., 112 Main street, San Francisco, Cal.

47. M. S. Seller & Co., Seattle, Wash.  
48. Universal Trading Co., 171 Broadway, New York City.

49. Item 2, 2 ballers, for 8-in standard drive pipe, \$21.97 ea, bid 82.  
50. 2 do, for 10-in pipe, \$59.97 ea, do.

51. 2 do, for 8-in pipe, \$34.29 ea, do.  
52. 288 balls, float, rubber, 12½c ea, bid 56.

53. 2 hends, return, ammonia, \$1.54 ea, bid 14.  
54. 7 24 bits, stock drill, 6c ea, bid 37.

55. 12 do, twist drill, 12c ea, bid 12.  
56. 500 brackets, cross arm, \$1.52 per 100, bid 13.

57. 100 200 do, oak, \$1.60 per 100, do.  
58. 10 50 lbs brass, sheet, 1-22 in, 29c lb, bid 16.

59. 50 lbs do, 1-16 in, 29c lb, do.  
60. 12 ½ bulbs, gasoline furnace, \$3 doz, bid 41.

61. 200 yds canvas, white, 36-in, 51-8½c yd, bid 46.  
62. 15,500 yds do, 22-in, 28.79c yd, bid 82.

63. 500 yds do, 72-in, \$1.045 yd, bid 46.  
64. 570 yds do, 24-in, \$29.48c yd, bid 52.

65. 500 yds do, 36-in, 31.4c yd, bid 46.  
66. 250 yds do, 36-in, 43c yd, do.

67. 200 yds do, 40-in, 62.875c yd, do.  
68. 210 yds do, 36-in, 28c yd, do.

69. 220 yds do, 44-in, 34.1c yd, do.  
70. 25 sets casters, furniture, round plate, 2½c set, bid 12.

71. 56 sets do, oblong plate, 24c set, do.  
72. 54 cans cement, Doh-Magic, 12c can, bid 37.

73. 50 tubes cement, rubber, 2c tube, do.  
74. 27 2 irons, caulking, 35c ea, bid 41.

75. 2 clamps, wire, Havens, \$1.90 ea, bid 13.  
76. 12 do, saw filing, 60c ea, bid 37.

77. 31 clocks, office, 6-in, \$1.80 ea, bid 31.  
78. 1 do, 8-in, \$3.65 ea, bid 22.

79. 2 counters; thread, \$1.75 ea, bid 42.  
80. 50 lbs cyanide of potash, 95c lb, bid 26.

81. 3 sets dies, pipe, for No. 1 stock, \$1.12 set, bid 12.  
82. 3 do, for No. 2 stock, \$1.65 set, do.

83. 3 do, for No. 3½ stock, \$1.30 set, do.  
84. 3 do, for No. 4 stock, \$2.35 set, do.

85. 20 dippers, enamel, 1-qt, 22c ea, bid 10.  
86. 1 ½ do, 2-qt, 27c ea, do.

87. 100 gals dryer, turpentine, \$1.24 gal, bid 54.  
88. 6 elbows, ammonia, 2-in, \$8.71 ea, bid 26.

89. 18 gloves, rubber, size 9, \$1.75 pr, bid 56.

90. 2 prs do, size 9½, \$1.75 pr, do.  
91. 25 bs gum, splicing, 40c lb, bid 12.

92. 5,000 heads, nail, leather, 75c lot, bid 13.  
93. 12 hooks, plate, galvanized, 25c ea, bid 1.

94. 1,000 ft hose, rubber, water, 19.9c ft, bid 1.  
95. 204 ft do, suction, 3½-in, 97c ft, do.

96. 96 ft do, 4-in, \$1.08 ft, do.  
97. 1 indicator, speed, 85c, bid 37.

98. 800 lbs iron, flat, ¾x1 in, \$6.60 cwt, bid 9.  
99. 275 lbs do, ¾x1¼ in, \$6.60 cwt, do.

100. 10,000 lbs do, sheet, \$4.09 cwt, bid 38.  
101. 5,000 lbs lead, sheet, 7.1c lb, bid 39.

102. 5,000 lbs do, pig, 5.55c lb, bid 41.  
103. 100 lbs leather, rigging, 60c lb, bid 61.

104. 62,000 links, repair, ¾x¾ in, 50c per 100, bid 12.  
105. 4,000 lbs do, ¾x1¼ in, 50c per 100, do.

106. 1,000 doz, 5-16x1½ in, 94c per 100, do.  
107. 600 do, 3x2 in, \$1.55 per 100, do.

108. 12 locks, drawer, 85c, bid 37.  
109. 10 lbs nuts, finished, 60c lb, bid 72.

110. 7,000 lbs oakum, plumbers, 3.7c lb, bid 14.  
111. 200 padlocks, brass, heavy, 37½c ea, bid 30.

112. 10 gals oil, banana, \$1.85 gal, bid 45.  
113. 700 lbs packing, asbestos, 45c lb, bid 37.

114. 500 lbs do, rubber, 1-16 in, 60c lb, bid 51.  
115. 150 lbs do, ¼-in, 60c lb, do.

116. 200 lbs do, sheet, wire insertion, 50c lb, do.  
117. 600 lbs do, ¼-in, 50c lb, do.

118. 60 lbs paint, gold bronze, 68c lb, bid 29.  
119. 15,000 lbs paint, white lead, in oil in 25-lb containers, 4c lb, bid 50.

120. 15,000 lbs do, in 50-lb containers, 6.4c lb, do.  
121. 30,000 lbs do, in 100-lb containers, 6.15c lb, do.

122. 36 pans, stew, 5-qt, 40c ea, bid 41.  
123. 60 do, 6-qt, 45c ea, do.

124. 2 sockets, Stillson wrench, 18-in, 13c ea, bid 14.  
125. 2 do, 24-in, 18c ea, do.

126. 2 do, 36-in, 29c ea, do.  
127. 144 picks, ice, 9-in, 7½c ea, bid 41.

128. 720 pipe, cotter, 1-16x1 in, 45c M, bid 37.  
129. 720 do, 1-16x1½ in, 55c M, do.

130. 720 do, 1-16x2½ in, \$1.10 M, bid 12.  
131. 750 do, 1-16x3 in, \$1.35 M, do.

132. 720 do, 1½x3 in, \$2 M, do.  
133. 24 pots, coffee, enamel, 54c ea, bid 41.

134. 200 preservers, life, belt, 84c ea, bid 11.  
135. 2 pumps, sand, for 6-in pipe, \$21.50 ea, bid 82.

136. 3 do, for 8-in pipe, \$27.40, do.  
137. 1,000 lbs resin, best quality, 3c lb, bid 10.

138. 135 rings, syphon, 48c doz, bid 41.  
139. 2 scales, counter, with scoop, \$11.40 ea, bid 80.

140. 6 prs sights, wood level, 45c ea, bid 37.  
141. 432 snaps, harness, \$9.50 gr, bid 49.

142. 6,000 lbs spikes, railroad, \$2.50 cwt, bid 12.  
143. 250 stocks, whip, 4-line, 18½c ea, bid 2.

144. 2 lbs tape, asbestos, 60c lb, bid 51.  
145. 520 gals tar, coal, 11¼c gal, bid 10.

146. 1 tester, thread, \$7.50, bid 68.  
147. 12 thermometers, household, 40c ea, bid 37.

148. 114 spools thread, linen, back, 99c doz spools, bid 82.  
149. 144 spools do, white, \$1.14 doz spools, do.

150. 224 tiles for vine boiler, style L, 63c ea, bid 31.  
151. 28 do, style T, 47c ea, bid 31.

152. 36 do, style TX, 49c ea, do.  
153. 48 traps, mouse, 1c ea, bid 81.

154. 168 do, rat, 5c ea, do.  
155. 160 tubes, boiler, steel, 35.59c ft, bid 14.

Wednesday, Dec. 8, 1915.

128. 60 tubs, wash, heavy, 55c ea, bid 12.  
 129. 15 valves, blow-off, 1-in., \$2.35 ea, bid 12.  
 129. 6 do, gate, 6-in., \$8.25 ea, bid 17.  
 132. to 137. 60 gr washers, lock 1½-in, 2½c gr; 5-16 in, 20c; ¾-in, 22c; 7-16 in, 36c; ¾-in, 47c; ¾-in, 75c, bid 37.  
 111. 500 lbs waste, wool, 7-16 lb, do.  
 112. 300 lbs wax, door, 2½c lb, bid 79.  
 146 to 151. 6 wrenches, engineers, double end, ½-in, 15c ea; ¾-in, 18c, bid 19. 27c; ¾-in, 15c; ¾-in, 75c; 1-in, \$1, bid 12.  
 152. 32 wrenches, engineers, single end, ½-in, 19½c ea, bid 12.  
 153. 24 do, ¾-in, 29½c ea, do.  
 151. 24 do, ¾-in, 55c ea, do.  
 155. 6 do, 1-in, 75c ea, do.  
 156. 16 machines, mowing, Deering, \$16.55 ea, bid 19.  
 157. 50 mowers, lawn, hand, 18-in, \$7.50 ea, bid 12.  
 158. 44 powls, for lawn mower, 4c ea, do.  
 159 to 181. 66 parts mowing machine, No. D-674, \$1.87 ea; No. D-1818, \$1.13 ea; No. D-1826, 15c; No. D-1903, 57c; No. D-981, 19c; No. D-981, 23c, bid 19.  
 183 and 186. 24 lbs rivets, mowing machine, 8 lb, bid 37.  
 187. 72 bolts, door, foot, 90c ea, bid 20.

**Boise, Idaho, Post Office.**

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for the construction of an extension, etc., to the United States post office at Boise, Idaho:

North Pacific Construction Co., Pocatello, Idaho, \$16,125.

T. P. Murphy & Co., Boise City, Idaho, \$22,500.

R. E. Campbell, Salt Lake City, Utah, \$14,687.

Steinger Bros., Portland, Ore., \$59,100.

George A. Whitmayer & Sons, Ogden, Utah, \$49,578.

A. S. Whiteway, Boise, Idaho, \$19,276.

E. A. Steinger Construction Co., Victoria Bldg., St. Louis, Mo., \$51,881.

Frank M. Weakley, Portsmouth, Va., \$15,333.

Welsh Bros. & Hannaman, Gridley, Calif., \$41,874.

**Honolulu, H. T., Painting.**

The contract for painting interior woodwork, etc., in the U. S. public building at Honolulu, H. T. has been awarded to N. Stecher at \$715.

**Battleships.**

Secretary Daniels on November 23 took the first steps with the view to building in navy yards battleships 43 and 44, by directing that formal bids be obtained from steel makers for furnishing the Navy Department some 62,000 lbs of the plates, shapes, rivets, and castings required for the structure of these two ships. It appears from the department's figures that the lowest bid, after adding certain omissions from the department's specifications would be approximately \$8,075,000, while the limit of cost fixed by Congress is \$7,800,000.

**Navy Fuel Oil Plants.**

All bids received at the bureau of yards and docks, Navy Department, for fuel oil storage plants at Bremerton, Wash.; Mare Island, Cal.; San Diego, Cal. and Norfolk, Va., have been rejected. Further action in connection with the plants has been temporarily suspended.

**Salem, Ore., Indian School.**

The contract for the construction of an addition to the brick assembly hall at the Salem Indian School, Ore., has been awarded to Stewart & Engstrom, Salem, Ore., at \$5,950.

**Chain Shafts, Etc., Grand Valley, Irrigation Project.**

Contract has been awarded by authority of the Secretary of the Interior to the Lakeside Bridge & Steel Co., of North Milwaukee, Wis., for furnishing chain shafts and operating chains for the rolling crest of the Grand River diversion dam, Grand Valley irrigation project, Colo. The contract price is approximately \$5,147; delivery by a b. Milwaukee.

**HOSPITALS.**

PRESIDENT OF SAN FRANCISCO  
 Addition to nurses' dormitory, 2 story reinforced concrete. Cost as follows: Engineer, Constructing Quartermaster, Fort Mason. Owners, United States

Government. The following firms have been found low on this work. Contracts have not as yet been awarded. Frank M. Garden Co., general construction, \$12,793; extra grading, \$120. Lundon Plumbing Co., plumbing work, \$2,000; extra plumbing, \$78. Collman & Collman, electric wiring, \$580. The Taylor Co., fixtures, \$218. Collman & Collman, heating, \$900. Total cost, \$17,289.

SAN BERNARDINO CO., CAL.—Hospital group, 1 story with 2, 2 story wings, reinforced concrete, \$130,000. Architect, Lyman Fairwell, Story Bldg., L. A. Owners, San Bernardino County. The building will be Spanish Renaissance in design and will have concrete foundation and basement, brick exterior walls, pressed brick facing, clay tile roofs, reinforced concrete interior columns and floors, tile and metal lath partitions, elevators, steam heat, hospital plumbing. Working drawings have been completed.

**HOTELS.**

SAN FRANCISCO—Hotel and stores, 5 story and base, brick and reinforced concrete, \$125,000. Architects, Smith & Stewart, 211 Kearny street, S. F. Owner, J. B. Reite, 110 Jessie street, S. F. Location, south Mission west of Mary. Will contain a number of stores on the first floor besides the hotel entrance and lobby. Upper floors will contain in the neighborhood of 200 rooms. Interior finish pine with some hardwood and ornamental plaster in the lobby. Steam heat, oil burning equipment, elevator service, hot water system and vacuum cleaning. Patent store fronts. Marble and tile bases. Exterior faced with cement plaster. Plans complete and sub-contracts to be let.

STOCKTON, SAN JOAQUIN CO., CAL.—Hotel, 2 story and base, brick, \$15,000. Architect, Ralph P. Morrill, Odd Fellows Bldg., Stockton. Owner, G. Sanquetti. Will cover an area of 62 by 100 feet. Interior finish pine. Hot water system. Exterior faced with pressed brick. Plans being prepared.

LAKE TAHOE, PLACER CO., CAL.—Resort hotel, 1, 2 and 3 story, reinforced concrete. Cost not stated. Architect, Walter Webber, Ferguson Bldg., L. A. Owner, Anita M. Baldwin. Will contain 112 rooms, large office and lobby, dining room and 38 baths. Interior finish pine and red-oak. Hardwood floors. Power and heating plant in separate building. Vacuum cleaning and hot water system. Bath rooms tile. Exterior faced with natural stone. Plans being prepared.

**IRRIGATION PROJECTS.**

COLUMBIA, COLUMBIA CO., CAL.—Irrigation work. Cost not stated. Engineer, Charles de St. Maurice, Columbia. Owners, Cheney Slough District. The land owners in the proposed Cheney Slough District have incorporated and have selected Engineer Charles de St. Maurice to deal with the engineering features of the district. Canals, ditches, pumping plant and concrete intake are the improvements to go under way immediately. The director elected are H. H. Mitchell, E. H. Burton, F. B. Arnold, W. H. Ash and W. F. Klewe.

**SAN FERNANDO, LOS ANGELES CO., CAL.**—Irrigation distributing system. Cost not stated. Engineers, Los Angeles County Water Board, L. A. Owners, Los Angeles County. The Supervisors and members of the Water Board have reached an agreement as to the policy that shall govern the laying of the distributing system in the San Fernando Valley irrigating system, for which \$2,604,000 of bonds some time ago were voted under the Shenk Act. The Supervisors will follow the usual course of advertising for bids. In case these bids come within the limits of the fund provided by the bond issue, the work will be done by Private contract. In case it is found that the work cannot be done in this way within the limit, the county will do the work itself, purchasing the necessary materials and having the labor performed by force account under the supervision of Chief Engineer Mulholland of the water department. The system will involve the laying of 300 miles of pipe.

**COLUSA, COLUSA CO., CAL.**—Gates and weirs, reinforced concrete. Cost not stated. Engineer's name not given. Owners, Sutter-Butte Canal Co., Colusa. The Sutter-Butte Canal Co. is putting in concrete gates and weirs to replace wooden structures that were put in originally. The work is being done in pursuance of a settled policy of the company to make all its plant of permanent construction.

#### Contracts Awarded

**BYRON, CONTRA COSTA CO., CAL.**—Intake canal. Cost as follows. Engineer's name not given. Owners, Byron-Bethany project. Contractor, S. R. Fox, Oakland. Contract price, 13 1/2¢ per cubic yard.

#### LIBRARIES

**BERKELEY, ALAMEDA CO., CAL.**—Library steel and steel erection, \$46,232. Architect, John Galen Howard, 604 Mission street, S. F. Owners, Regents of the University of California. The Pacific Rolling Mills submitted the low figure at \$46,232 for furnishing and erecting structural steel for the new addition to the Doe Library on the University Campus. An award has not been made. A complete list of the bids submitted will be found under the heading of Oakland and Alameda County in this issue.

#### RAILROAD CONSTRUCTION AND EQUIPMENT

**MARTINEZ, CONTRA COSTA CO., CAL.**—Railroad station, 1 story and base, frame and concrete, \$12,000. Architect, Engineering Dept. of Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. Will be designed in the Mission style. Interior finish pine with concrete and tile floor. Exterior faced with cement plaster. Plans being prepared.

**MILL VALLEY, MARIN CO., CAL.**—Railroad extension. Cost not stated. Engineer's name not given. Owners, Mt. Tamalpais Scenic Railroad Co. The directors of the Mt. Tamalpais Scenic Railway Company are contemplating the extension of the present railroad to the southerly and highest peak of the mountain. This extension will carry

the road to an altitude of 2,640 feet, or several hundred feet higher than the Tavern building. The erection of a hotel building will be considered at a later date, according to manager of the road Buckingham.

**TACOMA, WASH.**—Street railway extension. Cost not stated. Engineer, Engineering Dept. of Pacific Traction Co., Tacoma. Owners, Pacific Traction Co. The Pacific Traction Co., Geo. W. Rounds, general superintendent, proposes the construction of an extension of two miles on the Steilacoom boulevard, Starling street and Steilacoom avenue to Union and La Fayette, involving 11,317 cubic yards of excavation and 12,850 cubic yards of embankment work.

#### Contracts Awarded.

**SAN PEDRO, LOS ANGELES CO., CAL.**—Power station, 1 story and base, reinforced concrete. Cost not stated. Architect, none. Owners, American Traction Co., Pacific Electric Bldg., L. A. Contractors, P. O. Engstrom Co., 5th and Seaton streets, L. A. Contract price not stated.

#### RESIDENCES

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$10,000. Architect, Alfred H. Jacobs, 110 Sutter street, S. F. Owner, Dr. Martin E. Hart. Location, 14th avenue north of Balboa. Will contain nine rooms, three baths and a basement garage. Interior will be finished in pine, hardwood and white enamel. Hardwood floors throughout except baths which will be finished in tile. Furnace heat, open fire places and brick mantels. Automatic water heater. Exterior covered with cement plaster. Plans complete and figures being taken.

Will contain eight rooms, bath and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors, open fire places and tile or brick mantels. Automatic water heater. Bath room tile. Exterior covered with cement plaster. Plans being prepared.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$4,000. Architect, none. Owner, A. Harrington, 10 Judah street, S. F. Location, west 12th avenue south of Cabrillo. Will contain seven rooms, bath and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors, open fire places and furnace heat. Automatic water heater. Bath rooms tile. Brick or tile mantels. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**OAKLAND, CAL.**—Residence, 1 1/2 story and base, frame, \$3,000. Architect, none. Owner, William H. Sims, 1226 6th avenue, Oakland. Location, east Fairfax avenue north of Ygnacio. Will contain seven rooms, bath and sleeping porch. Interior finish pine and white enamel with some elm panels. Hardwood floors, open fire places and tile or brick mantels. Automatic water heater. Some tile wainscot. Exterior covered with cement plaster.

Plans complete and work to be done by Day Labor.

**BERKELEY, ALAMEDA CO., CAL.**—Residences, 2, 2 story and base, frame, \$2,500 each. Architects, Sidney B. and Noble Newsom, Nevada Bank Bldg., S. F. Owner, Frank Spring. Location, Thousand Oaks Tract. Each will contain seven rooms, bath and sleeping porch. Interiors finished in pine, hardwood and white enamel. Hardwood floors. Open fire places and furnace heat. Mantels tile or brick. Automatic water heaters. Tile wainscot in bath rooms. Exteriors covered with cement plaster on metal lath. Plans complete and figures being taken.

**OAKLAND, CAL.**—Residence, 1 1/2 story and base, frame, \$2,500. Architect, none. Owner, John A. Bischoff, 6045 Harwood avenue, Oakland. Location, south 62nd street east of Colby. Will contain six rooms and bath. Interior finish pine and white enamel. Hardwood floors. Open fire places and tile or brick mantels. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work by Day Labor.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 1 story and base, frame, \$2,500. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owner, Mrs. Hazel S. Armstrong. Location, east Buena Vista Way, La Loma Park. Will contain six rooms, bath and sleeping porch. Interior finish pine and white enamel. Hardwood floors and open fire places. Mantels tile or brick. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**OAKLAND, CAL.**—Residence, 1 1/2 story and base, frame, \$2,500. Architect, none. Owner, H. S. Swalley, 710 Walker avenue, Oakland. Location, west Arbor avenue north of Hudson. Will contain six rooms, bath and sleeping porch. Interior finish pine and white enamel with some elm panels. Hardwood floors and open fire place. Mantel tile or brick. Automatic water heater. Exterior covered with cement plaster on metal lath. Plans complete and work to be done by Day Labor.

**OAKLAND, CAL.**—Residence, 1 story and base, frame, \$2,000. Architect, none. Owner, Robert Trimlett, 4203 Agua Vista street, Oakland. Location, northwest corner of Brookdale avenue and Short street. Will contain five rooms, bath and sleeping porch. Interior finish pine and white enamel. Hardwood floors and open fire place. Mantel tile or brick. Tile wainscot in bath room. Automatic water heater. Exterior covered with rustic and cement plaster on metal lath. Plans complete and work to be done by Day Labor.

**PIEDMONT, ALAMEDA CO., CAL.**—Residence, 1 story and base, frame, \$2,000. Architect, none. Owner, O. M. Bullock, 1420 Broadway, Piedmont. Location, south Howard street. Will contain five rooms, bath and sleeping porch. Interior finish pine and white enamel. Hardwood floors. Open fire place and tile or brick mantel. Automatic water heater. Exterior covered with cement plaster and rustic. Plans complete and work to be done by Day Labor.

**PIEDMONT, ALAMEDA CO., CAL.**—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, O. M. Bullock, 1420 Broadway, Oakland. Location, south Magnolia avenue west of El Cerrito. Will contain six rooms, bath and sleeping porch. Interior finish pine and white enamel with some elm panels. Hardwood floors, open fire place and tile or brick mantel. Automatic water heater. Tile in bath room. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**OAKLAND, CAL.**—Residence, 1 story and base, frame, \$2,500. Architect, none. Owner, Justus Norris, 2828 Richmond avenue, Oakland. Location, southwest corner of Arlington avenue and Los Angeles street. Will contain six rooms, bath and sleeping porch. Interior finish pine, elm and white enamel. Hardwood floors and open fire places. Mantels tile or brick. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**BERKELEY, ALAMEDA CO., CAL.**—Fraternity house, 3 story and base, frame, \$19,000. Architect, Norman Shaw, associated with W. C. Hays, First National Bank Bldg., S. F. Owners, Delta Deuteron Fraternity. Location, corner of College avenue and Durant Way. Will contain a large number of living rooms, social rooms, baths and banquet hall. Interior finish pine and hardwood. Central heating system, hot water supply and open fire places. Mantels tile or brick. Bath rooms finished in tile. Exterior covered with cement plaster. Plans complete and in the hands of J. M. Wiley who will submit all contracts.

**SACRAMENTO, CAL.**—Residence, 1 story and base, frame, \$2,000. Architect, none. Owner, E. L. Ford, Sacramento. Location, 7th avenue. Will contain five rooms and bath. Interior finish pine and redwood. Some hardwood floors. Open fire place and tile or brick mantel. Automatic water heater. Exterior covered with rustic. Plans complete and work to be done by Day Labor.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Residence, 1 story and base, frame, \$3,000. Architect, Ralph P. Morrell, Odd Fellows Bldg., Stockton. Owner, Pierce J. Morrell. Location, North California street. Will contain seven rooms, bath and sleeping porch. Interior finish pine and hardwood with some white enamel. Hardwood floors, furnace heat and open fire places. Mantels tile or brick. Automatic water heater. Exterior covered with rustic. Plans being prepared.

**DANVILLE, CONTRA COSTA CO., CAL.**—Residence, 1 story and base, frame, \$2,500. Architects, Sidney B. and Noble Newsom, Nevada Bank Bldg., S. F. Owner, R. Buckman, Danville. Will contain five rooms, bath and sleeping porch. Interior finish pine and white enamel. Hardwood floors. Open fire place and tile or brick mantel. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**FRESNO, FRESNO CO., CAL.**—Residence, 1 story and base, frame, \$3,-

200. Architect, none. Owner, Fred Jones, Fresno. Location, Ventura Vista Addition. Will contain eight rooms, bath and sleeping porch. Interior finished in pine, hardwood and white enamel. Hardwood floors, central heating system and open fire places. Mantels, tile or brick. Bath rooms tile. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO** — Residence, 2 story and base, frame, \$3,500. Architects, Koenig & Christensen, Humboldt Bank Bldg., S. F. Owner, Ernest Erickson. Location, south Caselli west of Douglas. Will contain seven rooms, bath and basement garage. Interior finish pine, hardwood and white enamel. Hardwood floors, open fire places and furnace heat. Mantels tile or brick. Tile bath room. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work by Day Labor.

**OAKLAND, CAL.**—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, Paul E. Woodburn, 3965 Greenwood avenue, Oakland. Location, east Broadway south of Prospect. Will contain seven rooms, bath and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors. Open fire places and furnace heat. Mantels tile or brick. Tile bath room. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 1 story and base, frame, \$2,500. Architect, none. Owner, C. J. Prang, 5457 Claremont avenue, Berkeley. Location, south Delano west of California. Will contain six rooms, bath and sleeping porch. Interior finish pine and white enamel. Hardwood floors and open fire place. Mantel tile or brick. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

## SCHOOLS

**SAN FRANCISCO**—School, 2 story and base, brick and steel. Cost as follows. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owners, City and County of San Francisco. Bids were opened by the Board of Public Works for the construction of the new Bedding School. No awards have been made. A complete list of the figures presented will be found under the heading of San Francisco in this issue.

**SAN JOSE, SANTA CLARA CO., CAL.**—Class room addition, 1 story, frame and plaster. Cost not stated. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Bids will be opened on December 31st for the construction of a frame and plaster addition to the San Jose State Normal School. The addition will consist of a combination class room and domestic science building. Construction will be temporary. An official proposal appears in another column of this issue.

**OAKLAND, CAL.**—Yard toilet, frame. Cost not stated. Architect, State Architect George B. McDougall, Sacramento.

**E. R. Hoerchner**

Attorney-at-Law

Phone Garfield 2856

Phelan Bldg.

San Francisco

Owners, State of California. Bids will be received up to December 25th for constructing a yard toilet at the Industrial Home for Adult Blind at Oakland. Plans can be secured from the State Department of Engineering. An official proposal appears in another column of this issue.

**BAKERSFIELD, KERN CO., CAL.**—Schools, 2, 1 story, frame, \$2,000 and \$1,700. Architect, J. M. Saffell, Bakersfield. Owners, Rosamond and Muroc School Districts. Both buildings have been designed for district schools and will contain but one class room. Interior finish pine. Exterior rustic, shingles or cement plaster. Plans complete and figures being taken.

**KINGSBURG, FRESNO CO., CAL.**—School, 1 story and base, frame and concrete. Cost not stated. Architect, Anton Johnson, Kingsburg. Owners, Kingsburg High School District. Bids will be received by the Board of School Trustees up to and including December 11th at 2 p. m. for the construction of the new building. Interior will be finished in pine with maple floors in the class rooms. A central heating system will be installed. Exterior of the building will be faced with cement plaster. Plans can be secured from either the architect or from the Clerk of the Board of Education.

**FRESNO, FRESNO CO., CAL.**—School, 1 story and base, frame, \$15,000. Architect, Fred Schwartz, Rowell Bldg., Fresno. Owners, North Fresno School District. Will be erected near the State Normal School grounds and will contain, besides the usual class rooms, a teachers' cottage and department for domestic science. Exterior will be covered with cement plaster. Plans are now being prepared.

**PASO ROBLES, SAN LUIS OBISPO CO., CAL.**—School, 1 story and base, brick and concrete. Cost not stated. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Paso Robles School District. The building will contain 6 class rooms and an assembly hall. Interior finish will be of pine with maple floors in the class rooms. Central heating system, oil burning furnace. Exterior faced with cement plaster or pressed brick. Plans are nearly complete.

**SEATTLE, WASH.**—University building, 2 or 3 story and base, Class A construction, \$150,000. Architects, Charles Lebb and Carl Gould, Penny Bldg., Seattle. Owners, University of Washington. Plans are now being prepared for the first of several new buildings to be erected on the University Campus. Details of the construction have not been given out as the plans are only in the

preliminary stage. Further mention will be made of the work.

**BELLINGHAM, WASH.**—School, 2 story and base, Class A construction, \$100,000. Architects, Heath & Gove, National Realty Bldg., Tacoma. Owners, City of Bellingham. Will contain a large number of class rooms, assembly hall and auditorium besides science laboratories and office. Construction fire proof throughout. Interior finish pine with maple and tile floors. Steam heat, oil burning system, modern plumbing and vacuum cleaning system. Program clocks. Exterior faced with pressed brick and stone. Plans complete and figures to be taken on approval by Architect T. F. Doan of Bellingham.

**RED BLUFF, TEHAMA CO., CAL.**—School, 2 story and base, brick and concrete, \$900,000. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Red Bluff Union High School District. Will contain 16 class rooms, assembly hall, offices, teachers' rooms and science laboratories. Interior finish pine with maple floors. Steam heat, oil burning furnace, vacuum cleaning and program clocks. Exterior faced with cement plaster or pressed brick. Plans being prepared.

**LOS ANGELES, CAL.**—School, 1 story and base, brick, \$20,000. Architect, W. C. Pennell, Baker-Detweiler Bldg., L. A. Owners, City of Los Angeles. Location, West Vernon avenue and Olive, covering an area of 68 by 50 feet. Will contain six class rooms. Interior finish pine with maple floors. Central heating system. Exterior faced with pressed brick. Plans complete and figures being taken.

**SUISUN, SOLANO CO., CAL.**—School, 1 story and base, reinforced concrete, \$30,000. Architects, Edwin J. Symmes, Pacific Bldg., S. F., associated with William H. Crim, Jr., 425 Kearny street, S. F. Owners, Crystal School District. Contractors, H. L. Peterson, S. F., general construction, \$25,700; Pacific Blower and Heating Co., S. F., heating, \$3,987, and Butte Electric and Engineering Co., S. F., electric work, \$1,175. A complete list of the bids received will be found under the head of Marin, Contra Costa and Sonoma Counties in this issue.

**SAN FRANCISCO**—School lighting fixtures. Cost not stated. Architect, City Dept. of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Contractors, Thomas Day Co., S. F. Contract price not stated.

**LOS ANGELES, CAL.**—School, 1 story and base, brick, \$20,000. Architects, Dennis & Hewett, Fay Bldg., L. A. Owners, City of Los Angeles. Contractors, Barber-Bradley Construction Co., 1824 East 15th street, L. A. Contract price, \$20,000.

#### SEWERS, STREET WORK & WATER SYSTEMS

**SACRAMENTO, CAL.**—Highway construction. Cost not stated. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Bid will be opened on December 27th for work in the following counties: Placer County, Roseville to Penryn, 7.5 miles, Portland cement

concrete; Placer County, Penryn to Auburn, 6.5 miles, Portland cement concrete; Tehama County, Corning to Proberta, 10.2 miles, Portland cement concrete; Marin-Sonoma Counties, steel bascule bridge, span 145 feet, 2 concrete approach spans each about 50 feet and about 1120 feet of crosstied pile trestle. Plans can be secured from the office of the Highway Commission or its branch in the Rialto Bldg., S. F. An official proposal appears in another column of this issue.

**RICHMOND, CONTRA COSTA CO., CAL.**—Electrolifers. Cost not stated. Engineer, City Engineer, Richmond. Owners, City of Richmond. Business men of the west side, together with the members of the Commercial Club, will ask the City Council at their next meeting that eight electrolifers of the triton style be installed along Washington avenue. If the Council cannot appropriate the money for the electrolifers, the petitioners will purchase and install them, providing the city furnishes the light. Further mention will be made of the work.

**SAN ANSELMO, MARIN CO., CAL.**—Street improvements. Cost not stated. Engineer, Town Engineer, San Anselmo. Owners, Town of San Anselmo. Bids will be opened on December 12th for the following street improvements: Concrete gutters, 2 catch basins, 1 corrugated iron culvert 18 inches in diameter and 12 feet long, also macadamized 11 feet roadway.

**SAN ANSELMO, MARIN CO., CAL.**—Sewer construction. Cost not stated. Engineer, Town Engineer, San Anselmo. Owners, Town of San Anselmo. Bids will be opened on December 12th for constructin a corrugated iron storm water sewer. The following are the most important items included in the construction: 181½ feet of 27-inch pipe, 22½ feet of 30-inch pipe, 3 manholes, 26 feet of 12-inch corrugated iron culvert, 34 feet of 15-inch corrugated iron culvert, 33 feet of 15-inch corrugated iron culvert, 9 feet of 20-inch corrugated iron culvert, 9 feet of 18-inch corrugated iron culvert.

**HERCULES, CONTRA COSTA CO., CAL.**—Road improvement. Cost not stated. Engineer's name not given. Owners, Town of Hercules. The town trustees are preparing to macadamize the road through that town on the Richmond-Martinez road.

**SOUTH SAN FRANCISCO, SAN MATEO CO., CAL.**—Street improvement. Cost not stated. Engineer, City Engineer, South San Francisco. Owners, South San Francisco. At the last meeting of the City Trustees a resolution ordering work No. 23 along the state highway near Baden crossing was adopted.

**SAN MATEO, SAN MATEO CO., CAL.**—Street improvement. Cost not stated. Engineer, Town Engineer, San Mateo. Owners, Town of San Mateo. At the last meeting of the City Trustees, the Board adopted a resolution ordering street work on 3rd avenue between A street and El Camino Real, and the Clerk was directed to advertise for bids.

**SANTA CRUZ, SANTA CRUZ CO., CAL.**—Street and sewer work. Cost not stated. Engineer, City Engineer, Santa Cruz. Owners, City of Santa Cruz. At the last meeting of the City Council

the City Engineer was instructed to prepare plans and specifications for concrete sidewalks from Rigg street to Van Ness avenue, also for the construction of a sewer in Palm avenue. The sewer will be a 6-inch vitrified iron stone about 500 feet long. The matter of the Almar sewer construction was laid over.

**REDWOOD CITY, SAN MATEO CO., CAL.**—Highway construction. Cost not stated. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. Bids will be received until December 13th for constructing 4-inch waterbound macadam pavement on a portion of Mission road beginning at a point near the entrance of Holy Cross Cemetery and extending northwesterly about 2,000 feet to connect with the state highway.

**BERKELEY, ALAMEDA CO., CAL.**—Paving playground. Cost not stated. Engineer, City Engineer, Berkeley. Owners, City of Berkeley. Bids will be received until December 10th for furnishing tools, materials and labor for surfacing a play ground, approximately 42,200 square feet in area, in San Pablo Park.

**SACRAMENTO, CAL.**—Street improvements. Cost not stated. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Bids will be received until December 14th at 11 a. m. for improving the following streets: Freeport road from Burnside to El Dorado avenue, Palm avenue from Palmetto avenue to Rose avenue, the alley between Y and Orange avenue, Cypress avenue from Sacramento avenue to 37th street, Cypress avenue from 37th street to the west line of the Upper Stockton road, Hollyhock avenue from the Alta Vista Addition to Washburn avenue, Burbank avenue from Leland Stanford avenue to Rose avenue.

**LODI, SAN JOAQUIN CO., CAL.**—Pipe. Cost not stated. Engineer, City Engineer, Lodi. Owners, City of Lodi. City Clerk H. S. Clark has been authorized to purchase 3,000 feet of 18-inch sewer pipe in the open market after the City Trustees had rejected all bids on account of the price quoted. Gladding-McBean Co., The California Pottery Co. and X. Clark & Son had offered to supply the pipe at prices ranging from 46½¢ to 48¢ per lineal foot. Private correspondence with other manufacturers before the bids were called for named a price considerable lower.

**MODESTO, STANISLAUS CO., CAL.**—Street and sewer work. Cost not stated. Engineer, City Engineer, Modesto. Owners, City of Modesto. At the last meeting of the City Council the City Engineer was instructed to construct a new sewer to serve certain houses in 4th and 5th streets. A resolution of intention to construct sidewalks on 5th street from I to L was passed. Two ordinances were passed regarding the paving of McHenry avenue.

**REDONDO BEACH, LOS ANGELES CO., CAL.**—Street work. Cost not stated. Engineer, City Engineer, Redondo Beach. Owners, City of Redondo Beach. Bids are being taken by the City Council for the improvement of Pacific avenue from Carnelian street to Broadway. Resolutions of intention have been passed providing for the im-

provement of portions of Pacific avenue and portions of Lucia avenue between Anita and Huntington streets. TILLAMOOK, TILLAMOOK CO., ORE. —Road and bridge construction, \$319,228. Engineer, County Surveyor, Tillamook. Owners, Tillamook County. The County Commissioners have completed their 1916 budget and the largest item is that for road construction and new bridges. The total amount to be raised will be \$319,228, of which \$173,389 will be used in the road and bridge fund.

OAKLAND, CAL.—Sewers. Cost not stated. Engineer, City Engineer, Oakland. Owners, City of Oakland. Resolutions of intention to sewer the following streets have been passed by the City Council. To sewer Solano Way between 16th and 17th avenues, and Tompkins avenue from Vale avenue northwesterly. Bids on this work will soon be called.

ONTARIO, SAN BERNARDINO CO., CAL.—Street improvement. Cost not stated. Engineer, City Engineer, Ontario. Owners, City of Ontario. Bids will be opened by the City Council on the evening of January 10th, 1916, for the improvement of east State street and Euclid avenue from the Southern Pacific tracks to State street.

ONTARIO, SAN BERNARDINO CO., CAL.—Street work and electroliters. Cost not stated. Engineer, City Engineer, Ontario. Owners, City of Ontario. Improvements, including widening of the sidewalks and the installation of ornamental electroliters, have been ordered on A street between Laurel and Paul avenues.

## DEPARTMENT OF ENGINEERING.

### CALIFORNIA HIGHWAY COMMISSION

#### NOTICE TO CONTRACTORS.

**SEALED PROPOSALS** will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock P. M. on December 27, 1915, at which time they will be publicly opened and read for construction in accordance with the specifications therefor, to which special reference is made, portion of State highway as follows:

Placer County, from Roseville to Penryn (11-Pla-17-A), about 7.5 miles in length, to be paved with Portland cement concrete.

Placer County, from Penryn to Auburn (11-Pla-17-B), about 6.5 miles in length, to be paved with Portland cement concrete.

Tehama County, from Corning to Proberta (11-Teh-7-A and 3-B), about 16.2 miles in length, to be paved with Portland cement concrete.

Sonoma and Marin Counties, across Petaluma Creek at Green Point (IV-Son-Mrn-8-A), a bridge comprising a steel harscule span 148 feet long, two concrete and steel approach spans each about 50 feet long, and about 1122 feet of cressoted pile trestle.

Plans may be seen, and forms of proposals, bonds, contract, and specifications may be obtained, at the said office, and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated.

The Division Engineers' offices are located at Willits, Dunsmuir, Sacramento, San Francisco, San Luis Obispo, Fresno, and Los Angeles.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

CHARLES D. BLANEY,  
NEWELL D. DARLINGTON,  
CHARLES F. STEERN,  
California Highway Commission.  
AUSTIN B. FLETCHER,  
Highway Engineer.  
WILSON R. ELLIS,  
Secretary. (\*)

Dated: Nov. 23, 1915.

## SANITARY EQUIPMENT FOR HONGKONG HOMES.

[Vee Consul A. E. Carelton, Hongkong, British China, Oct. 4.]

In general there is an increasing demand in Hongkong for better equipped bathrooms, and recently inquiries have been made at the Hongkong consulate general for catalogues describing American ranges with hot-water attachments, a better arrangement for heating the water for the bath being the chief requirement.

A modern bathroom is rather the exception than otherwise, and it is generally only in the newer dwellings, particularly those constructed in the apartment-house style, where reasonably equipped bathrooms have been installed. These Chinese have made no attempt to put in up-to-date equipments, with the exception of a few houses owned by Chinese with Western

training, and if the idea should obtain that a modern bathroom is a necessity there would be an immense trade here.

### Shanghai Tub Losing Popularity.

The "Shanghai tub" is losing its popularity to a certain extent; it is unsanitary in some ways, as, for instance, the outlet for the water has no outside pipe connection, and the water or some portion thereof is likely to remain on the bathroom floor. But, as before indicated, the chief necessity is the provision of facilities for heating the bath water, whether the Shanghai tub remains or a modern outfit complete is installed. In many houses there is a makeshift shower bath, but without the needle shower and other attachments, and few of these have connections with the bath-heating apparatus.

At present in Hongkong there would be no demand for closets with flush fixtures, as the dry-closet system is still in vogue, and this will not be changed until the sewerage system has been extended and there is sufficient water for flushing purposes. The Government is building another reservoir which will give plenty of water even in the driest season. In connection with the bathroom an enameled lavatory with hot and cold water connections is likewise needed.

## SANTA FE GRAVEL COMPANY INCORPORATES.

**SACRAMENTO, CAL.**—The Santa Fe Gravel Company of Fresno is permitted by the State Corporation Department to issue 1000 shares each to Louis Manned, W. J. Whitney and Geo. ## City Bids Opened

San Francisco Board of Public Works  
Opens Bids for Construction of  
Redding School Building.

Bids were opened at the regular Wednesday afternoon session of the San Francisco Board of Public Works for the general construction of the Redding School and for the brick and terra cotta work, plumbing, heating and ventilating and electric work on the same building. Plans for the structure were prepared by Architect Frederick H. Meyer.

Twenty-three sets of figures were received on the general construction, while bidding on other parts of the work was equally heavy. Awards have not been made.

The Board did not take up the matter of an award of contract on the construction of the 67 miles of railroad into the Hetch-Hetchy site and will probably consider this matter until next Wednesday's meeting. Following is a complete list of the bids received for the various parts of the work on the Redding School.

Location, east Broadway north of Orchard. Will contain sales rooms for automobiles and repair shop. Interior finish pine. Cement and tile floor. Patent store fronts and marble bases. Exterior faced with pressed brick. Plans complete.

THEATRE. 2 story and base. Class C construction, \$10,000. Berkeley, Alameda Co., Cal. Architects, Richardson & Burrell, Albany Bld., Oakland. Owners, Coin Bros. Location, Adeline street near Alcatraz. Will contain a large motion picture theatre and several stores. Interior finish pine and ornamental plaster. Metal conduit and special electric work. Patent store fronts. Marble bases. Exterior faced with pressed brick. Plans being prepared.

STORIES AND OFFICES -2 story and base. Class A construction, \$28,000. Oakland, Cal. Architects, Richardson & Burrell, Albany Bldg., Oakland, own-er's name withheld. Will have com-plete steel frame, brick exterior walls faced with pressed brick and terra-cotta. Interior finish pine and hard-wood. Marble bases and wainscot. Patent stone fronts. Steam heat and hot water system. Plans being pre-pared.

#### Contracts Awarded.

WAREHOUSE—2 story and base, Class "C" construction, \$11,000, Oakland, Cal. Architect, C. W. Dickey, Central Bank Bldg., Oakland. Owners, Lokenback Steamship Co., Contractor, G. Armstrong, 1639 Alcatraz avenue, Berkeley. Contract price, \$11,000.

## Figures For Steel On U. C. Library.

Pacific Rolling Mills Low For Steel and  
Steel Erection on New Addition to  
Doc Library.

Five sets of figures were received by the Regents of the University of California for the steel and steel erection of the new addition to the Doe Library on the University Campus at Berkeley. The Pacific Rolling Mills Co. were low at \$16,722. A contract will be awarded shortly. Following is a complete list of the bids as opened.

## Steel and Steel Fire

Pacific Rolling Mill, June 15	\$46.25
Western Iron Works 60 days	
after arrival in S. P.	19.97
Easton Iron Works, June 15	74.45
Calumet Cent. Co. June 15	1.60
Deer River, after June 15, one	
time	19.00

**STREET IMPROVEMENTS**—Cost not stated. San Anselmo, Marin Co., Cal. Engineer, Town Engineer, San Anselmo. Owners, Town of San Anselmo. Bids will be opened on December 13th for the following street improvements: Concrete gutters, 2 catch basins, 1 corrugated iron culvert 18 inches in diameter and 40 feet long, also macadamize 11 feet roadway.

**SEWER CONSTRUCTION**—Cost not stated. San Anselmo, Marin Co., Cal. Engineer, Town Engineer, San Anselmo. Owners, Town of San Anselmo. Bids will be opened on December 13th for constructing a corrugated iron storm water sewer. The following are the most important items included in the construction: 181½ feet of 27 inch pipe; 22½ feet of 30-inch pipe, 3 manholes; 26 feet of 12-inch corrugated iron culvert, 54 feet of 15-inch corrugated iron culvert, 39 feet of 15-inch corrugated iron culvert, 9 feet of 20-inch corrugated iron culvert, 9 feet of 18-inch corrugated iron culvert.

**ROAD IMPROVEMENT**—Cost not stated. Hercules, Contra Costa Co., Cal. Engineer's name not given. Owners, Town of Hercules. The town trustees are preparing to macadamize the road through that town on the Richmond-Martinez road.

**RESIDENCE**—1 story and base, frame, \$2,500. Danville, Contra Costa Co., Cal. Architects, Sidney B. and Noble Newsum, Nevada Bank Bldg., S. F. Owner, R. Buckman Danville. Will contain five rooms, bath and sleeping porch. Interior finish pine and white enamel. Hardwood floors. Open fire place and tile or brick mantel. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**RAILROAD STATION**—1 story and base, frame and concrete, \$12,000. Martinez, Contra Costa Co., Cal. Architect, Engineering Dept. of Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. Will be designed in the Mission style. Interior finish pine with concrete and tile floor. Exterior faced with cement plaster. Plans being prepared.

**RAILROAD EXTENSION**—Cost not stated. Mill Valley, Marin Co., Cal. Engineer's name not given. Owners Mt. Tamalpais Scenic Railway Company. The directors of the Mt. Tamalpais Scenic Railway Company are contemplating the extension of the present railroad to the southerly and highest peak of the mountain. This extension will carry the road to an altitude of 2,610 feet, or several hundred feet higher than the Tavern building. The erection of a hotel building will be considered at a later date, according to manager of the road Buckingham.

#### Contracts Awarded.

**HIGHWAY CONSTRUCTION**—\$21,182.90. Reclamation, Sonoma Co., Cal. Engineer, State Highway Commission, Sacramento. Owners, State of California. Contractors, Bates, Borland & Ayer, Oakland Bank of Savings, Oakland. Contract price, \$21,182.90.

**STREET IMPROVEMENT**—Cost not stated. Martinez, Contra Costa Co., Cal. Engineer, City Engineer, Martinez. Owners, City of Martinez. Contractors, W. E. Price Construction Co., Martinez. Work will include grading and filling in the new Oak Knoll Tract.

**SEWER CONSTRUCTION**—\$1,303.20. Richmond, Contra Costa Co., Cal. Engineer, City Engineer, Richmond. Owners, City of Richmond. Contractors, Galbraith & James, 156 South 14th street, Richmond. Contract price, \$1,303.20.

**STREET IMPROVEMENT**—\$7,006.16. Richmond, Contra Costa Co., Cal. Engineer, City Engineer, Richmond. Owners, City of Richmond. Contractors, Municipal Improvement Co., 503 Macdonald avenue, Richmond. Contract price, \$7,006.16.

**SCHOOL**—1 story and base, reinforced concrete, \$30,000. Suisun, Solano Co., Cal. Architects, Edwin J. Symmes, Pacific Bldg., S. F., associated with William H. Crim, Jr., 425 Kearny street, S. F. Owners, Crystal Springs School District. Contractors, H. L. Peterson, S. F., general construction, \$25,700, Pacific Blower and Heating Co., S. F., heating, \$2,987, and Butte Electric and Engineering Co., S. F., electric work, \$1,475. A complete list of the bids received will be found under the head of Marin, Contra Costa and Sonoma Counties in this issue.

**INTAKE CANAL**—Cost as follows. Byron, Contra Costa Co., Cal. Engineer's name not given. Owners, Byron-Bethany project. Contractor, S. K. Fox, Oakland. Contract price, 13½¢ per cubic yard.

#### FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA

**STREET AND SEWER WORK**—Cost not stated. Modesto, Stanislaus Co., Cal. Engineer, City Engineer, Modesto. Owners, City of Modesto. At the last meeting of the City Council the City Engineer was instructed to construct a new sewer to serve certain houses in 4th and 3th streets. A resolution of intention to construct side-walks on 3th street from I to L was passed. Two ordinances were passed regarding the paving of McHenry avenue.

**RESIDENCE**—1 story and base, frame, \$3,200. Fresno, Fresno Co., Cal. Architect, home owner, Fred Jones, Fresno. Location, Ventura Vista Addition. Will contain eight rooms, bath and sleeping porch. Interior finished in pine, hardwood and white enamel. Hardwood floors, central heating system and open fire places. Mantels tile or brick. Bath rooms tile. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**SCHOOLS**—2, 1 story frame, \$2,000 and \$1,700. Bakersfield, Kern Co., Cal. Architect, J. M. Saffell, Bakersfield. Owners, Rosamond and Muroc School Districts. Both buildings have been designed for district schools and will contain but one class room. Interior finish pine. Exterior rustic, shingles or cement plaster. Plans complete and figures being taken.

**SCHOOL**—1 story and base, frame and concrete. Cost not stated. Kingsburg, Fresno Co., Cal. Architect, Anton Johnson, Kingsburg. Owners, Kingsburg High School District. Bids will be received by the Board of School Trustees up to and including December 11th at 2 p. m. for the construction of the new building. Interior will be finished in pine with maple floors in the

class rooms. A central heating system will be installed. Exterior of the building will be faced with cement plaster. Plans can be secured from either the architect or from the Clerk of the Board of Education.

**SCHOOL**—1 story and base, frame, \$15,000. Fresno, Fresno Co., Cal. Architect, Fred Schwartz, Rowell Bldg., Fresno. Owners, North Fresno School District. Will be erected near the State Normal School grounds and will contain besides the usual class rooms, a teachers' cottage and department for domestic science. Exterior will be covered with cement plaster. Plans are now being prepared.

#### SACRAMENTO, STOCKTON AND NORTHERN CALIFORNIA

**HIGHWAY CONSTRUCTION**—Cost not stated. Sacramento, Cal. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Bids will be opened on December 27th for work in the following counties: Placer County, Roseville to Penryn, 7.5 miles, Portland cement concrete; Placer County, Penryn to Auburn, 6.5 miles, Portland cement concrete; Tehama County, Corning to Proberta, 10.2 miles, Portland cement concrete; Marin-Sonoma Counties, steel bascule bridge, span 145 feet, 2 concrete approach spans each about 80 feet and about 1120 feet of cross-slope pile trestle. Plans can be secured from the office of the Highway Commission or its branch in the Rialto Bldg., S. F. An official proposal appears in another column of this issue.

**STREET IMPROVEMENTS**—Cost not stated. Sacramento, Cal. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Bids will be received until December 14th at 11 a. m. for improving the following streets: Piecroft road from Burnside to El Dorado avenue, Palm avenue from Palmetto avenue to Rose avenue, the alley between Y and Orange avenue, Cypress avenue from Sacramento avenue to 37th street, Cypress avenue from 37th street to the west line of the Upper Stockton road, Hollyhock avenue from the Alta Vista Addition to Wabash avenue, Burbank avenue from Leland Stanford avenue to Rose avenue.

**PIPE**—Cost not stated. Lodi, San Joaquin Co., Cal. Engineer, City Engineer, Lodi. Owners, City of Lodi. City Clerk H. S. Clark has been authorized to purchase 3,000 feet of 18-inch sewer pipe in the open market after the City Trustees had rejected all bids on account of the price quoted. Gladding-McBean Co., the California Pottery Co., and N. Clark & Son had offered to supply the pipe at prices ranging from 46½¢ to 48¢ per lineal foot. Private correspondence with other manufacturers before the bids were called for named a price considerably lower.

**STREET IMPROVEMENT**—Cost not stated. Sacramento, Cal. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Contractors as follows: Oak avenue from 5th to 7th to McGillivray Construction Co., 1007 7th street. The alley between N and O streets east of 10th and west of 11th to the McGillivray Construction Co.

Cypress avenue east from 35th to Sacramento avenue awarded to the Clark & Henery Construction Co., ochsenr Bldg., Cypress avenue easterly from 30th to westerly line of 35th street awarded to the Clark & Henery Construction Co.

**BRIDGE**—Steel and concrete, \$28,061.12. Sacramento, Cal. Engineer, State Highway Commission, Sacramento. Owners, State of California. Bids opened at the last meeting of the State Highway Commission for the construction of a bridge over the Yolo By-Pass show the Security Construction Co., L. A. low at \$24,671. Bids have been taken under advisement. The engineer's estimate was \$28,061.12. A complete list of the bids received will be found under the heading of Sacramento in this issue.

**RESIDENCE**—1 story and base, frame, \$2,000. Sacramento, Cal. Architect, none. Owner, E. L. Ford, Sacramento. Location, 7th avenue. Will contain five rooms and bath. Interior finish pine and redwood. Some hardwood floors. Open fire place and tile or brick mantel. Automatic water heater. Exterior covered with rustic. Plans complete and work to be done by Day Labor.

**RESIDENCE**—1 story and base, frame, \$3,000. Stockton, San Joaquin Co., Cal. Architect, Ralph P. Morrell, Odd Fellows Bldg., Stockton. Owner, Pierce J. Morrell, Location, North California street. Will contain seven rooms, bath and sleeping porch. Interior finish pine and hardwood with some white enamel. Hardwood floors, furnace heat and open fire places. Mantels tile or brick. Automatic water heater. Exterior covered with rustic. Plans being prepared.

**MAUSOLEUM**—1 story and base, reinforced concrete, \$60,000. Yuba City, Yuba Co., Cal. Architect, Consolidated Mausoleum Co., Platinon Bldg., S. F. Owners, Sutter-Yuba Cemetery Association. Will contain a number of crypts, chapel and office. Interior finished in stone and marble. Exterior faced with cement plaster and granite. Plans complete and work to be done by Day Labor.

**HOTEL**—2 story and base, brick, \$15,000. Stockton, San Joaquin Co., Cal. Architect, Ralph P. Morrell, Odd Fellows Bldg., Stockton. Owner, G. Sanquetti. Will cover an area of 62 by 100 feet. Interior finish pine. Hot water system. Exterior faced with pressed brick. Plans being prepared.

**RESORT HOTEL**—1, 2 and 3 story, reinforced concrete. Cost not stated. Lake Tahoe, Placer Co., Cal. Architect, Walter Webber, Ferguson Bldg., L. A. Owner, Anita M. Baldwin. Will contain 112 rooms, large office and lobby, dining room and 98 baths. Interior finish pine and redwood. Hardwood floors. Power and heating plant in separate building. Vacuum cleaning and hot water system. Bath rooms tile. Exterior faced with natural stone. Plans being prepared.

**SCHOOL**—2 story and base, brick and concrete, \$90,000. Red Bluff, Tehama Co., Cal. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Red Bluff Union High School District. Will contain 16 class rooms, assembly hall, offices, teachers' rooms and science laboratories. Interior finish pine with

maple floors. Steam heat, oil burning furnace, vacuum cleaning and program clocks. Exterior faced with cement plaster or pressed brick. Plans being prepared.

**IRRIGATION WORK**—Cost not stated. Colusa, Colusa Co., Cal. Engineer, Charles G. St. Maurice, Colusa. Owners, Cheney Slough District. The land owners in the proposed Cheney Slough District have in incorporated and have selected Engineer Charles G. St. Maurice to deal with the engineering features of the district. Canals, ditches, pumping plant and concrete intake are the improvements to go under way immediately. The directors elected are B. H. Mitchell, B. H. Burton, P. B. Arnold, W. H. Ash and W. E. Klewe.

**GATES AND WEIRS**—Reinforced concrete. Cost not stated. Colusa, Colusa Co., Cal. Engineer's name not given. Owners, Sutter-Butte Canal Co., Colusa. The Sutter-Butte Canal Co. is putting in concrete gates and weirs to replace wooden structures that were put in originally. The work is being done in pursuance of a settled policy of the company to make all its plant of permanent construction.

### Contracts Awarded.

**BANK AND OFFICES**—1 story and base, Class A construction. Cost not stated. Stockton, San Joaquin Co., Cal. Architect, C. W. Dickey, Central Bank Bldg., Oakland. Owners, Stockton Savings Bank. Contractors, P. J. Walker Co., Monadnock Bldg., S. F. Contract price not stated. Note: The contractors are now taking subinquiries on the work and have awarded the structural steel work to the Builders' Iron Works of Stockton.

## Open Figures For Suisun School.

### Contracts Awarded for New Reinforced Concrete Building for The Crystal School District.

Bids were opened by the Crystal School Trustees at Suisun for the construction of a one-story and basement reinforced concrete school, designed by Edwin J. Symmes associated with William H. Cline, Jr. The general contract including the plumbing was awarded to H. L. Peterson on his bid of \$25,700. The Pacific Blower & Heating Co. secured the contract for the heating at \$2,987, and the Butte Electric & Engineering Co. was awarded the electric work at \$1,175. Following is a complete list of the bids received:

<b>Crystal School (General Construction),</b>	
H. L. Peterson, S. F.	\$25,700
Thomas Elam & Son, S. F.	27,700
Howard S. Williams, S. F.	27,550
Western Bldg. & Eng. Co., S. F.	28,500
C. Nathan & Mulford, S. F.	28,998
T. H. Carnahan	29,575
L. A. Williams, S. F.	29,825
J. S. Hannah, S. F.	29,997
M. Fisher, S. F.	30,000
Robert Glaze, S. F.	30,198
Caldwell & Son, S. F.	30,185
McLaren & Peterson, S. F.	30,612
Collman & Collman, S. F.	32,940
Welch Bros. & Hamann, Grid	
by, Cal.	33,357
L. G. Bergren & Son, S. F.	37,572

### Heating.

John Ringius Sheet Metal Wks.	\$4,115.82
Modern Sheet Metal Works	4,144.50
McKeon & Mack	1,270.00
Scott Co.	4,186.00
Pacific Blower & Heating Co.	2,987.00
Siebert & Co.	3,997.00

### Electric Work.

McLaren & Peterson	\$1,650
Butte Eng. & Elec. Co.	1,175
Central Elec. Co.	1,500
Solano Supply & Constr. Co.	1,520

### Program Clocks.

Standard Electric Time Co.	\$796
----------------------------	-------

## Bridge Bids Opened At Sacramento.

### Eight Bids Received By State Highway Commission For Construction of Bridge Over Yolo By-Pass.

(By Special Wire.)

SACRAMENTO, CAL., Nov. 29th, 1915.—The following bids were opened by the State Highway Commission for the construction of an 80-foot steel span plate girder bridge with concrete approaches for the Yolo By-Pass. The total length of the structure is about 114 feet. The security Construction Co. of Los Angeles presented the low bid at \$24,671. A contract will be awarded at the next meeting of the Highway Commission. The engineer's estimate on the work was \$28,061.12. Following is a complete list of the bids as opened:

#### Yolo By-Pass Bridge.

Security Constr. Co., L. A.	\$24,671
J. D. Hannah, San Francisco	25,755
C. E. Lamburth, S. F.	25,800
Ross Constr. Co., Sacramento	26,919
Jenkins & Well, Sacramento	28,816
Petersen & Grier, S. F.	29,110
Mulford Bridge Co., Kansas, Mo.	29,870
S. B. Peterson, S. F.	30,990

## LOS ANGELES & SOUTHERN CALIFORNIA.

**STREET WORK**—Cost not stated. Redondo Beach, Los Angeles Co., Cal. Engineer, City Engineer, Redondo Beach. Owners, City of Redondo Beach. Bids are being taken by the City Council for the improvement of Pacific avenue from Canadian street to Broadway. Resolutions of intention have been passed providing for the improvement of portions of Pacific avenue and portions of Lucia avenue between Anita and Huntington streets.

**BRIDGE**—Steel and reinforced concrete, \$100,000 to \$125,000. Santa Barbara, Santa Barbara Co., Cal. Engineer, A. V. Saph, Rialto Bldg., S. F. Owners, Santa Barbara County. A. V. Saph has been appointed consulting engineer for the state highway bridge across the Santa Ynez River at Cuesta and Zaca Canyons, and will start on plans for the work immediately. The Cuesta-Zaca bridge is the largest and most expensive structure to be built on the state highway out of the county bridge fund. From this fund \$50,000 will be taken as the county's contribution toward the cost of the bridge, while the state will contribute between \$50,000 and \$75,000.

**SCHOOL**—1 story and base, brick and concrete. Cost not stated. Paso Robles, San Luis Obispo Co., Cal. Architect, W.

H. Weeks, 75 Post street, S. F. Owner, Paso Robles School District. The building will contain six class rooms and an assembly hall. Interior finish will be of pine with maple floors in the class rooms. Central heating system, oil burning furnace. Exterior faced with cement plaster or pressed brick. Plans are nearly complete.

**STREET IMPROVEMENT**—Cost not stated. Ontario, San Bernardino Co., Cal. Engineer, City Engineer, Ontario. Owners, City of Ontario. Bids will be opened by the City Council on the evening of January 10th, 1916, for the improvement of East State street and Euclid avenue from the Southern Pacific tracks to State street.

**STREET WORK AND ELECTROLIGHTS**—Cost not stated. Ontario, San Bernardino Co., Cal. Engineer, City Engineer, Ontario. Owners, City of Ontario. Improvements, including widening of the sidewalks and the installation of ornamental electric lighters, have been ordered on A street between Laurel and Paul avenues.

**CHURCH**—2 story and base, brick, \$55,000. Los Angeles, Cal. Architect, Frank L. Meline, 6772 Hollywood Boulevard, L. A. Owners, Fifth Church of Christ, Scientist. Location, Hollywood and La Brea. Will contain large main auditorium, reading rooms and Sunday school rooms. Interior finish hardwood and ornamental plaster. Art glass windows. Central heating system. Exterior faced with pressed brick. Revised plans complete and figures being taken.

**CHURCH**—1 story and base, reinforced concrete or hollow tile, \$25,000. San Bernardino, San Bernardino Co., Cal. Architects, Jeffery & Schaefer, Wesley Roberts Bldg., L. A. Owners, First Congregational Church. Will cover an area of 95 by 150 feet. Interior arranged for main auditorium, seating 350 people, fifteen class rooms, social parlors and pastor's study. Interior finish pine and ornamental plaster. Art glass windows. Exterior faced with cement plaster. Plans complete and figures being taken.

**GLASS FACTORY**—5, 1 and 2 story, frame and corrugated iron, \$10,000. Torrance, Imperial Co., Cal. Architect's name not given. Owners, The Hurrie-Window Glass Co. Work is now under way by Day Labor on this group of buildings. Concrete floors will be used. Exteriors will be covered with corrugated iron. Adolph Sieroty, Eastern Outfitting Co., L. A., is the secretary of the company.

**IRRIGATION DISTRIBUTING SYSTEM**—Cost not stated. San Fernando, Los Angeles Co., Cal. Engineers, Los Angeles County Water Board, L. A. Owners, Los Angeles County. The Supervisors and members of the Water Board have reached an agreement as to the policy that shall govern the laying of the distributing system in the San Fernando Valley irrigation system, for which \$2,500,000 of bonds some time ago were voted under the Shenk Act. The Supervisors will follow the usual course of advertising for bids. In case these bids come within the limits of the funds provided for by the bond issue, the work will be done by private contract. In case it is found that the work cannot be done in this way within this limit, the county will do the work

itself, purchasing the necessary materials and having the labor performed by force account under the supervision of Chief engineer Mulholland of the water department. The system will involve the laying of 300 miles of pipe.

**HOSPITAL GROUP**—4 story with 2, 2 story wings, reinforced concrete, \$120,000. San Bernardino Co., Cal. Architect, Lyman Farwell, Story Bldg., L. A. Owners, San Bernardino County. The building will be Spanish Renaissance in design, and will have concrete foundation and basement, brick exterior walls, pressed brick facing, clay tile roofs, reinforced concrete interior columns and floors, tile and metal bath partitions, elevators, steam heat, hospital plumbing. Working drawings have been completed.

**SCHOOL**—1 story and base, brick, \$20,000. Los Angeles, Cal. Architect, W. C. Pennell, Baker-Detwiler Bldg., L. A. Owners, City of Los Angeles. Location, West Vernon avenue and Olive, covering an area of 68 by 80 feet. Will contain six class rooms. Interior finish pine with maple floors. Central heating system. Exterior faced with pressed brick. Plans complete and figures being taken.

#### Contracts Awarded.

**BRIDGE**—Reinforced concrete. Cost \$15,500. Meyers Creek, Imperial Co., Cal. Engineer, State Highway Commission, Sacramento. Owners, State of California. Contractors, Holland Construction Co., Granger Bldg., San Diego. Contract price, \$15,500. Engineer's estimate, \$25,320.53.

**POWER STATION**—1 story and base, reinforced concrete. Cost not stated. San Pedro, Los Angeles Co., Cal. Architect, none. Owners, American Trona Co., Pacific Electric Bldg., L. A. Contractors, F. O. Engstrom Co., 5th and Seaton streets, L. A. Contract price not stated.

**SCHOOL**—1 story and base, brick, \$20,000. Los Angeles, Cal. Architects, Dennis & Hewett, Fay Bldg., L. A. Owners, City of Los Angeles. Contractors, Barber-Bradley Construction Co., 1821 East 15th street, L. A. Contract price, \$20,000.

**STORES AND OFFICES**—2 story and base, stone, \$33,000. Calexico, Imperial Co., Cal. Architect, Ralph Swearingen, Calexico. Owners, Imperial Valley Hardware Co. Contractors, Welch & Wright, El Centro. Contract price, \$32,000.

#### PORTLAND AND OREGON

**ROAD AND BRIDGE CONSTRUCTION**—\$419,228. Tillamook, Tillamook Co., Ore. Engineer, County Surveyor, Tillamook. Owners, Tillamook County. The County Commissioners have completed their 1916 budget and the largest item is that for road construction and new bridges. The total amount to be raised will be \$319,228, of which \$173,389 will be used in the road and bridge fund.

**BRIDGE**—Steel or reinforced concrete, \$125,000 or more. Salem, Ore. Engineer's name not given. Owners, Marion and Polk Counties. Competitive plans will be submitted with proposals for the construction of the proposed bridge to be built jointly by Marion and Polk Counties. The selection of plans will probably be made

by the State Highway Department. Plans will include a draw span and will be for either a steel or concrete structure.

#### SEATTLE AND WASHINGTON

**BRIDGE**—Steel and reinforced concrete. Cost not stated. Pasco, Wash. Engineer, C. E. Fowler, Central Bldg., Seattle. Owners, Walla Walla and Franklin Counties. C. E. Fowler, consulting engineer, is preparing plans for the construction of a steel bridge over the Snake River between Pasco and Burbank for Franklin and Walla Walla Counties, and will have them ready for contractors the latter part of December. The bridge will rest on concrete piers, will be about 800 feet long with about 2,000 feet of approaches.

**APARTMENT HOUSE**—5 story and base, Mill construction, \$75,000. Seattle, Wash. Architects, Martin & Pagan, Northern Bank Bldg., Seattle. Owners, Gardner and Lessey, 2021 4th avenue. Location, 14th avenue, covering an area of 60 by 108 feet. Will contain a large number of two, three and four room apartments with wall beds and private baths. Interior finished in pine and hardwood with some hardwood floors. Steam heat, automatic elevators and a hot water supply. Bath rooms tile. Exterior faced with pressed brick trimmed with terra cotta. Plans complete and segregated figures being taken.

**APARTMENT HOUSE**—3 story and base, brick, \$10,000. Seattle, Wash. Architect, J. I. Ripley, 2447 4th avenue, Seattle. Owner, F. H. Webber. Location, corner of 24th avenue and Spruce streets, covering an area of 53 by 66 feet. Will contain two and three room apartments with wall beds and private baths. Interior finish pine and hardwood with some white enamel. Hardwood floors. Steam heat, oil burning plant and hot water supply. Bath rooms tile. Marble and tile wainscot. Exterior faced with pressed brick. Plans complete and segregated figures to be taken.

**APARTMENT HOUSE**—3 story and base, brick, \$45,000. Seattle, Wash. Architect, H. Ryan, Northern Bank Bldg., Seattle. Owner's name not given. Location, Capitol Hill, covering an area of 80 by 120 feet. Will contain 42 suites of two and three rooms with wall beds and private baths. Interior finish pine and hardwood with some hardwood floors and white enamel. Steam heat, automatic elevator and hot water supply. Bath rooms finished in tile. Marble and tile wainscot. Exterior faced with pressed brick. Plans complete and figures being taken.

**WAREHOUSE**—4 story and base, reinforced concrete, \$50,000. Seattle, Wash. Architect, Engineering Dept. American Paper Co., 85 Atlantic street, Seattle. Owners, American Paper Co. Location, southwest Juneau and Atlantic streets, covering an area of 120 by 180 feet. Construction fireproof with reinforced concrete floors and walls. No interior finish. Elevator service, metal window sash and frames and fireproof doors. Exterior faced with cement plaster. Plans complete and figures being taken.

**STREET RAILWAY EXTENSION**—Cost not stated. Tacoma, Wash. Engineer, Engineering Dept. Pacific Traction Co., Tacoma. Owners, Pacific Traction Co. The Pacific Traction Co., Geo. W. Rounds, general superintendent, proposes the construction of an extension of 2 miles on the Steilacoom boulevard, Starling street and Steilacoom avenue to Union and La Fayette, involving 14,317 cubic yards of excavation and 12,850 cubic yards of embankment work.

**UNIVERSITY BUILDING**—2 or 3 story and base. Class A construction, \$150,000. Seattle, Wash. Architects, Charles Bebb and Carl Gould, Denny Bldg., Seattle. Owners, University of Washington. Plans are now being prepared for the first of several new buildings to be erected on the University Campus. Details of the construction have not been given out as the plans are only in the preliminary stage. Further mention will be made of the work.

**SCHOOL**—2 story and base. Class A construction, \$100,000. Bellingham, Wash. Architects, Heath & Gore, National Realty Bldg., Tacoma. Owners, City of Bellingham. Will contain a large number of class rooms, assembly hall and auditorium, besides science laboratories and office. Construction airtight throughout. Interior finish pine with maple and tile floors. Steam heat, oil burning system, modern plumbing and vacuum cleaning system. Program clocks. Exterior faced with pressed brick and stone. Plans complete and figures to be taken on approval by Architect T. F. Doan of Bellingham.

#### Contracts Awarded.

**APARTMENT HOUSE**—3 story and base, mil construction, \$75,000. Seattle, Wash. Architect, David Dow, 21st and Spruce streets, Seattle. Owner's name not given. Contractor, David Dow, 21st and Spruce. Contract price, \$75,000.

#### MANCHURIAN MERCHANTS REGARD AMERICAN TERMS SEVERE.

[Translated by the American consulate at Harbin from the Harbinski Vestnik (official organ of the administration of the Chinese Eastern Railway) of October 10.]

Merchants at Harbin, in reply to inquiries, are complaining that the principal obstacle in the development of trade with the United States are the difficult terms insisted upon by American firms. For example, these firms insist that half the money must be paid down with the order and the other half paid upon the arrival of the steamer delivering the goods at the nearest port. These terms are indeed very hard, if one takes into consideration the lack of credit at present.—Commerce Reports.

#### AMERICAN SUBSTITUTE FOUND FOR FOREIGN LIME.

A firm of importers in New York, which was receiving high-priced lime from Germany and Austria, has found in this country a lime which is a good substitute for the foreign product. It is used for abrasive purposes, principally as a cleaner before nickel plating, or in combination with other materials for bulding purposes on nickel-plated work.

## Associated Catalogues.

Here is where the Architect usually files the circulars, catalogues, announcements, etc., that come to his office. He can't take care of them. There are too many of them.

### the Remedy:

Associated Catalogues is a collection of catalogues of Building Materials, Building Equipment and Building Machinery available on the Pacific Coast, bound in one volume, thoroughly indexed for instant reference for Architects use.

Every Architect, Consulting Engineer and Large Corporation Purchasing Agent on the Pacific Coast will receive a copy Free. When

## Fine Arts Building Can Be Saved.

L. E. MAUER OF IMPERIAL COMPANY, SPECIALIZERS IN WATER-PROOFING PROBLEMS, TAKES ISSUE WITH GENERAL CONTRACTORS' ASSOCIATION.

Claims That Fine Arts Building at P. P. L. E. Can Be Preserved.

A committee from the General Contractors' Association was recently appointed by that body to investigate and report upon the feasibility of preserving the Fine Arts Building. That committee came to the conclusion that the building ought to be torn down for several reasons, principally among which being the expense of keeping the structure in repair because the exterior coatings, columns and enrichments were of plaster of Paris composition, which they claim would not last more than two or three seasons unless the surface were entirely filled or waterproofed with lead and oil paint or other enduring form of damp-proofing of which the committee had no knowledge; that the porous nature of the cast work presented an insuperable difficulty to any effective attempt at securing a waterproof wearing surface.

Mr. Maurer claims that the staff work, etc., can be economically waterproofed. Here is his reply:

Today it seems no subject is of such general interest and magnitude to the loyal citizens of San Francisco, and apparently so little understood, as the preservation of the Fine Arts Building and other prominent structures of the Panama-Pacific International Exposition.

This subject has been approached from every angle, criticized by all professions, civic organizations, welfare societies, special appointed committees and numerous progressive private citizens. In various statements through the press we have the candid opinion of a great many able and experienced men and committees, quoting their views as to the feasibility, practical and permanent results obtainable, and the possible expense it would incur accomplishing this most desired feat.

It is an established fact that the main building has a pub. foundation, steel frame and metal bath, coated with a Portland cement plaster, forming the structural part of the walls. This method of construction is generally recognized as of a permanent nature. The surface or exterior coating, including all columns and enrichments in fact all ornamental and decorative designs, have been made of Plaster Paris (hard wall coating). It is a well known fact that this material is the most commonly used in general building construction for all ornamental purposes, but where in direct contact with an element of nature (WATER), it will soon decay and disintegrate. This is caused solely by the absorptive nature of the material itself. Eliminate this CAUSE and the PRESERVING of the FINE ARTS BUILDING IS ACCOMPLISHED. This can be done—due to the advancement of MODERN SCIENTIFIC METHODS, without in any way destroying the artistic texture and color effects. This fact is demonstrable by the efficient and permanent results obtained throughout this State.

To produce the highly artistic designs, textures and color effects it was absolutely necessary to use material of this nature (Plaster of Paris or a similar product), it being at this time the only material that will permit the artist and artisan to create the beauti-

ful designs and enrichments of form, texture of surface and last, and also—a very important factor—the highly artistic color effects, not obtainable by a surface coating of oil paint but by an integral mixture of colors in the exterior of Plaster Paris coating. In this manner reproducing the beauty of nature itself—TRAVERTINE STONE.

It has been stated and seems to be the general impression that it would be utterly impossible to so treat the porous and slightly cracked or otherwise defective surface of the Fine Arts and other buildings without the rough portions of the surface being entirely filled or waterproofed with a lead and oil paint. Remember, this is an age of progress and evolution. There was a time when it was perfectly proper and correct to state that we have no other means of ocean navigation than the SAIL SHIP; no other means of artificial illumination than the TALLOW CANDLE and COAL OIL LAMP; no other means of overland travel than the OX CART and STAGE COACH. All of these and numerous other ancient ideas have been supplanted by modern inventions. So it is with the race-inherited idea that no structural building material of a permanent nature can be made WATER-PROOF and PERPETUALLY without closing all pores and voids.

It is not universally understood and acknowledged that the basic cause of all dampness, decay and disintegration of all STONE, BRICK, CEMENT or any other porous and absorptive building material is the ABSORPTIVE NATURE OF THE MATERIAL ITSELF. Eliminate this factor and the so-called perfect building material can be made permanent, even through what may be Plaster Paris. Nothing, of course, can be built to last forever. We must acknowledge and respect the even transformation—changing—of nature—evolution, form into another, destruction of the elements such as storms, fires and earthquakes.

Any one who is a resident of San Francisco or the State of California can readily satisfy himself or herself that there is a method of treatment which will absolutely PRESERVE and material through which water will percolate. Generally speaking this method is comparatively new, yet it has been in use for a sufficient number of years to give efficient, practical and permanent results, not by filling the pores and texture or surface coating, but simply by making the material itself NON-ABSORPTIVE. Some of the prominent buildings in San Francisco have been treated solely for the purpose of PRESERVING the structure and eliminating absorption. They have stood the test for years.

Everyone who has visited the Exposition has admired this most beautiful structure. Not only from the citizens of California, but from every corner of the globe you can hear praise and admiration of its artistic design and harmonious color effect. WHY NOT PERPETUATE this famous landmark in memory of the P. P. E., the greatest achievement of its kind in the history of the world? IT CAN BE DONE, without reconstructing the exterior finish or losing any of its artistic features or color effect. The expense is very insignificant, taking into consideration the magnitude of the repairs, all defective places can be repaired, pointed up and made watertight, so that not a square inch of the exterior surface could act as a transpiration of dampness and water; this permanency beyond any question of doubt.

It is with deepest regret that the writer frequently observes discouraging comments in the press relative to the preservation of the Fine Arts Building, to the effect that it is impossible to save the structure without reconstruction. If that is the only or dominant factor retarding this building for an indefinite length of time, the problem is already solved and can be easily overcome. This article is written and published to enlighten those who labor under the illusion that the Fine Arts Building cannot be preserved in

its present state of construction, for the reason that the exterior finish material is of a very porous and absorptive nature, permitting premature decay and disintegration.

## AMERICAN TRADE RECORD.

American foreign trade rose to the new high level of \$5,000,000,000 in the 12 months ending with October, 1915, according to figures made public by the Bureau of Foreign and Domestic Commerce, Department of Commerce. Imports of merchandise amounted to \$1,691,748,013, compared with \$1,830,114,501 in the preceding period, while exports aggregated \$3,318,634,636 against \$2,140,847,829 in the 12 months ending with October, 1914.

October exports also established a new high record, rising to \$334,638,578, or \$33,961,756 above the former record made in September last, and comparing with \$194,711,170 in October, 1914, and \$271,861,464 in October, 1913. October imports were \$148,529,620 against \$138,080,520 in October, 1914, and \$177,987,986 in October, 1912, the former October record.

The export balance for October was \$186,108,958, against \$56,630,650 in October, 1914, and for the 12 months ending with October \$1,626,886,623, compared with \$260,433,328 in the preceding period.

Free merchandise comprised 70.91 per cent of the total imports of October, 1915, as against 62.97 per cent of those of October, 1914.

Gold imports during October, 1915, amounted to \$79,669,239, against \$5,945,003 in October last year, and gold exports were valued at \$2,935,300 in October, 1915, compared with \$50,301,972 in October, 1914. October thus showed a net inward gold movement of \$76,731,939 instead of a net outward gold movement of \$44,356,969 in October last year. For the 12 months ending with October gold imports aggregated \$357,061,165, compared with \$28,001,088 in the preceding period, and gold exports for the 12 months ending with October amounted to \$30,532,386, against \$225,194,301 a year earlier. A net outward gold movement of \$167,193,213 in the 12 months ending with October last year has been followed by a net inward gold movement of \$326,528,779 in the 12 months just ended.—Commerce Reports.

## GOLD MINE AND POWER COMPANY INCORPORATES.

SACRAMENTO, CAL.—The Trinity Gold Mining and Power Company has filed articles of incorporation in the office of the Secretary of State. The concern is to operate in Trinity County, but the headquarters will be in San Francisco.

The Directors and organizers are J. A. Snook, B. A. Wilbrand, C. F. Callonan, J. F. Sullivan and F. A. Schmitz. The capital stock total is \$500,000 and the paid-up capital \$5.

The recent sale of an American cement mixer to the city of Kingston and of two carloads of raisins to a wholesaler in that Canadian port resulted from the trade-extension efforts of Consul Felix S. S. Johnson.

## Catarrh Can Be Relieved

**T**HERE IS NO NEED for you to continually suffer from Catarrh and Cold in the Head. It makes you miserable, doesn't it? You really don't care whether things go right or not and you wonder when you'll ever get over it. And you will not get over it until you get the Clover Leaf Catarrh Remedy, and use it. It will relieve you, and you'll wonder why you had not used it sooner. We are so positive that this will relieve you of your Catarrh or Cold in the Head, that we guarantee you satisfaction or we will refund your money.

THE WHOLE WORLD AWAITS THE ADVENT OF A PRACTICAL GAS HEATING DEVICE

WITH OUR UNIT PLANT FURNACES HEATING WITH CLEAN GAS IS AS PRACTICAL AND ECONOMICAL AS WITH DIRTY, DUSTY, SMOKY COAL OR OIL

HEAT WITH FRESH AIR NOT REHEATED, REBREATHED, STALE AIR

## Unit Plant Hot Blast Furnace

### Delivers the Heat A Complete Answer to the Heating Question.

Instantaneous—Furnishes an instantaneous and continuous supply of Sanitary—fresh warm air free from gas fumes, odors, smoke or dust.

Hygienic—Maintains an even temperature necessary to health and comfort.

Scientific—Built like a real hot air furnace reduced in size.

Convenient—Operated from inside of room, saving many steps to cellar.

Simple—Any child 10 years of age can operate, turn the key and apply match.

Economical—Wall furnace burns 10 cubic feet and floor furnace 20 cubic feet of gas per hour.

Efficient—Each furnace will heat from 2 to 5 rooms or from 3,000 to 9,000 cubic feet of space.

Fireproof—Has four thicknesses of metal and three air spaces of one inch each between fire and wood; fire is 20 inches from floor.

Up to Date—Uses exclusively the Johnson Hot Blast Burner, recognized as the most efficient ever constructed.

Durable—Is made from best grade of metal to be obtained.

Finish—Register electro plated Flemish Brass. The finish that lasts.

Installation—Can be installed by any gas appliance dealer, plumber, tinsmith or hardware merchant at nominal cost.

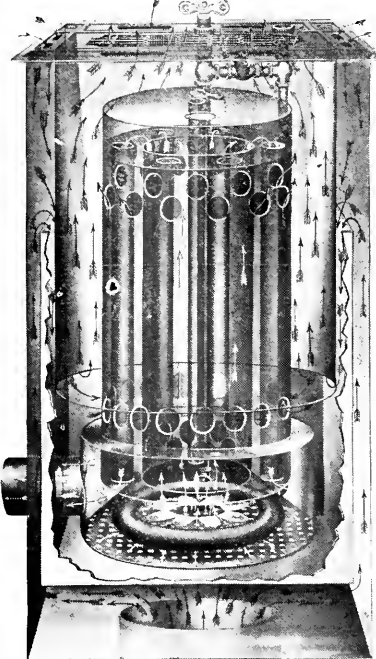

Retail Prices—Wall Furnace, any style \$22.50  
Floor Furnace, any style \$30.00  
Installations and fittings extra.

**FLOOR FURNACE STYLE B**  
Size 14½ in. square by 2 ft. high  
Has 8-in. Fresh Air Intake with Damper.  
Has 3-in. Outlet Vent.  
Fits in space between floor joists  
Hangs from Register which lays flush with floor.

**Style**

- Floor Furnace with fresh air intake on side. For use in buildings having sufficient fresh air circulation under same. For artificial gas only.
- Floor Furnace with fresh air intake at bottom. For use in buildings where it is desirable to obtain air directly from outside of cellar or basement. For artificial gas only.
- Wall Furnace with fresh air intake at bottom. For artificial gas only.
- Wall Furnace with fresh air intake at back. For artificial gas only.

NOTE—Style A and B are built alike except for position of fresh air intake.

NOTE—Style C and D are built alike except for position of fresh air intake.

Prices and Information on Natural Gas Furnaces Furnished on Application.

## California Railroad Commission Opposes Railroad Valuation Idea.

STAFF ARTICLE

Max Thelen, President.  
H. D. Loveland.  
Alex. Gordon.  
Edwin O. Edgerton.  
Frank R. Devlin.

California, through its Railroad Commission is opposing before the Interstate Commerce Commission at Washington, on behalf of the people of the United States, the alleged extravagant claims of the railroads of the nation, with reference to the value of their property. An exhaustive review, analyzing the principles that the California Commission believes should be followed in estimating the worth of the lines, has been filed before the national body, signed by all the members of the California Commission, and by Max Thelen and Douglas Brookman as counsel.

In 1913 Congress passed the Federal Valuation Act directing the Interstate Commerce Commission to make valuation of every railroad subject to its jurisdiction. The Commission invited a discussion of the fundamental principles of valuation to be followed in that work. The railroads immediately took advantage of this opportunity. They filed with the Interstate Commerce Commission a brief of about six hundred pages and also appeared before the Commission to present their views orally. The railroads organized a large corps of engineers, statisticians and other experts to keep in constant touch with the representatives of the Interstate Commerce Commission while the valuations were being made.

The railroads in their brief, in their oral arguments, and in consultation with representatives of the Interstate Commerce Commission, are insisting upon those principles of valuation that will result in the highest valuation possible being put upon the railroad property. They are presenting a strong front for the adoption of their views.

The California Commission says that these proceedings are of tremendous importance to the entire country and that it is essential the interests of the public be represented before the Interstate Commerce Commission and the dangers pointed out that would result from the adoption of the carriers' contentions.

In its brief the California Railroad Commission analyzes the provisions of the Federal valuation Act and says that contrary to the claim of the railroads, the Act does not require the Interstate Commerce Commission to make

any ultimate finding of value of the property of the railroads, but merely to make certain findings of fact, such as the original cost, the cost of reproducing the property new, the cost of reproducing the property less depreciation, and certain other specific findings. The California Commission points out that it is impossible to make any ultimate finding of value without having in mind the purpose for which the value is to be made, and that the Valuation Act does not state the purpose for which the valuation is to be made.

The railroads claim that the Interstate Commerce Commission must find as the value of their property, the cost of today reproducing that property new entirely, irrespective of what the property may have originally cost when it was first constructed, or the extent to which the property may have been depreciated by wear or tear since it was originally constructed. The California Commission says that the United States Supreme Court directly refutes the claim of the carriers, and holds that while the estimated cost of reproducing certain of the property—not lands—may be useful in finding the value of such property, it is but one of a number of elements, such as original cost, depreciation, etc., which must be considered.

The California Commission points out that the Valuation Act requires the Interstate Commerce Commission to determine the original cost of the railroad properties and reference is made to a number of valuations made by the California Commission in which the original cost of the property valued was found and used in fixing the valuation.

The California Commission discusses the "reproduction new" theory of the carriers and says:

"The carriers are apparently seeking to create the impression that reproduction cost new is the only element of any significance to be considered in ascertaining the fair value of railroad property for any purpose, if not indeed, the ultimate fact of value itself. This is entirely without justification either in authority or in the every day estimates of business life with reference to utility properties. The emphasis laid on the reproduction cost theory is due to the fact that if this theory alone is applied, it will generally result in a higher value than from the consideration of any other element referred to by the Supreme Court of the

United States. In many cases the application of the reproduction cost theory would have produced results outrageously unjust and unfair to the public.

"The basis of the reproduction cost theory, as applied to a public utility, is that the property of the public utility is worth what it would cost to reproduce it, for the reason that it is assumed that any intending competitor, either private or public, would be compelled to pay this much before he could produce a property of similar character with the same amount of business. The difficulty with this theory is primarily that it rests on the false analogies of competitive business and ignores the fact that public utilities are generally more or less monopolistic in character, and that the legal principles applicable to the regulation of monopolies are entirely different from the principles in ordinary competitive business.

"The entire theory underlying the regulation of monopolies is that by reason of the fact that they have the power to do great injury to the public, by reason of the absence of competition, the government refuses to permit them to earn a portion of the profits which they would earn if unregulated. In the interest of equity and fair play, and acting under the police power in the interest of the general welfare, the government, in limiting the earnings of public utilities and thus diminishing the value of their property in a commercial sense, just as clearly takes value away and destroys value as would be the case if the government should appropriate a part of the utilities' physical property. Nevertheless it has been recognized in England since the days of William and Mary and in this country for long that the government clearly has this power with reference to public utilities. In the exercise of this power, the agencies of government are charged with the duty, not primarily of permitting a return on what it would cost to reproduce a certain property, but of establishing rates which shall be fair, just and reasonable."

A number of concrete illustrations from the experience of the California Commission are then recited to show that in many instances the estimated cost of reproducing new the property of the utility is so high that the utility at it will not produce a profit for

(Continued on Page 1, Col. 1)

## Railroad Commission News.

The United Railroads of San Francisco has filed with the Railroad Commission an application for authority to issue \$1,800,000 6 per cent two year promissory notes, and also an application to issue \$2,250,000 5 per cent gold bonds, the bonds as security for the notes. The proceeds of the notes are to discharge \$1,800,000 of the 6 per cent bonds of the Market Street Cable Railway Company. These bonds were issued in 1882, and they totaled \$3,000,000. Of this amount \$1,200,000 has been paid off. The application says that the holders of the remaining \$1,800,000 require payment by December 15, 1915. The United Railroads of San Francisco and the Market Street Cable Railway Company seek to postpone this payment until October 15, 1916, and say that it will be impossible so to do unless provision is made for the payment of the overdue bonds before October 15, 1916. For these reasons they ask for the note issue and the new issue of bonds to secure the note.

The Great Western Power Company of California, which has its headquarters in San Francisco, has filed with the Railroad Commission an application for authority to issue to the Western Power Company 274,986 shares of its common stock, of the par value of \$27,498,500 in exchange for a like number of shares of the Great Western Power Company of a similar par value, which is all the stock of the latter company, except directors' qualifying shares.

The Great Western Power Company of California also asks permission to issue and sell to the Western Power Company all or part of \$5,000,000 face value of its 10 year 6 per cent convertible gold debentures at 91 per cent of the face amount and accrued interest.

The application is signed by Mortimer Fleishacker, president of the Great Western Power Company of California, and by Guy C. Earl and Chaffee E. Hall, attorneys for the company. It recites that the company has an authorized capital of \$60,000,000, divided into 600,000 shares of the par value of \$100 each. Three hundred thousand shares are preferred and 300,000 common stock. The preferred stock is non-assessable and bears interest at 7 per cent. The company sells electricity and steam in Plumas, Butte, Sutter, Yuba, Sacramento, Solano, Napa, Sonoma, Contra Costa and Alameda counties, in San Francisco and elsewhere. Its plant includes a storage reservoir at Big Meadows, Plumas County, with more than 250,000 acre feet capacity, a hydroelectric generating plant at Big Bend, Butte County, with an installment of 70,000 horse power, and 800 miles of distributing lines.

The Great Western Power Company of California was organized on November 23, 1915, to acquire the properties and securities of a part or all

of the corporations comprising what is known as the Great Western Power System. The corporations in the system are: The Western Power Company, the Great Western Power Company, the City Electric Company, the California Electric Generating Company, the United Light and Power Company of New Jersey, and the United Light and Power Company of California, the Central Oakland Light and Power Company, the Equitable Light and Power Company, the Southside Light and Power Company, and the Consolidated Electric Company.

The relations existing between the above companies are as follows:

The Western Power Company owns all the capital stock, except directors' shares, of the Great Western Power Company; the Great Western Power Company owns substantially all of the capital stock of the City Electric Company, all of the capital stock, except directors' shares, of the California Electric Generating Company, and all of the capital stock, except directors' shares, of the Consolidated Electric Company.

The Consolidated Electric Company owns the controlling stock interest in the United Light and Power Company (of New Jersey), the United Light and Power Company (of California), the Central Oakland Light and Power Company, the Consumers Light and Power Company, the Southside Light and Power Company and the Equitable Light and Power Company.

For the purpose of securing money for the development and extension of its system, the following financial plan has been devised, says the application:

A debenture issue, supported by an agreement, for \$5,000,000 dated November 1, 1915, payable in ten years, at 6 per cent, convertible at par and accrued interest after two years and before five years from date into preferred stock at 95 and accrued dividends, redeemable at 101 and accrued interest at any time, on four weeks' published notice.

Of the \$5,000,000 debentures referred to, \$4,500,000 debentures are to be delivered when required by the Western Power Company during the next year, and \$50,000 are to be taken within the same period on the option of the Western Power Company.

The Great Western Power Company, of California, the applicant, is to buy from the Great Western Power Company \$1,998,000 par value of shares of the City Electric Company, for not less than \$2,000,000 cash, which money is to be lodged with the trustees of the first mortgage of the Great Western Power Company, to be withdrawn to pay for improvements on and additions to the Great Western Power Company's plant. This is all the stock of the City Electric Company except twenty shares.

A general and refunding mortgage is to be secured by direct lien on all

the property of the City Electric Company, subject to its first mortgage, and on all the properties and franchises of the Great Western Power Company of California, and by the deposit of certain first mortgage bonds of the City Electric Company, and the Great Western Power Company, which are treasury assets of those companies.

The aggregate amount of bonds to be issued under the general and refunding mortgage is to be unlimited, or not more than \$150,000,000. These bonds are to run for not less than 30 years at 6 per cent.

The Western Power Company has agreed with E. H. Rollins & Sons, and W. P. Bonbright & Company, to sell them all the \$4,500,000 of debentures to be acquired by the Western Power Company, at 96 per cent, except debentures bought by the Western Power Company and Western Power Corporation stockholders at the same figures. These two banking firms also agreed to sell to the Western Power Company \$500,000 of the first mortgage bonds of the City Electric Company at 90 per cent.

The plan is stated in the application in much more detail, but the above are its main features.

The Atchison, Topeka and Santa Fe Railway Company has filed with the Railroad Commission a petition for postponement of the effective date of the Commission's order directing the company to build its lines so as to connect the gap between Temecula, Riverside County, and Oceanside, San Diego County. The company says that it is preparing a petition to the Supreme Court of California for a writ of review of the Commission's decision, and will present it about December 15. The order of the Commission, dated September 17, 1915, was that the railroad should within 90 days, or by December 17, 1915, present to the Commission plans for a direct connecting line standard gauge railroad between Oceanside and Temecula, either by means of the present existing line between Oceanside and Fallbrook, and thence by way of Fallbrook and Temecula Canyon, or by means of Rainbow Valley, the second route tapping an undeveloped section containing valleys of 10,000 acres and more. The Commission recommended Rainbow Valley route. The Commission required that the line be completed within a year after approval of the plan.

The State of California, by the Department of Engineering, has filed with the Railroad Commission an application for authority to build a State highway over the tracks of the Central Pacific Railway Company and Southern Pacific Company, six hundred feet north of the crossing of the Oakland-San Jose road, at Milpitas, Santa Clara County.

# The Duplex Process of Steel Manufacture.

By F. F. Lines, Maryland Steel Company, Sparrow's Point, Maryland.

The Duplex Process, in a broad sense, consists of a combination of any two processes. As generally employed in the steel industry it is a combination of the acid Bessemer and the basic open-hearth processes. The acid converter oxidizes the silicon, together with the manganese and a certain portion of the carbon, the exact amount depending upon the practice. The blown metal is then transferred to the basic open-hearth furnace where the phosphorus and the remainder of the carbon is removed.

The Duplex Process shortens the open-hearth purification by more than five-sixths of the usual period, giving a steel of the same quality as the straight open-hearth process.

There are two general methods of operation: In the first method the charge is desilicized and partially decarbonized in the Bessemer, the remainder of the carbon and the phosphorus being eliminated in the open-hearth furnace. On account of the difficulty in regulating the carbon in the blown metal, this method is not desirable where the amount of phosphorus or other impurities is so low that the duration of the subsequent open-hearth process is determined by the time required to adjust the carbon to the specification limits. In the second method, the charge is desilicized and the carbon blown down to about 0.10%. The exact amount of carbon desired in the blown metal is obtained by a pig iron addition, made either in the transfer ladle or in the open-hearth furnace, the carbon protecting the metal from excessive oxidation, while the phosphorus is being worked down. This method commands itself on account of the regularity of the carbon content of the metal going into the open-hearth furnace.

The number of blows required for one duplex heat or one complete open-hearth charge depends on the relative capacities of the converters and the open-hearth furnaces. The usual ratio met with in duplex operation is one to three—three twenty-ton converters supplying sixty-ton open-hearth furnaces with metal, if the three converters are blown at the same time, which is the most efficient method, and the metal assembled in one transfer ladle for removal to the open hearth. Such a Bessemer plant can keep four or five open-hearth furnaces in continuous operation. This is due to the difference in time required by the Bessemer and open-hearth purifications, the former requiring from 15 to 20 minutes, while the latter average from 90 to 110 minutes.

In practice, pig iron is poured into the converters, the blast turned on, and the heats blown, until in the judgment of the blower the metal is of the

desired carbon content. In the case of high phosphorus iron, the blow is stopped when the metal contains, approximately, 1.00% carbon; while if the phosphorus is low, the metal is nearly decarbonized. In either case the blown metal together with two or three percent of lime, to give a basic slag, is charged into an open-hearth furnace; if the metal has been decarbonized, 10% of molten pig iron is added, either in the transfer ladle or in the open-hearth furnace. After the metal is in the furnace an action takes place, the phosphorus oxidizes and enters the slag as phosphate of lime, while the carbon is removed as carbon dioxide. When the phosphorus is within the specified limits, as determined by a rapid laboratory analysis, the heat is tapped and the proper additions for the required manganese and carbon content are made in the steel ladle.

When tapping heats from the open hearth, they may be caught "coming down," or recarburized in the steel ladle. In the first case, the metal is tapped when the carbon content of the bath is within the limits of the specifications of the finished steel, and the manganese in the form of ferro manganese is added in the steel ladle. The disadvantage of the method is that the time required to determine the carbon in the sample is of such duration that by the time the results are known, the metal in the furnace has not the composition it had when the test was taken; and since the carbon does not drop uniformly, heats are tapped from time to time that do not come within the prescribed limits. When the steel is recarburized in the ladle, the heat is not tapped until it is below 0.20% carbon. In this case, molten spiegeleisen, together with enough iron to give the correct manganese carbon content in the steel, is poured into the ladle as the heat is run out of the furnace. This method has been found to give the most uniform carbon results in the finished steel.

The loss in the duplex process is greater than that in the straight open-hearth process, but this is largely due to the elimination of carbon, silicon, etc., in the converter, whereas the scrap in the ordinary open-hearth process has already withstood such a loss in its original conversion. To satisfy the slag in the Bessemer conversion, two per cent of metallic iron is oxidized in the converter; this together with a small loss in "shot" and "spittings" are the only losses sustained in the duplex process not common to both processes, working with the same materials.

## Mr. City Official:

A proposal ad in the "Building and Engineering News" will bring you inquiries and real competition on your public work! That's what you want!

## CALIFORNIA RAILROAD COMMISSION OPPOSES RAILROAD VALUATION IDEA.

(Continued from Page 5.)

rates based upon such an exorbitant valuation.

The injustice of the "reproduction new" theory, from the public point of view, is pointed out in the brief of the California Commission is most apparent when applied to lands. The railroads contended that in finding the value of the lands owned by them the Interstate Commerce Commission must imagine that the railroad is not in existence, but that the value of the surrounding property due to the railroad having been built does exist. The Interstate Commerce Commission is asked to assume that the carriers go into the market today to acquire land at its present value to build their railroads, and to this value they add a number of additional costs for damages to surrounding property, cost of condemning the property, etc.

The brief of the California Commission also discusses the intangible values demanded by the railroads, such as franchises, going-concern and other values difficult to estimate but upon which the railroads place a remarkable figure.

## NEW BOOK ON IRRIGATION PRACTICE.

Bernard A. Etcheverry, associate professor of irrigation engineering in the University of California, has just published the first of what is to be a series of three volumes on "Irrigation Practice and Engineering."

He discloses the fundamentals of the distribution of moisture in the soil and the influence of the character of the soil upon the availability of water for plant use, illustrating by diagrams the percolation of water. He expounds the problems of the duty of water and the wastefulness and harmfulness of excessive irrigation, discusses the question of how frequently water ought to be applied, and presents a wide range of data concerning the relations of area of land surface and quantity of water used. Other subjects discussed are the preparation of land for irrigation, methods of distributing water, and pumping problems and costs.

The subject of which this book treats is still in the making," says Professor F. H. Newell, head of the civil engineering department of the University of Illinois, in a commendatory review of Professor Etcheverry's book in the Engineering Record of October 9th, "and the book presents clearly our present state of knowledge of rapidly evolving phase of engineering and agricultural development."

\*A paper presented at the International Engineering Congress, San Francisco, 1915.

## Items Of Interest.

By George Nelson, C. E.

### SUTTER IS FAST IMPROVING ALL COUNTY ROADS.

That Sutter County is fast developing a road system which will have few equals in the State is manifested by the figures just announced showing the expenditures for the last two fiscal years in road building and improvements. In all the Supervisors have expended \$217,439 in the construction of new roads and bridges.

During the fiscal year ending in July, 1914, the sum of \$18,921.46 was expended and during the fiscal year ending July, 1915, about the same sum, or \$18,513.46. During the current fiscal year it is believed that a still greater sum will be expended, this to include the construction of a road near Nicolaus and a bridge across the Feather River at that point.

Included in the expenditures for the past two fiscal years is an item of \$68,000 which was to pay for the construction of the Butte Slough bridge. Another item is for \$15,000 which was spent in payment on the Meridian bridge.

A good road through the Sutter Buttes, another through Meridian and at other points in the county have been laid.

### GOOD HIGHWAY WORK BOOSTED BY ROAD MEET.

A great deal of important good roads work and development will probably result from the recent Pan-American Road Congress, which was held at San Francisco and Oakland.

As a direct result of this congress representatives of the American Road Builders' Association, the American Highway Association, the Pacific Highway Association and the Tri-State Highway Association are now working throughout the country on the question of improving highways and roads, and in no part of the country will there be greater results from this work than along the Pacific Coast.

Almost every State in the Union has under extensive State-wide plans, district, county and city road improvements for its principal object. The Pacific Highway Association for the last four years has been energetically at work for highways from Canada to Mexico, and so the Tri-State Good Roads Association, organized in 1913, is continually in the field working for the construction of better roads, and especially for the building of lateral roads to and from the markets and main highways now under construction in the three States.

According to George E. Roos, secretary of the Tri-State Good Roads Association, one of the primal objects of this association is to assist county, commercial, municipal and district corporations by promotion, exploitation and publicity; furnishing statistics regarding lateral road developments

and by other legitimate means bringing about the construction of lateral or link highways connecting and intersecting both main and trunk railways in California, Oregon and Washington.

There are a number of highly efficient highway and good roads associations with a purpose centered upon specified localities. These are properly recognized as the advocates of the main and trunk highways. On the Pacific Coast there are four of the main highways contemplated, which are all important to Washington, Oregon and California. They are known as the Pacific Highway, extending north and south through the States of Washington, Oregon and California; the Northern Highway, extending east and west from the Northeastern States intersecting the Pacific Highway at Seattle and Portland over the Columbia Highway; the Lincoln Highway, extending east and west from the Middle States intersecting the Pacific Highway at San Francisco, Cal.; and the Southern Highway, extending from the Southern States, intersecting the Pacific Highway at Los Angeles and San Diego, Cal.

### 2,130 FEET OF JETTY AT EUREKA COMPLETED.

The north jetty is now 2,130 feet long and when completed will be in the neighborhood of 3,200 feet in actual length, leaving 3,070 feet to be completed.

At present only about 60 per cent of the rock ordinarily delivered to the jetty is now being received due to the unusually heavy weather which holds back work at the quarry materially.

Work at the Jetty is necessarily proceeding slow, the end of the Jetty now being in deep water nearly opposite the foremast of the old Corona wreck.

George H. Whittemore is engineer in charge of the construction work at the Jetty.

### ROAD FROM CHICO TO TEHAMA COUNTY LINE NOW READY FOR TRAFFIC.

The eleven-mile unit of State Highway, part of the route between Chico and the Butte-Tehama County line, built at a cost of \$60,000, has been opened to traffic with the completion of the bridge spanning Campbell Creek, one-half mile south of the boundary line.

The bridge is forty feet in length and constructed of concrete and steel at a cost of approximately \$4,000.

County Surveyor Martin C. Polk announces six bridges on the State Highway are completed and two are under construction. The bridge across Edgar Slough, south of Chico, and the Durham bridge have been completed and are open to travel. All are constructed of concrete and steel.

### SANTA BARBARA COUNTY HIGHWAY BRIDGE PLANS RAPIDLY BEING COMPLETED.

Of the 22 bridges to be built along the State Highway through this county, two are now actually under way and designs for eight others are out.

The work is going along as rapidly as bridge designers can turn out the completed plans. Work of making test holes and getting the data for contour maps for the bridges at Zaca and Nojogui canyons is in charge of U. S. Grant, topographer.

Contractor C. H. Hudson has this stretch of the State Highway to build.

W. M. Thomas has the contract for designing the overhead crossing at Bell canyon, the bridge at El Capitan and two bridges in Gaviota canyon, south of the gorge.

Mayberry, Parker & Johnson are designing the bridges in Corral canyon, Tojaquas and Quemada and at Sheep Camp.

### SUTTER COUNTY GRAND JURY REPORT ON ROADS AND RECLAMATION.

The grand jury of Sutter County has filed its report in the Superior Court and was dismissed by Judge Mahon.

The report says there is much room for improvement in the county roads and urges more zeal on the part of the Board of Supervisors along this line. The grand jury wishes to go on record against taking the roads out of the hands of the Supervisors and giving them in charge of a State Engineer.

The report included the following resolutions:

"We, the Grand Jurors of Sutter County, most heartily approve and commend the action of the Board of Supervisors and other county officers in protecting the interests of the people of Sutter County against threatened injury from proposed reclamation work.

"Said reclamation work, in our opinion, if allowed to be constructed as is now proposed and as authorized by the State Reclamation Board, will seriously endanger a large portion of the property of Sutter County and make the problem of flood control vastly more difficult and ultimately will result in ruin, not only to the higher land, but also to the land sought to be reclaimed.

"Sutter County has spent thousands of dollars and many years in establishing the principle, 'So use your own property as not to injure that of another.' Let it be maintained at whatever cost."

George William Tillson, President American Road Builders' Association and consulting engineer borough of Brooklyn, inspected the highways of Southern California on his recent visit.

# EL DORADO COUNTY SUPERVISORS SUED BY TAXPAYERS.

The complaint states that the Supervisors were first petitioned to erect the bridge across the American River at Coloma, at the old bridge site, connecting Old Coloma with North Coloma. Engineers submitted plans, which plans were accepted. Last July the Board advertised for bids, six being received. The lowest, it is alleged, was rejected, and the higher bid of Blumaxe & Company accepted, later a contract being entered into which was not in accordance with the specifications adopted.

The Supervisors, it is alleged, after directing Blumaxe & Company to proceed with the work, agreed to pay the contractor extra remuneration for all excavations carried deeper than the bedrock line, as shown in the original plans and specifications, although this substantial benefit was not offered in the specifications.

It is alleged that after construction work was begun, it was stopped and that afterward work was recommenced at a site more than a quarter of a mile up the river from the first site. This change, says the complaint, was made at the instance of a majority of the Supervisors without a meeting, records or writing. The new site, concludes the document, is not a county road.

# OAKLAND HARBOR AND MUNICIPAL WORKS.

Area in square feet and berthing space, the first figures being square feet and the second berthing space:

Western waterfront (apron wharf No. 1), 62,634 square feet, 949 feet berthing space; (apron wharf No. 2), 71,082; 1077; (apron wharf No. 3), 19,866; 301.

Quay wall, 291,036; 1928.  
Clay street wharf, 12,474; 342.  
Rideout wharf, 35,177; 564.  
Taylor wharf, 11,242; 528.  
Franklin street wharf, 26,560; 690.  
Webster street wharf, 18,466; 460.  
Livingston street wharf, 36,580; 695.  
Cost of quay wall to date, \$500,909.  
Cost of Key Route basin, \$700,766.  
Cost of Livingston street wharf, \$153,905.83.

Cost of Franklin street wharf, \$8,567.57.  
Cost of Clay street wharf, \$3,489.06.  
Harbor revenues in 1914 averaged \$1,900 a month.  
Harbor revenues so far in 1915 averaged \$3,400 a month.

Government expended on inner harbor channel, to date, \$4,500,000.

Available wharf frontage on both sides of inner harbor, 48,820 feet; 35 per cent occupied.

# BASSANO DAM FINISHED.

The water flowing from the Canadian Pacific's plant at Bassano, 83 miles east of Calgary, Alberta, through irrigation ditches, waters three million acres of now highly fertile land. The face of the southern half of Alberta, a great Canadian province, has been changed.

The enterprise, which was under way three years, was practically completed with the finishing of the great dam across the Bow River at Bassano in the Province of Alberta. Only one other similar undertaking in North America approaches it in extent—that is the

Roosevelt Dam and irrigation project in Arizona. Only one other work of the kind in the world is bigger—that is the great Assouan Dam in Lower Egypt.

In the Canadian work 3,000 men have been laboring constantly for three years. Steam shovels, concrete mixers, 2,000 teams, engineers and hundreds of freight cars for supplies and material have been employed.

Altogether more than \$17,000,000 has been spent to turn the territory into a

There are over 5,000 miles of ditches, rich agricultural district.

# SURVEY FOR SACRAMENTO TO SAN FRANCISCO CANAL STARTED.

SACRAMENTO, CAL.—Surveyors have begun preliminary work on the proposed canal between Sacramento and San Francisco. The canal will cost about \$1,000,000.

Funds for the preliminary work was provided by the last legislature. It is proposed to run it along the east side of the Sacramento river. It will be fed with tide-water.

# PAVING COMPANY DISSOLVES PART- NERSHIP.

MODESTO, Stanislaus Co., Cal.—The Modesto Herald says a division of the Worswick Construction Company and the formation of two paving companies with separate scenes of operation was announced recently by the members of the two concerns, the explanation being given that the arrangement was made to suit the best interests of all interested.

The change involves the withdrawal of J. C. Worswick from the Worswick Construction Company; a partnership between J. C. Worswick and Z. E. Drake in a paving company to be known as the Central Valley Paving Company, and the removal of the headquarters of the Worswick Construction Company to Los Banos, in Merced county.

The personnel of the Worswick company, with the retiring of J. C. Worswick, will be W. H. Worswick Jr., Z. E. Drake and Harold Johnston.

# SANTA ROSA PAVING IN COURT.

At a short special session of the City Council held with the Mayor and all members in attendance, the certified check of the City Street Improvement Company accompanying the bid for completing the Santa Rosa avenue paving was ordered returned, as the company had submitted its contract and bonds to do the work as required by law and they had not been accepted by the Mayor.

The work is now to be held in abeyance until the courts pass upon the matter in the mandamus proceedings instituted by the paving company to compel the Mayor to sign the contract and accept the bond.

David Schenck Jacobus of New York was elected president of the American Society of Mechanical Engineers at the opening session of its 36th annual meeting held in New York City December 7th. Dr. Jacobus is a recognized authority on steam engineering.

# PERSONAL.

I. B. Funk, of Los Angeles, consulting engineer for the city of Holtville, has been in that city looking after the city water works with a view of eliminating, to some extent, the hardness of the water which seems to prevail at this time of the year.

Asa G. Proctor, County Surveyor, and Oscar Dingle have organized an engineering partnership, the firm name to be "Proctor & Dingle." The firm will attempt the scientific and efficient management of all civil, hydraulic and landscape engineering problems. That the partnership will succeed is best forecasted by the reputation and record of the parties.

Proctor and Dingle both received their technical training in the Department of Civil Engineering at Stanford University. Proctor with the class of 1907 and Dingle with the 1912 class.

Dingle belongs to the Civil Engineering Society of Stanford University, and Proctor has recently been elected to associate membership in the American Society of Civil Engineers.

Proctor, who is the present County Surveyor, has been in active practice as a civil engineer since January, 1908, and has done a great deal of work in this and adjoining counties, and was city engineer of Woodland for the four years last past.

Dingle belongs to the Civil Engineering civil engineer for the last four years. He has been employed in the office of the State Architect as draftsman, and was a member of the engineering staff of the Yolo Water and Power Co. for two years, and for the last nine months has been associated with the County Surveyor.

H. M. Wood, a building contractor well known in the bay cities, attracted by the developments now in progress in this city, has decided to make Martinez his future base of operations, and has taken offices with J. H. T. Mahenne, the realty operator, next door to the Standard office.

W. F. Brye, the man selected to fill the position as chief operator for the Patterson Water Company, made vacant by the resignation of H. L. Michael, arrived in Patterson last week, and is now familiarizing himself with the duties of his new job.

Mr. Brye has had considerable experience in engineering work, and no doubt will have no difficulty in handling the work here. He is a native of California and graduated at Cornell in 1912. Before returning to this State he was connected with United Steel Company of Chicago. For the last half year he has been in the employment of the California Hydraulic Engineering & Supply Company of San Francisco, which position he resigned to take the one offered him here.

George H. Magill, surveyor and paving contractor, died suddenly last week at his home at Santa Ana, Orange County, of heart disease, from which he had been a sufferer. Magill had just finished a \$100,000 paving contract at Pomona.

# Technical Societies.

## SAN FRANCISCO ASSOCIATION OF MEMBERS OF THE AMERICAN SOCIETY OF CIVIL ENGINEERS.

### Officers for 1915.

President—A. M. Hunt.  
Vice-Presidents—H. L. Haehl, M. C. Couchot.

Secretary—E. T. Thurston, Jr.  
Treasurer—P. E. Harroun.  
Board of Directors—M. C. Couchot, H. L. Haehl, A. M. Hunt, P. E. Harroun, E. T. Thurston, Jr., C. H. Snyder, C. B. Wing.

Weekly luncheons in College Room, Hoffbrau Cafe, Wednesdays at 12:30. Engineers welcome; Informal; no program.

Regular meetings are held bi-monthly at such time and place as may be appointed by the board of directors. The established custom is to meet on the third Fridays of February, April, June, August, October and December.

Address E. T. Thurston, Secretary, 513 Mechanics' Institute Bldg., Post street, San Francisco.

## SAN FRANCISCO CHAPTER AMERICAN INSTITUTE OF ARCHITECTS. 233 Post Street.

President—W. B. Faville.  
Vice-President—Edgar A. Matthews.  
Sec.-Treas.—Sylvain Schnaittacher.  
Trustees—James W. Reid and Henry Schulze.

Monthly meeting the third Thursday.

## STATE BOARD OF ARCHITECTS.

### Northern District.

John Bakewell, President.  
Sylvain Schnaittacher, Sec.-Treas.  
Joseph C. Newsom, Edgar Matthews,  
One vacancy.

## LOS ANGELES AND SOUTHERN CALIFORNIA.

## AMER. SOC. OF CIVIL ENGINEERS. So. Calif. Association of Members.

President.....Chas. T. Leeds  
First Vice-President.....Geo. S. Binckley  
Second Vice-President.....H. Hawgood  
Treasurer.....Chas. H. Lee  
Meetings bi-monthly. Address all communications to W. K. Barnard, Secretary, 761 Central Bldg., Los Angeles.

## AMERICAN INSTITUTE ELECTRICIANS—Los Angeles Section.

Chairman.....E. R. Northmore  
Secretary.....C. G. Pyle  
Asst. Secretary.....Edward Woodbury  
EXECUTIVE COMMITTEE—J. A. Lighthipe, J. E. Barker, Geo. A. Damon, A. W. Nye.

Regular meetings third Tuesday in each month. Address all communications to C. G. Pyle, Secretary, Standard Underground Cable Co., 914 Hibernian Bldg., Los Angeles.

## ENGINEERS AND ARCHITECTS' ASSOCIATION OF SOUTHERN CALIFORNIA.

President.....Samuel Storrow  
Vice-President.....A. H. Koebig  
Second Vice-President.....W. A. E. Noble  
Sec.-Treas.....H. Z. Osborne, Jr.

DIRECTORS—Arthur S. Bent, J. J. Backus, A. C. Martin, Kenneth Shibley.  
Regular monthly meetings as arranged by program committee. Address all communications to H. Z. Osborne, Jr., Secretary, care City Engineer's Office, Los Angeles.

## AMERICAN INSTITUTE OF ARCHITECTS—SOUTHERN CALIFORNIA CHAPTER.

President.....S. Tilden Norton  
Vice-President.....J. E. Allison  
Secretary.....Fernand Parmentier  
Treasurer.....August Wackerbarth

DIRECTORS—J. J. Blicke, J. J. Backus and Robert D. Farquhar, for the 1, 2 and 3 year terms respectively.

Regular meetings second Tuesday evening each month. Address all communications to A. R. Walker, Acting Secretary, 1403 Hibernian Building.

## AMER. SOC. OF MECHANICAL ENGINEERS—Los Angeles Section.

Chairman.....Walter H. Adams  
Secretary.....Ford W. Harris  
EXECUTIVE COMMITTEE—W. H. Adams, Ford W. Harris, O. J. Root, W. W. Smith, Paul Weeks.

Address all communications to Ford W. Harris, 1029 Higgins Bldg., Los Angeles.

## STATE BOARD OF ARCHITECTURE, SOUTHERN DISTRICT.

President.....J. P. Krempel, L. A. Secretary.....F. L. Roehrig, L. A. Member.....Octavius Morgan, L. A. Member.....S. P. Hunt, L. A. Member.....W. S. Hebbard, San Diego.  
Address all communications to Fred'k L. Roehrig, Secretary, 721 American Bank Bldg., Los Angeles.

## BUILDERS EXCHANGE OF LOS ANGELES.

President.....John H. Bean  
First Vice-President.....P. J. Bolln  
Second Vice-President.....S. L. Weaver  
Third Vice-President.....M. A. Berne  
Treasurer.....John Griffin  
Secretary.....J. T. Campbell  
DIRECTORS—A. J. Crawford, Wm. McArthur, J. J. O'Connor, W. R. Simons, C. V. Fowler, J. Burnstein, J. H. Judy, W. E. Stradley, L. B. Webster, E. Waymon.

## PACIFIC COAST SOCIETY OF ENGINEERING CONTRACTORS.

President.....Geo. F. Pennebaker  
Vice-President.....W. A. Russell  
Secretary-Treasurer.....F. C. Ayars  
DIRECTORS—Geo. F. Pennebaker, W. A. Russell, W. W. Brier, Geo. A. Rogers, L. S. Atkinson, Wm. Ledbetter, L. G. Garnsey, F. A. Hudson, F. H. Stout, C. L. Hyde, F. C. Ayars.

Address all communications to Frank C. Ayars, Secretary, 505-6 Douglas Bldg., Los Angeles.

## SAN DIEGO ARCHITECTURAL ASSOCIATION.

President.....J. B. Lyman  
Vice-President.....Charles Cressy  
Secretary.....Robt. Halley, Jr.  
Treasurer.....G. A. Hansen  
Monthly luncheon at Rudder's first Monday each month. Address all communications to Robt. Halley, Jr., 314 Union Bldg., San Diego.

## BUILDERS ASSOCIATION OF SAN DIEGO—Second Floor K. of P. Bldg., Corner Third and E Streets, San Diego.

President.....Wm. R. Weckerly  
Vice-President.....Chas. Kelly  
Treasurer.....Max Winter  
Secretary.....D. J. Miller  
DIRECTORS—Wm. R. Weckerly, Chas. Kelly, Max Winter, D. J. Miller, Robt. Houghton, H. V. Wenger, R. M. Gilson.

Address all communication to D. J. Miller, Secretary, Builders' Association, Second Floor, K. of P. Bldg. San Diego.

## NOTICE OF MEETING OF SOCIETY OF CIVIL ENGINEERS.

The regular bi-monthly meeting of the Association will be held Friday evening, December 17th, 1915, at the Palace Hotel. Dinner will be served promptly at 6 o'clock in the University Room.

This will be the regular annual meeting of the Association, and it will be in order to elect a President for the ensuing year and a Vice-President to succeed Mr. H. L. Haehl, terms expired. Official reports for the past year will be presented at this meeting.

Mr. H. L. Haehl, M. Am. Soc. C. E., will address the meeting briefly on "Water-right Litigation in the Santa Clara Valley," with special reference to the decision of the Supreme Court of California in the case of Miller vs. Bay Cities Water Co., and the more recent decision of the Superior Court in the case of Hayes vs. Bay Cities Water Co., defining the rights of users of underground water as opposed to the rights of appropriators of surface waters.

### Directors' Meeting.

Preliminary to the general meeting, a meeting of the Board of Directors will be held at 5 o'clock in the office of the Secretary.

### Special Notice.

The constitution and list of members for 1916 will go to press shortly after the December meeting. Members will therefore please notify the Secretary promptly of any changes they desire made from the list as it stands, will therefore please notify the Secretaries.

A. M. HUNT,  
E. T. THURSTON, President.  
Secretary.

## APARTMENT HOUSES

**SAN FRANCISCO**—Apartment house, 6 story and base, steel and brick. Cost not stated. Architects, Rousseau & Rousseau, 110 Sutter street, S. F. Owners, Theo. and Clara Rulfs. Location, northeast corner of Sutter and Jones streets, covering an area of 68 feet 9 inches by 95 feet. Will contain four stores on the first floor besides the lobby and entrance. Upper floors a total of 55 rooms arranged in two and three room apartments. Interior finish pine and hardwood with imported tapestries. Bath rooms tile. Steam heat, automatic elevator, hot water system, oil burning equipment and vacuum cleaning. Marble and tile wainscot. Complete steel frame. Exterior faced with terra cotta. Plans complete and figures being taken.

**PORTLAND, ORE**—Apartment house, 2 story and base, brick and hollow tile, \$25,000. Architect, E. C. Wegman, 205 Wheller street, Portland. Owner, Dr. H. F. Ong, Oregonian Bldg. Location, Clay street, Broadway and Park. Will contain 20 apartments with bath and kitchen. Interior finish pine and hardwood with some hardwood floors. Steam heat and a hot water system. Bath rooms tile. Exterior faced with pressed brick. Plans being completed.

**SAN FRANCISCO**—Apartment house, 3 story and base, Class C construction, \$50,000. Architect, Milton Lichtenstein, 111 Ellis street, S. F. Owner's name withheld. Location, Fifty Vara District. Will contain a number of two and three room apartments equipped with all the latest conveniences. Interior finish pine and hardwood with some white enamel. Hardwood floors. Steam heat, automatic elevator, hot water supply and vacuum cleaning. Bath rooms finished in tile. Marble and tile wainscot. Exterior faced with pressed brick trimmed with terra cotta. Plans being prepared.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$12,000. Architect, D. J. Patterson, 16 Kearny street, S. F. Owner's name withheld. Location, Broadway near Fillmore. Will contain a number of two, three and four room apartments with wall beds and private baths. Interior finish pine and elm panels. Some hardwood floors. Steam heat and a hot water system. Bath rooms tile. Exterior covered with cement plaster on metal lath. Plans being prepared.

**SAN FRANCISCO**—Apartment house alteration, 2 story and base, frame, \$8,000. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner, Mrs. P. Planz, 3318 22nd street, S. F. Location, 2518 22nd street. Work will consist of raising the present building and constructing stores on the first floor. Upper two floors will be rearranged for suites of three and four rooms. Interior finish pine and elm panels with some hardwood floors. Open fire places. Wall beds and mod-

ern plumbing will be required. Exterior covered with rustic and cement plaster. Plans being prepared.

**OAKLAND, CAL.**—Apartment house, 2 story and base, frame, \$9,000. Architect, Merrill Newsom, 1748 Broadway, Oakland. Owner's name withheld. Location, 40th and Telegraph. Will contain a total of eight suites of two and three rooms. Interior finish pine and elm panels with some hardwood floors. Open fire places and tile mantel. A hot water system. Bath rooms tile. Marble and tile wainscot. Exterior covered with cement plaster. Plans being prepared.

**OAKLAND, CAL.**—Apartment house, frame, \$9,000. Architect, Merrill Newsom, 1748 Broadway, Oakland. Owner, Mr. Pinefield. Location, 14th avenue and East 14th street. Will contain a total of eight suites of two and three rooms with private baths and wall beds. Interior finish pine and white enamel with some elm panels and hardwood floors. Central heating system and hot water supply. Bath room tile. Marble and tile wainscot. Exterior covered with cement plaster on metal lath. Plans complete and figures being taken.

## BATH HOUSES.

**SAN RAFAEL, MARIN CO., CAL.**—Bath house filter. Cost as follows. Architect, none. Owners, City of San Rafael. Two bids were received by the City Council for filters for the municipal baths. The California Jewell Filter Co., Merchants' Exchange Bldg., S. F., offered to deliver in San Rafael a three-unit filter for \$3,450, and a two-unit filter for \$1,924. The latter price included a chloride apparatus valued at \$750. They asked \$600 for installation. The Council could not reconcile the difference in prices for the three-unit and the two-unit filters. The other bid was from Geo. F. Day & Son, 215 Spear street, S. F., for \$4,924 for a three-unit filter, but they were unable to supply the chemical apparatus, nor could they tell the Council what it would cost to install the plant. The matter was referred to the Council as a committee of the whole.

## BONDS.

**SACRAMENTO, CAL.**—The \$1,000,000 bond issue for the construction of a state building in San Francisco will be sold about the middle of next month, according to State Treasurer Richardson.

**BOVILLIE, BUTTE CO., CAL.**—A petition for the formation of the Paradise Irrigation District has been presented to the County Supervisors. It is planned to include in the district 11,000 acres. The construction of two large reservoirs together with other improvements to cost \$150,000 are planned. Action will be taken by the supervisors shortly.

**SALIDA, STANISLAUS CO., CAL.—W. S. Carpenter** of Caruthers is in Salida discussing with farmers the erection of a cheese factory. He has already secured a number willing to render financial aid for the proposed structure. A meeting has been called, when the erection of the building will be considered.

**FRESNO, FRESNO CO., CAL.—The City Engineer** has been instructed to prepare plans and specifications for a storm sewer system and addition to the present sanitary sewer system costing about \$150,000. The question will be put to the people in the shape of a \$500,000 bond issue for this and other improvements.

**BAKERSFIELD, KERN CO., CAL.—The \$66,000 bond issue** for the Conley high school at Taft has been rejected by the purchaser on account of a technical error, necessitating a new election.

**SANTA ANA, ORANGE CO., CAL.—The \$66,000 bond issue** for the new school at Brea in the Randolph School District carried at the election December 4. The school will be commenced shortly.

**HUNTINGTON BEACH, ORANGE CO., CAL.—An election** will be held December 28, 1915, for the purpose of voting on a \$20,000 bond issue for a gas distributing system. It is expected the Southern Counties Gas Co. will bring a natural gas supply to the city from the Fullerton oil fields.

**GLENDALE, LOS ANGELES CO., CAL.—An election** will be held December 20, 1915, to vote bonds in the sum of \$82,000 for municipal improvements, which will include \$12,000 for an automobile pumping engine, new hose and other equipment; and \$17,000 for storm water protection.

**CALEXICO, IMPERIAL CO., CAL.—The \$20,000 bond issue** for the establishment of a public park or civic center carried at the recent election. It is expected that various civic buildings will secure sites in the new park. The Carnegie Library, the Woman's Improvement Club, and several fraternal organizations are planning to erect buildings on the property.

**RED BLUFF, TEHAMA CO., CAL.—Fifteen bids** were received by the County Supervisors for the \$90,000 school bonds. The purchase was awarded to the N. W. Halsey Company at a premium of \$5,913.30.

**PORTERVILLE, TULARE CO., CAL.—Property owners** of Porterville, against whose holdings have been issued payings bonds to the total value of approximately \$125,000, will resist the payment of the bonds on the ground that the construction was not in accordance with the plans and specifications adopted by the city. The work was done by the Federal Construction Company of San Francisco. Action was precipitated when the company filed for record the first assessments due under the terms of the bonds, which are serial, run for nine years, and if they become a valid obligation are a first lien against property contiguous to the paving.

**SEATTLE, WASH.—Bonds of \$750,000** were voted last week for school improvements. Plans for the various schools to be erected will be ordered on the sale of the bonds.

**BAKERSFIELD, KERN CO., CAL.—Bids** are being taken by the County Supervisors for the purchase of all or any part of the \$500,000 issue of State Highway bonds out of a \$2,500,000 issue. Further information relative to the sale may be had from L. F. Miller, County Clerk.

**WHITTIER, LOS ANGELES CO., CAL.—A proposition** to bond the city for \$100,000 for the purpose of securing a municipal water system has been placed before the Board of Trustees.

**RANDOLPH, ORANGE CO., CAL.—An election** held in the Randolph School District to vote bonds of \$66,000 carried. Plans for the building will be ordered shortly.

**SANTA MONICA, LOS ANGELES CO., CAL.—An election** will be held on December 21st to vote \$172,500 5 per cent water bonds.

**REDWOOD CITY, SAN MATEO CO., CAL.—The County Supervisors** will open bids on December 20th for the purchase of bonds of \$48,000 of the Redwood City Grammar School District and \$20,000 of the San Bruno Park School District. Further information may be had from Jos. H. Nash, County Clerk.

**LOS ANGELES, CAL.—The City Council** has set January 18th for the election on the creation of a bond district in Hollywood and adjacent territory, to vote \$1,920,000 bonds to purchase the Union Hollywood water system and to extend the city water service throughout the territory embraced.

**REEDLEY, BUTTE CO., CAL.—H. Bogigan** has purchased 150 acres of land about three miles east of Reedley and will start improvements immediately. A modern residence is planned among the improvements.

### BRIDGES, DAMS AND HARBOR WORK

**SACRAMENTO, CAL.—Bridge, timber.** Cost not stated. Engineer's name not given. Owners, Central Pacific Railway Co., Sacramento. The Central Pacific Railway Co., a corporation, has filed application with the County Supervisors asking permission to construct, maintain and operate for terminal purposes a wharf on the easterly bank of the Sacramento River, 7-10 of a mile north of Walnut Grove. Bids on this work will be taken by the railroad company when permission has been given.

**FRESNO, FRESNO CO., CAL.—Culverts, reinforced concrete and iron.** Cost not stated. Engineer, City Engineer E. B. Cronkite, Fresno. The City Engineer was instructed at the last meeting of the Council to have constructed two culverts, three feet by one foot, for I and Merced streets, and J and Merced streets. These culverts were recommended by E. W. Risley in a recent protest against flood damage at J and Merced streets.

**SANTA BARBARA, SANTA BARBARA CO., CAL.—Bridges, 12, reinforced concrete, \$150,000.** Engineers, Mayberry & Parker, Pacific Electric Bldg., L. A., and McCurdy Bros. Owners, Santa Barbara County. The County Supervisors at a recent meeting ordered plans and specifications for 13 highway bridges needed on the State Highway. Further mention will be made of this work when bids have been called. Mayberry & Parker, of whom

Fred Johnson is the Santa Barbara representative, will make the plans for six reinforced concrete bridges over Zaca Creek and three between South Zaca and Los Alamos. The other four bridges in the De la Cuesta Canyon will be planned by McCurdy Bros.

**SANTA BARBARA, SANTA BARBARA CO., CAL.—Bridges, steel and reinforced concrete. Cost not stated.** Engineer, County Surveyor, Owen H. O'Neil. Owners, Santa Barbara County. County Surveyor Owen H. O'Neil in a report to the County Supervisors states that designs for the following State Highway bridges have been submitted but have not as yet been approved by the State Highway Commission: Overhead crossing, El Capitán, Corral, Tajiquas, two Gaviota bridges and Sheep Camp. Plans and specifications have been prepared for the following jobs: Fencing through North Gogia, Rhode Island States Corp., Terrado de la Guest and E. S. Cordero properties. The purchase of rock for Santa Maria road and the laying of macadam on the Santa Maria-Guadalupe road. Bids on these improvements will be called for within the next month.

**PORTLAND, ORE.—Viaduct, reinforced concrete, \$66,000.** Engineer, City Engineer, Portland. Owners, City of Portland. Bids will be opened on December 29th for the construction of the reinforced concrete viaduct necessary to complete the Union avenue extension. Plans provide for a structure to be 219½ feet long, 53 feet wide with a 16-foot fill 700 feet in length. The cost of the fill will be \$13,000 and of the viaduct \$53,000.

**HEALDSBURG, SONOMA CO., CAL.—Bridge, reinforced concrete. Cost not stated.** Engineer, City Engineer, Healdsburg. Owners, City of Healdsburg. If the weather will permit the City Trustees will order the construction of a concrete bridge on Piper street, just outside of the city limits. Plans for the proposed structure have been prepared. The present bridge is in a dilapidated condition and must be replaced with a new structure for safety.

**BAKERSFIELD, KERN CO., CAL.—Bridge, timber and concrete, \$484.** Engineer, County Surveyor, Bakersfield Owners, Kern County. Bids received for the construction of a bridge on the Central branch of the Kern Island canal show Currie & Duigar, Bakersfield, low at \$484. Bids have been taken under advisement.

**LONG BEACH, LOS ANGELES CO., CAL.—Bulkhead, reinforced concrete and stone, \$65,000.** Engineer, City Engineer, Long Beach. Owners, City of Long Beach. The City Engineer has been instructed by the City Commission to prepare plans and specifications for the construction of a protection bulkhead along the west beach between Golden avenue and Chestnut Place.

**VENICE, LOS ANGELES CO., CAL.—Pleasure piers, reinforced concrete and timber, \$150,000.** Engineers, Leeds & Barnard, Central Bldg., L. A. Owners, City of Venice. Plans have been submitted for four rock jetties on South Beach, two of which will extend seaward 1,000 feet and two 500 feet. Each jetty will be covered by a pier 30 feet wide and a comfort station built on the outer end of each of the longer ones.

The Board of Trustees and the engineers will decide the pier locations in the next few days. Work is expected to commence about January 1st.

#### Contracts Awarded.

**SACRAMENTO, CAL.**—Bridge, reinforced concrete, \$2,750. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Contractors, Jenkins and Wells, 3520 Y street, Sacramento. Contract price, \$2,750.

**YOLO BY-PASS, YOLO CO., CAL.**—Bridge, steel and concrete, \$24,671. Engineer, State Highway Commission. Forum Bldg., Sacramento. Owners, State of California. Contractors, Security Construction Co., 28th and Alameda streets, L. A. Contract price, \$24,671. Engineer's estimate, \$28,061.13.

**WILLOWS, GLENN CO., CAL.**—Bridge, reinforced concrete, \$1,925. Engineer, County Surveyor, Willows. Owners, Glenn County. Contractors, Teal & Thompson, Orland. Contract price, \$1,925.

#### CHURCHES

**REDDING, SHASTA CO., CAL.**—Church, 1 story and base, reinforced concrete, \$25,000. Architect, John J. Foley, 46 Kearny street, S. F. Owners, Roman Catholic Church. Father Hayes in charge. Will contain main auditorium, Sunday school rooms, study and social rooms. Interior finish pine with ornamental plaster. Steam heat. Art glass windows and marble altar. Exterior faced with cement plaster. Clay tile roof. Plans being prepared.

**MONROVIA, LOS ANGELES CO., CAL.**—Mausoleum, 1 story and base, reinforced concrete and granite, \$40,000. Architect's name not given. Owners, Monrovia Mausoleum Co. Contractors, Davidson Construction Co., 16th and Tennessee streets, L. A. Contract price, \$10,000. Contract does not include marble work or ornamental iron.

#### COURT HOUSES.

**SACRAMENTO, CAL.**—City jail, 4 story and base, reinforced concrete, \$197,426. Architects, Shea and Lofquist, Bankers' Investment Bldg., S. F. Owners, City of Sacramento. The lowest bid submitted for this work came from Howard S. Williams, Hearst Bldg., S. F., at \$197,426. The lowest figure for the special steel work for the jail was that of the Halston Iron Works at \$18,624. A complete list of the bids will be found under the heading of Sacramento, Stockton and Northern California in this issue.

**SAN FRANCISCO.**—City Hall bulletin boards. Cost as follows: Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. The low bid for furnishing bulletin boards in the new City Hall was submitted by the American Art Metal Works as follows: Proposition No. 1, \$3,647, and proposition No. 2, \$3,517. No award has been made as yet. For a complete list of the bids received see San Francisco.

#### FACTORIES AND WAREHOUSES

**MARTINEZ, CONTRA COSTA CO., CAL.**—Oil tanks, steel, \$20,000. Engi-

neer, Engineering Dept. Shell Oil Co., 313 Sansome street, S. F. Owners, Shell Oil Co. Bids have been opened by the Shell Oil Company for 14 oil storage tanks each of 50,000-barrel capacity to be erected in Martinez just north of the Trumbull stills. The bids have been forwarded to Martinez for the approval and recommendation of P. A. L. Engelbrecht, who is in charge of the work. It is stated that the Lacey Mfg. Co. and the Petroleum Iron Works were among the low bidders. At the Trumbull stills the entire top of the hill is being sliced off and a high fill made in the hollow to the northward, and it is upon the high plateau that the tanks are to be built. Over 120,000 yards of earth are to be moved at a cost of over \$10,000 to make room for the tank construction.

#### Contracts Awarded

**COLTON, SAN BERNARDINO CO., CAL.**—Packing plant, 1 story and base, reinforced concrete, \$25,000. Architect, none. Owners, Pacific Fruit Express Co. Contractors, Leonardt & Peck, 11 W. Hillman Bldg., L. A. Contract price, \$25,000.

#### FIRE HOUSES AND JAILS

**SAN FRANCISCO.**—Fire house fixtures, \$115 and \$565. Architects, Ward & Blohme, Alaska Commercial Bldg., S. F. Owners, City and County of San Francisco. Ickelheimer Bros. submitted the lowest bids for furnishing the lighting fixtures for Fire Houses Nos. 5 and 4 at the Wednesday meeting of the Board of Public Works. Contracts have not been awarded. A complete list of the figures will be found under the heading of San Francisco in this issue.

#### FIRE REPORT

**MARICOPA, KERN CO., CAL.**—The building occupied by the West Side Meat Market and owned by J. M. Bush, together with a garage building owned by the Gundlack Shoe Company, were destroyed by fire last week. The loss is estimated at \$10,000, partly covered by insurance.

**LOS ANGELES, CAL.**—The Hauser Packing Company's plant at East Ninth and Mateo streets, has been partially destroyed by fire. The loss is \$12,000.

**SACRAMENTO, CAL.**—Preparations are now being made to rebuild the slaughter house and storage plant of Charles Silva & Co., which was destroyed by fire last week. A considerable amount of machinery was damaged. The loss is \$65,000, on which there was \$35,000 insurance carried.

**PLACERVILLE, EL DORADO CO., CAL.**—Fire starting in the drying room of the Placerville Steam Laundry, a two-story frame building, destroyed the entire building, causing a loss of \$75,000. All machinery in the building was damaged.

#### FLATS

**SAN FRANCISCO.**—Flat alterations, 2 story, frame, \$2,000. Architect, none. Owner, Mrs. B. Kenney, 536 26th avenue, S. F. The work will consist of

adding a two-toy frame residence to modern flats, and will include mill work, carpentry work, plastering, painting, plumbing, electric work and glass and glazing. Plans are complete and the work will be done by Day Labor.

**SAN FRANCISCO.**—Flats, 2 story and base, frame, \$3,000. Architect, none. Owner, J. C. Kirby, 2152A Market street, S. F. Location, east 7th avenue north of Lake. Will contain two flats of five and six rooms. Interior finish pine and elm panels with some white enamel. Hardwood floors. Open fire places and tile mantels. Automatic water heaters. Exterior covered with cement plaster on metal lath. Plans complete and work to be done by Day Labor.

**LOS ANGELES, CAL.**—Flats, 1 and 2-story and base, frame, \$30,000. Architect, W. J. Dodd, Marsh-Strong Bldg., L. A. Owners, W. J. Dodd and associates. Location, Sunset Boulevard near Harvard. Will contain twelve buildings of one-story, four rooms each and a two-story building of sixteen rooms also arranged for modern flats. Interiors finished in pine and hardwood with white enamel. Hardwood floors. Open fire places and tile and brick mantels. Bath rooms tile. Central heating system. Automatic water heaters. Bath rooms tile. Exterior covered with cement plaster. Plans being prepared.

#### La Junta, Colo., Furniture.

The contract for installing furniture in the U. S. post office at La Junta, Colo., has been awarded to the Nelson Co., Brooklyn N. Y., at \$1,286.

#### Idaho Falls, Idaho, Post Office.

In the construction of the U. S. post office at Idaho Falls, Idaho, for which the Sound Construction and Engineering Co., Portland, Ore., has the contract, cabinet and label manufactured by the Trumbull-Vanderpool Electric Mfg. Co. will be used in lieu of the

Agutter-Griswold Co.'s previously approved.

#### Main Canals and Laterals.

The Secretary of the Interior has authorized the Reclamation Service to execute the following contracts for earthwork on the main canals and laterals, Grand Valley irrigation project, Colo.:

Schedules 1 to 8, main canal, Reynolds-Ely Construction Co. of Springfield, Utah, estimated cost, \$28,534.50.

Schedule 9, Henry Wilson, Carl Hicks & H. H. Wilson, Fruita, Colo., \$3,323.50.

Schedule 10, C. S. Kirkendall and John E. Nelson, Fruita, Colo., \$2,801.50.

Schedule 11, Sam Kloczko, Loma Colo., \$1,649.90.

Schedule 12, J. M. Groesbeck, Springfield, Utah, \$2,937.50.

Schedule 13, James O'Bryan, Fruita, Colo., \$2,364.50.

Schedule 14, J. W. Collier, Grand Junction, Colo., \$1,323.

Schedule 15, Wade Collier, Grand Junction, Colo., \$1,420.

Schedule 16, Charles E. Lutz, Loma, Colo., \$1,578.

#### Boise, Idaho, Post Office.

All bids received by the supervising architect, Treasury Department, Washington, D. C., for remodeling the extension to the U. S. post office at Boise, Idaho, were in excess of the amount available for this work. The specifications will be revised and supplemental bids requested at an early date.

SAN FRANCISCO—Officers' quarters, 2 story and base. Class C construction. Cost not stated. Engineer, Constructing Quartermaster's Office, Fort Mason, Owners, United States Government. Word has been received from the War Department that a site for the 40 new officers' quarters to be erected in the Presidio of San Francisco will shortly be settled, and that the Constructing Quartermaster's Office will be directed to call for figures on the work. Plans prepared here and forwarded to Washington have been officially approved. The contract for the construction of roads, walks, gutters and asphalt on the Letterman General Hospital has been awarded to the Fay Improvement Co., Phelan Bldg., on this bid of \$2,697.50.

#### HALLS AND SOCIETY BUILDINGS

PORTLAND, ORE.—Auditorium, 1 and 2 story and base, steel, brick and concrete, \$500,000. Architect's name not given. Owners, City of Portland. Will cover an area of 200 by 200 feet, and will contain a main auditorium 100 by 108 feet, assembly hall 40 by 140 feet, a second assembly room 34 by 86 feet and a stage 108 by 168 feet. Stairways to the upper floor will be of concrete. Interior finish pine and hardwood. Steam heat, oil burning system and vacuum cleaning. Exterior faced with pressed brick trimmed with terra cotta. Plans are being prepared.

SAN FRANCISCO—Women's gymnasium, 4 story and base. Class B construction, \$110,000. Architects, Bliss & Paville, Balboa Bldg., S. F. Owner, C. T. Ryland, leased to the San Francisco Women's Athletic Association. Loca-

tion, north Sutter between Mason and Taylor streets. Plans for the work have been out for figures and all bids are now in and under advisement. Contracts will be let shortly.

## HOSPITALS

**SAN FRANCISCO**—Hospital work. Cost not stated. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. At last Wednesday's meeting of the Board of Public Works bids were received for the structural steel for both the north-east and southeast wings of the San Francisco Hospital, and also for the construction of a ward for diphtheria carriers at the Isolation Hospital. A complete list of these bids will be found under the heading of San Francisco in this issue.

**SAN FRANCISCO**—Emergency Hospital, 2-story and base. Class C construction. Cost not stated. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans and specifications have been completed for the Central Emergency Hospital and are awaiting the selection of a site for the building.

## HOTELS

**SAN FRANCISCO**—Hotel completion, 6 story and base, brick and steel, \$45,000. Architect, Earl B. Scott, Humboldt Bank Bldg., S. F. Owners, J. K. Prior Estate. Location, southwest corner of Mason and Eddy streets. Plans for this work have been completed and segregated figures are now being taken as follows: Plumbing, heating, glass and glazing, painting and decorating, carpentry and mill work, elevators, sheet metal work, plastering, electric work.

## IRRIGATION PROJECTS

**MANTECA, SAN JOAQUIN CO., CAL.**—Irrigation dam, reinforced concrete, \$165,000. Engineer, Chief Engineer, Manteca. Owners, South San Joaquin Irrigation District. At the last meeting of the Directors of the South San Joaquin Irrigation District all bids for the construction of the big dam project were rejected and new bids ordered advertised. New bids will be opened on January 2nd at 10 a. m. The dam will impound 25,000 acre feet of water and its construction involves the excavation of approximately 500,000 cubic yards of material. The hydraulic method will be used in excavating. The Ross Construction Co. of Sacramento submitted the lowest figure at \$180,160, which is reported as being about \$16,000 above the engineer's estimate.

**CASBURG, STANISLAUS CO., CAL.**—Irrigation work. Cost not stated. Engineer, Chief Engineer Herrmann, Modesto. Owners, Modesto Irrigation District. At the last meeting of the Board of Directors of the Modesto Irrigation District Chief Engineer Herrmann was instructed to proceed with the construction of a transition section at the lower end of the Casburg crossing.

**WILLOWS, GLENN CO., CAL.**—Levee construction, \$8,000 or more. Engineer's name not given. Owners, Levee District No. 3. The State Reclamation Board has approved the plans of the trustees of Levee District No. 3 for raising the levee in the Princeton country. It will be made two feet higher than the highest water mark. Trustees are Thos. Crouch, Oscar Steele and John Brough.

## POST OFFICES

**OLYMPIA, WASH.**—Post office alteration. Cost not stated. Architect, Supervising Architect, Washington, D. C. Owners, United States Government. Bids will be received until December 27th at 10 a. m. for enlarging the drafting room and constructing skylights in the Federal Building. Plans can be secured from either the Supervising Architect at Washington, D. C. or from the custodian at Olympia. An official proposal appears in another column of this issue.

## RAILROAD CONSTRUCTION AND EQUIPMENT

**SAN FRANCISCO**—Railroad construction, \$120,500. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. The lowest figure for the construction of a portion of the Church Street Municipal line was presented by the Contra Costa Construction Co. at \$120,500. An award of contract has not been made. A complete list of the bids appears under the heading of San Francisco in this issue.

**LOS ANGELES, CAL.**—Railroad work. Cost not stated. Engineer, Engineering Dept. Pacific Electric Railway Co., L. A. Owners, Pacific Electric Railway Co. The engineering department of the Pacific Electric Railway Co. has completed plans and specifications for the elevated tracks to be erected in the rear of the Pacific Electric building. The tracks will extend from Los Angeles to San Pedro street. The plans also provide for the erection of umbrella sheds of concrete and steel construction. The Board of Public Utilities has issued an order that the contract for the work must be awarded prior to December 31st and the work completed by July 15, 1916. The tracks at the Hill street station between 4th and 5th streets will be rearranged and umbrella shed erected.

## Contracts Awarded.

**SAN FRANCISCO**—Railroad construction, 67 miles, \$1,543,080. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Contractor, F. Rolandi, Bank of Italy Bldg., S. F. Contract price, \$1,543,080. Note: The contract covers the construction of the line into the Hotch-Hatchy site.

**SAN FRANCISCO**—Railroad construction, \$123,500. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Contractors, Contra Costa Construction Co., S. F. Contract price, \$123,500. This contract covers the construction of section B of the Church Street Municipal Railroad.

## RESIDENCES

**SAN FRANCISCO**—Residences, 3, 2 story and base, frame, \$5,000 to \$6,000 each. Architect, C. O. Clausen, Hearst Bldg., S. F. Owner's name withheld. Location, 12th avenue and Balboa street. Each dwelling will contain eight rooms, two baths and sleeping porch. Basement garages are provided. Interior will be finished in pine, hardwood and white enamel. Hardwood floors will be used in the principal rooms. Furnace heat, open fire places and tile or brick mantels. Bath rooms tile. Automatic water heaters. Exterior covered with cement plaster. Plans being prepared.

**SAN FRANCISCO**—Residences, 2, 1 story and base, frame, \$1,500 each. Architect, none. Owner, N. E. Nilsson, 355 Coleridge street, S. F. Location, south Rivera west 21st street. Each will contain five rooms and bath. Interior finish pine with some hardwood floors. Open fire places and tile mantels. Automatic water heaters. Exterior covered with rustic. Plans complete and work to be done by day labor.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$5,000. Architect, C. O. Clausen, Hearst Bldg., S. F. Owner, C. O. Clausen. Location, 46th avenue and Balboa. Will contain eight rooms, bath, sleeping porch and basement garage. Interior finish pine and southern gum and white enamel. Hardwood floors. Open fire places and tile or brick mantels. Furnace heat. Automatic water heater. Bath room tile. Exterior covered with cement plaster on metal lath. Plans being prepared.

**OAKLAND, CAL.**—Residence, 1 story and base, frame, \$2,000. Architect, none. Owner, W. A. Anderson, 1771 Aueon avenue, Oakland. Location, west Aueon avenue south of Birch. Will contain five rooms, bath and sleeping porch. Interior finish pine and white enamel. Hardwood floors. Open fire place and tile mantel. Bath room tile. Automatic water heater. Plans complete and work to be done by day labor.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 1 story and base, frame, \$2,000. Architect, none. Owner, C. S. Nichols, 1719 Castro street, Oakland. Location, west Baker north of Oregon. Will contain five rooms and bath. Interior finish pine and white enamel. Some hardwood floors. Open fire place and tile or brick mantel. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by day labor.

**OAKLAND, CAL.**—Residence, 1 story and base, frame, \$3,000. Architect, W. Cannon, Central Bank Bldg., Oakland. Owners, Barry Building Co., 2527 Market street, Oakland. Location, east Montclair north of Park boulevard. Will contain seven rooms, bath and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors. Mantels tile and brick. The bath room. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by day labor.

**OAKLAND, CAL.**—Residence, 1 story and base, frame, \$1,000. Architect, none. Owner, A. Anderson, 322 11st street.

Oakland. Location, east Patterson south Kansas. Will contain five rooms and bath. Interior finish pine and redwood. Some hardwood floors. Open fire places and tile mantel. Automatic water heater. Exterior covered with rustic. Plans complete and work to be done by Day Labor.

OAKLAND, CAL.—Residence, 1½ story and base, frame, \$2,500. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, Walter H. Packard. Location, west Thomas south of Prospect. Will contain seven rooms, bath and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors, furnace heat and open fire places. Mantels tile and brick. Tile bath room. Automatic water heater. Exterior covered with cement plaster on metal lath. Plans complete and work by Day Labor.

OAKLAND, CAL.—Residence, 1½ story and base, frame, \$2,000. Architect, none. Owner, Walter L. May, 1702 7th street, Oakland. Location, north Loothill Boulevard west of Seminary. Will contain five rooms, bath and sleeping porch. Interior finish pine white enamel. Hardwood floors. Open fire places and tile or brick mantels. Bath room tile. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

OAKLAND, CAL.—Residence, 1 story and base, frame, \$2,000. Architect, none. Owner, Emma Coburn, 5215 Broadway, Oakland. Location, south Madeline west of Laurel. Will contain six rooms, bath and sleeping porch. Interior finish pine and white enamel. Hardwood floors, open fire places and furnace heat. Mantels tile and brick. Bath room tile. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$5,000. Architects, Banning & Stewart, 4536 Walnut avenue, Oakland. Owner's name not given. Location, west Belgrave north of Napa. Will contain eight rooms, two baths and sleeping porch. Separate garage. Interior finish pine, hardwood and white enamel. Hardwood floors. Open fire places and furnace heat. Bath rooms tile. Automatic water heater. Mantels tile and brick. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

OAKLAND, CAL.—Residence, 1 story and base, frame, \$1,500. Architect, none. Owner, A. Hammarberg, 3758 Piedmont avenue, Oakland. Location, west 14th avenue east of 21st. Will contain six rooms, bath and sleeping porch. Interior finish pine and white enamel. Hardwood floors. Open fire place and tile or brick mantel. Automatic water heater. Exterior covered with cement plaster. Plans complete, and work to be done by Day Labor.

ALBANY, ALAMEDA CO., CAL.—Residence, 1 story and base, frame, \$1,500. Architect, none. Owner, Charles Westwood, 3819 Clarke, Albany. Location north Albany Terrace. Will contain five rooms and bath. Interior finish pine with some hardwood floors. Open fire place and tile or brick mantel. Automatic water heater. Exterior covered with rustic and cement plaster.

Plans complete and work to be done by Day Labor.

PALO ALTO, SANTA CLARA CO., CAL.—Residence, 2 story and base. Class C construction, \$25,000 or more. Architect, Louis Christen Mullgardt, Chronicle Bldg., S. F. Owners, Trustees Leland Stanford, Jr., University. Location, University Campus. Will contain a large number of rooms, several baths and sleeping porches. A separate garage will be erected. Interior finish pine, hardwood and white enamel. Central heating system, probably steam steam heat, open fire places and vacuum cleaning. Bath rooms finished in tile. Hot water circulating system. Exterior faced with cement plaster. Clay tile roof. Preliminary plans being prepared.

FRESNO, FRESNO CO., CAL.—Residence, 2 story and base, frame, \$3,500. Architect, none. Owner, W. H. Ackerman, Fresno. Location, Alta Vista Tract. Will contain seven rooms, bath and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors. Open fire places and tile or brick mantels. Bath room tile. Automatic water heater. Exterior covered with cement plaster on metal lath. Plans complete and work to be done by Day Labor.

FRESNO, FRESNO CO., CAL.—Residence, 2 story and base, frame, \$3,000. Architect, none. Owners, Central California Land Co., 953 I street, Fresno. Location, La Sierra Tract. Will contain seven rooms, bath and sleeping porch. Interior finish pine and white enamel. Hardwood floors. Open fire places and tile or brick mantels. Bath room tile. Automatic water heater. Exterior covered with rustic and cement plaster on metal lath. Plans complete and work to be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$1,000. Architect, F. Holberg Reimers, 2145 Shattuck avenue, Berkeley. Owner, E. Dunham. Location, Rose street. Will contain eight rooms, three baths, sleeping porch and basement garage. Interior finish pine, hardwood and white enamel. Hardwood floors. Furnace heat, open fire places and tile or brick mantels. Bath rooms tile. Automatic water heater. Exterior covered with cement plaster on metal lath. Plans complete and figures being taken.

BERKELEY, ALAMEDA CO., CAL.—Residences, 6, 1 story and base, frame, \$2,000 each. Architect, none. Owner, R. E. Hillen, 430 Haight avenue, Alameda. Location, Delaware, Francisco and Acton streets. Each house will contain five rooms, bath and sleeping porch. Interiors finished in pine and hardwood with some white enamel. Hardwood floors. Open fire places and tile or brick mantels. Automatic water heaters. Some tile wainscot in bath rooms. Exteriors covered with shingles and cement plaster on metal lath. Plans complete and work to be done by Day Labor.

#### Contracts Awarded.

SOUTH PASADENA, LOS ANGELES CO., CAL.—Residence, 2 story and base, brick and hollow tile, \$21,000. Architects, Marston & Van Pelt, Chamber of Commerce Bldg., Pasadena. Owner, Mrs. P. H. D. Banks, Contractor, W.

A. Taylor, 966 Elizabeth street, Pasadena. Contract price, \$21,000. Note: Contract does not include plumbing, painting, heating, electric work or ornamental iron.

#### SCHOOLS

SAN FRANCISCO—School retaining wall, \$675. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. The lowest bid received for the construction of a concrete retaining wall at the McKinley School was presented by John Spargo at \$675. A contract has not been awarded.

SAN FRANCISCO—School, 2 story and base, concrete and frame. Cost not stated. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Location, Bernal Heights. Will contain eight class rooms, auditorium and teachers' rooms. Interior finish pine with maple floors in the class rooms. Stairways reinforced concrete. Modern school plumbing. Central heating system, probably steam heat, oil burning equipment. Exterior covered with cement plaster on metal lath. Plans complete and bids to be called for shortly.

OAKLAND, CAL.—School addition, 2 story and base, frame and concrete, \$16,430. Architect, J. J. Donovan, Daziel Bldg., Oakland. Owners, City of Oakland. Of the six sets of figures received for the construction of this addition to the Fremont School, that presented by Anderson & Ringrose, 320 Market street, S. F., was the lowest at \$16,430. Bids were referred to the City Attorney. A complete list of the bids appears under the heading of Oakland and Alameda County in this issue.

CHATHAM SCHOOL DISTRICT, TULARE CO., CAL.—School, 1 story and base, frame. Cost not stated. Architect, J. L. Roberts, Jacobs Bldg., Visalia. Owners, Chatham School District. Bids will be received until December 18th at 1 p. m. for the construction of this building. Plans can be secured from the architect or from A. W. Keck, Clerk of the Board of School Trustees at Tulare.

FRESNO, FRESNO CO., CAL.—School completion. Class C construction, \$248,000. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Advices from Sacramento state that the State Advisory Board, acting at the request of State Engineer McClure, directed the State Department of Engineering to take over the work of completing the Fresno Normal School and carry on the construction by Day Labor. The original contract was awarded to Wingett Construction Co. of Los Angeles for approximately \$248,000. This company abandoned the work about a week or ten days ago when it was nearly one-half complete. Construction will be rushed under the Day Labor system.

TIPTON, TULARE CO., CAL.—School heating, electric. Cost not stated. Architect's name not given. Owners, Tipton School District. Bids will be received until 1 p. m. of December 18th for furnishing and installing an electric heating system in the school building. Plans can be secured from the

office of the Mt. Whitney Power and Electric Co. at Tipton.

**LOS ANGELES, CAL.**—School, 1-story and base, brick or hollow tile, \$25,000. Architects, Train & Williams, Exchange Bldg., L. A. Owners, City of Los Angeles. Location, Adams, between 30th and 31st avenues. Will contain six class rooms and an auditorium. Interior finish pine and maple floors. Steam heat and vacuum cleaning. Exterior faced with cement plaster. Plans complete and bids to be called for at once.

**LOS ANGELES, CAL.**—School group, 1 and 2 story and base, brick. Cost not stated. Architects, Needham & Cline, Brockman Bldg., L. A. Owners, City of Los Angeles. Location, north Broadway and Pritchard street. Group will consist of an auditorium building 100 by 110 with a seating capacity of 1500 people, a three-story library building 93 by 88 feet and a two-story music building 51 by 110 feet. Interior finish pine with maple floors. Central heating system and modern plumbing. Tile, marble and staff ornamentation. Exteriors faced with cement plaster. Plans complete and figures being taken. Bids to be opened on December 23rd.

## SEWERS, STREET WORK & WATER SYSTEMS

**BERKELEY, ALAMEDA CO., CAL.**—Street electroliters. Cost not stated. Engineer, City Engineer, Berkeley. Owners, City of Berkeley. Plans for the first attempt at lighting the streets under the district plan have been adopted by the City Council. Under the new plan steel electroliters with but one arc lamp will be installed. The district it is proposed to light includes everything south of Derby and east of College avenue.

**DAILY CITY, SAN MATEO CO., CAL.**—Street and sewer work. Cost not stated. Engineer, City Engineer, Daily City. Owners, Daily City. Bids will be received up to and including December 27th at 8 p. m. for grading to official grade, constructing concrete gutters and sidewalks, asphaltic concrete pavement with 1-inch base and 1½-inch wearing surface, vitrified brick pavement with 1-inch base, 8-inch vitrified, salt-glazed ironstone sewer, 1-inch base vitrified, salt-glazed, ironstone sewer, storm water sewers, reconstructing manholes and building new manholes in various streets.

**SOUTH SAN FRANCISCO, SAN MATEO CO., CAL.**—Street and sewer work. Cost not stated. Engineer, City Engineer, South San Francisco. Owners, City of South San Francisco. Bids will be received up to and including December 20th at 8 p. m. for grading to official grade, constructing concrete curbs, gutters and sidewalks, and oil macadam pavement on 1st, 2nd and 3rd streets, and portions of A, B and C streets.

**SOMORA, TIOGUENE CO., CAL.**—Filtration system. Cost not stated. Engineer, Engineering Dept. Sierra and San Francisco Water Co., Somora. Owners, San Francisco and Sierra Water Co. Plans are being made for the improvement of the water system of the Sierra and San Francisco Power Co., which supplies water for the city

of Somora and vicinity. Though the company has been furnishing good water it is unavoidable that at times during the rainy season that the water is muddy and it is to overcome this that a filtration system will be installed. When a site has been secured work on the system will be started.

**REDDING, SHASTA CO., CAL.**—Lighting system. Cost not stated. Engineer, Ernest Rolison, Redding. Owners, Town of Redding. Redding will build its own electric lighting system, according to a decision reached by the City Trustees at their last meeting. The first unit of the system as planned by the Trustees will cost in the neighborhood of \$2,000. Other units will be added as finances permit. Further mention will be made of this work.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Sanitary sewer system. Cost not stated. Engineer, City Engineer, Stockton. Owners, City of Stockton. At the last meeting of the City Council plans and specifications for the construction of a sanitary sewer on Fair Oaks avenue from Marsh to East street, along East street to Oak street, on Oak street to West street, along West street to Smith's canal, with a branch on Union street from Acacia to Oak street, were approved and bids were ordered received up to December 24th. Further information together with plans and specifications may be had from the City Clerk at Stockton.

**FRESNO, FRESNO CO., CAL.**—Sewer system extension. Cost not stated. Engineer, City Engineer B. E. Crankite, Fresno. Owners, City of Fresno. The City Engineer was instructed at the last meeting of the City Council to start the preparation of the plans and specifications for the proposed enlargement of the sewer system and a system of storm sewers. Floods resulting from the last storm prompted the action of the Council, owing to the large amount of damage done. The funds to finance construction will be raised by a bond issue of a half million dollars.

**BAKERSFIELD, KERN CO., CAL.**—Road paving. Cost not stated. Engineer, County Surveyor, Bakersfield. Owners, Kern County. At the last meeting of the County Supervisors the Clerk was instructed to advertise for bids for concrete paving of a section of Brundage Lane from H to Union avenue. Bids on the work close December 17th at 10 a. m. Further information together with plans and specifications may be had from the County Clerk at Bakersfield.

**DIXIELAND, IMPERIAL CO., CAL.**—State highway construction, \$72,089. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Bids opened at the last meeting of the State Highway Commission show C. L. Hyde Construction Co., San Diego, low for the construction of approximately 12 miles of Portland cement concrete highway in Imperial County. The engineer's estimate for this work was \$100,108. A complete list of the bids appears under the heading of Los Angeles and Southern California in this issue.

**SACRAMENTO, CAL.**—Centrifugal pump \$17,000. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. All negotiations with the

C. F. Leason Pump Co. for the substitution of another pump at the city water works for the one which failed to come up to specifications were abandoned when the City Commission adopted specifications for a new pump. Acting Commissioner of Public Works E. J. Carragher asked that plans and specifications be adopted. The specifications call for bids to be opened December 23rd at 11 o'clock for a new centrifugal pump of 15,000,000 gallons capacity. The city set aside \$17,000 for the rejected pump and this money will be used for the new pump. Of this amount \$12,000 has been paid on account. The city will demand its return.

**REDWOOD CITY, SAN MATEO CO., CAL.**—Storm water sewers. Cost not stated. Engineer, City Engineer, Redwood City. Owners, Redwood City. At the last meeting of the City Trustees the matter of the drainage of storm water at the intersection of Broadway and the state highway was brought to the attention of the Board by E. T. McGittigan, representing the Highlands Improvement Club. Plans, specifications and estimates for a concrete gutterway across Broadway at this point were ordered by the City Engineer.

**RICHMOND, CONTRA COSTA CO., CAL.**—Roadway construction. Cost not stated. Engineer, City Engineer Chapman, Richmond. Owners, City of Richmond. City Engineer H. D. Chapman has presented plans and specifications to the City Council, together with estimates for the excavating of a roadway from the southern terminus of the Municipal highway to the Santa Fe wharves at Ferry Point. The connecting roadway to be built is estimated at about 500 feet in length. The road will enclose the waterfront portion of the hill west of the highway. Bids will be called for on the approval of the plans.

**REDWOOD CITY, SAN MATEO CO., CAL.**—Street improvement. Cost not stated. Engineer, City Engineer, Redwood City. Owners, Redwood City. At the last meeting of the City Trustees the matter of street work on Stanford and Winslow streets was referred to the City Engineer. Plans and specifications were ordered prepared for the improvement of Broadway between railroad crossing and the state highway.

**SAN RAFAEL, TO NAPA CO., CAL.**—Highway construction. Cost not stated. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. The State Highway Commission has decided to build a state highway lateral from San Rafael to Napa, Marin, Sonoma and Napa counties have agreed to pay \$175,000 of the cost and the State Highway Commission \$25,000. Bids for this stretch of highway will be called in the near future. Further mention will be made of this work.

**MARTINEZ, CONTRA COSTA CO., CAL.**—Street improvement. Cost not stated. Engineer, City Engineer, Martinez. Owners, City of Martinez. M. P. Sullivan, representing the firm of Wright, Anderson & Vost, First National Bank Bldg., Redwood City, reported that the signature of every property owner along Main street has been secured and work on the paving of

that thoroughfare with an oil macadam pavement will be started in the early spring.

**MODESTO, STANISLAUS CO., CAL.**—Street paving and sewer work. Cost not stated. Engineer, City Engineer, Modesto. Owners, City of Modesto. In response to a petition presented, the City Council has passed a resolution of intention providing for the paving of the alley in block 85. Sewer construction was ordered in the block bounded by Fifth, Sixth, F and G streets at the same meeting.

**TURLOCK, STANISLAUS CO., CAL.**—Street improvement. Cost not stated. Engineer, City Engineer, Turlock. Owners, City of Turlock. The City Council has ordered bids received for the improvement of Diablo street in this city. Plans and specifications for the work may be had from the City Clerk.

**VISALIA, TULARE CO., CAL.**—Paving. Cost not stated. Engineer, City Engineer, Visalia. Owners, City of Visalia. To correct a mistake in advertising for bids for the paving of South Bridge street and from the west line of the west Main street paving to the state highway was nullified by the City Trustees and bids have been ordered readvertised. Plans for the paving work may be had from the City Engineer or City Clerk at Visalia.

**BRAWLEY, IMPERIAL CO., CAL.**—Sewer pipe. Cost not stated. Engineer, City Engineer, Brawley. Owners, City of Brawley. Bids will be received by the City Clerk up to 5 p. m. of December 22nd for furnishing the city with 2,620 feet of 10-inch vitrified, salt-glazed, A No. 1 sewer pipe. Certified check for 10 per cent is required. J. H. Stevenson is the Clerk.

**SANTA ANA, ORANGE CO., CAL.**—Street lighting system. Cost not stated. Engineer, City Engineer, Santa Ana. Owners, City of Santa Ana. The City Trustees have decided to start construction of the proposed lighting system to be installed. Bids will be taken immediately for the underground work and for furnishing the electroliers and lights. Plans will be started at once and competitive bids will be called for. Further mention will be made of this work when the plans are complete.

**SAN DIEGO, CAL.**—Sewer construction, \$47,000. Engineer, City Engineer, San Diego. Owners, City of San Diego. Doran & Armstrong, San Diego, who were awarded the sewer system contract at \$47,000, have declined to carry out the work owing to possible legal complications. It is probable a district will be created and bonds issued.

**LOS ANGELES, CAL.**—Road improvement, \$19,945. Engineer, City Engineer, Los Angeles. Owners, City of Los Angeles. Jas. L. Frazer of Leng Beach was the lowest bidder at \$19,945 for improving 2.4 miles of Merced avenue southwest of Covina in Road District No. 39. The work will consist of grading, macadamizing and constructing bridges and culverts.

#### Contracts Awarded.

**SAN FRANCISCO**—Paving, basalt block. Cost not stated. Engineer, Engineering Dept. Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. Contractors, Fay Improve-

ment Co., 1801 Harrison street, S. F. Contract price not stated.

**OAKLAND, CAL.**—Storm sewer. Cost not stated. Engineer, County Surveyor, Oakland. Owners, Alameda County. Contractor, T. B. Russell, Oakland. Contract price not stated.

**SALINAS, MONTEREY CO., CAL.**—Road improvements. Cost as follows. Engineer, County Surveyor, Salinas. Owners, Monterey County. Contractor, Lou G. Hare, Salinas, grading on Coast road near Oliver ranch. Contract price, \$750. Granite Rock Co., Salinas, 3½ miles of water bound macadam, \$3,299.75; also 16 miles of oil bound macadam from Del Monte to Castroville to the same contractors. Cost not stated. Bids for one-half mile of road work in San Miguel Canyon were rejected and the work will be done by Day Labor.

**WOODLAND, YOLO CO., CAL.**—Paving bridge. Cost not stated. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Contractors, Graff Construction Co., Woodland. Contract price not stated.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Sewer construction, \$2,676.47. Engineer, City Engineer, Stockton. Owners, City of Stockton. Contractors, Tibbitts-Pacific Co., 16 California street, S. F. Contract price, \$2,676.47.

**PASO ROBLES, SAN LUIS OBISPO CO., CAL.**—Sewer construction. Cost as follows. Engineer, Town Engineer, Paso Robles. Owners, Town of Paso Robles. Contractor, W. J. Tobin, 735 Fifth street, Oakland. Contract price, 76c per foot for sewer. Manholes \$50 each.

**OAKLAND, CAL.**—Street improvement. Cost not stated. Engineer, City Engineer, Oakland. Owners, City of Oakland. Contractor, D. U. Toffelmier, Oakland. Improvement of 64th avenue and Harmon avenue. Contract price not stated.

**SACRAMENTO, CAL.**—Street improvement. Cost not stated. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Contractor, A. L. Rosa, 1300 T street, Sacramento. Contract for 16th from P to X. Contract price not stated.

**RED BLUFF, TEHAMA CO., CAL.**—Trenching road. Cost as follows. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. Contractors, Wood & Supan, Red Bluff. Contract price 45c per foot for 930 feet.

**LOS ANGELES, CAL.**—Street improvement, \$43,178.97. Engineer, City Engineer, Los Angeles. Owners, City of Los Angeles. Contractors, Benj. F. Ford and Fred H. Stout, L. A. Contract price, \$43,178.97.

**MANHATTAN BEACH, LOS ANGELES CO., CAL.**—Street improvement, \$11,594.02. Engineer, City Engineer, Manhattan Beach. Owners, City of Manhattan Beach. Contractors, Municipal Improvement Co., 803 Maedonald avenue, Richmond. Contract price, \$11,594.02.

**RIVERSIDE, RIVERSIDE CO., CAL.**—Ornamental electroliers, \$12,915.94. Engineer, City Engineer, Riverside. Owners, City of Riverside. Contractors, Electric Supply Co., Riverside. Contract price, \$12,915.94.

#### STORES AND OFFICES

**SAN FRANCISCO**—Stores and lofts, 2 story and base, brick and steel. Cost not stated. Architect, Herbert Maggs, 125 Alpine streets, S. F. Owner, Mrs. Helen Otto, leased to Hermann Safe Co. Location, west Fremont street 137 south of Howard, covering an area of 32 by 137½ feet. Will contain show rooms, office and factory. Interior of the office and show rooms finished in pine and hardwood. Freight elevator, steam heat and special machinery. Patent store fronts and marble bases. Construction extra heavy type. Exterior faced with pressed brick. Plans complete and figures being taken.

**FRESNO, FRESNO CO., CAL.**—Store and loft alteration, 2 story and base, brick, \$2,000. Architect, R. F. Felchlin, Rowell Bldg., Fresno. Owner, Mary E. Berry. Location, Fulton Bldg. Work will consist of a rearrangement of the upper floor. Will require new interior partitions, plastering, electric work and plumbing. Plans are complete and work will be done by Day Labor.

#### Contracts Awarded.

**LOS ANGELES, CAL.**—Office building addition, 5 story and base, Class A construction, \$92,000. Architect, W. J. Dodd, Marsh-Strong Bldg., L. A. Owners, Pacific Mutual Life Insurance Co. Contractors, C. J. Kubach Co., Merchants' National Bank Bldg., L. A. Contract price, \$92,000.

#### THEATRES

**SAN FRANCISCO**—Theatre alteration. Class A construction. Cost not stated. Architect, Bernard J. Joseph, New Call Bldg., S. F. Owner, A. Goldberg. Location, 719 Market street. Work will consist of rearranging the present store and motion picture theatre so that the theatre will occupy all of the building, giving a seating capacity of 334 people. Work will require interior partitions, electric work, plastering, painting and decorating. Plans are complete and bids will be called for at once.

#### EXPERIMENTS WITH HOLLOW TILING.

The hollow-tile floor slabs have been erected by the United States Bureau of Standards, to be tested to destruction at the end of 30 days. This is a commercial test for one of the large manufacturers of hollow tile. For the same manufacturer, four hollow-tile walls were tested transversely. They were 5 feet long, 10 feet high, and 8 inches thick.

C., until 11 o'clock a. m., January 4, 1916, and then and there publicly opened, for a power house and an operating building of reinforced concrete

and steel construction and three quarters of wood construction for commanding officer, married operators and bachelor operators at the naval station, Cavite, P. I. Plans and specifications can be obtained on application to the bureau or to the commandant of the naval station named. Proposals will also be received at the naval station, Cavite, P. I., until 4:30 o'clock p. m., January 4, 1916, and opened at 10 o'clock a. m., January 5, 1916. H. R. STANFORD, chief of bureau.

#### DEPARTMENT OF ENGINEERING.

#### CALIFORNIA HIGHWAY COMMISSION

#### NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock P. M., on December 27, 1915, at which time they will be publicly opened and read for construction in accordance with the specifications therefor, to which special reference is made, portion of State highway as follows:

Placer County, from Roseville to Penryn (11-Pla-17-A), about 7.5 miles in length, to be paved with Portland cement concrete.

Placer County, from Penryn to Auburn (11-Pla-17-B), about 6.5 miles in length, to be paved with Portland cement concrete.

Tehama County, from Corning to Proberta (11-Teh-7-A and 3-B), about 10.2 miles in length, to be paved with Portland cement concrete.

Sonoma and Marin Counties, across Petaluma Creek at Green Point (1V-Son-Mrn-8-A), a bridge comprising a steel bascule span 148 feet long, two concrete and steel approach spans each about 56 feet long, and about 1122 feet of cross-tied pile trestle.

Plans may be seen, and forms of proposals, bonds, contract, and specifications may be obtained, at the said office, and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated.

The Division Engineers' offices are located at Wilhite, Dunsmuir, Sacramento, San Francisco, San Luis Obispo, Fresno, and Los Angeles.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

CHARLES D. BLANBY,  
NEWELL D. DARLINGTON,  
CHARLES F. STEWART,  
California Highway Commission.  
AUSTIN B. FLETCHER,  
Highway Engineer.  
WILSON R. ELLIS,  
Secretary. (\*)

## SAN JOSE AND THE SANTA CLARA VALLEY

**RESIDENCE**—2 Story and base, "Class C" construction, \$25,000. Palo Alto, Santa Clara Co., Cal. Architect, Louis Christen Mullgardt, Chronicle Bldg., S. F. Owners, Trustees of Leland Stanford, Jr., University. Location, University Campus. Will contain a large number of rooms, several baths and sleeping porches. A separate garage will be erected. Interior finish pine, hardwood and white enamel. Central heating system, probably steam heat, open fire places and vacuum cleaning. Bath rooms finished in tile. Hot water circulating system. Exterior faced with cement plaster. Clay tile roof. Preliminary plans being prepared.

**STREET AND SEWER WORK**—Cost not stated. Daly City, San Mateo Co., Cal. Engineer, City Engineer, Daly City. Owners, Daly City. Bids will be received up to and including December 25th at 8 p. m. for grading to official grade, constructing concrete gutters and sidewalks, asphaltic concrete pavement with 4-inch base and 1½-inch wearing surface, vitrified brick pavement with 4-inch base, 8-inch vitrified, salt-glazed, ironstone sewer, 4-inch base vitrified, salt-glazed, ironstone sewer, storm water sewers, reconstructing manholes and building new manholes in various streets.

**STREET AND SEWER WORK**—Cost not stated. South San Francisco, San Mateo Co., Cal. Engineer, City Engineer, South San Francisco. Owners, City of South San Francisco. Bids will be received up to and including December 20th at 8 p. m. for grading to official grade, constructing concrete curbs, gutters and sidewalks, and oil macadam pavement on 1st, 2nd and 3rd streets, and portions of A, B and C.

**ROAD IMPROVEMENTS**—Cost as follows. Salinas, Monterey Co., Cal. Engineer, County Surveyor, Salinas. Owners, Monterey County. Contractor, Lou G. Hare, Salinas, grading on Coast road near Oliver ranch. Contract price, \$750. Granite Rock Co., Salinas, 2½

miles of water bound macadam, \$1,993.75, 3650 16 miles of oil macadam from Del Monte to Castroville to the same contractors. Cost not stated. Bids for one-half mile of road work in San Miguel Canyon were rejected and the work will be done by Day Labor.

**STORM WATER SEWERS**—Cost not stated. Redwood City, San Mateo Co., Cal. Engineer, City Engineer, Redwood City. Owners, Redwood City. At the last meeting of the City Trustees the matter of the drainage of storm water at the intersection of Broadway and the State Highway was brought to the attention of the Board by E. T. McGittigan, representing the Highlands Improvement Club. Plans, specifications and estimates for a concrete gutterway across Broadway at this point were ordered prepared by the City Engineer.

**STREET IMPROVEMENT**—Cost not stated. Redwood City, San Mateo Co., Cal. Engineer, City Engineer, Redwood City. Owners, Redwood City. At the last meeting of the City Trustees the matter of street work on Stanford and Winslow streets was referred to the City Engineer. Plans and specifications were ordered prepared for the improvement of Broadway between railroad crossing and the State Highway.

## MARIN, CONTRA COSTA AND SONOMA COUNTIES

**OIL TANKS**—Steel, \$200,000. Martinez, Contra Costa Co., Cal. Engineer, Engineering Dept. Shell Oil Co., 243 Sansome street, S. F. Owners, Shell Oil Co. Bids have been opened by the Shell Company for 14 oil storage tanks each of 50,000 barrels capacity to be erected in Martinez just north of the Trumbull stills. The bids have been forwarded to Martinez for the approval and recommendation of P. A. L. Englebrecht, who is in charge of the work. It is stated that the Lacey Mfg. Co. and the Petroleum Iron Works were among the low bidders. At the Trumbull stills the entire top of the hill is being sliced off and a high fill made in the hollow to the northward, and it is upon the high plateau that the tanks are to be built. Over 120,000 yards of earth are to be moved at a cost of over \$10,000 to make room for the tank construction.

**BATH HOUSE FILTER**—Cost as follows. San Rafael, Marin Co., Cal. Architect, none. Owners, City of San Rafael. Two bids were received by the City Council for filters for the municipal baths. The California Jewell Filter Co., Merchants' Exchange Bldg., S. F., offered to deliver in San Rafael a three-unit filter for \$3,450, and a two-unit filter for \$1,924. The latter price included a chloride apparatus valued at \$750. They ask \$600 for installation. The Council could not reconcile the difference in prices for the three-unit and the two-unit filters. The other bid was from Geo. F. Day & Son, 215 Spear street, S. F., for \$1,921 for a three-unit filter, but they were unable to supply the chemical apparatus nor could they tell the Council what it would cost to install the plant. The matter was referred to the Council as a committee of the whole.

**BRIDGE**—Reinforced concrete. Cost not stated. Healdsburg, Sonoma Co., Cal. Engineer, City Engineer, Healdsburg. Owners, City of Healdsburg. If the weather will permit the City Trustees will order the construction of a concrete bridge on Piper street, just outside of the city limits. Plans for the proposed structure have been prepared. The present bridge is in a dilapidated condition and must be replaced with a new structure for safety.

**HIGHWAY CONSTRUCTION**—Cost not stated. San Rafael to Napa, Cal. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. The State Highway Commission has decided to build a State Highway lateral from San Rafael to Napa. Marin, Sonoma and Napa Counties have agreed to pay \$175,000 of the cost and the State Highway Commission \$25,000. Bids for this stretch of highway will be called in the near future. Further mention will be made of this work.

**STREET IMPROVEMENT**—Cost not stated. Martinez, Contra Costa Co., Cal. Engineer, City Engineer, Martinez. Owners, City of Martinez. M. F. Sullivan, representing the firm of Wright, Anderson & Yost, First National Bank Bldg., Redwood City, reports that the signature of every property owner along Main street has been secured and work on the paving of that thoroughfare with an oil macadam pavement will be started in the early spring.

**ROADWAY CONSTRUCTION**—Cost not stated. Richmond, Contra Costa Co., Cal. Engineer, City Engineer, Chapman. Richmond. Owners, City of Richmond. City Engineer H. D. Chapman has presented plans and specifications to the City Council, together with estimates for the excavation of a roadway from the southern terminus of the Municipal highway to the Santa Fe wharves at Ferry Point. The connecting roadway to be built is estimated at about 500 feet in length. The road will encircle the waterfront portion of the hill west of the highway. Bids will be called for on the approval of the plans.

## FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA

**RESIDENCE**—2 story and base, frame, \$3,800. Fresno, Fresno Co., Cal. Architect, none. Owner, W. H. Ackerman. Fresno. Location, Alta Vista Tract. Will contain seven rooms, bath and sleeping porch. Interior finish pine, hardwood and white enamel. Hardwood floors. Open fire places and tile or brick mantels. Bath room tile. Automatic water heater. Exterior covered with cement plaster on metal lath. Plans complete and work to be done by Day Labor.

**RESIDENCE**—2 story and base, frame, \$5,000. Fresno, Fresno Co., Cal. Architect, none. Owners, Central California Land Co., 755 J street, Fresno. Location, La Sierra Tract. Will contain seven rooms, bath and sleeping porch. Interior finish pine and white enamel. Hardwood floors. Open fire places and tile or brick mantels. Bath room tile. Automatic water heater. Exterior covered with rustic and cement plaster on metal lath. Plans com-

put and work to be done by Day Labor.

**CULVERTS**—Reinforced concrete and iron. Cost not stated. Fresno, Fresno Co., Cal. Engineer, City Engineer E. B. Cronkite, Fresno, Owners, City of Fresno, City Engineer E. B. Cronkite was instructed at the last meeting of the Council to have constructed two culverts, three feet by 1 foot, for I and Merced streets and J and Merced streets. These culverts were recommended by E. W. Risley in a recent protest against flood damage at J and Merced streets.

**SEWER SYSTEM EXTENSION**—Cost not stated. Fresno, Fresno Co., Cal. Engineer, City Engineer E. B. Cronkite, Fresno, Owners, City of Fresno. The City Engineer was instructed at the last meeting of the City Council to start the preparation of the plans and specifications for the proposed enlargement of the sewer system and a system of storm sewers. Floods resulting from the last storm prompted the action of the Council, owing to the large amount of damage done. The funds to finance construction will be raised by a bond issue of half a million dollars.

**ROAD PAVING**—Cost not stated. Bakersfield, Kern Co., Cal. Engineer, County Surveyor, Bakersfield, Owners, Kern County. At the last meeting of the County Supervisors the Clerk was instructed to advertise for bids for the concrete paving of the section of Brundage lane from H street to Union avenue. Bids on the work close December 17th at 10 a. m. Further information together with plans and specifications may be had from the County Clerk at Bakersfield.

**IRRIGATION WORK**—Cost not stated. Gasburg, Stanislaus Co., Cal. Engineer, Chief Engineer Herrmann, Modesto, Owners, Modesto Irrigation District. At the last meeting of the Board of Directors of the Modesto Irrigation District Chief Engineer Herrmann was instructed to proceed with the construction of a transition section at the lower end of the Gasburg crossing.

**BRIDGE**—Timber and concrete, \$181. Bakersfield, Kern Co., Cal. Engineer, County Surveyor, Bakersfield, Owners, Kern County. Bids received for the construction of a bridge on Central branch of the Kern Island canal show Corrie & Duglar, Bakersfield, low at \$181. Bids have been taken under advertisement.

**SCHOOL**—1 story and base, frame. Cost not stated. Chatham School District, Tulare Co., Cal. Architect, J. L. Roberts, Jacobs Bldg., Visalia. Owners, Chatham School District. Bids will be received until December 18th at 1 p. m. for the construction of this building. Plans can be secured from the architect or from A. W. Keck, Clerk of the Board of School Trustees at Tulare.

**SCHOOL COMPLETION**—Class C construction, \$248,000. Fresno, Fresno Co., Cal. Architect, State Architect George P. McDougall, Sacramento. Owners, State of California. Advice from Sacramento state that the State Advisory Board, acting at the request of State Engineer McClure, directed the State Department of Engineering to take over the work of completing the Pres-

no Normal School and carry on the construction by Day Labor. The original contract was awarded to Wingett Construction Co. of Los Angeles for approximately \$248,000. This company abandoned the work about a week or ten days ago when it was nearly one-half complete. Construction will be rushed under the Day Labor system.

**SCHOOL HEATING, ELECTRIC**—Cost not stated. Tipton, Tulare Co., Cal. Architect's name not given. Owners, Tipton School District. Bids will be received until 1 p. m. of December 18th for furnishing and installing an electric heating system in the school building. Plans can be secured from the office of the Mt. Whitney Power and Electric Co. at Tipton.

**STORE AND LOFT ALTERATION**—2 story and base, brick, \$2,000. Fresno, Fresno Co., Cal. Architect, R. F. Felchlin, Howell Bldg., Fresno. Owner, Mary E. Berry. Location, Fulton Bldg. Work will consist of a rearrangement of the upper floor, and will require new interior partitions, plastering, electric work and plumbing. Plans are complete and work will be done by Day Labor.

**STREET PAVING AND SEWER WORK**—Cost not stated. Modesto, Stanislaus Co., Cal. Engineer, City Engineer, Modesto. Owners, City of Modesto. In response to a petition presented, the City Council has passed a resolution of intention providing for the paving of the alley in block 65. Sewer construction was ordered in the block bounded by Fifth, Sixth, F and G streets at the same meeting.

**STREET IMPROVEMENT**—Cost not stated. Turlock, Stanislaus Co., Cal. Engineer, City Engineer, Turlock. Owners, City of Turlock. The City Council has ordered bids received for the improvement of Diablo street in this city. Plans and specifications for the work may be had from the City Clerk.

**PAVING**—Cost not stated. Visalia, Tulare Co., Cal. Engineer, City Engineer, Visalia. Owners, City of Visalia. To correct a mistake in advertising for bids for the paving of South Bridge street and from the west line of the West Main street paving to the state highway, was nullified by the City Trustees and bids have been ordered readvertised. Plans for the paving work may be had from the City Engineer or City Clerk at Visalia.

### SACRAMENTO, STOCKTON AND NORTHERN CALIFORNIA

**WHARF TIMBER**—Cost not stated. Sacramento, Cal. Engineer's name not given. Owners, Central Pacific Railway Co., Sacramento. The Central Pacific Railway Co., a corporation, has filed application with the County Supervisors asking permission to construct, maintain and operate for terminal purposes a wharf on the easterly bank of the Sacramento River, 7-10 of a mile north of Walnut Grove. Bids on this work will be taken by the railroad company when permission has been given.

**FILTRATION SYSTEM**—Cost not stated. Sonora, Tuolumne Co., Cal. Engineer, Engineering Dept. Sierra and San Francisco Water Co., Sonora. Owners, San Francisco and Sierra Water

Co. Plans are being made for the improvement of the water system of the Sierra and San Francisco Power Co., which supplies water for the city of Sonora and vicinity. Though the company has been furnishing good water, it is unavoidable that at times during the rainy season that the water is muddy, and it is to overcome this that a filtration system will be installed. When a site has been secured work on the system will be started.

**LIGHTING SYSTEM**—Cost not stated. Redding, Shasta Co., Cal. Engineer, Ernest Rolison, Redding. Owners, Town of Redding. Redding will build its own electric lighting system, according to a decision reached by the City Trustees at their last meeting. The first unit of the system as planned by the Trustees will cost in the neighborhood of \$2,000. Other units will be added as finances permit. Further mention will be made of this work.

**SANITARY SEWER SYSTEM**—Cost not stated. Stockton, San Joaquin Co., Cal. Engineer, City Engineer, Stockton. Owners, City of Stockton. At the last meeting of the City Council plans and specifications for the construction of a sanitary sewer on Fair Oaks avenue from Marsh to East street, along East street to Oak street, on Oak street to West street, along West street to Smith's Canal, with a branch on Union street from Acacia to Oak street, were approved and bids were ordered received up to December 24th. Further information together with plans and specifications may be had from the City Clerk at Stockton.

**CHURCH**—1 story and base, reinforced concrete, \$25,000. Redding, Shasta Co., Cal. Architect, John J. Foley, 46 Kearny street, S. F. Owners, Roman Catholic Church, Father Hayes in charge. Will contain main auditorium, Sunday school rooms, study and social rooms. Interior finish pine with ornamental plaster. Steam heat. Art glass windows and marble altar. Exterior faced with cement plaster. Clay tile roof. Plans being prepared.

**CITY HALL AND JAIL**—4 story and base, reinforced concrete, \$197,426. Sacramento, Cal. Architects, Shea & Loquist, Bankers' Investment Bldg., S. F. Owners, City of Sacramento. The lowest bid submitted for this work came from Howard S. Williams, Hearst Bldg., S. F., at \$197,426. The lowest figure for the special steel work for the jail was that of the Ralston Iron Works at \$18,624. A complete list of the bids will be found under the heading of Sacramento, Stockton and Northern California in this issue.

**IRRIGATION DAM**—Reinforced concrete, \$165,000. Manteca, San Joaquin Co., Cal. Engineer, Chief Engineer, Manteca, Owners, South San Joaquin Irrigation District. At the last meeting of the directors of the South San Joaquin Irrigation District all bids for the construction of the big dam project were rejected and new bids ordered advertised. New bids will be opened on January 3rd at 10 a. m. The dam will impound 35,000 acre feet of water, and its construction involves the excavation of approximately 500,000 cubic yards of material. The hydraulic method will be used in excavating. The Ross Construction Co. of Sacramento submitted the lowest figure at \$180,160,

which is reported as being about \$16,600 above the engineer's estimate.

**CENTRIFUGAL PUMP**—\$17,000. Sacramento, Cal. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. All negotiations with the C. F. Braun Pump Co. for the substitution of another pump at the city water works for the one which failed to come up to specifications were abandoned when the City Commission adopted specifications for a new pump. Acting Commissioner of Public Works E. J. Carragher asked that plans and specifications be adopted. The specifications call for bids to be opened December 23rd at 11 o'clock for a new centrifugal pump of 15,000-gallon capacity. The city set aside \$17,000 for the rejected pump, and this money will be used for the new pump. Of this amount \$12,000 has been paid on account. The city will demand its return.

**LEEVE CONSTRUCTION**—\$8,000 or more. Willows, Glenn Co., Cal. Engineer's name not given. Owners, Levee District No. 3. The State Reclamation Board has approved the plans of the trustees of Levee District No. 3 for raising the levee in the Princeton country. It will be made two feet higher than the highest water mark. The trustees are Thos. Crouch, Oscar Steele and John Brouch.

#### Contracts Awarded.

**BRIDGE**—Reinforced concrete, \$2,750. Sacramento, Cal. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Contractors, Jenkins & Wells, 3530 Y street, Sacramento. Contract price, \$2,750.

**BRIDGE**—Steel and concrete, \$24,671. Yolo By-Pass, Yolo Co., Cal. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Contractors, Security Construction Co., 28th and Alameda streets, L. A. Contract price, \$24,671. Engineer's estimate, \$28,061.13.

**PAVING BRIDGE**—Cost not stated. Woodland, Yolo Co., Cal. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Contractors, Graff Construction Co., Woodland. Contract price not stated.

**SEWER CONSTRUCTION**—\$2,676.47. Stockton, San Joaquin Co., Cal. Engineer, City Engineer, Stockton. Owners, City of Stockton. Contractors, Tibbitts-Pacific Co., 16 California street, S. F. Contract price, \$2,676.47.

**BRIDGE**—Reinforced concrete, \$1,925. Willows, Glenn Co., Cal. Engineer, County Surveyor, Willows. Owners, Glenn County. Contractors, Teal & Thompson, Orland. Contract price, \$1,925.

**STREET IMPROVEMENT**—Cost not stated. Sacramento, Cal. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Contractor, A. L. Rosa, 1200 T street, Sacramento. Contract for 16th from P to N. Contract price not stated.

**TRENCHING ROAD**—Cost as follows. Red Bluff, Tehama Co., Cal. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. Contractors, Wood & Supan, Red Bluff. Contract price 45c per foot for 930 feet.

## Receive Figures For State Highway.

### Highway Commission Open Figures For Twelve Miles of Highway in Imperial County.

The following bids were received by the State Highway Commission in Sacramento for the construction of about 2 miles of highway in Imperial County between El Centro and Dixieland. Construction will be of Portland cement concrete. Fred Hoffman of Long Beach presented the low bid at \$72,089. No contract has been awarded. Following is a complete list of the bids:

State Highway, Imperial County.	
C. L. Hyde Constr. Co., San Diego	\$ 93,572.50
Leigh G. Garney, L. A.	88,895.12
W. A. Dantonville, Salinas	95,369.60
Lee Moore Constr. Co., Los Angeles	89,674.00
Bent Bros., Los Angeles	109,875.88
Doran, Armstrong & Daley, San Diego	83,099.00
Fred Hoffman, Long Beach	72,089.00
Manuel Jacinto, Sacramento	106,814.00
Mesmer & Rice, Los Angeles	85,572.50
J. A. Marshall, Berkeley	94,590.90
Lan S. Atkinson, L. A.	92,193.90
Engineer's Estimate, \$100,480	

An official award of contract has been made by the Highway Commission for the construction of the Yolo By-Pass. The Security Construction Company, 58th and Alameda Streets, Los Angeles, was awarded the contract at \$24,671. The Engineer's estimate was \$28,061.13.

## Bids Received For Sacramento Jail.

### Howard S. Williams of San Francisco Submitted Low Figure. Twenty-four Firms Bid an Work.

(By Special Wire.)

SACRAMENTO, CAL., Dec. 9th, 1915. —Howard S. Williams, Hearst Bldg., San Francisco, today presented the lowest of twenty figures for the general construction of the new City Hall and Jail Building, designed by Architects Shea & Lofquist. Williams' bid was \$197,426 or more than \$2,000 lower than the next bidder. Ralston Iron Works, also of San Francisco, submitted the lowest bid for the special jail work at \$18,624. Following is a complete list of the bids as opened:

Sacramento City Hall Building.	
James L. McLaughlin	\$218,000
Western Bldg. & Eng. Co.	206,642
J. D. Hannah	206,900
Collman & Collman Co.	205,900
Lange & Bergstrom	205,979
Larsen & Sampson	202,500
Caldwell & Son	206,940
Grant Fee	205,000
P. F. Reilly	244,000
Williams Bros. & Henderson	204,900
Teichert & Ambrose	199,700
Ward & Goodwin	218,700
Carahan & Mulford	202,769
Soud Constr. & Eng. Co.	217,132
H. S. Williams	197,426

William A. Newcomb	\$215,888
McGillivray Constr. Co.	247,485
P. A. Palmer	206,500
McLeran & Peterson	199,990
William C. Keating	213,000

#### Special Jail Work.

Ralston Iron Works	\$18,624
Paully Jail Co.	19,412
M. G. West Co.	21,600
Herman Safe Co.	22,407

## LOS ANGELES AND SOUTHERN CALIFORNIA

**BRIDGES**—12, reinforced concrete, \$50,000. Santa Barbara, Santa Barbara Co., Cal. Engineers, Mayberry & Parker, Pacific Electric Bldg., L. A., and McCurdy Bros., owners, Santa Barbara County. The County Supervisors at a recent meeting ordered plans and specifications for 13 highway bridges needed on the State Highway. Further mention will be made of this work when bids have been called. Mayberry & Parker, of whom Fred Johnson is the Santa Barbara representative, will make the plans for six reinforced concrete bridges over Zaca creek, and three between South Zaca and Los Alamos. The other four bridges in the De La Cuesta canyon will be planned by McCurdy Bros.

**BRIDGES**—Steel and reinforced concrete. Cost not stated. Santa Barbara, Santa Barbara Co., Cal. Engineer, County Surveyor Owen H. O'Neill, owners, Santa Barbara County. County Surveyor Owen H. O'Neill in a report to the County Supervisors states that designs for the following State Highway bridges have been submitted but have not as yet been approved by the State Highway Commission, overhead crossing, El Capitan, Corral, Tajiquas, two Chivati bridges and Sheep Camp. Plans and specifications have been prepared for the following jobs: Fencing through north Golia, Rhode Island, States Corp. Jerrado de la Guest, and E. S. Gordero properties. The purchase of rock for Santa Maria road and the laying of macadam on the Santa Maria-Guadalupe road. Bids on these improvements will be called for within the next month.

**STATE HIGHWAY CONSTRUCTION**—\$72,089. Dixieland, Imperial Co., Cal. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Bids opened at the last meeting of the State Highway Commission show C. L. Hyde Construction Co., San Diego, low for the construction of approximately 12 miles of Portland cement concrete highway in Imperial County. The engineer's estimate for this work was \$100,480. A complete list of the bids appears under the heading of Los Angeles and Southern California in this issue.

**SEWER CONSTRUCTION**—Cost as follows. Paso Robles, San Luis Obispo Co., Cal. Engineer, Town Engineer, Paso Robles. Owners, Town of Paso Robles. Contractor, W. I. Tobin, 735 Filbert street, Oakland. Contract price, 56c per foot for sewer. Manholes, \$50 each.

**MAUSOLEUM**—1 story and base, reinforced concrete and granite, \$10,000. Monrovia, Los Angeles Co., Cal. Architect's name not given. Owners, Monrovia Mausoleum Co. Contractors, Davidson Construction Co., 16th and

Tennessee streets, L. A. Contract price, \$10,000. Contract does not include marble work or ornamental iron.

**FLATS**—1 and 2 story and base, frame, \$30,000. Los Angeles, Cal. Architect, W. J. Dodd, Marsh-Strong Bldg., L. A. Owners, W. J. Dodd and associates. Location, Sunset Boulevard near Harvard. Will contain twelve buildings of one-story four rooms each and a two-story building of sixteen rooms, also arranged for modern flats. Interiors finished in pine and hardwood with white enamel. Hardwood floors. Open fire places and tile and brick mantels. Bath rooms tile. Central heating system. Automatic water heaters. Bath rooms tile. Exteriors covered with cement plaster. Plans being prepared.

**RAILROAD WORK**—Cost not stated. Los Angeles, Cal. Engineer, Engineering Dept. Pacific Electric Railway Co., L. A. Owners, Pacific Electric Railway Co. The engineering department of Pacific Electric Railway Co. has completed plans and specifications for the elevated tracks to be erected in the rear of the Pacific Electric building. The tracks will extend from Los Angeles to San Pedro streets. The plans also provide for the erection of umbrella sheds of concrete and steel construction. The Board of Public Utilities has issued an order that the contract for the work must be awarded prior to December 31st and the work completed by July 15, 1916. The tracks at the Hill street station between 4th and 5th streets will be rearranged and umbrella shed erected.

**SCHOOL**—1 story and base, brick or hollow tile, \$25,000. Los Angeles, Cal. Architects, Train & Williams, Exchange Bldg., L. A. Owners, City of Los Angeles. Location, Adams, between 20th and 21st avenues. Will contain six class rooms and an auditorium. Interior finish pine and maple floors. Steam heat and vacuum cleaning. Exterior faced with cement plaster. Plans complete and bids to be called for at once.

**SCHOOL GROUP**—1 and 2 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Needham & Cline, Brockman Bldg., L. A. Owners, City of Los Angeles. Location, north Broadway and Pritchard streets. Group will consist of an auditorium building 100 by 110 feet with a seating capacity of 1500 people, a three-story library building 93 by 88 feet and a two-story music building 51 by 110 feet. Interior finish pine with maple floors. Central heating system and modern plumbing. Tile, marble and staff ornamentation. Exteriors faced with cement plaster. Plans complete and figures being taken. Bids to be opened on December 25th.

**SEWER PIPE**—Cost not stated. Brawley, Imperial Co., Cal. Engineer, City Engineer, Brawley, Owners, City of Brawley. Bids will be received by the City Clerk up to 5 p. m. of December 22nd, for furnishing the city with 2,620 feet of 10-inch vitrified, salt-glazed, A No. 1 sewer pipe. Certified check for 10 per cent is required. J. H. Stevenson is the clerk.

**STREET LIGHTING SYSTEM** Cost not stated. Santa Ana, Orange Co.,

Cal. Engineer, City Engineer, Santa Ana. Owners, City of Santa Ana. The City Trustees have decided to start construction of the proposed lighting system to be installed. Bids will be taken immediately for the underground work and for furnishing the electroliers and lights. Plans will be started at once, and, on completion, bids will be called for. Further mention will be made of this work when the plans are complete.

**SEWER CONSTRUCTION**—\$47,000. San Diego, Cal. Engineer, City Engineer, San Diego. Owners, City of San Diego. Doran & Armstrong, San Diego, who were awarded the sewer system contract at \$17,000, have declined to carry out the work, owing to possible legal complications. It is probable a district will be created and bonds issued.

**ROAD IMPROVEMENT**—\$19,945. Los Angeles, Cal. Engineer, City Engineer, Los Angeles. Owners, City of Los Angeles. Jas. L. Frazer of Long Beach was the lowest bidder at \$19,945 for improving 2.4 miles of Merced avenue, southwest of Covina, in Road Improvement District No. 39. The work will consist of grading, macadamizing and constructing bridges and culverts.

**PLEASURE PIERS**—Reinforced concrete and timber, \$150,000. Venice, Los Angeles Co., Cal. Engineers, Leeds & Barnard, Central Bldg., L. A. Owners, City of Venice. Plans have been submitted for four rock jetties on South Beach, two of which will extend seaward 1,000 feet and two 500 feet. Each jetty will be covered by a pier 30 feet wide and a comfort station built on the outer end of each of the longer ones. The Board of Trustees and the engineers will decide the pier locations in the next few days. Work is expected to commence about January 1st.

### Contracts Awarded

**PACKING PLANT**—1 story and base, reinforced concrete, \$25,000. Colton, San Bernardino Co., Cal. Architect, none. Owners, Pacific Fruit Express Co. Contractors, Leonardt & Peck, H. W. Hellman Bldg., L. A. Contract price, \$25,000.

**RESIDENCE**—2 story and base, brick and hollow tile, \$21,000. South Pasadena, Los Angeles Co., Cal. Architects, Marston & Van Pelt, Chamber of Commerce Bldg., Pasadena. Owner, Mrs. F. H. D. Banks, Contractor, W. A. Taylor, 966 Elizabeth street, Pasadena. Contract price, \$21,000. Note: Contract does not include plumbing, painting, heating, electric work or ornamental iron.

**OFFICE BUILDING ADDITION**—5 story and base. Class A construction, \$92,000. Los Angeles, Cal. Architect, W. J. Dodd, Marsh-Strong Bldg., L. A. Owners, Pacific Mutual Life Insurance Co. Contractors, C. J. Kubach Co., Merchants' National Bank Bldg., L. A. Contract price, \$92,000.

**STREET IMPROVEMENT**—\$43,178.97. Los Angeles, Cal. Engineer, City Engineer, Los Angeles. Owners, City of Los Angeles. Contractors, Benj. F. Ford and Fred H. Stout, L. A. Contract price, \$43,178.97.

**STREET IMPROVEMENT**—\$11,594.03. Manhattan Beach, Los Angeles Co., Cal. Engineer, City Engineer, Manhattan Beach. Owners, City of Manhattan Beach. Contractors, Municipal Improvement Co., 803 Macdonald avenue, Richmond. Contract price, \$11,594.03.

**ORNAMENTAL ELECTROLIERS**—\$12,915.94. Riverside, Riverside Co., Cal. Engineer, City Engineer, Riverside. Owners, City of Riverside. Contractors, Electric Supply Co., Riverside. Contract price, \$12,915.94.

**BULKHEAD**—Reinforced concrete and stone, \$65,000. Long Beach, Los Angeles Co., Cal. Engineer, City Engineer, Long Beach. Owners, City of Long Beach. The City Engineer has been instructed by the City Commission to prepare plans and specifications for the construction of a protection bulkhead along the west beach between Golden avenue and Chestnut Place.

### PORTLAND AND OREGON

**VIADUCT**—Reinforced concrete, \$66,000. Portland, Ore. Engineer, City Engineer, Portland. Owners, City of Portland. Bids will be opened on December 29th for the construction of the reinforced concrete viaduct necessary to complete the Union avenue extension. Plans provide for a structure 219½ feet long, 58 feet wide with a 16-foot fill 700 feet in length. The cost of the fill will be \$13,000 and of the viaduct \$53,000.

**APARTMENT HOUSE**—2 story and base, brick and hollow tile, \$25,000. Portland, Ore. Architect, E. C. Wegman, 305 Wheller street, Portland. Owner, Dr. H. F. Ong, Oregonian Bldg. Location, Clay street, Broadway and Park. Will contain 20 apartments with bath and kitchen. Interior finish pine and hardwood with some hardwood floors. Steam heat and a hot water system. Bath rooms tile. Exterior faced with pressed brick. Plans being completed.

**AUDITORIUM**—1 and 2 story and base, steel, brick and concrete, \$500,000. Portland, Ore. Architect's name not given. Owners, City of Portland. Will cover an area of 200 by 200 feet, and will contain a main auditorium, 100 by 108 feet, assembly hall, 40 by 140 feet, a second assembly room, 31 by 86 feet and stage, 108 by 168 feet. Stairways to the upper floor will be of concrete. Interior finish pine and hardwood. Steam heat, oil burning system and vacuum cleaning. Exterior faced with pressed brick trimmed with terra cotta. Plans are being prepared.

### SEATTLE AND WASHINGTON

**POST OFFICE ALTERATION**—Cost not stated. Olympia, Wash. Architect, Supervising Architect, Washington, D. C. Owners, United States Government. Bids will be received until December 27th at 10 a. m. for enlarging the drafting room and constructing skylights in the Federal building. Plans can be secured from either the Supervising Architect at Washington, D. C., or from the custodian of the building at Olympia. An official proposal appears in another column of this issue.

## BUILDING CONTRACTS

### SACRAMENTO COUNTY.

#### ALTERATIONS

N 10 FEET LOT 8, L. M. 15th and 16th Sts., Sacramento. Alterations and additions.

Owner.....George Stack, 1217 15th St., Sacramento.

Architect...None.

Contractor...William L. and Chas. H. Chatterton Gas Chatterton Bros.), 3126 T St., Sacramento.

COST, \$3350

#### FRAME DWELLING

LOT 11 BLK 1 SUB NO. 9, North Sacramento. Frame dwelling.

Owner.....H. R. Brown.

Architect...None.

Contractor...Harrison & Berg, North Sacramento.

COST, \$1250

#### FRAME GARGE

CARMELITA AND STANFORD AVE., on Lot 5, Boyle Tract, Sacramento.

One story frame garage.

Owner...E. L. Boyle, 3927 Carmello St., Sacramento.

Architect...None.

Contractor...O. H. Moore, 2929 35th St., Sacramento.

COST, \$3000

#### REPAIR STORE

No. 1015 NINTH ST., on S ¼ Lot 1 Blk J, K, 9th and 10th Sts., Sacramento.

Repair store.

Owner.....J. M. Johnson, Lessee.

Architect...None.

Day's work..... COST, \$500

#### FRAME FLATS

No. 1609 TWENTY-EIGHTH ST., on N ½ of S ¼ Lot 1 Blk P, Q, 28th & 29th Sts., Sacramento. Two-story frame (2) flats.

Owner.....Wm. Klaeser, 2139 T St., Sacramento.

Architect...None.

Contractor...W. R. Saunders, 2816 I St., Sacramento.

COST, \$5500

#### FRAME RESIDENCE

CALIFORNIA BLVD. on Lot 1415 Elmhurst, Sacramento. Two-story and basement 7-room residence.

Owner.....L. E. Morrill, Trustee, 1009 U St., Sacramento.

Architect...None.

Contractor...J. M. Morrill, 1009 U St., Sacramento.

COST, \$2100

## NOTICE OF NON-RESPONSIBILITY.

Dec. 1, 1915—YOSEMITE TERRACE, Stockton. J E Madden to Johnson & Saffield.....Nov. 27, 1915

## LONDON COMPANY GETS COTTON LAND.

Ten thousand acres of land in the northern end of Imperial Valley near Niland and Calipatria has been leased for approximately \$800,000, with the privilege of purchase, by Balfour Guthrie & Co. of London. The acreage is to be cleared and planted to cotton, which, it is said, is bringing the Imperial growers from 17 to 23 cents a pound.

According to the announcement the Walker Construction Company of El Centro and a large San Francisco concern have been retained to clear and plant the acreage and erect the necessary buildings. Work, it is said, begins immediately. The deal was handled by Manager Lawson of the San Francisco office of Balfour Guthrie & Co., and Carl Schader and W. T. McDevitt of Los Angeles.

It was stated that the Imperial cotton proposed to be planted by Balfour Guthrie & Co., is being made a specialty by the cotton growers of Imperial Valley.

THE WHOLE WORLD AWAITS THE ADVENT OF A PRACTICAL GAS HEATING DEVICE

WITH OUR UNIT PLANT FURNACES HEATING WITH CLEAN GAS IS AS PRACTICAL AND ECONOMICAL AS WITH DIRTY, DUSTY, SMOKY COAL OR OIL

HEAT WITH FRESH AIR NOT REHEATED, REBREATHED, STALE AIR

PROUDLY BY ALL WHO HAVE USED OR EXAMINED THEM TO BE THE HEATER OF THE PRESENT AND FUTURE

## Unit Plant Hot Blast Furnace

**Delivers the Heat  
A Complete Answer to the Heating Question.**

**Instantaneous**—Furnishes an instantaneous and continuous supply of Sanitary—fresh warm air free from gas fumes, odors, smoke or dust.

**Hygienic**—Maintains an even temperature necessary to health and comfort.

**Scientific**—Built like a real hot air furnace reduced in size.

**Convenient**—Operated from inside of room, saving many steps to cellar.

**Simple**—Any child 10 years of age can operate, turn the key and apply match.

**Economical**—Wall furnace burns 10 cubic feet and floor furnace 20 cubic feet of gas per hour.

**Efficient**—Each furnace will heat from 2 to 5 rooms or from 3,000 to 9,000 cubic feet of space.

**Fireproof**—Has four thicknesses of metal and three air spaces of one inch each between fire and wood; fire is 20 inches from floor.

**Up to Date**—Uses exclusively the Johnson Hot Blast Burner, recognized as the most efficient ever constructed.

**Durable**—Is made from best grade of metal to be obtained.

**Finish**—Register electro plated Flemish Brass. The finish that lasts.

**Installation**—Can be installed by any gas appliance dealer, plumber, tinsmith or hardware merchant at nominal cost.

**Retail Prices**—Wall Furnace, any style, \$22.50  
Floor Furnace, any style, 30.00  
Installations and fittings extra.

## Motion Study and Time Study Instruments of Precision.\*

By Frank H. Gilbreth, Mem. A. S. M. E.,  
and Lillian Moller Gilbreth, Ph. D.,  
Providence, R. I.

The greatest waste in the world comes from needless, ill-directed, and ineffective motions. These motions are unnecessary and preventable. Their existence in the past was excusable, because there was no knowledge of how to dispense with them. That excuse no longer obtains. The methods and devices of waste elimination are known and are being constantly used. But the knowledge of how to make these great world-wide economies is being disseminated at an astonishingly slow speed.

In the science of management, as in all other sciences, progress that is to be definite and lasting depends upon the accuracy of measurements that are made. There are three elements to every measurement:

1. The unit measured.
2. The method of measurement
3. The device by which the measurement is made.

The fundamental idea of the new type of management that has been variously called "Scientific Management," or "Measured Functional Management," is that it is based upon the results of accurate measurement. This fundamental idea has been derived as follows: Each operation to be studied is analyzed into the most elementary units possible. These units are accurately measured, and, as the results of the measurement, the efficient units only are combined into a new method of performing the work that is worthy to become a standard.

Dr. Taylor, the great pioneer in time study, and his co-worker, Mr. S. E. Thompson, have clearly defined their conception of time study as "the process of analyzing an operation into its elementary operations, and observing the time required to perform them." Time study has to do, then, fundamentally, with the measurement of units.

Now motion study has to do with the selection, invention, and substitution of the motions and their variables that are to be measured. Both accurate time study and motion study require instruments of precision that will record mechanically, with the least possible interference from the human element, in permanent form, exactly what motions and results occur. For permanent use the records must be so definite, dis-

tinct, and simple that they may be easily and immediately used, and lose none of their value or helpfulness when old, forgotten, or not personally experienced by their user.

There have undoubtedly been some vague motion studies and guess-work time studies made as far back as historical records are available, particularly in the arts of warfare. Babbage, Coulomb, Adam Smith—all recognized the importance of the time element in industrial operations, for the purpose of obtaining methods of greatest output, but not methods of least waste. It was not, however, until Dr. Taylor suggested timing the work periods separately from the rest periods that the managers tried to find accurate time-measuring devices.

It is not always recognized that some preliminary motion study and time study can be done without the aid of any accurate devices. It is even less often recognized that such work, when most successful, is usually done by one thoroughly conversant with, and skilled in, the use of the most accurate devices. In other words, it is usually advisable in studying an operation to make all possible improvements in the motions used and to comply broadly with the laws of motion study before recording the operation, except for the preliminary record that serves to show the state of the art from which the investigation started. However, in order to make a great and lasting success of this work, one must have studied motions and measured them until his eye can follow paths of motions and judge lengths of motions, and his timing sense, aided by silent rhythmic counting, can estimate times of motions with surprising accuracy. Sight, hearing, touch, and kinaesthetic sensation must all be keenly developed. With this training and equipment, a motion and time study expert can obtain preliminary results without devices, that, to the untrained or the uninformed, seem little short of a triumph. When the operation has received its preliminary revision and is ready for the accurate measurements that lead to actual standardization and the teaching that follows, devices of precise measurement become imperative for methods of least waste that will stand the test of time.

Early workers in time study made use of such well known devices as the clock, the watch, the stop watch, and

various types of stop-watches attached to a specially constructed board or imitation book. Through the use of these it became possible to record short intervals of time, subject, of course, always to the personal error. The objection to the use of these methods and devices is their variation from accuracy, due to the human element. This is especially true of the use of the stop-watch, where the reaction time of the observer is an element constantly affecting the accuracy of the records. But the greatest loss and defect of personally observed and recorded times is that they do not show the attending conditions of the varying surroundings, equipment and tools that cause the difference in the time records and give no clue to causes of shortest or quickest times.

As for motion study, Marey, with no thought of motion study in our present use of the term in his mind, developed, as one line of his multitudinous activities, a method of recording paths of motions, but never succeeded in his effort to record direction of motions photographically.

Being unable to find any devices anywhere such as the work of our motion study required, the problem that presented itself, then, to us who needed and desired instruments of precision, applicable to our motion study and to our time study, was to invent, design and construct devices that would overcome lacks in the early and existing methods. It was necessary to dispense with the human element and its attending errors and limitations. We needed devices to record the direction as well as the path or orbits of motions, and to reduce the cost of obtaining all time study and motion study data. These were needed not only from the scientific standpoint, but also from the standpoint of obtaining full co-operation of the mechanics and other workers. Many of these had, as a class, become suspicious of time study taken secretly by those who, they thought, did not know enough about the practical features of the trade to take the time study properly, and could not prove that the times were right after putting them on paper. There was absolute pioneer work to be done in inventing devices that would record times, paths, and directions of motions simultaneously. With the older time study device, there was no

\*From a paper presented at the International Engineering Congress, San Francisco, 1914.

way of recording accurately either the unit timed or the controlling surrounding conditions. The "elementary units" were groups of motions. They were elementary only with relation to the stop-watch, with which it is impossible to record accurately the time of an element of a motion, since it takes two decisions and two motions to press the stop-watch.

Through our earliest work in making progress records we recognized the necessity of recording time and conditions accurately and simultaneously, the records being made by dated photographs. This method was particularly applicable in construction work, where progress pictures taken at frequent intervals present accurate records of the surroundings, equipment and tools that affect records of output of various stages of development.

In making more intensive studies of certain trades, such as shoveling, concrete work, and bricklaying, we found it advantageous to photograph the various positions in which the hands, arms, feet, and other parts of the body involved in the operations were placed, and to record the time taken in moving from one position to another by one method, as related to the time taken in moving from the same first to the same second position by another method.<sup>2</sup> Our intensive study of bricklaying, which grew out of an appreciation of the unique history, present practice and doubtful future of this trade, led us to a more intensive study of the problems of motion and time study in general.<sup>3</sup> Bricklaying will always be the most interesting of all examples to us, for the reason, among others, that it was the first trade to use the principle of duplicate, interchangeable parts system of construction; had had six thousand years of practice in all countries; and was, therefore, a comparatively finished art, but not a science, when we undertook to change it by means of motion study.

Fortunately, we are now able to use the motion picture camera with our speed clock, and other accessories, as a device for recording elements of motions and their corresponding times, simultaneously. Our latest microchronometer records intervals of time down to any degree of accuracy required. We have made, and used, in our work of motion study investigations of hospital practice and surgery, one that records time to the millionth of an hour. This is designed for extremely accurate work, but can be adjusted to intervals of any length desired, as proves most economical or desirable for the type of work to be investigated.

Having completed our microchronometer, we proceeded as follows: The microchronometer was placed in the photographic field near the operator and his working equipment, and against a cross-sectioned background or in a cross-sectioned field, and at a cross-sectioned work bench or table. The operator then performed the operation according to the prescribed meth-

od, while the motion-picture camera recorded the various stages of the operation and the position of the hand on the microchronometer simultaneously. Thus, on the motion picture film we obtain intermittent records of the paths, the lengths, the directions, and the speeds of the motions, or the times accompanying the motions, these records all being simultaneous; and the details of the conditions of the surroundings that are visible to the eye are recorded without the failings of memory. This was a distinct step in advance, but we realized that there was a lack in the records. It was difficult, even for one especially trained and experienced, to visualize the exact path of a motion, and it was not possible to measure the length with precision from the observations of the motion picture film alone, as there is no summary or recapitulation of all the motions of a cycle or operation in any one picture. To overcome this lack we invented the cyclograph method of recording motions. This consists of attaching a small electric light to the hand or other moving part of the person or machine under observation. The motion is recorded on an ordinary photographic film or plate. Upon observing our very first cyclograph records, we found that we had attained our desire, and that the accurate path taken by the motion stood before us in two dimensions. By taking the photographic record stereoscopically, we were able to see this path in three dimensions, and to obtain what we have called the stereocyclograph. This showed us the path of the motion in all three dimensions; that is, length, breadth, and depth. It did not, however, contain the time element. This time element is of great importance not only for comparative or "relative" time, but also for exact times. This time element is obtained by putting an interrupter in the light circuit, that causes the light to flash at an even rate at a known number of times per second. This gives a line of time spots in the picture instead of a continuous cyclograph light line. Counting the light spots tells the time consumed.

The next step was to show the direction of the motions. To do this it was necessary to find the right combination of volts and amperes for the light circuit and the thickness of filament for the lamp, to cause quick lighting and slow extinguishing of the lamp. This right combination makes the light spots pointed on their latest, or forward ends. The points, thus, like the usual symbol of arrow heads, show the direction. The result was, then, of course, finally, stereochronocyclographs showing direction. These act not only as accurate records of the motions and times, but also serve as admirable teaching devices. Wire models of cyclographs and chronocyclographs of the paths and the times of motions are now constructed that have a practical educational value besides their importance as scientific records. These models are particularly useful as a step in teaching visualization of paths by photographs alone, later.

Our latest apparatus in the field of recording devices apparently fulfills all present requirements of the time and

motion study experts and their assistants and the teachers who are now devoting their lives to the transference of skill and experience from those who have it to those who have not.<sup>4</sup>

We have also devised and used many special kinds of apparatus; for example, devices for recording absolute continuity of motion paths and times, record away with the slight gaps in the record that occur between one picture and the next on the cinematograph film, due to the interval of time when the film is moving, to get in place for the next exposure. To overcome this objection we have a double cinematograph, that one part may record while the other moves from one exposure to the next. In this way we get a continuous record of the operation. There have been occasional objections to all methods of making time and motion studies that involve the presence of an observer. Some of these have come from those working on what they consider their own secret processes, who object to having any observer record what they are doing, believing that the time study man is obtaining knowledge of their skill and giving them no information in return. Others have come from those who have seen or heard "secret time study" and "watch-book time study," and who regard all observers as spies because of general lack of understanding and co-operation; and there are some instances where they are right. For such cases we have designed an autiomotion study, which consists of an instantaneous modification of the standard micromotion apparatus, and also the autostereochronocyclograph apparatus. This enables the operator to take accurate time study of himself. He can start the apparatus going and stop it where he works, with one motion of his finger or his foot. This invention supplies every possible requirement and feature for time and motion study processes, except the help and advice of a properly qualified observer, or the annoyance of having one not fitted by training, experience, or natural qualities to cooperate.

We have now a complete set of inexpensive, light, durable apparatus, adaptable to any type of work and to any type of observer or self-observation. It consists of systematically assembled units that may be so combined as to meet any possible working condition. Through a specially devised method of using the same motion picture film over and over again, up to sixteen times, and through a careful study of electrical equipment and of various types of time spot interrupters, we have been enabled to cut down the cost of making time and motion study, until now the most accurate type of studies, involving no human equation in the record can be made at less cost than the far less accurate stop-watch study.

When the time and motion study is taken with such instruments of precision, there are still other by-products that are of more value than the entire cost of the time and motion studies.<sup>5</sup>

## Railroad Commission News.

The Railroad Commission has issued an order setting the reproduction cost less depreciation of the San Francisco, Napa and Calistoga Railway at \$1,010,845.19. The line is in Napa and Solano counties. The proceeding was on the Commission's own initiative, under the public utilities act.

The road extends from Vallejo to Calistoga, with an aggregate of 41 miles of main line, and three miles of sidings.

The city of Long Beach has filed with the Railroad Commission a protest against the order of the Commission establishing an experimental rate by the Long Beach Consolidated Gas Company of \$1.25 a month for 1,000 cubic feet of natural gas. Long Beach is in Los Angeles County, and has been served by the company with a mixture of artificial and natural gas of about 800 heat units at \$1 a 1,000 cubic feet. The company asked to be permitted on December 1 to furnish natural gas exclusively of 1,000 heat units. The company said that the higher heat unit of efficiency would cause much less gas to be used, and at the \$1 rate would reduce the consumers' bills so much as to cause the company serious financial loss.

Long Beach now says to the Commission that gas of the same heat unit it was served until December 1, has been served to cities and towns in the same part of California at a much lower price. Los Angeles, it says, has gas at 6 cents, and Compton at the same rate. Long Beach has been discriminated against hitherto, the protest says, and this discrimination will be emphasized if the \$1 rate is increased. The city denies that the reduction of consumers' bills by increased units will warrant any increase in the rates.

Besides, it says, the natural gas comes from the Fullerton fields instead of from the Kern fields as before, and that the cost of delivery can not be more than one-half of that from the Kern fields.

The Southern Counties Gas Company, operating in Orange County, adjoining Long Beach, changed from manufactured gas to natural gas without any raise of rates, says Long Beach, and while there was some reduction in the revenue of the company for a while, this was overcome by an increase in the amount of gas used, and a decrease in the cost of furnishing it. Long Beach complains also against the suddenness of change and says that the gas burners of the consumers are not adjusted to the natural gas, and that pending the adjustment, which will take some time, an excess of gas will be used, besides danger and annoyance.

The Railroad Commission has issued an order postponing until March 10, 1916, the time within which Wells, Fargo & Company is to file with the

Commission tariffs covering the transportation of express packages within the State of California. The original order to the express company was issued by the Commission nearly two years ago, and the express company has been making computations to comply with it. A month ago, the company applied to the Commission for a raise in its rates, saying that it was losing more than \$500 a day on account of the low charges imposed upon it. This application of the company has not yet been set for hearing before the Commission, but will be shortly, and at this hearing the tariffs for transportation of express packages will be thoroughly gone into. The Commission prevents unnecessary duplication of effort by Wells, Fargo & Company by a postponement of the effect of its previous order.

The Railroad Commission has issued an opinion in the controversy over the franchises of the Southern California Edison Company, arising from the application of the City of Los Angeles for a fixing of the price to be paid by the city for the company's electric distributing system in Los Angeles. This valuation hearing was begun on November 22, and was adjourned to December 13. The city of Los Angeles wants to buy the distributing system of the Edison Company in the city, to use the electric power derived from the Owens River Aqueduct project for supplying electricity to the government and people of Los Angeles. After the application was filed by the city for the fixing by the compensation to the company for the condemnation of this part of the company's plant, more territory was annexed to Los Angeles. The city then, by an amendatory petition added the property in this annexed territory for compensation valuation. The question then arose as to whether certain property of the company's was excluded in the description in the application. Both sides of the controversy were heard before the Commission at the hearing on November 22. There was no dispute over the description of the physical properties, but the city claimed that it had described the parts of the company's rights to occupy and use the streets that were necessary to maintain and operate the part of the plant sought to be condemned, and that the Commission should fix the compensation on this.

The company claims that the city's description included all its franchises in the city, though there are certain important electric lines of the company in Los Angeles which were purposely left out of the description, as the city does not want them.

The Commission in its opinion says that the application by the city embraces all the franchises and says:

"It will be difficult, if not impossible, to reach a satisfactory conclusion, un-

less the application is amended, so as to make definite and specific the franchise rights of the company which the city proposes to acquire."

"The opinion also says:

"It is not the function of this Commission to determine whether the city can by condemnation take a part of a franchise held or exercised by the company, and leave the remainder of the franchise in effect, but under the law it is the duty of the Commission to fix just compensation for a part of a public utility property for which valuation is asked by a city, and the Commission may thus be called upon to fix the compensation for part of the franchise, any controversy as to the legal rights of the city to make such separation, to be settled by the courts.

The city of Long Beach has filed with the Railroad Commission an application for authority to build two highway crossings over the tracks of the Pacific Electric Railway Company, one to serve a pleasure pier at the foot of Thirty-ninth Place, and the other to give access to the beach at Termino avenue.

The Bell Water Company, of Bell, Los Angeles County, has filed with the Railroad Commission an application to increase its domestic water rate from \$1.25 minimum for 1250 cubic feet or less a month, and 5 cents a 100 cubic feet in excess thereof to \$1.50 minimum, and the same excess as before.

The Consolidated Water Securities Company, of Los Angeles, has filed with the Railroad Commission an application for authority to issue a promissory note for \$25,000 to the California Securities Loan Corporation for 3 years at 7 per cent, secured by a trust deed to the Title Guarantee and Trust Company. The company deals in real estate and incidentally operates a water utility. The money received is to buy land and pay off debts upon property.

The Saticoy Water Company, of Saticoy, Ventura County, has filed with the Railroad Commission an application for authority to borrow \$5,000, to reimburse it for expenditures for plant

The Pacific Gas and Electric Company has filed with the Railroad Commission an application for authority to issue and sell \$2,500,000 of its first preferred stock, and to use the proceeds for betterments and extensions of its system. The company wishes permission to dispose of the stock at a price that will net not less than \$90 a share. In its application the company mentions the construction for which expenditures are being made and this includes all its departments.

### NEW BRIDGE AT PRIZE OPEN.

The new concrete bridge across the trough east of Prize was crossed Wednesday by the first automobile.

The auto was driven by County Surveyor J. W. Kaerth and in the machine was S. T. Sherer and Supervisors C. J. Wescott, P. V. Berkey and Geo. B. Pence.

The old Prize bridge, a modern structure 2,140 feet in length, was constructed in 1880 and in the fall of that year Sam Sherer and Jake Kaerth, two small boys, stole a march on all hands by jumping their saddle horses onto the bridge a few days before the earth approaches were finished and rode across. Jake Kaerth insisted that when the new bridge was crossed for the first time, officially, Sam Sherer be along. So the two boys now middle aged men, who crossed the old bridge the first time, were in the party to cross the new bridge officially for the first time, 35 years later.

The new Prize bridge is one of the longest concrete bridges in the state, having a length of 2,856 feet, consisting of 54, 34-foot spans. It is of the reinforced concrete girder type 19 feet wide and was constructed for \$59,300, \$800 less than the bond issue. It was designed and constructed under the direction of County Surveyor J. W. Kaerth, Ward B. Esterly and S. V. Saph were the consulting engineers and O. N. Critchfield was the inspector in charge of construction.

Duncanson & Harelson Company were the contractors—Colusa Sun.

### TWO CITY ELECTRICAL SUPPLY SYSTEMS IN PROSPECT.

At a total cost of \$869,353 the city of Los Angeles may be called upon to provide two electrical distributing systems, one in the Eastlake Park section and another in the Hollywood district.

The proposition came up at a meeting of the water board when E. F. Scattergood, chief electrical engineer, presented a report showing the probable expenditure and the estimated revenue. The report was referred to a committee of the whole and a decision is expected to be rendered upon it at a future meeting.

Mr. Scattergood's report follows, in part:

"There are two districts of considerable size within the city of Los Angeles which are not reached by the electrical distributing lines of the Southern California Edison Company, and the electric lines of the electric companies serving these sections are so constructed as to make their separation or isolation from the remainder of the distributing systems of such companies in every way practicable.

#### Northeast Section.

"One of the two districts referred to is in the northeastern section of the city, lying east of the Los Angeles

River and north of Wabash avenue, and may be properly designated as the Eastlake Park-Highland Park-Garvanza district.

"The other district referred to may properly be termed the Hollywood and East Hollywood district, lying north of Fourth street and west of Hoover street.

"The estimated cost of constructing a complete electrical distributing system, sufficient to take care of all the electrical business within the Eastlake Park-Highland Park-Garvanza district, including street lighting, a local distributing substation in Garvanza, and the necessary equipment to make possible the delivery of surplus power wholesale for use of the city of Pasadena, is \$161,351.

The corresponding estimate of cost for the Hollywood district, not including any equipment with reference to the city of Pasadena, is \$408,022.

#### Cost Enumerated

"The probable total gross earnings from the Eastlake Park-Highland Park-Garvanza district from all commercial and domestic light and power, street lighting and the wholesale power referred to, would be \$200,000 per annum. The earnings from the street lighting, allowing \$60 per annum for are lights, instead of the present rate of \$75.60, and corresponding reduced rates for incandescent lighting, would be \$50,000 per annum, which, together with 50 per cent of the remaining business, would be \$125,000 per annum, while the total cost of operation and the necessary maintenance of the generating system of the city now being installed, together with such complete distributing system, with one-half of the business attached, would not exceed \$50,000 per annum.

"The total cost of the Eastlake Park-Highland Park-Garvanza system complete as above, excepting that but half of the commercial and domestic light and power business is connected, would be \$275,000.

#### 35 Per Cent Increase.

"The amount of street lighting contemplated is about 35 per cent greater than the present amount."

It was the opinion of the board that an ordinance of intention should follow the election in Hollywood regarding the creation of a new water district. A report on this matter will be submitted to the City Council.

A resolution was passed reappointing Phil Thomson & Clay, New York, as bond attorneys. This firm, as in the past, will pass on the legality of presentation of all bond issues.

#### ARMY ENGINEERS FILE HARBOR ESTIMATES.

That the sum of \$106,500 will be necessary for the work projected on Oakland harbor during the coming year, is the estimate of the United States army

engineers, as submitted to Congress, according to news from Washington.

The money will be expended on the existing project. No report has been made in the new survey authorized in 1912.

The work on the Oakland estuary is urged in the reports of the army men as being of extreme importance. The completion of the quay wall by the city, and the docking of a battleship there, are cited as indications of the value of the waterway and of the enterprise of the city itself, and the appropriation asked for is larger than that recommended for any other part of the bay. San Francisco's appropriation was set at \$15,000 by the army engineers and \$105,500 was urged for San Pablo Bay improvements.

Almost \$16,000,000 is asked by the army engineers for maintenance and improvement of rivers and harbors for the twelve months beginning July 1, 1916. Estimates submitted to Congress call for appropriations aggregating \$15,839,510. That amount is \$7,538,308 less than was estimated last December would be required for the year ending on July 1 for which, after a filibuster in the Senate defeated the rivers and harbors appropriation bill, \$30,000,000 was appropriated in a lump sum to be used among projects selected by the Secretary of War.

The great commerce-bearing rivers in the new estimates demand the larger portion of the money, the Mississippi leading with a call for almost \$10,000,000 and the Ohio following with \$5,509,500.

The country's greatest port of foreign commerce, New York, asks for more than \$2,000,000 for channels main-lar ge area, which includes the water-front and rivers in adjoining New Jersey and Long Island.

#### Estimates in Seriatim.

**California:** Humboldt harbor and bay, \$450,000; Los Angeles harbor, \$75,000; Oakland, \$106,500; San Francisco, \$15,000; San Pablo Bay, \$105,500; Mokelumne River, \$2,500; Petaluma Creek and Napa River, \$30,500; Redwood Creek, \$10,250; Sacramento and Feather Rivers, \$105,000; California Debris Commission, \$75,000; San Joaquin River, \$21,000.

**Oregon:** Coos Bay, \$70,000; Tillamook Bay and bar, \$10,000; Clatskanie River, \$1,000; Coquille River, \$6,000; Coos River, \$3,000; Siuslaw River, \$5,000; Yaquina River, \$3,000; Columbia and Lower Willamette Rivers below Portland, \$360,000; Columbia River, mouth \$2,104,000; Upper Columbia River and tributaries above Celilo Falls to mouth of Snake River, \$38,000; Snake River, up to Pittsburg Landing, \$25,000; Willamette and Yamhill Rivers, \$17,000.

**Washington:** Cowlitz and Lewis Rivers, \$22,500; Gray's harbor, \$500; inner portion Gray's harbor and Chehalis River to Montesano, \$30,000.

# "Beneficial Use," the Newest Principle in Water Appropriation.

By George E. McLeod, Special Agent of the State Water Commission

Abraham Lincoln said, "God must have liked the common people—He made so many of them." The common people must have liked the idea of the preservation of their natural resources of water, for they may virtually be said to have "made" the State Water Commission. This idea of conservation had been growing for several years, and in the State of California, one of its phases took the shape of an act passed in 1913 by the Legislature after a great deal of prior investigation and preparation by the previous State Conservation Commission, an organization based on Progressive principles. But some of the powerful special interests would have none of it and applied the referendum in the hope of strangling the idea near the font of its inception.

Placed upon the ballot by operation of the referendum, it was approved by the people at the general election in 1914.

Thus backed by public approval of the measure, the Water Commission is endeavoring to reflect the wishes of the people in a broad and liberal manner in matters pertaining to the waters of the State, at the same time protecting to the fullest extent of its ability the paramount and underlying principle of this new gospel of the waters, namely, that the people's water shall be for those, only, who will put it to "beneficial use" and thereby "cause the desert to bloom as the rose," the city "to shine as by day" and apply it to those other avenues of human endeavor and progress for which, under the act, it may be employed.

## The Old Way and the New.

The former idea of the principle involved in water appropriation was that individuals or corporations might file upon and appropriate the waters of the State at their pleasure, with little or no regulation, in as great an amount as they might elect, and continue to hold and possess such waters without placing the same to any immediate "beneficial use," depriving others of appropriation, capitalizing the water rights so obtained at get-rich-quick figures and speculating in a natural resource through the growth of the community—all to the detriment of the real owners of the water, the people. Under this idea immense appropriations of water have been made, and there has been an impression held by some that not much water remained unappropriated; but such is not the case. There is a vast amount of water still unappropriated, and it is this vast empire of water which it is the intent of the Water Commission Act to protect and conserve to "beneficial use," as well as the waters which may revert to the State through forfeiture and again become unappropriated waters.

The aims and objects of the Water Commission Act are therefore directed toward a continual study to protect the waters that are left and to see to

it that they are "beneficially used," not merely held, and with an avoidance, as far as may be, of long, unnecessary and costly suits to determine the rights of various claimants on common sources of supply. The use to which waters may be put under the act, is divided into four classes, viz: agricultural, power, mining and municipal supply. In the matter of domestic supply for cities, that is, water used for what may be termed "human consumption," municipalities have what is termed a "preferential right" over the individual; and the State, any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State shall have a right any time after the expiration of a period of twenty years from the time a license has been granted to an individual (or corporation), to purchase the works and property occupied and used under such license, paying therefor a price to be determined under proceedings of eminent domain—that is condemnation of the property by the people, with compensation for the property so condemned. Thus it may be seen the intent of the act has always in mind, the People, the People, the People.

## How, When and Where.

This latest idea of "beneficial use" is somewhat a new one and one of strict construction. An intending appropriator can not merely formally declare that he will put waters of the State to "beneficial use," for the purpose of acquiring the water, but he must say **how, when and where**, to express it tersely. All applications are subjected to the closest scrutiny and examination by competent authority. All things must dovetail into each other to make a complete whole. Prior appropriators on a stream are notified of the new application. They may protest on one or many grounds, for instance: That the natural flow of the stream is already used by prior appropriation or that the application may cover other rights. All these matters are heard and a determination reached only after all possible facts have been adduced. It is just as important to the applicant that his application be denied, if there is any question as to its legality, as it is to the protestant, both of whom are protected thereby from useless expense and perhaps costly and interminable litigation.

The Water Commission is therefore a clearing house of information for the intending appropriator and others, aiding and assisting them in divers ways. Reverting to the all important doctrine of "beneficial use," the appropriator must continue to apply the waters to such "beneficial use," or same will revert to the State to be again appropriated by other users. As water becomes more valuable, and the demand for it grows more acute than it now is, there will always be others waiting to use the waters that pre-

vious appropriators may cease to put to beneficial use—if in fact any may be so foolhardy as to allow a license once obtained to lapse and the waters forfeit to the State to again be placed in the category of unappropriated waters.

On the approval of an application by the Commission, a permit is issued, which assures to the applicant his right to the use of the waters involved and to none other. But no license is issued to him as proof of his water-right until he has complied with all the provisions of the permit—that is, has done all those things which he set forth in his application that he would do, and contingent on which his license issues. Therefore there are many checks kept by the State on those who wish to avail themselves of Nature's gift of life-giving waters.

Although the Commission has been organized considerably less than a year 207 applications have been submitted to it.

The creation of the Water Commission will mean much to the immediate development of many different interests of the State, as the enforcement of the completion of the work for the appropriation of waters stimulates the requirement for professional services, labor, mechanics of many classes, construction material and the like, as well as creating an additional and increasing source of wealth by reason of increased production and all that accompanies the same.

The Water Commission endeavors to be a popular organization, in the sense that it wishes to come into closest touch with the people, who were its real creator, and to extend to all the spirit and hand of helpfulness and, being a new organization in the life of the State's manifold activities, it has not yet come into the prominence that its ever-expanding sphere of usefulness will eventually bring it.

## The Rain Drop is Supreme.

The potentiality of the rain drop is supreme, whether it falls on the parched stretches of the desert or on the luxuriant slopes of the mountains of the rain-belt, and that those accumulated rain drops shall be put to "beneficial use" as is the fundamental desideratum, and not absorbed by special interests for speculative purposes. As has been aptly said, in emulation of Pinckney's famous utterance, "Millions for defense, but not one cent for tribute," "billions of drops of water for irrigation and other beneficial uses may be added, but not one drop for inflation."

And may we not fitly come back to the great "Mother of Waters," and incline ourselves not to accept the dismal view of the poet in his reference to "old ocean's gray and melancholy waste," but rather to realize that "in the seas is salvation of the soul." It is fortunate for us that it is as Byron

expresses it in the "Apostrophe to the Ocean":

"Thy shores are empires, changed in all, save Thee;

Assyria, Greece, Rome, Carthage—  
what are they?

Thy waters wasted them while they were free

And many tyrant since. Thy shores obey

The stranger, slave or savage; their decay

Has dried up realms to ruins. Not so Thou—

Unchangeable, save to the wild wind's play,

Time writes no wrinkle on Thy azure brow—

Such as Creation first beheld—Thou rollest now."

#### WATER COMMISSION NEWS.

Geo O. Berry of Cajon, San Bernardino County, has been granted a permit to appropriate one second foot of water from Vincent Springs in that county for purposes of irrigation and domestic use. By means of a pipe line he will conduct the water  $1\frac{1}{4}$  miles to 160 acres to be irrigated. The estimated cost of the works is \$1,500. The springs are located in the NW $\frac{1}{4}$  of the NW $\frac{1}{4}$  of Sec. 1, Tp. 3 N., R. 7 W., S. B. M.

Springs in Kern County located in the NW $\frac{1}{4}$  of the NE $\frac{1}{4}$  and the NE $\frac{1}{4}$  of the NW $\frac{1}{4}$  of Sec. 34, Tp. 11 N., R. 14 W., S. B. M., are the source of the appropriation of one second foot of water, a permit for which the State Water Commission has just granted Alfred P. Mansfield of 528 California street, Los Angeles. The diversion works are a shaft to be sunk at the springs and cased with rock and cement and a pipe line leading to the 326.60 acres to be irrigated. The estimated cost is \$1,000.

M. J. Whitney of Straw, Modoc County will proceed to bring under irrigation 165 acres of land in that county under a permit which has just been granted him by the State Water Commission to appropriate 800 miner's inches or 20 second feet of water from Hole in The Rock Canyon. The canyon is not tributary to any stream, but the waters which flow through it sink into the lava and are lost, at least to immediate use. By means of a storage dam 11 feet high, 296.4 feet in length the waters of the canyon through a ditch 2,291.8 feet long to the lands to be irrigated. The storage amount of the dam is 552 acre feet.

The Whitewater River in Riverside County will bring refreshment to 160 acres of land in that county, through a permit just granted to Stuart D. Allen of Redlands, San Bernardino County, by the State Water Commission. The Whitewater River is tributary to the great Salton Sea, although it sinks in the desert before it reaches that inland ocean. Mr. Allen will use 200 miner's inches of water or 5 second feet of water through a ditch a mile long from a diversion dam three feet high and twenty feet in length, made of loose rock and timber at an estimated cost of \$1,000.

James McBrien of Alturas, Modoc County, has been granted a permit by the State Water Commission to appro-

priate 104 acre feet of water from a reservoir site in that county, tributary to the Pit River. The diversion is located in the SW $\frac{1}{4}$  of the SE $\frac{1}{4}$  and SE $\frac{1}{4}$  of SE $\frac{1}{4}$  of Sec. 23, Tp. 12 N., R. 11 E., M. D. M. At a cost of \$6,000, the permittee intends to construct a storage dam 18.6 feet high, 1,021 feet in length, 12 feet wide on top with a slope of 3 to 1 in the front and 2 to 1 on the back, top of dam to be three feet above the water line of the reservoir when full. The system will irrigate 98 acres.

H. D. Porter of Rhyolite, Nevada, has been granted a permit by the State Water Commission to appropriate 2 second feet of water from Willow Springs in Inyo County for purposes of stock raising. Willow Springs are one mile southeasterly from the monument on the summit of a mountain which is the boundary line between the States of California and Nevada, being in the SE $\frac{1}{4}$  of Sec. 7, Tp. 30 N., R. 1 E., S. B. M. The cost of the diversion is \$5,000.

Walter K. Fisher of 1525 Waverly street, Palo Alto, has been granted a permit by the State Water Commission to appropriate one miner's inch of water from a spring tributary to Eau Claire Creek in El Dorado County for domestic purposes. It is in the SW $\frac{1}{4}$  of the SW $\frac{1}{4}$  of Sec. 14, Tp. 12 N., R. 17 E., M. D. M. A pipe line 200 feet long will carry the water from a small wooden tank to the place of use.

The State Water Commission has just issued a permit to F. H. Roberts of Lookout, Modoc County, to appropriate 95 acre feet of water by means of storage of run-off from lands tributary to Pit River, for irrigation purposes. The point of diversion is in the SW $\frac{1}{4}$  of the SE $\frac{1}{4}$  of Sec. 29, Tp. 40 N., R. 7 E., M. D. M. The diversion works consist of two dams, one 835 feet long and the other 1,185 feet long with 12-inch steel bedgate pipe. A ditch 760 feet long conducts the water to a natural rocky channel from where it is diverted again to the 175 acres to be irrigated. The estimated cost is \$1,800.

W. Scott Russell of Bakersfield, Kern County, has been granted a permit by the State Water Commission to appropriate 200 miner's inches or 5 second feet of water from Plato Stream in that county for agricultural purposes. The point of diversion is near the NW corner of Sec. 7, Tp. 11 N., R. 20 W., S. B. M. From two timber headgates a ditch 3,100 feet in length will conduct the water to 160 acres to be irrigated.

#### \$19,000 BRIDGE COMPLETED.

The new reinforced concrete bridge across the Sacramento River at Kennett is practically completed. It will not be thrown open to public travel until it is formally accepted by the Board of Supervisors.

Supervisor Welsh, father of the bridge, because it was largely through his persistent efforts it was built, was the first person to cross in an automobile.

Kennett has not yet received its money from the \$5,000 bonds sold a week or so ago. As soon as the money comes the city will pay the county \$1,000.

#### A TELEGRAM.

The Germans have taken Pilsener and are now surrounding Delicatessen, where the Wurst is expected. The Belgian Hares have had a falling out with the Welsh Rarebits and the Swiss Cheese is shot full of holes. This will make the Irish Stew and the English Mustard hot, and when the Russian Caviar meets with the French Pastry, it will cause a serious mobilization of the forces of the Interior. The Spanish Onions are strong for a mix-up, and if the Home Preserves are called out and spread over the German Noodles, they may Ketchup with the Navy Beans, thereby causing an uprising of the Brussels Wilhelm.

KAISER WILHELM.  
American Co-operative Journal.

#### COMMISSION OF SCIENTISTS, GEOLOGISTS AND ENGINEERS TO REPORT ON CANAL SLIDES.

President Wilson is determined to ascertain the facts with respect to the slides in the Gaillard cut that have put the Panama Canal out of commission for the commerce of the world and prevented the use of the canal by the American navy for an indefinite period.

With this object in view, announcement has been made at the War department that a commission of ten engineers, geologists and scientists has been designated to go to the Isthmus of Panama immediately to investigate the "entire subject of the slides of the Panama Canal and submit a report to the President thereon."

The commission sailed for the Isthmus Saturday, December 11, and will include some of the ablest scientists of the country.

It consists of the following:

Charles Richard Van Hise of Madison, Wis., president of the University of Wisconsin.

Brigadier General Henry Larcom Abbott of Cambridge, Mass.

John Casper Branner, geologist, president of Leland Stanford Junior University, California.

Whitman Cross of Washington, D. C. Harry Fielding Reid of Baltimore, geologist.

Dr. Charles D. Wolcott of Washington, D. C., president of the Smithsonian Institution.

Rollin Clinton Carpenter of Ithaca, N. Y., president of engineering at Cornell University.

Arthur Powell Davis of the United States Reclamation Service.

John Ripley Freeman of Providence, R. I., civil and mechanical engineer.

#### LELAND RAAB TO BE ENGINEER AT TRACY.

Leland B. Raab, who has been associated with former Engineer Tumulty, has been appointed to the office of city engineer of Tracy. He takes the place of J. Henry Smith, who resigned to transfer his headquarters to San Francisco. Raab takes office on January 1st.

## APARTMENT HOUSES

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$18,000. Architect, O. R. Thayer, 20 Montgomery street, S. F. Owner's name withheld. Location, northwest corner Dolores and 16th streets. Will contain a total of fourteen suites arranged for two, three and four room apartments and a basement garage accommodating five machines. Interiors finished in pine, hardwood and red gum. Hardwood floors. Steam heat and a hot water system. Bath rooms monolith floors. Marble and tile wainscot in the entrance lobby. Exterior covered with brick veneer and cement and English half timber. Plans being prepared.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$6,000. Architects, O'Brien Bros, 210 Montgomery street, S. F. Owner, Mr. Gallagher. Location, south Hayes near Webster. Will consist of altering three flats into six modern three room apartments. Will require new interior trim, pine and hardwood, plumbing, painting, electric work, plastering and electric work. Plans complete and figures being taken.

**BERKELEY, ALAMEDA CO., CAL.**—Apartment house, 2 story and base, frame, \$7,500. Architect, W. H. Hatcliff, Jr., First National Bank Bldg., Berkeley. Owners, Alameda County Home Builders. Location, Benvenue avenue. Will contain a number of two, three and four room suites with wall beds and private baths. Interior finish pine and hardwood with some white enamel. Hardwood floors. Steam heat and hot water system. Bath rooms composition. Exterior covered with rustic and cement plaster. Plans complete and figures being taken.

**BERKELEY, ALAMEDA CO., CAL.**—Apartment house, 2 story and base, frame, \$4,500. Architect, none. Owners, F. R. Peake Co., 2127 University avenue, Berkeley. Location, Hopkins east of The Alameda. Will contain eight room suites. Interior finished in pine and red gum with hardwood floors. Furnace heat. Open fire places and tile mantels. Bath rooms tile. Automatic water heater. Exterior covered with cement plaster. Plans complete and figures being taken.

**SEATTLE, WASH.**—Apartment house, 5 story and base, reinforced concrete and brick, \$55,000. Architects, Lawton & Moldenhauer, Alaska Bldg., Seattle. Owner, G. E. Sherwood, 2822 Alki avenue, Seattle. Location, Howard and Monroe. Will cover a considerable ground area and will be arranged for a number of two, three and four room apartments. Interior finish pine and hardwood with some white enamel. Hardwood floors. Steam heat, oil burning system, hot water system and vacuum cleaning. Wall beds. Bath rooms tile and composition. Marble and tile wainscot in entrance vestibule. Ex-

terior faced with pressed brick. Plans complete and figures being taken.

## BONDS

**MARTINEZ, CONTRA COSTA CO., CAL.**—The Martinez Development Board has adopted resolutions asking the City Trustees to call an election to vote \$55,000 bonds for the purchase of an adequate water supply system. The plan includes the construction of a reservoir of 55,000 barrels capacity and a system of wells.

**PATTERSON, STANISLAUS CO., CAL.**—On completion of the railroad now being constructed from Patterson, owners of mines on Red Mountain will construct a number of calcining plants.

**SANTA BARBARA, SANTA BARBARA CO., CAL.**—The three propositions placed before the people at a recent bond election were defeated. The improvements planned were for paving and road work.

**CROCKETT, CONTRA COSTA CO., CAL.**—The proposition of erecting a new fire house building here is now being discussed. The present quarters are inadequate.

**FAKERSFIELD, KERN CO., CAL.**—Bids are being taken by the Supervisors for the purchase of the \$60,000 issue of school bonds voted by the Conkey School District.

The State Board of Control has purchased the \$15,000 of the Maricopa School District. A new school building will be erected from the proceeds of this sale.

**LONG BEACH, LOS ANGELES CO., CAL.**—Following the advice of J. J. Engeldrum, the City Commissioners may take steps for the establishment of a municipal gas plant. According to Engeldrum the plant may be constructed for \$125,000 and would save the people from \$50,000 to \$75,000 a year.

Action is expected to be taken by the Commissioners in the near future.

**EPFLAND, SAN BENITO CO., CAL.**—H. D. Blakeslee and J. B. Brangan are urging the Chamber of Commerce to back them in the establishment of a glass factory. A site is now being considered.

**MARTINEZ, CONTRA COSTA CO., CAL.**—Geo. H. Lyford has purchased a site on Smith street near Arriba and will erect a modern laundry building on the site. Up to date machinery will be installed in the new plant.

**SAN JOSE, SANTA CLARA CO., CAL.**

A. J. Hart, a wealthy merchant of the city, has started a campaign to have the electric tower destroyed by recent storms rebuilt.

**LAUREL, SAN JOAQUIN CO., CAL.**—Bonds of \$10,000 were voted last week. An architect will be selected to draw the plans in a few days.

**AN GABRIEL, LOS ANGELES CO., CAL.**—This city is planning a \$100,000 bond issue to pave every street within the city limits. The election will be

## FULL COUNT SHINGLES.

**SACRAMENTO**—Charles G. Johnson, State Superintendent of Weights and Measures, has been advised that the Redwood Shingle Association, one of the largest organizations dealing in shingles in the State, has decided that in the future all quotations made on redwood shingles would be based on the full count. In other words, if 1000 shingles are paid for 1000 shingles will be delivered. The State Department of Weights and Measures recently notified all shingle dealers that in future all sales must be full count. Heretofore the public had been paying for 1000 shingles and getting 800.

called within the next few weeks.

**WASCO, KERN CO., CAL.**—The \$45,000 bond issue held recently carried. The funds will be used in purchasing a site and erecting a new school.

**OAKDALE, STANISLAUS CO., CAL.**—The \$2,500 bond issue of the Rodden School District has been purchased by the State Board of Control, which has also purchased the \$2,500 issue of the River Road District.

**RIVERDALE, MRESNO CO., CAL.**—An election will be held shortly by the joint union high school district to re-vote bonds of \$25,000 in which the State Accident Commission discovered a flaw.

**SANTA ANA, ORANGE CO., CAL.**—The \$66,000 school bond issue held December 4th, carried and plans for a new school will be ordered prepared in the next few days.

**DOWNEY, LOS ANGELES CO., CAL.**—The \$30,000 school bonds carried at a recent election held here.

**SANTA BARBARA, SANTA BARBARA CO., CAL.**—Bids will be received by the County Board of Supervisors up to January 2nd, 10 a. m., for the sale of \$200,000 of the \$350,000 State Highway bridge bond issue, which was voted here last September.

**POMONA, LOS ANGELES CO., CAL.**—An election will be held on January 11, 1916, for the purpose of voting on the following issues: \$15,000 bonds for street work in First street, Oak avenue, Lordsburg road, and other streets; \$15,000 bonds for storm drains in Garey avenue and Fulton road; \$10,000 bonds for construction of roads and extending bath house in Ganesha Park and constructing an underground sprinkling system in Lincoln Park; \$5,000 bonds for street work in Fifth street, and \$5,000 for the construction of a Chamber of Commerce building. T. R. Trotter is the City Clerk.

**HOLTVILLE, IMPERIAL CO., CAL.**—The Board of Supervisors has ratified the sale of Niland school bonds amounting to \$20,000 and the Ferrell school bonds, \$6,000, to the First National Bank.

**CHINO, SAN BERNARDINO CO., CAL.**—A bond issue in the sum of \$128,000 for the new sewer system (\$55,000), and street paving (\$73,000) will be voted on early next spring. The plans for the work have been approved by the Board of Trustees.

**BAKERSFIELD, KERN CO., CAL.**—The election held in this city last week to vote on the question of issuing and selling bonds of \$75,000 for school improvements carried by a large majority. Plans for the improvements will be selected shortly and the work will go under way.

**SANTA CLARA, SANTA CLARA CO., CAL.**—An ordinance has been passed by the City Trustees for calling an election to vote bonds of \$45,000 for the construction and completion of certain municipal improvements. The election will be held on December 23rd.

**CHICO, BUTTE CO., CAL.**—In an effort to secure the financing of the link of State Highway from the Butte County line to Los Molinos, which would complete the highway from Chico to Red Bluff, have appeared before the Highway Commission in Sacramento to offer for sale enough bonds to build the road.

Already Tehama and Butte County citizens have promised to subscribe for the issue. The strip of road is about twelve miles in length.

**SACRAMENTO, CAL.**—The Supreme Court of California has issued a writ of mandate directing E. D. Adams, City Auditor of Sacramento, to sign and issue \$700,000 of bonds authorized by the people, to purchase two blocks of ground for the extension of the State Capitol grounds.

The bond issue was voted to enable the city to acquire title to a strip of land two blocks long and one wide near the Capitol grounds, and to present the land to the State for the erection of an addition to the Capitol building.

**FORTUNA, HUMBOLDT CO., CAL.**—The Industrial Accident Commission, through the State Board of Control, purchased the Fortuna High School bonds, offering a premium of \$1,000. Now that the bonds are sold plans for the new building will be ordered prepared.

**OROVILLE, BUTTE CO., CAL.**—Final action on the Paradise petition asking the calling of an election on the formation of a drainage district by the Board of Supervisors will be taken at a hearing scheduled for January 4.

The petition has received the official approval of the State Engineer's office and also that of County Surveyor Martin C. Polk of Butte County.

**SELBY, CONTRA COSTA CO., CAL.**—By a unanimous vote the \$11,000 issue of school bonds carried last week. Bids for the sale of the bonds will be asked immediately.

**OROVILLE, BUTTE CO., CAL.**—The establishment of a cannery in Oroville for fruits and vegetables is now being considered by the California Ripe Olive Company. The matter has been under consideration for some time, and definite plans may be evolved in the near future.

**RIVERSIDE, RIVERSIDE CO., CAL.**—That the Pacific Light and Power Company's plant at Highgrove, destroyed March 28 last by fire, will probably be rebuilt in the very near future, is indicated by the fact that the company has been granted a new 20-year lease on the water power by the directors of the Riverside Water Company.

### BRIDGES, DAMS AND HARBOR WORK

**SAN ANDREAS, CALAVERAS CO., CAL.**—Bridge, reinforced concrete, \$8,000. Engineer, County Surveyor, San Andreas. Owners, Calaveras County. Two sets of plans were received by the County of Board of Supervisors at their last meeting for a reinforced concrete bridge over the Calaveras River between San Andreas and North Branch, Jenkins & Wells, Sacramento. "Girder Concrete bridge." Estimated cost, \$8,000. Commonwealth Engineering Co., San Francisco. "Arch Reinforced Concrete bridge." Estimated cost, \$9,500. The plans and specifications received will be forwarded to the Highway way Commission for approval or rejection. Further mention will be made of this work when the Highway Commission takes action on the plans.

**ATBURN, PLACER CO., CAL.**—Bridge, reinforced concrete and steel.

Cost not stated. Engineer, County Surveyor, Auburn. Owners, Placer County. The Supervisors have agreed to pay one-third of the cost of constructing a bridge across the Bear River on the Dutch Flat and You Bet road, providing the County of Nevada and the Pacific Gas and Electric Co. pay the other two-thirds. The proposition of the counties and the electric company each paying a third of the cost was put up to the Placer Supervisors about a month ago. The Supervisors spent much time in seeking rights of way along the line of the proposed State Highway lateral leading from Auburn to Roseville. The Board has appropriated \$500 to be used in repairing the road leading from Auburn to the American River where the wire bridge crosses.

**RED BLUFF, TEHAMA CO., CAL.**—Bridges, steel and reinforced concrete. Cost not stated. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. Plans and specifications having been completed, the Clerk of the Supervisors has been instructed to advertise for bids until January 4th, 10 a. m. for the construction of a steel and concrete bridge across Brickyard Creek on the Red Bluff and Corning road. Further information may be had from the County Clerk at Red Bluff.

**MERCED, MERCED CO., CAL.**—Bridges, reinforced concrete. Cost not stated. Engineer, County Surveyor, Merced. Owners, Merced County. Bids will be received on January 4th for the construction of reinforced concrete bridges in Road District No. 4 as follows: Over Quinto Creek on the Cottonwood School House road, to be known as Bridge No. 41; over the lower canal on the Cottonwood road, to be known as Bridge No. 42; also for the construction of a reinforced concrete bridge on the State Highway about one mile south of Buhach Station in Road District No. 3, to be known as Bridge No. 43.

**SONOMA, SONOMA CO., CAL.**—Bridge, reinforced concrete, \$1,250. Engineers, Leonard & Day, Rialto Bldg., S. F. Owners, City of Sonoma. At the last meeting of the City Council plans and specifications were ordered prepared for the construction of a bridge on Washington street. Further mention will be made of the work when the plans are complete.

**SANTA CRUZ, SANTA CRUZ CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor, Santa Cruz. Owners, Santa Cruz County. Bids will be opened on January 3rd for the construction of a bridge across Branciforte Creek, just below the junction with Granite Creek.

### COURT HOUSES.

**SAN FRANCISCO**—City Hall furniture. Cost not stated. Architects, Fiskewell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Bids will be opened by the Board of Public Works on December 24th for furnishing special furniture for the Supervisors' Chambers in the new City Hall.

**MERCED, MERCED CO., CAL.**—Court house alterations. Cost not stated. Architect's name not given. Owners, Merced County. Bids will be re-

ceived on January 1th for the placing of hardwood flooring in the lower corridor of the Court House and also for the remodeling of the upper floor.

## FACTORIES AND WAREHOUSES

**SAN FRANCISCO**—Warehouse and offices, 5 story and base, reinforced concrete. Cost not stated. Architect, George Wagner, 116 Townsend street, G. Albert Lansburgh, Advisory Architect, 709 Mission street. Owner, L. A. Norris, leased to M. J. Brandenstein Co. Location, Third near Townsend, covering an area of 127 by 160 feet. Fireproof construction, metal window sash and frames and fireproof doors. Special conveying machinery. Steam heat, oil burning plant, and elevator equipment. Special trim in office portion. Exterior faced with cement plaster. Plans being prepared.

**SAN FRANCISCO**—Assembling plant, 5 story and base, reinforced concrete, \$200,000. Architect, Engineering Department Ford Motor Car Co., Detroit, Mich. Owners, Ford Motor Car Co. Location, Treat avenue and 21st street, covering an area of 125 by 139 feet. Fireproof construction, concrete walls, floors and roof slabs. Interior pine and rough. Elevator service. Metal window sash and frames and fireproof doors. Exterior faced with cement plaster. Plans complete and to be forwarded to San Francisco at once.

**SAN FRANCISCO**—Factory, 2 story and base, reinforced concrete, \$3,000. Architect, none. Owner, A. Haus, 425 Potrero street, S. F. Location, rear of 425 Potrero. Concrete floor. No interior trim. Designed for factory for ornamental iron work. Exterior cement plaster. Plans complete and work to be done by Day Labor.

**OAKLAND, CAL.**—Factory plant, 1, 2 story and 3, 1 story, reinforced concrete, \$200,000 to \$300,000. Architect's name not given. Owners, Chevrolet Co., represented by Norman De Vaux, 1600 Van Ness avenue, S. F. Location, Pothill Boulevard. Plans have been prepared in the east and will be forwarded to San Francisco shortly, when complete details of construction can be given. A local supervising architect will be appointed.

**OAKLAND, CAL.**—Flour mill, 1 and 1 story, reinforced concrete. Cost not stated. Engineer's name not given. Owners, Albers Bros. Milling Co., 312 Pine street, S. F. Location, Key Route Hill. Details of the buildings have not been made public. The selection of an architect will be announced within a week or ten days when further mention will be made of the work.

**OREGON CITY, ORE.**—Paper mill, 2 story and base, reinforced concrete, \$500,000. Architect's name not given. Owners, Hawley Pulp and Paper Co. The special committee appointed to investigate the proposition to sell a piece of property to the Hawley Pulp and Paper Co., filed their report which favored the action, and the Council in turn passed an ordinance permitting the sale. The action of the Council will result in the erection of a \$500,000 plant by the company. The proposed structure will be of reinforced concrete construction and will be modern in every respect, according to W. P.

Hawley, president and manager of the company.

**ONTARIO, SAN BERNARDINO CO., CAL.**—Packing houses, 2, 1 story, frame and concrete, \$10,000. Architect's name not given. Owners, San Antonio Growers' Association. The San Antonio Growers' Association has decided to erect two packing houses and dry yards. Funds will be raised by a pro rata average assessment one will be erected in Ontario and the other at Chino. Judge C. M. Whitney of Ontario is the secretary of the board of trustees.

**PLANDER, ORANGE CO., CAL.**—Packing plant, 2 story, hollow the construction. Cost not stated. Architect, Foss Designing and Building Co., 100 East Colorado street, L. A. Owners, California Fruit Products Co. Will cover an area of 60 by 80 feet. No interior finish. Exterior faced with cement plaster. Plans are being prepared and the building will probably be erected by the Foss Designing and Building Co.

**LOS ANGELES, CAL.**—Warehouse, 4 story and base, Class C construction. Cost not stated. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, Los Angeles Soap Co. Location, Fanning street, covering an area of 100 by 100 feet. Pine and rough interior finish. Electric freight elevator, automatic sprinkler system throughout the building. Metal window sash and frames and fireproof doors. Exterior faced with selected common brick. Plans complete and figures being taken.

## Contracts Awarded.

**CAMARILLO, VENTURA CO., CAL.**—Storage building, 1 story and base, reinforced concrete, \$21,500. Architect, Alfred P. Priest, Pay Bldg., L. A. Owners, J. L. Lewis & Son, Contractor, J. A. Crook, Byrne Bldg., L. A. Contract price, \$21,300.

## FIRE HOUSES AND JAILS

**SAN FRANCISCO**—Fire house, 3 story and base, Class C construction, \$60,000. Architects, Ward & Pehme, Alaska Commercial Bldg., S. F. Owners, City and County of San Francisco. Final approval of plans and specifications for this building have been given and the Board of Public Works has been instructed to advertise for bids. The building will be known as Engine House No. 1, and will be erected on the north side of Howard street between Second and Third streets.

## FIRE REPORT

**OAKLAND, CAL.**—Fire destroyed the residence of Mrs. A. Petrey at 3512 Harrison street, last week, causing a loss of \$10,000.

**HEBERTS, CONTRA COSTA CO., CAL.**—Mixing plant No. 2, of the Dupont Powder Company, was destroyed last week at a loss of \$2,000. Short circuit of a motor was the cause of an explosion. Preparations will be made immediately to have the plant rebuilt.

**STOCKTON, SAN JOAQUIN CO., CAL.**—The store, belonging to L. M. Paul & Co. was completely destroyed by fire last week. The loss is estimated at \$30,000. Insurance covers 75 per cent of the loss. The building was a two-story brick.

**MARTINEZ, CONTRA COSTA CO., CAL.**—The residence of Frank DeLuca

at 1000 Hill was destroyed by fire last week, causing a loss of \$6,000.

## FLATS

**SAN FRANCISCO**—Flats, 2, 2 story and base, frame, \$5,000 each. Architect, none. Owner, O. E. Anderson, 248 18th avenue, S. F. Location, east 10th avenue, south of Balboa, covering an area of 100 by 66 feet. Will contain two modern flats of five and six rooms. Basement garages. Interior finished in pine, hardwood and white enamel. Hardwood floors. Open fire places and tile or brick mantels. Automatic water heaters. Exteriors covered with rustic and cement plaster. Plans complete and work to be done by day labor.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$5,500. Architect, none. Owner, Louis H. Lee, 135 Carl street, S. F. Location, west 9th avenue north of Anza. Will contain two flats of five and six rooms, bath and sleeping porch. Basement garage. Interior finish pine and hardwood with some white enamel. Hardwood floors. Open fire places and tile or brick mantels. Tile in bath rooms. Automatic water heater. Exterior covered with rustic and cement plaster on metal lath. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$3,000. Architect, none. Owner, Michael Cain, 1255 21st avenue, S. F. Location, west 21st avenue north of Irving. Will contain two flats of five and six rooms. Interiors finished in pine and white enamel. Hardwood floors, open fire places and tile mantels. Automatic water heaters. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Flats and store, 3 story and base, frame, \$4,000. Architect, none. Owner, Thomas Kelly, 2909 Bush street. Location, southeast Clement and 15th avenue. Will contain one store and three small flats. Interior finish pine throughout. Open fire places and tile mantels. Wall beds. Hardwood floors. Exterior covered with shiplap and cement plaster. Plans complete and work to be done by Day Labor.

## GARAGES

**SAN FRANCISCO**—Garage, 2 story and base, Class A construction, \$25,000. Architects, O'Brien Bros., 210 Montgomery street, S. F. Owner's name withheld. Location, Down Town District. Will cover an area of 60 by 120 feet. Complete steel frame, steel roof trusses and concrete floor. Interior rough pine and rough. Special gasoline tanks. Metal window sash and frames. Exterior faced with cement plaster. Plans being prepared and will be ready for figures in ten days.

**SAN FRANCISCO**—Sales room and garage, 1 story and base, brick, \$6,000. Architects, M. C. Hughes & Co., 619 W. Washington street, S. F. Owner, John A. McRae. Location, south Golden Gate east of Leekin. Interior finish pine. Some tile floors. Patent stone fronts and marble base. Exterior faced with rough brick. Plans being prepared.

**SAN ANGELES, CAL.**—Automobile shop and garage, 1 story and base, brick. Cost not stated. Architect, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, Mrs. S. H.

Van Nuys, leased to National Automobile School. Location, Figueroa south of 8th, covering an area of 60 by 155 feet. Will contain offices, shop rooms, garage and assembly hall on first floor and class rooms above. Interior finish pine. Cement floors. Metal window sash and frames. Exterior faced with pressed brick. Plans complete and figures being taken.

#### Contracts Awarded

OAKLAND, CAL.—Garage. 1 story and base, brick, \$8,000. Architect, none. Owner, John Dach. Contractor, C. A. Scoville, 5216 Claremont avenue, Oakland. Contract price, \$8,000. Contractor is now taking subfigures.

OAKLAND, CAL.—Garage. 1 story and base, brick, \$8,348. Architect, none. Owner, C. P. Kiel, San Leandro. Contractors, Larmer & Muller, 170 Boulevard Way, Oakland. Contract price, \$8,348. Contractor is now taking subfigures.

### GOVERNMENT WORK & SUPPLIES

#### Sale of Vessel.

The Navy Department is advertising for sale the U. S. S. Justin and the U. S. S. Oneida. In connection therewith the following circular has been issued:

In accordance with the provisions of section 5 of the act of Congress approved March 3, 1883, sealed proposals will be received at the bureau of supplies and accounts, Navy Department, Washington, D. C., until 12 o'clock noon January 24, 1916, at which time and place they will be publicly opened, for the purchase of the following vessels, which have been stricken from the Navy Register, after survey, condemnation, and appraisal, under authority of the act of August 5, 1882: U. S. S. Justin.

The Justin is a steel schooner, built in 1891 at Middleboro-on-Tees, England, by R. Dixon Co. She is expected to reach the navy yard, Mare Island, Cal., about December 15. Length, 287 feet 6 inches; breadth, 39 feet; depth of hold, 23 feet; mean draft, 19 feet 8 inches.

Vertical 3-expansion engine; total maximum 1. H. P., 978. Bunker capacity, 167 tons; cargo capacity for coal, 2,900 tons.

As appraised by a board of survey and appraisal the value of the vessel is \$75,000, and she will be sold for cash to the bidder offering the highest price above the appraised value.

anchors, chains, furniture, galley equipment, engines, electrical equipment, standing rigging, spare propeller and patterns, etc., will be sold with the vessel.

#### Fort Logan, Colo., Building.

The contract for the construction of a basement under the N. C. O. quarters at Fort Logan, Colo., has been awarded to C. B. Elkins of Denver, Colo., at \$2,490.

#### Clearing Land.

Schedule of bids received at opening at Meadow Creek, Wash., for clearing of 1,200 acres of timbered land at Lake Keechelus:

Harrington-Peters Co., Seattle, Wash., \$129,000.

Maxham & Maxham, Tacoma, Wash., \$165,000.

M. P. Zindorf, Seattle, Wash., \$178,000.

T. J. Meagher, Snohomish, Wash., \$197,120.

King & Lohnes, Snohomish, Wash., \$234,080.

Alex. I. Odegard, Kittitas, Wash., \$243,836.

#### Pearl Harbor, H. T., Radio Building.

The following bids were received by the chief of the bureau of yards and docks, Navy Department, Washington, D. C., for constructing 3 radio station buildings at the naval station, Pearl Harbor, H. T.:

Item 1, work complete; A, powerhouse; B, operating building; C, double quarters for operators; item 2, deduct for omitting furring and plastering; 3, work, complete, with several modifications; A, powerhouse; B, operating building; C, quarters for operators.

The Spaulding Construction Co., Rialto Building, San Francisco, Cal., item 1, \$31,685; A, \$12,023; B, \$10,127; C, \$9,535; 2, \$250; 3, \$28,635; A, \$12,423; B, \$7,127; C, \$9,535.

The Construction & Engineering Co., 1047 Folsom street, San Francisco, Cal., item 1, \$29,322; A, \$11,471; B, \$9,722; C, \$8,129.

#### Government Contractors' Association.

The fourth annual meeting of the Association of Government Contractors will be held at the Raleigh Hotel, Washington, D. C., from January 4 to January 6 next.

#### Los Angeles, Cal., Painting.

The contract for exterior painting at the U. S. post office, Los Angeles, Cal., has been awarded to Amos & Berg at \$500.

#### Denver, Colo., Mail Chutes.

The contract for installing two mail chutes in the U. S. post office at Denver, Colo., has been awarded to American Mailing Device Corp., 103 Park avenue, New York City, at \$745; time 40 days.

#### New Army Construction.

The quartermaster general of the Army recently visited, on his transcontinental inspection trip, the Presidio of San Francisco and examined the buildings at that post with a view of having certain alterations and repairs made and determining to what extent there should be new construction. General Aleshire will shortly make his recommendations regarding the changes in the existing structures, and steps will soon be taken to obtain bids for the construction of new officers' quarters sufficient to provide habitations for a brigade commander and his staff and a number of line officers. It has not been decided whether the buildings will be of concrete, brick, tile, or stucco. The design will be in accordance with the prevailing type of architecture. Considerable criticism has been directed against the Army quartermasters by the San Francisco papers, notably the Chronicle, of that city, because there has been a failure to erect new buildings, and it is asserted, among other things, that "the military brain works slowly" and that there could be profitable application made of the sum of \$450,000 appro-

priated for the exposition and remaining unexpended in that direction. Of course, this amount is not available for Army purposes, and it would require the authority of Congress to have it expendable for quarters at the Presidio or any other Army station.

#### Letterman Hospital Roads.

The bid of the Fay Improvement Co., of San Francisco, Cal., \$2,697.50 in amount, has been accepted for constructing roads, wharfs, and gutters at the Letterman General Hospital, San Francisco, Cal.

#### Trouble With Cable Contractor.

The question has been presented whether or not the General Electric Company can be relieved from entering into a contract with the War Department for supplying certain cables for use at Corregidor Island in accordance with the accepted bid of the company on the ground of a mistake as to the character of cable to be furnished under the specifications. The contractor specified the character of the insulation of the cable, but made no statement as to whether or not the cable would be armored. The application for relief is based on the claim that the specifications are not clear as to whether or not the cable was to be steel armored cable; that the company frequently had requests for armored cable when only lead-covered cable was desired, and that in submitting the bid it was assumed that lead-covered cable only was required. It was found that if the company was held to its bid it would suffer a financial loss, and, as it was not desired to impose unnecessary hardships upon bidders because of their mistakes, it was recommended by the quartermaster general that the item be readvertised. The War Department has approved of this recommendation on the ground that this is a case where there is a fundamental error which excludes true consent, one party intending one thing and the other a different thing. This action is in line of precedence. The amount involved in the contract is about \$3,000.

SAN FRANCISCO — Bronze lamp standards. Cost not stated. Architect, Supervising Architect, Washington, D. C. Owners, United States Government. Bids will be opened on January 5th for furnishing ornamental bronze lamp standards for the United States Customs House. Plans can be secured from the office of the Supervising Architect or from the Custodian of the building.

### HALLS AND SOCIETY BUILDINGS

#### Contracts Awarded.

TULARE, TULARE CO., CAL.—Lodge hall and offices, 2 story and base, brick, \$20,000. Architect, Ernest J. Kump, Howell Bldg., Fresno. Owner, E. J. Ryan. Contractor, James J. Daley, Fresno. Contract price, \$20,000.

### HOSPITALS

SAN FRANCISCO—Hospital excavating and foundation work, \$15,637. Architect and foundation work, \$15,637. Architect, and John Reid, Jr., First National Bank Bldg., A. F. Owners, City and County of San Francisco. O. Mon-

son presented the low bid for excavating and foundation work at the San Francisco Hospital at \$15,677, and will be awarded the contract. A complete list of the bids opened appears under the heading of San Francisco in this issue.

**BERKELEY, ALAMEDA CO., CAL.**—Hospital, dairy building, frame, \$5,400. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. L. G. Bergen & Son, Hearst Bldg., S. F., were the low bidders on this work and will be awarded the contract. A complete list of the bids appears under the heading of Oakland and Alameda County in this issue.

**EUREKA, HUMBOLDT CO., CAL.**—Hospital addition, 2 story and base, frame and plaster, \$13,990. Architect, E. J. Burke, Eureka. Owners, Humboldt County, Louis Halvorsen, Eureka, presented the lowest figure for the new addition to the County Hospital and will be awarded the contract. A complete list of the bids received will be found under the heading of Sacramento, Stockton and Northern California.

**NORWALK, LOS ANGELES CO., CAL.**—Hospital laundry building, 1 story and base, reinforced concrete, \$14,672. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. L. B. Burgen & Son, Hearst Bldg., S. F., presented the low bid for the construction of the laundry building at the Norwalk State Hospital and will be awarded the contract. A complete list of the bids received will be found under the heading of Los Angeles and Southern California.

#### Contracts Awarded.

**SAN FRANCISCO**—Hospital, steel, \$60,190 and \$10,975. Architects, Hermann Barth, 12 Geary street, and John Reid, Jr., First National Bank Bldg., S. F. Owners, City and County of San Francisco. Contractors, Iyer Bros., S. F., southeast wing, \$60,190; northeast wing, \$10,975.

#### HOTELS

**AGUA CALIENTE, SONOMA CO., CAL.**—Resort hotel, 1 and 2 story and base, frame, \$35,000. Architects, O'Brien Bros., 210 Montgomery street, S. F. Owners, Agua Caliente Hot Springs Hotel Co. There will be one two-story hotel and two bath houses, each of one story. The design is in the Mission style. Interior will be finished in pine and redwood with some hardwood floors. Steam heat and a hot water circulating system will be installed. Exterior will be covered with cement plaster on metal lath. Plans are complete and figures will be called for in about ten days.

**FRESNO, FRESNO CO., CAL.** Hotel addition, 2 story and base, brick. Cost not stated. Architects, Swartz & Swartz, Rowell Bldg., Fresno. Owners, Elric Estate. Location, J. Street. The proposed addition will be made to a two-story brick store building. The new portion will contain in the neighborhood of 85 rooms and a number of public and private baths. Interior finish pine. Steam heat and a hot water system. Exterior faced with pressed brick. Plans being prepared.

**SEATTLE, WASH.** Hotel, 11 story and base, reinforced concrete, \$100,000. Architect, A. Warren Gould, American

Bank Bldg., Seattle. Owners, Arctic Club. Location, corner of 3rd avenue and Cherry street, covering an area of 110 by 120 feet. A portion of the building will be occupied by the Arctic Club and offices, but by far the largest part of the building will be given over to the hotel. Interior will be hand-somely finished. Steam heat, oil burning plant, elevator service, and hot water system. Bath rooms tiled. Exterior faced with terra cotta. Plans complete and figures to be called for shortly.

#### IRRIGATION PROJECTS

**SACRAMENTO, CAL.** Irrigation project. Cost not stated. Engineer's name not given. Owners, Cosumnes Water District. A plan for the formation of an irrigation district, which will bring under intensive cultivation some 10,000 acres of land in Sacramento County, has been made known through the Cosumnes water contest, which is now pending in the United States Land Office. The plans of the Cosumnes Irrigation Co. to store water at Pecker's Ford and other places along the Cosumnes River and by means of ditches to carry it to Sacramento County, will be called out.

**MODESTO, STANISLAUS CO., CAL.**—Laterals and drops, concrete. Cost as follows. Engineer, Chief Engineer Hermann, Modesto. Owners, Modesto Irrigation District. At the last meeting of the Board of Directors of the Modesto Irrigation District bids were opened for constructing four concrete structures, drops, in laterals Nos. 7 and 1, 4 and nine bids, the lowest was that of Geo. A. Fos, Hearst Bldg., S. F., at \$7,184.50, and the second lowest was the Ross Construction Co., Forum Bldg., Sacramento, at \$7,558. These two bids were retained, and Fos was given until the 15th to file proper bonds and workmen's compensation insurance. The second bid is retained 4 as a protection for the district in case Fos should fail to meet the requirements. The other bids for the work were: M. Blumenkranz, \$8,101.21; Thieslau Bros., \$8,912.50; March, Los & Gardner, \$8,260.75; J. J. Westley, \$8,231.75; H. J. Ulrich, \$8,065.25; Barrett & Hilp, \$8,735, and Thurston Co., \$8,290.

**MODESTO, STANISLAUS CO., CAL.** Irrigation fill. Cost not stated. Engineer, Chief Engineer Hermann, Modesto. Owners, Modesto Irrigation District. Bids will be received until Jan. 15th for the construction of an earth fill along the line of lateral No. 1 of the Modesto Irrigation District on the site of the present fill.

#### Contracts Awarded.

**YREKA, SISKIYOU CO., CAL.** Ditch. Cost not stated. Engineer's name not given. Owners, Potts Valley Land Co., Modesto. Contractors, Chapman & Co., Klamath Falls, Ore. The plans of ditch. Cost not stated.

#### RAILROAD CONSTRUCTION AND EQUIPMENT

**MARTINEZ, CONTRA COSTA CO., CAL.** Railroad work. Cost not stated. Engineer's name not given. Owners, represented by the United Fruit Co., San Francisco. Includes the construction of

part of a proposed electric car line to connect this city with Concord, and according to a statement issued by the line will soon be in course of construction. While Mr. McClellan, who is a capitalist, asserts that the line will not be owned or operated by the Oakland and Antioch, he admits connection connected with that company can be with him in the enterprise, and that the proposed line will connect with the present electric road at Concord, and passengers taken to San Francisco and Sacramento from there. Further mention will be made of this work.

**THE P. LUTTE CO., CAL.**—Electric line extension. Cost not stated. Engineer, Engineering Dept. of Western Pacific Co. Owners, Western Pacific Co. According to word received from this city, a branch line from Oroville to Chico will be constructed as soon as the Western Pacific Company emerges from the present receivership, according to statements made by General Manager C. M. Levy. Funds for this work are available. Other proposed feeders are: Oakland to Berkeley, 10 miles; San Francisco to San Jose, along the peninsula, 19 miles; Oakland to Sacramento through Alameda, Contra Costa, Solano, Yolo and Sacramento Counties, 95 miles; Point Richmond to a point on Oakland and Sausalito branch, 27 miles; Martinez to a point on the same branch, 3 miles; Stockton to Fresno, 115 miles; Spanish Creek to Big Meadows, 20 miles; Beckwith Pass to Truckee River, 35 miles.

#### Contracts Awarded.

**PORTLAND, ORE.**—Rolling railroad tunnel, \$100,000. Engineer, Engineering Dept. of O. R. & N. Co. Owners, Oregon-Washington Railroad and Navigation Co. Contractors, Guthrie-McDougall Co., Pittsburg, Bldg., Portland. Contract price, \$100,000.

#### POWER IMPROVEMENTS

**SAN FRANCISCO**—Power improvement, \$4,000,000. Engineer, Engineer-in-Chief of Great Western Power Co., Shreve Bldg., S. F. Owners, Great Western Power Co. Plans for immediate expenditure of \$1,000,000 for improvements have been submitted to the Railroad Commission by the newly organized Great Western Power Co., incorporated for \$600,000 to take over the properties of the twelve companies comprising the Great Western Power system, operating in San Francisco and ten other counties. Mortimer Leisnercker, president of the company, said \$100,000,000 would be spent in the next ten years. The plans submitted include the following: Two 5000-horsepower generator sets in Oakland and the Key Route system to cost \$150,000. A hundred and fifty-six mile transmission line from its plant in Colusa County to Oakland, \$100,000. A 100-mile line to the Plumas County plant, \$100,000. A third cable under San Francisco Bay, \$100,000. New 1000-horsepower lines in Oakland, Sierra Nevada and in the Sacramento Valley.

**AMPLIA, WASH.** Power development, \$1,000,000. Engineer's name not given. Owner, Hugh L. Copper Co. According to permit to the Hugh L. Copper Co. to overflow the land of the Columbia River for a distance of 1000 feet, such a dam in the Z

Canyon, coupled with a permit secured a year ago for similar rights, and another pending before the land commissioners at Olympia, means the immediate starting of construction on a huge dam about a mile north of Blue-side, Wash. The grant now asked extends from Blue-side to Ione, Wash. Surveys are now being made by the company's engineers of the proposed power site. The hydro-chemical and power project will involve an expenditure of \$10,000,000.

### RESIDENCES

SAN FRANCISCO—Residences, 2, 2 story and base, frame, \$5,000 each. Architects, Fabre & Bearwald, Merchants' National Bank Bldg., S. F. Owner's name withheld. Location, Forest Hill. Each house will contain eight rooms, two baths and sleeping porches. Separate garages will be erected. Interiors will be finished in pine, hardwood and white enamel. Hardwood floors. Furnace heat and open fire places. Mantels tile or brick. Bath rooms tile. Automatic water heaters. Exteriors covered with rustic and cement plaster on metal lath. Plans being prepared.

SAN FRANCISCO—Residences, 2, 2 story and base, frame, \$3,000 each. Architect, none. Owner, Thomas Hamill, 5525 Geary street, S. F. Location, west 19th avenue north of Balboa. Each house will contain seven rooms, bath and sleeping porch. Interiors finished in pine, white enamel and southern gum. Hardwood floors and open fire places. Mantels tile and brick. Tile bath rooms. Automatic water heaters. Exterior covered with shiplap and cement plaster. Plans complete and work to be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$5,000. Architect, none. Owners, Conservative Building and Investment Co., Phelan Bldg., S. F. Location, southeast Alton and 9th avenue. Will contain eight rooms, two baths and sleeping porch. Interior finished in pine, southern gum and white enamel. Hardwood floors. Furnace heat and open fire places. Mantels tile and brick. Bath rooms tile. Automatic water heater. Exterior covered with cement plaster on metal lath. Plans complete and work to be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,800. Architect, none. Owners, Elmer and Mable Clark, 574 26th avenue, S. F. Location, east 25th avenue north of Anza. Will contain six rooms, bath and sleeping porch. Basement garage. Interior finish pine and white enamel. Hardwood floors. Open fire place and tile or brick mantel. Tile and composition in bath room. Automatic water heater. Exterior covered with rustic and brick veneer. Plans complete and work to be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, H. P. Otten, 555 25th avenue, S. F. Location, west 25th avenue south of Geary. Will contain six rooms, bath and sleeping porch. Interior finish pine and white enamel. Hardwood floors. Open fire places and tile or brick mantels. Tile and composition in bath room. Automatic water heater. Exterior covered with cement

plaster on metal lath. Plans complete and work to be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, brick and frame, \$30,000. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owner, Frank B. King. Location, northeast corner of Jackson and Laurel street. Will contain a large number of rooms besides three baths and sleeping porches. Basement garage. Interior finish pine, white enamel and hardwood. Hardwood and tile floors. Tile wainscot in bath rooms. Central heating system and hot water circulating system. Open fire places and tile and brick mantels. Exterior faced with pressed brick and cement plaster. Plans being prepared.

SAN FRANCISCO—Residence alteration, 2 story and base, frame, \$2,000. Architect, Charles C. Frye, 20 Montgomery street, S. F. Owner, B. K. Malcomb. Location 34th avenue. Work will include new plumbing, painting, plastering, electric work and interior trim. Exterior will be faced with cement plaster. Plans complete and figures being taken.

SAN FRANCISCO—Residence, 2 story and base, frame, \$5,000. Architect, J. W. Holliver, Royal Insurance Bldg., S. F. Owners, Allen Co., 128 Sutter street, S. F. Location, Forest Hill. Will contain eight rooms, two baths and sleeping porch. Separate garage. Interior finish pine, hardwood and white enamel. Hardwood floors. Open fire places and furnace heat. Tile and brick mantels. Automatic water heater. Bath rooms tile and composition. Exterior faced with cement plaster on metal lath. Plans complete and work to be done by Day Labor.

OAKLAND, CAL.—Residence, 1½ story and base, frame, \$2,500. Architect, none. Owner, George H. Hollidge, 5926 Taft avenue, Oakland. Location, east Broadway south of prospect. Will contain seven rooms, bath and sleeping porch. Interior finish pine and white enamel with some elm panels. Hardwood floors. Open fire place and furnace heat. Tile bath room. Automatic water heater. Exterior covered with cement plaster on metal lath. Plans complete and work to be done by Day Labor.

OAKLAND, CAL.—Residence, 1 story and base, frame, \$2,200. Architect, none. Owner, Edward Grandin, 1533 Prince street, Berkeley. Location, north 56th street west of Adeline. Will contain six rooms, bath and sleeping porch. Interior finish pine and white enamel. Hardwood floors. Open fire place and tile or brick mantel. Automatic water heater. Exterior rustic and cement plaster. Plans complete and work by Day Labor.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$3,700. Architect, none. Owner, R. E. Stubbe, 1408 Grand avenue, Piedmont. Location, Piedmont Cable Tract. Will contain seven rooms, bath and sleeping porch. Interior finish pine and hardwood with white enamel in the bed rooms. Hardwood floors. Open fire places and furnace heat. Mantels tile and brick. Bath rooms tile and composition floors. Automatic water heater. Exterior covered with cement plaster on metal lath. Plans complete and work to be done by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,500. Architect, Merrill Newsom, 1718 Broadway, Oakland. Owner, E. L. Higgins. Location, Thomas street. Will contain seven rooms, bath and sleeping porch. Interior finished in pine, hardwood and white enamel. Hardwood floors. Furnace heat and open fire places. Mantels tile and brick. Bath room tile and composition. Automatic water heater. Exterior covered with cement plaster on metal lath. Plans being prepared.

OAKLAND, CAL.—Residence, 1 story and base, frame, \$2,000. Architect, none. Owner, E. H. Strang, 3741 Elston avenue, Oakland. Location, east 23rd avenue north of East 30th street. Will contain five rooms and bath. Interior finish pine and redwood with some white enamel. Hardwood floors. Open fire place and tile or brick mantel. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$6,500. Architect, W. H. Hatcliff, Jr., First National Bank Bldg., Berkeley. Owners, Alameda County Home Builders. Location, Spring street. Will contain eight rooms, three baths and sleeping porches. Separate garage. Interior finish pine, white enamel and southern gum. Hardwood floors. Open fire places and furnace heat. Hot water circulating system. Tile bath rooms. Mantels tile and brick. Exterior covered with cement plaster on metal lath. Plans complete and work to be done by Day Labor.

OAKLAND, CAL.—Residence, 1 story and base, frame, \$2,500. Architect, none. Owner, W. A. Pryal, 6602 Chabot Road, Oakland. Location, east Harne south of Chabot Road. Will contain six rooms, bath and sleeping porch. Interior finish pine and hardwood with white enamel in the bed rooms. Furnace heat and open fire places. Mantels tile or brick. Bath room tile and composition. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

VISALIA, TULARE CO., CAL.—Residence, 2 story and base, brick and frame, \$8,000. Architect, E. A. Mathewson, Forsythe Bldg., Fresno. Owner, Phil Brown. Will contain eight rooms, two baths and sleeping porches. Interior finish pine and hardwood with white enamel in the bed rooms. Hardwood floors. Furnace heat and open fire places. Mantels tile and brick. Tile bath rooms. Automatic water heater. Exterior faced with pressed brick and cement plaster. Plans being prepared.

FRESNO, FRESNO CO., CAL.—Residence, 2 story and base, frame, \$4,950. Architect, none. Owner, S. L. Allen, 3215 McKenzie street, Fresno. Location, Ardenale Addition. Will contain seven rooms, baths and sleeping porch. Interior finish pine and hardwood with some white enamel. Hardwood floors and open fire places. Mantels tile and brick. Automatic water heater. Bath rooms tile. Exterior cement plaster on metal lath. Plans complete and work to be done by Day Labor.

FRESNO, FRESNO CO., CAL.—Residence, 1 story and base, frame, \$2,000.

Architect, none. Owner, George Bragwell, 3069 Madison street, Fresno. Location, East Fresno. Will contain six rooms, bath and sleeping porch. Interior finish pine and white enamel. Hardwood floors. Open fire places and tile or brick mantels. Bath room tile. Automatic water heater. Exterior covered with cement plaster and rustic. Plans complete and work to be done by Day Labor.

SACRAMENTO, CAL.—Residence. 1 story and base, frame, \$1,500. Architect, none. Owner, S. A. Boltz, 2216 33rd avenue, Sacramento. Location, 1435 Carmellia avenue. Will contain five rooms, bath and sleeping porch. Interior finish pine and redwood. Some hardwood floors. Open fire place and tile mantel. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

## SCHOOLS

SAN FRANCISCO—School. 3 story and base, brick and steel. Cost not stated. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owners, City and County of San Francisco. New bids are now being called for on the general construction of the Redding School, southwest corner of Pine and Larkin streets. Bids will be opened on December 24th. Plans can be secured from the Department of Architecture, Temporary City Hall.

LOS ANGELES, CAL.—Schools. 2, 1 story and base. Class C, \$212,500. Architects, Norman F. Marsh and Herbert C. Howard, Broadway Central Bldg., L. A. Owners, City of Los Angeles. The low bidder for the construction of a school group at the corner of 38th and Hooper streets was J. and F. Atkinson, Story Bldg., at \$212,500. Bids have been taken under advisement.

LOS ANGELES, CAL.—School addition and alteration, brick. Cost not stated. Architect, Architectural Dept. of Board of Education, L. A. Owners, City of Los Angeles. Bids will be received until December 30th for the addition of two stories, 60 by 70 feet, and for extensive alteration to two old buildings. Plans can be had from the secretary of the Board of Education.

LOS ANGELES, CAL.—School. 2 story and base, brick, \$27,300. Architect, Architectural Dept. Board of Education, L. A. Owners, City of Los Angeles. Location, Temple street. Brick construction except stairways, which will be of reinforced concrete. Interior finish pine with maple floors, in class rooms. Central heating system. Exterior faced with pressed brick. Plans being prepared.

## Contracts Awarded.

SAN FRANCISCO—School retaining wall, reinforced concrete, \$675. Architect, City Dept. of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Contractor, John Spargo, S. F. Contract price, \$675.

SAN FRANCISCO—School brick work, plumbing and steel. Cost as follows. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owners, City and County of San Francisco. Contractor, A. Lettich, plumbing, \$6,376; Golden Gate Iron Works, structural

steel, \$21,000, and Charles Hock, masonry, \$2,385.

## SEWERS, STREET WORK & WATER SYSTEMS

OAKLAND, CAL.—Street improvement. Cost not stated. Engineer, City Engineer, Oakland. Owners, City of Oakland. Bids will be received until December 30th for grading, curbing with concrete, guttered with concrete gutters three feet wide, and paved with oil macadam, also cement sidewalks five feet wide of Farnam street, from the southeastern line of Fruitvale avenue to the northwestern line of 34th.

BERKELEY, ALAMEDA CO., CAL.—Park pavement. Cost not stated. Engineer, City Engineer, Berkeley. Owners, City of Berkeley. The City Council has rejected all bids received for surfacing the San Pablo Park playground. Three bids were received. The work will now be done by the city.

SAN JOSE, SANTA CLARA CO., CAL.—Road improvement. Cost not stated. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Sealed bids will be received by the Clerk of the Board of Supervisors of Santa Clara County at his office until 11 o'clock a. m., of Monday, January 3rd, 1916, for improvement of Saratoga avenue in Road District No. 5 in said county. Specifications for this work are on file in the office of the Board, to which bidders are referred.

SANTA CRUZ, SANTA CRUZ CO., CAL.—Street and sewer work. Cost not stated. Engineer, City Engineer, Santa Cruz. Owners, City of Santa Cruz. At the last meeting of the City Council, the City Engineer was instructed to prepare plans and specifications for work in King, Kirby, Mill and other streets. Bids on this work will be called for on completion of the plans. The City Attorney was also instructed to prepare an ordinance providing for a sewer in Palm street.

MT. DIABLO, CONTRA COSTA CO., CAL.—Tract development, \$500,000. Engineer's name not given. Owners, Eastern capital. New York capitalists have closed a deal for the purchase of a villa site on the slopes of Mt. Diablo, which will be subdivided and sold. The Eastern capital is represented by R. N. Burgess Co., 712 Market street, and Robert Mash, 712 Market street, S. F., who will have charge of the development work and marketing. About \$500,000 is to be expended in grading, road work, sidewalks, gutters, curbs and sewers.

YUBA CITY, YUBA CO., CAL.—Culvert, etc. Cost not stated. Engineer's name not given. Owners, Sutter Drainage District. At the last meeting of the Board of Trustees of the Sutter Drainage District held at the office of Secretary C. C. Kline, Yuba City, the matter of improvements for the district was discussed. The Board has had about three carloads of rock and sand delivered at the Bailey place near the slough where they will construct a new concrete culvert leading the water from one of the large drainage ditches to the slough, the present ditch not being large enough. The culvert will be about 1,000 feet long.

MADERA, MADERA CO., CAL.—Road improvement. Cost not stated. Engi-

neer, County Surveyor, Madera. Owners, Madera County. At an adjourned meeting of the Board of Supervisors, specifications for the grading of the Cochran road in the Fifth Supervisorial District were passed, and bids for the construction of the road ordered advertised, the bids to be received on January 10th at 10 a. m. Plans and full information on this work may be had from the County Clerk at Madera.

SAN LUIS OBISPO, SAN LUIS OBISPO CO., CAL.—Road construction. Cost not stated. Engineer, County Surveyor, San Luis Obispo. Owners, San Luis Obispo County. A petition has been presented to the County Supervisors by William Jolie and others, asking the Board to lay out, construct and maintain a public road 10 feet wide in Road District No. 13, the proposed road will be about four miles long. The matter will be taken up by the Board at their next meeting.

SEATTLE, WASH.—Tunnel construction, \$30,000. Engineer, City Engineer, Seattle. Owners, City of Seattle. Bids are now being taken for the construction of the proposed concrete tunnel under City Hall Park from 4th avenue and Yesler to the basement of the new court house. Bids will be opened on December 24th by the Board of Public Works. The tunnel will be 300 feet long and 20 feet wide. Further information may be had from the City Engineer's office at Seattle.

TACOMA, WASH.—Earth fill, \$350,000 to \$1,000,000. Engineer's name not given. Owners, Waterway District No. 1, Tacoma. Commissioners of Waterway District No. 1 are getting ready to carry out the proposed dredging and filling in the Hylobois Creek tide flats for a distance of two miles, and bids will probably be called for the first of the year. Work will involve over 2,000,000 cubic yards of material.

SAN JOSE, SANTA CLARA CO., CAL.—Furnishing lumber. Cost not stated. Engineer, City Engineer, San Jose. Owners, City of San Jose. The City Council at their last meeting opened bids for furnishing 16,000 feet of lumber for the use of the street department. The bids were rejected and it was decided that the lumber will be purchased in the open market.

OAKLAND, CAL.—Street pavement. Cost not stated. Engineer, City Engineer, Oakland. Owners, City of Oakland. After considerable discussion, plans and specifications for the improvement of San Pablo avenue were ordered prepared. General Manager W. F. Ahlberger of the Oakland Traction Co. has agreed to pave a two-foot strip at each edge of the trackway from Stege to Richmond and to the center of the tracks wherever they are now at the side of the road. Further mention will be made of this work when the plans have been completed and approved.

HAYWARD, ALAMEDA CO., CAL.—Street improvement. Cost not stated. Engineer, Town Engineer, Hayward. Owners, Town of Hayward. Bids were opened by the Town Board for the improvement of the intersection of B and Watkins streets, but were laid over until the next meeting for consideration.

PASADENA, LOS ANGELES CO., CAL.—Sewer work. Cost not stated.

**Engineer, City Engineer, Pasadena.** Owners, City of Pasadena. A meeting between the County Supervisors and the officials of Pasadena, South Pasadena and Alhambra will be held shortly at Alhambra to study plans and specifications for the proposed sewage disposal plant on the new tri-city farm in the Puente hills. The city officials have inspected the present city farm and the recently purchased tract of 600 acres. The Supervisors exhibited a keen interest in the plans outlined by the commissioners and the city trustees of Alhambra and South Pasadena. Chairman Hamilton stated that he believed the question of treating the sewage with the violet rays should be thoroughly investigated by the engineers. The engineers have recommended that the sprinkling filter system be used. This is said to be used with success in various parts of the country. Chairman Hamilton stated that the cities had not made application to the State Board of Health for permission to establish the new farm, as Alhambra has not voted bonds for the completion of its sewer system, and several other matters must be attended to first.

**SANTA BARBARA, SANTA BARBARA CO., CAL.**—Paving work. Cost not stated. Engineer, County Surveyor, Santa Barbara. Owners, Santa Barbara County. Bids will be received by the Board of Supervisors up to 10 a. m. of January 3rd, 1916 for furnishing the county with quantities, to be used in paving a portion of the Santa Maria-Guadalupe road in the Fifth Road District, as follows: 4,500 cubic yards coarse crushed rock; 800 cubic yards of screenings, and 1,700 cubic yards fine crushed rock. Certified check for 10 per cent is required. C. A. Hunt is the Clerk.

**SANTA BARBARA, SANTA BARBARA CO., CAL.**—Road improvement. Cost not stated. Engineer, County Surveyor, Santa Barbara. Owners, Santa Barbara County. Bids will be received by the Board of Supervisors up to 10 a. m. of January 3rd, 1916 for furnishing all labor and machinery, etc., for grading and paving a portion of the Santa Maria-Guadalupe road in the Fifth Road District. Specifications are on file at the office of the Board. Certified check for 10 per cent is required. C. A. Hunt is the Clerk.

**PASADENA, LOS ANGELES CO., CAL.**—Lighting system. Cost not stated. Engineer, City Engineer, Pasadena. Owners, City of Pasadena. Bids will be received by the City Clerk up to 9 a. m. of December 25th, 1915, for reconstructing the lighting system in Colorado street between Pasadena and Los Robles avenues, the work requiring 7 new cast iron posts, 51 new shafts, 11,357 feet of copper wire, 1 transformer, etc. Certified check or bond of 10 per cent is required. Herman Dyer is the City Clerk.

**PASADENA, LOS ANGELES CO., CAL.**—Lighting system. Cost not stated. Engineer, City Engineer, Pasadena. Owners, City of Pasadena. Bids will be received by the City Clerk up to 9 a. m. of December 25th, 1915, for reconstructing the lighting system on Raymond avenue, between Dayton avenue and Chestnut street, the work requiring 17 new cast iron posts, 21 cast iron

shafts, 900 feet of No. 6 copper wire, etc. Certified check or bond for 10 per cent is required. Herman Dyer is the City Clerk.

**SANTA ANA, ORANGE CO., CAL.**—Ornamental lighting system. Cost not stated. Engineer, Col. S. H. Finley, Register Bldg., Santa Ana. Owners, City of Santa Ana. Bids will be received by the citizens ornamental light committee at the office of Col. S. H. Finley in the Register Bldg. up to 3 p. m. December 27th, 1915, for the installation of ornamental lights. The lights are to be the single unit, non-condenser Mazda lamps, and the bidders must submit figures for both laying the conduit and furnishing the posts and lamps. Plans and specifications were prepared by Col. Finley.

**SANTA MONICA, LOS ANGELES CO., CAL.**—Street paving. \$100,000. Engineer, City Engineer, Santa Monica. Owners, City of Santa Monica. Bids for the paving of Ocean avenue from Colorado street to Santa Monica Canyon will be advertised as soon as the engineer can prepare specifications. Of this 5,800 feet will be of asphalt and the remaining 2,000 feet of bitulithic paving.

**SAN BERNARDINO, SAN BERNARDINO CO., CAL.**—Light and power distributing system. Cost not stated. Engineer, County Surveyor, San Bernardino. Owners, San Bernardino. Bids will be received by the Board of Supervisors up to 10 a. m. of December 27th, 1915, for constructing, operating and maintaining an electric pole and wire system for the distribution of electricity for light, heat and power on all public roads and highways in the County of San Bernardino outside of incorporated cities wherein the Pacific Light and Power Co. has no lines. Certified check or cash for 10 per cent must accompany each bid. L. R. Patty is the City Clerk.

**PASADENA, LOS ANGELES CO., CAL.**—Street improvement. Cost not stated. Engineer, City Engineer, Pasadena. Owners, City of Pasadena. Four bids for the improvement of Hillside Terrace in San Rafael Heights were opened by the commission and referred to Commissioner Albin for his recommendations. There is a difference of \$5,000 between the lowest and highest bids. The bids, according to the certified checks for 10 per cent of the total, were: Andrew Holloway, \$5,000, J. E. Haddock, \$6,500, T. C. Breitenstein, \$7,500, and Peter L. Ferry, \$10,000. Further mention will be made of this work when a contract is let.

**MARTINEZ, CONTRA COSTA CO., CAL.**—Water system. Cost not stated. Engineer, City Engineer Alan C. Brown, Martinez. Owners, City of Martinez. City Engineer Alan C. Brown has been instructed by the Board of City Trustees to engage a water expert to gather data for the proposed municipal water system. The proposition made by W. S. Withers, the rancher who recently uncovered a series of wells on his Concord property, was favorably discussed. Further mention will be made of this work when the plans are complete.

**SAN FRANCISCO**—Sewer construction, \$12,000. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Tib-

ble Pacific Co. presented the lowest figure for the construction of sewers in the South Bay District and will probably be awarded the contract.

#### Contracts Awarded

**BERKELEY, ALAMEDA CO., CAL.**—Concrete curbs and gutters. Cost not stated. Engineer, City Engineer, Berkeley. Owners, City of Berkeley. Contractors, Schnoor Bros., 5505 Claremont avenue, Oakland. Contract price not stated.

**SACRAMENTO, CAL.**—Sewer work. Cost not stated. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Contractor, F. E. Frey, 2526 Q street, Sacramento, and C. D. Vincent, 193 Montecito avenue, Oakland. Contract prices not stated.

**ONTARIO, SAN BERNARDINO CO., CAL.**—Street paving. Cost as follows. Engineer, City Engineer, Ontario. Owners, City of Ontario. Contractor, James L. Frazer, Long Beach. Contract price, \$21,631.95 and \$22,832.13.

**SAN JOSE, SANTA CLARA CO., CAL.**—Street pavement. Cost not stated. Engineer, City Engineer, San Jose. Owners, City of San Jose. Contractor, W. M. Painter, San Jose. Contract price not stated.

**SAN MATEO, SAN MATEO CO., CAL.**—Street improvement, \$6,828.24. Engineer, City Engineer, San Mateo. Owners, City of San Mateo. Contractors, Clark & Henery Construction Co., Ochsner Bldg., Sacramento. Contract price, \$6,828.24.

**RICHMOND, CONTRA COSTA CO., CAL.**—Excavating and pavement. Cost not stated. Engineer, none. Owners, Southern Pacific Co., Flood Bldg., S. F. Contractors, Ransome-Crummey Co., First Savings Bank Bldg., Oakland. Contract price not stated.

**BAKERSFIELD, KERN CO., CAL.**—Highway construction. Cost as follows. Engineer, County Surveyor, Bakersfield. Owners, Kern County. Contractor, J. L. Hooper, Bakersfield, Sec. 3, Caliente-Kernville road, \$2,691.40. Brashear-Burns Co., 420 F. W. Van Nuys Bldg., L. A., \$27,914. Sec. 1-A, Lakersfield-McKittrick road.

**LOS ANGELES, CAL.**—Road improvement, 19,945. Engineer, County Surveyor, Los Angeles. Owners, Los Angeles County. Contractor, James L. Frazer, Long Beach. Contract price, \$19,945.

**ONTARIO, SAN BERNARDINO CO., CAL.**—Road improvement, \$22,882.13. Engineer, County Surveyor, San Bernardino. Owners, San Bernardino County. Contractor, James L. Frazer, Long Beach. Contract price, \$22,882.13.

**LOS ANGELES, CAL.**—Street im-

Letterheads, (bond) \$2.50 M. Envelopes & cards, \$1.75 M. Statements and billheads, \$2.00 M. Cut prices. CANINE & PETERSON, 560 Mission St.

# New Stucco Plaster Is On Market.

Celement Products Co. Well Financed  
Opens Branches in all Large Pacific  
Coast Cities.

One of the most important developments in late years in building construction is the evolution of a new exterior stucco plaster, known as "Celement," which has just been placed on the market in all the large cities of the Pacific Coast, by the Celement Production Company.

The Company back of this new product is said to be extensively financed and to have made very exhaustive and elaborate tests regarding this new material, before its placing on the market commercially.

Some very strong and logical claims are made for this cement which, if true, will go far in solving the question of securing a durable, non-checking, stainless and watertight stucco with soft, pleasing colorings and artistic finish.

The principal claim for "Celement" is its remarkable plasticity, which works as freely under the trowel as lime mortar; this is not caused by the addition to, or an excess of lime in the cement. On the contrary, an analysis of Celement shows that it contains less lime than most Portland Cement; and tests show that if lime is added to Celement in any considerable quantities it destroys the strength of the plaster.

The plasticity is obtained from the unusual fineness of Celement and a peculiar colloidal silica employed in the process of manufacture.

Another claim they make for Celement which is at variance with the workings of ordinary Portland Cement is that Celement is highly hygroscopic.

For exterior plastering, where it is impractical to keep fresh work covered or wet, this product is said to be highly efficient. It holds moisture tenaciously, permitting the plaster to dry out very slowly, insuring a perfect set or crystallization even in highly exposed surfaces.

Other claims are for toughness or non-checking, freedom from stains and streaks caused by lime leaching out at the surface, and a much superior bond on any masonry foundation or key on metal lath.

Wherever Portland Cement is specified for the plastering of exterior surfaces, walls, pergolas, columns, statuary, garden seats and decorations, retaining walls, interior panels, and wainscoting, for application upon substantial backing of wood, metal lath, brick or concrete, it is claimed by the men back of this new product that it may be used to advantage, and some very convincing tests are advanced to support the claims.

This new product, however, must be mixed and applied in accordance with definite specifications which the Company supplies and it is said that where it is so prepared, it may be applied to any substantial foundation, with the

assurance that it will outlast any Portland Cement. Its architectural possibilities are said to be unlimited. The surface may be treated in various ways and it can be made any desired color to harmonize with an color scheme.

Architects, contractors, plasterers and owners who have had an opportunity to observe the actual results obtained by the use of "Celement" are said to be wonderfully enthusiastic about its possibilities.

It has distinct advantages over the ordinary plasters, which may be summed up in the fact that its weight is less, it is more easily applied, will not stain, check or crack, has wonderful tensile strength, is subservient to heat and cold, has exceptional insulation qualities, and insures greater permanency of construction.

The Celement Production Company, of 622 Van Ness Bldg., Los Angeles, are marketing this product through local distributors, Howard Company of Oakland, W. S. McLean, San Francisco, Union Lime Company of Los Angeles, are taking care of California business

# OFFICIAL PROPOSALS.

## PROPOSALS FOR CANAL SUPPLIES.

**PANAMA CIRCULAR 996**—Proposals for Bronze Letters and Numerals, Structural Bronze Work, Cutting-Off Machine, Lathe, Bolts, Rivets, Nuts, Washers, Lag Screws, Lead Sleeves, Cable Terminals, Electric Cable and Wire.—Sealed proposals will be received at the office of the general purchasing officer, the Panama Canal, Washington, D. C., until **10:30 a. m. December 29, 1915**, at which time they will be opened in public, for furnishing the above mentioned articles. Blanks and general information relating to this circular (No. 996) may be obtained from this office or the office of the assistant purchasing agent, Fort Manson, San Francisco, Cal., also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal.; F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

## NOTICE INVITING SEALED BIDS FOR KITCHEN EQUIPMENT FOR THE NORWALK STATE HOSPITAL.

PURSUANT to resolution directing this notice, the Board of Managers of the Norwalk State Hospital hereby invite bids for said Hospital Kitchen equipment, said sealed bids to be delivered to W. G. McMillan, State Purchasing Agent, at Room 87, Capitol Building, Sacramento, California, on or before **twelve o'clock noon on Monday, December 27th, 1915**.

Specifications may be procured from the said Purchasing Agent, Room 87, Capitol Building, upon application.

All bids must be accompanied by a certified check payable to the State of California, for an amount which shall not be less than ten per cent of the aggregate of the bid, which amount shall be forfeited to the State of California, in case the bidder depositing the same does not within ten days after written notice that the contract has been awarded to him, enter into a contract with said State Purchasing Agent for the furnishing of said equipment, the faithful performance of which shall be secured by an undertaking in such penal sum as the State Purchasing Agent shall require, with satisfactory to the said Purchasing Agent and subject to the approval of the State Board of Control.

W. G. McMILLAN,  
State Purchasing Agent.

## PROPOSALS FOR TELEGRAPH SUPPLIES.

**TELEGRAPH SUPPLIES, ETC.**—Office of the Quartermaster, Fort Winfield Scott, Cal.—Sealed proposals will be received here until **11 a. m. December 23, 1915**, for furnishing 12 telescope brackets, 120 galvanized crossarm braces, 60 crossarms, 100 guy wire clamps, 500 galvanized insulators, 200 lag screws, 200 machine bolts, 35 white cedar poles, 1,000 pole posts, 50 gallons wood preservative, 200 oak pine, 12 sockets, 20 pounds solder, 10 pounds electric tape, 200 galvanized iron, 200 iron tape, 20 turnbuckles, 100 steel wire thimbles, 14,000 feet No. 6 solid conductor wire, 2,000 feet No. 10 do and 2,000 feet guy wire. For further information address JOHN T. GRAY, captain, coast artillery corps, acting quartermaster.

## PROPOSALS.

**BUILDING REPAIRS**—Treasury Department, Office of the Supervising Architect, Washington, D. C.—Sealed proposals will be received at this office until **10 a. m. December 27, 1915**, and

then opened, for enlarging drafting room and new skylight in the U. S. post office at Olympia, Wash., in accordance with drawings Nos. 76 and 77 and the specification, copies of which may be had at this office or from the custodian of the Olympia Building, JAMES A. WETMORE, acting supervising architect.

## NOTICE TO CONTRACTORS.

**SEALED BIDS** will be received by W. F. McClure, State Engineer, Forum Building, Sacramento, California, up to and including **12 o'clock, noon, Tuesday, December 28, 1915**, said bids then and there to be publicly opened and read for furnishing all plant, materials and labor, and doing the work required for the complete construction and erection of a building to be known as "Yard Toilet," Industrial Home for Adult Blind, Oakland, California, in accordance with the plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Such bids will be received for the Entire Work, and must be submitted on forms prepared and furnished by the State Department of Engineering.

Cash, a bidder's bond, or a certified check in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

A deposit of Ten (\$10.00) Dollars will be required on plans and specifications, the deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering, at Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope, "Proposal for Yard Toilet," Industrial Home for Adult Blind, Oakland, California.

(Signed) W. F. McCLURE,  
State Engineer.

## NOTICE TO CONTRACTORS.

**SEALED BIDS** will be received by W. F. McClure, State Engineer, Forum Building, Sacramento, California, up to and including **12 o'clock, noon, Friday, December 31st, 1915**, said bids then and there to be publicly opened and read for furnishing all plant, materials and labor, and doing the work required for the complete construction and erection of buildings to be known as "Domestic Science and Temporary Class Room Buildings," San Jose State Normal School, San Jose, California, in accordance with the plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Such bids will be received for the Entire Work, and must be submitted on forms prepared and furnished by the State Department of Engineering.

Cash, a bidder's bond, or a certified check in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

A deposit of Fifteen (\$15.00) Dollars will be required on plans and specifications, the deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering, at Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F.

McClure, State Engineer, Sacramento, California, and plainly marked on the envelope, "Proposal for 'Domestic Science and Temporary Class Room Buildings,' San Jose State Normal School, San Jose, California."

(Signed) W. F. McCLURE,  
State Engineer.

## PROPOSALS FOR BUILDING.

**BUILDING**—Treasury Department, Office of the Supervising Architect, Washington, D. C.—Sealed proposals will be opened at this office at **3 p. m. December 29, 1915**, for the extension, remodeling, etc., of the United States post office and court house at Missoula, Mont. Extension is of four stories and basement, stone faced, fireproof construction and composition roof and includes the addition of a fourth story to present building. Drawings and specifications may be obtained from the custodian at Missoula, Mont., or at this office, in the discretion of the supervising architect, JAMES A. WETMORE, acting supervising architect.

## PROPOSALS FOR SKYLIGHT.

**SKYLIGHT**—Treasury Department, Office of the Supervising Architect, Washington, D. C.—Sealed proposals will be received at this office until **10 a. m. December 27, 1915**, and then opened, for enlarging drafting room and new skylight in the U. S. post office at Olympia, Wash., in accordance with drawings Nos. 76 and 77 and the specification, copies of which may be had at this office or from the custodian of the Olympia building, JAMES A. WETMORE, acting supervising architect.

## PROPOSALS FOR ELEVATOR.

**ELEVATOR**—Treasury Department, Office of the Supervising Architect, Washington, D. C.—Sealed proposals will be opened in this office at **3 p. m. December 23, 1915**, for the installation, complete, of an electric passenger elevator in each of the following buildings: The United States post office and court house at Pendleton, Ore.; the United States post office and court house at Eustis, Fla., and the United States post office and court house at Ardmore, Okla., in accordance with the drawings and specification, copies of which may be had at this office, in the discretion of the supervising architect, JAMES A. WETMORE, acting supervising architect.

## PROPOSALS FOR CANAL SUPPLIES.

**PANAMA CIRCULAR 993**—Proposals for Motor-Driven Centrifugal Pumps, Cast Iron Bollards, Pinions, Steel Cable, Cold Shuts, Aluminum Pig, Stocks and Dies, Reamers, Twist Drills, Wrenches, Raps, Whistle Valves, Steam Whistles, Brass Hubs, Potato Mashers, Red Fiber Packing, Alcohol, Muratic Acid, Litharge, Japan Drier, Lard Oil, Fish Oil, Turpentine, Red Lead, White Lead, Orange Shellac, Varnish and Paints.—Sealed proposals will be received at the office of the general purchasing officer, the Panama Canal, Washington, D. C., until **10:30 a. m. December 13, 1915**, at which time they will be opened in public, for furnishing the above mentioned articles. Tibbitts-Pacific Co. submitted the lowest figure for the construction of sewers in the South Bay District at \$35,000. Nine other firms figured the work, the second low being E. J. Arvedi at approximately \$42,000.

## OAKLAND AND ALAMEDA COUNTY

**STREET IMPROVEMENT**—Cost not stated. Oakland, Cal. Engineer, City Engineer, Oakland. Owners, City of Oakland. Bids will be received until December 30th for grading, curbing with concrete, guttered with concrete gutters three feet wide, and paved with

oil macadam; also cement sidewalks five feet wide, Fainum street from the southeastern line of Fruitvale avenue to the northwestern line of 31th.

**PARK PAVEMENT**—Cost not stated. Berkeley, Alameda Co., Cal. Engineer, City Engineer, Berkeley. Owners, City of Berkeley. The City Council rejected all bids received for surfacing the San Pablo Park playground. Three bids were received. The work will now be done by the city.

**STREET PAVEMENT**—Cost not stated. Oakland, Cal. Engineer, City Engineer, Oakland. Owners, City of Oakland. After considerable discussion, plans and specifications for the improvement of San Pablo avenue were ordered prepared. General Manager W. F. Ahlberger of the Oakland Traction Co. has agreed to pave a two-foot strip at each edge of the trackway from Stege to Richmond and to the center of the tracks wherever they are now at the side of the road. Further mention will be made of this work when the plans have been completed and approved.

**STREET IMPROVEMENT**—Cost not stated. Hayward, Alameda Co., Cal. Engineer, Town Engineer, Hayward. Owner, Town of Hayward. Bids were opened by the Town Board for the improvement of the intersection of B and Watkins streets, but were laid over until the next meeting for consideration.

**RESIDENCE**—1½ story and base, frame, \$2,500. Oakland, Cal. Architect, none. Owner, George H. Hollidge, 5926 Taft avenue, Oakland. Location, east Broadway south of Prospect. Will contain seven rooms, bath and sleeping porch. Interior finish pine and white enamel with some elm panels. Hardwood floors. Open fire place and furnace heat. Tile bath rooms. Automatic water heater. Exterior covered with cement plaster on metal lath. Plans complete and work to be done by Day Labor.

**RESIDENCE**—1 story and base, frame, \$2,200. Oakland, Cal. Architect, none. Owner, Edward Grandin, 1533 Prince street, Berkeley. Location, north 56th street west Adeline. Will contain six rooms, bath and sleeping porch. Interior finish pine and white enamel. Hardwood floors. Open fire place and tile or brick mantel. Automatic water heater. Exterior rustic and cement plaster. Plans complete and work by Day Labor.

**RESIDENCE**—2 story and base, frame, \$7,700. Piedmont, Alameda Co., Cal. Architect, none. Owner, R. E. Stubbe, 1108 Grand avenue, Piedmont. Location, Piedmont Cable Tract. Will contain seven rooms, bath and sleeping porch. Interior finish pine and hardwood with white enamel in the bed rooms. Hardwood floors. Open fire places and furnace heat. Mantels tile and brick. Bath rooms tile and composition floors. Automatic water heater. Exterior covered with cement plaster on metal lath. Plans complete and work to be done by Day Labor.

**RESIDENCE**—2 story and base, frame, \$3,500. Oakland, Cal. Architect, Merrill Newsom, 1718 Broadway, Oakland. Owner, E. L. Higgins. Location, Thomas street. Will contain seven rooms, bath and sleeping porch. Interior finished in pine, hardwood and white enamel. Hardwood floors. Furnace heat and open fire places. Mantels tile and brick. Bath room tile and composition. Automatic water heater. Exterior covered with cement plaster on metal lath. Plans being prepared.

**RESIDENCE**—1 story and base, frame, \$2,000. Oakland, Cal. Architect, none. Owner, E. H. Strang, 3741 Elston avenue, Oakland. Location, east 23rd avenue north of East 30th street. Will contain five rooms and bath. Interior finish pine and redwood with some white enamel. Hardwood floors. Open fire place and tile or brick mantel. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**RESIDENCE**—2 story and base, frame, \$6,500. Berkeley, Alameda Co., Cal. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owners, Alameda County Home Builders. Location, Spring street. Will contain eight rooms, three baths and sleeping porches. Separate garage. Interior finish pine, white enamel and southern gum. Hardwood floors. Open fire places and furnace heat. Hot water circulating system. Tile bath rooms. Mantels tile and brick. Exterior covered with cement plaster on metal lath. Plans complete and work to be done by Day Labor.

**RESIDENCE**—1 story and base, frame, \$2,500. Oakland, Cal. Architect, none. Owner, W. A. Pryal, 6602 Chabot Road, Oakland. Location, east Harnes south of Chabot Road. Will contain six rooms, bath and sleeping porch. Interior finish pine and hardwood with

white enamel in the bed rooms. Furnace heat and open fire places. Mantels tile or brick. Bath rooms tile and composition. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**APARTMENT HOUSE**—2 story and base, frame, \$7,500. Berkeley, Alameda Co., Cal. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owners, Alameda County Home Builders. Location, Benvenue avenue. Will contain a number of two, three and four room suites with wall beds and private baths. Interior finish pine and hardwood with some white enamel. Hardwood floors. Steam heat and hot water system. Bath rooms composition. Exterior covered with rustic and cement plaster. Plans complete and figures being taken.

**APARTMENT HOUSE**—2 story and base, frame, \$4,500. Berkeley, Alameda Co., Cal. Architect, none. Owners, F. R. Penke Co., 2127 University avenue, Berkeley. Location, Hopkins east of The Alameda. Will contain eight room suites. Interior finished in pine and red gum with hardwood floors. Furnace heat. Open fire places and tile mantels. Bath rooms tile. Automatic water heater. Exterior covered with cement plaster. Plans complete and figures being taken.

**FACTORY PLANT**—1, 3 story and 2, 1 story, reinforced concrete, \$200,000 to \$250,000. Oakland, Cal. Architect's name not given. Owners, Chevrolet Co., represented by Norman De Vaux, 1600 Van Ness avenue, S. F. Location, Foothill Boulevard. Plans have been prepared in the east and will be forwarded to San Francisco shortly when complete details of construction can be given. A local supervising architect will be appointed.

**FLOUR MILL**—1 and 4 story, reinforced concrete. Cost not stated. Oakland, Cal. Engineer's name not given. Owners, Albers Bros. Milling Co., 343 Pine street, S. F. Location, Key Route Hill. Details of the buildings have not been made public. The selection of an architect will be announced within a week or ten days, when further mention will be made of the work.

**HOSPITAL DAIRY BUILDING**—Frame, \$5,400. Berkeley, Alameda Co., Cal. Architect, State Architect George R. McDougall, Sacramento. Owners, State of California. L. G. Bergren & Son, Hearst Bldg., S. F., were the low bidders on this work and will be awarded the contract. A complete list of the bids appears under the heading of Oakland and Alameda County in this issue.

#### Contracts Awarded

**CONCRETE CURBS AND GUTTERS**—Cost not stated. Berkeley, Alameda Co., Cal. Engineer, City Engineer, Berkeley. Owners, City of Berkeley. Contractors, Schmoor Bros., 5002 Claremont avenue, Oakland. Contract price not stated.

**GARAGE**—1 story and base, \$3,000. Oakland, Cal. Architect, none. Owner, John Dacha. Contractor, C. A. Seoville, 5246 Claremont avenue, Oakland. Contract price, \$3,000. Contractor now taking subletters.

**GARAGE**—1 story and base, brick, \$8,348. Oakland, Cal. Architect, none. Owner, C. P. Kiehl, San Leandro. Con

**Wybro**

Reg. U. S. Pat. Office  
as good as they are  
The Panels that are  
famous.

#### Wybro Panels combine Service & Quality with Price.

It is not alone the "price" that counts in buying panels. The quality is of more than passing importance. WYBRO PANELS combine quality with service and price. Quality is first in Wybro Panels—the service they give is unsurpassed, and the price is just right—not high, nor low—but just the right price for the right panel. 200 varieties—price list free.

**White Brothers**

5th and Brannan Streets

San Francisco

tractors, Latner & Muller, 470 Boulevard Way, Oakland. Contract price, \$8,348. Contractor is now taking subfigures.

## Alameda Exchange In New Location.

**Fine New Quarters For Alameda County Builders' Exchange Opened at 1515 Franklin Street.**

The Builders' Exchange of Alameda County has moved to their new location at 1515 Franklin St., Oakland. The new quarters have just been completed for them by the Hawley Investment Co., and needless to say, Secretary Davis has seen that everything that would add to the comfort and convenience of the members of the Exchange has been installed in the new quarters.

An extensive membership campaign is to be launched at once, and before building starts up in the Spring, it is confidently expected that the membership will be doubled. The "Builder" wishes them much prosperity in their new location.

## MARIN, CONTRA COSTA AND SONOMA COUNTIES

**TRACT DEVELOPMENT**—\$500,000. Mt. Diablo, Contra Costa Co., Cal. Engineer's name not given. Owners, Eastern capital. New York capitalists have closed a deal for the purchase of a villa site on the slopes of Mt. Diablo, which will be subdivided and sold. The Eastern capital is represented by R. N. Burgess Co., 742 Market street, and Robert Marsh, 712 Market street, S. F., who will have charge of the development work and marketing. About \$500,000 is to be expended in grading, road work, sidewalks, gutters, curbs and sewers.

**BRIDGE**—Reinforced concrete, \$1,250. Sonoma, Sonoma Co., Cal. Engineers, Leonard & Day, Rialto Bldg., S. F. Owners, City of Sonoma. At the last meeting of the City Council plans and specifications were ordered prepared for the construction of a bridge on Washington street. Further mention will be made of this work when the plans are complete.

**RAILROAD WORK**—Cost not stated. Martinez, Contra Costa Co., Cal. Engineer's name not given. Owners, represented by Judge Clifford McClellan, Judge Clifford McClellan of San Francisco has finished traversing the route of a proposed electric car line to connect this city with Concord, and according to a statement issued by him the line will soon be in course of construction. While Mr. McClellan, who is a capitalist, asserts that the line will not be owned or operated by the Oakland and Antioch, he admits that men connected with that company may be with him in the enterprise and that the proposed line will connect with the present electric road at Concord, and passengers taken to San Francisco and Sacramento from there. Further mention will be made of this work.

**WATER SYSTEM**—Cost not stated. Martinez, Contra Costa Co., Cal. En-

gineer, City Engineer Alan C. Brown. Martinez. Owners, City of Martinez. City Engineer Alan C. Brown has been instructed by the Board of City Trustees to engage a water expert to gather data for the proposed municipal water system. The proposition made by W. S. Withers, the rancher who recently uncovered a series of wells on his Concord property, was favorably discussed. Further mention will be made of this work when the plans are complete.

**RESORT HOTEL**—1 and 2 story and base, frame, \$35,000. Agua Caliente, Sonoma Co., Cal. Architects, O'Brien Bros., 240 Montgomery street, S. F. Owners, Agua Caliente Hot Springs Hotel Co. There will be one two-story hotel and two bath houses, each of one story. The design is in the Mission style. Interior will be finished in pine and redwood with some hardwood floors. Steam heat and a hot water circulating system will be installed. Exterior will be covered with cement plaster on metal lath. Plans are complete and figures will be called for in about ten days.

## SAN JOSE AND THE SANTA CLARA VALLEY

**ROAD IMPROVEMENT**—Cost not stated. San Jose, Santa Clara Co., Cal. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Sealed bids will be received by the Clerk of the Board of Supervisors of Santa Clara County at his office until 11 o'clock a. m. of Monday, January 3, 1916, for improvement of Saratoga avenue, in Road District No. 5 in said county. Specifications for this work are on file in the office of the Board, to which bidders are referred.

**STREET AND SEWER WORK**—Cost not stated. Santa Cruz, Santa Cruz Co., Cal. Engineer, City Engineer, Santa Cruz. Owners, City of Santa Cruz. At the last meeting of the City Council, the City Engineer was instructed to prepare plans and specifications for work on King, Kirby, Mill and other streets. Bids on this work will be called for on completion of the plans. The City Attorney was also instructed to prepare an ordinance providing for a sewer in Palm street.

**FURNISHING LUMBER**—Cost not stated. San Jose, Santa Clara Co., Cal. Engineer, City Engineer, San Jose. Owners, City of San Jose. The City Council at their last meeting opened bids furnishing 16,000 feet of lumber for the use of the street department. The bids were rejected and it was decided that the lumber will be purchased in the open market.

**BRIDGE**—Reinforced concrete. Cost not stated. Santa Cruz, Santa Cruz Co., Cal. Engineer, County Surveyor, Santa Cruz. Owners, Santa Cruz County. Bids will be opened on January 3rd for the construction of a bridge across Branciforte Creek, just below the junction with Granite Creek.

### Contracts Awarded.

**STREET PAVEMENT**—Cost not stated. San Jose, Santa Clara Co., Cal. Engineer, City Engineer, San Jose. Owners, City of San Jose. Contractor, W. M. Painter, San Jose. Contract price not stated.

**STREET IMPROVEMENT**—\$6,828.24. San Mateo, San Mateo Co., Cal. Engi-

neer, City Engineer, San Mateo. Owners, City of San Mateo. Contractors, Clark & Henery Construction Co., Ochsner Bldg., Sacramento. Contract price, \$6,828.24.

## FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA

**IRRIGATION FILL**—Cost not stated. Modesto, Stanislaus Co., Cal. Engineer, Chief Engineer, Herrmann, Modesto. Owners, Modesto Irrigation District. Bids will be received until January 4th for the construction of an earthen fill along the line of lateral No. 1 of the Modesto Irrigation District on the site of the present fill.

**ROAD IMPROVEMENT**—Cost not stated. Madera, Madera Co., Cal. Engineer, County Surveyor, Madera. Owners, Madera County. At an adjourned meeting of the Board of Supervisors, specifications for the grading of the Cochrum road in the Fifth Supervisorial District were passed, and bids for the construction of the road ordered advertised. The bids will be received on January 10th at 10 a. m. Plans and full information on this work may be had from the County Clerk at Madera.

**RESIDENCE**—2 story and base, brick and frame, \$8,000. Visalia, Tulare Co., Cal. Architect, E. A. Mathewson, Forsythe Bldg., Fresno. Owner, Phil Brown. Will contain eight rooms, two baths and sleeping porches. Interior finish pine and hardwood with white enamel in the bed rooms. Hardwood floors. Furnace heat and open fire places. Mantels tile and brick. Tile bath rooms. Automatic water heater. Exterior faced with pressed brick and cement plaster. Plans being prepared.

**RESIDENCE**—2 story and base, frame, \$4,950. Fresno, Fresno Co., Cal. Architect, none. Owner, S. L. Allen, 3215 McKenzie street, Fresno. Location, Ardonale Addition. Will contain seven rooms, baths and sleeping porch. Interior finish pine and hardwood with some white enamel. Hardwood floors and open fire places. Mantels tile and brick. Automatic water heater. Bath rooms tile. Exterior cement plaster on metal lath. Plans complete and work to be done by Day Labor.

**RESIDENCE**—1 story and base, frame, \$2,000. Fresno, Fresno Co., Cal. Architect, none. Owner, George Brasswell, 3069 Madison street, Fresno. Location, East Fresno. Will contain six rooms, bath and sleeping porch. Interior finish pine and white enamel. Hardwood floors. Open fire places and tile or brick mantels. Bath room tile. Automatic water heater. Exterior covered with cement plaster and rustic. Plans complete and work to be done by Day Labor.

**BRIDGES**—Reinforced concrete. Cost not stated. Merced, Merced Co., Cal. Engineer, County Surveyor, Merced. Owners, Merced County. Bids will be received on January 4th for the construction of reinforced concrete bridges in Road District No. 4 as follows: Over Quinto Creek on the Cottonwood School House road, to be known as Bridge No. 41; over the lower canal on the Cottonwood road, to be known as Bridge No. 42; also for the construction of a reinforced concrete bridge on the State Highway about one

mile south of Buhach Station in Road District No. 3, to be known as Bridge No. 43.

**LODGE HALL AND OFFICES**—2 story and base, brick, \$20,000. Tulare, Tulare Co., Cal. Architect, Ernest J. Kump, Rowell Bldg., Fresno. Owner, E. J. Ryan. Contractor, James J. Bailey, Fresno. Contract price, \$20,000.

**HOTEL ADDITION**—2 story and base, brick. Cost not stated. Fresno, Fresno Co., Cal. Architects, Swartz & Swartz, Rowell Bldg., Fresno. Owners, Brix Estate. Location, J street. The proposed addition will be made to a two-story brick store building. The new portion will contain in the neighborhood of 85 rooms and a number of public and private baths. Interior finish pine. Steam heat and a hot water system. Exterior faced with pressed brick. Plans being prepared.

**LATERALS AND DIOPHS**—Concrete. Cost as follows. Modesto, Stanislaus Co., Cal. Engineer, Chief Engineer Herrmann, Modesto. Owners, Modesto Irrigation District. At the last meeting of the board of directors of the Modesto Irrigation District bids were opened for constructing four concrete structures, drops, in laterals Nos. 3 and 4. Of nine bids, the lowest was that of Geo. A. Bos, Hearst Bldg., S. F., \$7,481.50, and the second lowest was the Ross Construction Co., Forum Bldg., Sacramento, at \$7,658. These two bids were retained, and Bos was given until the 18th to file proper bonds and workmen's compensation insurance. The second bid is retained as a protection to the district in case Bos should fail to meet the requirements. The other bids for the work were: M. Blumenkranz, \$8,404.24; Tieslau Bros., \$8,912.50; March Bros. & Gardner, \$8,260.75; W. B. Westerly, \$8,234.75; H. J. Ulrich, \$8,665.25; Barrett & Hilp, \$8,735, and Thurston Co., \$8,290.

#### Contracts Awarded

**BRIDGES**—2, reinforced concrete, \$5,232. Modesto, Stanislaus Co., Cal. Engineer, Count Surveyor, Modesto. Owners, Stanislaus County. Contractors, Moore & Tabor, San Francisco. Contract price, \$5,232.

**BRIDGES**—2, reinforced concrete, \$6,427 and \$1,550. Merced, Merced Co., Cal. Engineer, County Surveyor, Merced. Owners, Merced County. Contractors, Angel & Bibler, Dos Palos. Contract price, \$6,427. West Side Construction Co., Dos Palos. Contract price, \$1,550.

**BRIDGE**—Timber construction, \$484. Bakersfield, Kern Co., Cal. Engineer, Count Surveyor, Bakersfield. Owners, Kern County. Contractors, Currie & Duglar, Bakersfield. Contract price, \$484.

**EXCAVATING AND PAVEMENT**—Cost not stated. Richmond, Contra Costa Co., Cal. Engineer, none. Owners, Southern Pacific Co., Flood Bldg., S. F. Contractors, Ransome-Crummey Co., First Savings Bank Bldg., Oakland. Contract price not stated.

**HIGHWAY CONSTRUCTION**—Cost as follows. Bakersfield, Kern Co., Cal. Engineer, County Surveyor, Bakersfield. Owners, Kern County. Contractor, J. L. Hooper, Bakersfield, Sec. 3, Caliente-Kettleville road, \$2,691.10. Brashear-Burns Co., 420 F. W. Van Noy Bldg., L. A., \$27,914. Sec. 1-A, Bakersfield-McKittrick road.

#### COURT HOUSE ALTERATIONS

Cost not stated. Merced, Merced Co., Cal. Architect's name not given. Owners, Merced County. Bids will be received on January 14th for placing of hardwood flooring in the lower corridor of the Court House, and also for the remodeling of the upper floor.

#### SACRAMENTO, STOCKTON AND NORTHERN CALIFORNIA

**IRRIGATION PROJECT**—Cost not stated. Sacramento, Cal. Engineer's name not given. Owners, Consummes Water District. A plan for the formation of an irrigation district, which will bring under intensive cultivation some 10,000 acres of land in Sacramento County, has been made known through the Consummes water contest, which is now pending in the United States Land Office. The plans of the Consummes Irrigation Co. to store water at Becker's Ford and other places along the Consummes River and by means of ditches to carry it to Sacramento County will be carried out.

**CULVERT, ETC.**—Cost not stated. Yuba City, Yuba Co., Cal. Engineer's name not given. Owners, Sutter Drainage District. At the last meeting of the Board of Trustees of the Sutter Drainage District held at the office of Secretary C. C. Kline, Yuba City, the matter of improvements for the district were discussed. The board has had about three carloads of rock and sand delivered at the Bailey place near the slough where they will construct a new concrete culvert leading the water from one of the large drainage ditches to the slough, the present ditch not being large enough. The culvert will be about 1,000 feet long.

**BRIDGE**—Reinforced concrete, \$8,000. San Andreas, Calaveras Co., Cal. Engineer, County Surveyor, San Andreas. Owners, Calaveras County. Two sets of plans were received by the County Board of Supervisors at their last meeting for a reinforced concrete bridge over the Calaveras River, between San Andreas and North Branch, Jenkins & Wells, Sacramento, "Glyder Concrete bridge." Estimated cost, \$8,000. Commonwealth Engineering Co., San Francisco, "Arch Reinforced Concrete bridge." Estimated cost, \$9,500. The plans and specifications received will be forwarded to the Highway Commission for approval or rejection. Further mention will be made of this work when the Highway Commission takes action on the plans.

**BRIDGE**—Reinforced concrete and steel. Cost not stated. Auburn, Placer Co., Cal. Engineer, County Surveyor, Auburn. Owners, Placer County. The Supervisors have agreed to pay one-third of the cost of constructing a bridge across Bear River on the Dutch Flat and Yuba Bet road, providing the County of Nevada and the Pacific Gas and Electric Co. pay the other two-thirds. The proposition of the counties and the electric company each paying a third of the cost was put up to the Placer Supervisors about a month ago. The Supervisors spent much time in seeking rights of way along the line of the proposed State Highway lateral leading from Auburn to Roseville. The Board has appropriated \$500 to be used

in securing the road leading from Auburn to the American River where the bridge crosses.

**BRIDGES**—Steel and reinforced concrete. Cost not stated. Red Bluff, Tehama Co., Cal. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. Plans and specifications have been completed, the Clerk of the Superior has been instructed to advertise for bids until January 14th at 10 a. m. for the construction of a steel and concrete bridge across Buckyard Creek on the Red Bluff and Corning road. Further information may be had from the County Clerk at Red Bluff.

**ELECTRIC LINE EXTENSION**—Cost not stated. Chico, Butte Co., Cal. Engineer, Engineering Dept. of Western Pacific Co., Owners, Western Pacific Co. According to word received from this city, a branch line from Oroville to Chico will be constructed as soon as the Western Pacific Company charges from the present receivership, according to statements made by General Manager C. M. Levy. Funds for this work are available. Other proposed ten miles, San Francisco to San Jose, along the peninsula, 19 miles, Oakland to Sacramento through Alameda, Contra Costa, Solano, Yuba and Sacramento counties, 35 miles, Point Richmond to a point on Oakland and Sacramento branch, 27 miles, Martinez to a point on the same branch, 9 miles, Stockton to Fresno, 115 miles, Spanish Creek to Lag Meadows, 30 miles, Beckwith Pass to Truckee River, 26 miles.

**RESIDENCE**—1 story and base, frame, \$15,000. Sacramento, Cal. Architect, none. Owner, S. A. Boltz, 2216, 33rd avenue, Sacramento. Location, 416 Carmellia avenue. Will contain five rooms, bath and sleeping porch. Interior finish pine and redwood. Some hardwood floors. Open fire place and tile mantel. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**HOSPITAL ADDITION**—2 story and base, frame and plaster, \$15,290. Eureka, Humboldt Co., Cal. Architect, E. J. Burke, Eureka. Owners, Humboldt County, Louis Halvorsen, Eureka, presented the lowest figure for the new addition to the County Hospital and will be awarded the contract. A complete list of the bids received will be found under the heading of Sacramento, Stockton and Northern California.

#### Contracts Awarded

**DITCH**—Cost not stated. Yreka, Siskiyou Co., Cal. Engineer's name not given. Owners, Putte Valley Land Co., Macdon. Contractors, Chapman & Co., Klamath Falls, Ore. Ten miles of ditch. Cost not stated.

**SEWER WORK**—Cost not stated. Sacramento, Cal. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Contractors, P. C. Tracy, 25 W. 2nd street, Sacramento, and C. D. Vincent, 227 Montealeve avenue, Oakland. Contract prices not stated.

**BRIDGES**—1 timber construction. Cost not stated. Red Bluff, Tehama Co., Cal. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. Contractor, Stevens, Red Bluff, two bridges. Contract price not stated.

**BRIDGE**—Timber, \$1,000. Auburn, Placer Co., Cal. Engineer, County Sur-

veyor, Auburn. Owners, Placer County. Contractor, H. C. Nolte, Colfax. Contract price, \$5,095.

### LOS ANGELES & SOUTHERN CALIFORNIA.

**ROAD CONSTRUCTION**—Cost not stated. San Luis Obispo, San Luis Obispo Co., Cal. Engineer, County Surveyor, San Luis Obispo. Owners, San Luis Obispo County. A petition has been presented to the County Supervisors by William Johe and others, asking the Board to lay out, construct and maintain a public road 40 feet wide in Road District No. 13. The proposed road will be about four miles long. The matter will be taken up by the Board at their next meeting.

**SEWER WORK**—Cost not stated. Pasadena, Los Angeles Co., Cal. Engineer, City Engineer, Pasadena. Owners, City of Pasadena. A meeting between the County Supervisors and the officials of Pasadena, South Pasadena and Alhambra will be held shortly at Alhambra to study plans and specifications for the proposed sewage disposal plant on the new tri-city farm in the Puente hills. The city officials have inspected the present city farm and the recently purchased tract of 600 acres. The Supervisors exhibited a keen interest in the plans outlined by the commissioners and the city trustees of Alhambra and South Pasadena. Chairman Hamilton stated that he believed the question of treating the sewage with the violet rays should be thoroughly investigated by the engineers. The engineers have recommended that the sprinkling filter system be used. This is said to be used with success in various parts of the country. Chairman Hamilton stated today that the cities had not made application to the State Board of Health for permission to establish the new farm, as Alhambra has not voted bonds for the completion of its sewer system and several other matters must be attended to first.

**PAVING WORK**—Cost not stated. Santa Barbara, Santa Barbara Co., Cal. Engineer, County Surveyor, Santa Barbara. Owners, Santa Barbara County. Bids will be received by the Board of Supervisors up to 10 a. m. of January 5, 1916, for furnishing the county with quantities, to be used in paving a portion of the Santa Maria-Guadalupe road in the Fifth Road District, as follows: 4,500 cubic yards of coarse crushed rock, 800 cubic yards of screenings, 1,700 cubic yards of fine crushed rock. Certified check for 10 per cent is required. C. A. Hunt is the Clerk.

**ROAD IMPROVEMENT**—Cost not stated. Santa Barbara, Santa Barbara Co., Cal. Engineer, County Surveyor, Santa Barbara. Owners, Santa Barbara County. Bids will be received by the Board of Supervisors up to 10 a. m. of January 3, 1916, for furnishing all labor and machinery, etc., for grading the Santa Maria-Guadalupe road in the Fifth Road District. Specifications are on file at the office of the Board. Certified check for 10 per cent is required. C. A. Hunt is the Clerk.

**LIGHTING SYSTEM**—Cost not stated. Pasadena, Los Angeles Co., Cal. Engineer, City Engineer, Pasadena. Owners, City of Pasadena. Bids will

be received by the City Clerk up to 9 a. m. of December 28, 1915, for the reconstruction of the lighting system in Colorado street between Pasadena and Los Robles avenues, the work requiring 6 new cast iron posts, 54 new shafts, 11,337 feet of copper wire, 4 transformers, etc. Certified check or bond of 10 per cent is required. Heman Dyer is the City Clerk.

**LIGHTING SYSTEM**—Cost not stated. Pasadena, Los Angeles Co., Cal. Engineer, City Engineer, Pasadena. Owners, City of Pasadena. Bids will be received by the City Clerk up to 9 a. m. of December 28, 1915, for the reconstruction of the lighting system on Raymond avenue between Payton avenue and Chestnut street, the work requiring 17 new cast iron posts, 31 cast iron shafts, 910 feet of No. 6 copper wire, etc. Certified check or bond for 10 per cent is required. Heman Dyer is the City Clerk.

**ORNAMENTAL LIGHTING SYSTEM**—Cost not stated. Santa Ana, Orange Co., Cal. Engineer, Col. S. H. Finley, Register Bldg., Santa Ana. Owners, City of Santa Ana. Bids will be received by the citizens ornamental lighting committee at the office of Col. S. H. Finley up to 3 p. m. December 27, 1915, for the installation of ornamental lights. The lights are to be the single unit, 400-candlepower Mazda lamps, and the bidders must submit figures for both laying the conduit and furnishing the posts and lamps. Plans and specifications were prepared by Col. Finley.

**STREET PAVING**—\$100,000. Santa Monica, Los Angeles Co., Cal. Engineer, City Engineer, Santa Monica. Owners, City of Santa Monica. Bids for the paving of Ocean avenue from Colorado street to Santa Monica Canyon will be advertised as soon as the engineer can prepare specifications. Of this 3,800 feet will be of asphalt and the remaining 2,900 feet of bitulithic paving.

**LIGHT AND POWER DISTRIBUTING SYSTEM**—Cost not stated. San Bernardino, San Bernardino Co., Cal. Engineer, County Surveyor, San Bernardino. Owners, San Bernardino County. Bids will be received by the Board of Supervisors up to 10 a. m. December 27, 1915, for constructing, operating and maintaining an electric pole and wire system for the distribution of electricity for light, heat and power on all public roads and highways in the county of San Bernardino outside of incorporated cities whereon the Pacific Light and Power Co. has no lines. Certified check or cash for 10 per cent must accompany each bid. L. R. Patty is the County Clerk.

**STREET IMPROVEMENT**—Cost not stated. Pasadena, Los Angeles Co., Cal. Engineer, City Engineer, Pasadena. Owners, City of Pasadena. Four bids for the improvement of Hillside Terrace in San Rafael Heights were opened by the commission and referred to Commissioner Allin for his recommendation. There is a difference of \$5,000 between the lowest and highest bids. The bids, according to the certified checks for 10 per cent of the total, were: Andrew Holloway, \$5,000; J. E. Haddock, \$6,500; T. C. Breitenstein, \$7,500 and Peter L. Ferry, \$10,000. Fur-

ther mention will be made of this work when a contract is let.

**PACKING HOUSES**—2, 1 story, frame and concrete, \$40,000. Ontario, San Bernardino Co., Cal. Architect's name not given. Owners, San Antonio Growers' Association. The San Antonio Growers' Association has decided to erect two packing houses and dry yards. Funds will be raised by a pro rata acreage assessment. One will be erected in Ontario and the other at Chino. Judge C. M. Whitney of Ontario is the secretary of the board of trustees.

**PACKING PLANT**—2 story, hollow tile construction. Cost not stated, Uplands, Orange Co., Cal. Architects, Foss Designing and Building Co., 100 East Colorado street, L. A. Owners, California Fruit Products Co. Will cover an area of 60 by 80 feet. No interior finish. Exterior faced with cement plaster. Plans are being prepared and the building will probably be erected by the Foss Designing and Building Co.

**WAREHOUSE**—4 story and base. Class C. Cost not stated. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, Los Angeles Soap Co. Location Banning street, covering an area of 100 by 100 feet. Pine and rough interior finish. Electric freight elevator, automatic sprinkler system throughout the building. Metal window sash and frames and fireproof doors. Exterior faced with selected common brick. Plans complete and figures being taken.

**AUTOMOBILE SCHOOL AND GARAGE**—1 and 2 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, Mrs. S. H. Van Nuys, leased to National Automobile School. Location, Figueroa south of 8th, covering an area of 60 by 155 feet. Will contain offices, shop rooms, garage and assembly hall on first floor and class rooms above. Interior finish pine. Cement floors. Metal window sash and frames. Exterior faced with pressed brick. Plans complete and figures being taken.

**HOSPITAL LAUNDRY BUILDING**—1 story and base, reinforced concrete, \$14,672. Norwalk, Los Angeles Co., Cal. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. L. E. Burgren & Son Hearst Bldg., S. F., presented the low bid for the construction of the laundry building at the Norwalk State Hospital and will be awarded the contract. A complete list of the bids received will be found under the heading of Los Angeles and Southern California.

**SCHOOLS**—3, 1 story and base, Class C, \$212,580. Los Angeles, Cal. Architects, Norman F. Marsh and Herbert C. Howard, Broadway Central Bldg., L. A. Owners, City of Los Angeles. The low bidder for the construction of a school group at the corner of 35th and Hooper streets was J. and F. Atkinson, Story Bldg., at \$212,580. Bids have been taken under advisement.

**SCHOOL ADDITION AND ALTERATION**, brick. Cost not stated. Los Angeles, Cal. Architect, Architectural Dept. Board of Education, L. A. Owners, City of Los Angeles. Bids will be received until December 30th for the addition of two stories, 60 by 70 feet,

and for extensive alteration to two old buildings. Plans can be had from the secretary of the Board of Education.

**SCHOOL**—2 story and base, brick, \$27,300. Los Angeles, Cal. Architect, Architectural Dept. Board of Education, L. A. Owners, City of Los Angeles. Location, Temple street. Brick construction except stairways, which will be of reinforced concrete. Interior finish pine with maple floors in class rooms. Central heating system. Exterior faced with pressed brick. Plans being prepared.

#### Contracts Awarded.

**STREET PAVING**—Cost as follows. Ontario, San Bernardino Co., Cal. Engineer, City Engineer, Ontario. Owners, City of Ontario. Contractor, James L. Frazer, Long Beach. Contract price, \$21,634.95 and \$22,832.13.

**STORAGE BUILDING**—1 story and base, reinforced concrete, \$21,300. Camarillo, Ventura Co., Cal. Architect, Alfred P. Priest, Fay Bldg. L. A. Owners, J. L. Lewis & Son. Contractor, J. A. Crook, Byrne Bldg., L. A. Contract price, \$21,500.

**ROAD IMPROVEMENT**—\$19,915. Los Angeles, Cal. Engineer, County Surveyor, Los Angeles. Owners, Los Angeles County. Contractor, James L. Frazer, Long Beach. Contract price, \$19,915.

**ROAD IMPROVEMENT**—\$22,882.13. Ontario, San Bernardino Co., Cal. Engineer, County Surveyor, San Bernardino. Owners, San Bernardino County. Contractor, James L. Frazer, Long Beach. Contract price, \$22,882.13.

**STREET IMPROVEMENT**—\$29,877.91. Los Angeles, Cal. Engineer, City Engineer, Los Angeles. Owners, City of Los Angeles. Contractor, George H. Oswald, L. A. Contract price, \$29,877.91.

## S. F. Firm Low On Norwalk State Job.

L. G. Burgren & Son Will Probably be Awarded Contract for Laundry Building Near Los Angeles.

(By Special Wire.)

SACRAMENTO, CAL., Dec. 13th, 1915. —Seven sets of figures were submitted today for the construction of a reinforced concrete laundry building to be erected at the Norwalk State Hospital in Los Angeles County. L. G. Burgren & Son, Hearst Bldg., San Francisco, submitted the low bid at \$14,672 and will probably be awarded the contract. Following is a complete list of the bids received:

#### Laundry Building, Norwalk.

L. G. Burgren & Son	\$14,672
A. Daniels	16,750
John Monk & Co.	16,917
John Smith & Co.	17,968
Willis Brent Co.	18,200
Cresmer Mfg. Co.	18,454
Lepper & Laisey	18,981

#### PORTLAND AND OREGON

**PAPER MILL**—2 story and base, reinforced concrete, \$300,000. Oregon City, Ore. Architect's name not given. Owners, Hawley Pulp & Paper Co. The special committee appointed to investigate the proposition to sell a piece of property to the Hawley Pulp and

Paper Co., filed their report which favored the action and the Council in turn passed an ordinance permitting the sale. The action of the Council will result in the erection of a \$300,000 plant by the company. The proposed structure will be of reinforced concrete construction and will be modern in every respect, according to W. P. Hawley, president and manager of the company.

#### Contracts Awarded.

**RELINQUISH RAILROAD TUNNEL**, \$100,000. Portland, Ore. Engineer, Engineering Dept. of O. R. & N. Co. Owners, Oregon-Washington Railroad & Navigation Co. Contractors, Guthrie-McBougall Co., Pittock Bldg., Portland. Contract price, \$100,000.

#### SEATTLE AND WASHINGTON

**TUNNEL CONSTRUCTION**, \$30,000. Seattle, Wash. Engineer, City Engineer, Seattle. Owners, City of Seattle. Bids are now being taken for the construction of the proposed tunnel under City Hall Park from 4th avenue and Yesler to the basement of the new court house. Bids will be opened on December 21th by the Board of Public Works. The tunnel will be 300 feet long and 20 feet wide. Further information may be had from the City Engineer's office at Seattle.

**EARTH FILL**—\$350,000 to \$400,000. Tacoma, Wash. Engineer's name not given. Owners, Waterway District No. 1, Tacoma. Commissioners of Waterway District No. 1 are getting ready to carry out the proposed dredging and filling in the Hylebos Creek tide flats for a distance of two miles, and bids will probably be called for the first of the year. Work will involve over 2,000,000 cubic yards of material.

**POWER DEVELOPMENT**—\$10,000,000. Olympia, Wash. Engineer's name not given. Owners, Hugh L. Copper Co. The granting of a permit to the Hugh L. Copper Co. to overflow the land of the Pend Oreille River for a distance of seven miles on both sides in the "Z" Canyon, coupled with a permit secured a year ago for similar rights and another pending before the land commissioners at Olympia, means the immediate starting of construction on a huge dam about a mile north of Bluside, Wash. The grant now asked extends from Bluside to Ione, Wash. Surveys are now being made by the company's engineers of the proposed power site. The hydro-chemical and power project will involve an expenditure of \$10,000,000.

**APARTMENT HOUSE**, 5 story and base, reinforced concrete and brick, \$35,000. Seattle, Wash. Architects, Lawton & Moldenhour, Alaska Bldg., Seattle. Owner, G. E. Sherwood, 2622 Alki avenue, Seattle. Location, Howland and Melrose. Will cover a considerable ground area and will be arranged for a number of two, three and four room apartments. Interior finish pine and hardwood with some white enamel. Hardwood floors. Steam heat oil burning system, hot water system and vacuum cleaning. Wall beds. Bath rooms tile and composition. Marble and tile wains in entrance to double. Exterior faced with pressed brick. Plans complete and figures being taken.

**HOTEL**, 12 story and base, reinforced concrete, \$100,000. Seattle, Wash. Architect, A. Warren Gould, American Bank Bldg., Seattle. Owners, Arctic Club. Location, corner of 3rd avenue and Cherry street, covering an area of 100 by 120 feet. A portion of the building will be occupied by the Arctic Club and offices, but by far the largest part of the building will be given over to the hotel. Interior will be handsomely finished. Steam heat, oil burning plant, elevator service and hot water system. Bath rooms tile. Exterior faced with terra cotta. Plans complete and figures to be called for shortly.

#### RAILWAY SURVEY IN COLOMBIA.

[Consul Isaac A. Manning, Barranquilla, Nov. 8.]

The technical commission of engineers in charge of the preliminary survey of the route of the railway from Omeña to the Magdalena River, in Colombia, have begun work on the line between Ucana and Tamalameque. It is thought the survey will be finished by the end of July.—Commerce Reports.

#### American Packing Complimented.

A Chicago company making stapling wire has sent to the Bureau of Foreign and Domestic Commerce a letter received from one of its foreign customers in which special praise is bestowed upon the firm's method of packing its goods. The letter adds: "We find it difficult to impress upon some of our other American friends the necessity of special care in packing for export shipment."

#### OBSERVATORY ON SENTINEL DOME.

The observatory to be placed on Sentinel Dome, in the Yosemite, is now finished. It is twenty-four feet high and has been built at an elevation of 8,900 feet. During the summer, forest rangers will use it to watch for fires. During the spring, a second observatory will be built on Mt. Hoffman, at an elevation of 10,200 feet.

#### CABINET MAKERS.

Hunter, R. J., expert cabinet maker, 2150 Telegraph Ave., dealer in mahogany, antique and all kinds of furniture, repairs and polishing. Telephone Oakland 3525.

THE WHOLE WORLD AWAITS THE ADVENT OF A PRACTICAL GAS HEATING DEVICE

**FLOOR FURNACE STYLE B**  
Size 14½ in. square by 2 ft. high  
Has 8-in. Fresh Air Intake with Damper.  
Has 3-in. Outlet Vent  
Fits in space between floor joists  
Hangs from Register which lays flush with floor.

#### Style

- Floor Furnace** with fresh air intake on side. For use in buildings having sufficient fresh air circulation under same. For artificial gas only.
- Floor Furnace** with fresh air intake at bottom. For use in buildings where it is desirable to obtain air directly from outside of cellar or basement. For artificial gas only.
- Wall Furnace** with fresh air intake at bottom. For artificial gas only.
- Wall Furnace** with fresh air intake at back. For artificial gas only.

NOTE—Style A and B are built alike except for position of fresh air intake.  
NOTE—Style C and D are built alike except for position of fresh air intake.

## Unit Plant Hot Blast Furnace

### Delivers the Heat

#### A Complete Answer to the Heating Question.

- Instantaneous**—Furnishes an instantaneous and continuous supply of  
**Sanitary**—fresh warm air free from gas fumes, odors, smoke or dust.  
**Hygienic**—Maintains an even temperature necessary to health and comfort.  
**Scientific**—Built like a real hot air furnace reduced in size.  
**Convenient**—Operated from inside of room, saving many steps to cellar.  
**Simple**—Any child 10 years of age can operate, turn the key and apply match.  
**Economical**—Wall furnace burns 10 cubic feet and door furnace 20 cubic feet of gas per hour.  
**Efficient**—Each furnace will heat from 2 to 5 rooms or from 3,000 to 9,000 cubic feet of space.  
**Fireproof**—Has four thicknesses of metal and three air spaces of one inch each between fire and wood; fire is 20 inches from floor.  
**Up to Date**—Uses exclusively the Johnson Hot Blast Burner, recognized as the most efficient ever constructed.  
**Durable**—Is made from best grade of metal to be obtained.  
**Finish**—Register electro plated Flemish Brass. The finish that lasts.  
**Installation**—Can be installed by any gas appliance dealer, plumber, tinsmith or hardware merchant at nominal cost.  
**Retail Prices**—Wall Furnace, any style, \$22.50  
Floor Furnace, any style, 30.00  
Installations and fittings extra.

**WALL FURNACE STYLE C**  
Size of Wall Furnace front is 17x19 inches, with a recessed portion of 14x17x4 inches between studding. Recessed portion has a 2-inch vent opening at top and a fresh air intake 3x12 inches at bottom operated with damper in front. Both vent and fresh air intake pipes go between studding.

## STREETS\*

By Geo. W. Tillson, Mem. Am. Soc. C. E., Consulting Engineer, Office of the  
President, Borough of Brooklyn, New York City, N. Y.

### Introductory.

Public streets are to a city what the veins and arteries are to an individual—they provide for its circulation, and it is extremely important to all cities how their streets are laid out and improved and how maintained.

The provinces of streets are to furnish light and air to the occupants and to provide proper means for intraurban traffic. As regards light and air, it makes no difference how the width of the street is treated, but as regards traffic it is very material.

### Light and Air.

What the width of a street should be to furnish light and air depends upon the character of the buildings that are erected upon it, and upon their height. If the street is in a residential section, where the houses are detached and built on good sized lots, sufficient light and air will be provided, no matter what the width of the street may be. If, on the contrary, the street is in a business section, where every foot of frontage is covered with buildings and where these buildings are high, the width of the street is an important consideration as regards both light and air.

### Traffic.

When traffic is taken into consideration, however, different principles prevail. In the first place, the width of the street must be subdivided into roadway and sidewalks, and just what should be the relative proportions of these widths must be determined by circumstances. Different cities have different rules.

As a general proposition, a street in a wholesale district is not a thoroughfare, and a roadway width that will fill local requirements is ordinarily sufficient. If, then, a minimum width of a wholesale street is taken as 40 feet, the question is to subdivide this width so that it will be best adapted for the traffic.

But one row of trucks can be loaded in front of any building at one time. If the opposite side of the roadway be similarly used, 27 feet in all will be blocked to transient travel on the street. If the roadway of the street be made 40 feet, there will be an unoccupied space in the center of 13 feet, which would allow trucks going in opposite directions to pass without difficulty.

\*A paper presented at the International Engineering Congress, San Francisco, September, 1915.

On retail business streets different conditions govern, as pedestrian traffic is much greater, compared to vehicular traffic, than on wholesale streets.

On residential streets the questions that have been discussed are determined more by sentimental than by utilitarian principles, as a great deal depends upon whether the lots are built up solidly, or whether the houses are detached. If a street is so narrow that it will not admit of a 40-foot roadway, but one track should be allowed on the same, with one-way traffic, the return traffic being provided for on an adjacent street.

### Grades.

The question of grades of streets is extremely important, and great care must be used in establishing them. Maximum and minimum grades should be adopted for general guidance, to be varied only in extreme cases. Before the days of cable and electric cars, the maximum grade in a street-car street was determined by the ability of the horses to draw a car up a hill. This was, in some cases, decided to be 5 per cent. The advent of the different powers, however, in street-car work has changed this principle, as the trolley cars easily negotiate a 10 per cent grade, and cable cars even steeper ones, but it would seem that 10 per cent is a maximum limit, unless very exceptional conditions are encountered. As a minimum, 0.5 per cent is a good standard, but that can be reduced to 0.25 per cent on special streets and for short distances.

### Treatment of Roadway.

Having determined upon the width of the roadway and the grade of the street, the next thing to determine is the treatment of the roadway. For hundreds of years pavements have been laid of different materials and many experiments made to determine which made the best pavement.

Just what particular material shall be used upon any street is a question to be decided only after careful study and reflection, as one must know not only the requirements of the street itself, its users and those doing business upon it, but the character of the different paving materials. Not enough study has been given in this country to this question, and pavements, as a rule, have been arbitrarily laid of certain materials without any scientific determination. As a general proposition, however, it can be said that for

heavy-traffic streets stone is the most desirable material, but brick can be used in localities where stone is not available. On a retail business or a residential street a bituminous, wood block, or brick pavement can be used. Wood is the most expensive of the three, the brick the most noisy, and, in some cases, the asphalt the cheapest. Any one of the three will make a satisfactory pavement, wood probably the most so if the property owners are able to stand the extra expense.

In considering the question of cost of any pavement, however, the ultimate and not the first cost must be determined upon, as a pavement which is expensive to lay down may be so much easier to keep in repair that in the end it will be the least expensive.

### Foundation.

No matter what the character of the pavement, it is absolutely necessary that it be laid upon a solid foundation. It has generally been accepted by engineers that concrete makes the best foundation, as a general proposition. The common practice is to mix the concrete in the proportion of one part of cement to three parts of sand and six parts of broken stone of a size ranging from 2 inches downward. The thickness to which it shall be laid depends upon the character of the traffic on the street, but, as a general proposition, 6 inches has been accepted as the right depth, but in special cases it has been laid 8, or even 10 inches deep.

In the city of Glasgow, Scotland, however, where loads weighing one hundred tons are moved along the streets, the foundations are only 6 inches thick. The mixture, however, is 1:2:4 instead of the 1:3:6 previously given.

### Stone Block Pavements.

In deciding upon the special material for stone-block pavements, both hardness and toughness are to be taken into consideration. If a stone be too hard it will wear smooth under heavy traffic and, consequently, be slippery. If, however, it be too soft, it will wear quickly and unevenly, soon becoming rough.

The old practice with stone pavements was to lay the blocks with a joint about 1/4 inch wide. This allowed the blocks to wear at the edges, soon becoming round on top under heavy traffic, so that even when the blocks then were maintained their position the pavement was nearly as rough as

one of cobblestone. The later practice, however, has been to make the blocks smaller, have them cut better, so that they can be laid with narrow joints, and to fill the joints with cement grout, pitch, or some other enduring material.

#### Bituminous Pavements.

Under this head should be considered sheet asphalt, asphalt block and bitolithic pavements.

Sheet asphalt pavements have been in general use for thirty years and have come into favor more rapidly than any other material. This pavement is smooth, pleasing to drive over, easily cleaned, and easily repaired. It is, also, comparatively cheap. It is especially adapted for residential and light retail-business streets.

Asphalt itself, while originally coming from the Island of Trinidad and Venezuela, has lately been produced in large quantities in California by the distillation of petroleum oil. This has materially reduced the cost of the pavement.

Upon the concrete foundation, is first laid a binder course, consisting of stone from 1 inch in diameter down to dust in size mixed with the asphaltic cement. If necessary, sand should be mixed with the broken stone and dust so as to fill the voids in the stone almost completely, but not to such an extent that the wearing surface will not easily form a bond with it. The wearing surface is composed, roughly, of 10 per cent of bitumen and 90 per cent of sand and stone-dust, the bitumen being considered that part of the asphalt that is soluble in carbon disulphide. It is, too, the part of the asphalt that is of value in the pavement on account of its cementing properties.

The grading of the sand that is used in the pavement is important, as the function of the bitumen is simply to hold the particles of the sand and dust together; and the smaller the voids in the sand, the harder, more dense, and more stable will be the resulting mixture. As to the exact size, there is some question in the minds of different engineers, the maximum ranging from 1-10 to 1-4 inch in diameter; but, whatever the maximum size, the grading should be gradual and complete, as before outlined.

The different ingredients are mixed at a central plant and taken upon the street and spread in such quantities that it will have, when rolled, a thickness of 1½ inches or 2 inches, according to the requirements of the specifications. The binder, previously referred to, should have a depth of 1 inch.

Great care should be taken in spreading the material on the street, so that it will be even and free from lumps and, when rolled, the entire surface will have a uniform density.

#### Bitolithic.

This is a patent pavement, and consists of stone from 1½ inch downwards so graduated that the voids shall be less than 20 per cent. These voids are filled with either asphalt or some coal tar preparation. The idea of the patentee, originally, was to construct an improved macadam pavement, but, after certain experiments, it was ascertained that it would be possible to

construct a durable and substantial pavement of this character. The pavement has come into very general use during the past ten years, and undoubtedly its use would have been more extensive had it not been a patented article. The first pavement of this character was laid in Pawtucket, R. I., in 1901, where the grades range from 4.9 to 12 per cent. This pavement, even on these excessive grades, has given satisfaction.

#### Repairs.

It is extremely difficult to obtain accurate and valuable information concerning repairs to any kind of pavement. This is true for two reasons: First, because the different cities have not kept their accounts in such a way that it is possible to determine how much money has been expended on each or any street, even when the total amount is known; and second, because few cities have money enough to keep their pavements in good condition, and too often the amount expended means simply that fact rather than the amount which was necessary to keep the pavements in repair.

#### Sidewalks.

Sidewalks are constructed of stone, cement, and brick, according to the availability of the different materials, and the cost varies in accordance with the distance the material has to be transported.

When sidewalks are not laid the full width of the sidewalk space, as often occurs in residential districts, the question comes up whether it should be laid next to the curb or some distance back from it. If there is left a space of three or four feet between the outer edge of the walk and the curb, this can be sodded and used for planting trees.

In most American cities it has been the practice to allow property owners, in the business section of the city, to construct vaults under the sidewalk space out to the curb line, and sometimes even beyond. This is a practice which is not advisable. The street belongs to the public from property line to property line, and should be reserved to the public for its use. In modern times, when so many public utilities are placed under ground, it would seem that the sidewalk space should be used for this purpose wherever possible. In foreign cities it is the practice to lay the sewer and the large water and gas mains in the roadway, but, whenever possible, to lay the others under the sidewalks. In this country, however, that practice has been followed to but a very slight extent, although at the present time the feeling in New York City is that it is advisable to do this.

The one thing which causes the most damage to American pavements is the constant disturbance by digging in the streets for the construction or repair of these underground utilities, and anything that will reduce this work will not only add to the life of the pavement, but materially reduce the cost of repairs. In many cases it will doubtless necessitate the construction of two lines for each utility in the street, but the connections to the property will be so much shorter and the cost of repairs so much less that undoubtedly it

will be an economical proposition in the end. It may be somewhat difficult to bring about this in the business part of the cities where the utilities are already constructed under the roadways and vaults exist under the sidewalks, but in the outlying districts it is not only practicable but advisable to place these utilities in the sidewalk area.

#### Street Cleaning.

The cost of cleaning streets, whether measured by the square yard of surface cleaned or the cubic yard of material removed, depends upon the character of the pavement, how well it is kept in repair, and how often it is cleaned; also, whether the work has been done by machinery or by hand.

In 1907, a commission was appointed by the Mayor of the City of New York to investigate this matter, and the following is quoted from the report of the commission:

"There is a very marked difference between the quantity of dust left upon the pavements of various kinds. Thus, if we call the average volume and weight collected from the sheet asphalt pavement 100, the relative quantities from other kinds of pavements were:

	Volume	Weight
From sheet asphalt....	100	100
From block asphalt....	130	182
From wood block (old)	332	145
From granite block....	1,081	912

#### LOS ANGELES CITY INSPECTORS DUE FOR SHAKEUP.

Radical changes in the system of inspection for street, sewer and other public improvements will be put into effect by the board of public works as the result of a long and careful investigation of alleged abuses in that department of the city government.

That the board has been keeping a careful check on its inspectors, and that changes will be made both in the personnel and the system of conducting such inspections, within the near future, was the statement of Lorin A. Handley, president of the board.

The investigation is said to have shown that inspectors on certain work were too lenient with certain contractors and too strict with others, and that work of an inferior nature was passed through the neglect, or worse, of officials in charge of the job.

Recent disclosures of rotten paving and repeated failures of contractors to rectify the paving after they had assured city officials that they would do so are responsible for the thorough investigation being made by the board.

In addition to a shaking up of the inspection department of the city engineer's office the public works board also plans to call a number of contractors before it and demand a show-down as to why contracts are being taken at prices which would not pay for work done under the specifications.

Contractors who underbid and then skimp the work are to be held before the board and declared irresponsible bidders, thereby barring them from future bidding.

## Richmond Streets\*

By H. D. Chapman, City Engineer and  
Street Superintendent.

### Street Work in General

By far the most important improvement of a city, so far as the general public is concerned, is street improvement, and this city has a reputation for the large mileage of streets paved. The matter of obtaining good streets at a reasonable cost is a problem that demands a great deal of study and experiment, and the building of cheap streets is still in an experimental stage. The city of Richmond has as good oiled macadam streets as any other city of which the writer has any knowledge, and it has some that are as bad as any, and we are endeavoring to evolve a pavement that is at once cheap and durable. Our latest efforts in this line, with asphalt as a binder instead of oil, is meeting with marked success, and while we have not gotten the matter down to a nicety, I believe we are approaching perfection.

There are a great many points to be considered in the use of oil or asphalt in paving work, such as temperature, dampness of the rock, nature of the subsoil, temperature of the oil and other minor details, such as the proper working of the sprayer, speed of walking horses, skill of the workman, etc., etc. The laying of an asphalt or bitulithic street has the advantage in that the paving mixture is mixed at one place under the same circumstances at all times, with proper facilities for testing, heating and mixing, and is always in view.

By the penetration method, on the other hand, there is no way of telling whether or not the oil is penetrating sufficiently, whether it is being spread in sufficient quantities, or whether it is of the proper consistency. None of these things can be discovered until the job is done. Another condition that works against the durability of an oiled macadam street is a poor foundation. Inasmuch as there is little cohesion within an oiled macadam street, the effect of a heavy truck load is transmitted to the sub-grade. If this sub-grade gives, it disturbs the whole structure of the street and breaks up the paving. This may be remedied by cutting the sub-grade to, say, twelve inches below the base of the pavement, and filling this space with quarry waste.

When you consider that the contractor must discount his bonds, must collect his accounts, and stand all loss by accident, carry liability insurance, etc., etc., it will be seen that at the present prices bid for paving there is little chance of the contractor making large profits on this particular branch of the work, and he is prone to cut into the specifications.

I do not think that Richmond Standard Macadam in itself can be laid for

less than 6½ cents per square foot, not including interest charges, discounts, overhead expenses, etc., and we are getting bids at 7 and 7½ cents. This gives only a very small margin of profit. I would rather see the prices advanced to a fair profit than to see the contractor try to make his money by close work.

On our "Richmond Standard Specifications" we are endeavoring to build up a wearing surface of about 3½ inch in thickness, which as nearly as possible approaches a bitulithic mixture. The streets which we have put in under these specifications, viz.: Twenty-second street, Clinton avenue, Thirteenth and Fourteenth streets, Santa Fe and Nicholl avenues, and Piedmont Place, have been in for a year or more, and seem to be in first-class condition at this date.

We are trying an experiment with a road gravel on the easterly end of Macdonald avenue. This gravel is a mix furnished by the Niles Sand, Gravel and Rock Company of Niles, and is "made," or rather, it is built up in the plant and is composed of rock, gravel and clay, in a proportion that is thought to give good results under traffic. This is my first experience with this material, and I am greatly interested in the results. It will be a very easy paving to repair.

In connection with street improvements, I would make the following recommendations, viz.: That San Pablo avenue over its entire length in the city be improved with a permanent paving at least to correspond with the paving now being put in by the Highway Commission, and I have asked the Commission to furnish specifications for this work.

### Richmond Avenue.

The failure of Richmond avenue is a matter to be greatly regretted by everyone concerned, and particularly by this office. It was caused, as stated in the hearing, not by the fault of the contractor, but by the nature of the foundation, which foundation had not been examined. The break was not caused by settlement, but by the fill slipping from the underlying rock, which in this place appears to lie with a large dip to the north. Added to this, the unstable condition of the marsh gave no resistance to the toe of the slope. The city will probably have to repair this street, and the contractor, the California Street and Road Improvement Company, will undoubtedly aid us. I would suggest that nothing be done until next summer, when the slip will probably have reached a permanent foundation. The sidewalks and curbs can probably all be saved and jacked into proper position, but considerable paving must be relaid.

### Street Openings.

The only street opening now under way is the widening of Tenth street, Lucas avenue and Kearney street, from Tenth and Pennsylvania avenue to the city limits. Maps are out for this work, and the resolution of intention descriptions are being prepared and all will be submitted shortly.

Since the removal of the city hall to its present location, it would seem expedient that the plan for an opening under the Santa Fe hill be revived, and I would suggest that the City Engineer be authorized to reopen this matter. If the Council remembers, these openings were dropped some time since on account of the cost. If one opening only is put in, it should go at Sixteenth street, as this street is half way between the Tenth street and Twenty-third street openings. If two openings are to be put in, one at Twentieth street is recommended, as leading directly to the City Hall.

The widening of Tenth street and Twenty-third street, north and south, are still in the hands of the commissioners. The opening of Thirteenth and Fourteenth streets has been completed, and is unique in the annals of street openings in this city, in that every assessment was paid, and there were no sales for delinquency. Scenic avenue deeds have not yet been turned into the city, and the opening of Third, Fifth and Eighth streets across the Santa Fe Railway await a hearing before the Railroad Commission. The opening of Seventh street under the Santa Fe Railway is complete, or rather, I understand that the deed to the property taken has been handed to the commissioners. Although the deed has not yet been given to the city for recording, the railroad company is proceeding with the construction of the authorized crossing. Cutting Boulevard and Tenth street north were successfully carried through.

The Council will note that of eleven openings started, only four have been completed, of the remaining seven there are three which depend upon the action of the Railroad Commission, notably antagonistic to grade crossings, such as these will be.

### Cutting Boulevard.

The improvement of this street, which has just been completed, is by far the most important piece of street work undertaken by the city of Richmond as yet. Cutting Boulevard is a 40-foot street running from the east city limits to the center of the west side of town and meeting the northerly approach of the new municipal building. Portions of the street had previously been covered with crushed rock and rolled.

\*From Annual Report 1911-12 of City Engineer of Richmond, Cal.

The present improvement covers the entire length and width of the street and opens up direct communication from the west side to San Pablo avenue. All traffic to the Standard Oil Company, Marin County ferry, municipal tunnel and all of the west side, which formerly had to go around via Macdonald avenue can now use this route. It opens Marin County to all of Alameda and Contra Costa Counties, and will give direct communication to the proposed State highway on San Pablo avenue, from San Pablo to Oakland.

The work was done in four sections and four different contracts let as follows:

#### CONTRACT 221-2

#### CUTTING BOULEVARD—Pullman Avenue to City Limits. Hansome-Crummey Co.

326,101.12	sq. ft. Bitulithic Pavement (4-inch broken rock base, 2½-inch bitulithic wearing surface)	\$0.175	per sq. ft.
19,588.47	sq. ft. Cement Concrete Sidewalk	.14	per sq. ft.
9,583.38	lin. ft. Cement Concrete Curb	.400	per lin. ft.
18,656.94	cu. yds. Excavating	.80	per cu. yd.
2,501.00	cu. yds. Filling	.90	per cu. yd.
275.10	lin. ft. 10-inch Corrugated Iron Pipe Culverts	1.50	per lin. ft.
546.30	lin. ft. 8-inch Corrugated Iron Pipe Culverts	1.00	per lin. ft.
1,252.40	lin. ft. 6x20-inch Corrugated Iron Culverts	2.90	per lin. ft.
806.19	lin. ft. 8-inch Sewer Pipe	.60	per lin. ft.
7,447.79	lin. ft. 6-inch Sewer Pipe	.55	per lin. ft.
25.00	8x4-inch Y Branches	.50	each.
277.00	6x4-inch Y Branches	.45	each.
20.00	Manholes	40.00	each.
13.00	Lampholes	7.50	each.
Contract price, \$94,175.49. Total Cost, \$95,610.87.			

#### CONTRACT 242-2

#### CUTTING BOULEVARD—23rd Street to S. P. Ry.

#### Hansome-Crummey Co.

131,884.21	sq. ft. Bitulithic Pavement (6-inch Cement Concrete Base, 2½-inch Bitulithic Wearing Surface)	\$0.215	per sq. ft.
18,700.74	sq. ft. Cement Concrete Sidewalk	.14	per sq. ft.
8,440.46	sq. ft. Cement Concrete Gutter	.200	per sq. ft.
4,642.40	lin. ft. Cement Concrete Curb	.400	per lin. ft.
4,007.06	lin. ft. Redwood Header	.10	per lin. ft.
15,607.30	cu. yds. Excavating	.70	per cu. yd.
71.80	cu. yds. Filling	.40	per cu. yd.
618.00	lin. ft. 10-inch Corrugated Iron Pipe Culverts	2.25	per lin. ft.
91.00	lin. ft. 8-inch Corrugated Iron Pipe Culverts	2.00	per lin. ft.
54.40	lin. ft. 8-inch Iron Pipe Culverts	2.00	per lin. ft.
Contract price, \$17,621.59. Total Cost, \$19,030.31.			

Contract 221-2, easterly city limits to S. P. R. R., \$94,175.49.

Contract 242-2, S. P. R. R. to 23rd street, \$17,621.59.

Contract 243-2, 23rd street to Tenth street, \$71,583.88.

Contract 244-2, Tenth street to Ashland avenue, \$131,907.87.

Plans were gotten out under the direct supervision of the writer and W. W. Hughes, Assistant Engineer; and the field work was done by parties under Messrs. Calfee, Carnahan and Prouty, on the different divisions.

**CONTRACT 233-2.**

**CUTTING BOULEVARD—10th Street to 23rd Street.**

**Ransome-Crammey Co.**

193,282.72 sq. ft. Bitulithic Pavement 6-inch Cement Concrete Base, 2½-inch Bitulithic Wearing Surface	\$0.215	per sq. ft.
34,385.82 sq. ft. Cement Concrete Sidewalk	.14	per sq. ft.
11,107.40 sq. ft. Cement Concrete Gutter	.20	per sq. ft.
6,662.40 lin. ft. Cement Concrete Curb	.40	per lin. ft.
6,655.68 lin. ft. Redwood Header	.10	per lin. ft.
15,093.26 cu. yds. Excavating	.70	per cu. yd.
1,872.30 cu. yds. Filling	.40	per cu. yd.
1,025.00 lin. ft. 10-inch Corrugated Iron Pipe Culverts	2.25	per lin. ft.
382.00 lin. ft. 8-inch Corrugated Iron Pipe Culverts	2.00	per lin. ft.
217.80 lin. ft. 8-inch Iron Pipe Culverts	2.00	per lin. ft.
110.00 lin. ft. 5x30-inch Culverts	3.50	per lin. ft.
6,187.80 lin. ft. 6-inch Sewer Pipe	.60	per lin. ft.
232.00 6x4-inch Y Branches	.50	each.
10.00 Manholes	50.00	each.
10.00 Lampholes	8.00	each.
Contract price, \$71,582.88. Total cost, \$71,288.11.		

**CONTRACT 244-2.**

**CUTTING BOULEVARD—10th Street to Ashland Avenue.**

**Municipal Improvement Co.**

354,606.2 sq. ft. of Bitulithic Pavement 6-inch Cement Concrete Base, 2½-inch Bitulithic Wearing Surface	\$0.247	per sq. ft.
65,565.5 sq. ft. of Cement Concrete Sidewalk	.14	per sq. ft.
24,542.5 sq. ft. of Cement Concrete Gutter	.21	per sq. ft.
12,956.6 lin. ft. of Cement Concrete Curb	.40	per lin. ft.
11,186.7 lin. ft. of Redwood Header	.08	per lin. ft.
8,101.1 cu. yds. of Excavating	.57	per cu. yd.
7,081.7 cu. yds. Filling	.70	per cu. yd.
1,015.0 lin. ft. of 10-inch Corrugated Iron Pipe Culverts	2.50	per lin. ft.
90.9 lin. ft. of 8-inch Corrugated Iron Pipe Culverts	2.00	per lin. ft.
240.5 lin. ft. of 8-inch Iron Pipe Culverts	2.00	per lin. ft.
136.5 lin. ft. of 12-inch Sewer Pipe	1.05	per lin. ft.
765.0 lin. ft. of 10-inch Sewer Pipe	1.00	per lin. ft.
8,332.0 lin. ft. of 8-inch Sewer Pipe	.80	per lin. ft.
779.0 lin. ft. of 6-inch Sewer Pipe	.75	per lin. ft.
40.0 12x4-inch Y Branches	.50	each.
24.0 10x4-inch Y Branches	.50	each.
260.0 8x4-inch Y Branches	.50	each.
18.0 6x4-inch Y Branches	.50	each.
27.0 Manholes	49.00	each.
4.0 Lampholes	6.00	each.
Contract price, \$124,907.87. Total Cost, \$140,665.52.		

**THE USE OF PATENTED PAVEMENTS BY CITIES.**

Many laws, city charters and city ordinances have been enacted forbidding the use of patented materials or machines in municipal work. These laws have had their origin partly in some notable cases in the past where patented devices have been used at exorbitant cost to the taxpayers as a result of dishonest collusion with city officials, and partly in cases where suits for very heavy damages have been brought against cities because of some use of a patented device without consent of the owner of the patent. Such laws, however, have proved impracticable of complete enforcement. The progress of the arts is largely reflected by the use of patents, and to wholly prevent a city from using any patented device until the patent had expired, 17 years from the date of its issue, would place the city hopelessly behind the times.

An interesting review of the status of the laws covering the use of patented paving materials by cities was recently given in a lecture delivered before the highway engineering class of Columbia University, by George C. Warren, President of Warren Brothers Co., Boston, Mass. Mr. Warren, is of course, an interested party, but his wide experience in litigation over the use of patent paving should make his summary authoritative.

Cases involving the legality of the adoption of patented pavement by municipalities have been decided within the past twenty years by the highest courts in the States of New York, New Jersey, Ohio, South Carolina, Oregon, Missouri, Maryland, Louisiana, Kentucky, Michigan, Kansas, Iowa, Indiana, Idaho, Oklahoma, Pennsylvania, Tennessee, Massachusetts, California, Montana, Washington, Wisconsin and Illinois.

With the exception of the last two States, the final decision in all of the States is to the general effect that, where the owner of the patent voluntarily surrenders his exclusive rights and agrees to allow any contractor to use the patent, on the payment of a reasonable price, all the competition which the law requires is provided. Under such regulations, patented pavements may be laid and contracted for by municipalities, and any State law which prohibits the adoption of a patented pavement by municipalities is unconstitutional, because it attempts to prevent the exercise of the Federal patent franchise, which is based on the United States Constitution.

Of the two States in which decisions of the final courts have been adverse to patented pavements, the Wisconsin legislature promptly amended its law so that patented pavements may be used; and Illinois stands alone as the only State in which there is practically a prohibition of the use of patented

materials in municipal assessment work.

The courts of most of the States above referred to have declared that the competition required by the State laws is provided if the owner of the patent files with the municipality a binding agreement under which, at a certain price, he will sell the patented portion of the pavement, which patented portion is generally confined to the wearing surface, to any responsible bidder so that all such bidders may compete with the patentee or his agent compete with the patentee or his agents for the construction of the whole pavement—Editorial, Engineering News, March 11, 1915.

**OAKDALE CITY ENGINEER INVESTIGATES STREET PAVING TYPES.**

City Engineer Harlowe is at work on the specifications for the paving of F street. He intends to visit Stockholm a few days to study the four-inch pavement used in that city.

The city trustees are about agreed upon a four-inch asphalt and concrete foundation with a Topeka top, although not altogether certain that it will be heavy enough. This is what the city engineer expects to determine before the trustees take final action.

Engineer Harlowe has advised the trustees that the macadam paving as proposed with only a water cement, would not stand the traffic on Oakdale's streets, and that idea has been practically abandoned. Mr. Harlowe does not believe that it would last more than four or five years, and says that most of the larger cities have abandoned the macadam idea.

**TRUSTEES OF HANFORD, KINGS COUNTY REFUSE TO ACCEPT PAVING.**

S. W. Knowles, a representative of the Worswick Street Paving Co., received a refusal from the city board as an answer to his request that the board accept the paving done in the alley running from Irwin to Phillips street between Sixth and Seventh streets.

The job of paving has had quite a stormy history, private contracts having been first taken from the property owners along the alley by Contractor Simpson, and when he was unable to complete the work the contract was taken over by the Worswick Company. The specification for the work had been prepared by Engineer Max Enderlein, and called for a cement concrete base of five inches, with a top surface of two coats of oil and sand or screenings.

According to the statements of Engineer Enderlein, the contracting firm had been allowed to change the surface to one coat of asphaltum and sand. This top surface is now the cause of the friction, having proved inadequate, and on the grounds that no paving had been ordered by the city, and no specifications had been made, the board refused to accept the alley paving.

There is apparently no complaint with the five-inch base, but the fact that there has been no successful surface provided seems to make the job incomplete.

# Los Angeles Department of Street Construction.\*

By C. S. Pope, Engineer of Street Construction.

## Engineers and Inspectors.

During the past year the duties of the assistant engineers and inspectors of this department have been more definitely specified. The organization is now as follows:

Engineer of paving in charge of department; assistant engineers assigned to office administration, paving and railroad construction, storm drain construction, general grading and culvert work, paving in Wilmington District, and paving in San Pedro District; one general inspector; one sample collector; two asphalt chemists; one cement tester; two assistant cement testers.

The Vrooman Act Inspectors are employed as much as possible on the class of work in which their training, experience and ability especially fits them.

At present they are divided about as follows:

Twelve asphalt inspectors, 6 cement base inspectors, 20 cement curb, walk and gutter inspectors, 11 storm drain inspectors, 2 oiling inspectors.

Total cost of inspection during the year, \$16,000; expense of supervising and office engineers, \$12,512; cost of testing laboratories, \$6,060; value of work handled, \$2,971,826.57.

Inspection expense per \$100, \$1.70; supervision expense per \$100, 34 cents; laboratory expense per \$100, 16 cents; total expense per \$100, \$2.20.

\*From Annual Report 1914-15 of the City Engineer of Los Angeles.

## Record of Paving Completed.

Type	Sq. Yds.	Miles	% of Paving
Sheet Asphalt, heavy	925,142	43.27	62.4
Sheet Asphalt, light	151,486	7.01	10.6
Bitulithic	87,784	3.52	5.1
Vitrified Brick	3,524	.11	0.2
Granite Block	13,227	.35	0.5
Concrete Plain	23,711	2.24	3.2
Concrete Protected	29,452	1.92	2.7
Oiled Macadam			
Oiled Gravel	20,017	1.38	2.0
Oiled Natural Soil	170,946	9.25	13.3
Total	1,455,289	69.08	100.0

Light traffic pavement is considered as that having a base 1 inches or less in thickness.

Heavy traffic pavement is considered as that having a base 5 inches or more in thickness.

## Summaries of Storm Drains.

Catch Basins	1169
Outlet Chambers	11
Manholes	255
Special Structures	64
Total Length Sewer (ft.)	177,028
Contract price	\$962,852

## Record of Railroad Paving.

Following is a tabulation of the various kinds of work, track mileage and estimated costs based on unit costs obtained from the Board of Public Utilities, and other reliable sources.

Los Angeles Ry., dry ballast, 2.66 miles double track, \$60,560 per mile; Los Angeles Ry., grouted, 8.38 miles double track, \$71,121 per mile; Los An-

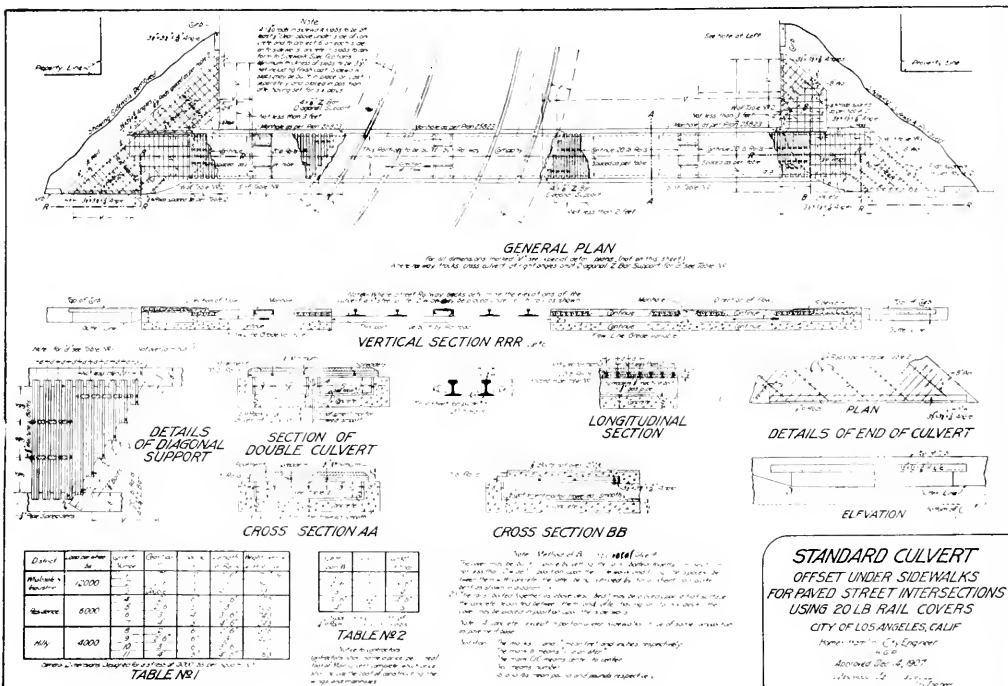

geles Ry., T-rail (rails not included), ballast, 1.85 miles double track, \$48,945 per mile; Pacific Electric grouted ballast, 2.88 miles double track, \$76,887 per mile; same grouted ballast, 1.02 miles single track, \$34,015 per mile; steam road grouted ballast, 1.22 miles double track, \$100,000 per mile; same grouted ballast, 1 mile single track, \$50,000 per mile. Total reduced to single track miles, 38.02.

## Record of Laboratory Tests.

Surface Mixtures—Regular, street department, old samples off street, Topeka, bitulithic, Warrenite, Asphaltic Cements—Regular, street department, miscellaneous, Binder, bituminous bases, sands, dusts, miscellaneous chemical analyses. Total number of samples tested, 7,469. Total tests made on 7,469 samples, 14,191.

## Average Cost of Tests.

Surface Mixture—Sheet asphalt, \$0.247; bitulithic, \$0.37; Topeka, \$0.323. Asphaltic cement, \$0.21; binder, \$0.299; base, \$0.314.

397

**Cement Laboratory.**

Cements, complete tests, \$61, \$2.02 per test; cements, boiling and setting time tests, 1277, 25c per test; sand, sieving and washing tests, 230, 50c per test; rock, abrasion tests (De Val), 5, \$5 per test; paving, brick rafter tests, 62, \$1 per test; sewer brick, absorption tests (Lab.), 91, 20c per test; concrete cylinders, compression tests, 39, \$1 per test.

**Culverts Constructed.**

The construction of culverts has decreased slightly during the year, due probably to the rapidly increasing area of the city drained by adequate storm sewers. A total of sixty-nine culverts were constructed during the year, of which eight were vitrified pipe, three were reinforced concrete pipe and the remainder steel-concrete construction. No corrugated iron culverts were installed during the year. The total contract price of culverts constructed during the year was \$15,212.85 against \$16,841 during the preceding year.

**Asphalt Paving.**

The methods of laying and requirements in asphalt work have not greatly changed during the year.

The specific gravity of street samples of sheet asphalt laid during the year shows a very much higher average than ever before, owing to several changes made possible by specification No. 96. The use of a hot hand-roller has been abandoned, and as one result, much less trouble is now experienced with cracking and checking in the surface. The pavement seems to be smoother without the hand-roller and

good gravities are no harder to secure.

All asphalt pavements are now laid on a basis of a definite number of pounds per square foot and "sticking" is resorted to only for the purpose of insuring a uniform spread of the paving materials.

Paint binder has been used to a considerable extent, and seems to give good results. The most satisfactory mixture consists of equal parts of asphalt and No. 1 engine distillate. The paint binder should be applied at least twenty-four hours before surface is laid. Samples of surface cut after several months, have invariably brought away portions of the cement concrete beneath.

A number of streets have been paved with a one- and one-half inch wearing surface on a three inch bituminous concrete base. Owing to the fact that trenching of a street for pipes nearly always immediately precedes paving, it is practically impossible to get a smooth pavement of this type. The cost is as great as the same surface with a four-inch cement concrete base which is much easier to construct, more satisfactory to property owners, and probably more durable.

**Railway Paving and Reconstruction.**

During the year grooved girder rails have been used on all reconstruction work done on steam and electric railways, with a single exception of Vernon avenue between Main street and Alameda street. The use of "T" rails

on this particular street was provided for by ordinance.

The various types of construction used by the different street and steam railways operating in this city are as follows:

**Electric Railways.**

L. A. Ry. Corp. uses both dry and grouted ballast, a 6-inch cement concrete base with 2-inch asphalt surface and 4½-inch bituminous header blocks, a 6-inch cement concrete base with 2-inch asphalt surface and 5-inch granite Pac. Electric Ry. uses grouted ballast, header blocks.

**Steam Railways.**

So. Pac. Co., Santa Fe Ry. and San Pedro, L. A. and Salt Lake Ry. use grouted ballast, 6-inch cement concrete base, with 2-inch asphalt surface and 5-inch granite header blocks.

The total number of miles (single track) of all roads in the city is approximately as follows: Los Angeles Ry. Electric narrow gauge, 310.50; Pacific Electric Ry. Electric standard gauge, 152.30; Southern Pacific steam, 22.50; Atchison, Topeka and Santa Fe, Southern Pacific and Salt Lake Railways (estimated), 27.50; total, 512.80.

No adequate provisions have been made for city supervision or inspection of railway paving and reconstruction work in city streets. With the present organization an occasional visit to each job by an assistant engineer or inspector is all that can be done in the way of inspection.

## Oakland Street Construction.

By Commissioner of Streets William J. Baccus and City Engineer Perry F. Brown.

**Macadam Used.**

For residence streets, we are using oil-macadam exclusively. The type now being constructed is the two-course oil-macadam described in the report of two years ago. This pavement consists of a layer of stone four inches thick at the gutter and five inches at the crown, measured before rolling, thoroughly compacted as water bound macadam. A poorer grade of rock is permitted in this course than heretofore specified for water-bound macadam, as this rock receives no direct abrasion and the use of a rock that is cheaper to quarry and compact has materially lowered the cost to the property owners. The department has gone farther and encouraged the use of soft rock in the base, for the reason that it compacts better into a firm, dense foundation without ruining the sub-grade through excessive rolling.

On top of the base is spread three inches of high grade rock. This is oiled, harrowed, oiled again, then screened and rolled. After filling the voids, it is oiled again, screened and rolled to completion. One-half gallon of oil is used for each of the three applications.

**Wear Is Good.**

This class of construction has generally given excellent satisfaction. In

some cases, where excessive hard rock was used for the top course, the property owners have been disappointed in the soft and rough appearance of the surface when completed, but experience shows that these defects are usually cured by warm weather, time and traffic. Only one street gives evidence of requiring more attention. This street may need another oiling. In this connection, a curious fact has been observed, namely, that streets built of soft rock become hard and compact much sooner than those built of hard rock. It is not clear that soft rock surfaces will last as long as hardrock surfaces, but their solidity and fine appearance during their first years, is notable.

**Autos a Factor.**

The use of oil-macadam has been forced upon us by the heavy increase in auto vehicles. Water-bound macadam will not stand, even with the best of maintenance, under rapid-moving rubber tires. These kick the small stones and dust off the surface of the street, destroying the bond and cause the road to ravel and become rough and full of holes. Therefore, we not only build no more water-bound macadam streets, but are treating those already constructed with oil or tar. Thirty-four miles of old streets have

been so treated by the department during the past year, and since July 1, 1911, we have reduced the amount of water-bound surface from 254 miles to 126 miles. Fortunately, this enforced use of oil has its compensations, for it has cut our sprinkling bills enormously, reduced the cost of repairs and enabled us to give better service on the remaining water-bound macadam.

**MARTINEZ TO PREPARE FOR EXTENSIVE STREET IMPROVEMENTS.**

That steps be taken at once by the city trustees to make plans for the various civic improvements which must be made before the building of permanent streets can begin is the desire of Trustee J. E. Colton, who will probably ask for a special meeting of the board within a short time to consider these matters.

Colton is anxious that the street work be started, but the trustees have thus far failed to make any move in this direction. Colton urges that building and curb lines be established, provision made for the building of conduits for water, gas, telephone and electric light lines all underground, that proper sewers be provided and then start the paving of the streets and rush it to completion.

# San Francisco's New Civic Center Pavements.\*

By Jas. M. Owens, Assn. Mem. Am. Soc.  
C. E., Assistant Engineer, San Francisco.

Undoubtedly one of this city's most noticeable civic achievements has been that of the selection and improvement of its Civic Center. It was only in 1905, the year previous to the fire and earthquake, that Mr. Burnham, the well known expert on city planning, presented his plan for the improvement of this center. At that time the realization of the project seemed to be hopelessly in the future. In the light of these facts, probably the most prominent thing about it, when we compare it with our civic achievements of other days, is the evident efficiency displayed in the prosecution of the construction of its buildings and its street pavements.

With its spacious Auditorium, which has housed many world congresses during the year just ending, with its City Hall, whose classic lines and resplendent dome, now nearing completion, and with its Library, well under way and with its completed pavements and attractive plaza, it is apparent to even the most skeptical, that the fulfillment of this, our city's long cherished dream, is something that is not far distant. The Civic Center as planned has an area of 24 acres. The City Hall covers an area of 116,480 square feet and will cost \$3,400,000 when completed. The Auditorium covers an area of 100,552 square feet and costs \$1,200,000. This was the gift of the P. P. L. E. to the city. A State building costing \$1,000,000; Library costing \$300,000; a Public Health building; Fire and Police building, and other structures as needed. This will give a fair idea of the cost and plan of the Civic Center.

The purpose of this paper is to describe in a general way, only, the pavements and some of the details incident to their construction.

The clearing away of the site, the realignment of the streets within it, and the planning of the grades to suit the conditions required in the construction of such large buildings, were problems that were expeditiously handled by the Board of Works, the City Engineer's office and the Consulting Architects. In this way the present plan of improvement was evolved. The first survey for the street improvements within the Civic Center were made by the bureau of surveys during the latter part of 1914.

Preliminary to the construction of the pavements in and about the Civic Center, sewers had to be reconstructed and the existing tracks of the U. R. R. Co. on both Larkin and McAllister streets had to be reconstructed to the new alignment agreed upon by the city authorities and the railroad company. These tracks, the westerly track on Larkin street and the southerly track of the McAllister street line, were each swung out five feet from their original position, thus making the new track center 15 feet instead of 11 feet old

Concrete Mixer at Work Near Polk and Grove Streets.

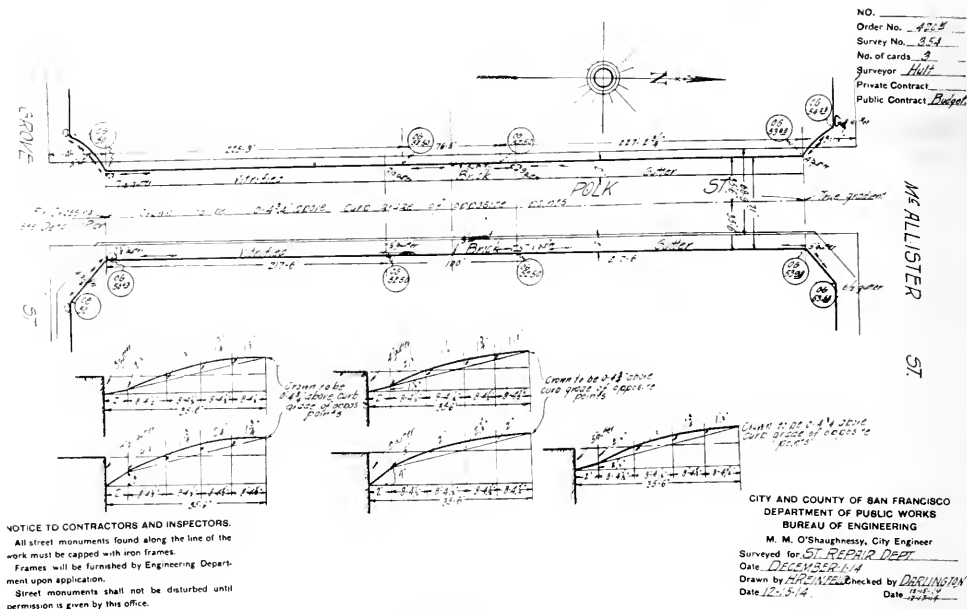

inch. This was done so as to afford sufficient room for the installation of center trolley poles instead of side poles. At the end of the new work, connection was made with the old tracks by means of 100 feet reverse curves.

On McAllister street, the new arrangement of tracks gives a clear width of roadway of 15 feet on the north side and 23 feet on the south side, this variation being due to the fact that the old existing north track is only 15 feet from the curb line throughout. In designing the curve for the pavement of this particular section, owing to the fact that the track centers did not coincide with the center of the roadway, it was found necessary to elevate the southerly track 2.0 inches above the north track which remained undisturbed, so that the cross section would be uniform, a variable gutter depth

was used, the north gutter being made  $1\frac{1}{4}$  inches deep and the south gutter 7 inches deep. A slight change was made near the easterly end of the work at Larkin street, where the southerly track had to be raised slightly in grade to meet the grade of the newly installed special work at the crossing. The gutter depth on the south side adjoining was varied so as to parallel as near as possible the grade of the track, thus insuring a uniformity of cross section in the pavement. In the reconstruction of the tracks on Larkin street, it was found necessary to raise the easterly tracks to grade, but maintain its original alignment; the westerly track was moved out 5 feet west, making the new track center 15 feet. There was nothing specially noticeable in the reconstruction of this track work, excepting the attempt of the railroad

Brick Gutter Construction on Center of Larkin and McAllister Streets.

Plan and Cross-section of Polk Street.

Plan of Polk and Grove Street Intersection, San Francisco.

PLAN OF SAN FRANCISCO'S NEW CIVIC CENTER, Showing Streets improved in Black. Street North of Plaza is McAllister; Street South of Plaza is Grove Street; Street Through Center of Plaza is Fulton Street; Street West of Plaza is Polk Street; Street East of Plaza is Larkin Street.

company to save and move its tracks without disturbing any appreciable amount of the pavement between rails. They were partially successful in doing this. The west track was cut loose at the ends and moved to its new position by means of jacks, it was then brought to grade and the material sluiced underneath by means of a fire hose.

The construction of sewers, and removal of the ruins of the old City Hall, delayed the paving operations a little longer than was expected.

The original width of roadway on old streets within the area now occupied by the Civic Center, was 38.75 feet, these under the new plan were widened considerably, for instance Polk street was made 71 feet, Grove street, 71, McAllister street, 71, Larkin street, 71, and Fulton street extension, 100. Each block presented a problem in itself, owing to the difference in gradients, presence of railroad tracks and other existing conditions. The unusual plan of the crossings, as laid out by the bureau of architects, called for a little

different treatment than is given to the ordinary street crossings.

Owing to the varying width of the streets making up their intersection and the truncated corners of same, a special scheme for crowning it had to be devised. This is illustrated partially by appended diagram. (Fig. 1.) An intersection of such unusual dimensions can easily be made unsightly by the use of either too large or too small a crown. A somewhat different treatment had to be given to the crowning of the intersection of McAllister and Polk and McAllister and Larkin streets on account of the tracks of the U. R. R. Co. not being centrally located.

On Larkin street, from McAllister street to Grove street, where the western track was moved west 5 feet from its original position, and center poles installed, special treatment had to be made for drainage owing to the variations in the gradients in the two blocks, and the wide intersection of Larkin with Fulton street extended.

Fulton street from Larkin to Hyde street having the unusual width of roadway of 100 feet, called for a little

more care in the handling of the construction of the pavement than in the other cases cited. The work was under the supervision of Superintendent McCoy and his assistant, Mr. King. Here quarter point stakes were driven to grade along the length of the block to elevation shown on the template. It was decided to make the crown light on this block as it had a very generous gradient longitudinally. Then the construction gang placed the concrete in the following manner. Starting from the edge of the gutter, a strip of concrete was laid for a distance of 22 feet from the gutter line for the entire length of the block. The mixer was then turned and another strip of concrete 24 feet width was laid, then a strip of 24 feet and finally another of 22 feet, this completed the concrete foundation. The binder course and the top surface were laid in a similar manner. A small Egan concrete mixer with a batch capacity of about 11 cubic feet was used on this job, and some very good results were gotten from it. Some 6,500 feet being the run for an eight hour day. The proportion used in the concrete mix was

1:24:27. The thickness of the binder coat was about  $1\frac{1}{2}$  inches and that of the top surface about the same. The crown on this street, as I have before mentioned, was made purposely light, and the result has been very satisfactory. The section adopted affording very good drainage. In fact flat crowns prevail throughout the Civic Center on all the pavements. This undoubtedly is more suitable for an asphalt pavement than the usual crowns given by the different crown formulae. Probably a large part of the rolling of this material under traffic and temperature, is due to excessive crowning. Another thing worthy of note is that of the arrangement of catch basins at the intersections. Instead of placing the catch basins in the center, as is usually done on most of our intersections, they were placed on either end of the arc and a summit placed in the center, doubling the drainage. This scheme has worked out very well in practice. The improvement of the Plaza was under the jurisdiction and according to the plan of the bureau of architecture, and was handled outside this department.

The very effective color scheme and artistic result gained is due particularly to Mr. John Galen Howard of the Consulting Board of Architects, while to Mr. John McLaren, Superintendent of Parks, credit must be given for his skillful handling of that part of the plan having to do with the landscape gardening. There is not the slightest doubt but that when all of the buildings have been constructed in and around the Civic Center, and all other projected improvements made, that this city will have one of the finest Civic Centers to be found anywhere in the United States.

#### RIVERSIDE PREPARES TO IMPROVE FAIRMOUNT BOULEVARD.

The first definite step toward the permanent improvement of Fairmount Boulevard, from First street to Whittier Place, the north boundary of White park, has been taken on the petition from a majority of the abutting property owners filed with the council, and instructions given to the city engineer to prepare the necessary maps and sections.

This successful issue of a much desired improvement has only come through the hardest kind of work on the part of members of the Fairmount Boulevard Improvement Association. They have been compelled to give up their ambitious plan for a center parking space, distinctive street tree planting, and unique lighting system, and are now asking only for the regulation macadam roadway, 34 feet in width, standard curb and gutter, cement sidewalk and the standard one-light concrete post ornamental lighting system.

The distance to be improved is seven full blocks, and the short block between Eight street and Whittier Place, representing a total frontage of about 3,200 feet. Of this frontage the signers of the petition represent 2,780 feet, a safe majority, which does not include the Pacific Electric frontage at the warehouse, between Fifth and Sixth, or at the depot between Seventh and Eighth.

Concrete Base, Binder and Top Surface on McAllister Looking East, S. F.

#### PASADENA STREET WORK. By H. V. Orbison, City Engineer.

Nearly a quarter of a million dollars has been expended in 1915 in street work through the city engineer's office. During the past twelve months a great amount of important work has been done. The year that is drawing to a close has been one of the big years in the engineer's department.

During the year eight and one-third miles of paving of all classes have been laid. This does not come up to the 1913 total when an extra large amount of work was done in Oak Knoll. The total improvements and costs as compiled by the City Engineer are as follows:

- Grading, 3 miles; cost, \$7,907.
- Curb, 35.6 miles; cost, \$46,966.
- Gutter, 64,064 sq. ft.; cost, \$8,620.
- Walk, 82,172 sq. ft.; cost, \$6,918.
- Paving, 8.4 miles; cost, \$92,500.
- Storm drains and culverts cost \$11,856.
- Sanitary sewers, 2.2 miles; cost, \$9,354.
- Lighting systems, 3.75 miles; cost, \$34,722.
- Underground conduits, 1.2 miles; cost, \$23,517.

The largest job the department has under way is the northwest storm drain, the contract for which was recently let. The work will cost \$25,000 and will be completed during the next year. Some of the largest paving contracts were Pasadena avenue, cost, \$11,000; West Walnut street, cost, \$7,000; South Wilson avenue, cost, \$15,000; Terrace and Eleventh drives, cost, \$13,000; Arroyo drive, cost, \$18,000, and Worcester avenue, cost, \$5,800.

The El Molino avenue conduit contract was one of the largest to be awarded. The price was \$14,876. More ornamental lighting systems have been installed this year than in any previous year. The largest ones have been South Lake avenue, South El Molino avenue, Bellefontaine street, Mentorina court, Waverly drive, Marengo avenue, North and South Fair Oaks avenue, Terrace and Eleventh drives, Colorado street and South Raymond avenue.

#### POOR MATERIAL CAUSE OF SPOKANE BRIDGE COLLAPSE.

The most probable cause of the collapse of the Division street bridge at Spokane, Wash., in which five men were killed, was the breaking of the lower chord eye bars, due to poor material, according to a report made to the Coroner by John W. Cunningham of Portland, Ore., who examined the wreckage for the Coroner.

The report states the material was inferior at the time the bridge was built in 1892, and its use would have been improbable under proper engineering inspection.

After the erection, however, says the report, no reasonable inspection could have shown the cause of the failure.

Damage suits aggregating \$100,000 are being prepared as the result of the disaster when five persons were killed and ten injured. Both the city of Spokane and the Washington Water Power Co., owners of the street cars in which the killed and injured were riding, will be made defendants. Both have disclaimed responsibility.

#### CITY ENGINEER OF PORTERVILLE DISMISSED.

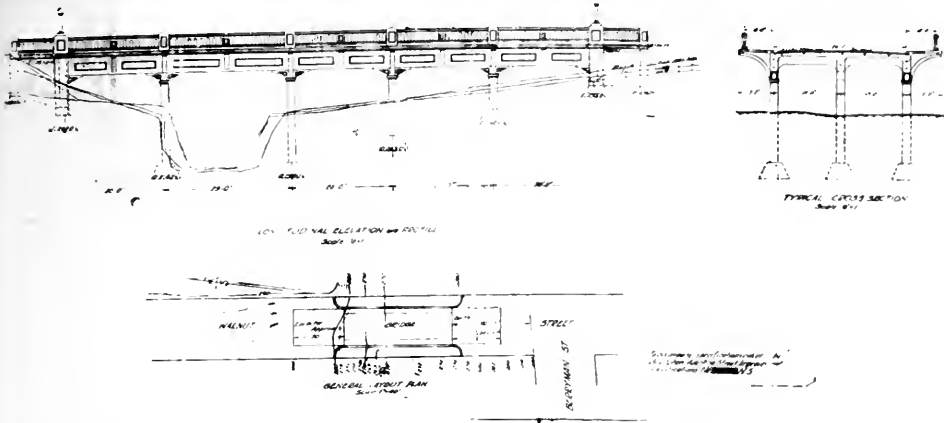

As a development of the charge that the street paving recently completed in Porterville by the Federal Construction Company, at a cost of approximately \$160,000, was not in accordance with specifications, I. H. Althouse, City Engineer and Superintendent of Streets of Porterville, Tulare Co., Cal., was asked for his resignation by the City Council. When Althouse refused to give it, the office was declared vacant.

Protests against the paving bonds issued to pay the Federal people, have been filed with the Council by taxpayers, and charges of improper work will be aired in the courts.

The Municipal Bond Market is looking up, and the Bond Buyers are looking the "Building and Engineering News" up. A proposal ad for your bonds in our columns will bring competition.

# Walnut Street Bridge Over Codornices Creek, City of Berkeley

By J. J. Jessup, City Engineer.

The City of Berkeley has just completed the Walnut street bridge over Codornices Creek. The structure is of reinforced concrete as shown in the accompanying diagram, and the class of work done on this bridge is best described by quoting from the specifications, which were rigidly enforced.

**Extract from Specifications,  
Materials.**

**Sand:**

Sand shall be designated as that portion of the aggregate which passes a No. 4 standard sieve. The grains shall be of hard sound rock of siliceous, granitic or igneous origin. It shall not contain any appreciable amount of organic matter, and shall not show more than five (5) per cent by volume, of silt, when shaken in water and allowed to stand for an hour.

In mesh composition it shall approximate a parabola when plotted with the mesh area as abscissae and the per cent passing as ordinates and fall within the following limits: Not less than five (5) per cent nor more than twenty (20) per cent shall pass a No. 50 standard sieve, not less than twenty (20) per cent nor more than thirty-five (35) per cent shall pass a No. 30 standard sieve, not less than thirty (30) per cent nor more than fifty (50) per cent shall pass a No. 30 standard sieve, not less than thirty-five (35) per cent nor more than sixty (60) per cent shall pass a No. 20 standard sieve, not less than forty (40) per cent nor more than seventy (70) per cent shall pass a No. 10 standard sieve and none shall be retained on a No. 1 standard sieve. A mixture of two or more sands may be required to produce a sand of the requisite composition.

**Stone:**

Stone shall be designated as that portion of the aggregate retained on a No. 1 standard sieve and passing a

one (1) inch screen. It shall be of hard, tough stone of uniform quality, and free from disintegrated stone. It may be either crushed quarry rock or recrushed gravel and shall be a mixture of fine and coarse material within the following limits. Not less than thirty-five (35) per cent nor more than fifty (50) per cent shall pass a one-half (1/2) inch screen, not less than sixty (60) per cent nor more than eighty (80) per cent shall pass a three-quarter (3/4) inch screen and none shall be retained on a one (1) inch screen.

**Cement:**

The cement shall be a first quality Portland cement of a brand that has been in continuous and successful use for the last three (3) years.

It shall be furnished in original packages of uniform weight bearing the brand and manufacturer's name.

In determining the proportion of cement for use in concrete and mortar, one bag shall weight ninety-four (94) pounds and will be considered a cubic foot.

The cement shall meet the requirements of the standard specifications for cement adopted by the American Society for Testing Materials.

All tests shall be made in accordance with the methods outlined in the final report of the Special Committee on Uniform Tests of Cement of the American Society of Civil Engineers, presented to the annual meeting of the Society, January 15th, 1912.

**Steel Bars:**

Steel for reinforcing shall be new stock delivered without rust other than may have accumulated in prompt transportation to the work.

All steel for reinforcement shall consist of deformed open heath bars, and shall conform to all the requirements of the Manufacturer's Standard Specifications for medium steel.

Round mechanical bond bars may be

substituted for square, provided they have equivalent net sections.

If twisted steel bars are used, they shall be twisted cold so that each bar shall have one complete turn in a length of not less than eight (8) nor more than twelve (12) times the nominal size. The steel shall have no tendency to crack in twisting.

**Forms:**

All forms shall be of the correct shape and dimensions. They shall be of two (2) inch shiplap Oregon pine lumber, dressed and sized, and free from rough knots. They shall be so braced and supported that no distortion can occur. Especial care will be required on all suspended members to obviate any possibility of deflection. The inside surface of the forms shall be thoroughly coated with oil to prevent adhesion of the concrete.

**Placing Reinforcing Steel:**

The reinforcing steel shall be bent to the shape shown on the drawings, and shall be placed in the exact position and with the spaces shown on the drawings, and it shall be so securely wired or otherwise fastened in position as to prevent its becoming displaced during the placing of the concrete. It shall, at all times, be thoroughly protected from moisture until placed in final position. Furthermore, after placing in position, if the concreting be interrupted for any considerable number of days, any steel that is not covered by concrete shall be painted with a heavy coat of cement grout. Any steel which shows scale must be removed the concrete is placed shall be satisfactorily cleaned.

Whenever necessary, the bars shall be lapped, the lap not being less than six diameters.

No allowance will be made for wire or additional steel bar required to hold the reinforcing steel shown in the drawing in place.

**Water:**

Water used for mortar and concrete shall be fresh and clean.

**Concrete:**

All concrete used in the work shall be composed of Portland cement, sand and stone in the proportion approximately of one (1) cubic foot of cement to two and one-half (2½) cubic feet of sand and four (4) cubic feet of stone.

The proportion of sand to stone may be varied as required by the City Engineer in order to obtain an aggregate of maximum density.

A mechanical batch mixer shall be used in mixing the concrete, and the work must result in a thorough and uniform mixture of the several ingredients of such consistency that there shall be no tendency for the stone to become separated from the mortar.

The whole operation of preparing each batch of concrete is to be performed as expeditiously as possible, by the aid of machinery and a sufficient number of skilled men. No greater quantity is to be prepared than is required for immediate use.

When a fresh layer of concrete is to be put on one which is set, the entire surface shall be previously cleaned, made thoroughly wet and covered with a layer of cement mortar composed of Portland cement and sand, and in the proportion of one (1) cubic foot of cement to two and one-half (2½) cubic feet of sand.

All girders and floor slabs shall be poured continuously. If absolutely necessary to make a joint it shall be vertical and on the line indicated by the City Engineer.

**Face Finish:**

The exposed vertical faces below the level of the top of the sidewalk and the bottom of the outside girders shall be a splash coat consisting of one (1) part cement, two (2) parts sand of approved quality, and sufficient mineral coloring matter to give a reddish color of the proper shade.

The face of the posts and railing above the level of the top of the sidewalk shall be rubbed to a uniform finish with carborundum brick and given a paint coat of cement and sufficient mineral coloring matter to give a reddish color of the proper shade.

**Roadway Pavement:**

The concrete surface of the roadway shall be formed with a template of the proper shape, floated to a uniform surface and just after initial set has taken place, shall be swept with coarse fiber street brooms to give a striated surface. It then shall be kept wet down for seven (7) days.

After the concrete of the bridge has set sufficiently to permit loads to go upon the structure, and in no case, less than twenty-eight (28) days after the roadway floor slab has been placed, the surface of the concrete shall be thoroughly cleaned of all loose and foreign material and thereon shall be applied the paint coat to bind the surface course to the foundation.

The paint shall consist of a solution of asphaltic cement, of the quality elsewhere herein specified, in commercial gasoline. The asphaltic cement shall be dissolved, while warm and soft, in the gasoline in such proportions that the resulting paint shall give a glossy surface after the evaporation of the

solvent, but at the same time can be applied so as to form the thinnest possible coating.

The paint coat shall only be applied when the concrete foundation is absolutely dry and free from the slightest dampness to insure adherence to the concrete. No more of the surface of the foundation shall be painted than can be covered with the asphaltic surface course within five (5) hours after the application. Under no circumstances shall the paint coat be allowed to become in any way dirty, nor shall the surface course be applied to such coat more than five (5) hours after the painting has been done.

Upon the paint coat, laid as above specified and swept free of all loose fragments and rubbish, shall be laid an asphaltic wearing surface, composed of asphaltic cement, stone and stone dust, and the materials shall be mixed in such proportions that the percentage composition (by weight) of the wearing surface shall be within the following specified limits:

Pure Bitumen (in asphaltic cement) between .....	10 and 14
Sand, between .....	70 and 80
Stone Dust, between .....	10 and 18

The asphaltic cement and the sand are to be heated separately in suitable appliances to a temperature not less than 300 degrees nor more than 325 degrees Fahrenheit, and the stone dust is to be added, and mixed with the hot sand before the asphaltic cement is added. The mixing of all ingredients is then to be continued within the temperature limits before indicated until every particle of sand and stone dust is thoroughly coated with this asphaltic cement.

The wearing surface mixture, thus produced, shall be brought to the work in suitable trucks or dump-wagons, and shall not be colder than two hundred and fifty (250) degrees Fahrenheit when it reaches the street. It is to be uniformly spread over the concrete base with hot shovels and rakes to such a depth that after ultimate compression, the finished wearing surface shall have a thickness of one and one-half (1½) inches. After being spread, the mixture shall at once be compressed with hand rollers weighing at least two hundred and fifty (250) pounds to the foot width of roller, and these shall be immediately followed by a steam roller having a weight of between one hundred and twenty-five (125) and one hundred and fifty (150) pounds to the inch of roller, after which, while the pavement is still hot, it shall be rolled with a steam roller having a weight of not less than two hundred and fifty (250) pounds to the inch width of roller.

The steam rolling is to be done by first running the roller across the roadway at right angles to its direction, then crossing diagonally first from one side and then from the other, the direction of the two diagonal rollings being approximately at right angles to each other, and finally by rolling parallel with the direction of the street.

The rolling with the steam roller shall be continued for five (5) hours for every thousand square yards of surface. Such portions of the wearing surface as it may be impossible to roll

shall be thoroughly tamped with hot tampers and smoothed with hot smoothing irons, care being taken not to burn the surface.

A small amount of hydraulic cement or infusorial earth shall be swept over the pavement after the rolling.

The resulting surface of the finished pavement must show an even and smooth surface, must be thoroughly compressed and shall be true to grade and cross section.

No asphaltic wearing surface shall be laid in rainy weather or when the paint surface is wet.

Hand-mixing with shovels or other tools and the use of open kettles for mixing the ingredients for the wearing surface will not be allowed.

**Storm Water Inlets and Drain Pipes:**

Concrete storm water inlets shall be placed where shown on the plans and fitted with cast iron frame and grating as shown.

The drain pipe shall consist of eight (8) inch diameter wrought iron pipe of the quality specified placed in the column beneath the inlet to the depth shown on plan. The bend shall be connected to the straight pipe with standard sleeve.

From the face of the column to the outlet end, as shown on the plans, the drain shall consist of vitrified iron-stone pipe of the quality specified, laid true to line and grade, with joints fully cemented with mortar consisting of one (1) part cement and two and one-half (2½) parts sand.

**Electric Conduit:**

The electric conduit shown on plans shall be one-half (½) inch diameter galvanized duct or equivalent quality with standard outlet boxes at the points noted on the plans, of sufficient size to admit of the installation of a hard switch and fuse. The lid shall be held in place with brass machine screws.

**Electrolights:**

The lamp post shall be of metal with cast iron base and cap. They shall be of standard type and shall conform to the dimensions shown on the plan within the limits given.

The post castings shall have a thickness of not less than three-eighths (¾) of an inch.

The steel shafts, if used, shall be of two ply, medium steel plates free from flaws, or irregularities of shape.

After erection the posts shall receive two (2) coats of best weatherproof paint of olive green shade.

Each post shall be fitted with one fourteen (14) inch with six (6) inch base, rough inside, sanded, glass globe. It shall be held in place with round head brass machine screws.

**Electric Wires and Fixtures:**

The posts shall be wired complete to connect with outlet box on electric light pole nearest the southeast corner of the bridge. The wire shall be a Duplex No. 10 size N. E. Code.

Each post shall be fitted with one one hundred (100) watt standard Mazda Tungsten lamp. The sockets shall be weather-proof, standard General Electric No. 9411 or equal.

The cutout shall be a combination two-way switch and fuses, Hart & Hegemann or equal.

## Street Work And City Planning.\*

By Nelson P. Lewis, Mem. Am. Soc. C. E., Chief Engineer Board of Estimate and Apportionment New York, N. Y.

### What City Planning Is.

The attention lately given to the subject of City Planning all over the world indicates that it is one in which the people generally are interested; not only those living in large cities, which may undertake costly and pretentious schemes of improvement, but the dwellers in the small towns, and even villages, all of whom are eager for information upon the subject and are ready to devote their time and energy to the study of plans to make their communities more orderly and attractive. Engineers have not been as active as might be expected and have heretofore seemed disposed to leave city planning to others. Mr. R. Verstraete, engineer of bridges and roads at Bruges, has described the attitude of the engineer in the following words:

"Throughout all ages, mankind has done its utmost for the embellishment of cities. The remains handed down to us from antiquity and from the Middle Ages testify to this point. Few works, however, appear to have been written on the subject, and of these the most important are of comparatively recent date. They are mostly the works of art enthusiasts. Engineers appear to take little interest in the subject. If their apparent indifference continues much longer, they will find that this natural branch of their profession will pass into other hands, which would be much to be regretted. The dominating desire for the picturesque, for variety and for originality which ever guides art enthusiasts will never lead to the possibility of a natural solution of a problem such as is the outcome of utility linked with good taste."

Mr. George McNaney, President of the Board of Aldermen of New York City, who is not only a close student of municipal problems but has had unusual experience as a city officer, says:

"City Planning simply means getting ready for the future in city growth. It is the guidance into proper channels of a community's impulses towards a larger and broader life. On the face it has to do with things physical,—the laying out of streets and parks and rapid transit lines, but its real significance is far deeper. A proper city plan has a powerful influence for good upon the mental and moral development of the people. It is the firm base for the building of a healthy and happy community."

Other definitions might be quoted, definitions of architects, artists, lawyers, publicists, but few engineers have stated what they understood city planning to be. The definition of the author, first used in a paper before the Municipal Engineers of the City of New York in 1911, is this:

"City Planning is simply the exercise of such foresight as will promote the orderly and slightly development of a city and its environs along rational lines, with due regard for health, amenity and convenience, and for its commercial and industrial advancement."

### The Elements of a City Plan.

A French writer gives four divisions of the city which require special study and treatment: the business, the industrial, the administrative, and the residential quarters.\* He also notes that "the climatic conditions of each country must necessarily determine the type of dwellings selected by the inhabitants." He might have added that the same conditions affect the positions of dwellings and other buildings with respect to each other, the width of streets, and various other features of the city plan.

Without regard to the various municipal activities and administrative details, the convenience and attractiveness of a city will depend upon four features of its plan:

1. The transportation system, or the means provided for getting in and out of the city, and for quick movement of passengers from one part of the town to another. It is obvious that transit needs cannot be accurately foreseen, but provision should be made for improving and extending them when needed. A large part of the transportation will always be in the streets themselves, and its adequacy and efficiency will be largely determined by the location and dimensions of the streets in which the intra-urban transit lines are located.

2. The street system in and through which the daily business is done and by which the people gain access to their homes and pass from these homes to their work, recreation and amusement. A street system once adopted and developed must remain indefinitely. While some streets may be widened and an occasional new street may be cut through existing improvements, the general street plan, once established and constructed, is fastened upon the city as long as the city itself lasts. A catastrophe such as the great fire of London in 1666 or the San Francisco fire in 1906 may afford an opportunity for a recasting of the plan for a considerable area, but it is seldom availed of.

3. The park and recreation facilities upon which the comfort and health of the community are to a large degree dependent.

4. The location of public buildings, which may render the conduct of public business convenient or difficult and may give a favorable or unfavorable impression to visitors.

While there may be other elements

which go to make up the complex organism called the modern city, those enumerated are the ones which are likely to give the town its character, to make it convenient or inconvenient, dignified or commonplace. Upon the skill and foresight exercised in providing for them will depend to a large degree the orderliness of the city's growth, and the facility with which individual and corporate activities can be carried on.

In every city there are large areas not yet developed and not even planned, where opportunities are presented to design a street system, the different parts of which will be properly located with respect to each other and to such modification of the system of the existing town as may ultimately be carried into effect. Too often these undeveloped sections are planned as if they were so many different urban areas unrelated to each other or to the original city, and too often the obvious blunders of the older sections are repeated in the new additions. While a city cannot often be planned from the beginning, there are certain general principles which should be regarded in the laying out of the street system of a portion of a town as well as of a complete city. These were outlined in a paper presented by Mr. Raymond Unwin at the London Town Planning Conference in 1914 in the following words: "Having settled the purpose of the different areas, determined the general character of the growth and the approximate direction desirable for main and subsidiary highways the town planner finds himself with the following component parts out of which to make his design, namely: The main center point, or climax, dominating the whole; the secondary centers on definite proportion and relation to it; and the main highways linking them up, the whole giving the bones or main framework of the design. Within the space defined by this framework, having special relation to the secondary centers and proportion to the primary highways, we have the network of secondary highways, while within the areas which these leave, for the purpose almost solely of giving access to the buildings, we have the minor roadways or drives, which should be in relation to any subsidiary center point, and both in relation and proportion to the framework of the secondary highways." \* \* \* In town planning it is essential to avoid being carried away by the mere pattern of lines on paper. Order, definiteness of design there must be, but there must first be grasped an understanding of the points where order is important and will tell and of those where it matters little."

In nearly all cases where a street plan is to be devised, whether it be for a large area which can be treated almost as an entire city in itself, or for a smaller tract contiguous to the built-

\*A paper presented at the International Engineering Congress, San Francisco, 1915.

\*Mr. A. Agustin Rey in a paper on "The Growth and Development of Towns" presented at the London Town Planning Conference, 1909.

up portion of an important city, the first essential is an accurate plan of the existing roads showing their widths and the buildings fronting upon them. These roads will be of two kinds,—old highways which served to connect villages or centers of population, some within and others without the area to be platted, and roads and streets which may have been laid out as parts of real estate developments and according to which property may have been sold, but along the lines of which there has been little or no building. The former class of roads have a good excuse for their existence and they serve a useful purpose, they lead where people want to go and are likely to be fairly direct. Their alignment may be somewhat faulty, their grades may be excessive in some places, and their widths will be inadequate in view of the fact that they will naturally become the main lines of traffic for the urban district which will include them. With such straightening and widening as may be deemed necessary, and such changes in line as will reduce excessive grades, these old roads will be the logical basis of the street plan which is to be prepared. When they have been platted, it will be obvious that additional roads will be needed, some to establish cross connections, others to give greater directness to the roads traversing the entire territory, others as by-passes around groups of buildings so located as to render the widening of some portions of the old roads unduly expensive, and still others to furnish lines of main drainage along the valleys through which the lateral sewers and subsidiary trunk lines must ultimately find their outlets.

Lastly will come the minor streets which will serve almost entirely for access to dwellings. As all of these streets will connect directly with either the secondary or main highways, their alignment and grades are of little importance, as they will be used almost exclusively by private vehicles or those delivering supplies to the abutting houses. The chief concern is that they should be so laid out as to furnish ample light and air and discourage, if not prevent, a too intensive development with rear buildings in case the city ordinances do not prohibit this menace to health and decent living. To plan far in advance the precise location of these minor streets is not necessary, if it be not unwise.

While directness is desirable in the main and even the secondary streets, it does not follow that such streets should be perfectly straight, in fact, straight streets are seldom interesting. Neither need circumferential or curved streets be laid out with perfect symmetry. The great boulevards of Paris consist of a series of chords of varying length with deflections at different angles, yet their pleasing effect is in no wise diminished. Symmetry on a plan and symmetry on the ground are very different things. In studying a plan the slightest departure from such symmetry is noticeable, but on the ground it cannot be detected. One can ride or walk along a boulevard following a sweeping curve and be unconscious of the fact that its radius is frequently changing while if examined on a plan

these changes are at once apparent. Even if such a boulevard were broken into short straight sections, the utility of the street and even its beauty, so long as its general direction is preserved, are practically as great as if its lines were perfectly straight or symmetrical, and it undoubtedly acquires added interest from the fact that important buildings located at the points where the direction is changed will show to excellent advantage, and interesting street pictures may thus be formed. In the case of the minor streets there is still less reason for straightness or even directness.

#### Adaptation to Topography.

That the various elements of a city plan as heretofore outlined should be adapted to the topography of the site seems so obvious as to need no special emphasis, yet there are numerous instances where there has been done only to a limited extent. The topography should, in fact, be the first thing to be considered in determining the general features of the comprehensive plan. Upon it will especially depend the system of main drainage, provision for which must be kept in mind from the beginning, and the transportation system which, while it will naturally be designed to carry people where they want to go, should be able to follow the lines of least resistance, excessive and sharp curves involving not only heavy operating expenses but a certain amount of danger. A street plan prepared in the office without sufficient information as to the topography of the ground upon which it is to be laid out may look very well on paper but is likely to be found entirely unsuited to actual conditions, and if persisted in may impose a heavy initial burden for the construction of the streets and a perpetual handicap upon traffic by reason of the unnecessarily heavy grades. The first step, therefore, is to secure a good topographic survey of the territory to be platted. Sometimes this initial survey is made in far more detail than necessary, the idea being that a complete street plan is to be made at once. The folly of doing this has already been emphasized; the time and expense of doing so could be used to better advantage in a study of the larger aspects of the problem or in working out only the skeleton plan. Topographic surveys are expensive and the work of planning the street system should not be loaded up with needless cost at the start. The survey required for the first study should show existing roads with the location of buildings fronting on them, the actual drainage areas, the existing railroads and routes suitable for additional lines, the waterfront, if there be one, and the localities best adapted to the accommodation of water borne commerce and the places which, from their picturesque features, are most suitable for park reservations. Further details are not required for the first study of the plan, they will come later. A contour map or a model will be of great help in laying out the first skeleton plan. When this has been determined and the time comes to fill in the details, further surveys will be necessary, but they can be taken up in one section at a time as each of the areas lying

between the arterial streets can and should be studied separately. In this connection, proper drainage should be the first consideration, while the location of property lines will be of great assistance in so planning the minor streets as to avoid damages, caused by leaving unusable remnants, whereas it is possible to do so, and still secure a rational and convenient plan.

The first step in the physical creation of a street system is the grading, and as this comes at a time when the value of the abutting property is small, the cost should be kept down to the lowest figure consistent with a reasonable plan. The preference for rectangular blocks which will produce the greatest possible number of right-angled lots is so general that excessive grading and needless step grades are frequently the price paid to secure them. This policy often defeats its own purpose, as the grading up or down of the abutting lots is likely to involve a cost greater than the value of the few lots gained by a rectangular system over those which would result from one conforming more closely with the natural surface, while the latter would be far more attractive. There is something of a reaction against the rigid rectangular plan evidenced by the introduction of curves and deflections, even where there is no obvious reason for them. A long sweeping curve may be a pleasing feature of a street plan on level ground; diagonal streets to afford direct access from one part of the tract to another are always desirable; but a series of sharp curves and frequent abrupt changes of direction are as inappropriate for a level site as are straight lines regardless of natural contours for a rugged site.

The sites for public and semi-public buildings should receive consideration in the first topographic survey. Such buildings should not only be placed where they can be seen from the streets approaching them, but, wherever possible, they should be placed at grade summits.

There may be some precipitous hill-sides or deep ravines in the area to be platted and, while these are of little value for other purposes, they will make admirable parks. They should be located in the topographic survey and the main roads should be so fixed as to afford easy access to them when they become public pleasure grounds. The general plan should be adapted to the topography. Attempts to create on a level plain a city having the picturesque features of a hillside town will result in failure, while to lay out on a rugged site a plan suited to a level or gently sloping tract will not only involve needless expense, but will sacrifice opportunities for charming effects and produce a result which is palpably commonplace.

#### Street Details.

While the general plan for the streets and roads of a city and its environs may have been well thought out, while the streets may be of generous width and of good alignment, and may have been skillfully located with respect to the topography, their traffic capacity may be less than it might be, owing to improper proportion of roadways and sidewalks. The roadway pavements

may be unsuited to the character of the traffic or to the grades. Injudicious tree planting or the entire absence of planting may make them bare and unattractive. Lamp posts and street signs may be conspicuously ugly, and inadequate lighting at night may render the streets gloomy, if not dangerous. There are many details of street arrangement and design which are worthy of the most careful study, and even when these details have been carefully worked out for one street, or even for streets of different classes and widths, a standard cannot safely be adopted for every street of the same class and width.

While the great number of our underground structures may be one of the contributing causes of the constant disturbance of street pavements in American cities, and the condition of disrepair which is so frequently found, it is not the only reason. It will be difficult to find two cities where the street pavements are in better general condition than in Liverpool or Berlin, the former conspicuous for its excellent stone-block, and the latter for its good asphalt pavements; yet neither of these cities has built pipe subways, and the reason for the admirable condition of their streets is probably due to efficient administration and also to definite regulations covering the precise location of pipes and other structures of different classes beneath the roadways and sidewalks, avoiding thereby the exploration beneath the surface for the purpose of finding what is wanted, when repairs are necessary.

## CONCRETE AND STREETS.\*

By H. S. V. Seoyoe.

The use of concrete as a paving material is fast passing the experimental stage. Although it is doubtful if there is as yet sufficient information at hand to permit of a close approximation as to the life of concrete pavements under varying conditions of traffic, soil and climate there are particular cases of record showing the economy of this type of pavements after periods of actual use ranging from five years to ten years.

There are at least a few streets today in good condition after twenty years of service which would seem to show that if there were failures in the earlier work they could likely be traced to the same causes that will produce failures now. It is a fact, however, that there was more reason for attempting mixtures weak in cement than for a barrel of cement cost from three to four times as much as now. In addition the remarkable increase in motor traffic during the last ten years has made it much more difficult to maintain those types of paving in which the various separate units are not held together by a positive binder as is the case with concrete. It has also greatly increased the life of concrete or similar surfaces because of the decrease in wear from rubber-tired vehicles as compared with that from horse-drawn, steel-tired traffic.

It is claimed that there must be some merit in a paving material the

total yardage of which in Canada and the United States increased in 1913 from 9,000,000 square yards to 18,000,000 square yards and of which 16,000,000 square yards were laid during 1913, it ought to be worth while to note some of the facts that have been established by experience more particularly during the last five years.

### Sub-Grade.

The fundamentals in road-building hold good for concrete just as for other types. A system of drainage must be provided which will keep the water level well below the sub-grade. This is especially true where frost has to be contended with. Where the natural soil is heavy clay or other material that is not self-draining there are certain advantages in placing the concrete upon several inches of gravel or other pervious material. If surface water does get beneath the concrete it then has a better opportunity to get away. In addition especially in hot dry climates there will be no trouble from cracks developing in the concrete slab due to the drying out and cracking of the sub-base material. This may occur when the concrete is laid directly on the natural soil. The sub-grade should be constructed with the idea of having it evenly compacted to the full width of the road section. This means special care where the concrete is replacing a highly crowned macadam road which was likely as not of as great a width as the new road will be.

### Materials.

There is some difference of opinion as to whether it is the mortar composed of the fine aggregate and cement or whether it is the coarse gravel or broken stone that have to resist the wear on the road surface. With ideal materials both fine and coarse aggregates should be tough and uniformly tough, for it seems almost axiomatic that if construction is properly carried out the life of the pavement will depend directly upon the quantity and character of the traffic and the wear-resisting qualities of the aggregates. Materials that show uniform wear are certainly to be preferred over those containing some very tough and some very soft particles.

### Proportioning.

While the proportions may be varied slightly according to the nature of the aggregates used in most of the work now being undertaken a mixture of about one part of cement to one and one-half parts of fine aggregate to three parts of coarse aggregate is specified. It seems strange that in road work there have been so few attempts made to get away from wheel barrow or bottomless box proportioning. It is one part of the work in which less progress has been made than in most of the others. There have been some exceptions notably one road in Oregon where the proportioning was done by bins at a central plant and three charges to the drum of the mixer carried in each car of the Industrial Railway train that was used to convey the material to the road.

### Mixing.

There has been wide variation in practice as to the time and speed required for mixing but a new recordized that the number of revolutions

per minute of the drum may vary with the type of mixture, the size of the drum and the nature of the mixture. For satisfactory results it is usually necessary to keep the batch in the drum for at least one minute. It is very desirable that a uniform mixture be secured. The concrete should be of such a consistency that it will stand without flowing when deposited. It should not be sloppy, but it should be wet enough to settle in place with the tamping that it receives from the strike-board.

### Reinforcing.

No concrete road or street will be injured by the addition of reinforcing. It is almost certain, however, that all cracks of such a width as to be visible to the eye will not be prevented by the addition of the weight of reinforcing usually specified for concrete roadways.

Where subsoil conditions are bad, due either to the nature of the material or to the openings that may have been made for pipe lines there is value in reinforcing. Where the appearance of a road or street is of major importance reinforcing should be used. It is a question, however, if it has as yet been shown that reinforcing is economically justified for the usual widths of country roads where an occasional crack cannot be considered a serious fault.

### Maintenance.

It has been said that the justification for the use of concrete lies in the low maintenance costs. With proper materials and workmanship the annual charge for repairs to the concrete surface should be small. There may be some surface pitting—there may be some cracks requiring attention; there likely will be some joints to be taken care of; on country roads there certainly will be shoulders to maintain and ditches to keep open.

### Costs.

Naturally the cost of the roadway proper will depend upon the cost of the cement, fine aggregate and coarse aggregate on the road and the labor cost for combining them properly and placing them on the road. The material costs will vary greatly with the distances they must be hauled. The labor costs will depend to some extent upon the organization. In rare instances where conditions are particularly favorable, the cost per square yard may be as low as one dollar. Usually the cost should be below one and one-half dollars.

\*Canadian Municipal Journal, October, 1915.

## SANTA CRUZ TRUSTEES AND ENGINEER DISCUSS NEW STREET WORK.

An ordinance regulating the measurement of grades in the city has been introduced by Commissioner Morrissey and adopted.

City Engineer W. J. Thompson reports in reference to River street side walk work. He says this street is not of uniform width. The matter has been referred to the city attorney and city engineer.

The city engineer reports progress on the ordinance of the new pavement for new pavements.

# Technical Societies.

## SAN FRANCISCO ASSOCIATION OF MEMBERS OF THE AMERICAN SOCIETY OF CIVIL ENGINEERS.

### Officers for 1916.

President—H. L. Haehl.  
Vice-Presidents—Jerome Newman, M. C. Couchot.  
Secretary—E. T. Thurston.  
Treasurer—P. E. Harroun.  
Board of Directors—M. C. Couchot, H. L. Haehl, A. M. Hunt, P. E. Harroun, E. T. Thurston, C. H. Snyder.

Weekly luncheons in College Room, Hoffman Cafe, Wednesdays at 12:30. Engineers welcome; informal; no program.

Regular meetings are held bi-monthly at such time and place as may be appointed by the board of directors. The established custom is to meet on the third Fridays of February, April, June, August, October and December.

Address: E. T. Thurston, Secretary, 815 Mechanics' Institute Bldg., 55 Post street, San Francisco.

### PROCEEDINGS OF THE SIXTY-FOURTH REGULAR MEETING.

The sixty-fourth regular (eleventh annual) meeting of the Association was held at the Palace Hotel with Vice-President Couchot in the chair and forty-nine members and guests present.

#### Business.

A communication from Mr. Duryea, suggesting that the evening of meetings be changed to some more convenient one than Friday, on motion, duly made and seconded, was referred to the Board of Directors to provide letter ballot.

A communication from Jerome Newman, suggesting that an effort be made to ascertain the views of the Association as to the extent to which it is justifiable for one engineer to use the plans and specifications of another without permission and without giving credit to the latter, was read, and after a brief discussion by Messrs. Newman, Marx, Brunnier, Rhodin and Duryea, was, on motion of Mr. Rhodin, seconded by Mr. Duryea, ordered that a committee of five be appointed to define principles of ethics in engineering practice and report at a subsequent meeting.

#### Reports of Officers.

The Secretary read his annual report showing average attendance for the year of 66, accession of 19 members, a loss of 6 and a present membership of 197.

The Treasurer read a report showing the Association in a flourishing condition despite the heavy expenditures for entertainment in connection with the Annual Convention of the Society.

These reports in full will appear in the Constitution and List of Members for 1916.

#### General Business.

The Secretary called special attention to the prize competition open to Junior members through the generosity of Mr. Henry A. Schulze, until May 15th, 1916, and urged the older members to use their influence on the

Juniors to secure submission of suitable papers.

The chair appointed Messrs. Dillman, Meredith and O'Shaughnessy the entertainment committee for the February meeting.

Mr. Kriegsmann asked for the results of the postal card inquiry instituted by the Board of Directors in regard to the formation of a class in public speaking under the auspices of the Association. The Secretary reported that in response to 175 inquiries sent, 70 replies had been received, 19 of which were opposed to the plan, 25 approved the plan but would not join a class, 26 approved and would join a class under suitable conditions, 6 of whom reside and work on the eastern side of the bay, 11 reside on the eastern side of the bay and work in San Francisco and 9 reside and work in San Francisco.

In response to a request for definite support from the Association the Chair advised that the Board of Directors considered it outside the scope of the Association to assume responsibility in such a matter, but that any group of members could proceed with it and would receive all the assistance the Association could afford them.

In connection with a discussion by Messrs. Kriegsmann, Haehl and Marx, a motion made by the first mentioned that the Association appoint a committee to organize a class was lost.

#### Election of Officers

The election of officers for the ensuing year resulted as follows:

President—H. L. Haehl.

Vice-President—Jerome Newman.

#### Entertainment.

Preliminary to the presentation of the paper for the evening, the entertainment committee introduced a pleasing demonstration of the rewards of ingenuity fortified with a proper diet, a stout heart and a strong keg, by means of a moving picture display of a chapter in the adventures of Colonel Heza-Liar, Explorer, extraordinary.

#### Paper.

Mr. H. L. Haehl read the paper of the evening on "Water-Right Litigation in the Santa Clara Valley," illustrating his remarks with maps, diagrams and other statistical information displayed by means of a stereopticon.

The meeting adjourned at 10:50 p. m.

## SAN FRANCISCO CHAPTER AMERICAN INSTITUTE OF ARCHITECTS.

253 Post Street.

President—W. R. Paville.

Vice-President—Edgar A. Matthews.

Sec. Treas.—Sylvain Schnaitacher.

Trustee—Walter H. Parker.

Monthly meeting the third Thursday.

## CALIFORNIA STATE BOARD OF ARCHITECTURE.

President—Edgar Matthews.

Sec. Treas.—Sylvain Schnaitacher.

John Bakewell, Joseph C. Newson  
one vacancy.

## AMERICAN INSTITUTE ELEC. ENGINEERS—Los Angeles Section.

Chairman—Ewd. Woodhury.  
Secretary—R. H. Manahan, care City Hall, Los Angeles.

Asst. Sec.—Carl Johnson.  
Executive Committee—B. F. Scattergood, Ralph Cunningham, R. E. Morehead, C. G. Pyle.

Regular meetings third Tuesday in each month. Address all communications to R. H. Manahan, care City Hall, Los Angeles.

## INLAND WATERWAYS ASSOCIATION OF CALIFORNIA.

### Officers.

President—Isidor Jacobs, San Francisco.

Vice-Presidents—M. E. Dittmar, Redding; W. H. Booth, Los Angeles; Mrs. E. G. Greene, Stanford University; John Fairweather, Fresno.

Treasurer—J. L. Craig, Stockton.

Executive Secretary—David H. Walker, San Francisco.

Secretary—Craigie Sharp, Oakland.

San Francisco, Nov. 27, 1915.

At a meeting of the executive committee of the Inland Waterways Association of California, it was decided to hold the third annual convention at the Palace Hotel in San Francisco, February 21st, 22nd and 23rd, 1916. There will be over 1,000 delegates in attendance. Mr. Isidor Jacobs, president of the association, has just returned from Oregon and Washington, and arrangements will shortly be completed so that a general conference can be held of delegates from all the Pacific Coast States at the same time as the annual convention, for the purpose of bringing about united action in reference to the work to be prosecuted for the development of Inland Waterways on the Pacific Coast.

The annual convention will consider a proposition to bring about the creation of one State commission to deal with all subjects relating to the water problems of California, including navigation, reclamation, flood control, flood storage, irrigation and kindred subjects. This would necessarily result in the abolishment of the many commissions that are dealing with the subject, and would prevent duplication of work and minimize the expense. The annual convention will also consider the Newlands-Broussard Bill. This bill now pending before the United States Congress, in principle, has the support of the administration. It has for its purpose the bringing about of active co-operation between the Federal and State Governments for a unified system of Inland Waterways improvements.

It is expected the convention in February will be one of the most important that has ever taken place in this State, as representative men from all over the country will be present.

CLARENCE E. TODD,

Secretary pro tem.

## APARTMENT HOUSES

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$8,000. Architect, none. Owner, Alfred T. Morris, 501 11th avenue, S. F. Location, southeast corner of 11th avenue and Anza street. Will contain five suites of two and three rooms. Bath and wall beds. Interior finish pine with some elm panels and hardwood floors. Central heating system and hot water supply. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

## BANKS

**SACRAMENTO, CAL.**—Bank fixtures, etc. Cost not stated. Architect, E. C. Sillon, 1203 J street. Sacramento. Owners, Sacramento Valley Bank and Trust Co. The Sacramento Valley Bank and Trust Co. will occupy the entire ground floor and basement of the new four-story building now under construction at the corner of 8th and J streets. The architect is calling for bids on the special bank fixtures, marble and tile work, electric work, lighting fixtures, plain and ornamental plastering, glass and vault work. J. Harry Wygant, 2110 X street, Sacramento, has the general contract for the building, which is now up to the roof.

## BONDS

**MARTINEZ, CONTRA COSTA CO., CAL.**—With but eighteen votes lacking the proposition to bond the Mount Diablo Boulevard District for \$50,000 to build a boulevard from Bryant station through Moraga Valley to Alamo, thence to Mt. Diablo and on through the Tassajara and Sycamore Valleys to the Alameda County line, was defeated last week. It is said another election will be called.

**SAN LEANDRO, ALAMEDA CO., CAL.**—E. H. Rollins Co. has purchased the \$100,000 school district bonds voted in San Leandro a short time ago. Now that the bonds have been sold plans for the school improvements to be made will be ordered prepared.

**SAN BERNARDINO, SAN BERNARDINO CO., CAL.**—The County Supervisors will invite the State Highway Commission and its engineers to visit their county early in January and go over the proposed route to be paved to Barsow. The last legislature ordered that a bond issue be submitted to the people, to carry out and complete the system of good roads. The distance to be constructed under the proposed bond issue is 55 miles.

**OAKDALE, STANISLAUS CO., CAL.**—O. J. Muscio has leased 80 acres of land and will soon start the erection of a big dam. Other improvements are also planned.

**HOLLYWOOD, LOS ANGELES CO., CAL.**—The board of public service commissioners, at a recent meeting, fa-

vored the scheme whereby a water district should be formed in Hollywood and a bond issue for \$1,020,000 authorized to cover the purchase price and to make extensions of the Union Hollywood Water Company's system. The board ordered that a letter should be sent to the residents of the district affected, asking them to vote in favor of the project. Voting will take place on January 18, 1916.

**WOODLAND, YOLO CO., CAL.**—The City Council has decided to call at an early date an election to vote upon issuing bonds of \$45,000 for the improvement of the municipal water system and \$5,000 for the construction of a municipal ice plant.

The \$15,000 bond issue for improvement of the water system will provide for the installation of a ten-inch high pressure pump operated by a 150-horsepower motor, a 120,000-gallon water tower 100 feet high and the laying of additional mains.

City Engineer C. E. Arnold submitted an estimate placing the cost of the proposed ice plant at \$5,000.

**LOVELOCK, NEVADA**—A special election has been ordered here for January 15th to vote on a proposal to bond the town of Lovelock for \$75,000 to bring water here from the Sacramento and Wright Canyons.

It is planned to impound the flood waters and spring floods and convey them along the foothills to a point six miles from Lovelock, where they will be stored.

From the reservoirs the water will be piped to the city. It is believed this plan will give a good supply of pure water, besides furnishing a strong gravity pressure for the lighting purposes.

**SACRAMENTO, CAL.**—The Sacramento County supervisors have adopted a resolution calling for an election on January 25th, to form a Wright irrigation district in the Carmichael colonies.

**POCATELLO, IDAHO**—Bonds in the sum of \$100,000 have been sold. The city will now purchase a private system or duplicate the present one.

**SACRAMENTO, CAL.**—Chas. Silver, whose slaughter house was destroyed by fire a few weeks ago, has decided to erect a new \$60,000 building on the old site. Plans for the building are now under way.

**SANTA MONICA, L. S. ANGELES CO., CAL.**—By a margin of thirty votes the electors of Santa Monica refused to bond themselves for \$4,000 for the purpose of buying out the three water companies and organizing a municipal water system in that district. It is possible that a recount of the votes will be asked by the supporters of the issue.

**SACRAMENTO, CAL.**—The Advisory Board of the State Department of Engineering has provided for the sale of \$1,000,000 worth of State highway bonds. These bonds are the last of the remaining \$18,000,000 bond issue. The

### BRIDGES, DAMS AND HARBOR WORK

**LOS ANGELES, CAL.**—Bridges, pile trestle. Cost not stated. Engineer, County Surveyor, Los Angeles. Owners, Los Angeles County. Bids will be received by the Board of Supervisors up to 2 p. m. of Monday, January 3rd, for the construction of a pile trestle bridge on Mountain avenue, between School street and Burr avenue, and for a similar bridge on Palm avenue between Michigan avenue and Cross street. They will each consist of a single 19-foot span and will have 20-foot roadways.

### CHURCHES

**SAN FRANCISCO**—Church alterations, frame, \$5,000. Architects, Ward & Blohme, Alaska Commercial Bldg., S. F. Owners, St. John's Evangelical German Lutheran Church. Location, Howard and 21st streets. The work will consist of rearranging the upper floor for Sunday school rooms and the lower floor for class rooms, and will necessitate interior partitions, plastering, painting, plumbing, electric work and carpentry work. Plans are complete and figures are being taken.

### FACTORIES AND WAREHOUSES

**SEATTLE, WAS.**—Storage equipment. Cost as follows. Engineer, Port of Seattle Commission, Bell street dock, Seattle. Owners, City of Seattle. Bids opened by the Port of Seattle Commission for the installation of equipment in the apple storage warehouse, for which Harrington & Peters, Oriental Bldg., Seattle, are general contractors, resulted as follows: Andrew MacLean, \$142,740; York Mfg. Co., \$171,100; Vilter Mfg. Co., \$126,500; Harrington & Peters, \$117,500. All bids taken under advisement.

**SAN FRANCISCO**—Packing house, 1 story and base, reinforced concrete, \$20,000. Architect, Smith O'Brien, Humboldt Bank Bldg., S. F. Owners, Workman Packing Co. Location, west Seventh street south of Garrison. Construction hip-roof. Interior finish pine except in the offices which will be finished in hardwood. Concrete

floors. Special machinery. Steam heat and hot water system. Metal window sash and frames. Exterior faced with cement plaster. Plans complete and segregated figures being taken.

**PITTSBURG, CONTRA COSTA CO., CAL.**—Packing plant addition, 1 story, reinforced concrete. Cost not stated. Architect, A. W. Cornelius, Merchants' National Bank Bldg., S. F. Owners, American Fish and Oyster Co. Addition will consist of cold storage room and packing space. Interior finish rough. Concrete floor and metal window sash and frames. Exterior faced with cement plaster. Plans being prepared.

**SAN FRANCISCO**—Automobile assembling plant, 5 story and base, reinforced concrete, \$200,000. Architect's name not given. Owners, Ford Motor Car Co. Location 21st and Treat avenue. Preliminary plans have been received in this city for the new Ford addition. A contract covering the entire work will be let. Complete information can be secured from Mr. Lund at the company's plant.

### Contracts Awarded.

**CROCKETT, CONTRA COSTA CO., CAL.**—Warehouse, 2 story and base, reinforced concrete, \$116,000. Architect's name not given. Owners, California-Hawaii Sugar Co. Contractors, Clinton Construction Co., Mutual Bank Bldg., S. F. Contract price, \$116,000. Note: Subcontracts are now being let for the work.

### FIRE HOUSES AND JAILS

**BAKERSFIELD, KERN CO., CAL.**—Jail counter, etc. Cost not stated. Architect, Orville L. Clark, Brower Bldg., Bakersfield. Owners, Kern County. Bids will be opened on January 3rd for furnishing a steel counter complete with box and roller drawers. Plans can be secured from the County Clerk.

### FLATS

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$3,500. Architect, William J. Anderson, 392 5th street, S. F. Owner, Morris Farber, 140 Russ street, S. F. Location, west Harriet north of Folsom. Will contain two flats of five and six rooms. Interior finish pine and redwood. Some hardwood floors. Open fire places and tile or brick mantels. Automatic water heaters. Exterior covered with rustic, shiplap and brick veneer. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Flats, 2, 3 story and base, frame, \$4,600 each. Architect, none. Owner, John T. Quigley, 528 Masonic avenue, S. F. Location, southwest Moss and Folsom, covering an area of 23 by 69 feet each. Will contain three flats with baths. Interiors finished in pine and redwood with some elm panels and hardwood floors. Open fire places and tile or brick mantels. Automatic water heaters. Exterior covered with rustic, shiplap and cement plaster. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$4,000. Architects, Koenig & Christiansen, Humboldt Bank Bldg., S. F. Owner, H. C. Christiansen. Location, north Cabrillo west of 7th avenue, covering an area of 25 by 55 feet. Will contain two modern flats of five

and six rooms. Interiors finished in pine, elm panels and white enamel. Hardwood floors. Bath rooms finished in tile. Automatic water heaters. Basement garage. Exterior covered with cement plaster on metal lath. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$4,500. Architect, E. G. Bolles, 660 Market street, S. F. Owners, S. A. Born Building Co., 660 Market street, S. F. Location, north Carl west of Stanyan. Will contain two flats of five and six rooms. Interiors finished in pine and elm panels with some hardwood floors. Open fire places and tile or brick mantels. Tile baths. Automatic water heaters. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$3,000. Architect, none. Owner, A. M. Sylvia, 371 30th avenue, S. F. Location, east 19th avenue north of Clement. Will contain two flats of five rooms each with baths. Interior finish pine and redwood. Some hardwood floors. Open fire places and tile mantels. Automatic water heaters. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**SACRAMENTO, CAL.**—Flats, 1 story and base, frame, \$2,500. Architect, none. Owner, Max Smith, Fairmount Hotel, Sacramento. Location, 506 U street. Will contain two flats of four rooms each. Interior finish pine and redwood. Some hardwood floors. Open fire places and tile mantels. Automatic water heaters. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

### GARAGES

**SACRAMENTO, CAL.**—Garage, 1 story, hollow tile construction, \$5,000. Architect, none. Owner, Mrs. Edith Rickerby. Location, 224 K street. Has been designed for a commercial garage and will have concrete floor, metal window sash and frames and special underground storage tank. Exterior faced with cement plaster. Plans complete and work to be done by Day Labor.

### GOVERNMENT WORK & SUPPLIES

#### New Mexico-Texas, Reclamation.

Under authority from the Secretary of the Interior the Reclamation Service has awarded the following contracts in connection with the Rio Grande irrigation project, New Mexico-Texas:

To Tochey & Johnson, of Phoenix, Ariz., for the excavation of approximately 162,000 cu yds of earth for the Leashurg Canal and the Picache Branch Canal in the vicinity of Hill, N. Mex., contract price, \$23,008.

To H. E. Williams, of El Paso, Tex., for earthwork on the San Elizario feed canal, near Ysleta, Tex., amounting to about \$2,149.50.

To John Mulligan, El Paso, Tex., earthwork on the San Elizario feed canal, amounting to about \$2,838.

#### Fort Stanton, N. Mex., Sanatorium.

The contract for furnishing lumber for repairs to the Fort Stanton Sana-

torium has been awarded to Barton-lange Co. at \$140.57.

**San Diego, Cal., Painting.**

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for painting plastering in the U. S. public building at San Diego, Cal.:

Fairfax Bros., Geneva, N. Y., \$1,484.50.

Jarvis & Co., St. Louis, Mo., \$1,791.  
Graham Contracting Co., Philadelphia, Pa., \$2,069.

Mays Decorating Co., San Diego, Cal., \$2,375.

J. P. Sullivan, Chicago, Ill., \$2,584.  
W. C. Redlich, New York City, \$2,280.  
Albert Theriault, Brooklyn, N. Y., \$4,824.

**Denver, Colo., Steel Furniture.**

The contract for installing steel furniture in the U. S. post office at Denver, Colo., has been awarded to Art Metal Construction Co., Jamestown, N. Y., at \$1,312.75.

**Idaho Falls, Idaho, Post Office.**

In the construction of the U. S. post office at Idaho Falls, Idaho, for which the Sound Construction and Engineering Co., Portland, Ore., has the contract, cabinet and tablet manufactured by the Agutter-Griswold Electric and Mfg. Co. will be used.

**Pearl Harbor, Building.**

The bid of J. L. Young, of Honolulu, H. T., \$26,100 in amount, has been accepted for reinforced concrete power house and operating building and one wooden double barrack building at Pearl Harbor, H. T.

**Contracts Awarded.**

**SAN FRANCISCO**—Hospital ward addition, 2 story, reinforced concrete. Cost as follows. Architect, Constructing Quartermaster's office, Fort Mason. Owners, United States Government. Contractors, Frank M. Garden & Co., 251 Kearny street, S. F., general construction, \$12,913; Burnham Plumbing Co., 1220 Webster street, S. F., plumbing, \$2,678; Collman & Collman Co., Sharon Bldg., S. F., heating, \$900; Collman & Collman Co., wiring, \$500; Turner Co., 272 Natoma street, fixtures, \$218. This work is for addition B to the Nurses' Dormitory at the Letterman General Hospital at the Presidio.

**BENICIA, SOLANO CO., CAL.**—Water mains, hydrants, etc., \$8,374. Engineer, War Department, Washington, D. C. Owners, United States Government. Contractors, Pringle, Dunn & Co., 338 Pine street, S. F. Contract price, \$8,374.

**HALLS AND SOCIETY BUILDINGS**

**RICHMOND, CONTRA COSTA CO., CAL.**—City Hall, 2 story and base, reinforced concrete, \$50,000. Architects, James T. Nabett, associate with J. B. Oghorn, Richmond. Owners, City of Richmond. From bids opened late Saturday night in Richmond for the construction of the new City Hall, it was learned that Mathew Morton, of Richmond, and Williams Bros. & Henderson, Holbrook Bldg., S. F., were the two lowest bidders. Both bids were taken under advisement. Morton's bid is said to be about \$1,400 higher than

Williams Bros. & Henderson. The approximate figure is \$28,000. There is \$25,000 in the fund to build this first unit and changes will be made in the plans in order to bring the cost of the building within this figure.

**HOSPITALS**

**OAKLAND, CAL.**—Day hall and dormitories, 2 story and base, brick and concrete. Cost not stated. Architect, Charles Peter Weeks, Mutual Bank Bldg., S. F. Owners, Alameda County. Bids opened for this work show Larsen-Sampson Co., S. F., low on the general construction at approximately \$75,000. Bids have been taken under advisement. A complete list of the figures will be found under the heading of Oakland and Alameda County in this issue.

**Contracts Awarded.**

**SAN FRANCISCO**—Hospital excavating and foundation work, \$16,237. Architect, Hermann Barth, 12 Geary street, S. F. Owners, City and County of San Francisco. Contractor, O. Monson, 1901 Bryant street, S. F. Contract price, \$16,237.

**HOTELS**

**MONTEREY, MONTEREY CO., CAL.**—Hotel alteration, \$30,000. Decorator, Mrs. Edgar de Wolfe, 1801 Van Ness avenue, S. F. Owners, Del Monte Hotel Co. The work will consist of complete rearrangement of the main floor and a large number of the bed rooms. New trim, hardwood floors, painting, plastering and electric work.

**IRRIGATION PROJECTS**

**SACRAMENTO, CAL.**—Levee construction. Cost not stated. Engineers, State Reclamation Board, Sacramento. Owners, West Side Levee District et al. At a recent meeting of the State Reclamation Board, plans of the West Side Levee District for levee construction from Colusa down to Knights Landing were approved, with the reservation that the Sacramento and San Joaquin Drainage District would not be called on hereafter to compensate the West Side District for any levee construction in excess of the plans called for by the flood control project. The Board also named as Assessors for the district Fred H. Harvey, Geo. B. Greene and Ben. E. Rush. The application of District No. 555 for approval of its plans for a drainage ditch was granted. Application of the American Farms Co. for small levees on the Northern Electric Railway embankment near Shippe Station, Butte County, were approved as being outside of Sacramento and San Joaquin Drainage District and not detrimental to the flood control project.

**OAKDALE, STANISLAUS CO., CAL.**—Irrigation work, \$80,000. Engineer, Burton Smith, Oakdale. Owners, Oakdale Irrigation District. Plans have been approved and bids are now being taken by the Oakdale Irrigation District for the extension of several laterals, installation of concrete gates, drops, etc. Bids on the work close January 17th. Further information may be had from Engineer Burton Smith.

**Contracts Awarded**

**MERIDIAN, SUTTER CO., CAL.**—Irrigation weir. Cost not stated. Engineer's name not given. Owners, Irrigation District No. 70. The Missouri Valley Bridge and Iron Co. has been awarded a contract by District 70 to drive piling in the Gardner bend in the river and in the Garmire bend on the slough. Several years ago a weir was put in at a cost of \$85,000 at the slough bend, but the first high water washed everything away. Work will begin immediately.

**POST OFFICES**

**ELLENBURGH, WASH.** Post office, 1 story and base, brick and stone. Cost not stated. Architect, Supervising Architect, Washington, D. C. Owners, United States Government. Plans have been forwarded to the west for the construction of the new Federal building. Bids will be taken for the entire work, including the heating, ventilating and electric work and fixtures. Plans can be secured from either the Supervising Architect, Washington, D. C., or from the custodian of the site at Ellenburgh. Bids will be opened on January 27th. An official proposal appears in another column of this issue.

**RAILROAD CONSTRUCTION AND EQUIPMENT**

**RIVERSIDE, RIVERSIDE CO., CAL.**—Passenger depot, 1 story, reinforced concrete, \$60,000. Engineer, Engineering Dept., Ketchoff Bldg., 1. A. Owens, Santa Fe Railroad Co. The Santa Fe Railway is planning the construction of a depot on property bounded by 7th, 8th, Santa Fe and Salt Lake rights of way, one half of which the City Council have voted to purchase. The ground will be improved by the city for a public park.

### Contracts Awarded.

CORVILLE, LUTHER C., CAL.—Passenger depot, frame and concrete. Cost not stated. Architect's name not given. Owners, Northern Electric Co. Contractor, S. T. Cobb, Thermalito. Contract price not stated.

### RESIDENCES

SAN FRANCISCO—Residences, 2, 2 story and base, frame, \$3,000 each. Architects, Keenig & Christiansen, Humboldt Bank Bldg., S. F. Owner, Margaret Keenig. Location, north Cabrillo west of 12th avenue. Each dwelling will contain seven rooms, bath and basement garage. Interiors finished in pine, hardwood and white enamel. Hardwood floors. Open fire places and tile or brick mantels. Tile bath rooms. Automatic water heaters. Exteriors covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, J. M. Peters, 1010 Fallon avenue, S. F. Location, west 11th avenue south of Anza. Will contain seven rooms, bath and basement garage. Interior finish pine and white enamel. Hardwood floors. Open fire place and tile mantel. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

SAN FRANCISCO—Residence, 3 story and base, frame, \$30,000. Architect, Willis Polk, Hobart Bldg., S. F. Owner, Mrs. Andrew Welch. Location, north Broadway west of Broderick. Will contain 16 rooms, several baths, conservatory and sleeping porches. Interior finish pine and hardwood with white enamel in the bed rooms. Hardwood floors throughout. Central heating system, probably steam heat, hot water circulating system and vacuum cleaning. Bath rooms tile. Open fire places and tile or brick mantels. Exterior faced with cement plaster and brick veneer. Plans complete and figures to be called for shortly.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,000. Architect, none. Owner, N. J. Nelson, 547 Elizabeth street, S. F. Location, south 15th west of Belvedere. Will contain five rooms and bath. Interior finish pine and redwood. Some hardwood floors. Open fire place and tile mantel. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

SAN FRANCISCO—Residences, 2, 2 story and base, frame, \$5,000. Architect, D. C. Coleman, Merchants' National Bank Bldg., S. F. Owners, Brown Construction Co. Location, Forest Hill. Each house will contain eight rooms, bath, sleeping porch and basement garage. Interior finish pine, hardwood and white enamel. Hardwood floors. Furnace heat and open fire places. Mantels tile and brick. Bath rooms tile. Automatic water heaters. Exteriors covered with cement plaster. Plans complete and work to be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$4,500. Architect, H. H. Gutterston, 50 Post Street, S. F. Owners, Mason McDuffie Co., Shattuck and Addison

streets, Berkeley. Location, Oak Knoll Terrace. Will contain eight rooms, two baths and sleeping porch. Interior finish pine, hardwood veneer and white enamel. Hardwood floors. Furnace heat and open fire places. Mantels tile and brick. Automatic water heater. Bath room tile. Exterior covered with cement plaster. Plans complete and work by Day Labor.

OAKLAND, CAL.—Residence, 1½ story and base, frame, \$2,500. Architect, none. Owner, John A. Bischoff, 6645 Harwood avenue, Oakland. Location, Shattuck avenue east of College. Will contain six rooms, bath and sleeping porch. Interior finish pine and white enamel. Hardwood floors. Open fire place and tile or brick mantel. Tile bath room. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

OAKLAND, CAL.—Residence, 1 story and base, frame, \$2,000. Architect, none. Owner, R. C. Hillen, 430 Haight avenue, Oakland. Location, Mantana east of Curran. Will contain six rooms, bath and sleeping porch. Interior finish pine and white enamel. Hardwood floors. Open fire place and tile or brick mantel. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work by Day Labor.

HERCULES, CONTRA COSTA CO., CAL.—Residences, 3, 1 story and base, frame, \$7,500. Architect, James T. Nabrett, 704 Macdonald avenue, Richmond. Owners, Hercules Powder Co. These dwellings have been designed as double hungahows and each will contain five or six rooms. Interiors finished in pine and white enamel. Some hardwood floors. Open fire places and tile or brick mantels. Automatic water heaters. Exteriors covered with rustic and shingles. Plans complete and figures under advisement.

FRESNO, FRESNO CO., CAL.—Residence, 1 story and base, frame, \$1,500. Architect, none. Owner, C. A. Clark, Fresno. Location, Orchard Hill Addition. Will contain five rooms, bath and sleeping porch. Interior finish pine and redwood. Some hardwood floors. Open fire place and tile mantel. Automatic water heater. Exterior covered with rustic and shingles. Plans complete and work to be done by Day Labor.

SACRAMENTO, CAL.—Residence, 1 story and base, frame, \$1,500. Architect, none. Owner, William Jacinto, 319 W street, Sacramento. Location, 319 W street. Will contain five rooms and bath. Interior finish pine and redwood. Some hardwood floors. Open fire place and tile mantel. Exterior rustic and shingles. Plans complete and work by Day Labor.

SAN FRANCISCO—Residences, 2, 2 story and base, \$5,000 each. Architect, none. Owner, C. J. Keenan, 26 Broderick, S. F. Location, west Scott south of Green and southwest Scott and Green. Will contain seven rooms, bath and sleeping porch. Interiors will be finished in pine, elm and white enamel. Hardwood floors. Furnace heat and open fire places. Mantels tile and brick. Automatic water heaters. Bath rooms tile. Exteriors covered with rustic and cement plaster. Plans complete and work by Day Labor.

SAN FRANCISCO—Residences, 2, 2 story and base, frame, \$5,000. Architect, none. Owners, Johnson and Johnson, 818 14th avenue, S. F. Location, east 22nd avenue north of Clement. Each will contain six rooms and bath. Interiors finished in pine and white enamel. Hardwood floors. Open fire places and tile or brick mantels. Automatic water heaters. Exteriors covered with cement plaster. Plans complete and work to be done by Day Labor.

OAKLAND, CAL.—Residences, 5, 1 story and base, frame, \$2,000 each. Architect, Frank J. Melbourne, 16 Kearny street, S. F. Owner's name withheld. Location, Eastlows. Each house will contain five rooms and bath. Interiors finished in pine, hardwood and white enamel. Hardwood floors. Open fire places. Mantels tile and brick. Automatic water heaters. Steam heat, special ventilating system and vacuum cleaning. Ornamental plaster. Patent store fronts and metal window sash and frames. Upper floors arranged for offices, finished in pine and hardwood. Exterior faced with pressed brick and terra cotta. Preliminary plans being prepared.

## Prizes Awarded

The Committee on awarding the prizes to participants in the monster industrial parade held during American Builders' Week have, after mature deliberation, awarded the prizes as follows:

The prize for the largest number of participants in any one division is awarded to the General Contractors' Association of San Francisco.

The prize for the division most uniquely designed is awarded to the San Francisco Planing Mill Owners' Association.

The prize for the largest section of uniformly decorated automobiles is awarded to the Master Plasterers' Association of San Francisco.

The prize for the largest section of participants outside of San Francisco is awarded to the General Contractors' Association of Oakland.

The prize for the largest participation of Ladies' Auxiliaries is awarded to the Ladies' Auxiliary to the Master Plasterers' Association of San Francisco.

The prize for the most unique and imposing float is awarded to the Sacramento Builders' Exchange for their magnificent float portraying the Sacramento sky line.

The prize for the float most indicative of progress in the Building Trades is awarded to the Master Plumbers' Association of San Francisco.

The prize for the individual or firm entering the largest number of floats is awarded to the J. H. Kruse Lumber Company.

The prize to the handsomest Aide in the Grand Marshall's Cavalcade is awarded to Wm. H. George, Secretary of the Cowell Lime & Cement Co.

The prize for the biggest bunch of real noise is awarded to the Sacramento Builders' Exchange.

The prize for the most beautifully decorated automobile driven by a lady is awarded to Mrs. Edward J. Brandon.

The prize for the best special feature float is awarded to Dyer Bros. for their float representing the Tower of Jewels.

The committee found their task a difficult one and the decision has been rendered to the best of their ability. It is hoped that their opinion will be concurred in by the most of the builders and material men interested in the American Builders' Week celebration.

#### NEW LINE BETWEEN SAN FRANCISCO AND EAST INDIES.

Recent articles in Commerce Reports, published by the Government, have recorded successful efforts in behalf of neutral shipping on the Pacific, with the benefits coming partly to American commerce. The Java-Pacific Line will inaugurate a service between Batavia, Java, and San Francisco with a sailing from Batavia on December 15. Steamers will stop at various ports, including Manila and Hongkong. The new line will link Java and other islands of the rich Netherlands Indian Archipelago with San Francisco for closer trade relations, as well as supply facilities at the other ports mentioned. The service is made possible through the co-operation of three large Netherlands steamship companies which have been operating out to Java and the Orient—the Nederland Steamship Co., and the Java-China-Japan Line of Amsterdam, and the Rotterdam Lloyd, of Rotterdam.

Arrangements for the organization of the Pacific & Eastern Steamship Co. (Inc.) to operate under the American flag between China, the Philippines, and the Pacific and Atlantic coasts of the United States was mentioned in Commerce Reports for October 30, 1915. In the issues of October 22 and November 19 were reports of the formation of the China Mail Steamship Co. for traffic between San Francisco and China. This company is financed by Chinese in the United States.

#### TANKER TO BE BUILT AT SAN FRANCISCO.

NEW YORK—The Vacuum Oil Company recently placed orders for two new tank steamers and one general cargo steamer, which will fly the American flag in the concern's export service.

One tanker with a capacity of 50,000 barrels of oil, and a steamer with a capacity of 3,500 tons of cargo will be built at Wilmington, Del. The other tanker with a capacity of 75,000 barrels will be built at the Union Iron Works, San Francisco.

## OFFICIAL PROPOSALS.

### PROPOSALS FOR CANAL SUPPLIES.

**PANAMA CIRCULAR** 1935. Steel, Iron, Pig Iron, Chain, Steel Cable, Wire, Horseshoes, Toe Calks, Short Tin, Track Frogs, Steel and Iron Castings, Manganese Steel Dipper, Laps, Track Shoes, Cast Iron, Cast Steel, Cast Iron Cable, Chaps, Turnbuckles, Stovepipe, Habbit Metal, Bronze, Brass, Copper, Copper Tubing, Brass Tubing, Pig Lead, Sheet Lead, Lead Washers, Lead Pipe, Sheet Zinc, Shovels, Taps, Pipe Fittings, Oil Lamps, Hinges, Valves, Sanitary Fixtures, Wagon Rims and Spokes, Manila Rope, Leather, Gray-iron, Silica Sand, Fire Clay, Foundry Clay, Silica Grit, Calcium Chloride, Ash, Silica, Graph, Alumina, Sulfate, White Lead, White Zinc, White Lead, White Zinc's foot Oil, Turpentine Substitute, Fish Oil Paints and Lumber. Sealed proposals will be received at the official purchasing officer, U. S. General Post Office, Washington, D. C., until 10:30 a. m. January 1, 1916, at which time they will be opened in public, for furnishing the above mentioned articles. Bids and general information relating to this circular No. 383 may be obtained from the nearest office of the assistant purchasing agent, Fort Mason, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal.; Portland, Ore.; San Francisco, Cal.; and from the U. S. army, general purchasing officer.

**NOTICE TO CONTRACTORS.**

**TREASURY DEPARTMENT**, Supervising Architect's Office, Washington, D. C., December 16, 1915. **SEALED PROPOSALS** will be opened in this office at **3 P. M., January 27, 1916**, for the construction complete (including mechanical equipment and approaches) of the United States Post office at Ellensburg, Wash. Drawings and specifications may be obtained from the custodian of site at Ellensburg, Wash., or at this office, in the discretion of the Supervising Architect. **JAS. A. WETMORE**, Acting Supervising Architect.

### PROPOSALS FOR CANAL SUPPLIES.

**PANAMA CANAL CIRCULAR 996** Proposals for Bronze Ladders and Runners, Structural Bronze Work, Cutting-off Machine, Lathes, Pells, Rivets, Nuts, Washers, Lag Screws, Lead Sleeves, Cable Terminals, Electric Cable, and Water Meters. The proposals will be received at the office of the general purchasing officer, the Panama Canal, Washington, D. C., until 10:30 a. m. **December 29, 1915**, at which time they will be opened in public, for furnishing the above mentioned material. For blank forms and general information relating to this circular (No. 996) may be obtained from this office or the office of the assistant purchasing agent, Fort Mason, San Francisco, Cal. also from the U. S. Engineer Office at the following cities: San Francisco, Los Angeles, San Diego, San Pedro de Macoris, and San Juan. For further information, major, corps of engineers, U. S. army, general purchasing officer.

BOYS WANTED FOR SCHOOL, FURNITURE

The Board of Education of the City of Oakland will, on December 29, 1915, convene in the room, 2170 P. O. Box, P. M., in the Lathrop Building, City Hall, receive bids for school furniture and equipment for the new school, in the City of Oakland, to be built by

me in accordance with specifications thereto, and on file in the office of Purchasing Agent, Board of Education, Elverton, Elbert, City, State of California, to which said plans and specifications reference is hereby made, and to be made on form furnished and to be duly accompanied by a certified check for 1/2 of amount of bid, check payable to L. H. Cummings, City Clerk. Work to be commenced on or before five days after execution of contract, and completed by February 1, 1916.

The right is reserved to the Board to reject any or all bids submitted.

H. W. BRIDGMAN,  
Procuring Agent of the Board of Education.

## BIG GAIN IN BUILDING OPERATIONS FOR NOVEMBER.

The showing presented by the building industry throughout the United States for the month of November is so splendidly favorable as to be almost amazing. It would look as if a tremendous wave of activity had swept over the country during the month, energizing construction work almost everywhere. Official reports received by the American Contractor, Chicago, from the principal cities of the country show that the building permits issued for the month total \$62,152,586, as compared with \$35,788,711 for November, last year. The improvement, however, while a reality, is somewhat exaggerated for the reason that the business of a year ago was specially depressed as a war reaction. The building permits for November, 1915, totaled \$11,005,514.

The size of that gain indicates strongly that the present business is above normal and no doubt includes a lot of deferred plans, the execution of which is now made possible by the ease of the money market. A careful study of the tabulation below reveals the large gains made by most of the cities, only 15 of the 72 make unfavorable comparisons.

The detailed statement follows:

NEW PAVING COMPANY FILES  
ARTICLES OF INCORPORATION.

At the end of 1990, the American Association of Payroll Firms has been added with the country's work by the Central California Payroll Company, one of the two new companies formed as a result of the division of the Worcester Payroll Firm, Inc.

This company names Moody as its permanent place of business and expects to realize a \$4 million of this amount. It has been subdivided into three divisions: Worcester, Los Angeles, and San Francisco. The company is also a member of the American Association of Payroll Firms.

# ADVANCE CONSTRUCTION NEWS.

Classified According to Location.

## SAN FRANCISCO.

**RESIDENCES**—2, 2 story and base, frame, \$3,000 each. San Francisco. Architects, Koenig & Christiansen, Humboldt Bank Bldg., S. F. Owner, Margaret Koenig. Location, north Cabrillo west of 12th avenue. Each dwelling will contain seven rooms, bath and basement garage. Interiors finished in pine, hardwood and white enamel. Hardwood floors. Open fire places and tile or brick mantels. Tile bath rooms. Automatic water heaters. Exteriors covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**RESIDENCE**—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, J. M. Peters, 1010 Balboa avenue, S. F. Location, west 16th avenue south of Anza. Will contain seven rooms, bath and basement garage. Interior finish pine and white enamel. Hardwood floors. Open fire place and tile mantel. Automatic water heater. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**RESIDENCE**—3 story and base, frame, \$20,000. San Francisco. Architect, Willis Polk, Hobart Bldg., S. F. Owner, Mrs. Andrew Welch. Location, north Broadway west of Broderick. Will contain 16 rooms, several baths, conservatory and sleeping porches. Interior finish pine and hardwood with white enamel in the bed rooms. Hardwood floors throughout. Central heating system, probably steam heat, hot water circulating system and vacuum cleaning. Bath rooms tile. Open fire places and tile or brick mantels. Exterior faced with cement plaster and brick veneer. Plans complete and figures to be called for shortly.

**RESIDENCE**—2 story and base, frame, \$2,000. San Francisco. Architect, none. Owner, N. J. Nelson, 547 Elizabeth street, S. F. Location, south 17th west of Belvedere. Will contain five rooms and bath. Interior finish pine and redwood. Some hardwood floors. Open fire place and tile mantel. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**RESIDENCES**—2, 2 story and base, frame, \$5,000. San Francisco. Architect, D. C. Coleman, Merchants' National Bank Bldg., S. F. Owners, Brown Construction Co. Location, Forest Hill. Each house will contain eight rooms, bath, sleeping porch and basement garage. Interior finish pine, hardwood and white enamel. Hardwood floors. Furnace heat and open fire places. Mantels tile and brick. Bath rooms tile. Automatic water heaters. Exteriors covered with cement plaster. Plans complete and work to be done by Day Labor.

**APARTMENT HOUSE**—3 story and base, frame, \$8,000. San Francisco.

Architect, none. Owner, Alfred T. Morris, 501 11th avenue, S. F. Location, southeast corner of 11th avenue and Anza street. Will contain five suites of two and three rooms. Baths and wall beds. Interior finish pine with some elm panels and hardwood floors. Central heating system and hot water supply. Exterior covered with rustic and cement plaster. Plans complete and work to be done by Day Labor.

**SERVICE STATION**—1 story, steel frame. Cost not stated. San Francisco. Architect, John Reid, Jr., First National Bank Bldg., S. F. Owners, Richmond Oil Co. Location, 4th avenue and California street. Complete steel frame, cement plaster exterior and cement floor. Underground storage tanks. Corrugated iron roof. Plans complete and figures being taken.

**CHURCH ALTERATIONS**—\$5,000. San Francisco. Architects, Ward & Blohne, Alaska Commercial Bldg., S. F. Owners, St. John's Evangelical German Lutheran Church. Location, Howard and 21st streets. **Wybro Panels combine Ser-  
vice & Quality with Price.**

It is not alone the "price" that counts  
in buying panels. The quality is of  
more than passing importance.

WYBRO PANELS combine quality  
with service and price. Quality  
is first in Wybro Panels—the ser-  
vice they give is unsurpassed, and the  
price is just right—not high, nor low,  
but just the right price for the right  
panel.

200 varieties—price list free.

**STREET IMPROVEMENT**—Cost as follows, Hayward, Alameda Co., Cal. Engineer, City Engineer, Hayward. Owners, City of Hayward. At the last meeting of the City Trustees bids were opened for the B and Watkins streets crossing paving. Two bidders answered to the call for the work. The Ransome-Crummey Co., First National Bank Bldg., Oakland, bid for grading, 7c; for paving, 23c; six-inch sewer pipe, 70c; brick manhole, \$50. Californian Bitulithic Co., 1200 Franklin street, Oakland, grading, 3c; paving, 23c; six-inch sewer pipe, 80c; brick manholes, \$18. The matter of awarding a contract was laid over until the next meeting.

frame, \$2,000 each. Oakland, Cal. Architect, Frank J. Melbourne, 46 Kearny street, S. E. Owner's name withheld. Location, Eastlawn. Each house will contain five rooms and bath. Interiors finished in pine, hardwood and white enamel. Hardwood floors. Open fire places. Mantels tile and brick. Automatic water heaters. Exteriors covered with rustic and cement plaster. Plans complete and subfigures being taken.

**RESIDENCE**—1 story and base, frame, \$2,500. Berkeley, Alameda Co., Cal. Architect, none. Owner, C. J. Prang, 5487 Claremont avenue, Oakland. Location, north Derby east of California. Will contain five rooms, bath and sleeping porch. Interior finish pine and white enamel. Hardwood floors. Open fire place and tile mantel. Automatic water heater. Exterior covered with cement plaster. Plans complete and work by Day Labor.

**RESIDENCE**—2 story and base, frame, \$2,500. Oakland, Cal. Architect, none. Owner, Edward Larmer, 470 Boulevard Way, Oakland. Location, Alcatraz west of Hilleglass. Will contain seven rooms, bath and sleeping porch. Interior finish pine and white enamel. Hardwood floors. Open fire place and tile or brick mantel. Automatic water heater. Plans complete, work by Day Labor.

**RESIDENCE**—1½ story and base, frame, \$3,000. Piedmont, Alameda Co., Cal. Architect, E. H. Strong, 2721 Lincoln avenue, Alameda. Location, Bowle near York Drive. Will contain seven rooms, bath and sleeping porch. Interior finish pine and hardwood with some white enamel. Hardwood floors. Open fire places and tile mantels. Furnace heat. Bath room tile. Automatic water heater. Exterior covered with rustic and cement plaster. Plans complete and work by Day Labor.

**RESIDENCE**—2 story and base, frame, \$4,000. Oakland, Cal. Architect, none. Owner, William R. Crumme, 1627 25th avenue, Oakland. Location, east 24th avenue south of East 21st street. Will contain eight rooms, two baths and sleeping porch. Interior finish pine and hardwood with white enamel in the bed rooms. Hardwood floors. Open fire places and furnace heat. Mantels tile or brick. Bath rooms tile. Automatic water heater. Exterior covered with cement plaster. Plans complete and work by Day Labor.

**DAY HALL AND DORMITORIES**—2 story and base, brick and concrete,

Cost not stated. Oakland, Cal. Architect, Charles Peter Weeks, Mutual Bank Bldg., S. E. Owners, Alameda County. Bids opened for this work show Larsen-Sampson Co., S. E., low on the general construction at approximately \$75,000. Bids have been taken under advisement. A complete list of the figures submitted will be found under the heading of Oakland and Alameda County in this issue.

**SCHOOL ADDITION**—2 story and base, brick and concrete. Cost not stated. Alameda, Alameda Co., Cal. Architect, Henry H. Meyers, Kohl Bldg., S. E. Owners, City of Alameda. Plans for the addition to the Washington School are now practically complete and will be out for figures by the first of the year. Plans can be secured from the architect.

## Receive Figures For Alameda County Job.

**All Bids on Women's Day Hall and Dormitories Referred to Architect And Advisory Board.**

Segregated figures were received Monday, December 20, for the construction of the Women's Day Hall and Dormitories at the Alameda County Infirmary from plans by Architect Charles Peter Weeks, San Francisco. Construction will be of brick, steel and concrete. The following bids were received. All bids were referred to the Advisory Board and the Architect.

### General Construction.

Larsen-Sampson Co. .... \$75,000  
Heating, electric work and plumbing excepted.

Ward & Goodwin ..... \$2,878  
**Carpentry and Mill Work.**

J. C. Nielsen ..... \$4,650  
**Marble and Terrazzo Work.**

Oakland Concrete, Terrazzo & Mosaic Co. .... \$1,798  
**Terra Cotta and Roof Tile.**

N. Clark & Sons ..... \$6,900  
**Plastering and Cementing**

A. Knowles ..... \$4,941  
Greenbank Plastering Co. .... 4,125  
H. Bosch ..... 5,250  
Wm. Makin ..... 5,990  
Geo. Dixon ..... 5,800

### Glass and Glazing.

Cal. Plate & Window Glass Co. .... \$388  
W. P. Fuller & Co. .... 285

### Painting and Finishing Work.

J. C. Peterson ..... \$6,469  
Robert Swan ..... 2,740  
D. Zelinsky & Sons ..... 5,714  
James Cahill & Co. .... 4,960

### Finish Hardware.

Sunset Hardware Co. .... \$1,662  
Maxwell Hardware Co. .... 1,627  
J. C. Nielsen ..... 1,680

### Metal Furring and Lathing.

Greenbank Plastering Co. .... \$1,275  
Geo. Dixon ..... 1,560  
Wm. Makin ..... 1,575  
H. Bosch ..... 1,600  
A. Knowles ..... 1,100  
Donald Mowat (on plastering and cementing) ..... 7,492

### Masonry Work.

Lester H. Stock ..... \$16,688  
Meady & Collins ..... 19,760  
McGowan & Butler ..... 19,872

### Structural Steel and Erection.

Western Iron Works ..... \$13,889  
Golden Gate Iron Works (water ship) ..... 15,331  
Golden Gate Iron Works (rail ship) ..... 16,331  
Ralston Iron Works ..... 14,065  
Judson Mfg. Co. .... 15,990  
Pacific Rolling Mills Co. .... 14,623  
California Steel Co. .... 14,987  
Greater Iron Works (mill ship) 15,135  
Greater Iron Works (S. F. stock) 16,560

### Sheet Metal Roofing and Skylights.

Forderer Cornice Works ..... \$2,896  
Paraffine Paint Co. .... 2,525

### Ornamental & Miscellaneous Iron Work

California Steel Co. .... \$170  
Pacific Iron Works ..... 152

### Plumbing.

J. E. O'Mara ..... \$ 9,745  
Scott Company ..... 7,754  
Frederick W. Snook Co. .... 8,000  
Turner Co. .... 8,840  
(Vacuum clean, deduct, \$1560)

Whitman-Lyman & Co. .... 9,974  
(Vacuum cleaning, deduct \$1000)

Carl T. Doell ..... 11,288

### Heating.

J. E. O'Mara ..... \$5,177  
Scott Company ..... 4,840  
Turner Co. .... 8,480  
Whitman-Lyman & Co. .... 5,444  
Carl T. Doell ..... 5,258

### Electrical Work.

Putte Eng. & Elec. Co. .... \$2,142  
H. S. Tittle ..... 3,718  
Turner Co. .... 4,290  
Rex Elec. & Constr. Co. .... 3,282  
Central Elec. Co. .... 3,400  
Ne Page McKinney Co. .... 3,192  
Electric Constr. Co. .... 3,698  
Boynton Elec. Co. .... 4,440

## SAN JOSE AND THE SANTA CLARA VALLEY

**HOTEL ALTERATION**—\$50,000. Monterey, Monterey Co., Cal. Decorator, Mrs. Edgar de Wolfe, 1801 Van Ness avenue, S. E. Owners, Del Monte Hotel Co. The work will consist of complete rearrangement of the main floor and a large number of the bed rooms. New trim, hardwood floors, painting, plastering and electric work.

**SEWER CONSTRUCTION**—Cost as follows. South San Francisco, San Mateo Co., Cal. Engineer, Town Engineer, South San Francisco. Owners, Town of South San Francisco. Bids were opened on December 20th by the City Trustees of South San Francisco for extensive street improvements and sewer construction in 1st, 2nd and 3rd streets and portions of A, B and C streets. Bids were not regarded as satisfactory and will probably be rejected and new figures called. Following is a list of the bids received: E. H. Sundberg, 215 Oakland Bank of Savings Bldg., Oakland, \$38,599.95; Leech & De Camp, 14 Montgomery street, S. F., \$39,381.91; F. R. Ritchie, Chronicle Bldg., S. F., \$42,051.06.

**STREET IMPROVEMENT**—Cost not stated. Santa Clara, Santa Clara Co., Cal. Engineer, City Engineer Fisher, Santa Clara. Owners, City of Santa Clara. Plans are now being prepared by City Engineer Fisher for the elimination of a curve in the highway at the corner of Lincoln street and the San Francisco road. Property has been purchased by the City Trustees. On

the completion of the plans bids will be called for.

**ROAD CONSTRUCTION**—Cost not stated. Salinas, Monterey Co., Cal. Engineer, County Surveyor Cozens, Salinas. Owners, Monterey County. At the last meeting of the County Supervisors the plans and specifications of County Surveyor Cozens for the grading and improving of a portion of the San Miguel canyon road were adopted and approved, and bids for the same will be opened on Tuesday, January 1, 1916. Further information may be had from the County Surveyor or County Clerk at Salinas.

**STREET IMPROVEMENT**—Cost not stated. Santa Cruz, Santa Cruz Co., Cal. Engineer, City Engineer, Santa Cruz. Owners, City of Santa Cruz. At a recent meeting of the City Council a resolution adopting plans and specifications for sidewalks and curb on the north side of Walter street, between Catalpa street and Poplar avenue, was passed.

#### Contracts Awarded.

**STREET IMPROVEMENT**—\$2,211.50. Redwood City, San Mateo Co., Cal. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. Contractors, Colma Construction Co. Contract price, \$2,211.50.

**SEWER CONSTRUCTION**—\$1,315.56. Daly City, San Mateo Co., Cal. Engineer, Town Engineer, Daly City. Owners, Town of Daly City. Contractors, F. R. Ritchie & Co., Chronicle Bldg., S. F. Contract price, \$1,315.56.

### MARIN, CONTRA COSTA AND SONOMA COUNTIES

**STREET IMPROVEMENT**—Cost not stated. San Anselmo, Marin Co., Cal. Engineer, Town Engineer, San Anselmo. Owners, Town of San Anselmo. Only one bid, that of the Marin Rock Co., was presented for the improvement of Forest avenue, and was rejected as being too high. New bids will be called for at once.

**SEWER CONSTRUCTION**—Cost not stated. Antioch, Contra Costa Co., Cal. Engineer, Town Engineer, Antioch. Owners, Town of Antioch. At the last meeting of the Town Trustees, Town Engineer Oliver presented plans and specifications for a storm sewer to be provided to drain the intersection and blocks leading to it at the corner of 6th and B streets. Two styles of bids will be called for, one in which the contractor is to furnish the material and labor, the other the material and the town will perform the work. Bids will be asked for furnishing 2,000 feet of 3-inch screw joint pipe, double dipped f. o. b. Antioch. Further information may be had from the Town Engineer or Town Clerk at Antioch.

**CITY HALL**—2 story and base, reinforced concrete, \$50,000. Richmond, Contra Costa Co., Cal. Architects, James T. Narbett, associated with J. B. Oshorn, Richmond. Owners, City of Richmond. From bids opened late Saturday night in Richmond for the construction of the new City Hall, it was learned that Mathew Morton, of Richmond, and Williams Bros. & Henderson, Hollbrook Bldg., S. F., were the two lowest bidders. Both bids were taken under advisement. Morton's bid is said to be about \$1,400 higher than

Williams Bros. & Henderson. The approximate figure is \$28,000. There is \$25,000 in the fund to build this first unit and changes will be made in the plans in order to bring the cost of the building within that figure.

**RESIDENCES**—3, 1 story and base, frame, \$7,500. Hercules, Contra Costa Co., Cal. Architect, James T. Narbett, 701 Mardonald avenue, Richmond. Owners, Hercules Powder Co. These dwellings have been designed as double bungalows and each will contain five or six rooms. Interiors finished in pine and white enamel. Some hardwood floors. Open fire places and tile or brick mantels. Automatic water heaters. Exteriors covered with rustic and shingles. Plans complete and figures under advisement.

**STORE AND OFFICE**—2 story and base, brick and steel, \$11,000. Richmond, Contra Costa Co., Cal. Architect, James T. Narbett, 701 Mardonald avenue, Richmond. Owner, Dr. C. W. Cunningham. Will contain stores on the first floor and modern offices above. Interior finish pine and hardwood. Patent store fronts. Steam heat with oil burning system. Exterior faced with pressed brick. Plans being prepared.

**WATER PURIFICATION PLANT**—Cost not stated. Antioch, Contra Costa Co., Cal. Engineer, City Engineer, Antioch. Owners, City of Antioch. At the last meeting of the Town Trustees a suggestion was received from the State Board of Health relating to the installation of a chlorination plant to purify the water supply. The suggestion was adopted and bids for the installation of the plant were ordered received. Further information relative to this work may be had from the Town Clerk at Antioch.

**PACKING PLANT ADDITION**—1 story, reinforced concrete. Cost not stated. Pittsburg, Contra Costa Co., Cal. Architect, A. W. Cornelius, Merchants' National Bank Bldg., S. F. Owners, American Fish and Oyster Co. Addition will consist of cold storage room and packing space. Interior finish rough. Concrete floor and metal window sash and frames. Exterior faced with cement plaster. Plans being prepared.

#### Contracts Awarded

**SEWER CONSTRUCTION**—\$1,382.37. San Anselmo, Marin Co., Cal. Engineer, Town Engineer, San Anselmo. Owners, Town of San Anselmo. Contractors Marin Rock Co., San Anselmo. Contract price, \$1,382.37.

**WAREHOUSE**—2 story and base, reinforced concrete, \$116,000. Crockett, Contra Costa Co., Cal. Architects name not given. Owners, California-Hawaiian Sugar Co. Contractors, Clinton Construction Co., Mutual Bank Bldg., S. F. Contract price, \$116,000. Note: Subcontracts are now being let for the work.

**WATER MAINS, HYDRANTS, ETC.**—\$8,371. Temeca, Sonoma Co., Cal. Engineer, War Department, Washington, D. C. Owners, United States Government. Contractors, Pringle, Dunn & Co., 28 Pine street, S. F. Contract price, \$8,371.

**SCHOOL, PAINTING**—\$695. Pittsburg, Contra Costa Co., Cal. Architect, none. Owners, Pittsburg grammar School District. Contractor, C. J. Frisk & Co., 3419 23rd avenue, S. F. Contract price, \$695.

### FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA

**RESIDENCE**—1 story and base, frame, \$1,500. Fresno, Fresno Co., Cal. Architect, none. Owner, C. A. Clark, Fresno. Location, Orchard Hill Addition. Will contain five rooms, bath and sleeping porch. Interior finish pine and redwood. Some hardwood floors. Open fire place and tile mantel. Automatic water heater. Exterior covered with rustic and shingles. Plans complete and work to be done by Roy Labor.

**ROAD IMPROVEMENT**—Cost not stated. Bakersfield, Kern Co., Cal. Engineer, County Surveyor, Bakersfield. Owners, Kern County. Bids will be received until January 6th for grading, paving and construction of culverts in Division 6, Section 1, McKittick-Marleopa road, being that portion lying between the south city limits of Taft and the north city limits of Marleopa, length approximately 6.5 miles. Plans can be secured from the County Clerk.

**ROAD IMPROVEMENT**—Cost not stated. Bakersfield, Kern Co., Cal. Engineer, County Surveyor, Bakersfield. Owners, Kern County. Contractors, Federal Construction Co., Sharon Bldg., S. F. Contract price not stated. Paving three miles on the Bellevue road and also some distance on the Brundage Lane road.

**JAIL, COUNTER, ETC.**—Cost not stated. Bakersfield, Kern Co., Cal. Architect, Orville L. Clark, Brower Bldg., Bakersfield. Owners, Kern County. Bids will be opened on January 7th for furnishing a steel counter complete with box and roller drawers. Plans can be secured from the County Clerk.

**IRRIGATION WORK**—\$80,000. Oakdale, Stanislaus Co., Cal. Engineer, Burton Smith, Oakdale. Owners, Oakdale Irrigation District. Plans have been approved and bids are now being taken by the Oakdale Irrigation District for the extension of several laterals, installation of concrete gates, drops, etc. Bids on the work close January 15th. Further information may be had from Engineer Burton Smith.

**LIGHTING SYSTEM**—Cost not stated. Modesto, Stanislaus Co., Cal. Engineer, County Surveyor Edgar Ammer, Modesto. Owners, City of Modesto. At the last meeting of the City Council of Modesto, County Surveyor Edgar Ammer appeared to discuss the matter of lighting the new Tuolumne bridge, plans for which are now being prepared. In view of the fact that the city has not had to pay any of the cost of construction, it seemed to be the sentiment of the board that it would be no more than fair to provide for lights for the structure. No definite resolution was passed on this point, but W. L. Carpenter, city electrician, was authorized to visit San Francisco and consult authorities on the best means of arranging the lighting system.

### SACRAMENTO, STOCKTON AND NORTHERN CALIFORNIA

**BANK FIXTURES, ETC.**—Cost not stated. Sacramento, Cal. Architect, F. C. Sellow, 1201 J street Sacramento. Owners, Sacramento Valley Bank and

Trust Co., The Sacramento Valley Bank and Trust Co. will occupy the entire ground floor and basement of the new four-story building now under construction at the corner of 8th and J streets. The architect is calling for bids on the special bank fixtures, marble and tile work, electric work, lighting fixtures, plain and ornamental plastering, glass and vault work. J. Harry Wygant, 2110 X street, Sacramento, has the general contract for the building, which is now up to the roof.

**GARAGE**—1 story, hollow tile construction, \$5,000. Sacramento, Cal. Architect, none. Owner, Mrs. Edith Rockerby. Location 224 K street. Has been designed for a commercial garage and will have concrete floor, metal window sash and frames and special underground storage tank. Exterior faced with cement plaster. Plans complete and work to be done by Day Labor.

**RESIDENCE**—1 story and base, frame, \$1,500. Sacramento, Cal. Architect, none. Owner, William Jacinto, 319 W street, Sacramento. Location, 319 W street. Will contain five rooms and bath. Interior finish pine and redwood. Some hardwood floors. Open fire place and tile mantel. Exterior rustic and shingles. Plans complete and work by Day Labor.

**THEATRE**—3 story and base. Class A construction. Cost not stated. Stockton, San Joaquin Co., Cal. Architect, W. B. Thomas, Yosemite Theatre Bldg., Stockton. Owners, Henry Cowell Lime and Cement Co., leased to Turner & Dahnen Circuit. Location, Weber street. Fireproof construction, complete steel frame and reinforced concrete floors and walls. Steam heat, special ventilating system and vacuum cleaning. Ornamental plaster. Patent store fronts and metal window sash and frames. Upper floors arranged for offices, finished in pine and hardwood. Exterior faced with pressed brick and terra cotta. Preliminary plans being prepared.

**RESIDENCE**—2 story and base, frame, \$2,500. Petrolia, Humboldt Co., Cal. Architect, Frank T. Georgeson, Eureka. Owner, William Clark. Will contain six rooms and bath. Interior finish pine and redwood. Hardwood floors. Open fire place and tile or brick mantel. Automatic water heater. Exterior covered with rustic. Plans being prepared.

**WATER SYSTEM**—\$15,000. Woodland, Yolo Co., Cal. Engineer, City Engineer Arnold. Woodland. Owners, City of Woodland. As a result of thorough investigation, City Engineer Arnold plans to install two new wells at 185 feet in depth on the Grand street lot, a 10-inch high pressure pump, a 150-horsepower electric motor, a 120,000-gallon steel tank to be 100 feet from the ground and the necessary accessories, the estimated cost to be \$12,478. It is proposed to lay 250 feet of 12-inch pipe on Grand avenue and 1,200 feet of the same size on Lincoln avenue. Pipe 8 inches in diameter will be laid as follows: 1900 feet on Cleveland street, 2,100 feet on Pendegast street, 1,850 feet on Walnut street, 2,100 feet on Clover street. Pipe 6 inches in diameter, 1,000 feet on Pendegast street, 1,400 feet on 8th street and 350 feet on Clover street. Pipe 4 inches in

diameter would be laid in this wise: 1,600 feet on College, Pendegast and Gibson; 800 feet on 1st, Marshall and Gibson; 1,600 feet on 2nd, Marshall and Gibson; 1,600 feet on 3rd, Pendegast and Gibson; 1,300 feet on 4th, Pendegast and Gibson; 600 feet on North 5th and East streets; 600 feet on Elliott, 5th and East; 250 feet on Court, 6th and East. The estimated cost of this is placed at \$15,397.50. The estimated cost of laying the pipe is placed at \$5,000. The cost of gate valves and other accessories and the allowance for extras, incidentals and of engineering and supervision brings the total estimate up to about \$45,000.

**FLATS**—1 story and base, frame, \$2,500. Sacramento, Cal. Architect, none. Owner, Max Smith, Fairmont Hotel, Sacramento. Location 506 U street. Will contain two flats of four rooms each. Interior finish pine and redwood. Some hardwood floors. Open fire places and tile mantels. Automatic water heaters. Exterior covered with cement plaster. Plans complete and work to be done by Day Labor.

**LEEVEE CONSTRUCTION**—Cost not stated. Sacramento. Engineers, State Reclamation Board, Sacramento. Owners, West Side Levee District, et al. At a recent meeting of the State Reclamation Board, plans of the West Side Levee District for levee construction from Colusa down to Knights Landing were approved, with the reservation that the Sacramento and San Joaquin Drainage District would not be called on hereafter to compensate the West Side District for any levee construction in excess of the plans called for by the flood control project. The Board also named as Assessors for the district Fred H. Harvey, Geo. B. Greene and Ben. F. Rush. The application of District No. 355 for approval of its plans for a drainage ditch was granted. Application of the American Farms Co. for small levees on the Northern Electric Railway embankment near Shippe Station, Butte County, were approved as being outside of Sacramento and San Joaquin Drainage District and not detrimental to the flood control project.

#### Contracts Awarded.

**PASSENGER DEPOT**—Frame and crete. Cost not stated. Oroville, Butte Co., Cal. Architect's name not given. Owners, Northern Electric Co. Contractor, S. T. Cobb, Thermalito. Contract price not stated.

**PUMPS AND MOTORS**—Cost not stated. Colusa, Colusa Co., Cal. Engineer, none. Owners, Blevins and Mallon, Colusa. Contractors, Yuha Construction Co., Colusa. Contract price not stated.

**IRRIGATION WATER**—Cost not stated. McAdams, Sutter Co., Cal. Engineer's name not given. Owners, Irrigation District No. 70. The Missouri Valley Bridge and Iron Co. has been awarded a contract by District 70 to drive piling in the Girdner Bend in the river and in the Gairnir Bend on the slough. Several years ago a weir was put in at a cost of \$5,000 at the slough bend, but the first high water washed every thing away. Work will begin immediately.

### LOS ANGELES AND SOUTHERN CALIFORNIA

**RESERVOIR**—Reinforced concrete. Cost not stated. Pasadena, Los Angeles Co., Cal. Engineer, City Engineer Morris, Pasadena. Owners, City of Pasadena. Work on a twelve million gallon reservoir for the municipal water department will be started shortly. The structure will be erected between Sheldon avenue and the Vavra property south of the Sheldon wells. Plans for the structure are now being prepared. The reservoir will bring the water storage capacity of the municipal department to 63,850,000 gallons and will be the second largest in the chain of reservoirs of the city.

**BRIDGES**—Pile trestle. Cost not stated. Los Angeles, Cal. Engineer, County Surveyor, Los Angeles. Owners, Los Angeles County. Bids will be received by the Board of Supervisors up to 2 p. m. of Monday, January 3rd, for the construction of a pile trestle bridge on Mountain avenue, between School street and Burr avenue, and for a similar bridge on Palm avenue, between Michigan avenue and Cross street. They will each consist of a single 19-foot span and will have 20-foot roadway.

**PASSENGER DEPOT**—1 story, reinforced concrete, \$60,000. Riverside, Riverside Co., Cal. Engineer, Engineering Dept., Kerchoff Bldg., L. A. Owners, Santa Fe Railroad Co. The Santa Fe Railway is planning the construction of a depot on property bounded by 7th, 8th, Santa Fe and Salt Lake rights of way, one half of which the city council have voted to purchase. The ground will be improved by the city for a public park.

#### Contracts Awarded.

**SCHOOL**—1 story and base, frame, \$14,627. Santa Margarita, San Luis Obispo Co., Cal. Architect, J. J. Roth, Atascadero. Owners, Santa Margarita School District. Contractors, Engstrom Co., 5th and Seaton streets, L. A. Contract price, \$14,627.

### PORTLAND AND OREGON

**PUMPING PLANT AND RESERVOIR**—Cost not stated. Portland, Ore. Engineers, Gilbert & Hall, Couch Bldg., Portland. Owner's name withheld. Bids will be received until 7:30 p. m. January 1th for the materials and labor required in constructing a 200,000-gallon reservoir, pumping main, distributing main, etc. Separate proposals will be received as follows: (a) For constructing reservoir, pumping main and distributing mains, using machine banded wood stave pipe for part of the pumping and distributing mains. (b) For the same contract, using lap-welded steel pipe throughout. The equipment required includes 3,000 feet of 8-inch, 3,750 feet of 6-inch pipe and 11,000 feet of 4-inch pipe; also 20 fire hydrants. Bids for the pumping plant will be taken later. Further information may be had from the engineers.

#### Contracts Awarded

**WATER WORKS SYSTEM**—\$22,542.10. Milwaukee, Ore. Engineer, J. W. Morris, Milwaukee. Owners, Town of Milwaukee. Contractors, Gleibisch & Joplin, Rothchild Bldg., Portland. Contract price, \$22,542.10.

## SEATTLE AND WASHINGTON

**STORAGE EQUIPMENT**—Cost as follows. Seattle, Wash. Engineer, Port of Seattle Commission, Bell street dock, Seattle. Owners, City of Seattle. Bids opened by the Port of Seattle Commission for the installation of equipment in the apple storage warehouse, for which Harrington & Peters, Oriental Bldg., Seattle, are general contractors, resulted as follows: Andrew MacLean, \$142,740; York Mfg. Co., \$171,100; Vilter Mfg. Co., \$126,500; Harrington & Peters, \$117,500. All bids taken under advisement.

**POST OFFICE**—1 story and base, brick and stone. Cost not stated. Ellensburg, Wash. Architect, Supervising Architect, Washington, D. C. Owners, United States Government. Plans have been forwarded to the west for the construction of the new Federal building. Bids will be taken for the entire work, including the heating, ventilating and electric work and fixtures. Plans can be secured from either the Supervising Architect, Washington, D. C., or from the Custodian of the site at Ellensburg. Bids will be opened on January 27th. An official proposal appears in another column of this issue.

**SCHOOL GROUP**—2 and 3 story, brick and reinforced concrete, \$250,000. Seattle, Wash. Architect, School Architect Edgar Blair, Seattle. Owners, City of Seattle. Preliminary plans for the West Seattle School are now being prepared. Other than the fact that the building will be of fireproof construction no details have been given out. Further mention will be made of the work.

## LIEN LAW UPHOLD.

At last the Supreme Court has passed upon the lien law and has declared the provisions of the present statute valid in every particular. Not only its general provisions but the anomalous clause relating to the 50 per cent bond has also been declared to be valid so that the question of how the courts of the State may decide on any of its provisions are now finally set at rest.

In an exhaustive opinion delivered by Justice Shaw and concurred in by all the judges of the Supreme Court has upheld all the provisions of the present statute. The case came up on appeal from Los Angeles County, Roystone Co. vs Darling, L. A. 1072, and was decided in bank on Wednesday the 15th day of December. The court reviews the legislation and decisions on the subject since 1850 and passes upon all the provisions, both on the history of legislation and its relation to the constitution. Justice Henshaw writes a concurring opinion in which he upholds the law but arrives at his conclusion for a different reason and states that Section 15 of Article XX of the Constitution of 1879 provides for a mechanics' lien and that the legislature of 1911 enacted a law that carried out this provision with the exception of the anomalous provision of the 50 per cent bond clause in Section 1183 which, he says, introduces an ambiguity and was upon its face an attempt to introduce something that should not be in the law. The reasoning of Justice Hen-

shaw is clear and concise, he brushes aside the longwinded argument of the main decision and arrives at his conclusion that the Constitution itself provides for a mechanics' lien and that it was the duty of the legislature to enact one, though it has taken more than 50 years to get a law in proper form.

James Metcalfe, the theatrical critic on "Lite," some years ago brought an action against the theatrical trust for preventing him from entering 47 theatres in New York and thus depriving him of his occupation and means of living. He had dared to criticize the demoralizing shows that the trust was foisting on the public so the trust debarred him from the theatres it controlled, and it controlled all of them. The case went up to the Supreme Court of the State of New York and Metcalfe lost. In the head note to his comment on the decision there was the picture of a parrot, and on the ground that it considered itself bound by an old decision and parrot like repeated the words handed down from a distant period, whether the original decision was based on sound sense or reason or was the whim and caprice of some crooked-minded judge.

So in the present case, the court in its main decision, seems to consider itself bound by the old decision of Latson vs Nelson, decided in 1882, a case which was never officially reported, and professes not to know what the expression "direct lien" used in the present statute means. However the court, while attempting to be consistent with itself, upholds the present law and by so doing virtually over rules the decision in Latson vs Nelson. Thus at last the provisions of Section 15 Article XX of the Constitution have been carried out and a workable lien law has been placed upon the statutes of the State of California.

It is right and proper that the people engaged in the great building industry should give credit to the men who succeeded in having this law enacted. And the major part of it should go to Major William S. Scott, Secretary of the California Building Law Association, and now Senator from the 20th District. Not that the men who sent him to Sacramento and supported him at every turn should not be given full credit; nor that the great part played by the late Alexander G. Ellis should be overlooked. It was this great lawyer who drafted the law, who met every objection that the banks and bonding companies could raise and kept them finally from slipping in a joker that would nullify the law in the end. But it was the irrepressible Major who fought the fight all the way through, it was he who was the thorn in the side of the opposition, it was he who would not down and who made so much noise that he forced the fight out into the open and finally succeeded in getting passed the law which has just been declared to be valid. It is hard work, a herculean task, and it is altogether probable that no other two men outside of W. S. Scott and Alexander G. Ellis would have ever got it through. It is a good law. The only suggestion contained in the decision is that of Justice Henshaw who says he upholds the law until the legislature by

proper enactment shall enact a law that will carry out more fully the provisions of Section 15, Article XX of the Constitution. By that he means that the 50 per cent bonding provision should be eliminated and the law be enacted in its simplicity as originally drafted by Mr. Ellis. The main fight has been won so far, and the law is working well. If the fly-up-the-creek contractors and crooked owners and bonding companies had a means of evading it in the future the Supreme Court itself has suggested the enactment of a law that would give the direct and unimpaired lien.

## CONDUIT SYSTEM PLANNED.

**MARTINEZ, Cal.**—All telephone and electric wiring in the city limits are to be placed under ground. A conduit system is to be advocated immediately. Councilman J. E. Colton will introduce an ordinance providing for this, and it is understood he has the support of fellow officials.

## APPROPRIATION FOR WATER HOLES.

**WASHINGTON**—The senate public lands committee has favorably reported on the Works bill appropriating \$10,000 for water holes in California deserts.

## TWO MILLIONS NEEDED FOR ALASKA RAILWAY WORK.

**WASHINGTON**—A deficiency appropriation of \$2,000,000, which Secretary Lane said is needed at the earliest possible moment to enable the continuance of construction of the Alaskan railroad, has been asked of Congress by Secretary McAdoo.

## GERMANS DIG CANAL.

**BERLIN**—Construction of another link in the German canal system has been begun. The new canal is to connect the Rhine and Ruhr rivers in Westphalia. It will run from Herten to Mueheim-Am-Ruhr and will be of sufficient depth to accommodate large ships.

## CABINET MAKERS.

Hunter, R. J., expert cabinet maker 2156 Telegraph Ave., dealer in mahogany, antique and all kinds of furniture, repairs and polishing. Telephone Oakland 2733.

### RESULT OF TRADE OPPORTUNITIES

Crossed John Oliver Lane reports that as a result of Foreign Trade opportunities No. 17823, published in Commerce Reports on August 9, 1915, an electrician, engineer or Kanachu has placed an order for electric material for a hotel in that Indian metropolis. He also states that orders for electrical implements have been placed in the United States.

### ELECTRIC PLANT FOR STATION IN MANCHURIA.

London, China, Nov. 4.

The Nippon Chubu Electric Co. states that a British firm has made a contract for a electric plant for a new station at Station H. The station is on the line of the Chinese Eastern Railway, about 100 miles east of Harbin. It is stated that the capacity of the plant will be sufficient to power the station and surrounding area. The plant is to be completed in 1916.
